Like *Gargantua*, *Pantagruel* has an elaborate introduction by Alcofribas, but it is less allusive and revealing because it is written earlier. Accordingly, this book has less unity and thematic integration. Yet it is, in the end, more important, since it lays the foundation of the series and characterizes Pantagruel and Panurge, who dominate the later books.

The structure of *Pantagruel* parallels that of *Gargantua*, although the two are absolutely different in detail and incident. The opening recounts the hero's birth and upbringing. Both heroes are appropriately enormous; Rabelais devises ingenious techniques of feeding and clothing them. Finally seeking his own education, Pantagruel visits many of the leading universities, exposing outmoded educational methods. After exploring the libraries of Paris, he receives a letter from his father containing Gargantua's prescription for education. Rabelais drops the ironic mask and gives advice that is more than sound: He suggests educational reforms at least a century before their time.

In Paris, he meets Panurge, the archetypal graduate student as social climber and sidekick. Together, the two expose a series of academic humbugs, in the process accumulating a gang of sympathizers. Hearing that the Dipsodes are overrunning Utopia, Pantagruel feels fated to establish order there. To do so, he designs a successful campaign of schoolboy ingenuity. At the end, Pantagruel must administer his conquest, including distribution of wine.

*Tiers Livre* (1546; *Third Book*, 1693), book 3 of *Pantagruel*, superficially continues the latter, but it actually departs radically in format and structure. It is Rabelais's masterpiece. Rabelais drops the mask of Alcofribas and speaks in his own person. He can do this because the book has the *privilege* of the king—that is, the author has immunity from

prosecution. He begins with the unfinished business of *Pantagruel*, disposing of it quickly to address its central topic: the *querelles des femmes*, or woman question, the major literary and social controversy of the mid-sixteenth century. A number of circumstances had combined to alter the perception and the role of woman and the function of love in marriage. Rabelais examines this by depicting Panurge as suddenly obsessed with marriage. He wants a guarantee of female fidelity. This obsession directs the rest of this book and the two following. Book 3 reaches no conclusion, but it ends with the description of *pantagruelion*, which humans should cultivate in order to live happily.

## SUMMARY

François Rabelais is one of those rare writers who define and test the boundaries of fiction, especially of comedy. The range of his comedy is broad, running from the coarse physical to the arcane intellectual. Like the greatest comic writers, however, his underlying purposes are quite serious. He ceaselessly attacks hypocrisy and repression and advocates personal freedom and self-expression through his characters, the giants Gargantua and Pantagruel.

James L. Livingston

## JEAN RACINE

**Born:** La Ferté-Milon, France  
December 22, 1639 (baptized)

**Died:** Paris, France  
April 21, 1699

*Racine was the greatest tragic playwright of France. His eleven tragedies combine stylistic elegance with extraordinary psychological depth.*

### BIOGRAPHY

Jean Baptiste Racine (ra-SEEN) was born in the small French town of La Ferté-Milon and was baptized on December 22, 1639. His parents, Jean and Jeanne Racine, were relatively poor. His mother died in childbirth on January 28, 1641, and his father died on February 6, 1643. Racine and his sister were adopted by their maternal grandmother, Marie Desmoulins. In 1649, she left Racine's sister with a cousin in La Ferté-Milon and moved to Paris so that she could become a nun in the Jansenist convent at Port-Royal des Champs, where her daughter Agnès was the abbess. The young Racine became a pupil at the Port-Royal School, where he received a superb classical education. The quality of the teaching at the Port-Royal School was held in the highest esteem even by those who did not agree with the Jansenists' efforts to make major reforms in French Catholicism. Racine read Greek and Latin with equal fluency.

In 1661, he moved to the small French city of Uzès in the vain hope that a cousin would find a good position for him, but Racine soon tired of Uzès and returned in 1663 to Paris, where he met Molière, who was both a famous comic playwright and the director of the Palais-Royal theatrical company. Molière's troupe performed Racine's first two tragedies, *La Thébaïde: Ou, Les Frères ennemis* (pr., pb. 1664; *The Theban Brothers*, 1723) and

*Alexandre le Grand* (pr. 1665, pb. 1666; *Alexander the Great*, 1714), but only two weeks after the first performances of *Alexander the Great*, the Hôtel de Bourgogne, which was then the other important Parisian theatrical company, started performing the same play. The Hôtel de Bourgogne performed all eight plays that Racine wrote between his first great dramatic success, *Andromaque* (pr. 1667, pb. 1668; *Andromache*, 1674), and *Phèdre* (pr., pb. 1677; *Phaedra*, 1701), the last play that he wrote before his first retirement from the theater. It has always been assumed that the members of the Hôtel de Bourgogne troupe had offered Racine more money than Molière had. Because of the poverty of his youth, Racine never neglected an opportunity to make money. He was elected to the French Academy in 1673. His brilliant tragedies, based largely on classical mythology and history, were very well received by Parisian theatergoers, and he soon supplanted the aging Pierre Corneille as the major French tragic playwright of the 1660's and 1670's. Although he did write one comedy, *Les Plaideurs* (pr. 1668, pb. 1669; *The Litigants*, 1715), which is a free adaptation of Aristophanes' *Sphèkes* (422 B.C.E.; *The Wasps*, 1812), it is generally considered to be less significant than any of his last nine tragedies. On January 1, 1677, *Phaedra* received its first performance. *Phaedra* is almost universally recognized as the most profound French tragedy ever written.

For reasons that have never been fully explained, Racine retired from the theater at the age of thirty-seven in order to accept a position as the historiographer of King Louis XIV. Critics have hypothesized that Racine made this decision either

for financial reasons or because of his belief that he could not possibly write anything better than *Phaedra*. Whatever his motivation may have been, Racine applied himself to this well-paying position and composed numerous well-crafted poems in praise of Louis XIV. In 1677, Racine married Cathérine de Romanet. They had five daughters and two sons. Their youngest child, Louis, wrote lyric poetry and a biography of his father.

In 1689, King Louis XIV's second wife, Madame de Maintenon, asked Racine to compose an edifying tragedy on the biblical story of Queen Esther for the young students at Saint-Cyr, the first school in France for girls. As the founder and chief benefactor of this school, the queen wanted young students to appreciate the beauty of the French language and to practice reciting well-written dramatic verse. Two years later, he wrote a second biblical tragedy, *Athalie* (pr., pb. 1691; *Athaliah*, 1722), for the same school. During Racine's lifetime, these moving biblical tragedies were performed only by the pupils at Saint-Cyr, but they have been performed regularly in France since the eighteenth century. Racine's loyalty to the royal family was appreciated by the king, who paid him a good salary for the remainder of his life. In 1695, Racine was even named an adviser to King Louis XIV. It was an extraordinary honor for a subject such as Racine whose parents had been so poor. Racine died on April 21, 1699, in Paris. At his request, he was buried at Port-Royal des Champs, where he had been educated.

### ANALYSIS

Although he did write one witty comedy, *The Litigants*, Racine has remained famous almost exclusively for the nine tragedies that he wrote between *Andromache* in 1667 and *Athaliah* in 1691. His first two plays, *The Theban Brothers* and *Alexander the Great*, are rather weak tragedies, and critics generally agree that there is a significant difference in quality between these two early plays and his later tragic masterpieces. Like Corneille, who was the other great French tragic playwright in the seventeenth century, Racine depicted very effectively the use and abuse of political power, but Racine also developed profound connections between love and violence and created both sympathetic victims and psychologically complicated and fascinating villains.

*Britannicus* (pr. 1669, pb. 1670; English translation, 1714) illustrates beautifully Racine's creative method. This tragedy deals with very famous historical characters whom the Roman historian Tacitus had analyzed in his *Ab excessu divi Augusti* (c.116 C.E.; *Annals*, 1598). Although the title character in this tragedy is the half brother of Emperor Nero, Racine affirms in his preface that the main focus is not Britannicus but the evil Nero. Racine speaks of Nero thus:

I always considered him to be a monster. But here he is a monster being born. He has not yet set fire to Rome. He has not yet murdered his mother, his wife, his governors.

Spectators fully expect Nero to be depicted as the violent and dangerous criminal that he was. In *Britannicus*, there are six major characters. The three virtuous characters are Britannicus, his beloved Junie, and Nero's good adviser, Burrhus. The three amoral characters are Nero, his mother, Agrippina, and his evil adviser, Narcissus. Against the wishes of her late husband, Emperor Claudius, Agrippina had Nero placed on the throne instead of Britannicus. Now that he is emperor, Nero has no further need for his mother. He has begun to act violently. Although he knows that Britannicus and Junie love each other very much, he has Junie abducted "in the middle of the night." She fears being killed or raped by him. Narcissus encourages his master to satisfy his every desire, and this advice pleases Nero immensely. Racine describes Nero as a sadist who enjoyed making Junie suffer and weep. Nero tells her that if she confesses her love to Britannicus, he will have his half brother murdered. As the lovers talk, Nero listens in the wings. Junie is terrified, and Britannicus cannot understand why his beloved is now so distant.

In act 3, Junie is finally permitted to express her true feelings for Britannicus and tries in vain to persuade him to flee from Rome. The hypocritical tyrant Nero returns to the stage and affirms that it is only just for him to have Britannicus arrested because his half brother dared to criticize the abduction of Junie. In act 4, Nero tells his mother that he has no intention of obeying those laws that interfere with the satisfaction of his violent sexual desires. For him, murder and rape are permissible, but he promises to Agrippina that he will spare the

life of his half brother. Although Agrippina is deceived by Nero, the spectators are under no such delusions. They know that Britannicus will soon be killed. Burrhus describes how Nero himself murdered his half brother. While proclaiming his friendship for Britannicus, Nero gave him a cup of poisoned wine. The unsuspecting Britannicus died instantly, and the witnesses realized that Nero had poisoned his half brother. Although the spectators are angered by the death of Britannicus, there is some poetic justice in this tragedy. As Junie fled from the imperial court in order to reach safety with the Vestal Virgins, Narcissus attacked her in the streets. The onlookers killed Narcissus in order to prevent the rape or murder of Junie.

Although much violence takes place offstage in Racine's tragedies, his style is consistently elegant and refined. Racine is a very effective dramatic poet. His virtuous and villainous characters express themselves in similar styles, but the spectators learn to distinguish very carefully between the way that Racine's characters speak and act. Appearance and reality are quite different in his tragedies. In *Athaliah*, for example, the title character is a monstrous grandmother who tried to kill all her grandchildren in order to seize power in Judea. She learns that her grandson Joas is still alive and is being protected by the high priest in the temple in Jerusalem. When Athaliah describes herself as a loving grandmother whose sole wish is to see her only surviving grandchild, neither the high priest Joad nor the spectators are deceived. They realize that she is a lying hypocrite whose eloquent language belies her criminal nature. Although there is a clear distinction between moral and amoral characters in Racine's tragedies, the villainous characters are often much more interesting, largely because they try so hard to deceive others, and it often takes much time for the virtuous characters to appreciate the full moral turpitude of these villains who misuse political power for their own selfish reasons.

## ANDROMACHE

**First produced:** *Andromaque*, 1667 (first published, 1668; English translation, 1674)

**Type of work:** Play

*As a prisoner of the Greeks after the end of the Trojan War, Andromache must overcome her hatred for the Greeks in order to save her young son, Astyanax, from death.*

*Andromache* was Racine's first tragic masterpiece. This play describes the destructive links between love and violence and shows how the four major characters tried to destroy one another through manipulation and threats. As this tragedy begins, Andromache (widow of the Trojan military hero Hector) is a prisoner with her young son Astyanax in Epirus, where the Greek king, Pyrrhus, reigns. Pyrrhus is engaged to the Greek princess Hermione, whom he wishes to repudiate so that he can marry Andromache. Hermione still loves Pyrrhus, but she is loved by Orestes, whom other Greek cities have sent as an ambassador to Epirus to demand that Pyrrhus execute Astyanax. The Greeks have an irrational fear that if Astyanax reaches manhood, he will avenge his father's death and conquer Greece. *Andromache* begins a full year after the destruction of Troy.

In act 1, Pyrrhus seems to be a very sensible monarch who values human life. He argues that it is morally unacceptable for the Greeks to seek the death of an innocent child. Pyrrhus is, of course, correct. In the very next scene, however, Pyrrhus is revealed as a hypocrite. In a very formal style, he tells Andromache that Astyanax will be promptly executed unless she agrees to marry him. His extreme brutality and overt abuse of political power inspire terror in Andromache. When Hermione first appears in act 2, she describes herself as a vulnerable and unstable character with a tendency toward violence. She had encouraged the Greeks to seek the death of both Astyanax and Andromache because Hector's widow was her rival for the love of Pyrrhus. Orestes loves Hermione, but he allows himself to be manipulated by her because he is afraid of losing her. He does not object when she asks him to prove his love for her by assassinating Pyrrhus if he marries Andromache.

The residents of Epirus are enraged because they realize that influential people such as Pyrrhus, Hermione, and Orestes are willing to use violence in order to satisfy their own sexual desires. An uprising is becoming more and more likely. As a prisoner, Andromache does not know that Pyrrhus may soon be overthrown by his own subjects. She is haunted by a recurring nightmare. She keeps seeing the deaths of her husband, parents, and cousins during the sacking of Troy and cannot forgive the Greeks, who killed so many Trojans before her eyes. The past weighs heavy on Andromache, who has become a prisoner of her terrifying memories. She

finally decides to marry Pyrrhus, but she intends to commit suicide immediately after the marriage ceremony. She hopes that Pyrrhus will keep his promise and preserve Astyanax from death. Between acts 4 and 5, however, Pyrrhus is killed just before his marriage to Andromache can be celebrated.

Racine wrote two separate versions for act 5 in

*Andromache*. In the original 1667 version, Andromache returns to the stage after the assassination of Pyrrhus and seems to relish her new political power. She has been transformed into a rather unsympathetic politician. In the 1676 version of *Andromache*, she does not return to the stage after the death of Pyrrhus. In this version, spectators retain a much more favorable opinion of her profound dignity. This tragedy ends very badly for the violent characters. Hermione commits suicide, and guilt drives Orestes mad. The spectators realize, however, that little hope for a better world exists because the innocent Astyanax will die at a young age. *Andromache* is a very effective tragedy that continues to fascinate.

## PHAEDRA

**First produced:** *Phèdre*, 1677 (first published, 1677; English translation, 1701)

**Type of work:** Play

*Phaedra is torn between the duty that she feels for her profligate husband, Theseus, and her love for her stepson, Hippolytus.*

*Phaedra* is the most problematic tragedy written by Racine. Ever since its first publication in 1677, critics have been proposing the most diverse interpretations for this tragedy. As *Phaedra* begins, Hippolytus announces his intention of leaving his homeland, although he is unwilling to explain the reasons for his decision. In the following scene, Oenone, who is Phaedra's confidant, informs Hippolytus that Hippolytus's stepmother, Phaedra, is exceedingly depressed and cannot receive visitors. When she is alone with Oenone, Phaedra speaks of her fatalistic view of the world. She believes that "everything is conspiring to harm" her. Although she realizes that it is wrong for her to feel passion for her stepson because her husband is still alive, Phaedra cannot resist this forbidden love, which she describes as "Venus completely attached to her prey." Spectators and readers of *Phaedra* can never determine with any certainty if Phaedra is deceiving Oenone or if she truly considers herself to be a victim of love and fate. *Phaedra* is a marvelously ambiguous tragedy.

Near the end of act 1, a false report is given that Theseus has died during his travels. Oenone suggests that the death of Theseus renders legitimate Phaedra's passion for Hippolytus, but there are two major obstacles. First, Hippolytus loves and wishes to marry Aricia, a royal princess from Athens. Racine describes Hippolytus and Aricia as sympathetic young lovers who are afraid that their parents will object to their marriage because the two come from different regions of Greece. Secondly, Phaedra learns in act 3 that her husband is still alive. During the second act, Phaedra confesses her passion to her stepson, who reacts with disbelief. When she realizes that Hippolytus has rejected her love, she takes Hippolytus's sword. Just before Theseus returns, Phaedra learns to her horror that Hippolytus loves Aricia. The enraged Phaedra

seeks revenge. She tells her husband that Hippolytus tried to rape her and assures Theseus that she grabbed his sword in order to defend herself from her violent stepson. The self-righteous Theseus, who had seduced and raped several women, calls upon the gods to punish his son with death. A terrible injustice is committed when the gods send a sea monster, which kills Hippolytus. Theramenes, who had been a father figure to Hippolytus, describes his death in a long speech. Theramenes' narrative is almost universally recognized as the most moving and eloquent speech ever written by Racine. It is difficult not to weep when listening to Theramenes' description of the death of this innocent young person. Phaedra then returns to the stage, admits the baseness of her accusations against Hippolytus, and states that she has swal-

lowed poison. She leaves the stage in order to die. The repentant Theseus offers to serve as a father for Aricia, but she will have nothing to do with the tyrant who was responsible for the death of her beloved Hippolytus.

### SUMMARY

Jean Racine was both a very fine poet and a profound playwright whose tragic vision of the world continues to fascinate theatergoers and readers almost three centuries after the end of his literary career. Racine had the extraordinary ability of transforming famous episodes from ancient history and mythology and from the Old Testament into powerful tragedies that express with refined eloquence the intense suffering of his characters.

Edmund J. Campion

## ERICH MARIA REMARQUE

**Born:** Osnabrück, Germany  
June 22, 1898

**Died:** Locarno, Switzerland  
September 25, 1970

*Author of one of the world's most famous war novels, Remarque made additional contributions to literature in a series of novels about alienated war veterans and political exiles.*

### BIOGRAPHY

Although the success of his thirteen novels, notably *Im Westen nichts Neues* (1929, 1968; *All Quiet on the Western Front*, 1929, 1969), eventually allowed him the indulgences of a glamorous lifestyle and international notoriety, Erich Paul Remark began life in modest circumstances. He was born in imperial Germany in the ancient city of Osnabrück on June 22, 1898. The Remarks were Catholic in a predominantly Protestant region and both his mother and father (Peter Remark was a book printer and binder) descended from generations of Franco-German craftsmen. Both pride in his family's French origins and dismay over the inadequacy of his early writing led Erich in 1923 to change his name to Erich Maria Remarque (ruh-MAHRK), the name by which his readers knew him.

Erich's parents and his two younger sisters moved often in Osnabrück to avail themselves of low rents. Since many of Remarque's writings were semiautobiographical, the settings familiar to these dwellings later emerged in his novels. So, too, did some of his childhood interests: collecting butterflies, stamps, and stones painting, playing the piano and organ, and writing. Teaching piano, in fact, earned him his early pocket money and a prizewinning essay in 1916 brought him his first money as a writer.

Opportunities for the upward mobility of intelligent working-class children were limited in Wil-

helmine Germany. Educated in Catholic primary schools between 1904 and 1912, Erich at fourteen had almost no choice except to enter an inexpensive Catholic preparatory school where he underwent instruction preliminary to becoming a schoolteacher—an occupation he later found hidebound and mind-numbing. Meantime as Germany entered its second year of war, he joined an artistic and literary group whose members soon provided material for characters in his early novels.

War caught up with Remarque in November, 1916, when he was drafted into the army, thereby setting in motion experiences from which sprang *All Quiet on the Western Front*. After basic training, he and several other Osnabrückers were detailed to a guard reserve division behind the Arras front in northwestern France and were then moved forward to a sapper company. Late in July, 1917, Remarque carried a wounded comrade from under fire, though the man later died from his wounds. A few days later, as the Battle of Flanders raged, Remarque himself was wounded in the left leg, neck, and right arm by British shell fragments. From July, 1917, until November, 1918—a time during which his mother died of cancer—Remarque was hospitalized. His reassignment to active duty came four days before the armistice that ended the fighting on November 11. Those men with whom Remarque served accounted him a good comrade and a calm, competent soldier. They were surprised, however, when after the war Remarque affected a rank that he never held and sported medals that he never earned.

Between 1919 and 1922, when he was not unem-

ployed, Remarque taught school—which he disliked as much as his superiors disliked him. At other times he sold dry goods, worked for a stone cutting firm, and published *Die Traumbude* (the dream room) in 1920, a novel whose shortcomings mortified him. From 1922 until 1924, he held his first good job as the publicity director for the Continental Rubber Company and editor of its advertising and trade journal. It was a post that helped improve his writing, allowed him extensive travel, and initiated his lifelong interest in race car driving. By 1925, he had married and taken a new job as illustration editor for a Berlin sports paper that soon serialized some of his writings.

Publication of *All Quiet on the Western Front* dramatically altered Remarque's life. It secured him an international readership along with considerable fame. It also immersed him in acrimonious controversies with German ultranationalists, as well as with literary critics. The novel was written in six weeks and was published in book form in 1929 after prior serialization in a German newspaper. Assured of readers, Remarque settled into a writing career that resulted in the creation of ten more novels between 1931 and 1970.

A very private man, Remarque nevertheless lived what appeared to be a glamorous and newsworthy life. Handsome, charming, urbane, and elegant in dress, he loved driving race cars, despite accidents. He gained stature as a skillful art collector. His wit and conviviality facilitated acquaintanceships throughout society and brought him a wide range of friends, among them comedian Charlie Chaplin, writers Stefan Zweig, Ernest Hemingway, and F. Scott Fitzgerald, and songwriter Cole Porter. Remarque divorced his first wife after four years of marriage. He remarried her in 1938 solely to aid her escape from Nazi Germany and then divorced her again. He was intimately associated with beautiful and accomplished women, notably Greta Garbo and the German American film actress, Marlene Dietrich. Driven from Germany and stripped of his German citizenship by the Nazis in 1939, he acquired American citizenship in 1947. For several years he had homes in Switzerland, New York, and Los Angeles, where, in Hollywood, many of his novels were filmed and where he met and later married the beautiful and intelligent film actress Paulette Goddard.

Remarque's life, however, was not without tragedy.

He lost his mother and a number of friends during World War I. He was grieved by the loss of his German citizenship. A beloved sister was beheaded by the Nazis, largely because of his writings. Osnabrück, the city dear to him in his youth, lost its appeal for him, although the city eventually honored him for his writings. In addition, literary critics, particularly in Germany, tended to be harshly unappreciative of his work. Moreover, in time, despite his affection for the United States, the ugliness of American life persuaded him to live abroad for lengthy periods. Not least, a series of heart attacks in the 1960's diminished the quality of his writings. Years of heavy drinking contributed to his death on September 25, 1970, in Locarno, Switzerland.

## ANALYSIS

Remarque's creative life was encompassed by World War I and the collapse of imperial Germany, the atrophy of German democracy in the 1920's, the rise of Nazism, and the outbreak of World War II. These historic episodes were unprecedented in human experience. Western values, where they survived, were continuously under political and intellectual assaults for more than half a century. Remarque's novels focus on the plights of ordinary men and women—common soldiers, demobilized and alienated veterans, displaced persons, political exiles, and victims of totalitarian regimes. His characters are people uprooted from their pasts. Unable to turn backward for strength, they lose a sense of who they are. They live constantly in harm's way. The hazards to which they are exposed and their helplessness cause them to question whether life has any meaning.

This was Remarque's question, one to which he had an answer (no) confirmed by the cataclysmic events of his times. Scholars and critics who have examined Remarque's works disagree about his contributions to literature. They agree overwhelmingly, however, that he had abandoned most of his faith in humanity even before the Nazis' acquisition of power in 1933 and that any faith he may have retained disappeared after that. Remarque quite specifically surrendered hope in the humanity of Germans. He believed that Nazism and its horrors were manifestations of a Faustian bargain, which, figuratively, the Germans had struck with history.

Since life had no meaning for Remarque, his novels are filled with ironies and paradoxes that he considered integral to existence. Through his characters he hammered the theme that life is unfair, that good things happen to bad people, and that humanity's dreams and its hopes for miracles were bound to be dashed. Remarque's stories are rich in contradictions and opposing symbols. In *All Quiet on the Western Front*, for example, he draws a sharp contrast between the fighting front and conditions at home. In *Der Funke Leben* (1952; *The Spark of Life*, 1952), the contrast is between the lives of concentration camp inmates and those of people who live in a white house on a nearby hill, which to them symbolizes order and hope. When they are liberated, it proves to have been an illusion. Similarly, in *Schatten in Paradies* (1971; *Shadows in Paradise*, 1972), Remarque's antithesis is between the precarious existence of refugees and the unrealities of the American paradise. In *Drei Kameraden* (1938; *Three Comrades*, 1937) and *Der Himmel kennt keine Günstlinge* (1961; *Heaven Has No Favorites*, 1961, also known as *Bobby Deerfield*, 1961), his juxtaposition is between the town and the sanatorium, while in *Der schwarze Obelisk* (1956; *The Black Obelisk*, 1957), it is between the town and the asylum. Remarque's characters are full of contradictions and are almost uniformly unable to make sense out of these opposites.

Given his perception of life, Remarque avoided using his novels as petitions for or against any political ideology. Still, his work does incorporate observations—numerous ones in fact—about the chief political, social, and economic issues of his time. To the extent—and it is considerable—that he deals with the plights of refugees, with unemployment, with the devastations wrought by totalitarianism (and all other forms of political extremism), and with the lives of underdogs in materialistic societies, he was a political author. Critics often excoriated him for his failure to grapple directly with the grand philosophical and ideological problems of his times. By way of answer, Remarque made it clear in his writings that philosophical debates and ideologies simply magnified the cruelties that were already endemic to life. At the same time, he spoke to humanistic values and individual dignity as they endured in this context.

Remarque sought to be a spokesman for his generation of Europeans, so many of them oppressed,

disillusioned, war weary, and adrift from their traditions. In this capacity, he is an eminently readable author and therefore a popular one. His novels often sold by the millions. They were translated into scores of languages and in some instances were transformed into film classics. Such success is what many critics considered damning evidence of his works being *Unterhaltungsliteratur*—mere recreational reading. Remarque attracted his readership, however, because his narratives were honest and authentic and because his style was dramatic and compelling.

Critics accurately noted Remarque's weaknesses, such as his lapses into clichés, flawed or repetitive plottings, and sentimentality. What some critics and many readers found engaging about Remarque's writings was that he raised questions important to them—to which, wisely, he supplied few answers. His generation of Europeans had had many wrong answers forced upon them. Remarque went to the heart of their experiences by affirming that answers to humanity's questions were as insubstantial as dreams. Nothing, he noted, was ever really possessed, and life ended in the oblivion of death. In the interim, everyone is alone.

## ALL QUIET ON THE WESTERN FRONT

**First published:** *Im Westen nichts Neues*, 1929  
(English translation, 1929)

**Type of work:** Novel

*A young, once idealistic German soldier and his comrades are plunged into a war that devastates their values and destroys them.*

*All Quiet on the Western Front* earned Remarque international popularity and established his writing career on firm financial and literary foundations. By the time of his death in 1970, perhaps fifty million copies of the novel had been sold and it had been translated into fifty-five languages. In the 1990's, it was still widely regarded by many readers and critics as the greatest war novel of the twentieth century. Others ranked it with several very different, but esteemed, German war novels, such as Ernst Jünger's *In Stahlgewittern* (1920; *Storm of Steel*,

1975), Fritz von Unruh's *Der Opfergang* (1919; *Way of Sacrifice*, 1928), and Ludwig Renn's *Krieg* (1928; *War*, 1928).

*All Quiet on the Western Front* was Remarque's therapy for the depression and sense of desperation that had plagued him since World War I. It is an unconventional work in several ways. It is episodic, almost documentary or diary-like in nature, and it lacks a consistent plot. The narrator and principal character, Paul Baumer, is a young German soldier who serves on the Western Front. A second narrator is introduced only at the end to announce Baumer's death.

Baumer's narration, Remarque confirmed later in an interview, provides a worm's-eye view of war—the view of one common soldier and his comrades' physical and psychological trials imposed by their horrific experiences. It is not a literal work. Scenes Baumer describes are not found in factual guides to battlefields, with their precise designations of troop positions. Remarque, in fact, was criticized

for Baumer's failure to be just that specific. Literal-minded criticism, however, misses the point. *All Quiet on the Western Front* is not Baumer's description of war as what occurred in various places at specific times but describes war as a condition. Like the art that Remarque admired and later collected, *All Quiet on the Western Front* is impressionistic.

The novel consists of twelve brief chapters, which in the original version amount to only 288 pages. In each chapter, Baumer leads the reader along his descent into hell. Young and idealistic, he is inspired by a teacher's patriotic exhortations to enlist. The shock of basic training is worsened by a sadistic drill sergeant, and the shocks grow more frequent and profound with his transfer to the front, to the ghastliness of trench warfare, and the influence of veterans for whom the sole value was survival. Baumer's recording of patrols, attacks and counterattacks, gassings, artillery barrages, madness, desertion, dead and wounded comrades, hospitals, food, rats, and

worse are narrated with laconic fatalism as he too becomes preoccupied with survival.

The narration is often "we" rather than "I." Baumer's comrades—such as Tjaden, the peat digger, Detering, the peasant, and Katczinsky, the unphilosophical veteran who watches over Baumer and younger soldiers as might a parent—are deftly sketched as working-class victims of Prussian officialdom. The murderous government is represented by its lowest social orders: Kantorek, the teacher, and Himmelstoss, the postman. Baumer and his comrades are all doomed. Remarque poignantly and subtly highlights this fact, successively describing a dying man's boots, scenes of beauty, the troop's bumbling plunder, bashful sex briefly managed behind the front, and Baumer's home leave, which demonstrates to him that his experiences are beyond civilian comprehension. Remarque also employs contrasting, self-explanatory symbols: birds singing on the battlefield, cackling geese along a route of march, innocent horses wounded or slaughtered by artillery fire, the earth as a protecting mother, blossoms, and butterflies—the beauty Baumer is reaching for when shot dead.

*All Quiet on the Western Front* is a truthful novel but not a documentary or a memoir. Remarque's characters and materials are well handled, and his vision of war as a mirror of the human condition engages readers with its authenticity.

## ARCH OF TRIUMPH

**First published:** *Arc de Triomphe*, 1946  
(English translation, 1945)

**Type of work:** Novel

*Terrorized by Nazis, a political refugee experiences love, avenges himself upon his Gestapo enemy, and learns he can survive.*

*Arch of Triumph* focuses upon the experiences of a German political refugee, known by his pseudonym, Ravic. Before escaping the Nazis, Ravic, whose real name is Ludwig Fresenburg, had been head surgeon in a German hospital. Having fled to Paris, Ravic illegally employed his medical skills as a "ghost" surgeon for two French doctors. Meanwhile in 1939, he was living relatively comfortably

in a refugee hotel whose inhabitants represented a cross section of Russian, German-Jewish, and Spanish exiles.

The drama unfolds as Ravic meets and falls in love with Joan Madou, a beautiful but unpredictable woman. Their affair is seriously troubled and soon complicated by outside events. Ravic is arrested by the French police after rendering first aid to an accident victim and is deported to Switzerland. Months later, when he returns to Paris, Joan is living with an actor. As Ravic tries to reestablish his relationship with Joan, the jealous actor shoots her. Ravic's surgical skills fail him as he tries to save her, and after reaffirming their love, Ravic, in order

to end Joan's agony, mercifully kills her by administering a lethal injection.

Joan is the second love that Ravic has lost to fate. In 1933, before his flight from Nazi Germany, Ravic and Sybil, his girlfriend, were arrested for helping friends flee the Gestapo. Ravic and Sybil were tortured by Haake, a Gestapo officer, before Ravic was sent to the concentration camp from which he later

escaped to France. Sybil, presumably, dies. Until emotionally rescued by his subsequent love with Joan Madou, Ravic has a completely negative view of life. Ravic avenges himself against his Gestapo torturer when by chance he meets Haake in Paris and Ravic, unrecognized, is able to lure Haake to his death. After Haake's death, Ravic acquires new inner strength. Although the symbol of France, the Arch of Triumph, is plunged into darkness with the outbreak of war, and although Ravic faces a grim future of internment, he nonetheless is emotionally equipped to survive.

*Arch of Triumph*, Remarque's second most successful novel, continues one of the author's favored themes about powerless and alienated individuals who find the inner strength for survival under totalitarian oppression.

## THE SPARK OF LIFE

**First published:** *Der Funke Leben*, 1952  
(English translation, 1952)

**Type of work:** Novel

*Weak, tortured, and terrorized, inmates of a German concentration camp discover the will to live by mounting resistance.*

*The Spark of Life* required five years to research and write since it deals with the lives of German political prisoners consigned to concentration camps, a subject about which Remarque knew nothing firsthand. Too weak to endure forced labor, the prisoners are installed in a small labor camp where their captors expect them to die within weeks.

The novel focuses upon Skeleton 509 and five other prisoners. Skeleton 509's real name is Friedrich Koller, a former journalist, who refused to inform on people sought by the Gestapo. The others are Joseph Bucher (the son of a left-wing editor), Ruth Holland (Bucher's girlfriend), Old Ahasver (an aged survivor of several camps), Leo Lebenthal (a former businessman), and Karel, a Czechoslovakian boy whose parents have died in Nazi gas chambers.

Contrasted with the inmates are their guards, notably the camp commander, Bruno Neubauer. Neubauer was once a minor civil servant who saw Nazism as the route to personal success; he epitomizes the banality of evil. Remarque traces in parallel with the main story the essential elements in the rise of Nazism. Through Surgeon Major Wiese, who conducts deadly medical experiments upon "volunteer" inmates, Remarque adds a dimension of science gone mad.

Remarque's fictitious labor camp and its inmates form a microcosm of the perversions that characterized the Nazi regime: torture, dismemberment, cruel and bizarre medical experiments, and a grotesque array of other physical and psychological techniques designed to dehumanize "enemies of the state."

Against this background, the novel's impetus stems from the fact that Koller and other inmates realize that the Allied war against Germany is being won. A nearby town, Mellern (modeled precisely

on Osnabrück), is bombed by Allied planes. Commandant Neubauer, in anticipation of the camp's liberation by Allied troops, cosmetically changes its records and appearance. Surgeon Major Wiese no longer kills prisoners who fail to "volunteer" for his experiments. Camp guards become noticeably lenient.

Koller and the others seize the moment and mount a resistance. Koller slays Weber, the German guard who tortured him, and then is slain himself as the camp comes under the guards' fire. There are survivors, however, like Joseph Bucher and Ruth Holland, whose lives justify the fight and testify to the spark of life that inspired Koller and his comrades to assert their right to exist.

#### SCREENPLAY:

*Der letzte Akt*, 1955

## SUMMARY

One of the twentieth century's most popular authors, Erich Maria Remarque did not receive the Nobel Prize in Literature. Most literary critics would not rank him among the great German authors. His most influential work, *All Quiet on the Western Front*—not by literary standards his best novel—deeply touched millions of twentieth century readers. A powerful book, it is remarkably honest about the terrible fates encountered by ordinary men in a century of total wars. Similarly, Remarque's subsequent novels give expression to the lonely, dehumanizing experiences of political prisoners, refugees, and other victims of ideologies and political extremism.

Clifton K. Yearley

## DISCUSSION TOPICS

- How did World War I bring out the best and the worst in Erich Maria Remarque?
- Was World War I the cause or the occasion of the view of life that Remarque expressed in his novels?
- Has Remarque more to tell readers about the combat or the home front in the war?
- Was it necessary for Remarque as a novelist to grapple with deep philosophical problems?
- Has anyone written a better novel about World War I than *All Quiet on the Western Front*?
- Does the fact of critics' and readers' concentration on *All Quiet on the Western Front* unfairly diminish Remarque's reputation?

## MARY RENAULT

**Born:** London, England  
September 4, 1905

**Died:** Cape Town, South Africa  
December 13, 1983

*Renault, renowned for her historical novels set in ancient Greece, was among the earliest modern authors to address intelligently and sympathetically in her writing the subject of homosexuality.*

### BIOGRAPHY

Queen Victoria died four years before Mary Renault (rehn-OHLT), the pen name of Mary Challans, was born. Victoria's death, however, did not end the spirit of Victorianism in England. Renault lived much of her first thirty years rankling under the prudish Victorian constraints that her father, Frank Challans, a physician, and others imposed on her.

Mary's mother, Clementine Baxter Challans, daughter of a dentist, apparently never loved her husband nor their first child, Molly, as Mary Challans was nicknamed. Losing a boy in childbirth, Clementine in 1911 gave birth to Frances Joyce Challans, always called Joyce. What small affection she had to bestow was reserved for Joyce, who ultimately became Clementine's sole heir.

Throughout the period of her life that Renault lived with her family, her mother made no pretense of being fond of her, always preferring Joyce. Clementine nagged her husband incessantly and argued with him. At his funeral, Clementine made a point of walking into the church with Joyce, leaving a solitary Molly to trail behind.

In her parents' eyes, Renault's future was determined at birth: She was to become an obedient wife and dutiful mother. When she showed signs of being bookish, her mother was horrified, knowing that bookish women do not find husbands. Molly began a relentless and clandestine course of reading around six, hiding in her father's crumbling stable with favorite books. She quickly graduated from reading cowboy-and-Indian stories to immersing herself in medieval romances. At the

Levicks' School she studied French and the Bible and enjoyed singing hymns.

Joyce was the frilly, compliant little girl Clementine needed. Molly was the out-of-control tomboy but always off reading books, she at least stayed out of the way. So invisible was she that her parents apparently did not notice that her front teeth protruded, a condition that her maternal grandfather could easily have remedied had it been called to his attention.

During World War I, Frank Challans served his country in the medical corps in India. Molly and Joyce were packed off to Buckinghamshire to escape the air raids. At war's end, Molly returned to the Levicks' School, relearning the lessons she had been studying when she left. In 1920, she entered the Clifton Girls' School, where she completed her secondary education.

The school's headmistress, a graduate of St. Hugh's College, Oxford, which had only a short time before begun to accept women, encouraged Renault to apply for admission, which was eventually granted. The Challanses, however, were unenthusiastic about her going to St. Hugh's and offered Renault only an allowance of twenty pounds a year, some sixty pounds short of what her education would cost. Borrowing money from her aunt, Renault entered St. Hugh's and, four years later, received an Oxford degree. By that time Renault had dropped the name Molly. Everyone knew her as Mary.

Following her graduation, the Challanses did not encourage Renault to do anything except stay at home and hope for marriage, squeaking by on

the twenty-pound annual allowance they still gave her. Renault, however, was sufficiently strong-willed that she left home and managed a marginal existence, making just enough money at various menial jobs to feed herself meagerly and to keep a roof over her head. Malnutrition resulted in her falling ill with rheumatic fever, which forced her to endure a protracted convalescence at home.

Until 1933, when she was twenty-eight years old, Renault lived largely in her parents' unhappy household on the allowance they granted her, trying to write but being continually discouraged by both parents. In that year, however, she bolted, entering Radcliffe Infirmary as a nursing student. There she met Julie Mullard, a senior nursing student six years her junior. They soon began a relationship that lasted the rest of Renault's life. They fell naturally into the affair that defined their sexual orientation.

Renault and Mullard, living in a Procrustean social and professional milieu, endured hardships and long separations, but they never considered abandoning each other. Despite working long and irregular hours, Renault found time for her writing and, in 1938, completed a novel set in a hospital, *Purposes of Love* (1939). It was published in the United States shortly thereafter and retitled *Promise of Love* (1940). Renault, who had been living on less than £100 a year, suddenly had the heady experience of receiving a £250 advance from Morrow. Headier still was a preponderance of positive and encouraging reviews.

Renault and Mullard worked as nurses during World War II, and Renault published two more novels, *Kind Are Her Answers* (1940) and *The Friendly Young Ladies* (1944; American edition, *The Middle Mist*, 1945), by the war's end. Both novels were eclipsed by war news; the few reviews they received were lukewarm. After the war, however, Renault published two more books, *Return to Night* (1947) and *North Face* (1948), before *The Charioteer* (1953), which quickly became a best seller. With these books she solidified her reputation as a noteworthy novelist. Although all of her books until *The Charioteer* include homosexual subplots, *The Charioteer* was the first one to deal so unflinchingly with the issue.

This book was followed by *The Last of the Wine* (1956), a perennial best seller and the first of the historical novels about Greece that would occupy

Renault for most of her remaining years. *The King Must Die* (1958), *The Bull from the Sea* (1962), *The Mask of Apollo* (1966), *Fire from Heaven* (1969), *The Persian Boy* (1972), *The Praise Singer* (1978), and *Funeral Games* (1981) all gained cultlike followings and continue to be widely read.

In 1948, two years after Renault earned the \$150,000 MGM Award for *Return to Night*, she and Mullard, weary of Britain's postwar austerity and eager to escape the clutches of voracious tax collectors, sailed for South Africa, settling first in Durban and later in Cape Town. They spent the remainder of their lives there, taking South African citizenship in 1950 but retaining their British citizenship.

The two mingled prominently in South Africa's extensive homosexual communities and, in 1964, Renault became the president of the Cape Town chapter of PEN (International Association of Poets, Playwrights, Editors, Essayists, and Novelists), a post she hoped would be ceremonial but one that, with the problems of apartheid, became increasingly political. Renault, diagnosed in 1970 with cancer, succumbed in 1983.

## ANALYSIS

Mary Renault's career may be divided into two periods: one of novels set in roughly contemporary time, and one of novels set in ancient Greece. When she began to write seriously, Renault was working full time, but she was employed as a boarding school nurse; the demands on her time were sufficiently light to afford her the time she needed to write. Seeking subject matter, she wisely chose to write about what was most familiar to her.

Her first novel, *Purposes of Love*, is set in a hospital where Vivian, a nurse, and Mic, a pathologist new to the hospital, have a romance. Mic is a friend of Vivian's brother Jan, on whom he had a boyhood crush. His basic attraction to Vivian is attributable to her resemblance to Jan. Renault also introduces a lesbian nurse, Colonna, into the story and has her make advances to Vivian, who is neither enticed nor repelled. Colonna is having an affair with another nurse, Valentine, and when this affair ends, Colonna faces a bleak, lonely future.

The central story in *Purposes of Love*, which critics commended and compared to the work of such authors as Virginia Woolf and D. H. Lawrence, revolves around a conventional heterosexual attachment. Renault, however, is bent on demonstrating

in this book that love has many faces, none being any more legitimate than another.

Each of Renault's next four books contains homosexual elements. *Kind Are Her Answers*, rushed into print because of the anticipated exigencies of an impending war, tells the story of Kit Anderson, like Renault's father a physician in general practice, whose marriage to Janet, a vacuous socialite, founders after Janet has a miscarriage and a hysterectomy. Kit falls in love with Christie, the niece of one of his patients.

It turns out that Janet is a lesbian. Renault, however, shows her in neither a complex nor understanding light but rather uses her sexual orientation as a means of disposing of Janet. She falls in love with another woman on a trip to South America, leaving Kit and Christie to their own devices. Renault realized the weaknesses of this book and its lack of the compelling detail found in her first novel, but because war was about to erupt, Renault's American publisher pressed her into submitting a manuscript that rethinking and rewriting would have strengthened.

*The Middle Mist* has strong autobiographical elements, which are found in much of Renault's writing. The protagonist, Leo, is a young writer driven from home by her parents' bickering. Leo shares a houseboat with Helen, a woman somewhat like Julie Mullard, and is described as being manlike and tomboyish, much as Renault's mother viewed her firstborn.

Into the story are introduced a young physician, modeled on Renault's friend Robbie Wilson, convinced that he can cure patients with love, and Joe Flint, an American neighbor. Joe claims Leo's virginity, which she thinks will be a turning point for her, but it is not. She leaves Joe, and at the end of the novel, not much has changed. Leo and Helen are still together, presumably in a lesbian relationship.

*Return to Night* is a tougher book than the two that preceded it. Hilary Mansell is a physician in love with one of her patients—Julian Fleming, eleven years her junior. She saves Julian's life by performing emergency brain surgery on him. Upon recovering, Julian begins to court Hilary, but his possessive mother scuttles his romance. Finally, Julian, bisexual and dominated by his mother, wanders into a cave, where he is about to commit sui-

cide. Hilary saves him a second time, but she realizes that a shared life can hold nothing for the two of them. The mother theme that always intrigued Renault is well developed in this novel.

*The Charioteer* is Renault's most overtly homosexually oriented novel of her first creative period. Whereas her earlier novels deal only obliquely with homosexual love, this best-selling novel deals directly with it, tracing the sexual development of Laurie Odell from age five through manhood.

In this novel one finds Renault's characteristic (and sometimes confusing) use of names that can be either masculine or feminine. Also depicted are the kinds of troubled family relationships that were a fundamental part of her own childhood. She also broaches the question of pacifism and of standing up for what one believes in the face of public vilification. The book is infused with the ethics found in the early Greek literature that Renault was devouring at the time, particularly Plato's dialogues about Socrates' trial and death.

For the next thirty years, Renault's writing centered essentially on Greek themes, although she was always quick to point out that in dealing with such themes, she was also dealing obliquely with many of the social problems of her own age, particularly those brought about by McCarthyism in the United States and apartheid in South Africa.

*The Charioteer* was rejected by Renault's American publisher, Morrow, because in 1953, when it was published in the United Kingdom, McCarthyism was stifling a great deal of creative expression in the United States. In that year, Dwight Eisenhower signed a bill prohibiting government employment of homosexuals. *The Charioteer* was not published in the United States until 1959, when Pantheon, then a minor publisher, not only published it but also launched a publicity campaign that made Morrow's efforts in marketing Renault's earlier books pale in comparison.

The books that followed *The Charioteer* are essentially the ones upon which Renault's literary reputation rests. Her Alexander Trilogy, despite its historical setting, reflects a great deal of what she and Mullard were going through in the later years of their relationship, and the last of the Alexander books, *Funeral Games*, presages touchingly what Mullard's life would likely be after Renault died.

## THE LAST OF THE WINE

**First published:** 1956

**Type of work:** Novel

*The novel covers thirteen years of Alexias's life, from fifteen to twenty-eight, as Alexias shares it with Lysis, his lover and mentor.*

*The Last of the Wine*, typical of Mary Renault's historical novels, provides voluminous information about notable Athenians—Socrates, Plato, Kritias, Phaedo, Xenophon—but presents it through the eyes of a more ordinary Athenian. Alexias, a youth on the brink of manhood, suddenly has adult responsibility thrust upon him by the report of his father's death in battle.

When Alexias's mother dies in childbirth, Alexias is so sickly that his father intends to expose him to the elements, thereby allowing the Fates to decide whether he will live or die. A Spartan attack, however, forestalls this. Alexias grows up with no real father figure until Lysis courts him and becomes his lover, providing the youth with a father surrogate. As was customary, Lysis also informally becomes Alexias's teacher, helping to prepare him for a manhood in which he will marry and have children, as Lysis himself plans to do.

Alexias's father takes a young bride and with her sires a daughter. When news of his father's death reaches Alexias, he is catapulted into being the man of the house, even though he is ill prepared to assume that responsibility. He grows deeply attached to his stepmother, becoming a surrogate husband.

Alexias prevails in the footrace at the Isthmian Games, but his joy at winning soon turns to disillusionment when his beloved Lysis is nearly killed by

a wrestler during competition. Renault here shows what happens when the athletic ideal of developing a fine body is overshadowed by a meretricious concentration on winning, a change in attitude that eventually led to the decline of Greek athletics.

Alexias is severely shaken when it turns out that his father was not killed but taken prisoner. The father resurfaces, now a disenchanted, bitter man, whose land has been usurped by invaders. He turns on his son, whom he thinks has been taken in by dangerous revolutionaries. The father sides with the conservative aristocrats, who fault the liberal democracy that has led Athens to its present state.

To escape this hostile environment (broadly reminiscent of Renault's family situation), Alexias and Lysis go off to fight at Samos, siding with those who favor democracy over oligarchy. The oligarchy is overthrown and the two return to Athens only to find that a similar situation exists there and that Alexias's father is strong among the oligarchs.

The political situation grows increasingly unstable as power shifts from the people to the oligarchs and back again several times. Finally, after the Athenian fleet is lost at Aegospotami, Lysander, the Spartan general, blocks all transport into Athens, starving it into submission. He foists upon the city the Thirty Tyrants, who impose a rule of terror.

Kritias, expert at using the logic Socrates has taught him, uses his skill cynically to gain power. Kritias has learned rhetorical technique from Socrates but has failed to learn the great thinker's most important lesson, that of pursuing the highest ideals of good and beauty.

Eventually, Kritias murders Alexias's father. Alexias and Lysis join the revolutionaries outside the city walls. The Spartans now abandon the Thirty Tyrants and the people again rule, but Athens is severely weakened. Alexias kills Kritias, but in the confusion of the fight, Lysis is killed. The people have won, but Renault forces her readers to consider whether this victory is to the good if those in control are driven by motives other than the Socratic ideals of good and beauty.

## THE KING MUST DIE

**First published:** 1958

**Type of work:** Novel

*Theseus, returning to Athens, pauses in Eleusis, where he kills the king and replaces him, then escapes being sacrificed and goes on to create a male-dominated society in Athens.*

Renault, given her strained relations with her mother, often wrote about mothers' relationships with their children. In her novels, she frequently portrayed mothers as vacuous, manipulative, injudicious, and destructive. In her later novels, Renault deals quite harshly with women in general. She made it clear in her social life that she preferred the company of men, usually homosexuals, and in interviews she vehemently denied being a feminist, nor did she wish to be viewed as a woman author, regarding herself simply as an author.

In *The King Must Die*, Renault is concerned with the matriarchal social and political structure of ancient Greece. The book is about Theseus, who vanquishes the king, a man who, through established tradition, was chosen by the queen and, after a year of marriage, sacrificed and replaced with a new king, who would also be sacrificed after his year of marriage. Renault's Theseus is small but wiry. He has exceptionally quick reflexes.

Theseus, passing through Eleusis en route to Athens, wrestles the reigning king to his death, snapping his neck like a twig, whereupon Theseus becomes king. When his year ends, however, he eludes being sacrificed by killing his wife's brother and pressing on to Athens, where he seeks to weaken Medea's hold on his father's court. He then volunteers to go to Crete as a performer in the bull court, a ceremony dedicated to the mother-goddess.

Theseus, in keeping with Greek legend, goes into the labyrinth for a meeting with Ariadne,

priestess of the mother-goddess, who gives him the thread that will enable him to retrace his steps. He ultimately marries Ariadne, only to abandon her on the island of Naxos. Departing from the classical legend, in which Ariadne kills herself, Renault has her instead join the Bacchae in their revelry.

Theseus sails to Athens, but, on approaching the city, fails to unfurl the white sail, a prearranged signal that he is safe. His father, Aigeus, dies, thinking Theseus has been killed, thereby leaving it to Theseus to eliminate the old order, end the female domination of Athenian society, and usher in the Golden Age of Athens, which he turns into a thriving, male-dominated society.

In *The King Must Die*, Renault pushes her disdain of mothers into a broad arena. In choosing to write about the fall of the classical matriarchal system, she seems to be casting her lot with a male-dominated society.

## THE PERSIAN BOY

**First published:** 1972

**Type of work:** Novel

*Bagoas, a Persian eunuch, seduces Alexander the Great, a Macedonian, who falls in love with him.*

The Persian boy in this novel, Bagoas, is a beautiful eunuch who seduces the swashbuckling Alexander the Great, cleverly making Alexander think that he is the seducer. In this middle novel of Renault's three books about Alexander, the pair's love is intense but very brief. Alexander dies in Babylon, with Bagoas whispering in his ear that he loves him.

There is a sense in this novel of love's conquering all. Bagoas is exactly what Alexander needs. Given Renault's residence in South Africa when she was writing this book, one cannot ignore the fact that Alexander and Bagoas are ethnically different and that their love transcends such considerations. The two are loyal to each other, as Renault and Mullard were throughout their nearly fifty years together. The novel in many ways mirrors their unwavering relationship.

## SUMMARY

Mary Renault's novels are concerned most significantly with her conviction that love between two humans, be they of the same or opposite sexes, is beautiful. Renault went on record as suggesting that in an age of overpopulation, homosexual relationships made good sense and should probably be encouraged for purely practical reasons. Renault was also fundamentally concerned with the dynamics of families, particularly with the relationships of mothers to their children. She extended this concern into a global consideration when she investigated the matriarchies of Greek society and wrote about them. The approval that Renault's family consistently withheld from her finally came from an enthusiastic reading public.

R. Baird Shuman

## DISCUSSION TOPICS

- Did her parents' concern for her future turn out to be an advantage for Mary Renault?
- Explain how Renault's interest in Greek literature allowed her to deal significantly with the problems of her own time.
- Renault was not unusual in writing about homosexual relationships, but was she more candid than her contemporaries in treating this subject?
- Many writers of historical fiction take generous liberties with history. Where does Renault stand in this respect?
- What did Renault learn as a nurse that helped her in writing fiction?

## JEAN RHYS

**Born:** Roseau, Dominica Island, West Indies

August 24, 1894

**Died:** Exeter, England

May 14, 1979

*Many of Rhys's works treat realistically the concerns of the jobless single woman. Her mixed English, Welsh, and Caribbean heritage also contributed to her depiction of the confusing role of the white woman in the West Indies.*

### BIOGRAPHY

Ella Gwendolen Rhys (reese) Williams was born in Roseau, Dominica, the West Indies, on August 24, 1894 (some authorities say 1890 because Rhys was not always truthful about her age); she was one of five children born to Dr. William Rhys, a Welsh doctor trained in London, and Minna Lockhart Williams, a third-generation Dominican Creole. Despite being one of five children, she spent a rather lonely childhood, according to her book *Smile Please: An Unfinished Autobiography* (1979). She attended school at The Convent, Roseau. At the Catholic convent school, Rhys experienced what she described in *Smile Please* as a "religious fit." She was fascinated by the rituals of Catholicism and wished for a while to convert from Anglicanism. Another appeal of Catholicism was the integration of blacks and whites in the church service. Her attraction to the rituals of Catholicism and the island magic of the blacks is reflected in her work.

In 1910, she emigrated to England to study acting for one term at the Royal Academy of Dramatic Art. After leaving drama school, she toured England as a chorus girl in a musical comedy during World War I. In 1919, she married Jean Lenglet, a French Dutch songwriter and journalist, and went to live on the European continent. Her daughter Maryvonne was born in Brussels in 1922. In 1927 she divorced Lenglet and returned to England. In 1936, Rhys and Leslie Tilden-Smith visited Dominica, the only time she returned to her homeland. She married Tilden-Smith, a publisher's reader, in 1938, and the couple settled in Cornwall, England. Tilden-Smith died in 1945, and in 1946, Rhys mar-

ried the poet and retired naval officer Max Hamer, who died in 1947. Rhys spent the rest of her life in England, where she died at Exeter Hospital, near her cottage home at Devonshire.

According to her biographers, Rhys had always kept a sort of diary, but she did not think seriously of writing until a time when she was desperate for money coincided with the discovery of her writing talent by her mentor and sometimes lover, British novelist Ford Madox Ford. After her divorce from Lenglet and her return to England, Rhys published a short story collection, *The Left Bank, and Other Stories* (1927), with a preface by Ford. Ford played an important role in the development of her writing career, but once she began to write she became a serious professional writer on her own. In 1928 she published a novel, *Postures*, which the following year was published in the United States as *Quartet*. Three more novels, *After Leaving Mr. Mackenzie* (1930), *Voyage in the Dark* (1934), and *Good Morning, Midnight* (1939), were part of her early prolific years.

Although she continued to write, her work was neglected for a great many years. The adaption of *Good Morning, Midnight* into a radio play by Selma Vaz Diaz was broadcast in 1957, causing a rediscovery of Rhys. Her most famous and most widely read novel, *Wide Sargasso Sea* (1966), written when she was in her seventies, was hailed by the literary world as a magnificent comeback. She spent eight years completing the manuscript of *Wide Sargasso Sea* because of her poor health, depression, heavy drinking, and sporadic writing of the short stories that would later become the collection *Sleep It off*,

*Lady* (1976). In the meantime another eight short stories were included in *Tigers Are Better-Looking* (1968).

Rhys received the W. H. Smith Award and Heinemann Award, both in 1967, for *Wide Sargasso Sea*. She was also elected a Fellow of the Royal Society of Literature in 1966. She received the Arts Council of Great Britain Award for Writers in 1967, and was named Commander of the British Empire for service to literature. Ironically, the fame and honors associated with *Wide Sargasso Sea* came very late in her life. Her life exemplifies the plight and struggle of many women writers for recognition and fulfillment. After the long years of obscurity and the belated recognition in her old age, she died on May 14, 1979.

### ANALYSIS

Of importance to an understanding and appreciation of the fiction of Jean Rhys is a recognition of the way in which her fiction reflects an attitude toward life often in opposition to traditional middle-class values. This attitude was shaped partly by her unusual cultural background but also by her life experiences. She is brutally honest and darkly humorous in her presentation of the isolated, abandoned world of her women characters, who passively ache for lost beauty and passion, but who always attempt to survive. Rhys presents those women from the perspective of a displaced person. Along with her general focus on the displaced person, her writings that reflect her West Indian heritage pursue themes of alienation and rejection endured by the white Creole woman in the Caribbean and her marginalization in England.

In *Smile Please* Rhys tells of her early fascination with books, stating that before she could read, she “imagined that God, this strange thing or person I heard about, was a book.” Her former editor, Diana Athill, in the foreword to *Smile Please*, says that Rhys wrote “because she had no choice.” Her early life in Dominica is also reflected in her perspective about marriage; she noted that a white girl’s goal in life was to marry in order to be happy. While noting that married women seemed less happy than unmarried ones, Rhys also noted that while marriages did not take place frequently among them, the blacks she knew seemed very happy. Another element of the black woman that appealed to Rhys was the warmth of native black women caretakers, in

contrast with her own mother, whom she depicts as distant. These various influences appear throughout her writing.

The Rhys heroine appears in her first four novels (*Quartet*, *After Leaving Mr. Mackenzie*, *Voyage in the Dark*, and *Good Morning, Midnight*) and later in a more complex form in *Wide Sargasso Sea*, which has the added complication of focusing on a character created by nineteenth century British novelist Charlotte Brontë. Brontë’s *Jane Eyre* (1847) is set in the 1830’s; *Wide Sargasso Sea* likewise is set in that time.

In *Quartet*, the reader sees the emergence of the Rhys heroine. Marya Zelli was a chorus girl in England (as Rhys was) and later, in 1926, is in Paris with a charming but irresponsible Pole she has married. After her husband is sent to prison, Marya is befriended by a couple, the Heidlrs. He is a middle-aged picture dealer and his wife is a domineering Englishwoman. This couple assumes that Marya should become the husband’s mistress. Heidler is a cold, anglicized German who may be modeled on Ford Madox Ford. Marya is first revolted by Heidler and then falls in love with him, living in both fascination and fear at the ensuing triangle, which lasts until her husband comes out of prison. Marya ends up losing both men.

*After Leaving Mr. Mackenzie* also begins in Paris about 1928. Julia Martin has been “pensioned off by a former lover” and leads a lonely life in a cheap hotel. When the former lover refuses to send any more money, she is left penniless and is old enough to be unsure of her attractiveness to men. She decides to go to London to look up other former lovers in the hope of getting money from them. The trip is not successful; she is met with annoyance and disapproval. After an affair with a young man goes awry, she returns to Paris to face an empty future.

*Voyage in the Dark* is told from a first-person point of view and has greater immediacy than the first two novels. The novel also incorporates more autobiographical material with its memories of the lush and tropical West Indian island, which Rhys uses as contrast to the coldness of England. The metaphorical pattern appears earlier in *Smile Please*, as Rhys records the effect of the change from warmth to coldness in her trip to England. The time frame of *Voyage in the Dark* is 1914, and the central character is Anna Morgan, who is nineteen and touring

the provinces in the chorus of a pantomime, again suggested by Rhys's personal experience. Again the woman is depicted as a victim, but a survivor. After an unsuccessful love affair with a young man, she is abandoned and becomes a prostitute. The novel concludes with Anna recovering from an abortion.

In *Good Morning, Midnight*, the reader encounters the heroine, Sasha Jansen, returning to Paris for a visit in 1937. Again using first person, Rhys presents Sasha as now over forty, distrusting of men, and drinking heavily. Sasha becomes involved with a young gigolo in a complicated relationship of mutual teasing. The novel ends with a scene of ironic tragedy, leaving the reader uneasy about whether the character will survive. Critics generally agree that this novel is Rhys's darkest work, characterized by fear and violence.

Rhys herself at this time seemed to disappear from the literary scene. She lived a life somewhat akin to that of Sasha Jansen. Her books went out of print. Her next novel was not published until 1966. Having long been fascinated with Brontë's madwoman in the attic, Bertha Mason, Rhys wrote her *Wide Sargasso Sea* as a defense of the transplanted Creole woman locked away in England and looking for a voice to tell her side of the story. The setting is in the 1830's, in both the West Indies and England. Again, Rhys establishes the polarity of climates to symbolize the polarity of temperaments in the passionate West Indian and the cold Englishman.

Rhys's short stories fit into two chronological groups. One group, written in the 1920's, were published in *The Left Bank*. The second group of stories, written in the 1960's and 1970's, are more tightly structured and employ a variety of plots, settings, and characters.

## VOYAGE IN THE DARK

**First published:** 1934

**Type of work:** Novel

*Rhys's familiar heroine, a destitute, powerless chorus girl, abandoned by lovers and left pregnant, must cope alone.*

*Voyage in the Dark*, Rhys's third major novel of her early period, reflects a more experienced style than was evident in the two earlier novels. It remained Rhys's favorite work. The unprotected female protagonist and her situation are familiar, but stylistically the novel reflects fully developed strategies: flashbacks to Dominica, floating memories and dreams that disrupt the text, distortions in syntax, and a concluding section that is akin to stream of consciousness.

The experiences of Anna Morgan, the heroine, are very similar to the experiences of Rhys when she came to England as a young woman. The work is fiction, but it is highly autobiographical. The first-person narration is appropriate to Rhys's content, which includes recollections and memories of a childhood in the West Indies and Anna's reaction to the English climate. Early in the novel, Anna says: "I didn't like England at first. I couldn't get used to the cold."

The use of climate for metaphor is prevalent in *Voyage in the Dark*, suggesting that Anna's entire set of experiences in England are a voyage in the cold and dark. Anna's nostalgia for the West Indies includes memories of her desire to be black, to be part of the culture she was drawn to, and of Francine, a black caretaker of Anna's childhood who was warm and cheerful. Descriptions of Catholic religious services also reflect for Anna the Caribbean and for Rhys her spiritual experiences in the Catholic convent in Dominica.

The bare outline of the plot—young woman falling victim to older man, becoming pregnant, drifting into prostitution, and having an abortion—suggests a sordid and sad life that early critics tended to judge on moral rather than literary grounds. Rhys's understated style and economy of language present instead a rather gallant young woman who will go on.

The concluding section of the novel, following Anna's abortion paid for by an earlier lover, is the

most interesting stylistically. Reacting to pain and alcohol, Anna narrates a kind of delirious monologue in which time and place tend to become lost.

After the abortion Anna hears the doctor saying, “She’ll be all right” and “Ready to start all over again in no time, I’ve no doubt.” These last lines provide ambiguity because the reader does not know whether Anna will survive as a prostitute or will be able to start a new life. The original conclusion of the novel depicted the death of Anna after the abortion, but Rhys’s publishers convinced her to change the ending. Rhys was never happy with the change, as she confided in a letter in 1934.

## WIDE SARGASSO SEA

**First published:** 1966

**Type of work:** Novel

*Rhys retells Jane Eyre from the point of view of the mad Creole, Bertha Mason, who is locked up in the upper story of an isolated English mansion.*

*Wide Sargasso Sea* allows Bertha Mason, the madwoman married to Rochester in Charlotte Brontë’s famous novel, to tell her story. Rhys creates a voice, a history, and a rationale for why Bertha is mad. She has been driven insane by the cold rejection of an embittered Englishman.

In this novel Rhys integrates a mature style and sensibility with the experience of her childhood in Dominica. *Wide Sargasso Sea* is the most structurally demanding of her novels. She had to write in the context of a previously written novel and blend this context into the story of her own life and that of Bertha.

In Rhys’s novel, Bertha has a different name, her own name, Antoinette. She is small and delicate, rather than large and swarthy as Brontë describes her. Rochester calls her Bertha; this name is hateful to Antoinette.

The novel is structured around Antoinette and Rochester’s alternating points of view and is divided into three parts. The first and second parts al-

ternate between the voices of Antoinette and Rochester and are set in the West Indies. The third part is limited to Antoinette’s voice, after she has come to England and has been locked in the attic of Thornfield.

In *Wide Sargasso Sea*, the Caribbean is depicted in rich and sensual imagery. In the novel, the Caribbean is at a turning point. The white Creole is being rendered homeless because the cruelties of slavery are coming to an end. Antoinette is called “whitey cockroach” by the blacks with whom she feels a strong sense of kinship. Nostalgia does not lead Antoinette into the misconception that the old ways were better. She also is in no position to be blind to the cruelties the former slaves visit upon their former masters.

Antoinette is caught in a double bind: There is first the conflict in her own culture and second the rejection by Rochester, who is initially attracted to her. Rhys does not totally condemn the character of Rochester. In sections of narrative told from his point of view, he accounts for his own bitterness and rejection as a second son. He is forced to marry, for money, someone of his father’s choosing, and he believes that he has been lied to about Antoinette’s mother’s mental breakdown and the hint of black blood in her ancestry. He in turn rejects and betrays Antoinette, driving her into madness.

In Rhys’s conclusion of the novel, Antoinette takes off down a dark passage thinking, “Now at last I know why I was brought here and what I have to do.” Her last thought is about the candle: “I shielded it with my hand and it burned up again to light me along the dark passage.” This conclusion fits the general pattern of endings of Rhys’s novels. Rhys offers ambiguity, an oblique suggestion that somehow Antoinette will survive and perhaps triumph even in her madness.

## “SLEEP IT OFF, LADY”

**First published:** 1976 (collected in *Sleep It off, Lady*, 1976)

**Type of work:** Short story

*An old, alcoholic woman, broken by neglect and derision, dies, destroyed by cruel neighbors.*

“Sleep It off, Lady” is perhaps the best short story written by Rhys. By using third-person narrative, Rhys distances herself from both the victim and her tormenters. Miss Verney, an aging woman who drinks too much and complains too much, irritates others. This story, written in Rhys’s later years, embodies several themes familiar to Rhys’s readers: Old age is a crime; cruel neighbors can destroy a person who lives alone; a doctor is sympathetic but ultimately of little help.

Miss Verney, the protagonist, is in her seventies and alienated because she is old, she is a woman, and she is single. She has a major goal—to rid her property of an old ugly shed. The story takes on elements of the absurd and becomes surrealistic in its imagery: The shed itself is hideous and sagging. A huge rat, which the neighbors think is a figment of a mind foggy from too much alcohol, terrorizes Miss Verney. Neighbors and workmen refuse to listen to her, first when she tries to hire men to destroy the shed and later when she cries out for help.

The final and most devastating image is that of Miss Verney collapsed next to the dustbin, “with her legs stretched out, surrounded by torn paper

and eggshells. Her skirt had ridden up and there was a slice of stale bread on her bare knee.” This image suggests that old people in society are thrown out with the garbage and left to be picked up and carted off.

The title of the story comes from Deena, a twelve-year-old neighbor girl. When Miss Verney collapses and appeals to her for help, Deena assumes that the old woman has been drinking and replies, “Sleep it off, lady!”

The doctor attributes her death to heart disease. The death is truly of heart disease but in a spiritual more than a physical sense. Rhys presents a character who is destroyed by the neighborhood in which she lives.

The last four stories in her short-story collection, *Sleep It off, Lady*, which treat the loneliness and degradation of old age, reveal that Rhys at age eighty had not lost her skill as a storyteller.

## SUMMARY

Jean Rhys’s fiction treats the lonely and alienated woman through the various stages of her life, from adolescence through adulthood to old age. Rhys’s heroines are presented not with sentimentality but rather with irony, dark humor, and an economy of style that leaves the central character with a sense of dignity in spite of her circumstances. Alternating harsh reality with dreamlike musings, employing a strong controlling metaphor, and adjusting point of view, Rhys created a body of work that makes a powerful contribution to twentieth century literature.

## SAMUEL RICHARDSON

**Born:** Mackworth, Derbyshire, England  
August 19, 1689 (baptized)

**Died:** London, England  
July 4, 1761

*Often called the father of the modern novel, Richardson wrote three epistolary novels, the first two penetrating the feminine psyche with an understanding that no previous prose writer had attained.*

### BIOGRAPHY

Samuel Richardson was born in 1689 in Mackworth, Derbyshire, England, to Samuel Richardson, a woodworker who excelled at ornamentation, and his second wife, Elizabeth. The exact date of his birth is uncertain, but he was baptized on August 19, 1689. The Richardsons were once landowners, but their fortunes had dwindled. The family moved to London, where the young man spent his formative years. He entered the Merchant Taylors' School in 1701, but strained finances forced his withdrawal the following year. He worked for his father between the ages of twelve and seventeen. Although painfully shy, Richardson was a favorite among young ladies in his neighborhood, who quickly made him their confidant. They had him write letters to their suitors. Writing these intimate letters made Richardson acutely aware early in his life of the disparities between what love-struck young ladies felt and what they expressed.

Richardson, a circumspect listener with whom people felt secure sharing their deepest secrets, was an astute observer of life and an avid reader. When he chose an apprenticeship, this combination of interests led him to work with a printer, John Wilde. In 1715, two years past his apprenticeship, Richardson became a freeman of the Stationers' Company. He helped the widow of printer

John Leake run her printing shop. On her death in 1721, he bought her printing business, leasing John Leake's house, in which it was situated. In 1721, Richardson, now thirty-two, married twenty-three-year-old Martha Wilde, daughter of his former master. The following year, he was admitted to the livery of the Stationers' Company, and, in 1727, he was elected to office in that company. He gained recognition printing Tory tracts and providing money for the defense of some incarcerated political dissidents. Despite these activities—perhaps because of them—Richardson was appointed printer for the House of Commons in 1733, establishing him financially.

Between 1722 and 1730, the Richardsons bore six children, five of them boys. None survived infancy or early childhood. Martha died in 1731. In 1733, Richardson married Elizabeth Leake, daughter of the printer whose business he now ran. They had six children, four of whom—all girls—lived to adulthood.

When Richardson began to write his first novel, *Pamela: Or, Virtue Rewarded* (1740-1741), he had suffered, in a two-year period, the deaths of eleven close family members and friends. He fell ill with symptoms now recognized as incipient Parkinson's disease, an illness that plagued him until he died.

Richardson was a published author before beginning to write novels. His guide, *The Apprentice's Vade Mecum: Or, Young Man's Pocket Companion* (1733), was widely read. It was, however, *Pamela*, in two volumes, that first captured the public imagination in Britain and throughout Europe. The

novel was motivated, apparently, in the autumn of 1739, when Richardson began to write *Letters Written to and for Particular Friends, on the Most Important Occasions* (1741) for a company of booksellers. This book was a letter-writing guide, but writing it apparently suggested to Richardson the possibility of writing an epistolary novel based on his intimate understanding of women. He began to write *Pamela* in November, 1739, and, remarkably, he completed the two-volume work two months later. In its first year, *Pamela* went into five editions. It was dramatized by Voltaire in France and Carlo Goldoni in Italy, as well as by Henry Giffard in Britain. Richardson wrote two additional volumes of *Pamela* that appeared in the new 1741 edition.

Richardson's next book was another epistolary novel, *Clarissa: Or, The History of a Young Lady* (1747-1748), twice the length of *Pamela*. The book went through extensive revision before the last of its seven volumes finally appeared in 1748. A third novel, *Sir Charles Grandison* (1753-1754), the story of a dandy who loved two women, was published in seven volumes during 1753 and 1754.

By now, Richardson was a master of the Stationers' Company. Grief over the deaths of many of his friends and family, however, had left him in an unsettled state. By 1755, he had decided to write no more novels and showed a disinclination to write anything. His health, fragile for some two decades, became an increasing burden. Paralysis made it difficult for him to maintain his voluminous correspondence, a central element in his life. On June 28, 1761, he had a stroke and survived for a week, dying in London on July 4.

## ANALYSIS

Richardson was concerned with what George Sherburne has labeled "the distresses of love." Coming to the most creative part of his career relatively late in life, Richardson had prepared well for it, not only reading voluminously but also—more significantly—listening to the inmost revelations of dozens of young women who confided in him, finding him a ready listener and a nonthreatening companion. Richardson came to know and understand women better than any prose writer before him. His greatest triumph as a writer lay in his ability to create the complex fantasies out of which his stories grow. This complexity is achieved by Richardson's apparent realization that every major sen-

timent his characters reveal in their letters must be paired with a countervailing sentiment shown by characters in their responses, epistolary or reported. The tension that this sort of complexity exacts is the dramatic tension that keeps Richardson's mammoth novels moving.

Richardson's most celebrated novels, *Pamela* and *Clarissa*, are centrally concerned with virtue that is sorely tried by the sexual cravings of, respectively, Squire B. and Robert Lovelace. When Squire B. is on the brink of raping Pamela Andrews, a cleric's fifteen-year-old daughter who has come into the household as a servant for his late mother, the girl's innocence and sincerity unman him. He becomes putty in her hands and ultimately marries her, rewarding Pamela's virtue. In the two final volumes of *Pamela*, Richardson deals with another problem, that of determining how a simple girl, low of birth, can survive and function in a stratum of society higher than that to which she has been accustomed. Clarissa Harlow is less fortunate than Pamela Andrews: Lovelace, an earl's nephew, succeeds in raping her. Psychologically, both books offer remarkable insights. *Clarissa* moves beyond *Pamela*, however, because it deals sensitively with the emotions of the male and female protagonists, especially as these emotions are revealed in extensive correspondence from both of them to their two confidants, Anne Howe and Jack Belford.

Richardson's basic morality in *Pamela* is not unlike that found later in Charles Dickens's novels. Goodness is rewarded, evil punished. The reward, as in *Pamela*, can be either material or, as in *Clarissa*, simply the satisfaction of knowing and doing what is right. Richardson had a sufficiently puritanical attitude toward sex that he avoided reporting direct, explicit sexual situations, although he perhaps titillated his readers more than he could have had he described in late-twentieth century detail what went on behind the closed doors and voluminous tapestries.

Each of Richardson's major protagonists—Pamela Andrews, Clarissa Harlowe, and Charles Grandison—is faced with difficult decisions. Pamela has to decide, after her mistress's death and Squire B.'s advances, whether to remain in Squire B.'s house or to do the obvious thing and return to her parents. She makes her decision and in so doing must realize what the consequences are likely to be. Her later attempts to escape from Squire B.'s

estate are so ineffective as to be hardly attempts at all. Clarissa Harlowe, raped by the libidinous Lovelace, also has a decision to reach: Having been raped, will she marry Lovelace, or will she go through life bearing her shame and being shunned by her family? Opting for the latter alternative, she dies soon afterward. Charles Grandison had to contend with similar divisions of mind. His major problem was whether he would marry an Italian Catholic or a more conventional British Protestant. These two women represent for him the temptation of the mysterious versus the secure. Such indecision is characteristic of Richardson's characters; it is this indecision that supplies the well-controlled dramatic tension in his rambling works.

Richardson himself was of a divided mind. He was blindly—or at least myopically—admiring of rank and class, but he firmly believed as well in the triumph of virtue and morality over their opposites. In most of his writing, he struggled to work out the dichotomy between morality and the established social order, which was strongly ingrained in him.

Richardson deviated from the epistolary style when it suited his purposes and reverted to using a diary or journal style, as is seen in material he presents about Pamela after her removal to Lincolnshire. In his other novels as well, many of the letters revert to journal form. The epistolary style helps to excuse some of the one-sidedness in Richardson's presentations. The characters who write the letters cannot see themselves as they really are and as others see them. The epistolary style also adds to the story an immediacy that no other method achieves.

## PAMELA

**First published:** 1740-1741

**Type of work:** Novel

*Pamela Andrews, an innocent servant, resists the advances of her master, Squire B., who finally marries her.*

*Pamela* is really two, closely related novels. The first two volumes of 1740 have the full title *Pamela: Or, Virtue Rewarded. In a Series of Familiar Letters from a Beautiful Young Damsel, to Her Parents. Now First*

*Published in Order to Cultivate the Principles of Virtue and Religion in the Minds of the Youth of Both Sexes.* The additional volumes that followed in 1741 were published in a new two-volume set titled *Pamela: Or, Virtue Rewarded. In a Series of Familiar Letters from a Beautiful Damsel, to Her Parents: And Afterwards, in Her Exalted Condition, Between Her, and Persons of Figure and Quality, upon the Most Important and Entertaining Subjects in Genteel Life. The Third and Fourth Volumes. Published in Order to Cultivate Principles of Virtue and Religion in the Minds of the Youth of Both Sexes.* The subtitles are significant because they reflect the didactic intentions of the author as well as the expectations of the audience Richardson sought.

The first two volumes of *Pamela* tell how the fifteen-year-old Pamela Andrews left her parents' home to become a servant in the country home of a lady of substance in Bedfordshire. The latter dies almost immediately, leaving Pamela alone in the rambling estate with Squire B., the lady's libidinous son. Squire B. promptly tries to impose himself upon the wide-eyed, nubile Pamela, who, being a proper girl, resists his advances and flees from Bedfordshire. Squire B., however, will have his way. He has Pamela abducted and brought to his estate in Lincolnshire, a household run by his housekeeper, Mrs. Jewkes. Throughout all her traumas, Pamela is scribbling away, writing frequently to her parents and then in her journal, reporting with great immediacy the pulse-quickenings assaults upon her cherished virtue. In providing Pamela with no friend in Mrs. Jewkes, Richardson used every means at his disposal to inform his readers (who knew it already) that the social codes of the day were tolerant of people of the upper class who seduced their servants.

Pamela, however, abjures hanky-panky, and when Squire B. tries to force himself upon the hapless Pamela, she resists with her only weapons—innocence and vulnerability—and in so doing, gains a moral superiority over her would-be seducer. If rape has to do with power, as contemporary psy-

chologists contend, by the end of volume 2, readers of *Pamela* see a complete power shift from Squire B. to the virtuous girl, hence the words “Virtue Rewarded” in the subtitle. Pamela, by the sheer force of moral rectitude, reduces the proud squire to a sniveling penitent. She has endured kidnapping and imprisonment, her attempts to gain her freedom have been thwarted by the unprincipled Mrs. Jewkes, and even Parson Williams, the local curate, has been unable to help her. She has contemplated suicide, realizing that the entire establishment within which she must exist favors rank over righteousness. As in many eighteenth century British novels, however, virtue prevails. Squire B., unnerved by all that has happened, grants Pamela her freedom, but then, realizing he loves her, recalls her and marries her.

The second half of the four-volume work has to do with Pamela’s adjusting to her transformation from humble servant to lady of a powerful house. Underlying all that Richardson writes about here is the implicit question, “Is quality a birthright, or can it be earned?”

The novel was radical for its time. It deals with age-old questions of the individual versus the establishment, of class struggle, and of the sexual politics that exist between men and women. It questions established social norms. Society at that time viewed unmarried ladies of the upper class as inviolable because they were, in a crass sense, economic commodities. Through them the establishment propagated itself. Women of the lower class, however, did not matter; they were fair game for any gentleman with a libido.

One may question—as many did—Pamela’s innocence. Some people, including Henry Fielding, considered her a conniving and manipulative young lady who knew what she wanted and set about getting it. In Fielding’s *The History of the Adventures of Joseph Andrews, and of His Friend Mr. Abraham Adams* (1742), a shameless parody of *Pamela*, Pamela’s brother, Joseph, emerges as an obverse image of his almost-too-good-to-be-believed sister. Fielding’s other attack, *A Apology for the Life of Mrs. Shamela Andrews* (1741), was among many debunking reactions to Richardson’s novel.

Some critics label Richardson humorless and naïve. A literal reading of *Pamela* supports such a conclusion. Beneath the surface, however, lurk arcane suggestions, oblique comments about prob-

lems that concerned Richardson deeply. Squire B.’s attempts to deprive Pamela of writing materials makes one wonder whether Richardson is commenting indirectly about the Licensing Act, which imposed strict censorship on the London stage at about the time Richardson wrote *Pamela*. In 1735, he published a tract in support of the Licensing Act. That was the politically correct stand for a prominent printer to take—but was that his real stand?

## CLARISSA

**First published:** 1747-1748

**Type of work:** Novel

*Raped by the aristocratic Robert Lovelace, Clarissa Harlowe must decide whether to marry him or to bear her shame alone.*

The seven volumes of *Clarissa: Or, The History of a Young Lady*, published in 1748, are a shortened version of the novel—the longest in the English language—that began to flow from the author’s pen sometime before 1744. Various people read manuscript versions of the book from that date forward. Subsequent editions in 1749 and 1751 were drastic revisions of the first and restored some of the earlier deleted material.

Clarissa Harlowe is the second and favored daughter of a good family. In a break from tradition, she has been left an estate by her grandfather. She is pursued by Robert Lovelace, an aristocrat, who cannot marry her until he finds a way to make her less attractive older sister, Arabella, reject him.

In a convoluted plot, Clarissa’s brother James fights with Lovelace and then, vengefully, arranges for Clarissa to be married to Mr. Solmes, a man she deplors. Ultimately, Lovelace tricks Clarissa into going off with him to London, where he installs her in a brothel. Clarissa suspects Lovelace’s motives

and escapes to lodgings in Hampstead, but Lovelace follows and prevails upon her to seek refuge with his cousin and aunt, who are really prostitutes posing as relatives.

They take her to a brothel where Lovelace drugs and then rapes her. Following this event, Clarissa lapses into a period of madness and is faced with the crucial decision of whether to marry Lovelace. Readers, through being exposed to Lovelace's correspondence with Jack Belford, know more about him than Clarissa does, and this knowledge engages their sympathy for her.

Clarissa, after escaping from the brothel, finds shelter with a kindly family, but her security does not last long. She is soon thrown into debtors' prison. Belford secures her release and befriends her. By now, Clarissa's health is broken, and it deteriorates further when she learns of plots Lovelace has launched against her, partly because of her rejection of him and partly because of his own guilt.

Clarissa prepares for death alone in London. She is now free from Lovelace and her family, which avoids visiting her. Upon her death, she is returned to Harlowe Place for burial. Lovelace, hearing of her death, is consumed by such guilt that he

becomes temporarily insane. Finally, having recovered, he travels to the Continent. Clarissa's cousin, ignoring one of Clarissa's last wishes, follows Lovelace and kills him in a duel.

*Clarissa* is perhaps Richardson's greatest triumph. By using two sets of correspondents, he overcame some of the problems he encountered in *Pamela* and also provided the kinds of multiple views that help to weave an intricate plot.

## SUMMARY

In many respects, Samuel Richardson can legitimately be called the first British novelist of note. His deep and accurate psychological understanding of women makes him seem eerily modern as one reads him today. Although Richardson was a circumspect person, his ideas were radical for his time. He expressed them so subversively in his writing that many of them remain undiscovered.

Modern novelists, directly or indirectly, all owe a debt to Richardson. He led the way for such novelists as Henry Fielding, Jane Austen, Tobias Smollett, the Brontë sisters, and—perhaps his most obvious literary descendant—Charles Dickens.

R. Baird Shuman

## BIBLIOGRAPHY

### By the Author

#### LONG FICTION:

*Pamela: Or, Virtue Rewarded*, 1740-1741

*Clarissa: Or, The History of a Young Lady*, 1747-1748

*Sir Charles Grandison*, 1753-1754

#### NONFICTION:

*The Apprentice's Vade Mecum: Or, Young Man's Pocket Companion*, 1733

*Letters Written to and for Particular Friends, on the Most Important Occasions*, 1741

*A Collection of the Moral and Instructive Sentiments, Maxims, Cautions, and Reflections, Contained in the Histories of Pamela, Clarissa, and Sir Charles Grandison*, 1755

*The Correspondence of Samuel Richardson*, 1804 (Anna Barbauld, editor)

## DISCUSSION TOPICS

- Why did Samuel Richardson prefer epistles as the basis of his novels?
- Did Richardson's *Pamela* deserve to be satirized by Henry Fielding?
- Does Richardson differ significantly from other eighteenth century novelists, who tended to emphasize the external aspects of social relationships rather than psychological ones?
- Lovelace, in *Clarissa*, is an early example in English fiction of the seducer. Is he a credible character or just a projection of sexual villainy?
- Does Clarissa have any vitality beyond her fierce defense of her chastity?
- Is Richardson important primarily as an early and influential English novelist, or can he speak to readers of the present time?

Christopher Morris

## MORDECAI RICHLER

**Born:** Montreal, Quebec, Canada  
January 27, 1931

**Died:** Montreal, Quebec, Canada  
July 3, 2001

*One of the most highly regarded Canadian novelists, Richler satirizes the foibles of Canadian, English, and Jewish life.*

### BIOGRAPHY

Mordecai Richler (RIHCH-lur) was born on January 27, 1931, in Montreal, Quebec, Canada, the son of Moses Isaac and Lily Rosenberg Richler. His Polish grandfather, whose name, Reichler, was misspelled by an immigration officer, came to Canada in 1904 to escape the pogroms of Eastern Europe accompanying the Russo-Japanese War and settled with other Jewish immigrants in the east end of Montreal. Richler's grandfather was a peddler, and his father operated a junkyard.

Richler grew up in a narrow, self-contained Jewish society that feared both French- and English-Canadians. He attended Jewish parochial school, studying the Talmud and modern Hebrew, and was expected to become a Hasidic rabbi like his maternal grandfather. Through his English-language instructors, he learned of the world beyond the Jewish ghetto and rejected orthodox religion.

His parents, who had long had an unhappy marriage, were divorced in 1944. In response to the disruption in his family life, Richler joined Habonim, a Zionist labor group, and dreamed of settling in Palestine. Many of Richler's protagonists are also the products of broken homes. The autobiographical basis of much of Richler's fiction becomes clear in the details of Montreal Jewish ghetto life provided in the autobiography of his mother, writing

as Leah Rosenberg, *The Errand Runner: Reflections of a Rabbi's Daughter* (1981).

At the predominantly Jewish Baron Byng High School, Richler became further aware of the non-Jewish world while thinking of himself more as both Jewish and Canadian. Considering the prejudices mutually felt between Jews and Canadians, he found being Jewish and Canadian a paradox. Ironically, when Jews fleeing Adolf Hitler's Germany settled in Montreal, Richler's friends and relatives found themselves defending things Canadian, the nation's culture in particular. Still, the Canada of Richler's childhood was an unfriendly environment for Jews. There were restricted hotels and country clubs; swastikas and anti-Semitic slogans were painted on buildings. In *The Street: Stories* (1969), his slightly fictionalized account of growing up in Montreal, Richler writes of the atmosphere during World War II: "The democracy we were being invited to defend was flawed and hostile to us. Without question it was better for us in Canada than in Europe, but this was still their country, not ours."

Since Richler's high school grades were not good enough for him to attend prestigious McGill University, he went to Sir George Williams University for two years, majoring in English. He was an editor of the student newspaper and worked part-time for the *Montreal Herald*, covering college basketball and amateur theatricals. Attracted to the academic life but afraid of becoming enervated by it, Richler redeemed an insurance policy for eight hundred dollars and left Canada for Europe. He wanted to be a writer, having started writing when he was fourteen, but he felt he could not create in a

country as culturally barren as he believed Canada to be. He spent two years in Europe, mostly in Paris, where he became friends with such fellow exiles as James Baldwin, Mavis Gallant, Herbert Gold, and Terry Southern. In 1950, he published his first story in *Points*, a Parisian magazine for young writers.

Richler came down with scurvy in Paris because of poor diet and returned to Montreal in 1952, working at the Canadian Broadcasting Corporation as a radio news editor. After his first novel, *The Acrobats* (1954), which he had begun in Europe, was published, he left for London with his first wife, Catherine Boudreau, from whom he was divorced shortly afterward. He wanted to test himself against the publishing standards of London and New York, not simply those of Toronto. He felt challenged by the more vibrant literary climate of England and found it easier to write about Canada as an exile. Richler thought of himself, however, as an outsider in England. He shared an apartment with Toronto-born Ted Kotcheff, who would direct several television plays and four films written by Richler.

After publishing two more novels, Richler achieved his first major success with *The Apprenticeship of Duddy Kravitz* (1959). He married Florence Wood, an actress and model from Montreal, in 1959. They returned to Montreal for a year in 1968 when he served as writer-in-residence at Sir George Williams University (now Concordia University). Considering Canada no longer culturally backward and worried about being away too long from what he called the roots of his discontent, Richler, his wife, and their children, Daniel, Noah, Emma, Martha, and Jacob, returned to Canada permanently in 1972. He was a visiting professor at Carleton University in Ottawa from 1972 to 1974. Two of his novels, *Cocksure* (1968) and *St. Urbain's Horseman* (1971), received the Governor-General's Award for Fiction, Canada's highest literary award.

Richler's screenwriting work began when director Jack Clayton asked him to write the uncredited final revision of *Room at the Top* (1959); the screenplay won an Academy Award for an earlier writer on the project. Subsequently, Richler adapted two of his novels, *The Apprenticeship of Duddy Kravitz* and *Joshua Then and Now* (1980), for the screen. His script for the former was nominated for an Academy Award and was named best comedy of the year by the Screenwriters Guild of America. The film

was the highest-grossing motion picture in Canada to that date. Richler received the Ruth Schwartz Children's Book Award for his first children's book, *Jacob Two-Two Meets the Hooded Fang* (1975).

He continued to write numerous essays and reviews for Canadian, British, and American magazines, the best pieces being included in such collections as *Hunting Tigers Under Glass: Essays and Reports* (1968), which won the Governor-General's Award for nonfiction. In his journalism, Richler became a frequent, often controversial critic of his native country. He ridiculed Canadian nationalism, the National Arts Center in Ottawa, various politicians, and Canadian publishing and filmmaking. His opposition to the Québécois separatist movement resulted in a long-running feud with the Montreal newspaper *Le Devoir* and to death threats, including one to blow up the hospital where he was recovering from kidney cancer in 1998. Richler was awarded the Order of Canada in 1999. He died of complications from cancer in Montreal on July 3, 2001.

## ANALYSIS

Being both a Jew and a Canadian amid the chaos of the twentieth century is the central concern of most of Richler's fiction. While not all of his protagonists are Jewish and not all of his novels are set in Canada, they are united in their concern with the difficulty of living in a world of pogroms, simplistic nationalism, ethnic tensions, political and personal hypocrisy, materialism, greed, and exploitation.

Richler fits into at least three distinct literary schools. His unease with class distinctions places him among the "angry young men," such as John Osborne, John Wain, John Braine, Alan Sillitoe, and David Storey, who dominated English fiction and drama in the 1950's and 1960's. His insights into North American Jewish life align him with Philip Roth, Bernard Malamud, Bruce Jay Friedman, and another Montreal native, Saul Bellow. The outrageous, often profane comedy of his later fiction resembles that of such black humorists as Thomas Berger, J. P. Donleavy, and Joseph Heller. The diversity of Richler's fiction can be attributed to the wide range of writers whom he has identified as influences, including Jean-Paul Sartre, Evelyn Waugh, Nathanael West, and P. G. Wodehouse.

Richler's satire results from a morally conservative viewpoint that leads him to rage at society's ex-

cesses. His protagonists are adrift in a world where acquiring money and status and satisfying sexual appetites seem to be the only reasons for existence. They seek some moral absolute that will allow them to make sense of their lives, but their quests for meaning are as likely to end in self-disgust as self-discovery. The typical Richler heroes long to establish their identities, to make meaningful connections with others, to find a home, a place where they will experience at least a tenuous sensation of belonging. Often self-deluding or self-destructive, his characters' greatest obstacle is usually themselves. Underscoring all of these concerns are constant references to the sufferings of the Jewish people and the evil of Nazism.

Richler's early fiction is predominantly realistic. *The Acrobats* examines the guilt experienced by Richler's generation for having been too young to have taken part in the Spanish Civil War and World War II and considers the self-destructive lengths to which they will go to assuage their guilt. The Jewish protagonist of *Son of a Smaller Hero* (1955) is frustrated by being cut off from the larger Canadian world, by the class distinctions not only in that society but also among Canadian Jews, and by his need to rebel against the shallowness and dishonesty that he sees everywhere. *A Choice of Enemies* (1957) uses Richler's experiences in radio and television to depict American and Canadian expatriates in the world of London show business. This often existential novel looks at the moral implications of the choices made by the individual. *The Apprenticeship of Duddy Kravitz*, one of the most highly regarded coming-of-age novels in twentieth century literature, moves Richler closer to finding his comic voice.

*The Incomparable Atuk* (1963), published as *Stick Your Neck Out* in the United States, is Richler's first overtly satirical novel. He uses an Eskimo poet lionized by Toronto society to poke fun at Canadian culture, nationalism, consumerism, and pretensions. *Cocksure*, a jaundiced look at the swinging London of the 1960's, is even stronger satire, attacking a mindless consumer society that accepts the images fostered upon it by television and film as the gospel of a new reality. Richler's protagonist longs to uphold decency and honor in a world where such qualities are despised and is punished as a result. *Cocksure* was banned by a chain of bookstores in Great Britain because of its sexual explicit-

ness, a key element in Richler's depiction of the excesses of his time.

*St. Urbain's Horseman*, with its comic yet angry portrait of a Canadian Jew desperate to establish his identity, proved to be the major work toward which Richler had been building. *Joshua Then and Now* examines Richler's generation in uneasy middle age. In attempting to impose order on the chaos of his personal life, its hero learns about communication, love, and responsibility, all significant Richler themes. *Solomon Gursky Was Here* (1989), his most stylistically complex novel, covers more than 150 years in the lives of a family of Canadian Jews as Richler vents his outrage at several famous historical events. This treatment of greed, stupidity, and anti-Semitism is his darkest satire. *Solomon Gursky Was Here* is perhaps Richler's most complete vision of his disappointment in his native land: "Canada is not so much a country as a holding tank filled with the disgruntled progeny of defeated peoples." *Barney's Version* (1997), his final novel, depicts the guilt of a television executive over his three marriages and a friend's mysterious death. The narrator's reliability in interpreting his life is hampered by the development of Alzheimer's disease.

Richler's characters are never comfortable with being either Jewish or Canadian. Everything about Canada appears inferior to its parallel in the United States, Great Britain, or France. His Canada is much like the world encountered by Jews: full of ghettos, torn by prejudices and petty jealousies. Richler's characters are defined by their Jewishness and confined by it. For them, traditional Jewish attitudes have become irrelevant in the modern world. Battered by ethnic, religious, cultural, and psychological tensions, they can never feel truly at home anywhere.

Richler's novels are quests in search of identity, a sense of belonging, of fulfillment. What he is seeking in his fiction "are the values with which in this time a man can live with honour." His protagonists are on quests for absolute truths needed to cure their indecisiveness. In this spiritual quest, they reject one world for an apparently better one and then struggle to come to grips with both the world they have abandoned and the new values confronting them. They are unable to distinguish between whether they are more concerned with escaping one world or searching for a new one.

## THE APPRENTICESHIP OF DUDDY KRAVITZ

**First published:** 1959

**Type of work:** Novel

*A young Canadian Jew determined to build a summer resort tries numerous money-making schemes.*

David “Duddy” Kravitz, the title character of *The Apprenticeship of Duddy Kravitz*, grows up in the Jewish ghetto of Montreal with his widowed father, Max, a taxi driver and part-time pimp, and his older brother, Lennie, a medical student. Duddy worships his grandfather, Simcha, a shoemaker, who believes that a man is nothing without land. Duddy, fifteen when the novel opens in 1947, is an unsophisticated, loudmouthed, obnoxious liar. A harassing telephone call to one of his teachers contributes to the death of the man’s invalid wife. Duddy’s favorite topic is sex. His friend Jake Hersh tells him, “Nothing’s good for you unless you can make it dirty.” Adults consider him “mean, a crafty boy” and hope his family will not suffer too badly from his antics. Duddy longs to emulate Jerry Dingleman, a gangster who grew up with Max.

After high school, Duddy works at a Jewish summer resort, where he is the only waiter who is not a college student. The other waiters are appalled by his crudeness, and one, Irwin Shubert, plots to destroy Duddy by winning all of his money in a crooked roulette game. Irwin justifies his actions by claiming, “It’s the cretinous little money-grubbers like Kravitz that cause anti-Semitism.” Irwin is forced to give Duddy back his money, and the guests feel sorry for him and give him even more. Throughout *The Apprenticeship of Duddy Kravitz*, the protagonist profits from bad experiences.

Duddy arrives at his plan for success when Yvette Durelle, a waitress at the resort, shows him a beautiful, unspoiled lake. He plans to buy the land surrounding it and build his own resort with a plot set aside as a farm for his grandfather. His first scheme to make the necessary money involves hiring the alcoholic Peter John Friar, a blacklisted English director of documentary films, to make films of Bar Mitzvahs and weddings. The first such film is the comic highlight of the novel, as Friar adds stock

footage to create an unintentionally hilarious anthropological study of Jewishness, as well as a parody of documentary pretentiousness.

Duddy begs Max to introduce him to Dingleman, who takes the teenager to New York, where Dingleman’s friends laugh at Duddy’s gaucheness. Dingleman then tricks Duddy into smuggling heroin back into Canada.

When Lennie runs away after he has botched an abortion on a rich girl, arranged by Irwin Shubert, Duddy tracks Lennie down in Toronto, brings him home, and convinces the girl’s powerful father not to have Lennie expelled from medical school. The rich man is impressed by Duddy’s courage, honesty, and loyalty.

Duddy hires the epileptic Virgil Roseboro to drive a truck for him, but Virgil has an accident and is paralyzed. Desperate to buy the last plot of land, Duddy forges Virgil’s name on a check. When he proudly takes his family to see what he has accomplished, his grandfather refuses to accept the farm because Yvette has told him what Duddy has done to Virgil: “I can see what you have planned for me, Duddel. You’ll be good to me. You’d give me everything I wanted. And that would settle your conscience when you went out to swindle others.”

Like Philip Roth, Richler has been accused of anti-Semitism for his portrayal of such characters as Duddy. He says that his intention has been misunderstood: “Duddy Kravitz was not meant to be a metaphor for the Jewish people. He was a character typical of his time and place.” Richler makes this point clear by having Dingleman take Duddy to see Arthur Miller’s *Death of a Salesman* (pr., pb. 1949). Like Miller’s Willy Loman, Duddy is an Everyman who has allowed himself to ignore his darker side in his pursuit of success. Like Loman, Duddy will be liked but not well liked.

That Richler intends the reader both to despise and to admire Duddy is typical of his ambivalence toward Canadians, Jewishness, materialism, and

success. Duddy lacks a clear identity, vacillating between his grandfather's morality and the corrupt ruthlessness of Dingleman. Richler makes him sympathetic by portraying him as a victim of his class. Duddy is morally superior to Irwin because he does not use others simply out of maliciousness. He takes advantage of Virgil but tells himself he will make it up to his victim.

Duddy is desperate for success, not just for itself but to create a better world beyond that of the ghetto. This need is shown by his creation of an imaginary older brother, Bradley, who lives on a ranch in Arizona and will invite Duddy to stay with him at any moment. He is even more desperate for the love and affection of Simcha, Max, and Lennie. He is forever hugging his father, knowing that Max cares more for Lennie. When his father agrees to introduce him to Dingleman, Duddy exclaims, "That means you think I'm like O.K. now."

Richler presents Duddy as a larger-than-life figure with equally good and bad qualities. The novelist does not sit in judgment of him, avoids any simplistic morality, and forces the reader to examine all sides of a complex character.

## ST. URBAIN'S HORSEMAN

**First published:** 1971

**Type of work:** Novel

*A Canadian film director in exile in England has his life thrown into turmoil by a rape charge.*

In *St. Urbain's Horseman*, Jake Hersch is a successful thirty-seven-year-old film director. He lives comfortably in London in 1967 with his wife, Nancy, and their three children until Ingrid Loebner, a German au pair girl, charges him and his friend, the disreputable Harry Stein, with rape. Richler delays the details of the charges until late in the novel, flashing back to depict Jake's life before this ordeal.

Growing up with Duddy Kravitz on St. Urbain Street in Montreal, Jake finds his life disrupted when his parents' marriage ends. He retreats into hero worship of his cousin, Joey, who has been a minor league baseball player, actor, folksinger, soldier in the Spanish Civil War, gambler, gangster, and communist. Jake slowly evolves an elaborate myth

about Joey, the Horseman, whom he sees as the redeemer of the Hersch family, the St. Urbain neighborhood, and Jews in general.

The teenaged Jake decides to become a director and moves to Toronto to work on television and stage productions. After he and his playwright friend Luke Scott feel that they have conquered Toronto, they seek the even greater challenges of London. Jake gradually becomes jealous of Luke, who finds success first. Jake marries Nancy, becomes a film director, and continues his search for Joey, who disappeared twenty years earlier. After finding Ruthy Flam, who claims Joey proposed to her, took her money, and abandoned her, he discovers evidence that Joey may be tracking down Joseph Mengele, the infamous Nazi war criminal.

Through Ruthy, he meets Harry, a Cockney Jew who forces his friendship upon Jake. A twice-convicted felon whose hobby is pornographic photography, Harry represents the uninhibited side of his nature that Jake keeps restrained. Allowing Harry to use his house while he is in Montreal for his father's funeral and Nancy and the children are in the country, Jake returns early and stumbles into Harry's orgy with Ingrid. Jake throws her out when she insults his Jewishness, the police find her in tears, and a trial results in seven years of imprisonment for Harry. Learning that Joey has been killed in an airplane crash in South America, Jake refuses to relinquish hope that the Horseman may still be alive and in pursuit of Mengele.

*St. Urbain's Horseman* displays Richler's typical ambivalence toward his subjects, offering several opposing views of Canada. It is "Thousands of miles of wheat, indifference, and self-apology." Yet Jake feels "increasingly claimed" by Canada. He leaves it "with a sense of loss, even deprivation, and melancholy." The insecure Jake identifies with Canada since the nation has been rejected by both England and France.

Despite his successful career and loving family, Jake is never at ease, seeing himself as a disappointment, a cliché: "His life until now read to him like any Jewish intellectual journeyman's case history." Feeling undeserving of his good fortune, he fears something will intrude to destroy his perfect life.

This sense of having lived too safe an existence explains Jake's attraction to the dangerous Harry Stein. When Jake refuses to pay Ruthy the seven hundred pounds she says Joey took from her,

Harry, who works for Jake's accountant, turns him in to the tax authorities and telephones a bomb threat to disrupt Jake's flight to Cannes. Instead of being outraged, Jake admires Harry's audacity. As a victim of the class system, Harry touches Jake. Their class differences are the main reason that Harry goes to prison while Jake is merely fined.

A major contribution to Jake's alienation is his feeling that his generation was born both too early and too late, a recurrent theme in Richler's writings. They missed the war and do not fit in with the youth culture of the 1960's: "Always the wrong age. Ever observers, never participants. The whirlwind elsewhere." Jake fears that they will be "dismissed as trivial, a peripheral generation." No one will become impassioned by the values Jake sees himself as representing: decency, tolerance, honor.

For solace, Jake turns to thoughts of the Horseman, convinced that Joey offers answers to the questions that perplex him: "Going into production, whether in television or film, he tried above all to please the Horseman. For somewhere he was watching, judging." Joey is all that Jake longs to be: adventurous, heroic, mysterious, dangerous, sexually attractive to every woman whom he encounters.

What is most important is not Joey Hersh himself but the myth that Jake has created about his cousin. He ignores all the evidence that Joey is merely out for himself. Jake's Uncle Abe tells him that if Joey were to find Mengele, he would not kill the Nazi but blackmail him. Nancy points out that, if not for his obsession with Joey, Jake would not have met Ruthy and Harry and fallen into disgrace and even stronger self-doubt. Yet Jake perseveres in his belief. The reality of Joey is less substantial than the myth. Disillusioned by religion, politics, and art, it is all that Jake has.

## JOSHUA THEN AND NOW

**First published:** 1980

**Type of work:** Novel

*This work is the conclusion of what is seen as a trilogy of novels about ambitious young men growing up Jewish in Montreal.*

The only son of Reuben, a former boxer who works for a gangster, and Esther, an exotic dancer performing as Esty Blossom, Joshua Shapiro has a chip on his shoulder about being Jewish, Canadian, and poor. Obsessed with the Spanish Civil War, the subject of his first book, Joshua feels he has been left out of life's great adventures, its noble causes, and strives to make up for this lack by becoming rich and famous as a journalist and television personality in England and Canada. More than in most of his fiction, Richler presents a non-linear narrative as forty-seven-year-old Joshua, hospitalized with multiple fractures, looks back at his life and the choices he and those close to him have made. The novel constantly jumps back and forth in time and place (Montreal, London, Paris, Hollywood, Spain) to suggest the chaotic, peripatetic nature of its protagonist's life.

As a young man, Joshua falls desperately in love with Pauline Hornby, the well-to-do daughter of a Canadian senator. A few years later in London, he begins an affair with the married Pauline and eventually marries her. Marriage, fatherhood, and a successful career fail to provide the happiness Joshua desires. He never feels worthy of Pauline, always placing obstacles between them, and constantly fears losing her. He is ambivalent about everything in his life, especially his celebrity because he dislikes television and those who shine in the medium.

Joshua also dislikes Jack Trimble, a successful investor who pretends to be English, and resists the advances of Jack's sexy wife, Jane, Pauline's best friend. He also feels jealous of Pauline's flamboyant, athletic, ne'er-do-well brother, Kevin, with whom she appears to have an almost incestuous relationship. Jack's hiring Kevin creates even more tension in Joshua's life.

There are repeated flashbacks to Joshua's visit to Ibiza in the early 1950's, as he seeks the remains of

the lost cause of the Spanish Civil War and finds much more than he expected in the arms of a beautiful, libidinous French tourist. A return to the same spot years later finds the place, like Joshua, much changed, without its seedy glamour.

For the friends with whom he grows up in the St. Urbain neighborhood, Joshua is never a famous, influential personality but the boy whose mother performed a striptease at the party following his Bar Mitzvah. Joshua and his friends, who hold a boisterous annual reunion, remain united by their Jewishness and their amused tolerance for the eccentricities of their fellow Canadians.

Joshua's best friend, from his London days in the 1950's, is the English novelist Sidney Murdoch. As a prank when they are young men, they compose letters to each other posing as homosexual lovers. When these letters come to light after Murdoch's death, Joshua's haphazard existence grows even more tempestuous, with Richler satirizing the excesses of the news media.

A major theme of *Joshua Then and Now* is time, hence its fragmented structure, and the acceptance of foibles that comes with aging. Tinged by nostalgia for the passions of the past, Joshua becomes sadder but wiser.

## SUMMARY

Mordecai Richler's novels are satirical attacks upon the sins of his times, but his approach to his fiction denies his readers any sense of moral superiority, rubbing their noses in the excesses of the twentieth century. Richler is an unusual novelist because he is moralistic without being didactic or sentimental. He has no pretensions to having any answers to life's dilemmas, content merely to pose the questions. Richler's fiction is as notable for its compassion as much as its anger. Making rogues such as Duddy Kravitz and Harry Stein sympathetic is typical of his greatest talent: his skill at vivid characterization.

## DISCUSSION TOPICS

- What is distinctively Canadian about Mordecai Richler's fiction?
- Richler's Canadian characters often live in exile, usually in England. How do their exiles affect their views of themselves and their native country?
- Many of Richler's novels are about growing up. What does he seem to be saying about the pains and joys of adolescence?
- Friendship is one of Richler's most consistent themes. Compare how he examines friendship in two or more novels.
- Like many male writers of his generation, Richler has been accused of failing to create completely realized female characters. Is this charge justified?
- Many of Richler's protagonists, Duddy Kravitz in particular, are not particularly likable. Why does Richler deliberately make it difficult to identify with such characters?
- *The Apprenticeship of Duddy Kravitz*, *St. Urbain's Horseman*, and *Joshua Then and Now* are said to form a trilogy, though they involve different characters. How are they alike thematically?

## RAINER MARIA RILKE

**Born:** Prague, Bohemia, Austro-Hungarian Empire  
(now in Czech Republic)  
December 4, 1875

**Died:** Valmont, Switzerland  
December 29, 1926

*Rilke, a twentieth century lyric poet, infused his writing with his own personal myth of omniscient and omnipotent feeling.*

### BIOGRAPHY

Rainer Maria Rilke (RIHL-kuh) was born on December 4, 1875, in Prague, Bohemia, Austro-Hungarian Empire (now in the Czech Republic), as René Karl Wilhelm Johann Josef Maria Rilke. His father, Josef Rilke, aspired to a military career, but circumstances forced him into an early retirement. His mother, Sophia Entz, grew up in an aristocratic atmosphere; her father had been a merchant and an imperial councillor. Dissatisfied with her husband's humble social status, she attempted to create the illusion of affluence in the family.

Due in part to his mother's pretentious and hypocritical display of Catholicism, Rilke later abandoned Christianity entirely. His hostile attitude toward established religion, combined with a genuine and profound spiritual tendency in his nature, was to lead Rilke to search for a divinity within and for a means to express it. This search for "God" contributed to some of the central images and themes in his writing.

Rilke's personal and artistic development was seriously affected by another element in his mother's personality. His mother, prior to giving birth to Rilke, had lost a female child; he then became the girl whom she never had. For his first five years, Rilke was kept in long curls and dresses and was given dolls with which to play.

Although their marriage was a troubled one almost from the start, Rilke's parents separated in 1884, and in 1886 Rilke was sent to a military school, where he remained for five years. It was there that he began to write, as much from loneliness and desperation as from a desire to explore and represent the world around him. Rilke left military school in 1891, at the age of sixteen, ostensibly for health reasons. The next year, his parents sent him to trade school in Linz to prepare for a business career. In 1895, Rilke entered the Karl-Ferdinand University in Prague as a philosophy major. Within six months, he had switched to law, and by September, 1896, he had left Prague for Munich to study art history.

While living in Prague, Rilke tried to establish himself as a writer. His style, however, was sentimental and imitative. Passionately interested in the theater, he wrote several plays heavily influenced by naturalism; two of them were performed at the German Volkstheater in Prague. Between 1894 and 1896, he also published three volumes of poetry.

In October of 1896, Rilke moved to Munich. There, he became acquainted with Lou Andreas-Salomé, a critic, novelist, and writer of philosophical essays. Married and fourteen years Rilke's senior, she was to become one of the most influential people in his life. She would become his mistress, companion, teacher, and mother figure for three intense years; she also remained a correspondent and distant confidant throughout his life. It was upon her insistence that he changed his non-German and, in her view, feminine-sounding name from René to Rainer. Andreas-Salomé sent Rilke to

Florence to study art and architecture, and in the spring of 1899 they traveled to Russia together. Russian culture was to have a deep impact on Rilke's life and work from that time forward. Rilke's thoughts on such issues as the relation of God and art or the importance of humility and patience were given form and substance in Russia.

When Rilke's mistress began to tire of his overly dependent and demanding nature, the poet decided to stay with a painter friend, Heinrich Vogeler, in Worpswede, where he became intimately involved with a group of visual artists. The idea of *schauen*, of seeing in an active, participatory way, was to become an important dimension of his own art. There, he became friends with the painter Paula Becker and the sculptor Clara Westhoff, whom he married in 1901.

After living under impoverished circumstances for some time, the couple moved to Paris. Clara returned to her studies with Auguste Rodin, and Rilke was commissioned to write a monograph on the sculptor. Paris was a turning point in Rilke's life for many reasons. Although he and Clara remained close friends and often lived near one another in Paris, Rome, and Munich, they never again shared a home. Also, Rilke learned from Rodin the lesson that poetry was not only an inspiration but also a craft.

During the next several years, Rilke traveled extensively. In 1906, he was fired from a clerical position given to him by Rodin; that same year his father died. Then, in 1907, Paula died. Feeling the sadness, guilt, and loss over her death, he wrote one of his most personal and moving poems, "Requiem für eine Freundin" ("Requiem for a Friend").

Rilke returned to Paris, where he completed the second book of the two-volume *Neue Gedichte* (1907-1908; *New Poems*, 1964) and his novel *Die Aufzeichnungen des Malte Laurids Brigge* (1910; *The Notebooks of Malte Laurids Brigge*, 1930)—an endeavor that cost him much of his health and energy. During his extensive travels in 1910 and 1911, he met Princess Marie von Thurn und Taxis, a well-read, older woman with contacts in the artistic and aristocratic worlds of Europe. She became a wise, motherly, and powerful patron to Rilke. The princess placed her two castles, at Duino near Trieste and at Lautschin in Bohemia, at Rilke's disposal; it was at Duino that he was inspired to write the first of his

great elegies. In gratitude to his hostess, he called them the *Duineser Elegien* (1923; *Duinese Elegies*, 1930, better known as *Duino Elegies*).

During the next several years Rilke's health began to deteriorate. In 1914, World War I began, and after spending some weeks in basic training, he was released from the army. He then returned to Munich, where he remained during the remainder of the war. In the summer of 1919, he was invited to Switzerland to give a series of poetry readings. A Swiss friend, Werner Reinhart, rented a tower for Rilke, the Castle of Muzot, and later bought it for him. There, he not only completed the *Duino Elegies* but also wrote another book of poems, *Die Sonette an Orpheus* (1923; *Sonnets to Orpheus*, 1936).

In 1924, Rilke entered a clinic at Valmont, Switzerland; however, there was no visible improvement in his health. In January, 1925, he left for Paris but returned to Muzot nearly a year later. At that time, he made a will and arrangements for his burial. In November, Rilke returned to Valmont, where he fought an intense battle against an extremely rare and painful form of leukemia. He refused to be given drugs that would make him lose consciousness and did not allow his doctor to tell him the diagnosis or to speak of death. He died in Valmont a few weeks after his fifty-first birthday, on December 29, 1926.

## ANALYSIS

While Rilke has often been read as a religious poet or mystic, Rilke's outspoken attitude toward organized religion, particularly Christianity, negates this interpretation. His own unique concept of divinity was a fusion of myth, legend, and personal belief. Rilke's maturity is reflected in his works, which underwent a focusing process. At first, he wrote of a type of anthropomorphic god, related to the Christian one but not identical with it. Later, this god became more clearly associated with creativity. Eventually, God disappeared from the works and was replaced, in the final years, by the angels of the *Duino Elegies*: superhuman beings, aloof and omniscient, with whom humanity was required to come to terms. Rilke increasingly described the process of artistic creativity and investigated the poet's relationship to the world. While these motifs remain central to Rilke's writing, the focus varies in individual works—from the artist in

the earlier works, to the artistic object, to a search for the nature of humanity's creative task in *Duino Elegies* and *Sonnets to Orpheus*.

There are, in addition, numerous specific concerns that occupy Rilke's work. Prominent among these is death. Rilke addresses it in several requiems; it assumes an almost medieval character in some works, becomes a dark figure on a path through the bog in his discussions of Worpswede, and appears as a glorious display of light and fountains in other works. Rilke developed the idea that each person has a death of his or her own, as unique as his or her life had been. He frequently uses the image of death as the core or seed of a fruit: Death is placed within the individual to ripen. For women, giving birth also implies bearing a death along with each life that is created.

Also of importance in Rilke's work is the idea of *schauen* (looking, seeing). There are numerous references to light and darkness, to color, and to mirrors in his work. Rilke, as a highly visual poet, emphasizes the seen world; moreover, he calls the reader's attention to the act of seeing. For him, it becomes more than just a sensory act; it is a skill to be cultivated and finally becomes a philosophical stance toward the world.

The past also plays an important role in Rilke's works. Many works contain historical figures who represent themselves within the world of their day and at the same time become bearers of the author's concerns. For Rilke, the past, especially that of great families, implies a way of life that is valuable in itself: elegant, aesthetic, well balanced, and humanistic. This view of the past is related to another important characteristic of his works: his interest in and respect for inanimate objects. These range widely from buildings to art objects to everyday objects. Also, objects from the natural world appear—rain, flowers, and, especially, roses. Rilke often focuses on an object from the past, both as something inhuman, with a life and purpose of its own, and as a link to another era, filled with human associations, anecdotes, and experiences.

Aside from nature, landscape, and animals, certain human types also recur frequently in Rilke's work. Children are for Rilke vehicles of innocence, but they are also victims of adults. In his works, children are often portrayed as being lost among uncomprehending adults, attending schools that brutalize them; yet they are also beings who explore,

experience, and create their own world. Lovers are also a significant element of Rilke's writings, particularly young women whose love is unrequited or impossible. Over the years, Rilke developed a vision of an ideal love, an objectless or possessionless love in which the lover is so strong and sure in his or her love that the object, the specific person, becomes superfluous. The lover loves outward in an expenditure of pure energy, of pure, intransitive loving.

Through the years, there has been a proliferation of styles evident in Rilke's work—neoromanticism, satiric expressionism, impressionism. Progressively, however, in whatever medium Rilke wrote, there is a growing sense of ambiguity and experimentation, and a consistent mastering of the dynamics and the infinite possibilities of language.

## DUINO ELEGIES

**First published:** *Duineser Elegien*, 1923  
(English translation, 1930)

**Type of work:** Poetry

*Rilke's poems take a long, critical, and sometimes despairing look at humankind, attempting, to discover its place in the grand scheme of existence.*

With regard to the *Duino Elegies*, the word "elegy" was first used as a formal term in distichs—paired lines, usually in dactylic hexameter, treating a variety of subjects. Later, the term was applied specifically to poems expressing lamentation, renunciation, or melancholy. *Duino Elegies*, a cycle of ten long poems, continues both of these traditions.

One of the most striking images in the *Duino Elegies*, and one that unites the various poems, is the figure of the angel. The Rilkean angel, however, departs from the traditional biblical figure. As Rilke himself stated:

The angel of the Elegies is that being which stands for the recognition of the invisible as a higher level of reality. Therefore "terrible" for us, since we, its lovers and transformers, still cling to the visible.

The dichotomy of visible/invisible that Rilke stresses is a central image in the *Duino Elegies*. The poet's task—as well as the reader's—is to praise the world, thereby immortalizing it, by transforming the visible into “invisible” objects of language, imagination, and spirit.

In the opening lines of the first elegy, the angels appear aloof, unaware of humankind's inferior presence. Humanity is pictured as having no genuine connection to the rest of creation. The speaker wonders whether there might be hope for humankind in its lovers, but this idea is rejected as self-delusion. In the second elegy, the notion of the angels' vast superiority to humankind is reiterated. First, the speaker elevates their glorious and luminous nature. The remainder of the elegy presents by contrast humanity's feeble essence. Once again, in lovers there is “almost . . . the promise of eternity,” but love is fleeting. The desire for permanence is a complex and ambivalent emotion that persists throughout the cycle. While the second elegy laments the transitory, insubstantial nature of humankind, later in the cycle the desirability of permanence is itself called into question.

The third elegy is entirely devoted to earthly things, to the dark, sexual, subconscious aspect of life. The speaker invokes a mother figure who represents safety and peace, but even she cannot defend the speaker against human nature. The fourth elegy returns to the themes of alienation

and once again compares humankind's chaotic behavior with the harmony of nature. The speaker, referring to the human proclivity for conflict, declares that lovers, instead of bringing mutual liberation, often limit one another's horizons. The fifth elegy focuses on a troupe of traveling acrobats about to perform. The poem emphasizes, once again, humankind's

temporary and unintegrated existence, exemplified by the performers who are tossed and bent like toys by “an insatiable will” outside themselves. The image of a fig tree opens the sixth elegy. The fig tree bears almost no blossoms; it seems to focus

its energy into producing fruit. Unlike the tree, however, the speaker asserts that humans linger in life at the blooming stage and focus on appearances.

In the seventh elegy, the speaker refers pejoratively to the modern world of electricity and power plants, of indifference to the old and sacred. His advice is to cling to the man-made forms that have withstood time. In humanity's capacity for creativity the speaker discovers a piece of eternity. After this expression of pride in being human, the eighth elegy comes as a surprise; it represents a sudden plunge back to the edge of despair. In a striking image of a bat, a creature born of a womb but doomed to fly, Rilke creates one of his most vivid images of disorientation and disharmony. He then turns to the plight of alienated humanity, whose efforts at ordering the world are likened to the seemingly pointless, frenetic movements of the bat.

When people die, they take nothing concrete with them. Rilke presents as a metaphor for this fact the wanderer, who, upon returning from the mountaintops to the valley, brings back, not a handful of earth, but “a pure word.” Humankind's new task will resemble the poet's: to take words on its journey as the symbol and vessel of its experiences. Rilke's solution, however, is not a purely aesthetic one, intended for poets or artists alone. What human beings all share is the ability to transform the world into words that cannot die.

The tenth elegy focuses on lamentation, but the mood is calmly triumphant. The poem presents a scathing allegory of modern life in the form of the *Leidstadt*, the City of Pain, and its surrounding suburbs and fairgrounds. The speaker denounces false piety, institutional religion, and peddlers of moral values of all kinds. Just beyond the fence enclosing this city, however, reality begins. There are children, dogs, and lovers—three of Rilke's positive types presented in contrast to the noisy falseness of the city and fair.

In the final striking image of the poem, a dead youth climbs into the mountains of primeval pain and accepts the burden of lamentation as the spring rains begin to fall. The rains will bring new life from the earth. Humanity must, Rilke implies, unlearn its habitual responses to the world, specifically to sorrow and death. He reiterates the idea that death itself is the key to wholeness.

## SONNETS TO ORPHEUS

**First published:** *Die Sonette an Orpheus*, 1923  
(English translation, 1936)

**Type of work:** Poetry

*Through the descent into the realm of death is accomplished an ascent to life.*

*Sonnets to Orpheus* comprises a series of fifty-five poems. Vera Knoop, the friend and dancer whose early death is commemorated in the dedication of the *Sonnets to Orpheus*, assumes the same mythological status as the “singing god” at whose side she appears. Many of the poems in the cycle are sonnets only in the broadest definition of the term. All have fourteen lines, and all are divided, in the style of the Petrarchan sonnet, into an octave (two quatrains) and a sestet (two tercets). The rhyme scheme and line length, however, are extremely varied. Some lines seem purposely constructed to defy scansion, to defy the established order.

In the third poem of the first set, the speaker asks how a mere mortal can achieve the clarity and distance demanded by poetry. One hears reiterated the underlying complaint of the *Duino Elegies*: humanity’s ambivalence, ineptness, and inability to grasp the essence of things. In the second quatrain, the speaker suggests that poetry is not mere experience or emotion; experience must first ferment within the individual before it can reemerge as truth or as poetry.

Orpheus exercises his symbolic function in various guises in the *Sonnets to Orpheus*. He charms the beasts out of the forest with his singing and represents the sought-after union of life and death. Or-

pheus is familiar with death from his descent into Hades to retrieve Eurydice, and from his own death at the hands of the jealous maenads and his subsequent resurrection and repeated death. Rilke mixes the Orphic legend with that of Dionysus, the god of wine, ever dying and reborn. Orpheus is equated with the poet. Orpheus has sung among the dead, and the mortal poet is encouraged to do the same.

Related to the figure of Orpheus is the motif of transformation that appears in the first set of sonnets and dominates the second. Some of the most elegant and convincing poems of the cycle are those dealing with the topics of transformation and growth. Sonnet 12 of the second series begins with a command: “Will transformation. Oh, be crazed for the fire/ in which something boasting with change is recalled/ from you.” Thus, it is not enough to hope passively for change; the individual must desire it and seek it. The poems contain references to all four of the basic elements: earth, air, fire, and water—thus symbolically embracing the entire spectrum of physical transformation.

The second quatrain begins with an invitation to imitate Orpheus, to “Be dead forever in Eurydice,” and ends with the invocation to “be a ringing glass that shatters as it rings.” The poet urges humankind to take risks, to sing out even if the act of singing means destruction. This act becomes a typically Orphic transformation of the visible (the glass) into the invisible (the shattered glass leaves pure sound).

The final poem in the cycle intensifies and focuses the message of previous poems; it also echoes their images. The reader is urged to “Know transformation through and through./ What experience has been most painful to you?/ If the drinking’s bitter, turn to wine.” The reader is exhorted to identify precisely what is painful and to know it intimately. In Rilke’s poetic vision, it is humanity’s task to exert its will and imagination over the randomness of existence and to create order from chaos. Individuals make the world immortal through the language of praise.

## “THE PANTHER”

**First published:** “Der Panther,” 1907  
(collected in *The Selected Poetry of Rainer Maria Rilke*, 1982)

**Type of work:** Poem

*The poem speaks of a search for the essence-characteristic of an object and its inner rhythm.*

“The Panther” is the oldest poem in Rilke’s first volume of the two-volume *Neue Gedichte* (1907, 1908; *New Poems*, 1964). The poem deals with a panther who paces endlessly in its cramped cage in the zoo. Its physical appearance is that of a free beast, but its spirit and instincts have been dulled by long captivity. This poem is placed between several others that reflect and illuminate it by their similar subject matter. Preceding it is the two-part sequence titled “Der Gerfangene” (“The Prisoner”). There, the thoughts of a man in prison are punctuated by the numbing, repetitious drip of water in his cell. In the second of the two sequences, the prisoner tries to portray, for someone on the outside, the madness and horror of his life. Placed immediately after the panther poem is one called “Die Gazelle” (“The Gazelle”). This poem also portrays an animal in a zoo. Instead of being dulled by captivity, however, the gazelle is raised to an image of lightness, self-containment, and beauty.

Placed between these poems, “The Panther” represents a particular reaction to imprisonment. Although a portrayal of one particular animal, the poem also becomes a portrayal of all captive creatures—the poet included.

One of Rilke’s best-known and most widely discussed poems, the work is a masterpiece of suggestion and indirection. While a cage is never mentioned, there is no doubt in the reader’s mind that one exists. It seems to the panther that the bars are “passing back and forth,” until they have become a dynamic and absolute reality. Nor is the panther itself ever mentioned again once the title has introduced the animal. The sound, rhythm, and tactile quality of the cat’s pacing are presented through both the meaning and the sound of the words of the second stanza.

In the first two lines, the panther’s movement is characterized as “a dance of strength”; it is both graceful and powerful. Yet this harnessed power

has been short-circuited and circles endlessly on itself, devoid of purpose. The “great will” of the cat does not move with its body, which seems animated by some automatic, mechanical force; instead, it “stands numbed” at the center of the circle, incapable of decision.

In the final stanza, there is a moment when it seems to the onlooker that the animal’s integrity has not been totally destroyed: when its eyes receive a message from beyond the bars. The image passes through the body, which has ceased its endless circling and seems to await a command. Yet when the image reaches the animal’s heart, it disappears without a trace, leaving the cat to pursue its pacing in the void and leaving the reader to feel sadness at the waste.

In its form, the poem reflects the content. Like the activity of the panther, the poem is circular, although this fact is not evident in the translation. In the original, the first word, *sein* (his), and the last, *sein* (to be), are homophones. The poet has brought the reader back to where he began, just as the panther always must return to the same spot. In addition, lines 6 and 7, describing the small, tight circle of the “dance of strength around a center,” fall at the precise center of the poem. Finally, Rilke uses fairly regular iambic feet, with alternating feminine and masculine rhyme, so that a swinging, sinuous rhythm is produced. The last line, in which the image ceases to exist in the heart of the cat, is, however, short by a foot. The abruptness of this line echoes that of the extinction of the image and closes the door on any possibility of renewal.

## “REQUIEM FOR A FRIEND”

**First published:** “Requiem für eine Freundin,” 1909 (collected in *The Selected Poetry of Rainer Maria Rilke*, 1982)

**Type of work:** Poem

*The poem elucidates the persistent pressure of “normal” life against the full development of the individual, in particular, the artist.*

Rilke wrote “Requiem for a Friend” in memory of a young painter friend of his, Paula Modersohn Becker, who died at the age of thirty-one shortly af-

ter giving birth. Although her name is never mentioned, it is apparent that she is the subject of the poem.

The speaker of the poem addresses the woman, who, unlike other dead figures—friends and figures from his poems—does not rest in peace but returns to haunt him. He believes that she comes with some request of him, the nature of which he tries to ascertain. He offers to travel to a distant land where she has never been, but which is spiritually part of her. There, for her sake, he will see and learn as much as possible. About a third of the way into this long poem, Rilke introduces the first of a series of significant facts regarding Paula: She was a painter whose insight, skill, and objectivity he admired.

Much personal detail is condensed in this section. In the speaker's opinion, among the best of Paula's works are a number of still lifes with fruit. Yet she also painted many admirable pictures of the women and children of Worpswede. In these paintings each face is uniquely itself, as distant and distinct as a piece of fruit or a watchful animal. The phrase "you balanced their weight with colors" introduces into the poem an important facet of Rilke and Paula's relationship. It was Paula who first made Rilke aware of the artist Paul Cézanne, and by weaving ideas about Cézanne into his discussion of her art, Rilke is both acknowledging a debt to her and praising her own work.

The section in which Paula steps naked before her mirror is a reference to her nude self-portraits, particularly to one of her final ones, in which she stands posed only in an amber necklace, gazing at the viewer with an expression as detached as the fruits in her paintings. Her gaze is "without possession," an echo of Rilke's conception of love; also, it is full of "true poverty," an echo of the virtue espoused in the figure of Saint Francis in Rilke's collection *Das Stundenbuch* (1905; *Poems from The Book of Hours*, 1941). These key Rilkean phrases are applied, however, in a new context. With respect to the notion of *schauen* (looking), the artist is asked to be so detached that he or she possesses and desires nothing, but only sees and portrays. In Paula's gaze, Rilke finds the highest degree of such creative renunciation. That is, in her own eyes she had become a pure thing, an object among objects.

Next, the speaker reveals another crucial fact about Paula's life, and he gradually realizes that it

is the key to her current presence in his life. He says, "Let us lament together that someone/ took you out of your mirror." As an artist, she had been in the process of transforming all of her powers into seeing and creating, but then, chance had forced her back into the world, where she gradually succumbed to its biological demands when she became pregnant. The words that Rilke uses to describe this transformation are brutal and culminate in the image of Paula digging up the unripe seeds of her own death and eating them before they are able to blossom into fruit. He further describes how she did violence to herself by diverting her blood toward the new life within her, while trying to persuade herself that her actions were not permanent or irrevocable. After the birth of her child, Paula steps in front of her mirror once more, but her reflection is deceptive. The mirror of truth becomes distorted. The death that follows is not her own, since she has eaten its seeds prematurely by abandoning her calling and her true nature, and by returning to the world.

In the next section, Rilke mourns his version of Paula (the woman who had sacrificed herself in vain) but then moves from mourning to accusation. He does not blame her husband directly for her death. Rather, he accuses all people, himself included, who are infected with the disease of possessive love. The section closes with one of Rilke's strongest affirmations of possessionless love: "For that is guilt, if anything is:/ not to increase the freedom of a loved one/ by all the freedom that one has at one's disposal."

In "Requiem for a Friend," Rilke is clearly expressing genuine sorrow at the loss of a friend. That he was also thinking of himself becomes evident in the final section of the poem. The roles are reversed: At the beginning of the poem, Paula, a restless ghost, comes to the poet with a plea; now, Rilke turns to her, as one artist to another, and asks for help. He fears succumbing to life's demands as she had: "For somewhere there is an old enmity/ between life and a great task."

## SUMMARY

As a lyric poet, Rainer Maria Rilke focuses on the microcosm of human consciousness. The past, a heightened state of awareness and inwardness, and the subtle play of intellectual distinctions are important aspects of his poetry. The extraordinary in-

tensity of Rilke's sensory and emotional perception combines with a unique and intuitive way of seeing things.

The specifically modern dimension of Rilke's poetry lies in its view of the reality of humanity as something outside and apart from any conception of fate, as something beyond any given situation; what Rilke's poetry expresses first and foremost is pure, unadulterated Being, feeling made tangible.

## DISCUSSION TOPICS

- Was Rainer Maria Rilke religious or irreligious?
- What themes do you see in Rilke's animal poems, especially those focused on felines?
- Into what elegiac tradition can Rilke's *Duino Elegies* be placed?
- What is the relationship between transformation and growth in *Sonnets to Orpheus*?
- Why does Rilke call his sonnet collection *Sonnets to Orpheus*?
- What is a requiem? Is the emphasis in "Requiem for a Friend" on praising the friend or on coming to terms with the fact of a loved one's death?

## ARTHUR RIMBAUD

**Born:** Charleville, France

October 20, 1854

**Died:** Marseilles, France

November 10, 1891

*Rimbaud's revolutionary poetic accomplishments, experiments with free verse, concept of the voyant, and desire to change life through poetry make him one of the most prominent figures of literary history.*

### BIOGRAPHY

Jean-Nicolas-Arthur Rimbaud (ram-BOH) was born on October 20, 1854, in Charleville, a town near the Belgian border in northeastern France, and grew up there. He was the second of five children. His father, Frédéric Rimbaud, an army officer, left the family to go to the Crimean War when Arthur was six years old. Vitalie Cuif, the poet's mother, came from a peasant background and was narrow-minded and fanatically religious. In 1870, a young teacher, Georges Izambard, arrived at Arthur's school. Himself a poet, he encouraged Rimbaud and lent him books by François Villon, François Rabelais, Victor Hugo, and the Parnassian poets. In an irate letter, Rimbaud's mother complained that the teacher had lent her son a "dangerous book," Hugo's *Les Misérables* (1862; English translation, 1862). That same year, Rimbaud composed twenty-two poems. Describing nature, dreams, pagan eroticism, and the rebellion against Christianity, the young poet also wrote one of his masterpieces, "Le Dormeur du val" ("The Sleeper of the Valley"), about a young soldier dead in the Franco-Prussian War.

Because of the war, the schools closed, Izambard left Charleville, and Rimbaud dreamed of doing likewise. Boarding a train for Paris without money to pay his fare, the fifteen-year-old was promptly thrown in prison upon arrival in the capital but was

rescued by Izambard, his former teacher. Although he was sent back to his mother, the young poet escaped again, only to be brought home by the police. When the schools reopened, the sixteen-year-old refused to return.

On May 15, 1871, Rimbaud wrote to his friend Paul Demeny the famous "Lettre du voyant" ("Seer Letter") expressing his theories about poetry and life. In proposing to make himself a *voyant*, a poet-prophet-visionary, Rimbaud vows to practice the "long, immense and reasoned deranging of all the senses" in order to reach a transcendent state, called the "unknown." The letter expresses Rimbaud's desire to experience "all the forms of love" and thus foretells his liaison with the poet Paul Verlaine. It also claims that he will exhaust "all the poisons, to keep only their quintessences," thus explaining Rimbaud's use of alcohol, hashish, and other intoxicants. Rimbaud claims to be aware that the knowledge that he is seeking will be reached only through madness and finally through death. Several months later, another of his most famous poems, "Le Bateau ivre" ("The Drunken Boat"), repeated the pattern of rebellion leading to ecstasy and death outlined in the letter.

Four months after composing his manifesto, Rimbaud wrote to Verlaine saying that he needed to leave Charleville to become a poet. Verlaine, who promptly invited him to Paris, was then twenty-six, married, and soon to become a father, yet shortly after Rimbaud's arrival he abandoned his family to live with the younger man. Verlaine introduced his protégé to the Parisian literary world,

where Rimbaud immediately scandalized the public. In July, 1872, the two poets left France for Belgium and England. In the next few years, Rimbaud wrote most of his poetry, including *Une Saison en enfer* (1873; *A Season in Hell*, 1932) and *Les Illuminations* (1886; *Illuminations*, 1932).

On July 10, 1873, in Brussels, Verlaine, drunk and irate at Rimbaud's talk of leaving him, shot the young poet in the wrist. Verlaine went to prison, and Rimbaud returned to his mother's farm, where he completed *A Season in Hell*. The section of this work titled "Deliriums I" is a rendition of the life that Rimbaud led with Verlaine. Rimbaud was eighteen when he finished *A Season in Hell*, and by the time that he was nineteen or twenty, he had stopped writing poetry. It is difficult to date the strange, hallucinatory poems of the *Illuminations*, which were first published in 1886 without Rimbaud's knowledge, since he was then living in Africa.

From his twentieth year until his death, Rimbaud traveled, often on foot, working from time to time, in Europe, Africa, and Egypt. In 1876, he joined the Dutch colonial army but soon deserted. He dealt in skins and coffee, studied Arabic and Abyssinian, and did some exploring, even publishing a report with a geographical society in Paris. He attempted to sell guns to an Ethiopian king but lost much of his capital in the process. There is much speculation, but little evidence, to explain Rimbaud's renunciation of poetry in favor of the life of an adventurer in the colonies. Letters to his family show him as very ambivalent toward Africa. If he was often unhappy there, however, he seems to have felt that he would have been still more miserable in Europe.

In 1891, Rimbaud did return to France, suffering from a tumor, possibly of syphilitic origin, in his right knee. He died on November 10, 1891, in Marseilles, France, at the age of thirty-seven, unaware that in Paris his works were being published and admired. Verlaine had introduced his works, devoting a chapter of his book *Poètes maudits* (1884; *cursed poets*) to his former protégé. Verlaine also edited the *Illuminations*, published by *La Vogue* in 1886. *A Season in Hell* was first printed in Brussels in 1873 but did not become well known until 1891, when Verlaine introduced the Vanier edition.

## ANALYSIS

Rimbaud, like his friend Verlaine and their great predecessor Charles Baudelaire, is one of those poets who is at least as well known for his scandalous lifestyle as he is for his poetic production. The prototype for the henceforth famous *poètes maudits* (damned poets), Rimbaud believed that the goal of poetry was to change life. In his opposition to the hypocrisy of European bourgeois materialism and nineteenth century positivism, the poet pioneered the use of shock as a tool of political statement.

Remy de Gourmont, the symbolist poet and theoretician, praised Rimbaud's "magnificently obscene violence." Paul Cézanne, Paul Gauguin, and Camille Pissarro, committed as they were to the liberation of painting, enthusiastically followed the work of the literary anarchist Rimbaud. In his poem "Le Voyage" ("The Trip"), Baudelaire had insisted that his goal was to "find the new." Rimbaud experimented with new language and poetic form in order to continue on the road marked by *Les Fleurs du mal* (1857, 1861, 1868; *Flowers of Evil*, 1931). Thus, Rimbaud created the poem-illumination, an explosion of sound, feeling, and movement, aiming, through sensual experience, to achieve a merger of reality and dream.

Breaking down the traditional patterns of rhyme and meter for poetry, Rimbaud's poems "Marine" ("Seascape") and "Movement" ("Motion") were two of the first free-verse works published in French. During the final years of the nineteenth century, the Symbolist poets acclaimed Rimbaud for this sort of innovation. His sonnet "Voyelles" ("Vowels") became a manifesto for many of them. The assignment of a specific color to each vowel was a striking example of his use of synesthesia. The subjective association of a visual stimulus to the sound experienced proclaimed the sovereignty of individual perception.

Far more important than Rimbaud's influence on the Symbolists was the role that he played for the Dadaists and the Surrealists. Dada was a movement grounded in anarchy, in revolt against all established aesthetic values. It therefore recognized in Rimbaud a precursor both in his work and in his life, especially in the fact that he eventually stopped writing poetry. The Surrealists were drawn to the visionary side of the poet's writing. Their desire was to explore the unknown, to express the dark side of

experience, and to reach the language of what Sigmund Freud called the unconscious. They considered Rimbaud a poet-chemist, who, by overthrowing reason and deranging the senses, sought new knowledge. “Rimbaud is a Surrealist in the practice of life and elsewhere,” wrote their spokesman André Breton in his *Manifeste du surréalisme* (1924; *Manifesto of Surrealism*; 1969).

Rimbaud’s acceptance of evil as an instrument for self-liberation and for the transformation of human existence, his unwillingness to compromise the purity of his vision and to settle for bourgeois values, have inspired many twentieth century artists. The American poet Hart Crane quoted a line by Rimbaud, “It can only be the end of the world, ahead,” as the epigram for *White Buildings* (1926). Another rebellious American writer, Henry Miller, devoted a prose poem of 150 pages titled *The Time of the Assassins: A Story of Rimbaud* (1956) to Rimbaud, whom he saw as a patron saint.

An extraordinarily gifted young man, Rimbaud produced the main body of his poetry between the years 1870 and 1873, that is, from the ages of fifteen and a half to nineteen. Rimbaud’s adolescent revolt against bourgeois society—marked by his running away from home, taking drugs, and generally scandalizing the public—does not really distinguish him from countless young men of his time and up through the present. What does distinguish him is his poetry.

Rimbaud’s first attempts at verse were presented in traditional mold, but soon, under the influence of Verlaine, the young poet experimented with new forms. After “The Drunken Boat,” each poem seeks a form organically connected to its message. Thus, it becomes impossible to distinguish between form and content. Form, as merely decorative, poetry as convention, and consecrated cultural value are clearly despicable to Rimbaud. The prose poem, on the other hand, which Rimbaud inherited from Baudelaire and uses so successfully in *Illuminations* and *A Season in Hell*, attempts to free itself of conventional poetic trappings.

The *Illuminations* were given two subtitles, “painted plates” and “colored plates,” by Verlaine. These subtitles, insisting upon the connection between the visual and the verbal, recall Rimbaud’s efforts, in the sonnet “Vowels,” to mesh color and sound.

This volume illustrates Rimbaud’s theory of po-

etry as bedazzlement. In order for the texts to furnish a revelation in one fleeting burst of light, however, readers must accustom themselves to experiencing periods of groping in the dark. As a protest against the plodding, step-by-step logic of Western rationalism, Rimbaud favors the technique of ellipsis as revelation through juxtaposition. According to twentieth century French poet St. John Perse, Rimbaud is “the poet of ellipsis and of leaps.” Yet if breaks in logic appear between images, leaving readers to bridge them as best they can, those non sequiturs are nothing more than the equivalent of the lack of coherence in the modern world.

The famous “The Drunken Boat” was written a full year before Rimbaud had ever seen the sea. The poet’s most often quoted phrase, “Je est un autre” (“I is another person”), from the “Seer Letter,” puts into succinct form the alienation experienced by modern humankind faced with its own creative experience in a world that does not really make sense.

For I is another. If brass awakes as a bugle, it is not at all its fault. This is plain to me: I am a witness to the birth of my thought: I look at it, I listen to it: I draw a stroke of the bow: the symphony makes its stir in the depths, or comes with a leap upon the stage.

## “THE SLEEPER OF THE VALLEY”

**First published:** “Le Dormeur du val,” 1888  
(collected in *Rimbaud Complete*, 2002-2003)

**Type of work:** Poem

*In harmonious sonnet form, Rimbaud paints a tender picture of a young soldier dead in the midst of a peaceful natural setting.*

“The Sleeper of the Valley,” in manuscript form, dates from October, 1870, and therefore conjures up an image linked to the Franco-Prussian War. Research has shown that there was no fighting in the area around Charleville at the time that the sonnet was written, and it is therefore unlikely that Rimbaud, who was just sixteen at the time, saw the

scene described otherwise than in imagination.

This work is one of the best-known and most loved of Rimbaud's poems. It was not published by the poet himself but first appeared in the *Anthologie Lemerre*, a collection compiled in 1888. The form of the poem is a traditional one, "The Sleeper of the Valley" being a sonnet in four stanzas, two quatrains followed by two triads. The rhyme scheme is *abab cdcd eef ggf*. The poet also alternates masculine and feminine rhymes, consonant sounds with vowel sounds in the final syllable of each line. The form, obeying these traditional metrical rules, makes the poem look something like an exercise. The first noun appearing in the poem, *trou*, or "hole," used to describe the natural setting of the scene, comes back in the final line, where it serves as a revelation. Color images alone differentiate the green spot (*trou*) of the opening line from the two red holes in the soldier's side in the final vision. The repetition of a simple word such as this one renders the formal organization of the sonnet even tighter.

The first stanza is a description of the natural setting; no human figure is yet perceived, yet nature is personified and thus seems very much alive. Its characteristics are positive. The river "sings," wetting the grass and "silvering" it "gayly," the mountain is "proud," and the "little" valley is "quivering" with pleasure under the rays of the sun. The colors of the first stanza are green and silver, and there are numerous references to light.

The second stanza introduces the "young soldier." The physical description tends to accentuate his vulnerability: "mouth open," "head bare," "neck bathing in the fresh blue watercress." Blue is added to the "green" of his "bed," and he is "pale." The light of the first stanza is somewhat attenuated since the young soldier is seen sleeping "under a cloud" and "light rains on his green bed." The image of light raining constitutes an oxymoron, a union of opposites, and serves as a warning that all is not as idyllic as it seems.

In the third stanza, the soldier is called a child, and he is seen smiling "like a sick child would." His feet are in wild yellow irises, an image that may seem pleasant and positive, but which also suggests the flowers heaped around a funeral bier. The stanza ends with an apostrophe to Nature, who is begged to "rock the child warmly" for "he is cold."

The final stanza opens on a negation: "The per-

fumes do not make his nose tremble." The reader is told that "he is sleeping" for the third time, which may begin to make the reader suspicious. His hand is on his chest, which is "still," even as his nose was in the first line of this three-line stanza. All the movement in the poem has been attributed to nature. The final sentence of the poem, "He has two red holes in his right side," is brutal in its dry, matter-of-fact succinctness.

"The Sleeper of the Valley" is an excellent example of the poetic mastery attained by the adolescent Rimbaud. Its message, a subtle yet forceful one, can be seen as a denunciation of the society responsible for the young man's death.

### "THE DRUNKEN BOAT"

**First published:** "Le Bateau ivre," 1883  
(collected in *Rimbaud Complete*, 2002-2003)

**Type of work:** Poem

*The desire to break the bounds of ordinary life  
and to discover the unknown leads to  
disillusionment as the speaker foresees no end to  
his journey.*

"The Drunken Boat" is perhaps one of the poems that Rimbaud presented to the poet Paul Verlaine as an introduction upon arrival in Paris in 1871. There is no manuscript in the hand of the poet, but the work was no doubt written shortly before being given to Verlaine. It was first published in a journal, *Lutèce*, in 1883 and then in Verlaine's *Poètes maudits* in 1884. "The Drunken Boat" is a work upon which Rimbaud counted to make his reputation. It is mysterious and remains so even after generations of scholarly readings. Many people see it as a succession of images noted by a youngster who had been reading adventure stories such as those of Jules Verne and James Fenimore Cooper. Other readers have discovered metaphysical intentions and esoteric symbols.

Some of the obscure images in the poem become clearer if one rereads Edgar Allan Poe's *The Narrative of Arthur Gordon Pym* (1838) and "The Manuscript Found in a Bottle," as well as Jules Verne's *Vingt Mille Lieues sous les mers* (1869-1870; *Twenty Thousand Leagues Under the Sea*, 1873).

Rimbaud had not been to America, nor had he seen the ocean, when he created these images of shores haunted by Indians, of violet sunsets and

phosphorescent waves. In spite of the fact that many of the strange images in the poem are borrowed from Verne's voyage of the *Nautilus*, "The Drunken Boat" has little in common with an adventure story. It is Rimbaud's effort to render in poetic form his painful disillusionment during the winter of 1870-1871. The real literary point of departure for Rimbaud is no doubt

Baudelaire's poem "Le Voyage" ("The Trip"), which also tells of dreams of escape followed by despair.

This long poem comprises twenty-five quatrains using the *abab* rhyme scheme and the classical twelve-syllable Alexandrine line throughout. Thus, the form of the poem is extremely traditional.

"The Drunken Boat" is written in the first-person singular; the prominence of the speaker is apparent from the start and gives the poem a strong impression of being a subjective vision. The first seven stanzas of the poem celebrate the freedom of the solitary sailor in the midst of an exotic maritime world. Yet with the "I know" at the beginning of the eighth stanza, the speaker's ennui, or boredom, becomes apparent: "I saw at times what man believed he saw." The poem proceeds largely through enumeration of colorful images drawn from adventure stories, yet which seem Surrealist here, divorced as they are from any logical explanation. The speaker identifies with the drunken boat, a ship that has lost all human guidance and has become a restless "martyr":

A martyr tired of poles and zones, at moments  
the sea whose weeping fed my gentle roll  
lifted up shadow-flowers with yellow suckers  
towards where I rested like a woman kneeling.

In the twenty-first stanza, the speaker confesses, "I long for the old parapets of Europe." The exaltation of the opening stanza has given way to fatigue and disillusionment: "Yes, true, I've wept too

much." Since there is nothing left to see and nothing else for which to hope, the speaker aspires to end his purposeless voyage at the mercy of the blind waves. Perhaps the most famous line of the poem is the final verse of the twenty-third stanza, "Oh let my keel burst! Let me find the sea!" This wish is somewhat ambiguous, since the boat is already out to sea. In spite of first impressions, however, this is not an invitation to a voyage, but rather a desire to sink to the bottom of the sea, to oblivion.

There are several references to children in the poem. The twenty-fourth stanza provides one positive, but inaccessible, image. After exhausting the marvels of the whole world, the boat longs for "a cold black pool where one unhappy child/ Kneels and releases towards the balm of dusk/ A boat frail as a butterfly in May." "A Drunken Boat" chronicles the vision of a poet who dared to explore what few of his contemporaries could know and who despaired of ever recapturing the innocence of childhood.

## "DAWN"

**First published:** "Aube," 1886 (collected in *Rimbaud Complete*, 2002-2003)

**Type of work:** Poem

*Through a dream landscape, the speaker pursues and captures the goddess Dawn, before losing consciousness in her embrace.*

"Dawn," one of the prose poems included in Rimbaud's *Illuminations* (1886), is particularly representative of the concerns in most of his writing. Subjectivity, underlined by the use of a first-person speaker; erotic desire, rendered by the image of pursuit of the object; and a final depersonalization accompanied by fainting are the principal themes of the work.

The poem begins and ends with short declarative sentences, each of them forming its own paragraph or stanza. In between, the poet has arranged his dream-narrative in five brief paragraphs of approximately equal length. After the first sentence, "I embraced the summer dawn," which in fact summarizes the entire action of the poem, the story is presented chronologically. The final sentence

questions the reality of the action evoked.

Perhaps the most striking literary technique apparent in the first stanza is personification. The façade of the palaces is called a “forehead.” The water is “dead.” Shadows are “encamped,” and nature is “breathing,” while precious stones “watch” the speaker. By attributing life to the inanimate, the poet tends to make it more active than his speaker.

The next short paragraph reinforces the notion that the speaker is passive. “My first enterprise was, in the path already filled with cool pale glimmers, a flower that told me her name.” Not only is the flower personified, but the “enterprise,” a word that suggests action, is not really that of the speaker at all, for the only initiative belongs to the flower.

The fourth paragraph, or stanza, represents the center of the poem. It is a sort of climax as the speaker catches a glimpse of the “goddess.” Rimbaud uses a neologism in French, *wasserfall*, for waterfall, and the strange but comprehensible word renders the goddess exotic, yet accessible. Personification is still present, for the waterfall is “blond” and “tosses its hair.”

In the next stanza, the speaker becomes more active “lifting, one by one, her veils.” The erotic encounter is the unveiling of a mystery. The technique of personification still has an important part to play as the speaker seems to communicate with nature by waving his arms, clearly demonstrating an intimate relationship. “I betrayed her coming to the cock” attributes reactions to the cock that are not usually his. The speaker assumes considerable power, able now to “betray” the divinity. Dawn “fled,” “running like a beggar.” The goddess, hitherto evoked in terms of gold, silver, and precious stones, has suddenly lost her prestige. The speaker is now definitely active: “I pursued her.”

The physical limits of the speaker become vague; perhaps he is disembodied as he “surrounds” Dawn. Her body is felt as “immense”—but what kind of body does he have if he can “surround” her? The reversal of active/passive elements, effected through the use of personification, continues as the goddess becomes finite and even degraded while the speaker dissolves into the whole. Then, the poem makes an abrupt shift from a first-person narration, where the speaker assumes responsibility for the action, saying “I,” to a third-person narration: “Dawn and the child

plunged to the bottom of the wood.” The plunging fall suggests a loss of consciousness at the paroxysm of emotion.

If the speaker suddenly becomes a child, this transformation of the poem may be linked to the final sentence: “Upon awakening it was noon.” The English translation would read more smoothly, “When I awoke,” yet it is important to note that Rimbaud has left the final sentence without an agent. The speaker has in fact disappeared from the poem as though his only reality were a dream existence. The absence of the speaker in the final sentence, and the transformation of the “I” into a “child” in the second-to-last sentence, may seem to function as a disavowal of the erotic content of the dream-poem.

Sigmund Freud has noted that one of the functions of dreams is to allow the dreamer to continue sleeping. In this case, the final line of the poem, “Upon awakening it was noon,” presents a definite letdown. Dreaming about Dawn has occupied the entire morning; The poet seems to imply that imagination is preferable to waking reality.

## “BARBARIAN”

**First published:** “Barbare,” 1886 (collected in *Rimbaud Complete*, 2002-2003)

**Type of work:** Poem

*Evoking various sense impressions, both pleasant and horrible, the poem proceeds by enumeration and seems to convey a difficulty in renouncing hallucinatory experience.*

“Barbarian” is a free-verse poem included in the volume *Illuminations*. The structure of the poem is a loose one in which repetition seems to abolish temporal reference. The poem functions as a tension between two networks of images, one of them agreeable and feminine and characterized by softness, the other violent and threatening. The jumble of imagery has often been seen as revealing Rimbaud’s experimentation with drugs to induce vision.

In the French title, “Barbare,” with its repetition of two identical syllables, producing an echo effect, several elements of the poem are introduced. The

word “barbarian” can function either as an adjective or as a noun. The reader does not yet know who or what is qualified as barbarian. The barbarian suggests first of all that which is not civilized. A certain violence may be implied, along with the notion of otherness.

The free-verse form of the poem, consisting for the most part of noun clauses, presents a high degree of repetition, but no apparent structure. Ending as it does with the beginning of a repetition followed by three dots, the poem seems unfinished. Several temporal indications are present from the start of the poem. The first line begins “Long after,” while the third begins with “Delivered” and continues with “far from.” If verbs are present in the text, they tend to be there in participle form, that is, functioning as nouns and thereby losing their active role, as well as their temporal value. The open nasal sound is very frequent. It is found in many words but especially in the present participle ending: “*viande*” (“meat”), “*saignante*” (“bleeding”), “*fanfares*” (“fanfares”), “*encore*” (“still”), “*pleuvant*” (“raining”), “*vent*” (“wind”), “*diamants*” (“diamonds”), “*éternellement*” (“eternally”), “*entend*” (“hears”), “*virement*” (“veering”), “*flottant*” (“floating”), “*blanches*” (“white”), “*bouillantes*” (“boiling”), “*volcans*” (“volcanoes”). In addition, the poem makes great use of the other nasal vowel sounds, creating an overall impression of homogeneity of sound, which reinforces the echoing impression left by the title.

Several elements in the poem seem to refer to other pieces in the volume. If “*Matinée d’ivresse*” (“Morning of Drunkenness”) is set among the fanfares in “*Le Temps des assassins*” (“The Time of the Assassins”), “*Barbarian*” declares itself “delivered from the old fanfares” and “far from the old assassins.” Yet these distancing ideas may simply be wishful thinking. The use of present participles would tend to abolish time in favor of an eternal present. The poem admits that the fanfares “still attach our heart and our head.” The next line, beginning “far from,” ends with “that are known, that are felt.”

The abundance of oxymoron, the union of opposites, in the “Blazing coals, raining in squalls of hoarfrost,” “fires in the rain of the wind of diamonds,” “rain hurls down . . . eternally carbonized,” “Blazing coals and froths,” “collision of ice

with the stars’ white tears, boiling,” and finally “volcanoes and arctic grottoes,” suggests that the “old flames” of “*Morning of Drunkenness*” are not really “far away” at all, but very much present. The memory of these sensations provokes an exclamation: “*Douceurs*” and “*ô douceurs*” (“delights,” or “sweetness”) while music is heard, suggesting a state of euphoric ecstasy. Is it the result of drugs, or the effect of having abandoned their use?

The meaning of certain images has posed problems to many critics. “The banner of bleeding meat” against the “silk of seas and of the arctic flowers” is certainly mysterious but may simply convey the heightened sensual experience, the “reasoned deranging of all the senses,” which Rimbaud set as his goal in the “*Seer Letter*.” In the two places where the image of arctic flowers is given in the poem, it is followed by the remark, “they do not exist.” Rimbaud thus juxtaposes not only discordant images but also different orders of existence, that of vision, hallucination or dream, and that of mundane reality.

The poet has effectively covered his tracks, in this case making a definitive interpretation of the poem impossible. Questioned once as to the meaning of an image, Rimbaud is reported to have said; “I meant it literally and in every sense of the word.” The three dots of the last line of “*Barbarian*” ensure that the final impression will be one of open-endedness.

## SUMMARY

The few short years that Arthur Rimbaud devoted to poetic creation have had an overwhelming impact on modern poetry, not only in France but in other countries as well. His works prepared the way for such movements as Symbolism, Dadaism, and Surrealism. He is a continuing reference for vanguard literary thought today—Rimbaud’s poetry is not only an exercise in shocking and beautiful imagery but also a synthesis of intellectual, emotional, and sensual response purposing a tormenting exploration of the self in the modern world. In his continuing disrespect for established values and his demand for innovation, Rimbaud has had a liberating effect on poetry and on life.

Nancy Blake

## DISCUSSION TOPICS

- What influences in Arthur Rimbaud's life seem most vital in helping him to be a poet at such an early age?
- What principles of literary construction, if any, did Rimbaud's *Illuminations* exemplify?
- Rimbaud's poem "Dawn" begins conventionally: "I embraced the summer dawn." Trace the unconventional development that follows.
- Some works in Rimbaud's *Illuminations* are written in recognizable verse forms, and some are not. Does there seem to be a thematic or other recognizable difference between the works in these two forms?
- Does the later part of Rimbaud's life suggest that he had come to reject the idea that poetry should change life?

# CHRISTINA ROSSETTI

**Born:** London, England  
December 5, 1830

**Died:** London, England  
December 29, 1894

*One of the leading poets of the late Victorian era, associated with the Pre-Raphaelites, Rossetti also wrote short stories and a variety of religious prose works.*

## BIOGRAPHY

Christina Georgina Rossetti (roh-ZEHT-ee) was born in Portland Place, London, England, on December 5, 1830, the youngest of four children of Gabriele and Frances Mary Polidori Rossetti. All three of her siblings achieved some measure of fame: Maria Francesca (1827-1876) as a Dante critic, Dante Gabriel (1828-1882) as a poet and painter, and William Michael (1829-1919) as an art critic and essayist. Her father Gabriele had been a noted liberal reformer and poet in Italy who was exiled to England in 1826, the year of his marriage.

When Christina was a year old, her father was offered a professorship of Italian at King's College, London, which meant that the family's situation was much less precarious than it had been for Christina's brothers and sisters. Christina grew up surrounded by some of the finest minds of her time, and she matched her own against them at an early age. While a young girl she engaged in sonnet-writing contests with her brothers, and in 1847 her maternal grandfather published privately a collection of her early verses. By 1849, at the age of nineteen, Rossetti was publishing verse in the London *Athenaeum*, one of the leading literary journals of late Victorian England.

When her brothers and other London painters and intellectuals formed the Pre-Raphaelite Brotherhood in the fall of 1848, Christina took an important role in the group's discussions, as well as serving as a model for many of their most important paintings. She sat for the painting that launched her brother Dante Gabriel's career, *The Girlhood of Mary Virgin* (1849). At about the same time she received her first marriage proposal, from James

Collinson, a painter in the Brotherhood, which she declined for reasons of religious incompatibility. She would refuse him again in 1850, and refuse a proposal from Charles Cayley in 1866.

The first issue of the Pre-Raphaelite journal *The Germ* appeared in December of 1850, and though dominated by her brother Dante Gabriel's writings, it contained several poems by Christina. She would continue to write verse over the next decade, publishing very little. In 1851, she helped teach in her mother's day school in London (Mornington Crescent), and the following year took a position as a private tutor. In 1853, she moved with her parents to the Somersetshire village of Frome-Selwood, nearly one hundred miles southwest of London, to run a day school. A year later, however, the family returned to tend to her ailing father, who died in 1854.

In 1861, Rossetti made her first visit to the Continent with her mother and brother William, visiting Normandy and Paris. In the following year, she collected her verse from the previous decade in her first commercially published volume, *Goblin Market, and Other Poems* (1862).

As she wrote verses for her next collection, *The Prince's Progress, and Other Poems* (1866), Rossetti continued to sit for paintings and photographs. Lewis Carroll, best known as the author of *Alice's Adventures in Wonderland* (1865), photographed her in 1864. In 1865, she made her second trip to the Continent, this time visiting her ancestral Italy, which she had not seen before. Surprisingly, the Italian trip did not make itself felt in the poems of *The Prince's Progress, and Other Poems*, nor did a shorter trip in 1866 to Penkill Castle in Scotland.

Rossetti's short fiction first appeared in *Commonplace, and Other Short Stories* (1870), though the critics rightly pronounced them inferior to her poems. In 1871, she was diagnosed with Graves' disease, a thyroid condition resulting in swelling in the eyes and throat, as well as nervousness. It subsided by 1873. Her book of children's verse, *Sing-Song* (1872), became an instant classic of children's literature, still widely read. Though she continued to write poetry for the remaining two decades of her life, little of it measures up to the standards set by her first three books of verse. Her religious prose, *Annus Domini* (1874), *Seek and Find* (1879), *Called to Be Saints* (1881), *Letter and Spirit* (1882), *Time Flies* (1885), and *The Face of the Deep* (1892), was widely read but generally undistinguished. Perhaps realizing her failing poetic powers, Rossetti twice published collected editions of her earlier poems, with some additions, in *Goblin Market, The Prince's Progress, and Other Poems* (1875) and *Poems* (1882; revised edition, 1890). Devotional verse in *A Pageant, and Other Poems* (1881) and *Verses* (1893), which also collected the incidental poems from her earlier prose books, occasionally rivaled the quality of her earlier poetry. In 1892, Rossetti began to show signs of the cancer that took her life in 1894.

### ANALYSIS

Two equally strong but antithetical voices speak in Christina Rossetti's poetry: the sensuous, which is with some justice associated by critics with Pre-Raphaelitism, and the ascetic, which is not confined to her devotional verse, but speaks also in her secular poems. The critics Sandra M. Gilbert and Susan Gubar have defined the aesthetics of renunciation as the key element of all Rossetti's writing, and they suggest that her aesthetics derived less from her ascetic Christianity than from her position as a woman poet in Victorian England. The tension between the sensual and the ascetic, between revelry and renunciation, however it may be interpreted, is central to Rossetti's poetry.

One temptation is to view this tension as the meeting of two intellectual movements in Victorian England: the Pre-Raphaelite movement in art and poetry and the Oxford Movement in theology, both of which profoundly influenced Rossetti's thought and art. The Pre-Raphaelites got their name from their conviction that after the Italian painter Raphael (1483-1520), European art and

poetry took a wrong turn toward representational realism and away from symbolism and simplicity. The poetry and art of the English Pre-Raphaelites, consequently, celebrated sensuality, minute detail, formal simplicity, and a symbolic system emulating medieval iconography. It is true, as Rossetti's most recent critics have maintained, that she cannot be considered merely a passive learner of Pre-Raphaelitism—indeed, she must have influenced it as much as it influenced her. She was there at its beginning, and *Goblin Market, and Other Poems* was the first poetic voice of the movement, shining in popular and critical praise while the poetry of William Morris and Dante Gabriel Rossetti lingered unnoticed. Her connection with the movement may be overemphasized, but it cannot be ignored.

The Oxford Movement, on the other hand, influenced Rossetti in more subtle ways. To begin with, she was not directly connected with it. It began at Oxford when she was little more than two years old. A group of young Anglican clerics, led by John Keble and John Henry Newman, sought to counter a tendency toward liberalism and secularism, and away from tradition, in the English church. One result was the development of a segment of the English church, known as the high church, whose piety looked back to earlier forms of devotion. It favored the concerns of the next world over the vanities of this one. In poetic imagery this piety takes the form of the renunciation that Gilbert and Gubar speak of.

The influence of such Oxford Movement piety is typically presented as a counterpoint to the Pre-Raphaelite sensuality of Rossetti's poetry, but there is one common impulse in both movements. High-church devotion and Pre-Raphaelite aesthetics were attempts to recapture earlier traditions: the Pre-Raphaelites in art and the Oxford Movement in religion. T. S. Eliot, in his famous essay on the metaphysical poets, saw Christina Rossetti as continuing the poetic line established by the seventeenth century religious poets.

Next to the confluence of sensuality and renunciation in Rossetti's poems, the most characteristic themes concern death and thwarted love. Her poems about death are remarkable for their attempt to adopt the point of view of the dead toward the living. In such poems as "Song" (1862), "Dream Land" (1850), "After Death" (1862), and "Sleeping

at Last" (1893), the speaker of each poem is recently dead and looks back on life not with regret but relief at her escape. Her consistent image of death as sleep or rest from an ordeal may seem morbid or quietistic, but it also may be seen simply as an expression of the doctrine of soul sleep, the belief that the souls of the saved remained in a trance from the time of their deaths until Judgment Day.

The motif of love denied certainly suggests an autobiographical element: Rossetti refused three marriage proposals from two men between 1848 and 1866. A twentieth century biographer has contended that her love poems were inspired by a married man, William Bell Scott. Thwarted love can also be related to the renunciation theme in her writings. When the narrator of the brief lyric "No, Thank You, John" (1862) charmingly declines a marriage proposal, there is no sense of regret or loss, and in the poem "Amor Mundi" (1865) love is represented as a trap to be avoided. The title story of her first volume of fiction, "Commonplace" (1870), centers around a series of marriage proposals and rejections in the Charlmont family. The youngest sister, Jane, marries for money and languishes in a loveless marriage. Middle sister Lucy turns down many proposals, waiting for her ideal beau Alan Hartley, who ends up marrying another. Eldest sister Catherine remains single to devote herself to God, a choice strikingly like Rossetti's own.

Rossetti's sonnet "A Triad" (1862) is a similar analysis of three women thwarted in love, though Catherine's religious option is not presented in the poem. One woman "shamed herself in love." The second married respectably but, like Jane in "Commonplace," without real love. The third remained a spinster, but unlike Catherine died still yearning for earthly love. In the sonnet, as well as in the short story, earthly love is neither an end in itself nor a guarantee of happiness, even if it is not the danger it seems to be in "Amor Mundi." "A Triad" was first published in *Goblin Market, and Other Poems*, but reaction against the disturbing implications about love and marriage was so sharp that Rossetti deleted it from her collected volumes of 1875 and 1890. It did not appear in print again until after her death. A *Spectator* reviewer of "A Triad" called its "voluptuous passion" worthy of her brother Dante Gabriel, which was not meant as a compliment. A

century after her death, critics still consider the conflict of passion and renunciation central to her poetry.

## "GOBLIN MARKET"

**First published:** 1862 (collected in *Goblin Market, and Other Poems*, 1862)

**Type of work:** Poem

*Despite her sister Lizzie's warnings, Laura succumbs to the temptations of the magical fruits offered by goblins and must be rescued by Lizzie.*

"Goblin Market," Rossetti's most anthologized and discussed poem, is also, at 567 lines, one of her longest. A narrative poem (a rarity for Rossetti), it tells the story of two sisters, Laura and Lizzie, and their close brush with a sinister group of goblin merchants. The first of the twenty-nine irregular stanzas simply records the cries of the goblin men for someone to buy their magical fruits. Lizzie warns Laura not to succumb to their temptation, reminding her of the fate of their friend Jennie who, tasting the goblin fruit, wasted away and died. Laura ignores the warning and buys the enchanted fruit with a lock of her golden hair.

The enchantment of the fruit is one of addiction: Having tasted it, the victim desires nothing but another taste, which the goblins refuse. Like Jennie, Laura pines away for the fruit, dwindling and turning gray. This image of the dangers of temptation is typical of Rossetti's later religious poetry, though here the spiritual import is embedded in allegory. When Lizzie realizes her sister is dying, she goes to the goblins, wears them down with heroic resistance to their temptation, and returns to Laura, not having tasted the fruit, but having its juice and pulp smeared all over her face by the struggle. When Laura kisses her sister, she tastes the juice, which removes the curse of the goblin fruit and restores Laura's youth and

health. While the poem is not overtly Christian in the way that Rossetti's later devotional verse is, the Christlike nature of Lizzie's salvific sacrifice is unmistakable. The final stanza of "Goblin Market" is an epilogue in which the sisters, each having married and had children, use the story of the goblin market as a lesson to their children of the salvific virtue of sisterhood.

The theme of renunciation central to this poem seems a traditional Christian attitude of rejecting the sensual, yet many critics have noted an ambiguity in the way sensuality, represented by the goblin fruit, is depicted in the poem. Laura's devouring of the fruit, and later her sensuous sucking of the juices off her sister, is described in a lushness of physical imagery. The overt moral on the value of sisterhood, found in the final six lines of "Goblin Market," is often disparaged as an afterthought, unrelated to the rest of the poem. A close study of Lizzie's sacrifice, however, reveals that the themes of renunciation and sisterhood are related. Lizzie's resistance is merely temperance at first, but later, when it saves Laura, it takes on a sacrificial quality. Lizzie's Christlike self-giving defines sisterhood, and makes her even more Christlike as Laura's savior, resurrecting her from the death-in-life caused by the evil fruit—an obvious parallel to the story of Eden.

### "THE PRINCE'S PROGRESS"

**First published:** 1866 (collected in *The Prince's Progress, and Other Poems*, 1866)

**Type of work:** Poem

*Succumbing to a series of temptations, a prince delays going to his bride. When he finally arrives, he is too late—she is dead.*

The title poem of Rossetti's 1866 volume, "The Prince's Progress" is her only other important narrative poem besides "Goblin Market," and second only to that poem in length. Her first impulse in poetry was lyrical; she does not sustain narrative well, neither in fiction nor in verse. The poem began as a sixty-line lyric entitled "The Alchemist," composed

on October 11, 1861, and published in *Macmillan's* magazine for May, 1863. This original poem constitutes the end (lines 481-540) of "The Prince's Progress." The other 480 lines represent, according to biographer Edith Birkhead, the influence of Dante Gabriel Rossetti, who urged his sister to tell the story implicit in the song.

The poem has a similar fairy-tale quality to "Goblin Market" and a similar metrical inventiveness that echoes the folk ballad and the nursery rhyme. The narrative portion (the first 480 lines) consists of eighty six-line stanzas rhyming *aaabab*. The great number of rhymes on the same sound lends a singsong quality to the verse and taxes Rossetti's rhyming powers. There are generally four beats per line, except in the last line of each stanza, which has only three, signaling an ending.

The prince of the title is continually warned by the voices of the ladies waiting on his bride (which seem to find him magically across the miles) that she awaits his arrival, and that he must not tarry. He does, however, delayed by several temptations: A milkmaid offers him refreshment, but her fee is that the prince stay with her that day; an old alchemist offers him lodging, but his fee is that the prince work the bellows to create his "elixir of life"; the prince is rescued from drowning by lovely ladies who urge him to stay with them. Finally he heeds the voices of his bride's attendants and rushes to her, hoping that the alchemist's elixir of life will justify his delay. He is too late: He arrives to find his bride dead. The stanza form changes slightly for the last sixty lines. The last six stanzas are ten lines each, alternately long and short, and rhyming *abcbdbefbf*—only the even-numbered lines rhyme. This portion is simply a rebuke addressed to the prince for his delay.

Several of Rossetti's characteristic themes come together in this poem. The picture of thwarted love, seen throughout her early verse, is seen here in the bride pining away for her prince who will never come to her. The theme of seizing the moment, which would normally be antithetical to Rossetti's ethic of renunciation, is here appropriate, for the moment the prince must seize is sacred union with his bride. He squanders the time, and he pays for it by losing his bride.

## **“MONNA INNOMINATA: A SONNET OF SONNETS”**

**First published:** 1881 (collected in *A Pageant, and Other Poems*, 1881)

**Type of work:** Poem

*The speaker, beloved by one of the many love poets before Dante and Petrarch, expresses her frustration.*

*Monna innominata* means “unknown lady,” and indicates the situation of the speaker of the sonnets. In a brief prose introduction, Rossetti explains that the most celebrated ladies of two Italian poets—Dante’s Beatrice and Petrarch’s Laura—left behind no writing of their own to record the women’s experience of love. In Rossetti’s own century, Elizabeth Barrett Browning did leave such a sonnet record, but her experience, Rossetti says, was happy, and therefore did not match the emotional tensions of Dante or Petrarch’s sonnets. It appears that “Monna Innominata: A Sonnet of Sonnets” is intended to fill that gap.

The fourteen poems of “Monna Innominata: A Sonnet of Sonnets” are truly a sequence: Though each is an artistic whole, there is a progression from one to the other that links them. Rossetti clearly considered them inextricably connected: In an 1883 letter responding to a request to anthologize some of her poems she insisted that none of the individual poems of “Monna Innominata: A Sonnet of Sonnets” be published separately. They are intended to be read as a single work. The subtitle, “A Sonnet of Sonnets,” refers to more than the fact that a sonnet is a fourteen-line form, and the sequence has fourteen sonnets. The development of the whole group matches the form of the Italian sonnet.

The Italian or Petrarchan sonnet is twofold in structure, with an eight-line first part, called the octave, rhyming *abbaabba*, and a six-line conclusion, called the sestet, with various rhyme patterns, but

never more than three rhymes. Thus, there is usually a turning point, which the Italian sonneteers called a *volta* in the ninth line, signaling the change from the octave to the sestet, matched by a similar change in thought. “Monna Innominata: A Sonnet of Sonnets” mirrors this pattern in the overall structure of the sequence, its first eight sonnets depicting a tension between divine and earthly love in the speaker’s relationship with her lover, and the ninth suddenly announcing that the love she hoped for cannot be.

“Monna Innominata: A Sonnet of Sonnets” explores the familiar Rossetti theme of the conflict between romantic love and the love of God. The first four sonnets do not mention God’s love at all, establishing the situation of the earthly lovers: the pain at separation (sonnet 1), the attempt to recall their first meeting (sonnet 2), the preference of dream love over reality (sonnet 3), and the immeasurability of love (sonnet 4). The next four sonnets introduce the preeminence of God’s love, ending with a comparison to the Biblical lover Esther (sonnet 8). Sonnets 9 through 12 move toward a reconciliation that is completed in sonnet 13, with the speaker renouncing her claim to her lover. The last sonnet reveals that the pangs of earthly love remain, despite the idealized sentiments of resignation.

### **SUMMARY**

The twin strains of emotion in Christina Rossetti’s poetry—a yearning for God and a yearning for human love—sometimes seem so different to critics that they speak of two Christina Rossettis, the saint and the romantic. Comparison of Rossetti with other English religious poets, such as the Metaphysicals, suggests that such tension of divine and human is natural in devotional poetry. Rossetti’s early mastery of metrical forms gave her a playful yet disciplined ear for the music of poetry. Perhaps it is this quality that has made her children’s poetry particularly successful.

*John R. Holmes*

## DISCUSSION TOPICS

- What was the impulse that began the Pre-Raphaelite movement to which Christina Rossetti contributed?
- "Goblin Market" was once considered primarily as one of Rossetti's children's poems. What features of the poem suggest that she did not intend it particularly for children?
- Examine the theme of sisterhood in "Goblin Market."
- Many sonnet sequences are not as well connected as Rossetti's. Comment on the structure of "Monna Innominata: A Sonnet of Sonnets."
- Examine and characterize the tone of Rossetti's death poems.
- Rossetti and Emily Dickinson were both born in 1830, and both succeeded as lyric poets. Their poems differ in many ways; in what ways are they similar?

## JEAN-JACQUES ROUSSEAU

**Born:** Geneva (now in Switzerland)

June 28, 1712

**Died:** Ermenonville, France

July 2, 1778

*Influential in many fields from education to political science, Rousseau made autobiography an important literary genre while paving the way for the Romantic movement.*

### BIOGRAPHY

Jean-Jacques Rousseau (roo-SOH), the man whom Immanuel Kant called “the Newton of morality,” was born in Geneva (now in Switzerland) on June 28, 1712, and, as he notes in *Les Confessions de J.-J. Rousseau* (1782, 1789; *The Confessions of J.-J. Rousseau*, 1783-1790; commonly known as *The Confessions*), his life was marked from the beginning by misfortune. Rousseau’s birth cost the life of his mother; Suzanne Bernard, and his father, Isaac Rousseau, was never able to embrace his son without shedding tears. The infant’s health was poor, and indeed Jean-Jacques spent so much of his life experiencing such illness that he often expected an imminent death.

Rousseau’s early life was unsettled. He was reared by a pastor and his sister in the country and was later apprenticed to an engraver who mistreated him. Rousseau’s first period of exile from his homeland was motivated by an apparently trivial incident. After a Sunday walk in the country, he returned too late to reenter the city before the gates were closed. Rather than face the master’s anger, the youngster ran away and began the life of wandering that was to be his lot.

*The Confessions* insist upon the accidental meetings that continually changed the course of the writer’s life. Penniless and without a destination,

the young Rousseau was directed to a lady, Mme de Warens, who had been converted to the Catholic religion; as her beauty and kindness impressed him, he soon left for Turin, Italy, to be catechized and become a Catholic. The trip enabled him to learn Italian and see a bit of the world, but he was still unable to earn a living and so returned to Mme de Warens, whom he was soon addressing as “Mamma.”

Rousseau discovered a taste for music and attempted to learn enough about the art to make a profession of it. The young man’s health was always so poor that he could not make much progress with his studies. After a short, idyllic country life under the protection of Mamma, he undertook an unsuccessful trip to the medical center of Montpellier, where he hoped to be cured, but returned to Switzerland only to find his place with Mme de Warens occupied by another young man. Thus, Rousseau went to Paris to make his fortune. Before beginning the literary career that he considered a means of reforming society, Rousseau had intended to make his living as a musician. At the age of thirty, he had invented a new system of writing music, which he presented to the Academy of Science in Paris and then published. He composed an opera, *Les Muses galantes* (pr. 1745; the gallant muses), which was presented, but with less success than the composer had hoped.

In Paris, Rousseau joined the advanced intellectual circles as a self-taught man. One day in October, 1749, he was on his way to Vincennes to visit the French philosopher Denis Diderot, incarcerated there for his *Lettre sur les aveugles* (1749; *An Essay on*

*Blindness*, 1750; also as *Letter on the Blind*, 1916). As he walked, Rousseau was looking through a newspaper when he noticed a question proposed for an essay contest: "Has the progress of the arts and sciences contributed more to the corruption or purification of morals?" In *The Confessions* years later, Rousseau says that, at that moment, his mind was flooded with ideas. He was inspired to show the contradictions that he saw in all social and political institutions. In particular, he believed that humanity is naturally good and that it is only as a result of the influence of social systems that it becomes evil. For Rousseau, this moment was a metaphysical crisis: He saw that he had a mission to fulfill.

Back in Paris, Rousseau wrote the first of his discourses, *Discours sur les sciences et les arts* (1750; *The Discourse Which Carried the Praemium at the Academy of Dijon*, 1751; better known as *A Discourse on the Arts and Sciences*, 1913), which Diderot corrected and sent to the Academy of Dijon. One year later, Rousseau learned that he had won the prize. His ideas were so original, so contrary to accepted opinion that the essay provoked numerous, contradictory responses. During the Enlightenment, the notion of human progress was generally assumed to be self-evident, yet Rousseau showed that society was progressively denaturing humankind. Rousseau felt obliged to answer the objections to his essay, and as he did so his thoughts became progressively clearer.

In six months' time, Rousseau had become a celebrity. At the age of forty, after attempting for the past twenty years to establish a reputation as a musician, he was a literary figure. His career would be a relatively short one, for with the exception of his autobiographical works, *The Confessions*, *Les Dialogues: Ou, Rousseau juge de Jean-Jacques* (1780, 1782), and *Les Rêveries du promeneur solitaire* (1782; *The Reveries of the Solitary Walker*, 1783), which are posthumous, all of his great works appeared in the next sixteen years.

Though he gained fame in Paris, Rousseau was incapable of becoming a Parisian. The more he experienced the mannered formalities of the Parisian salon, the more he idealized the simple manners of Geneva. Rousseau believed himself incapable of elegant conversation, and he considered Parisians cold and hypocritical. The supposed freedom of the metropolis seemed licentious to Rousseau, a native of Calvinist Switzerland.

Rousseau's relations with women were always troublesome. Once, in Italy, he had allowed himself to be introduced to a prostitute simply because he was ashamed to refuse. Immediately afterward, Rousseau summoned a physician, for he was certain that he had caught a disease, and for three weeks he remained severely depressed while his doctor had great difficulty convincing him that he was in perfect health.

The author's hypochondria is one of the salient features of *The Confessions*. He desperately needed a woman to care for him. Always in great financial difficulties, the writer frequented shabby boardinghouses, in one of which he met a servant, Thérèse Le Vasseur, who was to become his companion. Rousseau presents her as a woman of limited intelligence and no education but with a great capacity for devotion. As he had called Mme de Warens "Mamma," he called Thérèse "Aunt." Rousseau makes a point of insisting that he had never promised marriage to Thérèse. In all, five children were born to the couple, all of whom were abandoned to a foundling's hospital at birth. Rousseau, who would later become famous for his theories on the education of the young, was to suffer much from the use that his enemies made of the knowledge that he had refused to rear his own children.

As Rousseau became a well-known author, he was offered the protection of several influential people. One of the most important of these was Mme d'Épinay, who provided him with a country retreat, the Hermitage, where he was able to live in peace with Thérèse and devote himself to his writing. Between 1756 and 1758, Rousseau produced an imaginary correspondence between lovers, published as *Julie: Ou, La Nouvelle Héloïse* (1761; *Eloise: Or, A Series of Original Letters*, 1761; better known as *The New Héloïse*), which was to obtain a success as immediate as it was overwhelming. The publication of *Du contrat social: Ou, Principes du droit politique* (1762; *A Treatise on the Social Contract: Or, The Principles of Politic Law*, 1764, commonly known as *The Social Contract*) and *Émile: Ou, De l'éducation* (1762; *Emilius and Sophia: Or, A New System of Education*, 1762-1763; commonly known as *Émile*) upset all Rousseau's plans for a quiet life. Within a month, *Émile* was condemned in Paris, and the man who had once claimed to be the only man in France who believed in God was forced to flee the defenders of the faith. He took refuge in Switzer-

land, but even this sanctuary was only temporary. Geneva condemned not only *Émile* but also *The Social Contract* and issued a warrant for Rousseau's arrest if he entered the territory of the city-state. Other cities followed Geneva's example, and Rousseau was forced to spend the next four years as a refugee moving from place to place. Thus began the effort to defend himself against all attacks that was to become *The Confessions*. More and more, Rousseau became convinced that the pretended friends of liberty, led by Voltaire, were plotting against him.

In 1766, Rousseau was offered refuge in England by the Scottish philosopher David Hume. At first, the writer was acclaimed by the British, but it was only a few months before Rousseau and Hume had a falling out. In 1767, the wanderer left England and in 1770 finally returned to Paris, where he lived until his death on July 2, 1778, in Ermenonville, France. In 1794, the new French Republic honored him as a national hero and removed his body to the Pantheon.

#### ANALYSIS

Rousseau is one of the thinkers whose moral position prepared the way for the French Revolution. He proposed reforms in education, morals, politics, law, and even in religion. He consistently refused to accept the official responsibilities that were offered to him through the influence of highly placed admirers, many of whom were great ladies. Although his financial situation was increasingly precarious, he said he preferred to earn his living as a humble music copyist, even while his health was giving out, rather than lose his independence. One of his great moral principles was never to accept a legacy so as not to profit by the death of anyone who loved him. Rousseau's contemporary Thomas Jefferson would have liked to see the American republic abolish all inheritance in order to avoid the inequality of citizens based upon accidents of birth. Rousseau's principles were rightly considered by many to form a condemnation of the social fabric of Europe where authority could

be exercised without competence and where self-interest outweighed all other motivations.

The importance of the intellectual, scientific, and social innovations of eighteenth century France sometimes obscures another development of the age: the rise of the novel. The significance and popularity of the genre was given impetus by the only extended work of fiction written by one of the most famous men of the century, Rousseau. *The New Héloïse* reached an enormous reading public, not only in France; almost immediately translated, it swept England and America, too. The epistolary novel greatly changed the way that people saw love and nature and prepared the way for innumerable Romantic novels.

Strict as he often appears, Rousseau also presents a paradoxical position on many questions. He was a man of letters who despised and criticized the knowledge that can be obtained from books. The beginning of the love affair between Saint-Preux and Julie in *The New Héloïse* is punctuated by quotes from love poetry. As the young lovers are educated by misfortune, however, they abandon such artifices and consult only their feelings. Toward the end of the story, one character questions the value of books, for "you need only to learn to read the book of nature in order to be the wisest of mortals." In another genre, Rousseau's very influential treatise on education, *Émile*, develops this preference for nature over civilization, while *The Social Contract* examined an ideal for human society based upon the principles of nature.

For posterity however, Rousseau is usually most closely connected not to the works that he published while alive but to his posthumous *The Confessions*, *Les Dialogues*, and *The Reveries of the Solitary Walker*, which form one of the main references for the nineteenth century vision of the solitary artist and provided one model for the sensitive Romantic hero. While the eighteenth century prized good form, Rousseau, the self-taught upstart, introduced the directionless, disordered, passionate eloquence of emotion. Style henceforth would be subservient to sincerity.

## THE NEW HÉLOÏSE

**First published:** *Julie: Ou, La Nouvelle Héloïse*, 1761 (English translation, 1761)

**Type of work:** Novel

*In their letters, Saint-Preux and Julie celebrate a passionate love leading to a return to virtue.*

*The New Héloïse* is Rousseau's release from a life of frustration as a lover. That the book was successful proves that the eighteenth century was ready to identify with Rousseau's ideals. The setting is the country of the author's youth, along the shores of Lake Geneva, where he lived out his idyll with Mme de Warens. By eighteenth century standards, the plot of this epistolary novel is a simple one. The first three parts of the novel exalt the mutual passion of Saint-Preux, Rousseau's projection of himself, and his ideal woman, Julie. The last three praise Julie's return to her duties as daughter, wife, and mother. Saint-Preux thus learns the value of renunciation.

While living at the Hermitage, a country home provided for Rousseau by one of his admirers, Mme d'Épinay, Rousseau composed the book that was to make him famous. He had been accompanied in his retreat from Paris by Thérèse Le Vasseur, a woman who was obviously devoted to him but with whom he found no outlet for his sensibility. Suffering from a sense of almost unbearable solitude, he took refuge in his imagination. In *The Confessions*, he reveals that he imagined not one but two complementary heroines, Julie and her cousin, Claire, "but I admitted no rivalry, no quarrelling, no jealousy, because it is difficult for me to imagine painful feelings, and I did not wish to mar this charming picture by anything which degraded Nature."

The reading public immediately thrilled to Rousseau's forceful portrayal of passion. Some of Saint-Preux's phrases have become passwords for French lovers. Of Julie's home, the hero says: "That

place alone is inhabited; all the rest of the universe is empty." When Saint-Preux succeeds in learning from his beloved the value of sacrifice, he is able to admire her husband, Wolmar, and live in relative tranquillity with the family. While the beauty of nature had already served as a metaphor for the lovers' passions in the first part of the novel, it becomes the image of virtue in the second. Julie has a secret garden, Elysium, which looks uncultivated and wild. The heroine becomes Rousseau's mouthpiece for reflections on art and nature: "It is true . . . that nature has done everything, but under my direction, and there is nothing here which I have not ordered." The garden is a symbol of the harmony of nature, which is no longer chaos but has become spiritualized, just as in Julie herself passion and emotion have been purified.

The novel's references to nature permit Rousseau to expound his theories of economy, domestic happiness, and especially the education of children. Julie and Wolmar's country home is a model for a new sort of aesthetic: The billiard room has been replaced by a wine press, the peacock shed had been replaced by a dairy, flower beds have gone to make way for a kitchen garden, and the lindens bordering the avenue have been replaced by walnut trees. Everywhere, Rousseau sees the "gloomy dignity" of eighteenth century taste giving way to the idealized rustic look of the prerevolutionary period.

The sentimentalism of the novel owes much to the Anglomania that had begun to undermine neoclassical French literature in Rousseau's day. *The New Héloïse* is a cousin of Samuel Richardson's *Clarissa: Or, The History of a Young Lady*, (1747-1748), not only in the epistolary form but also in the praise of simplicity and virtue. Even though Voltaire called the success of the novel one of the infamies of the century, *The New Héloïse* became one of the precursors of the Romantic period and certainly earned for Rousseau a place next to Voltaire as one of the major influences on European thought.

## ÉMILE

**First published:** *Émile: Ou, De l'éducation*, 1762 (English translation, 1762-1763)

**Type of work:** Essay

*A rich, noble orphan is reared in the country by a devoted tutor according to Rousseau's theories of a natural education.*

Rousseau opens his treatise on education, *Émile*, with a phrase that could summarize his entire philosophy: "Everything is good when it comes out of the hands of the Author of creation, everything degenerates in the hands of man." Through the death of his mother and the carelessness of his father, Rousseau's own education had been left to chance. As a tutor, he was singularly unsuccessful and preferred to abandon that career even if it meant great material difficulty. His own five children were abandoned to the foundling hospital in Paris at birth. Given all this, it seems strange that he should presume to write on education.

In fact, however, the upbringing of children was one of Rousseau's earliest concerns. He is addressing an age when parents lived quite separately from their children, who were first sent to nurses in the country and only brought home to be confided to the mercenary care of tutors and governesses before being sent out again, the boys to schools and the girls to convents. Moreover, education seems to be intended to make children into miniature adults. This goal is strikingly illustrated in the manner in which children are represented in eighteenth century painting. Rousseau argues that children should be as children, that understanding and love are more important to them than books.

The nature of humanity is to be free, and the first principle of Rousseau's plan of education is to respect the liberty of the child. The master should intervene as little as possible. Since religion is incomprehensible before the age of sixteen, a natural education is a negative one. The second principle is to treat the child as a child and not an adult. An attractive and progressive system of education will never demand of the child an effort beyond the capacities of his or her age. The third rule is to form the heart before worrying about the mind.

Humankind is naturally good, not naturally knowledgeable. Then, after giving much consideration to the heart, Rousseau prefers educating judgment rather than imparting information. The head should be accustomed to functioning, not simply filled with knowledge. Some knowledge is of course necessary, but if *Émile* has not learned everything, it will be easy for him to do so when he wants because he has learned to learn. A person's only true profession is to be an eternal apprentice. *Émile*'s education lasts for twenty years. Like most authors of his time, Rousseau neglects the organization of his work. Digressions abound. The essay follows a chronological order and is divided into five sections of unequal length.

Some of Rousseau's ideas seemed scandalous at the time. He thought women should nurse their own children, but husbands like M. d'Épinay found the idea perfectly shocking and ridiculous. Public education would be too ideologically biased, according to Rousseau, who preferred to have children educated in the home. Most books are banished from *Émile*'s library, with a notable exception, Daniel Defoe's *The Life and Strange Surprising Adventures of Robinson Crusoe, of York, Mariner, Written by Himself* (1719; commonly known as *Robinson Crusoe*), the story of humankind in nature. *Émile* learns from personal experience more than from the experiences of others. It is only at the age of eighteen that he is ready to discover God. This section of the book is the famous "Profession of Faith by the, Savoyard Vicar." Rousseau presents a natural religion, a theism that he considers preferable to all established cults.

The fifth book of *Émile* is consecrated to woman, studied in herself and in relation to man. The two sexes will not receive the same education. While the male is reared in nature, the female will learn the arts of society, music, dance, lace making, and especially coquetry. Sophie is the companion whom Rousseau imagined for *Émile*, but Rousseau was much less daring in inventing an educational scheme for her.

Although Rousseau's work was condemned by the state, its influence was enormous, especially with women. Under the revolution, his educational theories were proclaimed ideal. By the beginning of the Romantic period, *Émile* was acclaimed in every layer of society.

## THE SOCIAL CONTRACT

**First published:** *Du contrat social: Ou, Principes du droit politique*, 1762 (English translation, 1764)

**Type of work:** Essay

*Examining the models for democracy, Rousseau specifies the conditions necessary to a society.*

*A Treatise on the Social Contract: Or, The Principles of Politic Law*, commonly known as *The Social Contract*, is a product of Rousseau's retreat from Paris. This examination of government appeared in 1762, the same year as *Émile*, his treatise on education. In *The Confessions*, Rousseau emphasizes the awkwardness that he felt in society. He was a deeply solitary man who found social life distracting and distasteful. Yet when he reflected on society, Rousseau created a work that provided posterity with the vocabulary, with the terms and assumptions that would be employed, consciously or unconsciously, to address social issues for the next two centuries and beyond.

"Man is born free, and yet we see him everywhere in chains." Thus Rousseau opens his treatise on human government, establishing his unique point of view. He continues: "Those who believe themselves the masters of others cease not to be even greater slaves than the people they govern." Rousseau is himself a master at noting the contradictions underlying all generally accepted values. Perhaps that is one explanation for the enormous influence of the work.

*The Social Contract* is a major source, for example, of the doctrine of popular sovereignty. Almost all modern states claim to be "people's states." Public deliberation, mass demonstrations, voting, plebiscites, all rituals for arousing a popular will are as necessary to authoritarian states as to liberal ones. It is generally accepted that *The Social Contract* exposes a doctrine that is valid. The only argument concerns its interpretation.

Rousseau, whose master in political philosophy was Plato, knew that the problems of contemporary democracy arise from the fact that the ideals of that form of government were developed in the intimate community of the Greek city-state and are inapplicable to the needs of the centralized and technological nation-state. Yet, as a moralist, Rous-

seau is mainly concerned with the principles of political rightness. His analysis was complicated by a nostalgic idealization of ancient city-states and his own native city of Geneva. Rousseau's ambition in *The Social Contract* is to establish a political jurisdiction. He does not intend to describe law as it is but rather as it should be. In other words, his concern is to specify the conditions for a just society. Might does not make right, nor does the fact that a system exists mean that it exists for good. Rousseau speaks as a philosopher rather than a historian.

The central problem of the social contract is to determine the type of social organization that will ensure security to each individual. Security is, in fact, the necessary condition for happiness in society. The desire for security is the motive for the evolution from the state of nature to civilization. Yet security must be made compatible with freedom, for the sacrifice of freedom is the sacrifice of the essence of humanity. In Rousseau's theory, the recurring problems of the philosophy of Thomas Hobbes and of John Locke are reconsidered. Security and liberty are the two criteria according to which the State is organized.

Rousseau rejects any authority based on natural advantages or the rights of force. The only legitimate basis for authority is a contract or covenant between the parties concerned. Under that authority, the people must be allowed to exercise their rights. The sovereignty of the people is "inalienable" and "indivisible." In a social system, each individual has a pact with himself or herself. "Obedience to a law that one has given oneself, is freedom." To the question as to how a person may be free while subject to law, Rousseau answers with the often misunderstood notion of the "general will."

This principle is for Rousseau the cornerstone of any democracy. It is reflected in his famous dictum that people may be forced to be free: Even convicts are free in the sense that they are imprisoned by their own general wills, which require that people who follow their private wills in the way that they

have shall be punished. The individual who differs from the community is private, wrong, and enslaved; the individual whose will is unified with that of the community is general, right, and free.

Those who were tired of apologies for the ancien régime found in the general will an instrument for reducing public affairs to simpler terms. The middle class, increasingly insulted by the distinction that separated them from the nobility, found in the general will a version of its own dignity and political intelligence. In particular, Rousseau's inference that government is simply the servant of the people inspired those who were opposed to the existing regime, while, to its defenders, seemingly undermining the very basis of social order. *The Social Contract* insisted so much on the obligations of government to the people that, to those in power, it seemed to be an open invitation to permanent revolution. The censorship by Rousseau's native Geneva consecrated the revolutionary force of his tract.

## THE CONFESSIONS

**First published:** *Les Confessions de J.-J. Rousseau*, part 1, 1782; part 2, 1789  
(English translation, 1783-1790)

**Type of work:** Autobiography

*Convinced that the persecution that he has experienced is the result of the absolute originality of his thinking, Rousseau presents the story of his life.*

*The Confessions of J.-J. Rousseau*, commonly known as *The Confessions*, opens with a proclamation of originality: "I am commencing an undertaking, hitherto without precedent, and which will never find an imitator." The reasons for the singularity of this undertaking are twofold. First, Rousseau claims to be absolutely honest, to hold back nothing of the "truth of nature." Second, he feels he is different from all other people, and it is the value of this difference that he desires his reader to judge.

*The Confessions* were written between 1765 and 1769 in an effort to react to the persecutions that Rousseau suffered even at the hands of former

friends. They are divided chronologically into two parts. The first, which follows the formative years of the philosopher, is the most accessible and most often studied. Although much of what he has to tell is embarrassing, Rousseau seems to delight in dwelling on the pleasure that he felt in being spanked by the Mlle Lambercier, the sister of the pastor to whom his early education had been confided. He is willing to indulge his reader in scenes of food stealing while he is serving his apprenticeship and to reveal the humiliation of being replaced by another young man in the affections of Mme de Warens.

There is, in fact, a great difference between the two books, and Rousseau was well aware of this difference. While the first book reveals his confidence in recounting the details of his early life, the second book is full of hesitation. The closer Rousseau gets to the time of the writing, the more he claims to be uncertain about chronology. The emotional impact of the persecutions endured in the recent past seems to have upset him, to the point where he is unable to recall exactly what happened. While the first book may seem exhibitionist, the second becomes more and more paranoid. Thus, he explains the unsatisfactory account given of some incidents: "I am surrounded by spies, and I am obliged to accomplish, inefficiently and in haste, a task which would require peace of mind and leisure which I do not enjoy." Yet the way that the author seems to savor the incidents of his early life gives no impression that he lacks time to tell them.

One interesting element in *The Confessions* is the way in which Rousseau gives his reader the means of understanding his character without seeming to comprehend what he himself is saying. He does not omit the mention of incidents that explain the part that he played in his own persecutions. The concluding sections of *The Confessions* relate how Rousseau was hounded for irreligion while under the protection of Frederick the Great, king of Prussia, protector of Voltaire and well-known freethinker.

Rousseau had chosen to live in the territory of Neuchâtel but never seems to have reflected that the Armenian costume that he had adopted seemed to advertise a connection with the religion of Islam. As he walks about the Swiss countryside dressed in a caftan and fur cap, he is an easy prey for the rabble who have been aroused against him by the clergy. Although he says he was the victim of stoning, he never seems to have attempted to make himself less conspicuous.

Students of psychology can read *The Confessions* as a case study, all the more revealing for the fact that the speaker does not realize the full impact of his statements. Near the end of his story, Rousseau is a refugee living on a small island and tormented by the idea that he may someday have to leave it. He dreams of being imprisoned there. The desire that had already expressed itself in the pleasure in punishment during early childhood is here clearly apparent: "It is little enough that I am permitted to live here; I could wish to be condemned, to be forced to remain in this island."

While this work was influential for many aspects

of nineteenth and twentieth century thought, it is the one that has most inspired Rousseau's followers. Memoirs, journals, and autobiographical novels flourished in succeeding generations with *The Confessions* for a model.

## SUMMARY

As the internal contradictions of the ancien régime prepared the way for the revolutions that marked the end of the eighteenth century and established an intellectual basis for the modern era, the solitary figure of the self-taught rebel Jean-Jacques Rousseau came to symbolize the new individual. Though he or she may well be a victim of the prejudices of society, the artist may find consolation by expressing his or her passions. The proper method of expressing sensibility is as disordered, lawless, and excessive as the feelings to be expressed. Whether it be in the form of the philosophical essay, the novel, or autobiography, Rousseau's work took his century by storm and laid the groundwork for Romanticism.

Nancy Blake

## DISCUSSION TOPICS

- In *Émile*, Jean-Jacques Rousseau writes that in school “the master should intervene as little as possible.” Is this principle commonly observed in elementary education today? Should it be observed more or less than it is now?
- *The Social Contract* begins with an assertion much like that at the beginning of *Émile*. Humanity, Rousseau says, is in chains. Is Rousseau antiauthoritarian, or can authority and liberty proceed together?
- What is the basis of law as Rousseau sees it in *The Social Contract*?
- Rousseau maintains that *The Confessions* was unprecedented and inimitable. What seem to be earlier works that might be called models for *The Confessions*?
- How well does *The Confessions* exemplify Rousseau’s principle that autobiography should not hesitate to portray a person’s vices?
- Of all the advice that Rousseau gives, which seems most impractical?
- Rousseau tended to distrust books as sources, but he wrote a great deal. Would a modern Rousseau have found a nonliterary way of expressing his thoughts?

## J. K. ROWLING

**Born:** Chipping Sodbury, Gloucestershire, England  
July 31, 1965

*The unprecedented commercial success of Rowling's Harry Potter series changed the nature of children's fiction, generating a massive wave of investment by demonstrating that children's books could make enormous amounts of money and setting new benchmarks for what writers for children could do in terms of textual length and the treatment meted out to characters.*

### BIOGRAPHY

Joanne Kathleen Rowling (ROHL-ihng) was born in Chipping Sodbury, a small town in Gloucestershire, England, the daughter of an engineer working for Rolls-Royce. When she was nine the family moved to the small village of Tuthill, near the Welsh border in the Forest of Dean; she was educated thereafter at Wydean Comprehensive and went on to study French and classics at Exeter University. She then went to Moray House Teacher Training College in Manchester but did not immediately seek work as a teacher; instead, she went to London to work as a secretary and as a research assistant for Amnesty International. It was while traveling between Manchester and London by train in 1990 that she was first struck by the idea of writing the Harry Potter series.

In 1991, Rowling went to Portugal in order to teach English as a foreign language in Oporto. Because she worked in the afternoons and evenings she was able to spend her mornings writing, but her progress was slow and her produce mostly consisted of voluminous notes and disconnected chapters. She married a television journalist named Jorge Arantes in 1992, but the marriage soon failed; following her divorce in 1993, Rowling returned to Great Britain with her infant daughter, Jessica, and took up residence in Edinburgh, Scot-

land, with her younger sister Dianne, who had formerly worked as a nurse but was now studying law.

The cost of child care made it uneconomical for Rowling to work, but she also found it difficult to continue writing while suffering from the emotional fallout of her failed marriage. She formed the habit of taking long walks, which put her daughter to sleep, and then working on the first volume of the projected series, *Harry Potter and the Philosopher's Stone* (1997; published in the United States as *Harry Potter and the Sorcerer's Stone*, 1998), in coffee shops. It took her until 1995 to finish the book, and it was not accepted for publication until 1997. The initial advance was only £2,500, but she was able to obtain a grant from the Scottish Arts Council in order to buy a computer on which to write the second volume in the series, *Harry Potter and the Chamber of Secrets* (1998).

*Harry Potter and the Philosopher's Stone* was carefully marketed by its initial publisher, Bloomsbury, which gave away most of the first edition to schools, hoping to obtain word-of-mouth publicity for the subsequent paperback. The ploy worked and ensured that most of the hardcover copies sustained sufficient wear and tear to make the remainder fabulously valuable. The novel won the Smarties Book Prize Gold Medal and was short-listed for the Guardian Fiction Award and the Carnegie Medal. The American rights were sold at auction in September, 1997, for a then record sum of \$105,000. The United States edition was retitled (inaccurately) *Harry Potter and the Sorcerer's Stone* on the assumption that American children were more likely

to be sympathetic to the idea of sorcery than to the concept of philosophy.

Warner Bros. bought the film rights to the series in 1999, the year in which the third novel, *Harry Potter and the Prisoner of Azkaban*, was published. It was then that the magnitude of the burgeoning phenomenon was fully revealed, as the three novels shot to the top of the American best-seller lists. Rowling rapidly became the highest-earning woman in Britain, and the second wealthiest, after the queen. In 2001, she bought Kilchassie House, a nineteenth century mansion in Perthshire, to serve as a home for the new family created by her second marriage to physician Neil Murray. In 2001, she also produced two brief spinoff volumes from the Harry Potter series for the benefit of the charity Comic Relief: *Fantastic Beasts and Where to Find Them*, written under the pen name of Newt Scamander, and *Quidditch Through the Ages*, under the pseudonym Kennilworthy Whisp.

Bloomsbury made the launch of the fourth volume in the series, *Harry Potter and the Goblet of Fire* (2000), into a large-scale public event, which was so successful that the publisher had to narrow the focus of subsequent events of the same sort, doing everything possible to control not merely the day of release but the moment; the remaining books were all released on the stroke of midnight, with potential purchasers often lining up for hours or days beforehand. *Harry Potter and the Order of the Phoenix* (2003) set a new world record for the rapidity of sales of a book, which was then broken by *Harry Potter and the Half-Blood Prince* (2005).

Although the bans on premature release proved unenforceable, this public relations strategy succeeded in maintaining a high level of anticipatory excitement, especially regarding the seventh and final volume, in which it was widely rumored beforehand that the hero might die; this was a possibility that would have previously been unthinkable in a children's book but seemed not unlikely in the new context of expectation that Rowling had created. Although *The New York Times* broke ranks by publishing a review of *Harry Potter and the Deathly Hallows* (2007) on the day before publication, the reviewer was careful not to reveal the ending.

*Harry Potter and the Deathly Hallows* sold 2.7 million copies in its first twenty-four hours of publication on July 21, 2007, beating its predecessor's record comfortably. By that time, the first six volumes

had sold 325,000,000 copies worldwide, and it seemed inevitable that the series total would eventually exceed four hundred million. Rowling's net worth was then in the tens of millions; her agent, Christopher Little, who had put the book into the reject pile unread when it was submitted to him because he thought that children's books never made any money, also became a multimillionaire, thanks to the office assistant who took the typescript out of the pile to read because it had an attractive binding.

Rowling's career provides a sharp illustration of the haphazard way in which the publishing industry operates. The major publishing conglomerates all rejected *Harry Potter and the Philosopher's Stone* before Bloomsbury, then a small independent company whose economic situation was rather precarious, took it on. Although it is unclear whether any of the editors who rejected it actually bothered to read it, the fact starkly emphasizes the lottery element in literary submission. Rowling might easily have remained an impoverished French teacher for the duration of her adult life.

## ANALYSIS

It is always difficult to explain why particular books sometimes break out of their own restricted market to become cultural phenomena of a different order, but certain aspects of the Harry Potter series did lend themselves very readily to that process. Most books that become such near-universal subjects of conversation, which even people who never read books feel compelled to read, are individual volumes, whose internal stories are complete before their external stories begin, such as Dan Brown's best-selling novel *The Da Vinci Code* (2003). Sequels and segmental series very often follow, but they can rarely be anything more than hollow imitations and formulaic recyclings. Rowling's series, by contrast, was always planned as a seven-volume set that would evolve toward a single ultimate climax. It was, therefore, able to build on its medium-term success far more spectacularly than any previous breakthrough enterprise. In order to do so, though, it had to break the existing mold of children's publication in more than one way.

Children's publishing is usually organized according to the age ranges of its readers, so that a series of books marketed for nine- to twelve-year-olds

will stay within that range. If the series has an eleven-year-old central character, that character will usually remain eleven throughout the series (even if, as in the case of Richmal Crompton's William, the series extends over decades of background history). Rowling always intended to track her hero from the aftermath of his eleventh birthday to the aftermath of his seventeenth, marching across the marketing categories from the nine-to-twelve range to the summit of the "young adult" slot. Initially, the plan was for the target audience to grow older at the same rate, but Rowling was unable to deliver a book every year, so contemporary eleven-year-old readers of *Harry Potter and the Sorcerer's Stone* were twenty-one by the time that *Harry Potter and the Deathly Hallows* appeared. This proved no inhibition to readers eager to follow the series to its conclusion.

Because the Harry Potter saga was an evolving rather than a segmental series, the endings of its first six volumes could be no more than subclimaxes, whose magnitude had to be carefully orchestrated to produce a crescendo effect. Such careful escalation is not easy to achieve; the pressure of melodramatic inflation propels most fantasy series to apocalyptic conclusions in three volumes. Rowling planned for it by carefully reducing her archvillain, Voldemort, to near-impotence as a result of his first, already-distant encounter with Harry, so that his gradual recovery of his powers within the texts is carefully matched to Harry's slowly accumulated knowledge and maturity. By the time Voldemort is ready to make his bid to take over the clandestine society of magically talented individuals, which would automatically give him absolute power over the world of nonmagical "muggles," Harry has enough wisdom, capability, and support from his friends to take him on, with one of those one-in-a-million chances of winning that so frequently come off in melodramatic fiction.

In spite of this ingenious adjustment, there would have been no scope for Rowling to increase the magnitude of the individual hazards that Harry has to face in the seven volumes had she not been able to shatter the limits of diplomatic constraint formerly applied to children's fiction; seven escalating degrees of threat could hardly stop short of extremes of violence not normally tolerated in children's fiction. In this respect, Rowling benefited

considerably from the new license granted in the wake of a 1990's boom in children's horror fiction spearheaded by the work of R. L. Stine. This boom had helped transform Rowling's American publisher, Scholastic, from a staid publisher of didactic aids into a trendsetter. Rowling was able to show such restraint in the early volumes that the death of Harry's mentor, Albus Dumbledore, came as a genuine shock in the sixth volume, but it still secured the plausibility of the awful possibility that Harry might have to sacrifice his own life to stop Voldemort in the seventh. The reality of that possibility proved enormously valuable in maintaining the taut dramatic tension of the seventh volume.

The license borrowed from the children's horror boom not only enabled Rowling to create some genuinely scary monsters to serve as minor adversaries in contriving her preliminary subclimaxes but also enabled her to develop another device crucial to the series' melodramatic inflation. The early volumes all have a strong mystery component, in which it is profoundly unclear—to Harry and his readers alike—who his potential allies and covert enemies are. In some instances, as with Sirius Black, who is initially represented as a lethal adversary but turns out to be a key ally, such confusions are firmly resolved, but in many instances the uncertainties linger. One of the most remarkable features of the series is its continual blurring of moral boundaries.

Even Voldemort, the series' epitome of evil, is depicted as a victim of awkward circumstance, and several of his faithful lieutenants prove capable of good deeds, or at least of crucial hesitation in doing evil. The chief subvillain, Severus Snape, is especially ambiguous in this regard. On the other hand, few of Harry's allies are without their darker side, mostly in a less explicit fashion than Remus Lupin, who suffers under a lycanthropic curse. The fact that the apparently saintly Albus Dumbledore has his own moral weakness is ingeniously put to use in explaining why he is extremely reluctant to tell Harry everything he knows, thus prolonging all manner of mysteries. The intricacy of the series' play with moral judgments was unprecedented in children's fiction, although it did stop short of testing the ultimate taboo; Harry's dead mother remains whiter than white, the true agent of his salvation in the first and final challenges.

The handling of the series' mystery component

is the author's greatest achievement. Each of the first six books has two levels of mystery; there are puzzles which have to be solved in order to bring about the subclimax and denouement of that particular volume, and there are puzzles whose solution will not become clear until the end of the entire series. The puzzles of the second sort are required to accumulate, occasionally being refreshed or recomplicated, a process that puts a heavy strain on writer and reader alike. The fact that the "deathly hallows" vital to the understanding of the whole do not make their debut until halfway through the final volume suggests that crucial authorial improvisations were still taking place at that point, but the materials of mystery built up in the early volumes are never wasted. Loose ends and tantalizing hints left dangling at the end of the first and subsequent volumes were conscientiously and productively integrated into the weave of the seventh, a remarkable achievement, given the density of the subplots and the complexity of the overall scheme.

One of the effects of this double layering of mystery was to greatly inflate the length of the later volumes of the series, producing page counts in volume 4 (636 pages) and volume 5 (766 pages) that would previously have been considered unthinkable for children's literature. Volume 7, at 606 pages, seemed very modest by comparison, given that it covered far more narrative ground than either of those predecessors. Volumes 4 and 5, however, are hybrid texts in a sense that volumes 6 and 7 are not, and their hybrid status reflects the transition that the series underwent as it crossed the boundary between age-range marketing categories. In the first four volumes, the melodramatic plots are secondary to other narrative material, celebrating the essential coziness of the boarding school environment to which Harry has been removed from an utterly wretched home life. From then on, however, the joys of friendship and playing sports are gradually and painfully displaced by clandestine guerrilla warfare; in volume seven, Hogwarts Academy no longer functions as a school but as Armageddon's last redoubt. The fact that it does so effectively is a testament to the skill with which Rowling handled the series' development and metamorphosis.

## HARRY POTTER AND THE SORCERER'S STONE

**First published:** *Harry Potter and the Philosopher's Stone*, 1997

**Type of work:** Novel

*In the first novel in the series, Harry learns that he has inherited magical powers and begins his education at Hogwarts Academy, where he makes friends and makes his first attempt to thwart the ambitions of his nemesis, Voldemort.*

At the beginning of the novel, Harry Potter is living in a cupboard under the stairs, suffering appalling maltreatment at the hands of the Dursley family, to whose care he was confided as an infant following the death of his parents; his mother was Mrs. Dursley's sister. On his eleventh birthday, however, it is revealed to him, despite the Dursleys' best efforts, that he has inherited magical abilities and is scheduled for education in wizardry at Hogwarts Academy, a key pillar of the British magical community, which lives in strict covert isolation from untalented "muggles." This message is delivered by the intimidating Hagrid, who lives on the school grounds on the edge of a Forbidden Forest. Hagrid, who is fascinated by all manner of magical creatures, becomes Harry's first fast friend.

Having obtained essential equipment from the magical mall in Diagon Alley, Harry catches the Hogwarts Express from platform nine and three-quarters at King's Cross Station and is carried away to his new life. He finds that his reputation has preceded him to Hogwarts. While still preconscious in his cradle, he survived a magical assault by the infamous dark wizard Voldemort (whose name is so terrible in its effects that only Harry and Hogwarts' headmaster, Albus Dumbledore, dare pronounce it), deflecting a killing spell back upon its sender and reducing Voldemort to helplessness. Despite the resentment generated by this reputation among the children of Voldemort's former sympathizers—including fellow pupil Draco Malfoy and the disciplinarian teacher Severus Snape—Harry finds life at Hogwarts idyllic and makes two more firm friends in the bookish Hermione Granger and the hapless but willing Ron Weasley.

Initially, the only strong evidence of Harry's tal-

ent is provided on the sports field, where he becomes an expert player of quidditch, a game played on flying broomsticks. Voldemort, however, is in hiding at Hogwarts, beginning to recover his powers and enthusiastic to get rid of his nemesis. Voldemort also wants to get hold of the philosopher's stone, which was entrusted by the famous alchemist Nicholas Flamel to Dumbledore. With the aid of Hermione and Ron, and encouragement from Dumbledore and Hagrid, Harry contrives to thwart Voldemort's ambition in a tense climax, but he realizes that he is engaged in a contest that is likely to be long and desperate.

## HARRY POTTER AND THE PRISONER OF AZKABAN

**First published:** 1999

**Type of work:** Novel

*Harry faces tougher challenges in his third year at Hogwarts Academy, when the infamous Sirius Black breaks out of Azkaban Prison and may be planning to kill him.*

Having further penetrated the mysteries of Hogwarts Academy, where Voldemort had once been a pupil under the name of Tom Riddle in *Harry Potter and the Chamber of Secrets*, Harry faces sterner challenges in his third year at the school. The infamous Sirius Black has escaped from Azkaban—the magical prison to which Voldemort's key supporters, the Death-Eaters, were sent when his first campaign was thwarted—and is rumored to be making his way to the school in order to kill Harry.

Harry begins to realize that the matter is more complicated when he has a terrifying encounter with a Dementor—one of the hideous, soul-sucking entities which guard the prison—on the Hogwarts Express. Even Dumbledore seems to doubt his testimony in this regard but is determined to keep him safe, with the aid of Remus Lupin, the new teacher of Defense Against the Dark Arts (a post with a remarkably high turnover). Harry has further trouble with both Severus Snape and Draco Malfoy, and his situation is further complicated when Hagrid becomes distraught after one of his unruly protégés, the hippogriff Buckbeak, is condemned to be put down.

It transpires that Sirius Black is actually Harry's nearest living relative and staunchest defender, having once been part of a group of friends with Harry's father and Remus Lupin, whose affliction with lycanthropy the group had striven to protect. The true enemy and cause of Harry's troubles is, as always, Voldemort, who has subverted Azkaban and now has the Dementors at his beck and call. Harry is able to call upon the aid of the Marauder's Map, which allows the locations of the academy's inhabitants to be determined, as well as a time-bending watch, but he, Hermione, and Ron are tested to the limit of their strength and ingenuity by the quest to save Sirius and Buckbeak and to thwart Voldemort's plans for a third time.

## HARRY POTTER AND THE ORDER OF THE PHOENIX

**First published:** 2003

**Type of work:** Novel

*Life becomes more difficult for fifteen-year-old Harry, when a bureaucrat from the Ministry of Magic institutes a reign of persecution at Hogwarts Academy and the battle against Voldemort intensifies.*

Having confronted Voldemort in person for the first time at the end of *Harry Potter and the Goblet of Fire*, unexpectedly surviving a second attempt to destroy him, Harry is in an awkward position at the beginning of the fifth volume in the series. The government of the hidden magical world, the Ministry of Magic, run by the bumbling Cornelius Fudge, refuses to admit that Voldemort is alive and has branded Harry a liar for asserting the opposite.

Harry's adult supporters form the secret Order of the Phoenix to prepare for the impending war against Voldemort, but Harry's safe refuge at Hogwarts is undermined when the ministry appoints one of its most officious bureaucrats, Do-

lores Umbridge, to overhaul its educational standards. Umbridge also turns out to be a sadist, inflicting painful punishments on Harry when he persists in his assertions.

When Defense Against the Dark Arts is dropped from the curriculum on Umbridge's orders, Harry begins teaching the subject as best he can to a group of dissident students he calls Dumbledore's Army. When his scheme is discovered and he is threatened with expulsion, this label enables Dumbledore to take responsibility instead. However, the headmaster's subsequent sacking results in Umbridge being installed as High Inquisitor of Hogwarts, instituting a reign of persecution.

This time, Voldemort's proximal target is not located at Hogarts but in the vaults of the Ministry of Magic, where a prophecy concerning his mysterious and potentially fatal relationship with Harry is secured. Hagrid's crucial relationships with various fantastic creatures and his giant kinfolk prove crucial in permitting Harry, Hermione, and Ron to get out of Hogwarts in time to join the Order of the Phoenix in a pitched battle within the ministry. Although the Order of the Phoenix suffers serious fatalities, the ministry's official position becomes untenable, and the battle against Voldemort becomes a matter of open warfare.

## HARRY POTTER AND THE DEATHLY HALLOWS

**First published:** 2007

**Type of work:** Novel

*In the last volume of the series, Harry engages in his final battle against Voldemort, a fight that turns out to be more complicated than Harry imagined.*

Following another deeply troubled year at Hogwarts, described in *Harry Potter and the Half-Blood Prince*, at the end of which Dumbledore is killed by the ever-deceptive Severus Snape, Harry begins the final volume of the series in hiding. When the spell that has kept him safe until his seventeenth birthday expires, he and his helpers are immediately attacked by Voldemort, suffering casualties.

Unable to return to Hogwarts, Harry is forced to go on the run with Ron and Hermione, hunting desperately for the "horcruxes" that contain fragments of Voldemort's soul and thus maintain his invulnerability. The search for the horcruxes is complicated when Harry learns of the existence of another set of magical objects—the "deathly hallows"—which might also be vital to the settlement of the final battle. Voldemort is unable to give his complete attention to the quest to kill Harry because he is searching for one of the hallows: an undefeatable wand.

Uncertain as to whether to give priority to the remaining horcruxes or the hallows, Harry continues to evade death, albeit narrowly, until he is forced to return to Hogwarts in order to complete his search. The castle housing Hogwarts Academy then becomes the last fortress holding out against Voldemort's rise to power, subject to intensive siege and violent bombardment.

The remnants of Dumbledore's Army and the Order of the Phoenix mount a heroic defense of Hogwarts in the attempt to win Harry enough time to finish his quest, suffering heavy casualties in the process. The conflict reaches the limit of desperation when it becomes evident that Harry harbors one of the fragments of Voldemort's soul in his own flesh. It appears that Harry cannot kill his enemy without sacrificing himself in the process, but that sacrifice might also make Voldemort invincible.

### SUMMARY

All children's fiction consists, in essence, of parables of maturation, but the remarkable structure of the Harry Potter series enabled it to become the most elaborate and complex of all such parables. That, rather than its enormous sales, is the series and author J. K. Rowling's most significant literary achievement.

Brian Stableford

## DISCUSSION TOPICS

- Is J. K. Rowling's conscientious Hermione Granger a better role model for school-children than the homework-neglecting and quidditch-addicted Harry Potter?
- To what extent does the Dursleys' cruel treatment of Harry Potter reflect the usual behavior of untalented people toward the talented?
- How much justification is there for the deeply cynical attitude toward government bureaucracy reflected in Rowling's characterization of such characters as Cornelius Fudge and Dolores Umbridge?
- Is Voldemort merely a product of his unfortunate upbringing?
- If Voldemort is merely a product of his upbringing, is it the case that other "Dark Lords" are bound to emerge continually, that the same social forces will enable them to recruit similarly powerful armies, and that the ability to learn from the lessons of history will eventually enable one of them to succeed where Voldemort failed?
- Is it the case that, by virtue of encouraging young people to take a keener interest in magic, the Harry Potter series is deleterious to the cause of science or religion?

## ARUNDHATI ROY

**Born:** Shillong, Meghalaya, India  
November 24, 1961

*Roy's novel The God of Small Things, written in an unusual voice and delineating the decline of a wealthy, provincial, Indian family, caused a stir in the publishing world, won the coveted Man Booker Prize, and became an international best seller.*

### BIOGRAPHY

Suzanna Arundhati Roy is the child of a Christian mother from the south Indian state of Kerala and a Bengali Hindu father, who was the administrator of a tea plantation. She grew up in Aymenem, Kerala, India, where she attended an unconventional school, Corpus Christi, operated by her mother, Mary Roy. Both the social atmosphere of the varied religions of Kerala (Hindu, Muslim, and Christian) and the natural history of the rural area are part of the background and atmosphere of her novel, *The God of Small Things* (1997). By her own admission, Roy grew up very much as the children in the novel did. Her mother was divorced, and the vulnerable family lived on the outskirts of the village.

When she was sixteen, Roy left home to be on her own, and for a while she lived a precarious existence in a squatter's camp in Delhi. After some time she enrolled in the Delhi School of Planning and Architecture, which had an influence on her writing. She brought the same structure of recurring motifs that she found in architecture to her novel, which she shaped by the way words, paragraphs, and punctuation fall structurally on the page. Roy married a fellow architectural student, Gerard da Cunha. Da Cunha eventually went on to receive the Prime Minister's National Award for Excellence in Urban Planning and Design, offered by the Ministry of Urban Development, in 2006. His marriage to Roy, however, lasted only four years, and during that time they moved to Goa to sell things on the beach and live like flower children. Unhappy in such a commercial tourist destination, Roy returned to Delhi and found a job in the National Institute of Urban Affairs.

The Indian film director Pradeep Krishen noticed Roy one day and offered her a small role in the film *Massey Sahib* (1985). Soon after, she received a scholarship to study the restoration of monuments in Italy for eight months. Roy realized she was a writer while in Italy. She married Krishen, and together they planned a television epic in twenty-six episodes for Doordarshan, the public television broadcasting company of India. ITV, an independent television production company, scrapped the serial after a few episodes, severely disappointing Roy and her husband. Roy met Bhaskar Ghose, then director general of Doordarshan, who offered to finance a screenplay she wanted to write. The result was *In Which Annie Gives It Those Ones*. Released for television in 1989, the story is set in the 1970's and is a humorous tale of architecture students in their final year of college. Roy portrays herself in the film, which was shot at the Delhi School of Planning and Architecture, where she went to school. Continuing her film work, Roy wrote the screenplay for the film *Electric Moon*, which had a few good reviews when it was released in 1992 but was not a success. She later admitted she did not have enough cinematic experience to fully translate her concept into a film.

Returning to India, she wrote a criticism of the widely acclaimed and celebrated Indian film, *Bandit Queen*, which resulted in a lawsuit against her. In the aftermath, she left the public sphere for private life to concentrate on her writing, which developed into *The God of Small Things*. The novel was written in English because it is the only common language throughout India. Although the novel catapulted Roy to fame and celebrity, it also garnered a certain amount of notoriety because of its sensitive subject

matter. In the novel, the divorced mother of young children crosses ancient caste lines when she has an affair with a *Dalit*, or untouchable. *Dalits*, according to India's three-thousand-year-old caste system, are not traditionally considered part of human society but are polluters of higher-caste people, which is why they are untouchable. Roy turned to a defense of the *Dalits* after the book's publication by speaking out against their oppression and appearing at a reception in Kerala to establish herself as an advocate of their cause. She also donated royalties from the Malayalam translation of her novel to support *Dalit* writings.

Following the publication of *The God of Small Things*, Roy used her talents and status to publicize some of the important choices India faces. In 1998, she published an article in *The Nation* concerning the testing of nuclear weapons in India. Some of her controversial essays have been collected in several books, including *Power Politics* (2001) and *War Talk* (2003). She attacks global capitalism, the spread of poverty, and the fact that more than four hundred million citizens in India remain illiterate. In a collection of essays published in 2004, *An Ordinary Person's Guide to Empire*, Roy takes on the administration of President George W. Bush, exposing what she perceives as the hypocrisy of Bush and his cabinet and reminding readers that the power of the people to oppose their leaders' tyranny is the foundation of democracy. She advocates using nonviolent organizing to sabotage the war in Iraq and draws attention to the subtle connections between globalization in India, devastation in Iraq, and poverty among African Americans.

## ANALYSIS

Arundhati Roy has had the advantage of being brought up with great freedom to develop her individual interests and strengths. Her mother, a social activist, founded her own school and let her daughter learn informally, which allowed Roy to follow her inclinations and listen to her inner voice without being bound by restrictive rules. It is this unique voice that lifts *The God of Small Things* beyond the category of mainstream novel to a work of art. As arresting as the action is in the novel, it is the element of style, in this case an idiosyncratic voice for the seven-year-old twins who largely narrate the story, which continues to captivate and enchant the reader from beginning to end.

This remarkable voice is present in the first important scene in the novel, the funeral of Sophie Mol, a cousin to the twins Rahel and Estha. During the funeral service, a small bat climbs up the sari of Baby Kochamma, the twins' great-aunt, and when the bat reaches her flesh, Baby Kochamma screams. Roy describes the event as follows: "The singing stopped for a 'Whatisit? Whathappened?' and for a Furrywhirring and a Sariflapping." In this passage, Roy runs words together, rhymes gerunds, and records the event as it might have been understood by the children. These techniques, as well as some invented words, are used throughout the book and are just some of the odd uses of language that give the prose its magical, fairy-tale quality.

Acrostics come into play in the scene in the police station, when the twins observe police behavior that is insulting and degrading to their mother, while behind the policeman is a sign with the word "Police" printed vertically, with each letter standing for a benign quality, such as "O for Obedience," "L for Loyalty," and "C for Courtesy." The children understand this scene as one in which the actions do not match the words, a type of irony that forces the twins to create their own reality in the midst of so many events they do not understand.

The construction of the novel is also innovative. *The God of Small Things* opens with Rahel's return to the village of Ayemenem twenty-three years after the main action of the novel—when she and her twin brother were children. She has a strange reunion with Estha, who, according to her aunts, no longer speaks. The penultimate chapter of the novel is taken up with an incestuous act between the now adult twins as they seek consolation and surcease from grief in each other's arms, which connects to Rahel's arrival in the first scene. Finally, the last chapter is a description of their mother Ammu's brief and doomed affair with Velutha, the untouchable, which had taken place years before. Thus, the novel is framed by the actions of the adult twins, with the final scene reaching back to the middle of the novel to illustrate what had happened previously. The events are told as flashbacks or flash forwards, and time is so fragmented that it is difficult for the reader to recognize that the entire novel takes place in one day.

Other twinned events give the novel a highly stylized surface. Velutha, the untouchable, is described more than once as the person the children

loved by day and their mother loved by night. Both Ammu and her brother are divorced parents. Both Ammu and her own mother, Mammachi, suffered violent abuse at the hands of their husbands. The most conspicuous parallel in *The God of Small Things*, however, is the great love and understanding that the twins feel for each other and that their mother and Velutha also feel for each other. Both couples act out a transgression of norms: The twins' coupling defies an almost universal taboo, and Ammu and Velutha's coupling defies a centuries-old tradition which is still powerful in India.

Before winning the Man Booker Prize, *The God of Small Things* received a great deal of media attention, both positive and negative. It was declared derivative of James Joyce, Salman Rushdie, and William Faulkner. The style was called overheated, pretentious, and clichéd by various reviewers. In India, media pundits expressed dismay about the backward and disgusting picture of Kerala presented in the novel. Some held Roy responsible for misrepresenting historical fact in her representation of the local Communist Party of the time. Soon *The God of Small Things* received academic attention as well. Several collections of essays on Roy and her novel were published by Prestige Books in New Delhi, and within a few years hundreds of essays on the novel appeared in academic journals in the United States and abroad. Scholars gave the book a variety of theoretical interpretations, including feminist, postcolonial, deconstructionist, Marxist, post-Freudian, and other readings. Other analyses emphasized the novel's use of the techniques associated with a traditionally Western, postmodernist style, such as filtered voices, fragmentation of self, and events recounted by more than one person.

## THE GOD OF SMALL THINGS

**First published:** 1997

**Type of work:** Novel

*Velutha, an untouchable who is employed in the Paradise Pickles and Preserves factory, has an affair with Ammu, a member of the family who owns it, which leads to his death and the family's disgrace.*

*The God of Small Things* opens at the chronological end of the story. In the early 1990's, Rahel visits her family home in Ayemenem, in the Indian state of Kerala. She has come home to see her twin brother, Estha, who had unexpectedly returned. The twins, who were inseparable as children, have not seen each other for twenty-three years, ever since their English cousin, Sophie Mol, drowned in the river after their boat capsized during a Christmas visit. The precocious and indefatigable twins are at the Ayemenem home because their beautiful, sensuous mother, Ammu, married a weak and abusive man whom she later left to return to her family. The twins live in a fantasy world of their own making, trying to hide the more painful events of the novel in denial. For example, Rahel, described as "fiercely vigilant and brittle with exhaustion from her battle against Real Life," is convinced that Sophie Mol is awake for her own funeral. Although the novel is told by a third-person narrator, the events are seen largely through the eyes of Estha and Rahel.

Ammu is merely tolerated at the Ayemenem house because of her shameful, unwise marriage, but the other residents also have an air of disgrace and eccentricity, as if the house were a retreat for those who could not quite make it in the larger world. Uncle Chacko, Ammu's brother and Sophie Mol's father, is an Oxford scholar and Marxist who returned home from his own failed marriage in England. He has taken over the Kochamma family business, Paradise Pickles and Preserves, from Mammachi, the matriarch of the family, whose skull still bears scars from the beatings that her husband gave her. Also living in the house are Baby Kochamma, a great-aunt who fell in love with a priest, converted to Catholicism, and became a nun to be near him. When this proved futile, she returned to the family home and eventually became

addicted to television, which brings the greater world she had missed right to her sitting room. She is, however, a fearful person who is frightened by the Marxist-Leninist menace which she heard about on a British Broadcasting Corporation newscast. She does not even trust the twins.

Another important character in *The God of Small Things* is Velutha, the untouchable, who lives in a tiny hut on the other side of the river that flows through the Kochammas' property. He lives with his father, Vellya Papan, who has a glass eye, and his paralyzed brother, whom Velutha tends when he is not repairing machinery at the pickle factory or mending appliances at the family's home. The Kochamma family first met these untouchables when they showed up at their back door to sell coconuts, and they stayed to do odd jobs. Mammachi noticed Velutha's extraordinary skill with his hands when he was young and sent him to a carpentry school, where his talent developed and enabled him to become a cabinetmaker, furniture designer, wood carver, and eventually a machinist. Estha and Rahel were forbidden to enter Velutha's hut, but they did. He carved animals from bits of wood for them, made Rahel her lucky fishing rod, and taught her and Estha to fish. He and the twins grew to be fast friends. Later, when the children found an old rowboat covered with vines and rot, he helped them clean and repair the boat, and after that they visited him every day. The twins and Sophie Mol were riding in this rowboat when it capsized after heavy rains had swollen the river. The twins, used to swimming, reached shore, but Sophie Mol's body was found in the river the next morning.

The rowboat was also used by Ammu in her nightly trysts with Velutha. The family is unaware of this until Velutha's father, Vellya, shows up at the back door one night and is absolutely horrified be-

cause he has seen, with his one good eye, Ammu crossing the river to be with Velutha. Vellya has even seen Ammu returning at dawn. Between tears and terrified shaking, he relates the facts to Mammachi, who refuses to believe that her daughter, Ammu, and the son of an untouchable are having an affair. She kicks Vellya down the stairs. The maid, however, has overheard the conversation and relates it to Baby Kochamma.

After tricking Ammu into her room and locking her in, Baby Kochamma convinces Mammachi that Vellya's story must be true. Baby Kochamma then goes to the police station and reports to the chief inspector that Velutha has tried to rape Ammu, changing the story to protect the family.

Events spin out of control. The police patrol finds Velutha asleep in his hut, beats him viciously, and drags his unconscious body back to the police station. The twins are summoned to the station to identify Velutha, and Rachel sees the broken, bloody body of the person she has loved, the God of Small Things. Although she identifies Velutha to the police, in an attempt to protect her twin brother she tells Estha that the man she saw at the police station was not Velutha after all.

## SUMMARY

Arundhati Roy's concerns in her novel *The God of Small Things* are the same ones she writes about in her nonfiction essays: injustice in social caste systems, inequality of opportunity—and even dignity—between the affluent and the poor, imperialism, and war. In *The God of Small Things*, however, she has all the various techniques of fiction at her command, and the novel creates a wholly imaginary world in which scientific realism is cast aside and emotions and instincts of every kind are tested. In addition to the social issues raised, the novel also intensely examines the motivations and secrets of the human psyche. Many other young South Asian women writers have been influenced by Roy's novel, and the book has the power to enrich South Asian writing in new and innovative ways.

## GABRIELLE ROY

**Born:** Saint-Boniface, Manitoba, Canada  
March 22, 1909

**Died:** Quebec City, Quebec, Canada  
July 13, 1983

*As a French Canadian writer acclaimed for her social and psychological realism, Roy made an extraordinary contribution to the novel and short story.*

### BIOGRAPHY

Gabrielle Roy (rah), the youngest of eleven children, was born on March 22, 1909, in Saint-Boniface, Manitoba, a francophone community in predominantly anglophone western Canada. The linguistic heritage and cultural hegemony of which Roy was enormously proud did not blind her, however, to the existence of other ethnic groups on the Manitoban prairies. Moreover, it made her acutely sensitive to the aspirations of other nationalities new to the province. Her father, Léon Roy, was a federal colonization agent who assisted the settlement of Ruthenians, Dukhobors, Mennonites, and Hutterites. The young girl grew up, therefore, at a time when the prairies were being extensively settled by pioneers of diverse ethnic background, individuals whose language, customs, and singular physical appearance, in some instances, afforded different perceptions of life that would manifest themselves later in her prose.

In 1927, Léon Roy died, leaving Gabrielle's mother, Mélina, and Gabrielle to support themselves. After attending the Winnipeg Normal School from 1927 to 1929, Roy began an eight-year teaching career, a profession that had been heartily approved by her mother. Her works, *La Petite Poule d'eau* (1950; *Where Nests the Water Hen*, 1950) and *Ces enfants de ma vie* (1977; *Children of My Heart*, 1979), are inspired by her teaching experiences.

Despite the satisfaction that she felt in teaching, Roy was destined to travel, a recurrent theme in her fiction, in which life is perceived as a voyage, following a circular movement that brings the individual, often in memory, back to the initial point of departure.

Her return to Quebec in 1939, after travels in Europe, proved to be of extreme importance in the development of her aesthetics, her perception of life, with its joys and troubles, and her humanistic philosophy. Living first in Montreal, Roy worked as a freelance journalist for *Le Bulletin des agriculteurs*, *Le Jour*, and *Le Canada*. Her pieces reflect her profound sensitivity to diverse social contexts and to difficulties faced by the working class, as well as an unwavering compassion for the human condition, often perceived as being directed by a destiny that engenders solitude, suffering, and imprisonment.

Roy's first novel, *Bonheur d'occasion* (1945; *The Tin Flute*, 1947), bears testimony to the sensitivity and creative intuition that characterize her work. For this work, Roy received the Prix Fémina and the Lorne Pierce Medal of the Royal Society of Canada. French Canada's first urban novel, it evokes with historical authenticity Montreal during World War II, the misery and poverty of a working-class area of the city. Roy's preoccupation with social issues, the mechanization of a modern society that no longer values the work of artisans, the social position of women in relation to that of men, and, finally, the image of life as being a voyage into the future, or in some cases, toward the past, reveal her compassionate vision of existence and her need to understand it better.

In 1947, Roy married Dr. Marcel Carbotte, like herself a Franco-Manitoban, and the couple spent the next two years in France, where Carbotte undertook medical studies. It was during this stay that Roy wrote *Where Nests the Water Hen*, the first of her works dealing with her life on the Manitoban prairies. The prairies remained an integral part of Roy's psyche, inevitably returning as a permanent landscape feature of her Manitoban works. The prairie is doubly significant because of its symbolic importance, representing both spatial and temporal infinity, perpetual movement, and the future that looms ahead, resplendent with promise.

In 1954, Roy and her husband established a permanent residence in Quebec City, the capital city of Quebec, Canada's largest francophone province. The publication of *Alexandre Chenevert* (1955; *The Cashier*, 1955) reconfirmed Roy's preoccupation with the common man, in this case the principal character indicated by the title.

Roy's aesthetic evolution during this period in her life led her to a type of self-discovery, in that she became the focus of her own scrutiny. Her childhood, her travels, and her vocation as a writer became important focal points of her creativity. It is evident, for example, in *La Route d'Altamont* (1966; *The Road Past Altamont*, 1966), in which Roy interweaves fiction and semiautobiographical details to create both a subjective and an objective retelling of periods in the life of Christine, the work's main character. Roy's introspection at this stage in her life reveals an individual who is unceasingly curious and unrelentingly committed to her art. As Roy herself said, her works did, in a sense, compensate for not having children. The characters in her works, as varied and complex as they are, therefore constitute the writer's true family. In 1967, Roy was named Companion of the Order of Canada, and in 1968 she received a Canada Council Medal for her work.

Roy died from a heart attack in Quebec City on July 13, 1983. A prolific writer, she made an invaluable and permanent contribution to the literature of French Canada. She is also, through the many multilingual translations of her works, a figure of international reputation, whose messages travel far beyond the boundaries of her country.

## ANALYSIS

Journalist, short-story writer, and novelist, Roy created a corpus of works that influenced greatly

the evolution of French Canadian literature. The publication of *The Tin Flute* in 1945 was of enormous importance in the development of the French Canadian novel, for it cast a penetrating look at the French Canadian reality of the time. The aesthetics of traditional novels, evoking an idyllic natural setting—countryside, forest, and mountain inhabited by simple, robust, rural characters—gave way to the urban novel, realistic in inspiration, unbiased in the presentation of both character and milieu. More important perhaps than this shift in focus and treatment is the ideological noteworthiness of such an endeavor. *The Tin Flute* represents a mosaic of French Canadian characters, depicted in a working-class microcosm, created without political partisanship, despite linguistic and nationalistic conflicts that existed between anglophone and francophone at that time, as well as forty years later. Roy's focus, therefore, is on the existential level of depiction. She does not participate in political debate concerning Canada's future as a confederation with or without Quebec's membership. This detailed and probing examination of the average citizen living in an urban setting during a period of economic depression elevated the novel of Quebec to a universal level. Roy's characters, whether semiautobiographical or fictitious, form a profoundly compassionate vision of humanity through a style that is consistently rich, evocative, and inviting.

Roy's use of characters, as well as of characterization, is distinctly her own. The individuals whom she creates are hardly unidimensional people serving to reinforce a given ideological or philosophical stance. In the same way that the ideals of French and British realism of the nineteenth century attempted to reveal reciprocal influences between individual and milieu, and the ways in which determinism guides a character's development, Roy's intention is, without exception, to demonstrate through her commitment to social realism and strong psychological portraits the place of men and women in society. The threads of individual portraits are intertwined by the writer to create the social fabric of the worlds that she depicts. The characters in Roy's writings are therefore fundamentally social beings, for their desires, acts, successes, and failures exist because of the place they occupy in the larger scheme of existence. Psychological depth, glimpses of the past contemplated in

the present, interpersonal relations, and links with societal structures, such as employment and education, are elements that anchor Roy's characters in an authentic and complex world.

Recurring thematic structures in her work give Roy's corpus, be it her fictionalized or semiautobiographical works, a distinct consistency, both in style and in content. Evasion from the present through dream, the impossibility of recapturing the past, the solitude of the individual, the difficulty in achieving true communication, the material and spiritual troubles imposed upon the individual by a modern society—these are some of Roy's preferred themes.

Translated into nine languages, *The Tin Flute* is Roy's most successful novel. Set in Montreal's working-class district, Saint-Henri, during the end of the economic crisis of the late 1930's, as well as during World War II, the novel recounts the life of the Lacasse family, an urban family facing unemployment, sickness, and poverty. The sensitivity to the plight of the common person is a distinctive trait of Roy's literary world. The work is inspired, in fact, by the flood of emotion that she experienced when first visiting this area of Montreal. The photographic realism that characterizes her style in this particular novel lays the foundation for social commentary. With minute detail, Roy re-creates a microcosm inhabited by original characters, some of whom will succeed in extricating themselves from the destiny that awaits the majority of the individuals depicted in this context. It is, of course, paradoxical that the war brings an end, through the creation of employment, to the physical suffering of the Lacasse family. This twist reinforces Roy's rendering of a society that devalues and exploits the common person, ignores his or her value as a human being, and extols the virtue of a materially successful life without addressing spiritual needs.

*The Tin Flute* was followed by another urban novel, *The Cashier*, which focuses on a solitary and despairing bank teller, overburdened by social injustices and unsettling current events, such as the assassination of Mahatma Gandhi, the Arab-Israeli War, and overpopulation in China. The main character, Alexandre Chenevert, carries the weight of the world on his own shoulders, and in this way, he represents on an existential level the powerlessness, alienation, and suffering faced by the individual in a modern technological society. This theme

is underlined by the symbolic nature of the bank booth that imprisons Chenevert, a small cagelike structure with three glass walls, from which the teller observes the monotony of his life, but from which he is not able to escape.

The opposition between city and countryside present in *The Tin Flute* figures also in *The Cashier*. As in the former novel, the attempt to extricate oneself from the complexities and tribulations of city life by returning to the countryside is doomed to failure in this work. While Chenevert does find temporary solace at Lac Vert (Green Lake), representative of a simple, natural way of life cut off from mass media that bombard the protagonist with worrisome news items, he is drawn inexorably back to the metropolis. Before his death, he comes finally to experience a sense of fraternity with fellow patients at the hospital and ultimately undergoes a liberating death that relieves him from the universal human suffering, as well as his own suffering, that preoccupied him during his lifetime.

Some of Roy's works are also semiautobiographical in orientation but do not lose focus, however, on the psychologically compelling portrait of the individual. *Where Nests the Water Hen*, *Rue Deschambault* (1955; *Street of Riches*, 1957), *The Road Past Altamont*, and *Children of My Heart* are inspired by Roy's life and teaching experiences on the Manitoban prairies. *The Road Past Altamont* is an especially beautiful and revealing rendering of the naïveté, intellectual evolution, and aspirations of the main character, Christine, clearly resembling Roy herself. Composed of four short stories, "Ma Grand-mère toute puissante" ("My Almighty Grandmother"), "Le Vieillard et l'enfant" ("The Old Man and the Child"), "Le Déménagement" ("The Move"), and "La Route d'Altamont" ("The Road Past Altamont"), the work can be seen as a whole that depicts the development of Christine from childhood to adulthood, from fantasy and dream to vocation and reality. Understanding through death the creation of life in a cyclical fashion, realizing one's own desires and potential, viewing life as an unending journey—these are all lessons learned by the young Christine and reflected upon by her, the mature writer endeavoring to retrace the past in order to understand and appreciate the present more fully.

Allusion to the future is a recurring element in the conclusion to many of Roy's works. It serves to

indicate her quiet optimism and, once again, her conception of existence as a voyage that continues inevitably toward a future space and time of discovery.

## THE TIN FLUTE

**First published:** *Bonheur d'occasion*, 1945  
(English translation, 1947)

**Type of work:** Novel

*This work, Roy's most famous novel, retraces with acute realism working-class life in Montreal during World War II.*

Social realism and photographic detail characterize *The Tin Flute*, set in Montreal during World War II. This urban novel recounts the joys and sorrows of the Lacasse family: of Azarius, the negligent father and dreamer; of Rosa-Anna, the stoic maternal figure; and of their eight children. The thematic structure of the work is built on oppositions between past and present, dream and reality, as well as the roles and privileges that distinguish men and women during this period. It is, above all else, a poignant portrayal of the working class in Saint-Henri, an underprivileged francophone neighborhood at the foot of a mountain, at the top of which lies Westmount, the anglophone enclave of wealth and power.

Social history provides the foundation for this literary world. Unemployment and industrialization create the backdrop against which characters struggle to attain freedom—personal, spiritual, and material—while, in the case of female protagonists, for example, endeavoring unsuccessfully to extricate themselves from an implacable destiny. Florentine Lacasse, the eldest daughter of the family, works as a waitress in a working-class café in order to help support her family, since her father is not capable of holding down a job and since her mother must take care of the other sickly children at home.

From the opening line, one discerns Florentine's desperate attempt to escape the reality of her employment, of her family situation, and of her future. Living in a world of unattainable dreams, this sickly, fragile-looking young woman imagines herself the elegant seductress who will be rescued by a

man of extraordinary means and appearance. She is clearly, therefore, searching for happiness through "the other." In this case, she becomes involved with Jean Lévesque, a young man of uncommon discipline and ambition, who, in contrast to Florentine, creates his own destiny, for his dream is to ascend the mountain and to live in the comfort and security of Westmount. The reader has no doubt, in fact, that he will succeed in his goal and is constantly reminded through Roy's poetic symbolism that Jean Lévesque is an untouchable. Florentine frequently sees him from the back; he is forever moving away from her, out of her field of vision, propelled during solitary walks in the streets of Montreal by wind and snow toward the realization of his dreams.

However, in becoming pregnant with Jean Lévesque's child, Florentine does nothing more than set in motion the destiny common to the female protagonists, which will be her own. Like her mother and her grandmother, both of whom are physically and spiritually exhausted after years of motherhood, sacrifice, and struggle, the character of Florentine exists on a temporal level structured by the succession of pregnancies that ordered the life of the women who came before her. This rigid temporality, however, does not govern the male characters, who disappear and reappear at will. Escape for the male characters is, therefore, possible. The female protagonists are bound to live out an existence that seems hereditary. Jean Lévesque is the incarnation of the privileged male, who does not live in the same time or space of the female whom he has come to dominate in deed and in word. He evades Florentine, who must choose a happiness that is not the one of her dreams but rather one that, on a pragmatic level, will fulfill material needs and will allow her to care properly for her family. By marrying Emmanuel Létourneau, a soldier and idealist from a comfortable middle-class family, she hopes to achieve at least this level of contentment.

The original title, *Bonheur d'occasion*, bears more than one meaning. "Secondhand happiness" or "grab-bag happiness" would be approximate translations that render, particularly well, the nature of the "happiness" ultimately attained by Florentine. The English title refers to the tin flute that her young brother, Daniel, receives while in the hospital as he is dying from leukemia. This little instrument represents his own personal and ephemeral happiness.

## STREET OF RICHES

**First published:** *Rue Deschambault*, 1955  
(English translation, 1957)

**Type of work:** Short stories

*This semiautobiographical work retraces, through eighteen stories forming a whole, the psychological and intellectual development of a young girl growing up on Manitoba's prairies.*

*Street of Riches* is a semiautobiographical work, evoking childhood memories and experiences through a veil of fiction. The original title, which refers to Deschambault Street in Saint-Boniface, Roy's birthplace, serves to anchor the eighteen stories forming the work in a psychological topography traveled from early childhood to adolescence by the main character, Christine, whose narrative focus is continued in *The Road Past Altamont*.

For Roy, childhood is undeniably a magical time, filled with curiosity, discovery, hope, and nurturing. It is also the period to which adults return, following the cycle of life, which Christine herself comes to experience. It represents potential, growth, and learning, all of which define in later years the sensibilities and values of Roy's adult protagonist. The use of the first-person narrative reinforces the quest for truth and knowledge. "Know thyself": This is indeed what the young Christine attempts through interactions with her own inner being, with family members, as well as other individuals who loom large in her life.

In such pieces as "Petite Misère" ("Little Miss Misery"), "Mon Chapeau rose" ("My Pink Hat"), "Ma Coqueluche" ("My Whooping Cough"), and "Il s'en va gagner notre vie" ("To Earn My Living")

Christine poignantly retraces her personal development from the extremely sensitive little girl, who, nicknamed "Little Miss Misery" by her father, flees to the attic to escape this brutal name, to the young woman, heedful of the call to write, but who begins a teaching career to support herself and her mother. The wide-eyed curiosity that characterizes Christine's perception is a constant in this work. Roy captures admirably well and with a realism that astounds the reader the reactions, words, and inner thoughts of this delightful character.

"Les Bijoux" ("The Jewels") reinforces the search for identity associated with the evolution of the young girl to the mature woman. Aged fifteen in this story, Christine succumbs to the dazzling attraction of costume jewelry and other "adult" accoutrements (as Florentine does in *The Tin Flute*) before realizing the artificial nature of such decorations. Shedding this role, Christine contemplates leaving for Africa to nurse the lepers. Her values and personality are in metamorphosis, her identity not yet formed, but through her evolution Christine is unwavering in her apprenticeship of life, a process that affects her in permanent ways to be communicated in *The Road Past Altamont*. Despite the economic hardships evoked in *Street of Riches*, Christine and her family do enjoy, indeed, the richness of imagination, the closeness of family life, and a present that will be forever active in the creative process of the mature Christine, the writer.

## SUMMARY

Gabrielle Roy's vision of existence is evoked through fictionalized and semiautobiographical works that communicate an ardent desire to achieve fulfilling and open relationships between men and women, children and adults. The solitude and sometimes interior exile described in her works, however, is an existential constant, but it does not carry a bleak message. Rather, it incites the reader to reassess, as many of her characters do,

the importance of life in a collectivity and the power of individual desires in order to understand oneself better.

Kenneth W. Meadwell

## JUAN RULFO

**Born:** Barranca de Apulco, Sayula, Jalisco, Mexico  
May 16, 1918

**Died:** Mexico City, Mexico  
January 7, 1986

*Rulfo's fiction pioneers the techniques of modernism and Magical Realism to highlight the straitened conditions of Mexican Indians. In spare, poetic language he re-creates the harsh landscapes of his native Jalisco and the struggles of the people to survive against social injustice, illness, poverty, violence, and death.*

### BIOGRAPHY

Juan Rulfo (REWL-foh) was born in 1918 in Barranca de Apulco, a small town in the state of Jalisco, Mexico, and grew up in neighboring San Gabriel, a small town approximately three hundred miles northwest of Mexico City. Rulfo spent his entire life in various places in Mexico, including the cities of Guadalajara and Mexico City. The various locales and people of Mexico serve as the inspiration for Rulfo's most important work, the short-story collection, *El llano en llamas* (1953, revised 1970 and 1980; *The Burning Plain, and Other Stories*, 1967), and his influential novel, *Pedro Páramo* (1955, revised 1959, 1964, 1980; English translation, 1959, 1994).

Rulfo's early years were touched by family tragedy. His father, Juan Nepomuceno Perez Rulfo, was murdered during the Cristero Revolt, and his mother, Maria Vizaino Arias, died of a heart attack in 1927. Rulfo lived for a short time with his grandmother in Guadalajara, where he took advantage of her being the caretaker for the library of the local priest. He read voraciously in the collection of books, many of which were adventure stories, for which he developed a great fondness.

Rulfo was eventually sent to an orphanage in Guadalajara, where he studied accounting, and, at the age of fifteen, moved to Mexico City to study accounting, law, and literature at the university while

living with an uncle. Shortly thereafter, without completing a degree, Rulfo was compelled by financial necessity to take a job at the Mexican immigration department, where he worked for more than ten years. During World War II, as part of his responsibilities, he processed German and Italian prisoners from ships impounded in Mexican waters.

It was also during this time that Rulfo turned to writing. In the early 1940's he had published several short stories in provincial magazines near Guadalajara and began a novel, which he later destroyed. During his time at the immigration department, he became acquainted with Efrén Hernández, a coworker who was also an established short-story writer. Hernández inspired Rulfo to turn to writing in earnest and helped him develop his technique.

Rulfo left the immigration department to become a salesman for the B. F. Goodrich Company, where he worked from 1947 to 1954. He married Clara Aparicio in 1947, and the couple eventually had four children: Francisco, Pablo, Juan Carlos, and Claudia. During this time he received a fellowship from the Centro Mexicano de Escritores, which allowed him to complete and publish his short-story collection, *The Burning Plain, and Other Stories*, in 1953. Following critical acclaim, Rulfo received Rockefeller Foundation grants in 1953 and 1954, which allowed him to produce his highly influential novel, *Pedro Páramo*.

In the years following the publication of his novel, Rulfo worked for the Mexican government on a variety of development projects and became the director of the library archives at the Sociedad Mexicana de Geografía y Estadística in Mexico City in 1958. In 1959, Rulfo and his family moved to Guadalajara, where he handled the publicity for the state television station, Televisión.

In the next ten years Rulfo worked on the novel “El gallero” (the cockfighter), which, although it was never published, was made into a 1964 film *El gallo de oro* (*The Golden Cock*). Film versions of *Pedro Páramo* were also produced during this period. Rulfo continued work on another novel, “La cordillera” (the packtrain), which remained unfinished at the time of his death. One of Rulfo’s most successful projects during this time was a book of photographs of Mexico, *Inframundo: El México de Juan Rulfo* (1980; (*Inframundo: The Mexico of Juan Rulfo*, 1983). For a writer whose work deals so intimately with the Mexican landscape, this book chronicles both the settings that became important in Rulfo’s fiction and discusses the writing of *Pedro Páramo*.

In the later years of his life, Rulfo was awarded the Mexican prize, the Premio Nacional de Letras (1970); received the Spanish prize, the Príncipe de Asturias (1983); and was inducted into the Mexican Academy of Letters (1980). Rulfo died in Mexico City of a heart attack in 1986.

## ANALYSIS

From the time of Spanish colonialism until the present day, Mexico has been forced to deal with issues of social justice. Class struggles between large landowners and native Indian farmers over land ownership were the basis for revolutions in 1810, 1855, and 1910 and continue to be an issue of contention in Mexico. In the first half of the twentieth century, Mexican novelists such as Mariano Azuela and Martín Luis Guzmán highlighted these questions of social injustice and turned the novel into an instrument of social reform. Out of this background, in the 1940’s and 1950’s other Mexican writers used these social concerns as an implied background for their stories and turned their attentions to the individual stories of people affected by these conditions. Juan Rulfo is one of these writers.

Standing at the forefront of both modernism

and Magical Realism, Rulfo pioneered a new style of writing that turned the microscope on the everyday harsh realities of individuals. Both in his choice of subject and in his choices of style and narrative structure, Rulfo turned away from the explicit goals of social realism and turned toward the expression of a more interior reality conditioned by the harsh strictures of life, the torments of memory, and an everyday existence shaped by the concrete realities of the present and the myths and religious beliefs of the past.

Rulfo’s style and narrative structure in his two major works, *The Burning Plain* and *Pedro Páramo*, are striking. As in modernist poetry, his prose strips away nonessentials and relies upon dialogue and stunning visual imagery. In *Pedro Páramo*’s memories of his youth, the drops of rain moisten the roof tiles, shake the branches of the pomegranate tree, and awaken his memories of his love, Susana San Juan. In the short story “Nos han dado la tierra” (“They Gave Us the Land”), the men walk like insects across the parched and cracked land, featureless in the dust, almost becoming part of the dry landscape.

The most unusual feature of Rulfo’s brief novel *Pedro Páramo* is the use of disrupted narrative. The story begins in a fairly straightforward manner but rapidly becomes a series of brief vignettes that shift rapidly and often with little explicit transition to a series of stories spanning three generations of the town of Comala. Shadowy characters come and go, and sometimes the reader hears only voices. The reader eventually learns that all of the characters in the novel are dead, even the narrator Juan Preciado. The technique is reminiscent of other modernist works, such as T. S. Eliot’s *The Waste Land* (1922) or the novels of William Faulkner.

Rulfo is often credited with being a forerunner of the technique known as Magical Realism, a technique most associated with Colombian novelist Gabriel García Márquez. Magical Realism introduces surreal elements of fantasy in startling juxtaposition with realistic narrative. This technique in Rulfo, however, underscores the reality of the unreal in the minds of Rulfo’s characters. Miracles, myth, memory, and imagination are as real in the lives of Rulfo’s characters as are eating lunch or drawing water from the well. Partly this reflects the importance of ancient myth as a vital part of the lives of contemporary Mexican Indians, and partly

it reflects the strong tradition of Catholicism. Even though religion is often a negative and corrupting influence in Rulfo's work (witness the ineffectual and corrupt priest Father Rentería in *Pedro Páramo*), its traditions form an integral part of the lives of the people.

The lives of the characters in Rulfo's works are circumscribed by violence, poverty, death, and an unforgiving landscape. His characters struggle to survive, but they have little optimism. Women are subject to sexual predation and a lack of opportunity and power. Men are apt to become murderers or the victims of murderers and live lives where no amount of hard work can cause crops to spring from infertile soil or the rain to fall. One of Rulfo's particular concerns is the relationship between fathers and sons. The premise of *Pedro Páramo* is Juan Preciado's search for his father. Not only does he wish to meet his father, but he wishes to be acknowledged by him, to be validated. In *Pedro Páramo* he finds only a failed and corrupt father. Father Rentería, the spiritual father of Comala, also fails as a father, succumbing to the corruption of Pedro Páramo and failing to be absolved by the priest of the neighboring village. Rulfo's bleak, fatalistic, yet visually stunning portraits of the lives of the Mexican Indians of the inhospitable plains of central Mexico have made his work influential among other Latin American authors and, in translation, for readers throughout the world.

## THE BURNING PLAIN, AND OTHER STORIES

**First published:** *El llano en llamas, y otros cuentos*, 1953, revised 1970 and 1980 (English translation, 1967)

**Type of work:** Short stories

*These fifteen varied stories chronicle the harsh living conditions and threats of violence and death the Mexican Indians endure on the harsh plains of central Mexico.*

Juan Rulfo's collection *The Burning Plain, and Other Stories* contains a variety of short stories ranging from brief character sketches such as "Macario," an interior monologue by a mentally deficient boy;

to longer, more complex tales such as the title story, "El llano en llamas" ("The Burning Plain"), which follows the skirmishes of a band of revolutionaries led by Pedro Zamora; or the haunting but humorous "Anacleto Morones," in which a flock of women dressed in black descend upon the porch of the narrator to interrogate him about the death of Anacleto Morones. In one story, "Luvina," the narrator describes moving to the village of San Juan Luvina with his family to become the schoolteacher. He finds a dried-up town, where the old women flock like bats and nothing grows. This story in particular recalls the deserted town of Comala in Rulfo's novel *Pedro Páramo*.

Although the stories in the collection are varied in terms of length, point of view, and narrative method, certain common features emerge. Death is a constant in all of the stories. In "Talpa," a dying husband, his wife, and the husband's brother make a pilgrimage to a sacred site in hopes of a miraculous cure for the husband. The wife and the brother-in-law are in love, and they know full well that the husband will probably not survive the trip. In stories like "La cuesta de las camarades" ("The Hill of the Comadres"), "¡Díles que no me maten!" ("Tell Them Not to Kill Me!"), and "Anacleto Morones," men confess to murders and fully expect to be punished for their crimes. Death is commonplace in stories like "The Burning Plain" and "La noche que lo dejaron solo" ("The Night They Left Him Alone"), which are both set against a background of guerrilla skirmishes in revolutionary-era Mexico.

Women fare poorly in these stories. In "Es que somos muy pobres" ("We're Very Poor"), a twelve-year-old girl risks becoming as sexually promiscuous as her older sisters because the cow upon which her entire financial future rests has drowned in the river. Groups of old women dressed in black in "Luvina" and "Anacleto Morones" are described as sterile, harsh crones who avenge past sins.

Illness and poverty are common in many of the stories. Characters scratch out a meager living and

carry their burdens against unforgiving landscapes. Heat, dust, floods, and infertile soil keep people from escaping their harsh lives. Characters struggle to survive while at the same time succumbing to a kind of fatalism in which they fully expect that poverty, violence, and death are the usual state of affairs.

## PEDRO PÁRAMO

**First published:** 1955, revised 1959, 1964, 1980 (English translation, 1959, 1994)

**Type of work:** Novel

*Juan Preciado, searching for Pedro Páramo, the father he has never known, discovers a village haunted by the memories, secrets, and voices of the ghosts of its former residents.*

Juan Rulfo's novel *Pedro Páramo* stands at the forefront of Latin American works employing the techniques of modernism and Magical Realism. The novel begins in a straightforward fashion with a traveller, Juan Preciado, returning to the village of his mother's birth, Comala. At a fateful crossroads meeting, he encounters his half brother, Abundio Martínez, who serves as his guide as he descends into the village.

As Juan Preciado arrives in Comala, he finds a town totally at odds with his mother's recollections. Instead of the verdant, fertile town of her youth, he finds a deserted and rundown ghost town, whose scarce inhabitants lurk in the shadows and mumble mysterious comments. The novel rapidly becomes much more complex, introducing a series of plotlines in rapid, abruptly introduced vignettes that travel in and out of the minds of such characters as Pedro Páramo, Susana San Juan, Dorotea, Damiana, the village priest Father Rentéria, and Abundio Martínez, and back and forth across time.

The chronology of the story follows events in Comala from approximately 1880 to the Mexican Revolution in 1910 to the Cristero Revolt of 1926. The earliest events in the narrative describe the childhood and adolescence of Pedro Páramo, Juan Preciado's father, and his love for Susana San Juan. Pedro Páramo grows up in a prominent landowning family in Comala, which has fallen on hard

times as a result of the murder of Luis Páramo, Pedro's father. Pedro grows up to take control of the family through ruthless behavior, violence, and murder, restoring the fortunes and power of his family at the expense of the people of Comala. He routinely preys sexually upon the young women of the town and eventually marries Juan Preciado's mother, Dolores, as a means of seizing her land and wiping out the debt he owes her family. At the same time, however, he yearns for his lost love, Susana San Juan, who has moved away from Comala with her father and who has eventually married another man.

The narrative then follows the wild exploits of Miguel Páramo, the only one of his sons whom Pedro Páramo has ever acknowledged. Miguel sleeps with all of the virgins and young women of the town and roams the countryside at night on his chestnut stallion. One night the stallion returns home without him, and Miguel is found dead at the side of the road, having fallen from the horse.

The widowed Susana San Juan returns to Comala, where she marries Pedro Páramo. Susana declines into ill health and madness and dies, haunted by the memories of her life with her father and by her continuing love for her former husband. Shortly thereafter, a despondent Pedro Páramo and his housekeeper are murdered by Abundio Martínez. The town declines, along with the fortunes of the Páramo family, and lies deserted as Juan Preciado comes to search for his father.

This narrative chronology of *Pedro Páramo*, however, fails to capture the striking method by which these various plotlines unfold. Rulfo's brief novel begins simply and then rapidly disrupts both time and space. Bits and pieces of each story emerge through scenes that go back to Pedro's childhood and then forward to Juan Preciado's search. The voices of the primary characters blend with the multiple voices of the townspeople, the servants, and the local priest to build a story that forces a reconsideration of what is past and present, who is alive or dead, and where and when the events occur.

The most startling discovery of the novel is that all of the characters are dead, including the narrator Juan Preciado. Midway through the story readers learn that he is speaking from the depths of the grave, eavesdropping on the memories of the sleeping dead around him. Comala emerges as a liminal space between life and death, a kind of purgatory, where the rain awakens the dead and stirs their memories. They bemoan their past sins, try to justify the lives they lived, and futilely try to atone for their pasts. Life and death, sanity and madness, good and evil, innocence and oppression, reality and fantasy all play out in Rulfo's story of the generations of the Páramo family in the ghost town of Comala.

### SUMMARY

Although his output of work is small, Juan Rulfo produced two influential works, *The Burning Plain* and *Pedro Páramo*. Rulfo helped initiate the renaissance of Latin American literature by experimenting with techniques associated with European literary modernism and what would become Magical Realism. His portraits of the Mexican Indians of Jalisco come directly from the experiences of his early years growing up near San Gabriel and Guadalajara. Although the lives he depicts are rife with suffering and hopelessness, Rulfo combines rich experience, memory, and emotion into unique narratives told in sparse but poetic language.

Ann M. Cameron

## BIBLIOGRAPHY

### By the Author

#### LONG FICTION:

*Pedro Páramo*, 1955, revised 1959, 1964, 1980 (English translation, 1959, 1994)

#### SHORT FICTION:

*El llano en llamas*, 1953, revised 1970 and 1980 (*The Burning Plain, and Other Stories*, 1967)

#### SCREENPLAYS:

*El gallo de oro, y otros textos para cine*, 1980 (partial translation, "The Golden Cock," *Review* 46, 1992)

## DISCUSSION TOPICS

- Juan Rulfo's work is considered to be at the forefront of Latin American modernism and Magical Realism. Discuss Rulfo's use of such techniques as disrupted narrative and time sequences, surrealism, unreliable narrators, and fantasy in both *Pedro Páramo* and *The Burning Plain*.
- Rulfo's work is often set against sterile and bleak landscapes. Discuss how heat, drought, and dust are used to define characters' lives and actions.
- How does Rulfo view family relationships in his work? In particular, what kinds of relationships exist between fathers and sons?
- *Pedro Páramo* is set in a ghost town, where the inhabitants relate their stories in a series of scenes told out of chronological sequence. How does this choice affect the way you read the novel and your understanding of the separation between the living and the dead?
- Several of Rulfo's stories detail various political rebellions taking place in twentieth century Mexico. Research the background of political activism in Mexico and discuss how Rulfo's work chronicles concerns with class divisions and land ownership.
- Sort out the chronological sequence of the plot of *Pedro Páramo*.
- Rulfo is often credited with the ability to create stunning visual imagery through the use of poetic and concrete language. Identify examples of this type of language in *Pedro Páramo* and *The Burning Plain*.
- Rulfo's world is one of violence, vengeance, and pain. What characters are usually the victims of this violence, and how do they react to their suffering?

## SALMAN RUSHDIE

**Born:** Bombay, India  
June 19, 1947

*In a series of highly praised and controversial novels that combine fact and fantasy, history and myth, Rushdie has explored the nature of individual and collective identity and has become one of the foremost practitioners of the technique of Magical Realism.*

### BIOGRAPHY

Ahmed Salman Rushdie (ROOSH-dee) was born in Bombay, India, on June 19, 1947, two months before India gained its independence from the British, but the place and date that will forever be attached to his name are Tehran, Iran, February 14, 1989. On that Saint Valentine's Day, a writer whose persistent literary themes have been metamorphosis and exile found himself transformed into a target and underground man by Iran's Ayatollah Ruhollah Khomeini, who issued a fatwa sentencing him to death and encouraging all Muslim believers to find him and kill him.

Like Saleem Sinai, the hero of *Midnight's Children* (1981), Rushdie grew up in an upper-middle-class Muslim family in Bombay, the son of Anis Ahmed Rushdie and Negin Butt Rushdie. Salman and his three sisters were raised in the home described in *Midnight's Children*, and Sinai attended the same British-style school that Rushdie did. At fourteen, Rushdie was sent to England to continue his education at Rugby. Like Saladin Chamcha in *The Satanic Verses* (1988), he was made to feel like an outsider throughout his time at the school and learned to adopt the manners and accent of his peers as a protective mask. In 1964, he enrolled in King's College at Cambridge, where he studied history, read Western and Eastern literature, was involved in the college's theater productions, and earned his M.A. with honors in 1968.

While Rushdie was in England, his family had immigrated to Pakistan. After he was graduated, he purchased a one-way ticket to Karachi and joined his family in their new home, fully expecting to make his life there. Yet he immediately found himself in conflict with the Islamic authorities. A production of Edward Albee's *The Zoo Story* (pr., pb. 1959) that he put together for the government television station was censored because it contained the word "pork." An article that he wrote for a magazine on his first impressions of Pakistan met the same fate. Within the year, he went back to England to live. For a year or so, he worked as an actor in London. During the 1970's, he earned his living as an advertising copywriter and wrote fiction at night. In 1973, he completed his first published novel, *Grimus* (1975), which was variously described as a science-fiction tale, a fable, a fantasy, and a political satire.

In 1976, Rushdie married an English publishing executive, Clarissa Luard; they had a son, Zafar. Rushdie first gained international attention with the publication of his second novel, *Midnight's Children*, which won the prestigious Man Booker Prize in 1981, the James Tait Black Memorial Prize in 1982, and an award from the English-Speaking Union in 1981. The book's success allowed him to quit advertising and devote himself to his fiction full time. His next novel, *Shame* (1983), was also highly praised. Using a technique similar to that of Milan Kundera's novels, it mixes genres—memoir, political essay, history, autobiography, myth, and fiction—to present a multigenerational saga of modern Pakistan. It was nominated for the Man

Booker Prize and awarded the French Prix du Meilleur Livre Étranger.

While working on his fourth novel, Rushdie wrote *The Jaguar's Smile: A Nicaraguan Journey* (1987) and numerous essays and reviews for British and American periodicals. Collected in *Imaginary Homelands: Essays and Criticism, 1981-1991* (1991), these essays form an extraordinary intellectual autobiography. During the same period, Rushdie and his wife were divorced, he married the American writer Marianne Wiggins, and he and Wiggins became familiar figures on the London literary and social scene. *The Satanic Verses*, published in Britain in the fall of 1988, was also nominated for the Man Booker Prize and won the other major British publishing honor, the Whitbread Award.

Almost immediately, however, the book turned into an international incident. Because of episodes treating fictional versions of the prophet Muhammad and his wives in a way that many Muslims considered blasphemous, India and most Muslim countries banned it. Riots occurred in Pakistan and elsewhere, leaving dozens dead and hundreds injured; in Bradford, England, Muslims burned the novel and hung its author in effigy. After the ayatollah's fatwa, the novel and its author became the central figures in a worldwide debate about censorship and freedom of expression.

Rushdie issued a statement of regret from his place of hiding in an effort to pacify the Iranian mullahs; his statement was rejected, and, instead a \$5 million price was placed on his head. Bookstores in England and North America were threatened, several were bombed, and the major book chains all announced that they would no longer display or sell the novel. (Later, when the immediate crisis passed, they put it back on their shelves.) Eventually, many writers spoke in Rushdie's defense, pledging their solidarity and support.

Rushdie continued to write. He defended himself in three major essays published in 1990: "Is Nothing Sacred?," "In Good Faith," and "In God We Trust." In 1990, his fable *Haroun and the Sea of Stories* also appeared. Both an extraordinary children's story and a pointed allegory of his own situation, *Haroun and the Sea of Stories* demonstrated that its author's imagination and courage had not been destroyed by his isolation. In December, 1990, still in hiding, Rushdie again attempted to make peace with those who had sentenced him to death. After

his Japanese translator was assassinated and an attempt was made on the life of his Italian translator, he issued a statement embracing Islam and announcing that he had agreed to prohibit new translations or an English-language paperback edition of *The Satanic Verses*. Once again, his effort at reconciliation was rejected, and the Iranian government renewed its calls for his death.

A year later, Rushdie made a dramatic, unscheduled, and heavily guarded appearance at Columbia University in New York City. He withdrew his earlier decision and asked that an English-language paperback edition be published as soon as possible, so that the novel would be affordable and freely available. If the book is not read and studied, he argued, his years of forced seclusion would have no meaning. In February, 1992, three years after the ayatollah's fatwa, a consortium of publishers announced that they would issue a paperback edition of the book. No publisher was willing to risk issuing the book on its own. Later, it was published by the Penguin Group and has not gone out of print since.

After publishing a collection of stories, *East, West* (1994), Rushdie wrote four more novels. *The Moor's Last Sigh* (1995) is a variation on both *Midnight's Children* and *The Arabian Nights' Entertainments* (first transcribed, fifteenth century), which treats the triumph of nationalism, communal violence, and religious fundamentalism in India in apocalyptic terms. *The Ground Beneath Her Feet* (1999), one of his most popular works, is a reworking of the myth of Orpheus and Eurydice through the story of two Indian lovers who become international rock stars. *Fury* (2001), set in New York where Rushdie began living at the beginning of the decade, received the worst critical notices of his career. *Shalimar the Clown* (2005), on the other hand, was widely praised as a recovery of his novelistic powers.

As the decade of the 1990's progressed, Rushdie began to appear in public again, speaking frequently and becoming a regular participant in literary and cultural roundtables and conferences. A second collection of his reviews, essays, and speeches, *Step Across This Line: Collected Nonfiction, 1992-2002*, was published in 2002. Although some Islamic scholars argued that only the Ayatollah Khomeini could withdraw the fatwa—and he died the year after it was announced—in 1998 the Iranian government publicly disavowed the death

sentence. Rushdie then formally declared that he would stop living in hiding. In June, 2007, Queen Elizabeth II awarded Rushdie a knighthood, which again stirred up resentment against him in the Muslim world. New protests erupted in the streets of Iran, Pakistan, Iraq, and other Muslim countries; the Pakistani Parliament passed a resolution condemning the knighthood; and the leaders of twelve British Muslim groups wrote a letter describing it as “a deliberate provocation and insult to the 1.5 billion Muslims around the world.”

Rushdie’s numerous honors and awards have included the Austrian State Prize for European Literature, the Booker of Booker’s (awarded to *Midnight’s Children* as the most distinguished recipient in the first twenty-five years of the prize), the British Book Awards Author of the Year and Whitbread Awards for *The Moor’s Last Sigh*, and the Budapest Grand Prize for Literature.

### ANALYSIS

“Putting down roots in memory,” Rushdie wrote in *Grimus*, “is the natural condition of exile.” People in this position, he says elsewhere, “are haunted by some sense of loss, some urge to reclaim, to look back, even at the risk of being mutated into pillars of salt.” An exile suspects reality: “Having experienced several ways of being, he understands their illusory nature. To see things plainly, you have to cross a frontier.”

Since *Midnight’s Children*, Rushdie has become the voice of those who have crossed that frontier, of all the migrants, such as himself, who have been torn from their place, their language, and their social norms, and who have been forced to reshape and root themselves in a strange new world. He suggests the instability of their identities by giving his major characters more than one name and, often, uncertain parentage; a physical fall—from the sky in *Grimus* and *The Satanic Verses*, or from a bicycle in *Midnight’s Children*—is his recurring symbol of their loss of the firm footing of home and self. Since the self is, above all, a narrative—a construction of memory—each of his novels is built of the stories that characters tell to define themselves and their worlds. Yet like most products of memory, the stories that fill his novels are flawed, unreliable, skewed by the obsessions and blind spots of their tellers. In such stories, there can be no externally verifiable reality, so Rushdie’s novels cannot

be contained by the conventions of the realistic novel.

Instead, Rushdie’s books are a unique and fascinating blend of literary genres and religious and cultural traditions. To be true to his own sense of reality, his own layered consciousness, he has had to develop a novelistic form that allows him to bring together the widely disparate parts of his own experience—East and West; secular humanism and religious fundamentalism; sacred and profane; Hindu, Muslim, and Christian history and myths; First, Second, and Third Worlds; Bombay cinema and English television; India, Pakistan, and Great Britain. “We are here,” Rushdie has said, “and we’ve never left anyplace that we’ve been.” He once described the perspective that is required to capture this plural experience as “stereoscopic vision,” a vision that allows him to look simultaneously at two societies from both the inside and the outside.

This stereoscopic vision is supported by Rushdie’s spendthrift imagination. His is essentially an aesthetic of excess—of piling episode on episode, character on character, plot on plot, pun on pun, comic name on comic name, digression on digression. Mixing the narrative energy of *The Arabian Nights’ Entertainments*, the playfulness of Laurence Sterne’s *The Life and Opinions of Tristram Shandy, Gent.* (1759-1767), and the political and psychological ambition of Günter Grass’s *Die Blechtrommel* (1959; *The Tin Drum*, 1961), this aesthetic has provided Rushdie with the formal space that he needs to treat the multitude of subjects that press themselves upon him.

### MIDNIGHT’S CHILDREN

**First published:** 1981

**Type of work:** Novel

*This saga depicts modern India, told through the eyes of Saleem Sinai, a changeling born at the same moment as his country during the midnight hour of August 15, 1947.*

The central conceit of *Midnight’s Children* is that 1,001 children were born during the first hour of India’s independence, that all of them were born with magical powers, and that the extent of

the powers that they were given decreased as the hour unfolded. Two boys were born at the exact stroke of midnight, and they had the greatest powers of all. One of them, Saleem, is the novel's narrator; the other, Shiva, is his alter ego and nemesis. Saleem is the illegitimate child of a poor family; Shiva, the legitimate son of the wealthy Sinai family. Secretly switched at birth by a nurse-

maid in love with a man who opposed the caste system, they grow up with each other's names, living each other's lives.

"I had been mysteriously handcuffed to history, my destinies indissolubly chained to those of my country," Saleem says at the beginning of his tale. A self-consciously postmodern Scheherazade, Saleem relates the story of his ancestors and

his life to his housekeeper, Patma, over thirty-one Indian nights. In the process, he shares his version of sixty-four years of Indian history: the years under the British, Mahatma Gandhi's assassination, the religious and language riots following partition, the conflict between secular nationalism and religious fundamentalism, the wars between India and Pakistan, the birth of Bangladesh, the rise and fall of Sanjay Gandhi, and Indira Gandhi's "emergency." All these events and more tumble onto the page from his faulty memory, with dates jumbled and facts twisted into falsehoods.

Like Tristram Shandy, Saleem Sinai is not born until midway through the novel in which he tells his story. His most important feature is his nose. At age nine, Saleem learns that he has both the power to hear the voices and thoughts of others—including all the other children of midnight—and the power to transmit the thoughts of each to all the others, like a radio. His "antenna" is his long nose. How he suddenly learns that he has this power and how he loses it are two of the novel's most hilarious and inventive scenes.

Rushdie's treatment of Saleem's nose is a perfect example of his literary method and "stereoscopic vision." It is, first of all, outrageously comic and bawdy—as is so much in his fiction. In the

Western literary tradition, it connects Saleem to Pinocchio (thereby undermining Saleem's veracity), to author Nikolai Gogol (highlighting Saleem's monomania and calling his sanity into question), and to Cyrano de Bergerac (forecasting Saleem's fate in love). Yet it also links him to the elephant-headed god Ganesh in the Eastern literary and religious tradition. Ganesh is a comic figure, the patron deity of literature, and is supposed to have sat at the feet of the poet Valmiki to copy down the *Ramayana* (c. 350 B.C.E.) In the myths, Ganesh is both the child of the gods Shiva and Pavarti—names Rushdie assigns to other important characters in Saleem's story—and of uncertain parentage like Saleem. Thus, like so much in Rushdie's fiction, Saleem's nose functions on several levels at once: as a comic device, a plot element, and a literary and religious allusion to the several traditions that Rushdie sets out to blend in his work.

## THE SATANIC VERSES

**First published:** 1988

**Type of work:** Novel

*This exploration of good and evil, sacred and profane, faith and doubt, fiction and scripture, and home and exile is told through two actors who fall from the sky and land in England.*

*The Satanic Verses* begins with its two heroes falling to earth on New Year's Day after terrorists blow up the plane on which they were traveling to London. Is it any surprise that what follows is one of the most extraordinary novels ever written? Although it can be compared to the works of Jorge Luis Borges, Italo Calvino, Günter Grass, Gabriel García Márquez, and Vladimir Nabokov, only Salman Rushdie could have written it, and it stands as a compendium of all the themes and techniques of his career.

When they miraculously land on the English coast alive, Gibreel Farishta and Saladin Chamcha find that they have been reborn and transformed. Gibreel, an amoral Indian film star who has been known to play as many as fifty different gods in a single week in the Bombay cinema's theologicals, has lost his faith and had a breakdown but lands

with what appears to be a halo around his head. Saladin Chamcha, an actor who has rejected his Indian roots to become as English as possible, and who has achieved great success in London because he has the chameleon-like power to create exactly the right voice to advertise every product, lands and immediately begins to turn into a cloven-hoofed devil.

The novel that tells their story moves from London to India and the Middle East, from the time of Muhammad to the era of British prime minister Margaret Thatcher and the ayatollah, from the day's headlines to the farthest reaches of fantasy. Saladin becomes an outcast. He is rejected by his wife and friends, protected by the immigrants whom he had earlier despised, and transformed into their hope of revenge on the racism of the English before he returns home to India, reconciliation with his father, and a happy ending. Gibreel goes mad; imagines himself as both the Angel Gibreel and the Prophet Muhammad's scribe; rewrites the story of Muhammad, whom he calls by the derogatory medieval name of Mahound; and imagines another prophet, the young girl Ayesha, whom he leads to destruction. Along the way, both have love affairs, fantasies, memories, and adventures that keep the novel whirling like a dervish from one plot to another. As one critic said, *The Satanic Verses* is several of the best novels that Rushdie has written.

Islam prohibits images of Muhammad and holds the words of the Qur'an to be sacred. Early commentators have described an episode of *The Satanic Verses*, in which Muhammad was tempted to accept three local deities in order to win over the people to his new religion of Allah, then renounced the verses that permitted that as dictated by Satan rather than the Angel Gabriel. Modern Islam, however, has rejected this episode as apocryphal and blasphemous. By depicting his prophet as subject to human frailties and giving him an offensive name, by inventing a character who changes the words that the prophet dictates, thereby suggesting that the holy book may not be the sacred word of God, and by inventing an episode in which prostitutes assume the names of the wives of Muhammad in order to improve their business, Rushdie committed unforgivable acts of blasphemy in the eyes of true believers. His explanations that this work was one of fiction, that all the offending pas-

sages were the dreams and delusions of a god-obsessed madman, and that he was not a believer and so could not be a traitor to Islam all fell on deaf ears. The fact that Rushdie had also viciously satirized an exiled imam, who returned in triumph to his country to stop time and tyrannize the people, did not help his case.

Yet the novel deserves to be read as what it was intended to be. It is an exploration of the deepest religious and personal conflicts within its author and many others. It is an attempt to capture the sense of rootlessness and alienation that comes with the displacement and migration. It is, finally, an effort to encompass the extremes of contemporary experience in a form that would allow the freest possible range to its author's talent and imagination.

## SHALIMAR THE CLOWN

**First published:** 2005

**Type of work:** Novel

*Like The Satanic Verses, this novel is a transcontinental tale of worlds in collision. As much a fable for contemporary times as a novel, it also embodies the forces that shape and divide East and West in a gallery of extraordinary characters.*

At the center of *Shalimar the Clown* are Max Ophuls, "one of the architects of the postwar world," a charismatic, larger than life former hero of the French Resistance in World War II, the United States' ambassador to India, head of the American effort to support the mujahadeen during the Soviet Union's war in Afghanistan, and world-renowned power broker; Boonyi, the beautiful young Kashmiri dancer he seduces and abandons, who returns to her village in disgrace; Noman Sher Noman (alias Shalimar), Boonyi's childhood sweetheart and husband, who is transformed from a popular entertainer into a terrorist and murderer by their affair; and Max and Boonyi's illegitimate daughter, India, who is raised by Max and his wife and living in Los Angeles when the story begins. The typically rich and eccentric supporting cast includes Olga Volga ("the last surviving descendant of the legendary potato

witches of Astrakhan”), Firdaus Begum Noman (Shalimar’s mother, a snake sorceress), the “Iron Mullah” (a Muslim terrorist leader), Colonel Kachhwaha (leader of the Indian armed forces in Kashmir), a Gujar prophetess, a Filipino terrorist leader, and an Indian film star.

On the second page readers learn that “the ambassador was slaughtered on [India’s] doorstep like a halal chicken dinner, bleeding to death from a deep neck wound caused by a single slash of the assassin’s blade.” Over the

next 394 pages readers learn why, how, and by whom. To answer these questions, Rushdie takes his readers to Kashmir, the novel’s paradise lost, and the idyllic village of Pachigam, where Hindus, Muslims, and Jews have lived for centuries in peace; to the Indian army and Muslim terrorist camps, where the forces that will tear Kashmir and Pachigam

apart are trained, equipped, and ideologically indoctrinated; to World War II France, where the Resistance fights another occupying power through an insurgency of its own; and to polyglot Los Angeles, where race riots erupt in the streets.

“Everywhere was now a part of everywhere else,” Rushdie has his character, India, think. “Russia, America, London, Kashmir. Our lives, our stories, flowed into one another’s, were no longer our own,

individual, discrete. This unsettled people. There were collisions and explosions.” There are also murders, rapes, and decapitations; family curses and a flying man; love affairs and betrayals; media frenzies, a televised trial, a “sorcerer’s defense,” and a prison break; puns, pop culture references, and loving descriptions of Kashmiri culture; Magical Realism and vivid attention to the actualities of the distant and near-at-hand; and fiction, history, and fictional history. In other words, the mixture of comedy, seriousness of purpose, and multicultural imagination that are exactly what readers have come to expect from the fiction of Salman Rushdie.

### SUMMARY

“Once upon a time—it was and it was not so, as the old stories used to say, it happened and it never did—maybe, then, or maybe not.” With these words from *The Satanic Verses*, Salman Rushdie suggests what connects the ancient storytellers of the East with the contemporary Magical Realists of the West. Drawing on both traditions, he has written novels that consciously blur the dividing lines between fairy tale and novel, myth and fiction. Born at a moment of tremendous change, he has sought to capture and reflect the turmoil and dislocation of his times in his work, only to find himself their victim. His voice and vision are unique, and his novels and essays are important contributions to understanding the conflicts that permeate contemporary culture.

Bernard F. Rodgers, Jr.

## BIBLIOGRAPHY

### By the Author

#### LONG FICTION:

*Grimus*, 1975  
*Midnight's Children*, 1981  
*Shame*, 1983  
*The Satanic Verses*, 1988  
*Haroun and the Sea of Stories*, 1990 (fable)  
*The Moor's Last Sigh*, 1995  
*The Ground Beneath Her Feet*, 1999  
*Fury*, 2001  
*Shalimar the Clown*, 2005  
*The Enchantress of Florence*, 2008

#### SHORT FICTION:

*East, West: Stories*, 1994  
 "The Firebird's Nest," 1997  
 "Vina Divina," 1999

#### DRAMA:

*Midnight's Children*, 2002 (adaptation of his novel;  
 with Simon Reade and Tim Supple)

#### NONFICTION:

*The Jaguar Smile: A Nicaraguan Journey*, 1987  
*Imaginary Homelands: Essays and Criticism, 1981-1991*, 1991  
*The Wizard of Oz: A Short Text About Magic*, 1992  
*Conversations with Salman Rushdie*, 2000  
*Step Across This Line: Collected Nonfiction, 1992-2002*, 2002

## DISCUSSION TOPICS

- Exile involves the loss of "home." How is this loss experienced by some of the characters in Salman Rushdie's later fiction?
- Metamorphosis is also a constant subject, technique, and theme in Rushdie's fiction. Consider its importance in several of his novels.
- Read Rushdie's essay "Imaginary Homelands." How are the ideas it discusses reflected in his work?
- The controversy over *The Satanic Verses* raises fundamental questions about the responsibilities of both writers and readers. What are they?
- What is the role of history and/or politics in Rushdie's novels?
- What techniques does Rushdie use to express what he calls his "stereoscopic vision"?
- Rushdie loves word play, including puns, rhymes, and funny names. Discuss examples of this in his work.
- How does Rushdie balance comedy with the serious, even tragic, elements in his fiction?

# JOHN RUSKIN

**Born:** London, England  
February 8, 1819

**Died:** Coniston, Lancashire, England  
January 20, 1900

*Ruskin was the leading art and social critic of Victorian England. His writing, as well as his political and educational lectures, helped frame the taste of the British public during his lifetime, while his philosophy had an important impact on educational and social reform in the late nineteenth century.*

## BIOGRAPHY

John Ruskin was born in London, England, on February 8, 1819, the only child of John James Ruskin and Margaret Cox. His father was the only son of a bankrupt Edinburgh wine merchant who committed suicide. John James Ruskin had inherited his father's considerable debt and was forced to give up his interests in art and literature to embark upon a commercial career. He obtained a position selling wine for the London firm of George, Murphy & Company, where, through hard work and good fortune, he rose to a position of trust. His prospects brightened even more when he met the son of the Spanish, sherry-producing Domecq family, who were looking for a suitable outlet for selling the family's product in England. Not long thereafter, together with a silent partner, Henry Telford, who provided the capital for the venture, they founded the firm of Ruskin, Telford, and Domecq. The business prospered, and John James Ruskin thus established the fortune that would enable his son to be free from financial worry throughout his life.

Ruskin's mother was her husband's first cousin. Following the early death of her parents, she had been adopted by Ruskin's grandparents and grew up with her future husband in his Edinburgh home. She was a strongly evangelical Christian of intense religious opinions, who dominated her husband and ruled the family with the passionate conviction of her own rightness. Before the birth of her only child, she dedicated him to the service of God and determined to educate him for the ministry.

Following Ruskin's birth, the family moved to

Herne Hill, a suburb south of London, where his parents' extensive gardens, high above the Thames, provided an unobstructed view of the valley from Windsor to Greenwich. His earliest memories evoke the beauty and sense of natural wonder that this vista awakened in his heart.

He led a solitary life as a child, having been educated at home by tutors until his fourteenth year. He also engaged in daily Bible readings and study with his mother from the age of four to fourteen—a practice that had a significant effect upon his poetic and artistic imagination, as well as his literary style, which resonates with biblical cadences, reflecting his intensely emotional and spiritual fervor, as well as his prophetic zeal.

Both of Ruskin's parents were convinced of their son's genius and nurtured it jealously. As a boy, he was allowed few friends outside the family circle of cousins and the children of business associates. His knowledge of the world, however, was broadened by yearly family visits to places of outstanding historical or geographical interest, a practice that intensified Ruskin's lifelong interest in art, architecture, and geology.

In 1832, Telford gave Ruskin an illustrated volume by the Romantic poet Samuel Rogers, *Italy* (1822, 1828), illustrated by J. M. W. Turner, the great artist whose work was to play the primary formative influence in Ruskin's life. That and another illustrated literary work, Samuel Prout's *Facsimiles of Sketches Made in Flanders and Germany* (1833), inspired the Ruskin family to undertake their first continental European tour to observe at first hand some of the monuments described in them.

The family traveled from Dover to Calais and Brussels, up the Rhine to Strasbourg, across the Black Forest to Germany, Switzerland, and the Italian lake district. From there, they returned to Geneva and continued on to England by way of Chamonix, Lyons, and Dijon. Out of this initial family trek arose Ruskin's lifelong admiration for medieval architecture, the romantic vistas of Switzerland, and the French and Italian Alps.

In 1837, Ruskin entered Oxford, matriculating at Christ Church, as a gentleman-commoner, a distinction usually enjoyed only by the sons of the nobility or landed gentry. Although he lived in college, his mother accompanied him to the city, insisting that Ruskin take tea with her every afternoon, as well as dinner on weekends, an event for which his father commuted from Herne Hill. Thus, Ruskin was surrounded by his family at an age when most young men were escaping the parental yoke. Nevertheless, he applied himself assiduously to his studies in his effort to win prizes to do his parents the honor that he believed was their due. Gradually, he became a respected presence at Oxford, and in his fourth year he received the Newdigate Prize in poetry, an honor that resulted in his meeting the poet laureate of England, his boyhood idol, William Wordsworth, who was awarded an honorary degree at the same ceremony.

In 1840, he developed tuberculosis, which caused him to leave Oxford without his degree. He spent the next two years traveling, spending several months in Rome. By 1842, Ruskin had abandoned the idea of entering the ministry and moved with his family to Denmark Hill, a manorial estate outside London, where he wrote the first volume of *Modern Painters* (1843-1860), the work that established him throughout Europe as a new voice in a new discipline—art history.

Having turned twenty-one, Ruskin began amassing the art collection that foreshadowed the direction of taste and style in Great Britain and elsewhere. That year, he had received Turner's *Winchelsea* as a gift from his father. By 1844, he added the artist's *Slave Ship* to his collection. Meanwhile, his contributions to such periodicals and journals as *The Quarterly Review* continued, and in 1845 he made his first visit to the Continent unaccompanied by his parents. He was then twenty-six years old.

The next year, he published the second volume of *Modern Painters*. In 1848, he married Euphemia Chalmers ("Effie") Gray, the daughter of friends of his parents, whom he had known for several years. Their relationship was not a happy one. The marriage was never consummated and was annulled in 1854. Prior to the annulment of his marriage, Ruskin devoted himself to the study of architecture. He spent the winters of 1849 through 1852 with Effie in Venice gathering material for *The Stones of Venice* (1851-1853). During this period, he also published his defense of the Pre-Raphaelite Brotherhood in a pamphlet, which succeeded in transforming public opinion about the group's artistic merit. At this time, also, he began his career as arbiter of taste and conscience for the British public, as he turned his studies and his philosophy of art upon the need for educational and social reform. For the next twenty years, his primary concern was the welfare of his country and the means necessary to obtain it.

In 1858, Ruskin's personal life underwent yet another disastrous relationship of the heart when he met the daughter of a wealthy Irish family of French Huguenot descent, Rose La Touche, with whom he fell hopelessly in love. At the time, she was ten years of age and he was thirty-nine. Their relationship was certainly one of the spirit and apparently mutual for all of its seemingly pathological aspects. Ruskin did not reveal the nature of his feelings to Miss La Touche until she was nearly eighteen, when he formally proposed marriage to her. She promised him an answer upon her twenty-first birthday. There followed a break in their relationship, and in the late 1860's, Miss La Touche experienced a long series of physical and mental disorders, which resulted in her death at twenty-six. Meanwhile, Ruskin's career continued in its chosen paths, and in 1870 he was appointed Slade Professor of Fine Art at Oxford. The following year, he purchased Brantwood, a large country estate at Coniston, in the Lake District, where he was to spend the better part of his remaining years.

In 1877, he attacked the American artist James McNeill Whistler in a review of the artist's work. Whistler responded with a libel suit, the results of which amounted to a landmark in modern art history. The artist won his case and was awarded damages of one farthing. Nevertheless, the outcome

resulted in Ruskin's resigning from the Slade professorship at Oxford in 1879, only because he believed that his position impeded him from the ability to express his critical beliefs fully and without fear of public censure or civil action.

The 1880's were marked by intense creative and academic activity on Ruskin's part. In 1883, he was reelected to the Slade professorship at Oxford and delivered a series of lectures, published in one volume as *The Art of England* in 1883-1884. In 1885, he began his last great work, *Praeterita* (1885-1889), his memoirs, an endeavor that occupied the remaining years of his creative life. In 1888, he made his final continental trip, during the course of which he suffered a mental breakdown, from which he never recovered. The last twelve years of his life were spent at Brantwood in total seclusion. He died on January 20, 1900, in the Lake District in Conistone, England, where he is buried.

#### ANALYSIS

Ruskin's principal literary and philosophical focus during his fifty-year-long career centered upon the examination of the moral significance of the function of art and the role of the artist in society. He first expressed that focus at the beginning of his career while at Oxford, when he came most directly under the influence of the artist J. M. W. Turner. Turner's landscape painting at that time remained virtually unknown to the general public and unappreciated by all who were aware of it except for a small circle of admirers and patrons who recognized his genius. Ruskin was among that circle, young as he was, and had already begun collecting Turner drawings following his meeting with the artist during Ruskin's third year at Oxford. When Turner's landscape paintings began to receive hostile commentary because of their impressionistic innovations in such respected London literary journals of the day as the *Literary Gazette* and the *Athenaeum*, such attacks provoked the young Ruskin to set the public right about the true genius of his hero and the true nature and function of art. That he did in the first volume of *Modern Painters*, a work over which he labored for nearly three years before his father, acting on his behalf, submitted it for publication. Appearing under the title *Modern Painters: Their Superiority in the Art of Landscape Painting to All the Ancient Masters Proved by Examples of the True, the Beautiful, and the Intellectual, from the Works*

*of Modern Artists, Especially from Those of J. M. W. Turner, Esq. R. A.*, it was published anonymously because both Ruskin and his father feared that exposure of the author's age would detract from the seriousness with which it would be received by the public. Very early in this work, Ruskin reveals his philosophy of art, from which he would never deviate, and which forms the basis of all of his other work and theory. Simply stated, this philosophy avows that a work of art can be judged only according to the values of the artist that are reflected in it.

Ruskin's interest in helping to shape the way in which art and the world of nature would be perceived by his compatriots predated the publication of this seminal work and can be seen, already, in his first serious effort at critical analysis in "The Poetry of Architecture," which appeared in *The Architectural Magazine* in 1837 and 1838 under the pseudonym "According to Nature." There, he expresses his desire to have a positive influence upon the transformation of a materialistic, poorly educated, increasingly industrial, and, therefore, increasingly economically polarized population into a nation that is at once moral and sensible to the beauties of the natural world, as well as the world of individual craftsmanship and personal virtue.

The essay compares the architecture of English and French cottages as they reveal the idiosyncratic nature of the national character of the individuals who inhabit them, with the edge in this comparison definitely falling upon the more meritorious values of the English architects. Finally, the essay examines the ideal that was to become the ultimate goal of Ruskin's lifelong mission: the formation of taste, his parallel commitment to the ideals of Truth and Beauty, as William Wordsworth and John Keats would have interpreted these ideals, an aim that he imparts with evangelical zeal in the preface to volume 1 of *Modern Painters*.

The harmonious connection that Ruskin saw between Virtue, Truth, Beauty, and their expression in great art represents the cornerstone upon which all of his prolific, voluminous examinations of art, history, and literature would rest for the remainder of his life. It is clearly reiterated in one of his public Oxford lectures given during the 1870's, where he once again defines the nexus that exists between the one and the other:

You must have the right moral state first, or you cannot have the art. But when the art is once obtained, its reflected action enhances and completes the moral state out of which it arose, and, above all, communicates the exultation to other minds which are already morally capable of the like.

As Ruskin moved on from the brilliant beginnings of his career as moral arbiter and architect of a nation's taste, his purpose and promise never swerved but increased in recognition until the final decade of his life, when he succumbed to the debilitating pathological depression that prevented him from writing all but the briefest notes to his closest friends and companions. Beginning in the 1860's, he traded the more cloistered audience of the literary and art journals and the private society of a privileged, intellectually attuned, largely academic circle of friends for that of the public lecture platform. There, he transformed a theory of art and culture into a social and political philosophy rooted in the ethical and spiritual teachings of Jesus Christ and coupled with an abiding belief in the ability of human society to be transformed into a paradise of working men and women freed from the tyranny of industrial exploitation and avarice.

During these years, he became a journalist through his workers' newsletter, *Fors Clavigera*, as well as a lecturer and teacher of art in the Workmen's College experiment that transformed British higher education by opening it to laborers and the children of the working class. The thrust of this popularization of his ideals and ideas can be seen flourishing today in ecological and environmental circles throughout the world.

## MODERN PAINTERS

**First published:** 1843-1860

**Type of work:** Art history and criticism

*The greatness of a work of art is measured by its careful observation of the moral and spiritual superiority of the natural or real world over the mechanical.*

*Modern Painters* is the work that gained for Ruskin the recognition of the English world of let-

ters and creativity. Published in 1843, when Ruskin was twenty-four, it represents the young Oxford graduate's defense of his spiritual and intellectual mentor, J. M. W. Turner, the great English Romantic landscape painter, against the adversarial criticisms of the British intellectual press. Although Turner was an associate of the Royal Academy of Art, he was principally noted for his illustrations of such famous British authors as Lord Byron and Sir Walter Scott. The work goes far beyond Ruskin's expressed aim, however, as it expresses in its earliest and most seminal form the author's philosophy of art and his most profound spiritual and moral philosophies of life. This philosophy is, perhaps, best expressed in his perception that the appreciation and ability to transform such appreciation into full-blown artistic fruition depends upon a physical sensibility that can aesthetically and truthfully evaluate the physical attributes of beauty and truth and transform them, honestly, upon canvas into a higher expression of the spiritual significance of the natural.

Of all the ideas that art seeks to communicate, Ruskin states—ideas of imitation, of relation, of power, of beauty, and of truth—ideas of truth are of the highest value. Truth, however, is not necessarily easily perceived or, indeed, necessarily perceived at first glance. Thus, when a painting appears to deviate from the representational, it does not necessarily deviate from the truth. Similarly, in art, all truths do not necessarily have the same importance. Thus, for the great artist, only rare and particular truths are worth transmitting. This transmission, moreover, must be accompanied by a true love of subject; otherwise, the artist will in no way surpass the product of a superior photographer. Truth transcends mere representation.

Ruskin then goes on to demonstrate with painstaking detail that with regard to truth of comprehension and passion of execution of all modern painters, Turner is without peer. Indeed, Ruskin states with passionate conviction, "In every new insight which we obtain into the works of God, in every new idea which we receive from his creation, we shall find ourselves possessed of an interpretation and a guide to something in Turner's work which we had not understood before."

The second volume of *Modern Painters* focuses upon the definition and interpretation of the physical, spiritual, and intellectual aspects and impact

of the Beautiful. Stylistically, it is the most Romantic in intensity and outlook of all Ruskin's writing. For him, art represents the summary of all human endeavor—the apex of all that is humanly achievable. As he sees it, poets and mystics have always expressed the inseparable emotions of gratitude and wonder that come from a heightened perception of the natural world—and it is these emotions, in one form or another, that true art always seeks to express. Thus, he sees the deliberate pursuit and contemplation of beauty as humanity's noblest gift, employing the highest faculties and spiritual, as well as moral, endowments of which humanity is capable.

Ruskin then goes on to distinguish between the theoretical faculty employed in the contemplation of the Beautiful and the aesthetic faculty, which he interprets as that which merely perceives and interprets the natural world by means of the senses. The latter, when working alone, is entirely objective. When combined with the theoretical faculty, however, and including the wholly positive and wholly human qualities of joy, admiration, love, and gratitude, it welds to form the necessary genius and desire to inspire and create art.

To achieve the theoretical state whereby one can appreciate the natural world and interpret it through the creation of inspired works of art demands, Ruskin submits, discipline, earnestness, love, and selflessness. In this happy combination arises the creation of true and lasting taste. Such a state, however, he elaborates,

cannot be cramped in its conclusions by partialities and hypocrisies: its visions and its delights are too penetrating, too living, for any whitewashed object or shallow fountain long to endure or supply. It clasps all that it loves so hard, that it crushes it if it be hollow.

This precept is followed by an analysis of the multiple aspects of Beauty and Ruskin's proposition that great art is concerned with either the direct representation or the imaginative metamorphosis of Truth, while bad art is neither truly imaginative nor even accurate in its representation of Nature. He goes on to spell out the intellectual and spiritual attributes necessary for identifying Truth and for distinguishing what is true from what is false. True taste, he submits, pierces to the Truth

and finds Beauty everywhere. Beauty, he posits, can be “felt and found in every human heart and countenance,—to be loved in every roadside weed and moss-grown wall.”

Volumes 3, 4, and 5 of *Modern Painters* were published between 1854 and 1860 and continue Ruskin's literary and critical monument to Turner's eminence, even as they identify the criteria—the philosophical and intellectual foundations—for Ruskin's aesthetic theory.

In volume 3, he defines the laws that govern painting. To be skilled in the evaluation of a work of art requires the kind of study and discipline necessary to embark upon the theory and practice of science. A responsible critic must be familiar with the history and sociological periods of the era of the artist whose work he or she judges. Critics must, as well, be familiar with the religious and spiritual attributes of the age in question, careful, scientific observers of Nature, and conversant with such sciences as optics, physics, botany, geology, geometry, and anatomy. What this volume gives Ruskin the opportunity of doing is to display the remarkable qualifications that he himself possesses with respect to such criteria. Ruskin at the same time reveals his own great literary skills, which approach in their fervor the kind of Romantic zeal and love of nature that one encounters in the poetry of Wordsworth and Keats. This passion he sustains throughout the ensuing works, where his attention falls upon the assessment of those other painters who fall short of, or approach, his beloved Turner in their greatness.

## THE STONES OF VENICE

**First published:** 1851-1853

**Type of work:** Architectural criticism

*The apogee of human artistry occurs in medieval Venice in its execution of the Venetian Gothic, which perfectly expresses the philosophy, purpose, and ethos of humanity working in a state of inspired and communal excellence.*

*The Stones of Venice* ranks with *Modern Painters* as Ruskin's most important work. Of all of his extensive literary output, it was the most influential in his own time and upon the generation of artists imme-

diately following his own. It was, however, in no way the most popular of his works. Its primary influence can be observed in Victorian architecture, where it led to the introduction and popularization of the Venetian Gothic in domestic building. In the realm of ideas, it inspired William Morris's visionary social and economic theories of art and artisanship and had a direct impact upon the development of the Arts and Crafts movement and the historic preservation and wilderness movements in the United States.

This impact was one with which Ruskin himself was not particularly happy, as he saw the misinterpretation of his ideals leading to a proliferation of middle-class villas and public houses throughout the British Isles. Nevertheless, for the author, at any rate, Venetian Gothic represents the architectural ideal—satisfying all the necessary elements that he believed constitute the creation of art. His examination of architecture's constituent elements in *The Stones of Venice*, both as a practical work and as a philosophical treatise on the spirit and the strength of the past, is without peer in the literature of Great Britain in the age of Queen Victoria.

For Ruskin, Venetian Gothic represents the architectural ideal because it was practical, outwardly pleasing, and harmonious and expressed nobly the emotions of its builders and the historical impact of their race. It is honestly constructed and embellished with all the grace and vitality of painting and sculpture in the most economical manner possible.

Ruskin contrasts the ideal manifestations of the Gothic with what he delineates as the decadence of the classic and Renaissance schools of architecture, which he saw as devoid of this vitality and spirit. The Renaissance is imitative and artificial in its architectural contrivances. The Gothic is natural and spontaneous in its honesty and ingenuity. It represents, as well, the product of a community of workers and artisans united in a common goal of adorning their city with grace, fellowship, and, most important, human emotions—joy.

Ruskin then goes on to analyze the significance of this conscious participation in a fellowship of spirit and production and to compare it with the building of a society or development of culture in which these elements are missing. Spontaneity of expression and execution, he submits, is essential for the production of a noble architecture. In contemporary building, this element is particularly missing, or, where not entirely missing, has been reduced to the level of a mechanical and sterile manufacture. Rather than ennobling the workers engaged in such production, their labor renders them more robotic and enslaved than the most servile vassal of the Middle Ages. Such reduction of spirit in modern times, Ruskin suggests, is the germinating force behind the revolutions against wealth and nobility that were then sweeping Europe.

The remainder of volume 1 of *The Stones of Venice* elucidates Ruskin's fundamental philosophy of art and of human existence. This philosophy, simply stated, hinges upon the importance for control of the means of production from start to finish by the team that is in control of the entire work, in contrast to the growing modern practice of the intensive division of labor. The latter separates both individual and team member from even the consciousness of that on which he or she is working, "so that all the little piece of intelligence that is left in a man is not enough to make a pin or a nail, but exhausts itself in making the point of a pin or the head of a nail."

He goes on to belittle the modern ideal of mechanical perfection or sameness, which had its beginnings in classical Greece and emerged once again in the Renaissance with its slavish devotion to the classical past. In contrast, he praises the beauties inherent in human imperfection. It is the absence of this sameness in Gothic architecture that renders it wholly satisfying and ingenious. This delight in the richness of Gothic architecture leads Ruskin finally to his highest encomium of the inspired craftsmanship and joy in invention and design for its own sake that is inherent in his concept of the artist and his or her function in society. Human artistry reached its zenith in the Middle Ages, Ruskin proposes, in its creation of Gothic architecture, which in its childishness and naïveté contains all that is joyful and joyous in the human experience.

Volumes 2 and 3 of *The Stones of Venice* con-

tinue the author's examination of every architectural nook and cranny of the Venetian republic, and the three volumes together created a stir that caused a profoundly negative reaction from the assailed architectural profession of the day. On the other hand, this work, more than any other, served to inspire the younger artists of his day, most notably William Morris and Edward Burne-Jones. With a missionary fervor, Ruskin's principles were adapted throughout the British Isles and the United States. They became the vehicle whereby the values of pride in workmanship and community joint craftsmanship, threatened by the onslaught of industry in its exploitation and mechanization of individual merit and its corresponding debasement of human endeavor, truth, and beauty were conveyed to present-day society.

## SUMMARY

John Ruskin's literary contributions go far beyond that of most of his very eminent Victorian contemporaries, such as John Henry Newman and T. H. Huxley. Stylistically brilliant, a teacher and philosopher by birth, he translated his love of Truth and Beauty and his strong Christian principles into a social theory that attempted to go the extra step necessary to achieve the Kingdom of God for all classes of society on earth. His art criticism, his political and social commentary, and his public lectures all contributed to the dissemination of that theory, which now, more than ever, continues to ring true.

Barbara Miliaras

## DISCUSSION TOPICS

- Defend or attack John Ruskin's assertion that "you must have the right moral state first, or you cannot have the art."
- According to Ruskin, what is the relationship between poetry and visual art?
- Discuss the influence of *The Stones of Venice* on William Morris.
- Compare the philosophies of art of Ruskin and Walter Pater.
- Has Ruskin had any serious influence on artists or architects in the last several decades?
- Ruskin is considered one of the great Victorian prose writers. Determine some of the characteristics of his style.

## NELLY SACHS

**Born:** Berlin, Germany  
December 10, 1891

**Died:** Stockholm, Sweden  
May 12, 1970

*Primarily a lyric poet, Sachs wrote in reaction to the Holocaust and evolved a transcendent vision that humanity is an integral part of a continuous, self-renewing cosmos.*

### BIOGRAPHY

In almost eighty years, Nelly Sachs (saks) moved from affluence to poverty, from her native Germany to exile in Sweden, and from obscurity to fame. On her seventy-fifth birthday, in 1966, frail but radiant, she received the Nobel Prize in Literature.

The only child of Jewish businessman Georg William Sachs and his young wife, Margarete (née Karger) Sachs, Nelly grew up surrounded by loving adults: her parents, maternal grandmother, and great-grandmother. They lived in richly furnished apartments, with gardens large enough for Nelly to have a roe deer, goats, and dogs as pets. In the evenings, her father played the piano and she danced to the music.

Sachs's emotional suffering first manifested itself when she was seventeen. A brief romantic involvement with a man she never named precipitated anorexia that required her to be hospitalized for more than two years. Her attending psychiatrist, Dr. Richard Cassirer, restored her to health by encouraging her creative writing.

Sachs then returned to the shelter of her parents' home. She began corresponding with the 1909 Nobel laureate, Swedish author Selma Lagerlöf. In 1921, Sachs's first book was published, *Legenden und Erzählungen* (legends and stories). It was a rare

attempt at prose and shows clearly the influence of other authors. Sachs had not yet found her poetic voice.

Sachs's father died of cancer in 1930. Around this time, her interest in German Romanticism led her to Professor Max Herrmann and to new friends in his circle. These contacts were to save her life. Two friends from this circle, Gudrun Harlan and Vera Lachman, were instrumental in the Sachs's escape from Germany.

Like many assimilated Jews, Sachs and her mother reacted to initial reports of Nazi persecution with disbelief. Only after the pogrom in November, 1938, did Nelly write to Lagerlöf to ask for help. Gudrun Harlan, who was not Jewish, traveled to Sweden and obtained a one-sentence request from the ailing Lagerlöf that Nelly Sachs be allowed to come to Sweden. Since Sweden was permitting entry only for purposes of transit, Vera Lachman, who had escaped to the United States, obtained affidavits for the Sachs's. In mid-May, 1940, Sachs received an order to report to a German work camp. At the same time, the Swedish embassy finally had all the necessary papers for her. On the advice of a Gestapo officer, she tore up the German order, exchanged train tickets for plane tickets, and escaped with her mother on one of the last passenger flights out of Berlin.

Before leaving Germany, Sachs apparently again encountered the man with whom she had fallen in love as a seventeen-year-old. She states only that he was not Jewish, was a resistance fighter, and was martyred by the Nazis. Traumatized by his death and the horror of concentration camps,

Sachs again began to write, and in her fifties, in exile, became the voice of all who suffered in Germany. Disregarding her earlier, epigonic work, she considered herself at the beginning of her literary career. Her first volumes of poetry appeared soon after the war, *In den Wohnungen des Todes* (1946; in the habitations of death) and *Sternverdunkelung* (1949; eclipse of stars).

In 1950, Sachs's mother died on her father's birthday, and Nelly suffered a nervous breakdown. In 1951, she published her first drama, *Eli: Ein Mysterienspiel vom Leiden Israels* (*Eli: A Mystery Play of the Sufferings of Israel*, 1967). *Eli* was her only dramatic work that was successful on stage. Later efforts in the genre combined many art forms and resisted production.

Sachs reached the peak of her poetic career in the 1950's with *Und niemand weiss weiter* (1957; and no one knows how to go on) and *Flucht und Verwandlung* (1959; flight and metamorphosis). She attracted the attention of other German writers and was lauded by perceptive critics. She received many prizes for literature, and some of her work was set to music. Unfortunately, it was composer Moses Pergament's 1959 operatic version of *Eli* that caused Sachs a severe nervous breakdown. She felt her work had been misunderstood, and she spent 1960 to 1963 in a psychiatric hospital. *Fahrt ins Staublose* (1961; journey into a dustless realm) includes the collection *Noch feiert Tod das Leben* (1961; death still celebrates life), which draws specifically on her hospital experience.

Sachs's last poetry, *Glühende Rätsel* (1964-1966; glowing enigmas) and the cycle *Die Suchende* (1966; the seekers), lacks the flow and continuity of the earlier poetry. Sachs was plagued by ill health in her declining years. She had a heart attack in 1967, another nervous breakdown in 1968, and a major operation for cancer in 1969. After dying in 1970, she was buried in the Jewish cemetery in Stockholm, behind her mother's grave and her father's urn, which she had arranged to be brought from Germany.

## ANALYSIS

It was Nelly Sachs's good fortune that in 1944 several of her poems were sent for assessment to Walter A. Berendsohn, who became a tireless champion of her work. On Berendsohn's recommendation, Hans Magnus Enzensberger, editor in

chief of Suhrkamp, the prominent German publishing house, in 1961 undertook the publication of Sachs's entire work with ten thousand copies of each volume. This edition in turn paved the way for Berendsohn's successful recommendation of Sachs for the Nobel Prize in 1966. Of pivotal importance in that recommendation was his praise for *Eli*, the short play that Sachs wrote during the winter of 1943-1944.

The point of departure for the events of the play is not shown on stage but is narrated. *Eli*, a Jewish boy, is playing his pipe when he is struck down by a soldier and killed. The action of the play consists of the search for *Eli*'s murderer, who crumbles when confronted with the facts. Berendsohn interpreted *Eli* as a monumental work because of Sachs's trifold treatment of the fate of Israel. She shows individual suffering during the Third Reich, new beginnings in the form of repairs and children playing, and most important, the collective consciousness of the people. This consciousness reached its external manifestation in the state of Israel, founded in 1948. Berendsohn's analysis is so persuasive that the play itself comes almost as a letdown in comparison. Most critics see Sachs's strength in her poetry, a judgment reflected in the selection of her works for English translation in the two large volumes *Of the Chimneys* (1967) and *The Seeker, and Other Poems* (1970).

Like much twentieth century poetry, Sachs's poetry is without rhyme or regular meter. Stanza length varies, following the dictates of content. One easily recognizable rhetorical device in Sachs's poetry is her repetition of words, phrases, or whole sentences. Her poems are rhythmically alive and demonstrate a rare mastery of language. The German poet Hilda Domin ranks Sachs's poems among the best in the German language. An assessment by author Stefan Zweig in the 1930's is also applicable to Sachs's entire oeuvre. Zweig was sent two of her poems by a friend, and he replied that her poetry showed an "ecstatically rising line." That is an astounding description for a poet who was to find her main theme in the Holocaust, in excesses of human cruelty and depravity, and in the attempted extermination of her people.

One has only to read a little of Sachs's work, though, to discover that she did not consider death in this world to be an absolute end. When reduced to dust, or ashes, people return to the elemental re-

serve from which life will spring again. Furthermore, Sachs, in her work, demonstrates the belief that there is continual recombination of the same elements. The race sprang from Abraham and will continue until the end of time. All the Nazis accomplished by drastically accelerating the deaths of six million Jews was a slight alteration in a phase of the twentieth century, a ripple in the sand of renewal. In death, Sachs argues in her work, life begins.

Sachs's transcendent view of life is not derived from any specific religious doctrine, either Jewish or Christian, but is an eclectic combination of ideas from diverse sources that were meaningful to her. Every mystic finds his or her own way to God. Sachs read widely, but not systematically. She was versed in some books of the Bible and not in others. The German mystics Meister Eckehart and Jakob Böhme exerted a strong influence on Sachs. So too did Kabbalism, the esoteric medieval symbol system based on Hebrew scriptures. For example, some of Sachs's most powerful imagery, that of sand, fin, and wing, may be traced to the concept in Jewish mysticism of the soul in exile rising through increasingly higher forms of existence. Recurrent images or motifs in Sachs's work deserve close analysis.

Each of Sachs's images appears in various forms and means different things in different contexts. The cumulative effect, as the composite picture gets increasingly complex, is that a word suffices to conjure up a wealth of associations, and the reader who is familiar with Sachs's entire work will find individual poems accessible in a way that, on their own, they are not. Her entire body of work is self-referential, giving credence to the frequently reiterated critical opinion that Sachs wrote only one poem, with many component parts.

Sand, ashes, and particles of smoke have the same functional significance. They are perhaps Sachs's most startling images because in these, the most inanimate objects, she sees the wellspring of rebirth. It is smoke rising from concentration camp crematoriums, it is the sand of Sinai containing the continuing history of the Jews, it is the sand of the hourglass, and it is desert sand from which oases spring.

Fish imagery in Sachs's poetry is associated almost exclusively with the suffering of living creatures, suffering inflicted by humanity. In some poems, Sachs identifies with the fish and employs

vivid images of its torn and bleeding gills, empathizing with it in its dying moments. At the same time, there is a sense of the inevitability of its fate, of overwhelming sorrow that this must be so, and recognition that the fish is a symbol for Christ.

Butterflies are Sachs's favorite image for the precious, fragile, ephemeral aspects of human nature. They are innocent children, the future in which Sachs placed her hope. Their delicacy and vulnerability is also a reflection of her own delicacy and vulnerability. A sensitive woman, alone, in exile, she often felt crushed by the brutal forces of the world.

Sachs's poetry was written at night, a time when she found release from preoccupying thoughts. Her poetry may be grouped by three periods. The first, that of the 1940's, deals directly with the Holocaust. The second, that of the 1950's, is more personal. The third, that of the 1960's, approaches the great enigmas of life to which there are no answers. One representative poem from each period is discussed below.

### "WHEN IN EARLY SUMMER"

**First published:** "Wenn im Vorsommer,"  
1949 (collected in *The Seeker, and Other Poems*, 1970)

**Type of work:** Poem

*The poet expresses anguish at the dichotomy of large-scale human aberration and gentle pastoral scenes existing simultaneously.*

"When in Early Summer" was first published in *Sternverdunkelung*. It is available in English in the book *The Seeker, and Other Poems*. Sachs wanted to omit the poem from the 1961 edition of her collected poetry but was persuaded by the editor, Enzensberger, to include it. The poem contains some of her most vivid images and is one of Sachs's best-known works in Germany.

The sixteen-line poem has five stanzas. Of these, the first three form a progression and the last two commentary. The first stanza, with five lines, describes a night in early summer when nature seems especially alive and humans seem especially attuned to its reassuring messages. All is as it should be, calm and beautiful. "The moon sends out se-

cret signs," the "scent of heaven" streams from the lilies, and, as the crickets sing, one can hear the "earth turning and the language of spirits set free."

It being night, the poet's thoughts move easily from the outer world to the inner world. In the two lines of the second stanza, in dreams, she moves into the mystical state and envisions things beyond the realm of the ordinary. The first image is one of entry into a higher form of being: "fish fly in the air." This is consistent with the ecstatic experience of the summer night. The second image contains a downward motion, "a forest takes firm root in the floor of the room," and indicates that in mystical experience transcendence is always shadowed by determinism.

In the central stanza, the poet moves from one extreme to the other. "In the midst of enchantment a voice speaks clearly and amazed." Twice the voice addresses the world, asking how the world can go on playing its games when "little children were thrown like butterflies,/ wings beating into the flames." The poem has moved from the mundane world, through the sweetness of mystical vision, to a vision of an unfit world.

How can the Holocaust not be punished by God? In the Old Testament, aberrations before the Lord brought some terrible retribution in the natural world. Amazingly, the worst thing done to the Jewish race since biblical times takes place in the twentieth century and divine retribution fails to materialize. "Earth has not been thrown like a rotten apple into the terror-roused abyss." The closing stanza reiterates the poet's surprise: "Sun and moon have gone on walking—/ two cross-eyed witnesses who have seen nothing."

## "END"

**First published:** "Ende," 1959 (collected in *The Seeker, and Other Poems*, 1970)

**Type of work:** Poem

*An intensely personal poem, "End" was written at a time when Sachs's regrets outweighed her expectations.*

"End" is from the collection *Flucht und Verwandlung*. It is available in English in the collection *The Seeker, and Other Poems*. It was written when Sachs

was in her late sixties, in delicate health, and living alone in exile. The end she is referring to is death. The word "end" is not only the title of the poem but also the only word in the first line. Typographically, it has no continuation. The poet is solemnly examining the fact that soon she too will have no continuation. Her anxiety about this is reflected in a number of qualifying statements. The second line attempts to soften the absoluteness of the first by asserting that the end is "only in one room." The thought is left hanging, since the one room is the only room she has.

The remainder of the first stanza deals with a painful fact of the poet's past. Speaking to a second person, she is overwhelmed by a sense of loss. The end has already come in the room, but "it is not your face/ which looks over my shoulder/ but . . . / a mask from beyond." Someone who was once or could have been a significant person in her life is dead. There seem to be two likely candidates for the person she is addressing: Sachs's mother, who died in 1950, or the man Sachs fell in love with when she was seventeen, who was killed in 1940.

The second stanza makes clear that the reference is to the passionate love of Sachs's life, the man she did not marry. Repeatedly in her life Sachs backed away from intimacy. She was able to relate to people only at a distance, not because she was unfeeling but because of her need to protect herself from intense feelings. Thus it is that she remains attracted to or is perhaps even more attracted to the man after his death, when there is no danger of carnal desire. The poet hears a "summons/ encircled by halo made only of blessing/ and not too close/ to flammable reality."

When the summons sounds again, though, at the beginning of the third and final stanza, the butterfly who got dangerously close to the flames in this life faces the fact that the next metamorphosis is death. The opportunity that was not grasped in this life will not present itself again. All that is left is memory, a regressive process, a "creeping/ back into the chrysalis," and then the ultimate dissolu-

tion. Tragically, the only union she will consummate is with death. She sees herself “being finely sieved/ a bride/ into the thirsting sand.”

### “ONCE”

**First published:** “Einmal,” 1966 (collected in *The Seeker, and Other Poems*, 1970)

**Type of work:** Poem

*Musing on the interconnectedness of all life-forms, the poet ponders the balance of predestination and personal responsibility in her own life.*

“Once” is a fifteen-line poem that is part of *Glühende Rätsel*. Published when Sachs was seventy-five years old, it is a mature reflection on the course of her life, and it is written with conscious irony and humility. The wistful opening is reminiscent of the beginning of a fairy tale. It recalls a time in the poet’s life when options were still open. Her fairy tale, however, does not end happily, and she takes personal responsibility for the outcome: “I founded/ the future upon the stone of sadness.” Contrary to what is expected of a princess in a fairy tale, the poet did not get married and live happily ever after.

The prince was there, and she recognized that they were destined for each other. The second stanza speaks of “prenatal reunion.” In other words, the union between the two of them was something that was fundamentally not of this world but foreordained on a level to which there is no access. The union was “made of ocean,” and, sadly, it “ran its course.” The opportunity arose, was not seized, and was lost.

In the third stanza, Sachs seeks meaning for suffering. “Perhaps near the equator a fish/ on the line paid off a human debt.” The implication is that balance is being maintained in the world and that

one’s position in time and place, while beyond one’s control, is not random.

Proceeding from the supposition of interrelated events and fates, the poet applies the concept to the circumstances of her own life, and is ruthless in her self-examination. The line “and then my Thou” signals the change in focus from the general to the specific. As the grammatical subject, “Thou” corresponds to the fish in the previous statement, but whereas the fish paid off a human debt, the function of the Thou remains unstated. So many clauses are introduced to define the Thou that they themselves take on narrative quality, and the poem ends without Sachs having come to the verb. The structure of the poem reflects the nature of the content. There is much conjecture but no definitive statement about the “Thou.” It remains an enigma.

The poet did not spend her life with the man, but she cannot free herself from the idea that she is somehow to blame for what happened to him and to herself. He was kept a prisoner “whom to release I was chosen/ and whom in enigmas I lost once more.” The questions continue beyond his death. Like many of Sachs’s poems, this one ends in a dash. She leaves the reader with a tantalizing glimpse of cosmic connectedness.

### SUMMARY

Nelly Sachs shared the 1966 Nobel Prize in Literature with another Jewish author, Shmuel Yosef Agnon, and is often studied in conjunction with other twentieth century German Jewish authors. Although Sachs was a member of a persecuted race and wrote about the Holocaust, her work contains no hatred or desire for revenge. She expresses her feeling of tremendous loss in terms of concern for the effects that such extreme disregard for life may have on the balance of the world. Sachs’s work is not depressing, but it conveys a transcendent vision.

## FRANÇOISE SAGAN

**Born:** Carjac, France

June 21, 1935

**Died:** Honfleur, France

September 24, 2004

*Sagan's first novel, *Bonjour Tristesse*, is also her most famous, published when she was only nineteen. It came to symbolize the new, increasingly privileged generation that arose out of the gloom of the post-World War II period: defiant, intent on enjoying the growing material prosperity of Europe, but marked as well by cynicism and worldliness. She explored these themes throughout her career, during which she wrote many popular novels, plays, screenplays, essays, and other works.*

### BIOGRAPHY

Françoise Sagan (sah-GAHN), the pseudonym of Françoise Quoirez, was born in a wealthy family in southwestern France. Her parents were able to shelter her from many of the hardships suffered by French people during World War II. Though comfortable, her childhood and adolescence were by all accounts marked by strict middle-class conformity. It was in part to escape from this stifling atmosphere that she attempted to become a writer. She sent the manuscript of her first novel, *Bonjour Tristesse* (1954; English translation, 1955), to the publishing house Julliard, which to her surprise (and possibly to the dismay of her parents) decided to publish it.

When it appeared in 1954, Sagan was only nineteen. It immediately became a scandalous best seller, winning a literary prize and gaining the attention of the literary world. Sagan—whose pen name was borrowed from a character in Marcel Proust's *À la recherche du temps perdu* (1913-1927; *Remembrance of Things Past*, 1922-1931, 1981), the *princesse de Sagan*—became a celebrity, better known for her lifestyle consisting of glamorous parties, complicated sexual relationships, fast cars, alcohol, and drug abuse, than for her literary accomplishments. This dual fame as a writer and as a media celebrity continued throughout her life.

Sagan paid a high price for her attraction to the kind of behavior that tabloid newspapers love to document. She suffered a near-fatal accident in her Aston Martin in 1957, and yet she continued to drive recklessly. Always a heavy drinker, she became addicted to painkillers as a result of her accident, a harrowing experience she recounts in the autobiographical narrative *Toxique* (1964; English translation, 1964). She gambled frequently, mostly in exclusive casinos. She was arrested several times in the 1990's for cocaine possession. Her addiction to alcohol, tobacco, and other drugs contributed to lifelong health problems and caused a famous incident when she suffered a serious respiratory crisis while accompanying friend French president François Mitterrand on a trip to South America in 1985. Despite a large income from her books, screenplays, and other royalties, she always lived beyond her means, and in the last years of her life her constant financial struggles became more acute. She was convicted on a number of counts of tax evasion during this time, as well as on one count of influence peddling, when she accepted money from the French oil company, Elf, to intercede in its favor with President Mitterrand.

Despite her close friendship with Mitterrand during the years of his presidency (1981-1995) and until his death in 1996, Sagan was not known for strong political commitments. In 1971, however,

she participated in the Manifesto of the 343, a document signed by women, many of them well known in French society, who claimed to have undergone abortions; by so doing, they placed themselves in danger of immediate arrest and imprisonment. This very effective protest drew national attention to the issue and was one of the factors leading to the legalization of abortion in France. Often accused of being an intellectual lightweight, in 1980 Sagan visited philosopher Jean-Paul Sartre during the last days of his life, after she published an open letter in which she declared her admiration for him and his determining influence on her career.

Sagan was briefly married twice, first to a French publisher, Guy Schoeller, and then to an American, Robert Westhoff, with whom she had a son, Denis, in 1963. The manner in which her own life mirrored the lives of her fictional characters—or, perhaps more accurately, how her characters' lives were inspired by her own—is one of the defining characteristics of her work.

Despite her dramatic, often chaotic life, Sagan was a prolific writer. In addition to numerous novels, she wrote plays and screenplays and even wrote and directed a feature film, *Les Fougères bleues* (1977; the blue ferns). She cowrote the screenplay of a well-known film by French director Claude Chabrol, *Landru* (1963), and her own works were frequently adapted to the screen. *Bonjour Tristesse*, for example, was made into a film by American director Otto Preminger in 1958. She published a biography of the belle époque actress Sarah Bernhardt, *Sarah Bernhardt: Le Rire incassable*, (1987; *Dear Sarah Bernhardt*, 1988), and also wrote several autobiographical works, including *Avec mon meilleur souvenir* (1984; *With Fondest Regards*, 1985) and *Et toute ma sympathie* (1993; and with all my sympathy). She also produced a book of essays about her own work, *Derrière l'épaule . . .* (behind the shoulder), that appeared in 1998, and which proves that she took the craft of writing more seriously than many people assumed, especially those who knew her primarily from her scandalous public life.

As a rich and troubled celebrity, she was often misrepresented and caricatured in the media. Today, her depth and complexity as a person and as a writer are beginning to receive more attention than they did during her life.

## ANALYSIS

Like her first novel, *Bonjour Tristesse*, many of Sagan's works feature men and women of the leisure class who display a casual attitude toward love, money, and worldly pleasures, while revealing their narcissism and spiritual bankruptcy. One of her better-known novels is *Aimez-vous Brahms?* (1959; English translation, 1960), in which a character named Paula is unfaithful to her longtime lover when she becomes infatuated with a much younger man. In *La Chamade* (1965; English translation, 1966), Lucie lives a life of luxury with Charles, a wealthy bohemian type who supports her; she then falls in love with Antoine, a man whose modest circumstances and real-world concerns symbolize the reality from which she has always been sheltered.

It is significant that in her first novel and other works, the characters who live a life artificially surrounded by money, material possessions, and casual relationships (sexual and otherwise), frequently pay a price for their narcissism. Sagan's works function, therefore, as social commentary, often with a strong satirical and even at times tragic dimension. The effect of her social commentary is, however, mitigated and complicated by the fact that there is rarely any long-term consequence for the selfish, scandalous behavior she portrays. The world of her characters is influenced by existentialism, and Sagan claimed existentialist philosopher Jean-Paul Sartre as an important influence. In this worldview, people are to be judged by their actions, not their thoughts or beliefs; furthermore, there is no God, and therefore no eternal consequence for people's actions. Human beings exist in the world and are constantly challenged to find a reason to live besides the mere pursuit of physical gratification.

Sagan was always aware of the dangers associated with wealth and glamour, and she addressed those dangers prophetically in her first novel. The manner in which the frivolous, pleasure-seeking world of her characters leads them inevitably toward tragedy and emptiness is a remarkably clear-sighted commentary on the mechanism of popular culture. Since many of her novels became best sellers, especially *Bonjour Tristesse*, they are both examples of and reflections on popular culture in the twentieth century.

## BONJOUR TRISTESSE

**First published:** 1954 (English translation, 1955)

**Type of work:** Novel

*A teenage girl, Cécile, is vacationing in the south of France with her father and his lover, when an old family friend arrives unexpectedly and disrupts the harmony of the household by falling in love with Cécile's father.*

*Bonjour Tristesse* is Françoise Sagan's most famous work, in part because she was only nineteen when it was published and in part because it represented an entirely new sensibility in French fiction. The title, which translates as "hello sadness," is taken from a poem by the French surrealist writer Paul Éluard; Sagan opens the novel with this poem, and it sets a melancholy tone.

The narrator, Cécile, is an intelligent but fairly lazy seventeen-year-old, who sometimes seems to speak in the voice of a much older and more sophisticated person and at other times seems immature for her age. She has recently failed her school exams (part of the French *baccalauréat*, the advanced secondary school diploma that in the 1950's still served as an important sign of social status), and she will have to take them again at the end of the summer. She clearly worships her father, Raymond, a youthful, vain, and charming playboy, who has brought his lover, Elsa, with them on their vacation. Cécile finds Elsa to be frivolous, stupid, and unworthy of Raymond. She is far more impressed by Anne, an old family friend whose unexpected arrival at the summer house soon after the start of the novel sets the plot into motion.

Anne is an accomplished, professional woman, who works in the fashion industry. When Cécile's mother died fifteen years earlier, her father entrusted her to Anne, who was one of her mother's closest friends. As a result, Anne had an enormous impact on Cécile's childhood, nurturing her talent for cultural sophistication and understated elegance. Anne, who is older and darker than Elsa, presents a physical contrast, as well as an intellectual and spiritual contrast, to Elsa. Anne challenges Cécile to better herself, to study for her exams instead of spending all day at the beach, and to take

everything in life more seriously than her father does. Cécile never misses an opportunity to play the disrespectful, adolescent rebel in the older woman's presence. It becomes apparent, however, that her provocations are really a symptom, both of her admiration for Anne's aloof superiority and of her growing jealousy.

When it becomes evident that Raymond is falling in love with Anne, the ugly side of Cécile's character reveals itself. One of the complexities of the novel is that the reader never knows whether Cécile is simply jealous of Anne, or whether she is angry at Raymond for having betrayed their philosophy of uncommitted pleasure-seeking by falling in love. During the time that Anne and Raymond grow closer, Cécile begins a relationship with Cyril, a twenty-six-year-old law student whom she met on the

beach and who falls in love with her. Although he is substantially older and seduces her rather forcefully into losing her virginity, there is the strong sense that she is superior to him in many respects: She is more intelligent, a better strategist, and less sentimental. Most important, she is able to avoid falling in love, which she views as a serious weakness, whether for herself or for others.

The narrator's dilemma is acutely defined by the two older women in the novel: Elsa, the unthinking sybarite whose life is given meaning by sports cars and nightclubs, and Anne, her dark, serious, and contemplative counterpart, whose very presence seems to call into judgment the lives of the other characters. When Anne and Raymond decide to get married one evening, after having abandoned Elsa and Cécile in a nightclub so they could spend the night together, Anne begins to feel as if she has the right to act the role of mother to Cécile. In particular, she forbids her from ever seeing Cyril again and tells her to concentrate on preparing for her exams.

Furious at this invasion of her freedom and intent on destroying the relationship between Anne and her father, Cécile invents a diabolical plot. She

manages to talk Elsa and Cyril into pretending to be lovers by convincing Elsa that in this way she will win back Raymond. Raymond is fooled, and he becomes so jealous that he decides to meet secretly with Elsa. Anne discovers the two of them together and abruptly leaves the house in her car, while Cécile realizes the damage she might have caused and begins to regret it, albeit too late. As Cécile and her father are in the process of writing a letter of apology to Anne, the telephone rings: Anne died in an automobile accident on a particularly treacherous road along the Mediterranean coast. Members of the hospital staff believe that it was just an accident, but Cécile and Raymond immediately suspect that they might have caused Anne's suicide.

In the final chapter, Cécile and Raymond are back in Paris, where they slowly resume the life of leisure and irresponsibility that had been interrupted by the tragic events of the summer. Cécile, however, cannot suppress her guilt concerning Anne's death, causing the "sadness" of the book's title; there is a strong suggestion that her life will never again be exactly as it was before. Although she is likely to continue living for the selfish pursuit of pleasure, she will forever be aware of the potential consequences of her egotistical and deliberately shortsighted attitude.

## SUMMARY

Françoise Sagan burst suddenly onto the literary stage as a kind of girl-genius with the publication of *Bonjour Tristesse* when she was only nineteen. Readers were strongly attracted to the book's novel mixture of youth, innocence, sex, and cynicism, and it quickly became a huge best seller. At the same time, critics recognized the emergence of a new literary voice: bittersweet, melancholy, and jaded, yet at the same time highly sensitive to the narrative literary power to express inner emotion. The eminent Catholic author François Mauriac, who strongly disapproved of the amoral content of her book, nevertheless admired its undeniable power and called Sagan a "charming monster," a description that stuck throughout her career.

Sagan's first book made her a celebrity, a status that she enjoyed her entire life as her books continued to reach a wide audience. The life of the idle rich, including its selfish and dangerous aspects, was an inspiration for her work, as well as an aspect of her own life. Though many believe that Sagan never fulfilled her potential as a writer, her works continue to attract large numbers of readers.

M. Martin Guiney

## BIBLIOGRAPHY

### By the Author

#### LONG FICTION:

- Bonjour Tristesse*, 1954 (English translation, 1955)
- Un Certain Sourire*, 1956 (*A Certain Smile*, 1956)
- Dans un mois, dans un an*, 1957 (*Those Without Shadows*, 1957)
- Aimez-vous Brahms?*, 1959 (English translation, 1960)
- Les Merveilleux nuages*, 1961 (*Wonderful Clouds*, 1961)
- La Chamade*, 1965 (English translation, 1966)
- Le Garde du cœur*, 1968 (*The Heart-Keeper*, 1968)
- Un Peu de soleil dans l'eau froide*, 1969 (*Sunlight on Cold Water*, 1971; also known as *A Few Hours of Sunlight*)
- Des bleus à l'âme*, 1972 (*Scars on the Soul*, 1974)
- Un Profil perdu*, 1974 (*Lost Profile*, 1976)
- Le Lit défait*, 1977 (*The Unmade Bed*, 1978)
- Le Chien couchant*, 1980 (*Salad Days*, 1984)
- La Femme fardée*, 1981 (*The Painted Lady*, 1983)
- Un Orage immobile*, 1983 (*The Still Storm*, 1984)
- De Guerre lasse*, 1985 (*A Reluctant Hero*, 1987; also known as *Engagements of the Heart*)

*Les Faux fuyants*, 1991 (*Evasion*, 1993)  
*Un Chagrin de passage*, 1994 (*A Fleeting Sorrow*, 1995)  
*Le Miroir égaré*, 1996

SHORT FICTION:

*Des yeux de soie*, 1976 (*Silken Eyes*, 1977)  
*Musiques de scènes*, 1981 (*Incidental Music: Stories*, 1983)

DRAMA:

*Le Rendez-vous manqué*, pr. 1958 (ballet scenario; with Michel Magne)  
*Château en Suède*, pr., pb. 1960  
*Les Violons parfois*, pr. 1961  
*La Robe mauve de Valentine*, pr., pb. 1963  
*Bonheur, impair, et passe*, pb. 1964  
*Le Chevalévanoui, L'Echarde*, pr., pb. 1966 (2 plays)  
*Un Piano dans l'herbe*, pr., pb. 1970  
*Il fait beau jour et nuit*, pb. 1979  
*L'Exces contraire*, pr. 1987

SCREENPLAYS:

*Landru*, 1963 (with Alain Cavalier)  
*La Chamade*, 1969 (adaptation of her novel)  
*Le Bal du Comte d'Orgel*, 1970 (with Philippe Grumbach; adaptation of Raymond Radiguet's novel)  
*Les Fougères bleues*, 1977 (adaptation of her short story "Des yeux de soie")

TELEPLAY:

*Le Sang doré des Borgia*, 1977 (with Jacques Quoirez and Étienne de Monpezat)

NONFICTION:

*Toxique*, 1964 (English translation, 1964; illustrated by Bernard Buffet)  
*Mirror of Venus*, 1966 (with Federico Fellini; photographs by Wingate Paine)  
*Réponses: 1954-1974*, 1974 (*Responses: The Autobiography of Françoise Sagan*, 1979; also known as *Night Bird: Conversations with Françoise Sagan*, 1980)  
*Brigitte Bardot*, 1975 (photographs by Ghislain Dussart; *Brigitte Bardot: A Close-up*, 1976)  
*Avec mon meilleur souvenir*, 1984 (*With Fondest Regards*, 1985)  
*Sarah Bernhardt: Le Rire incassable*, 1987 (*Dear Sarah Bernhardt*, 1988)  
*Et toute ma sympathie*, 1993  
*Derrière l'épaule . . .*, 1998

## DISCUSSION TOPICS

- In part 2 of Françoise Sagan's novel *Bonjour Tristesse*, Cécile starts to develop self-awareness. Describe this process and the role Anne plays in it.
- Describe how Cécile can be viewed as a kind of "teenage rebel" in the same sense as iconic young antiheroes in post-World War II American culture, for example the James Dean character in the film *Rebel Without a Cause* (1955) or Holden Caulfield, the narrator of J. D. Salinger's *The Catcher in the Rye* (1951).
- Cécile shows herself to be a gifted actress and manipulator of others. Find examples of these skills. How are they presented in a positive light?
- Explain how Cécile changes from the beginning of the story to the end. Do any other characters show a similar degree of change?
- Read one of Sagan later novels, such as *Aimez-vous Brahms?* or *La Chamade*. How does the author deepen and modify some of the same themes that she explores in *Bonjour Tristesse*?

## ANTOINE DE SAINT-EXUPÉRY

**Born:** Lyon, France

June 29, 1900

**Died:** Near Corsica

July 31, 1944

*Through his autobiographical works, Saint-Exupéry captures the era of early aviation with his lyrical prose and ruminations, often revealing deeper truths about the human condition and humanity's search for meaning and fulfillment.*

### BIOGRAPHY

Antoine Jean-Baptiste Marie Roger de Saint-Exupéry (sahn-tayg-zew-pay-REE) was born on June 29, 1900, in Lyon, France, the third of five children in an aristocratic family. His father died of a stroke when Saint-Exupéry was only three, and his mother moved the family to Le Mans. Saint-Exupéry, known as Saint-Ex, led a happy childhood. He was surrounded by many relatives and often spent his summer vacations with his family at their chateau in Saint-Maurice-de-Remens.

Saint-Exupéry went to Jesuit schools and to a Catholic boarding school in Switzerland. His dream was to become an officer in the navy, and from 1917 to 1919 he attended the naval preparatory schools École Bossuet and Lycée Saint-Louis. After failing his final exam, he went on to attend the École des Beaux-Arts to study architecture. The year 1921 was a turning point in his life as he started his military service in the Second Regiment of Chasseurs and went to Strasbourg to train as a pilot. He earned his license in a year, and though he was offered a position in the air force, he turned it down because of the objections of his fiancé's family. Eventually, the engagement was broken off, and he started writing and holding several jobs, including that of a bookkeeper and an automobile salesman.

His first publication was a short story, "L'Avia-

teur" (the aviator), which appeared in the magazine *Le Navire d'Argent* in 1926. Thus began many of Saint-Exupéry's writings on flying—a merging of two of his greatest passions in life. At the time, aviation was relatively new and still very dangerous. The technology was basic, and many pilots relied on intuition. Saint-Exupéry, however, was drawn to the adventure and beauty of flight, which he depicted in many of his works.

Saint-Exupéry became a frontiersman of the sky. He reveled in flying open-cockpit planes and loved the freedom and solitude of being in the air. For three years, he worked as a pilot for Aéropostale, a French commercial airline that flew mail. He traveled between Toulouse and Dakar, helping to establish air routes across the African desert. He became the director of Cape Juby airfield in Rio de Oro in the Sahara. He had many accidents, encountering near death experiences in the desert. It was the isolation of the Sahara that inspired his later depictions of the desert in such works as *Le Petit Prince* (1943; *The Little Prince*, 1943) and *Citadelle* (1948; *The Wisdom of the Sands*, 1950).

In 1929, he published his first book, *Courrier sud* (*Southern Mail*, 1933). In the same year, he became the director of the Aeroposta Argentina Company and made many perilous flights over the Andes Mountains. His experiences in Argentina became the basis for his second novel, *Vol de nuit* (1931; *Night Flight*, 1932).

The same year that *Night Flight* was published, Saint-Exupéry married Consuelo Suncin Sandoval, who was a Salvadoran writer and artist. They

had first met in Buenos Aires in 1930; he was a lonely man of grand dreams, and she was a vibrant and exotic young widow. Her personality became the inspiration for the rose in *The Little Prince*. Their relationship was tumultuous, since Saint-Exupéry was often away on his travels and had many affairs. After Saint-Exupéry's disappearance in flight, she wrote a memoir about their relationship, *Mémoires de la Rose* (2000; *The Tale of the Rose: The Passion That Inspired "The Little Prince,"* 2001), which was not published until after her death.

When the Aeroposta Argentina Company closed down, Saint-Exupéry made postal flights between Casablanca and Port-Étienne, and then served as a test pilot for Air France. In 1935, he began writing as a foreign correspondent for various newspapers, traveling all over the world. He tried to set a record in 1935 by flying from Paris to Saigon, but ended up crashing in the Libyan desert, where he and his copilot subsisted on meager supplies and nearly died. They were rescued three days later by the Bedouins.

When World War II began, Saint-Exupéry enlisted in the army and flew for the French air force. He was severely injured in another plane crash in 1938, when he was flying between New York City and Tierra del Fuego, Argentina. He stayed in New York to recover, living in Asharoken on the north shore of Long Island. He ended up becoming a lecturer and freelance writer there and eventually wrote his most famous work, *The Little Prince*. During this time, he also became an important figure in the French Resistance movement.

In 1942, after the American troops had landed in North Africa, Saint-Exupéry volunteered as a pilot for the U.S. Army. At age forty-two, he was declared too old, but on his insistence he was allowed to fly. In 1943, he flew for the French air force again in North Africa.

On July 31, 1944, Saint-Exupéry took off from Sardinia on a reconnaissance mission and never returned. He might have been shot down by enemy aircraft while flying over the Mediterranean, or perhaps he had an engine failure while in flight, or he might even have committed suicide. He was declared missing in action, and a year later he was presumed to be dead. His last manuscript, *Wisdom of the Sands*, was published posthumously.

In 1998, a fisherman off the coast of Marseille

found in his net a bracelet engraved with the name Consuelo. The find triggered the memory of a local diver, Luc Vanrell, who remembered seeing parts of a crashed plane in the sea. Over the span of several years, parts of the plane were gradually dug up. It was not until April 7, 2004, that the French Underwater Archaeological Department finally confirmed that the wreckage was that of Saint-Exupéry's Lockheed Lightning P-38. No bullet holes were found in the wreckage, though only a few pieces of the plane have been discovered. The cause of the crash still remains a mystery.

## ANALYSIS

Antoine de Saint-Exupéry's works often contain autobiographical elements and are characterized by poetic lyricism and philosophical meditation. Although he is celebrated internationally for *The Little Prince*, which has become a children's classic, in his native France he is known for his reflective stories on the early days of aviation.

Saint-Exupéry's writings are mostly drawn from his experiences as a pilot. Some of his works are overtly autobiographical, including *Terre des hommes* (1939; *Wind, Sand, and Stars*, 1939), *Pilote de guerre* (1942; *Flight to Arras*, 1942), and *The Wisdom of the Sands*, which was published posthumously. Others are stories inspired by his adventures, including the novels *Southern Mail*, *Night Flight*, and the children's tale *The Little Prince*. As a result of his training and knowledge, his descriptions of flight captured the world of aviation when it was still a developing field. His stories depict various aspects of the pilot's life that resonate on a more universal level—the risk of embarking on a journey; the longing for freedom, solitude, and comradeship; the devotion to duty; and the search for understanding among humankind.

The subject of flying also becomes a vehicle of expression for the author. His stories are steeped in the imagery of flight—soaring, survival, loneliness, and wandering. The journeys his characters take are as much internal as they are external. Even when his stories have a clear narrative, Saint-Exupéry often weaves in the reflections of his characters or of himself as the narrator, as is true of the novel *Night Flight*. In flight and in travel, the characters are in a sort of exile, far from home and in search of a suitable place to land. In their explora-

tions, the characters make note of the people and sights around them, taking on the outside observer's point of view, as the narrator does in *Wind, Sand, and Stars*. In this sense, even while the characters experience the thrill of adventure, there is always the pervasive longing for a deeper connection with another human being. This interconnection is experienced through the companionship of shared experience, just as in the pilots' brotherly support of one another in their devotion to their mission. In *The Little Prince*, friendship is experienced through the time the characters spend gaining understanding of one another.

Flying and writing were the two propelling forces of Saint-Exupéry's life. He has been likened to writer Joseph Conrad in that both were men of action and men of thought. Drawing from his personal experiences and observations, Saint-Exupéry's writing is infused with the life he so fully lived. His tales of adventure, imbued with his ideals of self-transcendence, beauty, and devotion, continue to inspire and captivate readers.

## NIGHT FLIGHT

**First published:** *Vol de nuit*, 1931 (English translation, 1932)

**Type of work:** Novel

*Riviere, the director of the airmail services in Buenos Aires, must keep his company running, even after losing one of his pilots in flight.*

*Night Flight*, Saint-Exupéry's second novel, won the Prix Femina, a French literary prize awarded by a female jury, in 1931, the same year it was published. The award helped establish his fame in the literary world. The book is based on Saint-Exupéry's experiences as a mail pilot and as the director of the Aeroposta Argentina Company. The book's main character, Riviere, is based on Saint-Exupéry's actual operational director in Argen-

tina, Didier Daurat, to whom Saint-Exupéry dedicated the book.

The story is about the pilots who make night flights to deliver mail from Patagonia, Chile, and Paraguay to Argentina. During these early days of aviation, such journeys were extremely dangerous, and these courageous men risked their lives for their work. The two central characters are Fabien, one of the best pilots of the company, and Riviere, the director. One night, Fabien is lost in a storm, and when he does not return from his flight, Riviere is faced with the possibility of having lost his best pilot.

The narrative weaves back and forth between Fabien in flight, Riviere waiting back at the station, and Fabien's wife, who waits in worry at home. The central conflict, however, takes place in the thoughts of Riviere, which make up most of the story. Torn between the devastation of Fabien's disappearance and his duty as operational director, Riviere maintains a stern exterior, even while he grieves over the loss of his pilot internally. He is viewed as severe and even heartless by his men, whom he must continue to send out on night flights to deliver mail in order to keep the mail service running. Riviere also has the responsibility of informing Fabien's wife of six weeks that he has been lost in flight.

This story displays the sort of philosophical rumination that Saint-Exupéry is known for, but it is more strongly rooted in narrative than his other works. Through the characters of Fabien, his wife, and Riviere, Saint-Exupéry portrays the ethical dilemma that Riviere faces between duty and compassion, while at the same time depicting the courage and devotion involved in the glory of flying.

## WIND, SAND, AND STARS

**First published:** *Terre des hommes*, 1939  
(English translation, 1939)

**Type of work:** Memoir

*The author recounts incidents from his flying experiences, including that of a plane crash in the Libyan desert, where he and his navigator survived for several days before their rescue by the Bedouins.*

*Wind, Sand, and Stars* is a collection of interconnected essays reflecting on Saint-Exupéry's experiences as an airmail pilot. It is drawn mostly from the period of his life when he made frequent trips across the Sahara and the Andes. The book won the French Academy's Grand Prix du Roman and the National Book Award in the United States.

Saint-Exupéry portrays the world of flying through descriptions and reflections on the craft of aviation, the equipment, the devotion of the pilots, and the forces of nature to which these men of flight are subject. These musings reveal the humanistic philosophy of Saint-Exupéry, depicting the extraordinary courage and dedication required of the men to embark on these treacherous journeys.

Several incidents are recorded in this account, the most central of which is the plane crash of 1935, when Saint-Exupéry and his navigator, André Prévot, set off to break the record for the fastest flight from Paris to Saigon. They crash in the Libyan desert, somewhere between Benghazi and Cairo, with barely any food and water. The men wander aimlessly in the desert, their bodies quickly succumbing to dehydration. They start to see mirages and then have even wilder hallucinations. They see visions of water and of rescue, and not until three days later are they found by the Bedouins, who give them water and take them by camel to a Swiss engineer's factory in the desert. The men are then transported to Cairo.

The final essay in the book touches on an episode in Barcelona and Madrid, when Saint-Exupéry traveled to the Catalan front during the Spanish Civil War. There he observes at first hand the desperation of the men who are driven by the causes for which they are willing to die. Encoun-

tering anarchists, Fascists, and Loyalists, Saint-Exupéry observes that all humanity alike yearns for freedom and happiness. He questions the need to fight and believes that humankind should be unified in its common goal of comradeship.

As much as it is an adventure story, *Wind, Sand, and Stars* is also a contemplation on humanity. The action of the narrative is held together with Saint-Exupéry's lyrical prose and thoughtful ruminations. He often reflects on what little one person knows of another, and it is this struggle for understanding between people that lies at the heart of the narrator's search. Each of his escapades around the world becomes an opportunity for reflection on the human spirit and on what gives meaning to humankind's existence. This is a book of spiritual adventure and journey through despair and loneliness in order to find companionship and self-fulfillment.

## THE LITTLE PRINCE

**First published:** *Le Petit Prince*, 1943  
(English translation, 1943)

**Type of work:** Children's literature

*After crashing in the Sahara Desert, a pilot meets a young boy from another planet, whose story reveals philosophical truths about life and the nature of humankind.*

Loved for its childlike simplicity and profound wisdom, *The Little Prince* is undoubtedly Saint-Exupéry's most famous work. It has been translated into more than 170 languages and adapted into two operas, a musical film, and an animated television series. Saint-Exupéry wrote the book while he was living in New York City, shortly before he disappeared in flight. Though commonly referred to as a children's story, the book has also been appreciated by adult audiences for its underlying philosophical nature. The story contains reflections on the themes of friendship, love, imagination, and the significance of an individual in the world. It is often published with the author's illustrations, a whimsical series of watercolors.

The book begins with the narrator's reflection on his own childhood and the unimaginative ratio-

nality of adults. The story quickly jumps ahead to the narrator's adult life, to a time when he was stranded in the Sahara Desert after a plane crash. He is awoken one day by a young boy, the Little Prince, who asks him to draw a sheep. The exchange reveals the Prince's childlike imagination, reminding the narrator of the innocent worldview of his own childhood.

The two characters are drawn together by their common exile—the pilot, who is stranded in the desert, and the Little Prince, who is far from his home on the asteroid B612. Gradually, the narrator learns the Prince's story. The Prince lived on a small

planet, where he spent his days weeding his home of baobab trees, tending to his volcanoes, and most of all, taking care of his rose. This mysterious rose was a delicate but vain creature. She was demanding and pretentious, and despite the Prince's love for her, he grew disappointed with her capriciousness.

When he caught her in a lie one day, he became disenchanted with her and left his planet to go exploring.

The simple clarity of the child's point of view, exemplified in the Little Prince, is often contrasted with the narrow-mindedness of the adults. On his journeys, the Prince visits six other asteroid-planets, all inhabited by foolish adults. His encounters include that of a king who believes he controls the movement of the stars, a conceited man who craves attention but lives alone in his vanity, and a geographer who draws maps but does not leave his desk to explore the places he must see in order to draw. Such contradictions leave the Prince bewildered and disappointed.

Upon the geographer's suggestion, the Prince travels to Earth, where he arrives at the desert and meets a snake who forebodingly offers to send the

Prince back home with his deadly poison. The Prince declines and continues on his way. He arrives at a rose garden and is shocked to learn that there are millions of other flowers exactly like his rose, whom he thought was unique. Reaching the lowest point of his disenchantment with the world, the Prince lies down in the grass and cries.

It is then that he meets the fox, the sage of the story. The fox was probably inspired by Saint-Exupéry's encounter with a fennec, a desert sand fox, after his crash in the Libyan desert. In the story, the fox persuades the Prince to tame him, and in so doing, teaches him the value of friendship. It is through friendship that two beings become unique to one another, and through friendship that life gains meaning. The Prince comes to realize that it is the time spent with his rose that has made her unique to him, different from all the other roses in the garden who do not belong to anyone.

Having gained this wisdom, the Prince plans to allow the desert snake to bite him so that he can return to his planet and be reunited with his rose. He shares a final moment with the pilot at a well, where the two find physical and spiritual restoration. They reflect on how the important things in life must be perceived not with the eyes but with the heart. The two part, and when the pilot comes searching for the Little Prince the next day, he has disappeared. The pilot finally finishes repairing his plane. The story ends with the narrator's request for his readers to look at the skies and to remember the Little Prince.

## SUMMARY

Antoine de Saint-Exupéry's lyrical and meditative writings, inspired by his experiences as a mail pilot, reveal his idealistic view of humankind's potential. His characters, which sometimes include himself as the narrator, journey through disillusionment and isolation to find transcendence in companionship and devotion to duty.

## DISCUSSION TOPICS

- What meaning does the act of flying take on for Antoine de Saint-Exupéry?
- What are Saint-Exupéry's thoughts on the themes of loneliness and friendship that emerge in his writings?
- In what ways can his writings be viewed as more than an autobiographical account of events?
- What role does nature play in Saint-Exupéry's stories?
- From his writing, would you describe Saint-Exupéry as an idealist? Why or why not?

## SAKI

**Born:** Akyab, Burma (now in Myanmar)

December 18, 1870

**Died:** Beaumont Hamel, France

November 14, 1916

*Hector Hugh Munro, who wrote under the pen name Saki, was one of the leading social satirists and short story writers of pre-World War I British literature.*

### BIOGRAPHY

Hector Hugh Munro was born in Akyab, Burma (now in Myanmar), on December 18, 1870, the son of C. A. Munro, inspector general of the Burmese police, and Mary Frances Mercer Munro, daughter of Rear Admiral Samuel Mercer of the British navy. Hector's mother died shortly after his birth, and he was sent to England with his brother Charles and sister Ethel to be reared by his father's two sisters and his grandmother.

The children lived at Broadgate Villa, an eighteenth century house, in Pilton on the beautiful coast of North Devon, but they experienced an unhappy childhood. Hector, whose health was delicate, studied at home with his sister's governess until the age of fourteen, when he followed his brother to Pencarwick, a boarding school in Exmouth. According to his sister's memoir, he was much happier at school. In September, 1885, he transferred to the Bedford School in Bedfordshire, but his precarious health forced him to leave in December, 1886, which ended his formal education.

Colonel Munro retired from active service in 1888 and took the children for a series of extended visits to the Continent. They returned to England in 1890 and settled at Heaton Court, also in North Devon, where Hector studied under his father's tutelage. During the summer of 1893 he sailed for Burma to join his brother as a policeman in the im-

perial service. His health deteriorated, and after only thirteen months' duty, he was sent home to recover from malaria.

In 1886, Munro moved to London to begin his career as a professional writer. Using the British Museum reading room, he researched a book on Russia, which eventually was published as *The Rise of the Russian Empire* (1900). It was favorably reviewed by the general press but not by the academic establishment, and Hector abandoned the writing of history. A chance meeting with a celebrated political cartoonist, Carruthers Gould, had a more favorable outcome.

Writing under the pen name of Saki (SAH-kee), Munro published a series of satirical sketches in the *Westminster Gazette* attacking the government's ineptitude in the Boer War. These journalistic pieces, illustrated by Gould, launched his career and were later published in book form as *The Westminster Alice* (1902). Before completing this early phase of his career, Munro wrote three additional series of satirical sketches for the *Westminster Gazette*. One was patterned after Rudyard Kipling's *The Jungle Book* (1894) stories, another, the Dolly Dialogues, depicted British society through the eyes of a frivolous and wealthy young woman, and the third, a series of Reginald stories, satirized contemporary British institutions and values.

In 1902, Munro began covering the Balkans as a foreign correspondent for the *London Morning Post*. During the following years he reported from Poland, Serbia, and Russia, where his knowledge of the country's language and history were invaluable. While in St. Petersburg he witnessed "Bloody

Sunday” and the Russian Revolution of 1905. He also became the Paris correspondent for the *Morning Post* before returning to England in 1908.

During the final years of his career Munro worked as a freelance writer, largely of short stories that he contributed to the *Morning Post*, the *Westminster Gazette*, and the *Bystander*. Most of this fiction eventually appeared in book form. He also wrote two novels, *The Unbearable Bassington* (1912) and *When William Came* (1913). In 1924, he collaborated with Cyril Maude on a play, *The Watched Pot* (pr., pb. 1924). He also returned to journalism to report on Parliament for the *Outlook*.

Soon after the outbreak of World War I, Munro enlisted in the Second King Edward's Horse but found cavalry life too strenuous and transferred to an infantry outfit, the Twenty-second Battalion Royal Fusiliers. In November, 1915, he went into combat in France, where he saw considerable action. In October, 1916, he was once again hospitalized for his malaria but rejoined his battalion in time for the Beaumont Hamel offensive. He was killed in action on November 14, 1916.

#### ANALYSIS

Munro's pen name, Saki, belongs to a character out of the *Rubáiyát of Omar Khayyám* (1859), who is cupbearer to the gods. After the failed attempt at writing popular history, Munro began writing short sketches that satirized the hierarchical, stable, and largely aristocratic Edwardian society that he knew. Most of his early work, like *The Westminster Alice* sketches and the animal fables patterned after the *Just So Stories* (1902) of Kipling, drew heavily on the writings of other popular British authors of the period. The high style which became a hallmark of his writing recalled such literary figures as Oscar Wilde and Max Beerbohm. Munro soon ended his stylistic apprenticeship and developed a distinctive literary voice for which he is still remembered.

His first literary efforts were almost exclusively in the short, topical sketch with a political theme. His editor at the *Westminster Gazette*, J. A. Spender, employed Munro's talents to criticize the government for its inept handling of the Boer War and other follies of the late empire. In addition to the original Alice figure, Munro created other characters to satirize the period. The first of the gilded youth portraits, as they came to be known, were the Dolly Dialogues, in which, through the eyes of a

privileged, rather silly young woman, Munro ridiculed London's best people through a series of shrewd observations of their social conventions. His next series was filtered through the consciousness of the well-heeled, amusing, if somewhat mentally dim Reginald, a character who provided the model for P. G. Wodehouse's later, more benign, Bertie Wooster. Munro enjoyed a huge reputation as a social satirist, and his sketches were collected into best-selling books. As a teenager, Noël Coward discovered Reginald during a stay in the country and was forever indebted to Munro for helping to launch his career.

Munro quickly perfected an arch style and a trenchant social perspective, but he was unwilling to settle for a literary career based solely on light, ephemeral material, so he signed on as a foreign correspondent, taking assignments which would send him to many of the trouble spots of Europe. His travels exposed him to hardships and dangers that did much to alter the tone of his work. In addition, he was also introduced to the rich tradition of European folk literature, which supplied him with both the subject matter and the darker vision that characterizes the best of his later fiction.

From the time Munro returned to England in 1907 until his untimely death in World War I, he wrote an extraordinary number of excellent short stories that bear the stamp of his travels and for which he is best remembered. They are more direct and more heavily plotted than his earlier fiction. Much of the epigrammatic wit and the high style of Munro's earlier work is replaced by a deeper sense of irony and of a darker vision of human nature. Munro's later stories deal with an absurdity in life that is more modern than the topical flippancy of his earlier work. The tales in *Reginald in Russia* (1910), for example, though they resurrect his earlier character, are more somber in tone and subject than are the earlier pieces. As his career progressed, Munro also wrote more about the supernatural. Although humor is often still present in his later stories it is more subdued and ironic.

The two novels he wrote during this period reflect a changed mood. *The Unbearable Bassington* is more scathing than lighthearted. Although the unbearable Bassington at times reminds readers of Reginald, Bassington seems more in tune with Evelyn Waugh's doomed, 1920's bright young

things than he does with anyone experiencing the peaceful, endless Edwardian summer. Munro describes the story as having no moral. It is a tale of evil with no remedy. Maurice Baring, in his introduction to the collected novels, calls it a tragedy, a story of a wasted life of ingrained egotism and lack of consideration, a life which must find its retribution in an isolated death. The bleakness of the ending transforms Munro's stock comic punch line into tragic emptiness. *The Unbearable Bassington* is Reginald and Dolly and Clovis Sangrail, Saki's later version of Reginald, with consequences.

*When William Came* is propaganda, pure and simple. As with *The Unbearable Bassington*, all the author's keen social observation is still there but without the wit and humor. The social criticism is more savage, the personal observations more heartless, and the characters come off badly and not amusingly. This novel is like one of Munro's more pungent short stories, expanded. It reads more like George Orwell than Oscar Wilde.

Munro is an underrated writer. Too often he has simply been categorized as among the lightweight British authors whose work is beyond serious consideration. On closer inspection, however, much of what he wrote has the unmistakable mark of the modernist literary tradition. His prose is much less dated, especially in the later stories, than is usually supposed. Munro's fiction deals with many of the modern subjects, such as irrationality, alienation, and irony. He also stylistically experimented with the well-made story, pushing that form to its limits and extending its potential. How he would have developed as a writer after the war remains, unfortunately, speculation. Whatever potential for literary growth his talent possessed expired with him on a field in France.

## REGINALD

**First published:** 1904

**Type of work:** Short stories

*Reginald, a wealthy, dim-witted man-about-town, makes satirical comments on contemporary social and cultural institutions.*

*Reginald* was Saki's third book and, like *The Westminster Alice*, was a collection of the author's satiric

newspaper pieces. With *Reginald*, Saki greatly broadened the scope of his commentary on the social world of Edwardian Britain.

In many of the short sketches, Reginald and the anonymous narrator attend various social and cultural events, such as the theater, the Royal Academy of Art, or a garden party, and Reginald makes satirical comments to the narrator. In the style of Oscar Wilde and Max Beerbohm, most of his remarks are epigrammatic and often are quite biting.

In addition to social institutions, Munro also targeted for send-ups such topics as the empire, the fiscal question, the Boer War, religion, and peace poems. A good number of these topics are rather obscure to the modern reader, but *Reginald's* commentary is still fresh because it pokes fun at such human traits as vanity, snobbishness, and hypocrisy.

"Reginald Goes to the Academy" provides an excellent example of how the stories work. In it, Reginald goes to the Royal Academy of Art, and he comments on various patrons and paintings. People

at art museums look at the pictures, Reginald remarks, only when they have run out of conversation or if they want to avoid acquaintances. Noting that the Royal Academy is slow to admit painters, Reginald muses that one can see them arriving for years like "a Balkan trouble or a street improvement." On the large size of so many academic

paintings, he says, "by the time they have painted a thousand or so square yards of canvas, their work begins to be recognized." Reginald also philosophizes about life: "To be clever in the afternoon argues that one is dining nowhere in the evening," and "I hate posterity—it's so fond of having the last word."

These small sketches reveal Saki's penchant for the amusing aside as well as the cutting remark. The pieces are delicate and rely heavily on literary style for their effect, which makes them difficult to paraphrase or summarize. Such clever ephemera, however, established Saki's reputation for wit and

insight and made him a model for later twentieth century satirical writers, such as Waugh and Wodehouse.

## WHEN WILLIAM CAME

**First published:** 1913

**Type of work:** Novel

*Murrey Yeovil, after recuperating from an illness in Siberia, returns to Great Britain to find that the country has been conquered by the Germans, who now occupy and run it.*

*When William Came* is one of a handful of literary works published before the outbreak of World War I that warned of the dangers of British isolationism. Like Guy du Maurier's popular melodrama, *The Englishman's Home* (1909), and Erskine Childer's *The Riddle of the Sands* (1903), Saki's novel is a cautionary tale about British military unpreparedness and the need to pay more serious attention to European affairs, especially to German militarism. Saki championed the cause of universal military training in Great Britain, and he wanted to shock those in power out of their smugness and their false sense of security. Like the other prewar jeremiads, *When William Came* took on an increased importance as prophecy in the aftermath of World War I.

The plot of the novel is fairly straightforward, if episodic. Murrey Yeovil is a typical Saki hero, wealthy, upper-class, conservative, British. While hunting in Siberia, he falls ill with malaria, and while recuperating learns of Great Britain's defeat by the Germans. He returns to London, where he finds life pretty much carrying on as usual except that the Germans are in command. On the surface, very little has changed except that the street signs are bilingual, and there are more Germans about. Most of British society has been left alone. Murrey finds that most of his friends have adapted quite well to their conquerors

and mingle with them amiably. He grows disgusted with the acquiescence of the British, especially the upper classes, in their acceptance of their occupation.

Murrey is finally prompted to action by a series of events that begin with the decree barring all Britons from military training. He sees this as a deliberate attempt to weaken the British and to reduce the possibility for future resistance to the Germans. On a trip he discovers groups of patriots nestled in the English countryside who have not yet succumbed to the will of the new government. Emboldened by his discovery, he returns to London to witness the passive resistance of a troop of boy scouts, which confirms his suspicion that the youth of Great Britain offer the only hope for future rebellion against the invaders. The novel ends on this somewhat optimistic note.

## BEASTS AND SUPER-BEASTS

**First published:** 1914

**Type of work:** Short stories

*This collection of short fiction includes stories from the immediate prewar period of Saki's career.*

*Beasts and Super-Beasts* was the last collection of Saki's short fiction published in his lifetime. According to some critics, it is his best. It contains the most representative of his later short stories. The book includes the stories for which Saki is now remembered. A number of the stories feature Clovis Sangrail, Saki's later version of Reginald. There are also a number of ghost or fantasy tales that provide an eerie, unworldly atmosphere. There are some tales that explore the demoniac side of childhood. Most of these short stories have ironic, surprise endings.

The witty commentary that Saki uses to such effect in his earlier short fiction is still present, but the stories in *Beasts and Super-Beasts* rely more on plot than do his earlier efforts. They also establish Saki's reputation for writing about the dark side of human nature. Twenty-first century readers will probably be less shocked by these tales than the prewar audience for which they were written because the stories' bleakness has become a staple of modern writing. It is to Saki's credit that he pio-

neered such a modernist vision. The stories seem less dated than some of his other ones.

In "The Story-Teller," a confirmed bachelor quiets some unruly children in a railway compartment by telling them a story. The story is about a little girl who wins medals for her goodness and is eaten by a wolf. She tries to escape the wolf by hiding in some bushes, but her medals clank, giving away her hiding place. There are also stories that border on the absurd. For example, in "The Stalled Ox," an artist who paints portraits of livestock is called to remove an ox from a neighbor's drawing room. Instead, he paints the beast and creates a sensation at the Royal Academy of Art with his picture, "Ox in a Morning-Room, Late Autumn." "The Dreamer" is about a distracted young man who looks so much like a retail clerk that he is able to sell things to customers in shops that he visits with his aunt. He pockets the money he receives for the goods. A gourmand in "The Blind Spot" covers up a killing committed by his cook because, although the cook may be a murderer, he is a great cook.

The absurdity and somberness of Saki's last stories reveal the modernist tendencies of his writing. The horrors of World War I and the worldwide Depression that followed, not to mention the terrors that the Nazis inflicted on Saki's country, perhaps have better provided his later audiences with a more appropriate worldview for appreciating Saki's work.

## SUMMARY

Saki is often depicted as a minor satirist of the Edwardian period, and his writing is usually described, disparagingly, as being in the same vein as Wodehouse's: witty, airy, and tame. On closer inspection it is possible to detect in the darker nature of his prose a growing alienation from modern life that surfaced more fully in literature of the 1920's. There is a bite, an edge, and a dislocation of reality in the best of his work that should place him among the forerunners of the generation of British writers who produced the modernist literary movements.

Charles L. P. Silet

## GEORGE SAND

**Born:** Paris, France

July 1, 1804

**Died:** Nohant, France

June 8, 1876

*Sand, a romantic idealist, expanded the range of issues, particularly of feminist interest, addressed by the nineteenth century novel.*

### BIOGRAPHY

George Sand (sahnd), as she chose to be known from 1832 onward, was born Amandine-Aurore-Lucile Dupin on July 1, 1804, in Paris, France. Through her father, Maurice Dupin, Aurore was descended from an aristocratic line that included King Frederic-Augustus II of Poland. Her father gave up early musical aspirations for a career as a military officer. Through her mother, Sophie Delabord, Aurore was descended from the opposite end of the social scale. Sophie lived by her wits and had entered marriage to Maurice Dupin with a daughter (Caroline) from a previous relationship. Aurore's imperious, aristocratic grandmother, Marie-Aurore Dupin, had little tolerance for Sophie or Caroline. When Aurore was four years old, Maurice Dupin was killed, thrown by a horse he had ridden all the way from Spain. The family was soon separated, with Aurore and her brother staying on their grandmother's estate of Nohant and Sophie forced to go with Caroline back to Paris.

Soon after her mother left Nohant, young Aurore became rebellious, so she was sent to a convent school for the daughters of privileged French families, the English Augustinian Convent in Paris. In Sand's *Histoire de ma vie* (1854-1855; *History of My Life*, 1901), the chapters titled "My Convent Life" give a delightfully fresh and realistic picture of this phase of her childhood. This English background

left many traces. Sand was both an Anglophile and an Americanophile; many of her novels include an English-speaking character, often a positive hero. Sand in turn was to have a strong influence on two English women writers, her younger contemporaries George Eliot (Mary Ann Evans) and Elizabeth Barrett Browning.

Marie-Aurore Dupin brought her granddaughter back to her rural estate of Nohant after only three years. The adolescent Aurore lived a carefree existence, continuing her education in the estate's well-stocked library. Aurore and her grandmother concurred in the choice of Jean-Jacques Rousseau as their favorite writer. Aurore took full advantage of country life and was a passionate horsewoman. Her father's former tutor, François Deschartres, encouraged her to ride and to dress like a boy, the better to hunt.

In 1821, grandmother Marie-Aurore died, making Aurore a wealthy heiress at seventeen. Her mother came back into her life—bringing chaos and unwelcomed attempts at control. The best way out seemed to be marriage to a young man with whom Aurore had little in common, but whom she loved for his good nature: Casimir François Dudevant, a country squire.

Aurore Dudevant was perhaps a perfect test case of whether a traditional marriage, in an age of growing social instability, could hold two incompatible people together. It was a combination of Aurore Dupin Dudevant's education and personality that caused her to throw off convention and pursue her dreams and desires. Not entirely by coincidence, the revolutionary year of 1830 saw her form

the idea of achieving independence by becoming a writer and joining her friend Jules Sandeau, also an aspiring young writer, in Paris. She brought her first, unpublished novel, "Aimée," with her when she arrived in the capital early in 1831.

Her desire for an atmosphere of intellectual and creative ferment was soon fulfilled. Paris was then home to the greatest figures of the Romantic movement, many of whom became her friends, including the writers Heinrich Heine, Honoré de Balzac, Charles-Agustine de Sainte-Beuve, Alfred de Musset, the composers Franz Liszt and Frédéric Chopin, and the artist Eugène Delacroix. Sand was attractive, open, original, bohemian, and lived the romantic ideals. She published her first major novel, *Indiana* (1832; English translation, 1833), under the pseudonym of George Sand (a tribute to Jules Sandeau). In highly romantic terms, this novel addresses the problem that was the crux of Sand's life at that time: a woman's right to break the marital bond.

Sand's second major novel, *Lélia* (1833, 1839; English translation, 1978), reflected Sand's mutually destructive love affair with the poet Alfred de Musset. At the nadir of the affair, Sand cut off her beautiful hair and sent it to him. Having thus turned herself into Joan of Arc, Sand attended the theater dressed like a man. She is captured at that unhappy moment in a portrait by Delacroix, which immortalized her in male attire. During her young bohemian phase, she experimented with all kinds of exotic, self-dramatizing costumes, to which a cigar or hookah was often the finishing touch. When her divorce from Dudevant became final, giving her custody of their two children, she combined her unconventional lifestyle with extraordinary literary productivity to support her household.

Her youth flamed out in the most important and tragic love of her life, the nine-year partnership (1838-1847) with Frédéric Chopin, an émigré composer from Poland. When she rebelled against this tie, it was in the name of maternal passion. Her maturing son Maurice challenged Chopin's position as man of the household, and Sand took Maurice's side. The hard feelings were compounded by Sand's jealousy of her teenage daughter, to whom Chopin was an indulgent father-substitute. They had been, in effect, a family. The break meant the beginning of a premature old age for Sand, and was literally fatal to Chopin. Her side of the story's

happier days is told in her novel *Lucrezia Floriani* (1846; English translation, 1985).

From 1840 onward, Sand contributed to leftist journals and considered herself a socialist, influenced by the doctrines of the Abbé de Lamennais and Pierre Leroux, both her close friends. In 1848, a short-lived socialist republic was proclaimed in Paris. In the general elections that followed, the socialists were roundly defeated and conservative elements were returned to power. As a member of the losing side, Sand found herself ignored, and her prestige went into eclipse. Her virtues of generosity and honesty, however, gave her a new role as the nourisher and mentor of new talent. In particular, the singer and composer Pauline Viardot and author Gustave Flaubert benefited from her steady counsel and friendship. She made Nohant an oasis for friends and family, dying there, after a serene old age, on June 8, 1876.

## ANALYSIS

Sand's literary style is always aristocratic and derives its charm from a high-spirited insouciance, elegance, and assertiveness. In this, the influence of the paternal side of her family, particularly her elegant and witty grandmother, shines. The influence of Sand's mother, whom Sand described as a true gypsy, and Sand's own bohemian life can be felt in Sand's love of mystery and melodrama.

Sand's characters often personify her themes. She also exhaustively analyzes their motives, usually in a declamatory dialogue form that the contemporary reader will find quaint. The earnest, searching honesty with which Sand squarely faced relations between the sexes keeps many of her concerns relevant.

While identified overwhelmingly with her contributions to women's issues, Sand devoted considerable effort to making the reader understand her male characters and their problems. Male and female characters display physical characteristics that cause them to border on being stereotypes. *Indiana*, her first heroine, is an embodiment of the romantic ideal of a fragile, thin, flowerlike, delicate, yet mysterious and exotic female creature; the man who finally wins her is (even to the author) almost too handsome, noble, healthy, and chiseled. Sand gradually modified these stereotypes until, in her last novella, the heroine is pretty but has the "masculine" characteristics of sturdy good health

and common sense, and the hero is handsome but bookish, timid, and naïve. Sand always has a sense of the difficulty of men's position. She treats with understanding the brusque, hearty, egotistical type of man her heroines must flee from, and she reassures the reader that he is not a brute but essentially a good fellow who cannot help being what he is. She also understands how difficult it can be for a sensitive man to take the initiative. In *Indiana* and again in *Mauprat* (1837; English translation, 1870), both hero and heroine must come perilously close to dying before they can admit to loving someone whom they considered only a friend.

Sand's characters are always bedeviled by the romantic ideal of passionate, sexual, but voluntarily unconsummated love, exemplified by such earlier works as Rousseau's *Julie: Ou, La Nouvelle Héloïse* (1761; *Eloise: Or, A Series of Original Letters*, 1761; better known as *The New Héloïse*). Although Sand's characters typically consummate their love eventually, such a resolution is prefaced by much agonizing over whether they had not better remain as friends.

Sand did not write for art's sake alone. The bulk of her work, today little read, consists of potboilers written to pay the bills. Her better works, which are still interesting, were also not written for the sake of art alone. She was blessed with a facile and charming style that she simply allowed to take care of itself and with a storyteller's instinct for creating suspense. Her works have a conscious didactic purpose. She had a deeply held sense of the nature and importance of love in human life. She was an absolutist in seeing love as humanity's link with the divine and as the only principle through which men and women alike could attain their full self-realization. The defense of love, therefore, against restrictive convention and against false modesty and hypocrisy was for Sand a holy crusade. For her, the only irreparable tragedy was the defeat of true love. Sand never wrote such a tragedy. The many loves in her works that remain unconsummated are invariably flawed—by subtle hypocrisy or unconscious egotism. Hence their frustration, however agonizing, is never a tragedy. Her didactic purpose in praising ideal love, which rises above selfishness, pettiness, and the desire for control, would not allow her to depict such moral perfection being defeated. Sand was essentially an optimist.

Successful teachers and edifiers of humanity

have always resorted to humor to sweeten the lesson, and Sand is no exception. Among her secondary characters, she offers a gallery of eccentric individualists who often serve as mentors to the heroes. These eccentrics are loosely based upon the didactic figures who guided her youth. The heretical, mildly satirized Abbé Aubert (in *Mauprat*) has elements of the socialist Abbé de Lamennais, a lifelong friend. Aubert's boon companion, the ascetic peasant philosopher Patience, incorporates two of Sand's mentors in disguise: Stéphane de Grand-sagne (no peasant, but a man similarly devoured by intellectual passions) and François Deschartres, a good-hearted, unpretentious man, devoted to helping youth.

## INDIANA

**First published:** 1832 (English translation, 1833)

**Type of work:** Novel

*The title character leaves her husband, is betrayed by her lover, and finds happiness with her cousin.*

*Indiana*, an intricately plotted novel, brought Sand instant fame. The touching innocence of Indiana and her maid, the creole Noun, both from French Louisiana, is partly explained by their roots in the United States, a country of which Sand had only vague notions, but of which she wrote with enthusiasm.

When readers first meet Indiana, now in France, she is married to a tyrannical old brute, the retired Colonel Delmare, whom she met in America. Their permanent guest is Indiana's cousin and childhood sweetheart, Sir Ralph. The situation offers Sir Ralph no scope for action other than small gestures to soften Indiana's fate, unobtrusively calm her husband, and deflect any dangers that threaten. Indiana regards Sir Ralph as merely insipid and her fate as hopeless.

Wishing to shake his wife from her doldrums and hypochondria, Delmare brings her, at the height of the social season, from rural France to the sophisticated social circles of Paris. Sand makes full use of the contrast of scene. The flower from the wilderness, of course, attracts the attention of

the most successful dandy of the moment, Raymon de Ramière. Sir Ralph, who has accompanied the Delmares like a shadow, senses the danger. What few know is that Raymon is already intimately connected to the Delmare household through his torrid affair with the beautiful creole, Noun. When Noun discovers that her rival is her beloved mistress, she commits suicide.

Raymon is for a time in love with Indiana, whose scruples prevent a consummation of their ecstatic romance. Meanwhile, her husband loses his fortune and decides to take Indiana back to America with him. Indiana, trying to elude the ship's departure, flees to Raymon late at night. Raymon, who has grown tired of waiting for her, is at first indifferent. Listening to her tale of woe, he cynically makes up his mind to take her without love and complete her humiliation. At the conclusion of her story, however, Indiana herself calmly rises and leaves.

She considers committing suicide, but she then decides it will be virtually the same to return to America with Delmare. Sir Ralph, matured and chastened by his years of mute suffering, accompanies them as always. In America, Indiana receives an apologetic letter from Raymon, which convinces her to book passage back to France. When she returns, she discovers that Raymon is now married. His bride, a lady of the best society, humiliates Indiana as icily as possible. Indiana is saved from a serious suicide attempt by

Sir Ralph, who has followed her. He too longs for death, and so they resolve to go back to America to commit suicide together, in a particularly sylvan spot. She is unmoved by the good news of Delmare's death by apoplexy.

In his last moments, Sir Ralph's transformation from a timid peacemaker to a fiery romantic is completed. Indiana is inspired to save him, and she does so with great difficulty after lengthy outpourings of eloquence on both sides. They live together happily thereafter, without benefit of a formal ceremony.

## MAUPRAT

**First published:** 1837 (English translation, 1870)

**Type of work:** Novel

*In an entertaining medieval adventure story, the novel contains a serious, optimistic message about education.*

*Mauprat* is, in a sense, an allegory of the last days of feudal France as it yielded to the new ideas brought in by the French Revolution. Sand did not dispute its fairy-tale trappings and format. The Mauprat family, consisting of a father and seven brothers living in lawless isolation in their great medieval castle of Roche-Mauprat, has from time immemorial lorded it over the surrounding countryside. The days are gone when the Mauprats could legally confiscate from the local peasants; the Mauprats now survive by outright robbery. These men embody every vice: laziness, lechery, drunkenness, arrogance, deceit, cruelty, and ignorance. Their only redeeming quality is boldness, inherited from their knightly ancestors. For Sand, Roche-Mauprat represents a crucible in which to test Rousseau's doctrine of humankind's innate goodness.

Into this den of thieves is brought Bernard Mauprat, their orphaned cousin, an uncorrupted child of seven. Can his essential nature and early rearing survive ten years of indoctrination in the Mauprats' vices?

The wicked Mauprats deceive the beautiful young woman Edmée, who has become separated from her hunting companions, into seeking shelter in their lair. Bernard is charged with guarding her. Edmée believes that he is redeemable, if he can be reeducated. She notices that Bernard is falling in love with her. They conclude a bargain: If he will help her escape, no other man will have her before Bernard. Bernard does not wish to marry her, but he knows she is too proud not to keep her word. They both agree to keep the bargain secret. Edmée foresees a loophole, which she keeps to herself: She may decide to marry no one.

The reeducation of Bernard is conducted by Edmée, her father, Patience (a homeless peasant philosopher), and the Abbé Aubert. The sow's ear

is turned into a silk purse. The reeducation, conducted with love, is more than successful.

Edmée remains stubborn. Bernard concedes that he is ready for a civilized life and is ready to marry the woman he loves. Edmée hints that she loves him, yet he cannot win her. Nor will she marry anyone else, saying that her father needs her. Feeling at a loss, Bernard goes off to America to fight in the Revolutionary War. For five years, he fights, brooding over the occasional letters that he receives from Edmée.

At last, there is a joyous homecoming. Even Edmée's father is now impatient to see the two young people married. Edmée presents Bernard with a conundrum: He must unconditionally release Edmée from her promise, and then she will decide whether to marry him, if at all. Bernard has devoted years to making himself worthy of her pledge; the pledge was his motive and inspiration. The more that he loves her, the less able he is to release her.

Fate resolves this problem. The authorities raid the wicked Mauprats. Most are killed, but two survive and go into hiding. They resurface in disguise, with plans to destroy Bernard's life. Edmée is to be killed in an apparent hunting accident, which will appear to be Bernard's fault.

Not one but two trials are recounted in considerable detail. At the first, Bernard is condemned to be hanged. At the second, Edmée miraculously recovers and testifies on his behalf. Her testimony—in order to be convincing and thus save his life—must include a public confession of her love for him. Edmée finally professes her love unambiguously. The jury and the public are won over, and the long self-denying lovers are united at last, to live happily ever after.

## MARIANNE

**First published:** 1876 (English translation, 1883)

**Type of work:** Novella

*Marianne summarizes all of Sand's most persistent concerns and represents a worthy last word from the author.*

The twenty-five-year-old heroine, Marianne Chevreuse, represents the young George Sand as she might have been had she remained Aurore Dupin a few years longer, instead of rushing into marriage. Sand emphasizes the joys and pleasures of an unencumbered existence for an independent woman. Marianne's country estate of Mortsang is very similar to Sand's Nohant. Remaining unmarried, with her horse Suzon as her chief companion, Marianne is gaining the reputation of being a bit eccentric and too fond of solitude. In fact, she is in love with Pierre André, an old family friend who is also her godfather. In a situation typical of Sand, Pierre is so accustomed to Marianne that he cannot see that he loves her. Sand's optimistic view of human nature requires that this common but usually insuperable situation must change.

Pierre is a man of considerable talent and abilities who utterly lacks self-confidence. Life has dashed his early unrealistic dreams, and on the brink of middle age he is about to resign himself to empty bachelorhood. Old school ties, however, lead to the arrival of Philippe Gaucher, a Parisian dandy, into Pierre's life as an unwelcome houseguest. Gaucher is in search of a bride with a dowry, and Marianne has been recommended to him.

Jealousy plays a part in waking Pierre from his lethargy. Sand is at her most deft in delineating attractive, imaginative, worldly people who nevertheless fail to understand what is really important. The charming Gaucher, besides being a man of the world and a connoisseur of beauty, is a dilettante landscape painter. He drives Pierre to despair with his bold and poetic wooing of Marianne. Pierre warns Marianne that Gaucher is trying to compromise her, and he expresses surprise that Marianne never allows her old friend such liberties. In a conundrum typical of Sand, Marianne explains that she purposely never allows anything that would

give rise to gossip about her and Pierre because she wants Pierre to be under no obligation to marry her. The excuse that Pierre would gladly have had for getting married, without admitting love, is removed.

Marianne is an artist in her own way, as expressed in her development of the park bordering her estate. She uses nature to create beauty.

In her view, the dilettante Gaucher is deeply mistaken when he claims that because he is a painter, he sees the beauty of the countryside more clearly than those who actually live there. Marianne summarizes George Sand's aesthetic credo when she tells Gaucher: "Beauty is like God, which exists by itself and gains nothing from all the hymns and paeans of praise lavished

upon it." Angered, Gaucher accuses her of being a philistine and finds that her words "are like a caterpillar on a rose." To this, Marianne fervently replies

that a caterpillar may be just as beautiful as a rose—and indeed, she has never seen an ugly caterpillar.

The ending is happy, not because of sensual bliss, or the triumph of true devotion, or the defeat of the false and empty—though all these come to pass—but because the main characters achieve their best chance to realize themselves through one another. Merely being suited to each other does not ensure that two people will make the match that they seem to be meant for. Sand's heroines must act to bring it about, or it will not happen.

## SUMMARY

George Sand was part of the Romantic movement and followed the idealistic eighteenth century philosophy of Jean-Jacques Rousseau, who believed in humanity's innate morality and goodness that was without the need for social convention or organized religion. The effect of Sand's putting Rousseau's moral theories into living practice, while simultaneously popularizing them in her novels, must not be underestimated. The personal freedom enjoyed by women of the Western world is in part a monument to her success.

## DISCUSSION TOPICS

- Did George Sand's "convent life" have any appreciable influence on her writing?
- What is the relationship between love and friendship in Sand's fiction?
- Are Sand's male characters presented as full personalities?
- What was the basis of Sand's interest in the United States?
- Are Sand's happy endings too contrived?
- Is Sand's reputation based more on her life than on her writing?

## SAPPHO

**Born:** Eresus, Lesbos, Asia Minor (now in Greece)  
c. 630 B.C.E.

**Died:** Mytilene, Lesbos, Asia Minor (now in Greece)  
c. 580 B.C.E.

*The most famous of ancient Greek lyric poets, Sappho wrote intense love poems, often addressed to other women—hence the term “lesbian,” alluding to Lesbos, her home.*

### BIOGRAPHY

Since ancient times, the title of Tenth Muse has been bestowed upon Sappho (SA-foh), linking her with the nine goddesses who ruled the arts. Little is known about her, except that she lived during the seventh and sixth centuries B.C.E. in what is now Greece, probably spending most of her life at Mytilene on the eastern edge of Lesbos, a Greek island in the Aegean Sea off the west coast of Asia Minor (modern Turkey). She was of noble birth, her father died when she was six, and both her mother and her daughter were named Cleis; she also had two brothers, Charaxus (who appears in several poems) and Larichos, and possibly a third, Eurygyos.

Sappho is said to have married Cercolas, a wealthy man from the island of Andros. According to tradition, she was once banished to Sicily with other aristocrats—perhaps with her husband or brothers, because of their political activities—but later returned to Mytilene, on Lesbos.

Sappho was a contemporary of the poet Alcaeus (died 570 B.C.E.), another resident of Lesbos, whose poems, unlike hers, record violent politics and class struggles of the day. As did Alcaeus, Sappho wrote in the native Aeolian dialect. The two use similar meters, though Sappho's poems are more varied.

Sappho's most typical extant poems address other women. According to a long-standing hypothesis, Sappho enjoyed the company of younger

female companions who were her students at a school or salon she conducted for well-born girls, instructing them in poetry, music, and the arts. Such informal societies were fashionable in Lesbos at the time. The theory, with some support in her verses, is that Sappho's fame attracted student followers from near and far. Another theory sees Sappho as a cult priestess, with female followers. In the twentieth century, editor and translator Denys L. Page and others regarded both theories as inadequately based guesswork.

At any rate, Sappho's poems suggest that she was emotionally involved with women. In particular, she addresses love poems to girls named Anactoria, Gongyla, and Atthis. The Roman poet Ovid, who knew a large body of her writings, records that Sappho “taught how to love girls.” Though Sappho's reputation as a homosexual dates from classical times, “lesbian” was not used until 1908 to mean female homosexual. Ironically, no proof exists that Sappho was homosexual.

Years after her death, Sappho was parodied and ridiculed among the men who wrote and attended Greek comedies: At least six lost plays are known to have represented her pejoratively. From this body of writings sprang various insulting legends: She was unattractively short and dark, (“a nightingale with misshapen wings”); she was a prostitute; she committed suicide by jumping from the Leucadian Cliff because of unreciprocated love for Phaon, a ferryman. Such stories are discredited.

Sappho's life story is tangled with the narrative of how history has treated her writings. The humanistic Greeks and Romans generally showed tol-

erance or mild disapproval, an attitude that turned into bitter rejection in the Middle Ages, when rigid Christian morality dominated Europe. In 380 C.E., the bishop of Constantinople ordered her works burned, and in the eleventh century Pope Gregory VII orchestrated burnings of her books in Constantinople and Rome. Such eradications, along with the general loss of ancient manuscripts during the medieval period, ensured that not a single copy of Sappho's collected poems survived into the Renaissance.

No other poet, then, is so famous on the basis of such a slender body of verses. Sappho's reputation now rests on surviving fragments—some seven hundred lines—of a canon that once included, perhaps, as many as five hundred complete poems. Quite possibly she never wrote the poems down herself; at any rate, it seems that her verses may have been transmitted orally, through a long series of lyric singers like herself, before being gathered and published. Centuries after Sappho lived, in the era of Alexandrian scholarship that included the third and second centuries B.C.E., her poems as they currently existed were probably first published, in eight or nine volumes. Sappho apparently composed in a wide variety of forms: love lyrics, odes, drinking songs, marriage songs, funeral songs, songs of friendship, epigrams, and elegies. In some Greek plays she is presented as propounding riddles and puzzles.

The Romans published Sappho's writings in two now-lost editions, one arranged by subject, the other by metric structure. When Dracon of Stratonicea published *On the Metres of Sappho* (c.180 C.E.), he used an Alexandrian source, also now lost. Down through Greek and late Roman times, Sappho was frequently quoted and imitated by other writers. From the end of the Middle Ages until 1879, her poems were known only from what others quoted. Since then, additional fragments of the poet's text have been discovered—some in Egypt on papyrus shreds used to stuff mummified crocodiles.

Only one complete poem is extant. It always begins any collection of Sappho's verse, and is also therefore known as the first ode. The rest are fragments, varying from coherent units to single lines and words. The Groden edition, for example, lists meager, separately numbered fragments such as "oh . . . / Adonis . . .," "bringing pain," "a dress," "danger," and "soap." Such remnants cloak the

mystery of their lost contexts. It is intriguing to contemplate whether future scholarly finds will restore more of Sappho's texts.

## ANALYSIS

Characteristic features of Sappho's poetry show themselves in what remains of her work. First, her poems are lyrics—brief, deeply felt, personal verses to be sung or chanted to the strumming of a lyre. Sappho's persona always represents the poet in some aspect, but without conveying any certain biographical truth. Even when the poet has another character in a poem call her "Sappho," that may be merely a rhetorical device. Still, Sappho's poems use "I" recurrently in ways that seem to depict the poet's own intense emotions.

All ancient Greek poets wrote in meter. Greek meter was not accentual but depended, rather, upon the lengths of syllables—some long, some short—as sung texts still do. Sappho's writings feature recurring stanzas, similarly shaped but with varying line lengths. The poet often uses a four-line stanza, employing a meter named after her. Its first three lines have eleven syllables each, and the last line has five. Modern English editions often translate Sappho stanzaically but not metrically.

Most longer poems by Sappho imply a lyric speaker/singer and, often, a listener. A dramatic situation—a past or present action or relationship—can usually be reconstructed; this often gives the poem an implicit subtext. Sappho's lyrics, nonetheless, seem frank and simple. They use vivid imagery, a logical and often argumentative structure, and sensual subject matter that is treated discreetly and with quiet reserve. Sappho is never bawdy. Though some critics contend that Sappho uses no true metaphors, she often employs surprising comparisons. Her writings are not heavy with allusions, though she mentions Hera and Aphrodite in her works.

Sappho writes in the vernacular of Lesbos, generally without foreign or artificial words or topical content. Hers is not a literary dialect. Sappho's poetry is similar to everyday speech, raised to great expressiveness.

One feature of Sappho's lyrics is the anxiety of her persona, who typically displays some heightened emotional state. Her lyrics are not the calm, pretty ones that belong to the stereotype of the classical. Their emotional intensity, in fact, shares much with Romantic writers.

Sappho's body of writings has grown over the years as new fragments have been found and editorial sleuths have deciphered them. In the process, her editors and translators have created divergent renderings. The Volger edition (1810) lists 120 poems or fragments; the Edmonds edition (1958) lists 191; and the Lobel and Page edition (1963) includes 192. Translator Suzy Q. Groden reduced the number to 133 in 1966, arguing that in some cases too little exists to make sense, that some lines are really editors' interpolations, and that other elements come from sources that state: "Sappho said that . . ." but do not record her exact words.

Another problem is that any translated lyric loses its particularity—its connotations and nuances of meaning—and much of its form and style. Sometimes different translations become almost like different poems.

In addition to love lyrics addressing women, Sappho wrote various other poems in which she describes the beauties of nature, chides her brother for his involvement with an Egyptian courtesan, sympathizes with her daughter because of restrictive laws forbidding excessive adornments, and represents bridesmaids ridiculing a male wedding attendant. Even Sappho's smaller verse fragments are interestingly provocative, like bits of songs heard fleetingly.

### "ODE TO APHRODITE"

**First published:** First century C.E., copying older sources (collected in *Poems of Sappho, with Historical and Critical Notes, Translations, and a Bibliography*, 1925)

**Type of work:** Poem

*The poet prays to Aphrodite, goddess of love, for divine help in gaining the affection of a woman who might be unresponsive.*

The only surviving full text of any of Sappho's lyrics, the "Ode to Aphrodite" is a prayer, an apostrophe written in seven Sapphic stanzas of idiomatic Greek. The poem's subject is a driving passion, bordering on physical and mental illness, that the poet feels for an unnamed woman.

Most stanzas are parts of the poet's address to

Aphrodite, pleading for help. The poem reviews present and past experiences involving the goddess and the supplicant. Finally, in stanza 6, a vaguely drawn female who might resist Sappho's advances comes hazily into view. The poem thus involves three women: a potential lover (the poet), her unsuspecting beloved, and a goddess who might intercede on the would-be lover's behalf. The poem excludes men—even the male gods.

The poet uses rich imagery and figures to characterize herself and Aphrodite. Flattering epithets describe and involve the love goddess. The speaker entreats the goddess to become the speaker's comrade-in-arms in the anticipated love struggle. Stanza 3 shows the poet imagining Aphrodite leaving heaven and coming to earth in a chariot drawn by sparrows. Sparrows in ancient times implied promiscuity and indiscriminate procreation—sparrow eggs were an aphrodisiac—so their association with a love goddess makes sense. Sappho may also be implying that an ordinary pair of sparrows might be drawing down the invisible goddess to aid her.

Details suggesting war and mental distress cluster in the poem. The poet's suffering is depicted in a blending of intense feeling and objective detachment, as if Sappho were fully absorbed in love's pain but concurrently able to stand back and watch it happen.

The poem reveals Sappho's anguish as, lovesick, she fears that her beloved may not return her love, a thought that weakens and paralyzes her. Sharp imagistic details include the speaker's cry, a darkening of all creation, the image of the ailing poet, victimized by madness and desires, needing deliverance. Meanwhile, the beloved sits somewhere, passive, awaiting what the speaker and goddess may do to her. The prayer hints, disconcertingly, at sexual assault.

The poet's universal theme is the power of love to wreck a life and to render lovers powerless. A modern reader may see the figure of Aphrodite as an irrelevant allusive decoration and may consider Sappho's supplication to this Greek deity as merely a way for the poet to voice the feelings that drive and dominate her. The pain and careful scheming of the speaker's confession ring true, however, as does the closing suggestion that love is war.

Readers may hardly know where their sympathies should lie, with the speaker or with the be-

loved. The poet makes her feelings almost palpable and expresses no apology. Her detachment allows readers their private moral judgments.

**“HE IS MORE THAN A HERO:  
OR, FORTUNATE AS THE  
GODS HE SEEMS TO ME”**

**First published:** First century C.E., copying older sources (collected in *Sappho: A New Translation*, 1958)

**Type of work:** Poem

*Sappho watches a seated couple and, in an aside, addresses the woman—expressing envy for the suitor wooing her.*

“He is more than a hero,” another apostrophe to a woman, comprises seventeen lines and is reasonably complete but probably lacks its original ending. Two quite divergent translations of its opening lines illustrate the creative roles that Sappho’s translators play.

He is more than a hero  
He is a god in my eyes—  
the man who is allowed  
to sit beside you—he  
who listens intimately  
to the sweet murmur of  
your voice . . .

(Barnard)

Fortunate as the gods he seems to me, that man  
who sits  
opposite you, and listens nearby to your sweet  
voice

(Page)

The poem is cited, almost complete, in the essay *On the Sublime*, written by the Greek critic labeled Longinus. The poem was freely adapted by the Roman poet Catullus in one of his lyrics. Moreover,

Catullus addressed poems to a woman whose pseudonym is Lesbia, and he employed Sapphic meter. In vivid, lush, and sensuous imagery, Sappho reports how she watches a man in conversation with a woman and identifies with him to an extent that weakens her. The imagery of the poem dramatizes the couple whom the poet observes. The man, sitting by the woman, hears her murmuring voice and her laughter.

The poem’s imagery, expressing and appealing to various senses, seems to make the poet’s own emotions almost palpable. Mary Barnard renders Sappho’s lines this way:

. . . I can’t

speak—my tongue is broken;  
a thin flame runs under  
my skin; seeing nothing,

hearing only my own ears  
drumming, I drip with sweat;  
trembling shakes my body

and I turn paler than  
dry grass . . .

The poem closes by noting the closeness of “death”—a traditional conceit for orgasm.

The poem has been interpreted as a wedding song but seems more likely to be a lyric expressing personal passion. Sappho’s indirect approach, focusing initially on the man and not the beloved woman, adds an original twist. Sappho’s identification with the “heroic” male is provocative for what it may suggest about her psychology. The care-free, chattering girl whom this man woos provides a dramatic foil, contrasting with the distraught speaker.

**“TO AN ARMY WIFE, IN SARDIS:  
OR, SOME SAY A HOST OF  
HORSEMEN”**

**First published:** First century C.E., copying older sources (collected in *Sappho: A New Translation*, 1958)

**Type of work:** Poem

*This love note to the poet’s friend Anactoria calls her finer than any military pomp.*

Translator Mary Barnard has titled this twenty-line fragment “To an Army Wife, in Sardis.” Despite missing text, the sense of the Greek is clear; interconnected images suggest a completed poem.

Fearing that “you, being far away, forget us,” Sappho addresses a love letter to a favorite woman, Anactoria, comparing her favorably to the impressive sight of armies in motion and fleets in full sail. The poem—an answer to the riddle: What is finest on earth?—has a three-part structure. Its beginning lines assert that the finest is “whatever one loves,” even though “some” think that military displays are “finest.” To argue the poet’s answer, the middle section of verse offers, as supporting evidence, the story of the mythological Helen and her irrational love for the Trojan prince Paris. The concluding section provides the name of the speaker’s beloved and makes a comparison that echoes the beginning. The poet says that hearing the friend’s footstep and seeing the “light glancing” in her eyes would impress her more than witnessing “glittering” armies on the move. Throughout, hyperbole characterizes the poet’s emotion and flatters the implied auditor, the girlfriend. The poem hints of a past friendship or love affair.

The example of Helen, used in an approving sense, seems problematic, since Helen was usually pictured as a bad wife who forsook her husband and fled with Paris. In so doing, she triggered the Trojan War, which makes the poems’ references to the fine sight of armies and warships particularly telling. When Sappho says that Helen “wandered far” with her lover, she suggests “going astray.” These subtleties create a memorable tension and ambiguity.

The poem has a feminist edge because it belittles the masculine business of waging war, finding in the poet’s girlfriend something finer than all of Greece’s military might. If Anactoria is in fact a military wife, the conceit implies that the friend surpasses her husband and all his war-waging colleagues. Another implication in the poem is that one woman’s actions, Helen’s, required the response of thousands of male troops. An implicit theme—make love, not war—underscores the poem.

### SUMMARY

Sappho’s writings reveal a skilled lyric poet whose technique dramatizes emotional life, particularly her deep feelings for her female friends. It is a tragedy that Sappho’s works have been almost entirely destroyed and lost. Though her roles as an assertive woman and as the original “lesbian” have tended to bring her notoriety from the time of the Greeks to the present, Sappho endures as a powerful artist. Her poems make tangible the raw-nerve feelings that people in love have endured throughout time.

#### DISCUSSION TOPICS

- How can a knowledge of musical construction help the reader to understand the form of Sappho's poems?
- In what senses was Sappho a "lesbian"?
- Barring future discoveries concerning her work, why will it remain difficult to judge Sappho as a poet?
- William Wordsworth wrote of poetry as "emotion recollected in tranquillity." Is there evidence that Sappho had a similar view?
- What poets have been particularly influenced by Sappho?

# JOSÉ SARAMAGO

**Born:** Azinhaga, Ribatejo, Portugal  
November 16, 1922

*Saramago is Portugal's most important modern author and a major world writer, noted for a complex and innovative stream-of-consciousness style that blends surreal fantasy and everyday reality to form enigmatic political, moral, and psychological fables.*

## BIOGRAPHY

Born in Azinhaga, a small village northeast of Lisbon, Portugal, José Saramago (sah-rah-MAH-goh) was descended from landless farmers called de Sousa; he was mistakenly registered, however, under the family nickname of “saramago,” a wild radish used by peasants to stave off hunger. Saramago was raised in Lisbon after the age of two, but he still spent much time in the country with his maternal grandparents, who helped shape his character and his ideas. His grandfather Jerónimo in particular regaled the young boy with stories both from the past and from his imagination. At the age of twelve, Saramago's parents enrolled him in a vocational school to train as an auto mechanic; after graduating in 1939, he worked for two years at a car repair shop. He spent his free time, however, at the public library, pursuing an interest in literature he had developed while at school.

By the time Saramago married Ilda Reis in 1944, he was working in the Social Welfare Service as an administrative civil servant. In 1947, Saramago's only child, Violante, was born, and that same year he published his first novel, *Terra do pecado* (the land of sin). In 1949, Saramago was forced out of his civil service post for political reasons, but by the end of the 1950's he found happier employment as a production manager for a publishing company, a position that lasted twelve years and led to friendships with some of the major Portuguese writers of the time. For the next thirty years he worked as a translator, magazine critic, newspaper columnist, and editor. He also became more politically active, and at the end of the 1960's he joined the Communist Party, even though it was forbidden under the fascist dictatorship of Portuguese President Antó-

nio de Oliveira Salazar. Saramago did not return to creative writing until 1966, when he published *Os poemas possíveis* (possible poems). In 1970, he published another book of poems and shortly afterward two collections of his newspaper articles.

In 1970, Saramago and his wife divorced, and he began a sixteen-year relationship with the Portuguese writer Isabel da Nóbrega. In 1972 and 1973, he worked for the newspaper *Diário de Lisboa*, for which he wrote essays and commentary on political issues. The fairly peaceful Carnation Revolution of 1974 through 1976, which overthrew the longtime regime of Salazar, brought about a period of Communist control, with the result that in 1975 Saramago became an editor of the newly nationalized newspaper *Diário de Notícias*. While the revolution ushered in a new era in Portuguese society, the Communist Party did not sustain its favored status, and Saramago was dismissed from his job, effectively ending his journalistic career.

This setback proved to be a turning point in Saramago's career as a writer, since it permitted him to concentrate exclusively on imaginative writing. He returned to the novel form in 1976, publishing *Manual de pintura e caligrafia* (*Manual of Painting and Calligraphy*, 1994). In the early 1980's, as he approached the age of sixty, Saramago rapidly began to receive both national and international recognition, beginning with the publication of *Memorial do convento* (1982; *Baltasar and Blimunda*, 1987), a fantastic and irreverent love story set during the Portuguese Inquisition. This novel gained him international recognition and marks the beginning of both his major creative phase and his greatest success. Capping this decade of rising literary fortunes, Saramago remarried; in 1988, he

took as his second wife the Spanish journalist Pilar del Rio, nearly thirty years his junior, who became the official translator of his books into Spanish.

In addition to his dedication to his imaginative writing, Saramago also developed a role as a public intellectual, speaking out on various political and religious issues. He interrogated the Catholic Church in such plays as *In nomine Dei* (pb. 1993), which won Portugal's Grand Prize in Theater but also created controversy, including a boycott by Portuguese national television. An outspoken atheist, Saramago became the center of another stormy controversy with the publication of his novel *O Evangelho segundo Jesus Cristo* (1991; *The Gospel According to Jesus Christ*, 1993), in which his characters questioned the virtue of the Christian god and the divinity of Jesus Christ. Political and religious conservatives brought pressure on the government, which refused to allow the novel to compete for the 1992 European Union Ariosto Prize, for which it had been nominated. The novel was eventually allowed to remain under consideration because of international protest, but the cultural and political firestorm prompted Saramago and his wife to relocate to the Spanish island of Lanzarote in the Canary Islands.

In 1998, Saramago was awarded the Nobel Prize in Literature by the Swedish Academy, which reached its decision with unusual unanimity. Because of his affiliation with the Communist Party and his outspoken political views, the choice of Saramago was the occasion for another series of outcries from some religious sources and political venues. The Swedish Academy, however, emphasized not Saramago's politics but his genius for producing emotionally powerful and strikingly innovative modern fables, and it is on this basis that his work also found favor from both the reading public and literary critics.

## ANALYSIS

One of the most distinctive aspects of Saramago's work is his writing style, which he developed beginning with the 1980 novel *Levantado do chão* (raised from the dead), which won the City of Lisbon Prize. It was in this novel that Saramago developed his distinctive narrative style, featuring winding sentences of considerable length contained within long, fluid paragraphs. Adding to the flow of his narrative was his deliberate omission of capital

letters and the quotation marks that are supposed to mark the difference between narrative and dialogue. Saramago also moved freely between the first and third person, shifting his tenses and points of view unexpectedly and arbitrarily, so that there is a sense of following a process of consciousness rather than a conventional, realistic narrative. He also rarely used periods, creating instead a series of run-on sentences or clauses joined by commas, giving the effect of alternative or internal reality.

Saramago's narratives do not feature simply one consciousness but are peopled by numerous characters who articulate his themes in a blend of voices. These voices contribute a range of competing perspectives, and yet they also mysteriously merge with an authorial consciousness or presence associated with the voice of Saramago himself, which can be melancholy but is also skeptical and even sarcastic in its irreverent interrogation of a variety of evils.

This flow of description, dialogue, and commentary in Saramago's novels produces a dreamlike or even trancelike effect; in their calm, literal acceptance of the surreal and the fantastic, Saramago's narratives also have some connection to the folktales, folk wisdom, histories, and imaginative memories associated with the stories his grandfather told him when he was a young boy. Layered into this melange of fantasy and reality in Saramago's work is a strong essayist aspect, which he has identified as one of its most salient characteristics. As a result, even as Saramago's work became noted for its artistic invention, experimentation, and originality, he also gained a reputation for introducing dark and dissident editorials into his work, which occasionally created controversy in a Portuguese society in which political and religious conservatives still held much power and influence.

Saramago's work in the 1980's reflected a newly liberalized Portuguese society intent on interrogating its past; Saramago's contributions to this new mood were novels that subverted past history by means of surreal alternative or speculative fantasies. His historical novel *Baltasar and Blimunda* reconsidered the Portugal of the eighteenth century, and the speculative fantasy *O ano da morte de Ricardo Reis* (1984; *The Year of the Death of Ricardo Reis*, 1991) was rooted in the context of the corruptions and brutalities that came about with the rise of the Salazar dictatorship. In 1986, *A jangada de pedra*

(*The Stone Raft*, 1994) continued this idiom. Written in the year of Portugal and Spain's inclusion in the European Community, this novel noted that Europe was nevertheless still divided between a dominant north and a disadvantaged south, something Saramago solved imaginatively by allowing Portugal and Spain to mysteriously separate from the mainland and float off into the Atlantic Ocean toward Latin America to reinvent themselves and redress previous colonial abuses. In 1989, *História do cerco de Lisboa* (*The History of the Siege of Lisbon*, 1996) revised Portuguese history by eliminating the Spanish Inquisition and the discovery of America. *The Gospel According to Jesus Christ* concluded this series of audits of Portugal's heritage, after which Saramago moved from writing freewheeling historical novels to fiction that came to resemble mysterious fables or modern dystopian speculative novels, set in either a possible future or an alternative reality that suggests dire possibilities.

The major novel *Ensaio sobre a cegueira* (1995; *Blindness*, 1997), for instance, depicted an unidentified but typical modern society destroyed by an uncanny epidemic of blindness. In 2004, Saramago deployed his master metaphor of blindness in a different way with a sequel, *Ensaio sobre a lucidez* (*Seeing*, 2006), in which an entire society lodges a protest against its government by casting blank ballots in an election. *Todos os nomes: Romance* (1997; *All the Names*, 1999) is a dreamlike parable in which Saramago explores the theme of identity, inspired by his decision to investigate the records of his older brother Francisco, who died when Saramago was two years old. This theme of lost identity was further developed in the 2002 novel *O homem duplicado* (*The Double*, 2004), in which a man encounters someone who is his exact twin, throwing into doubt his conviction that he is in any way a unique human being, and, as in *All the Names*, depicting a deadening, inhibiting society that has eradicated the old idea of the self. *All the Names*, *The Double*, and *A caverna* (2000; *The Cave*, 2002) constitute what Saramago came to see as a sequence of three novels addressing an end-of-millennium crisis in Western civilization. A satire in which a shopping center becomes the sacred space of a radically consumerist society, *The Cave* warned against a new, emerging form of totalitarianism connected not to the previous European regimes of communism or fascism but to capitalism and the free mar-

ket. This trilogy of fables frequently features nameless characters in an alternative reality that crushes all individual initiative, but the novels also demonstrate moments in which individuals distinguish themselves in a redemptive way through love, virtue, self-knowledge, or spiritual insight. In a similar paradox, Saramago also blends magic and the supernatural with an opposing perspective rooted in literary realism and political commentary.

## THE YEAR OF THE DEATH OF RICARDO REIS

**First published:** *O ano da morte de Ricardo Reis*, 1984 (English translation, 1991)

**Type of work:** Novel

*After a long absence, a Portuguese poet returns to his homeland, which has changed dramatically due to the rise of European fascism.*

*The Year of the Death of Ricardo Reis* has been praised as the finest of Saramago's series of surreal historical novels. The novel's protagonist is a literary alter ego named Ricardo Reis, a persona originally created by the great Portuguese modernist poet Fernando Pessoa. Reis has been in exile in Brazil since 1919, but after he learns of Pessoa's death he returns to Lisbon in 1935, in the early years of a rising totalitarianism found not only in a Portugal but also in the regimes of Francisco Franco, Benito Mussolini, and Adolf Hitler elsewhere in Europe. As Reis wends his way through the labyrinthine streets of Lisbon, he is visited twelve times by the ghost of Pessoa; the two have lively discussions on many subjects, including art, life, politics, religion, and history. These conversations act as an intriguing and complicated counterpoint to an emerging fascistic modern world marked by fear and inhibition. When Reis pays a visit to the

cemetery where Pessoa is buried, it appears to be a mirror image of the city itself, whose inhabitants have become deadened and passive.

Because the difference between the living and the dead is slowly dissolving throughout the novel, it is unsurprising that in the end Reis is led to the graveyard to take his place with Pessoa. While in one way this conclusion suggests that Reis has taken his place among the living dead of fascist-ruled Lisbon, on the other hand he has secured a transcendent bond with Pessoa that is a counterpoint to the terrible times in which he was living. Reis was content to live a contemplative life in a crisis-torn Lisbon because fascism was simply not a part of his interior life. His inner exile into a poetic, literary, and philosophical world secures an identity untouched by the evils of the day.

## BLINDNESS

**First published:** *Ensaio sobre a cegueira*, 1995  
(English translation, 1997)

**Type of work:** Novel

*With the exception of one woman, an entire society is afflicted with an epidemic of mysterious white blindness that threatens it with utter collapse.*

*Blindness* depicts an epidemic of blindness that turns everything to an inchoate whiteness, bringing chaos and criminality in its wake. In an effort to cope with the epidemic, the authorities imprison the blind in a former mental institution, where the scarce and putrid food, the crowding and the uncleanness is made worse by the increasingly bad behavior of its blind inmates. The breakdown of morality reaches its nadir with the rise of a band of blind men who victimize and

humiliate the other prisoners through such criminal activities as theft, rape, and terror. It becomes

clear that the literal blindness of the city's inhabitants is a metaphor for a pathology of consciousness that locks an individual within himself or herself, depriving that person of the ability to perceive his or her own humanity and the humanity of others. A base spiritual condition, this psychological blindness leads to a degraded world of predators and prey, criminals and victims, with no hope of change or progress.

Within this collapsing society, however, a little group of seven people begin to work together to retain their humanity. The leader of this group is the Doctor's Wife, who has loyally accompanied her ophthalmologist husband to the asylum even though she herself is not blind. She is not only helpful in organizing the group and keeping it safe and fed, she also possesses the greatest spiritual lucidity. Blindness in this regard is associated with the death of the heart and with the loss of concern for other human beings; the sight of the Doctor's Wife, on the other hand, is associated with compassion and the retention of a moral compass.

Yet another woman in the group, a prostitute known as the Girl With Dark Glasses, begins to also demonstrate some of the Doctor's Wife's virtues, voluntarily assuming the care of a small boy and an old man, with whom she falls in love. Another important character is the Dog of Tears, who encounters the Doctor's Wife at a moment of deep despair; when they gaze into each other's eyes, they connect on a deep personal level, a reminder that in this novel it is the seeing eyes that represent the sacred core of each living being. With the return of her morale, the Doctor's Wife manages to secure safety for her little group by leading them to her apartment, a site of both literal and spiritual cleansing as they bathe on her terrace in the rain.

The social conditions elsewhere, however, worsen, with increasing scarcity, disorder, and confusion. It is at this point that the Doctor's Wife wanders into a church, which is filled with people praying for rescue or consolation. The Doctor's Wife sees that all the eyes of the statues of religious figures in the church have been covered by a priest, who has dramatically blinded the icons upon whose existence the people have come to depend. When the Doctor's Wife tells the congregation that the holy images are blind, they abandon the church, and soon everyone regains their sight, as if the demystification of these religious symbols is

somehow linked to the subsequent miraculous recovery that allows the people in the city to restore social order. The powers associated with the images in the church have been transferred to human beings, who are free to use their own moral and spiritual resources—their own eyes.

## ALL THE NAMES

**First published:** *Todos os nomes*, 1997  
(English translation, 1999)

**Type of work:** Novel

*A young man working in the powerful Central Registry of Births, Marriages, and Deaths finds he is obsessed with a woman whose name and general statistics he has found on one of the registry's index cards.*

*All the Names* is a nightmarish dystopia filled with nameless people, except for a man known only by his first name, Senhor José, who works in the lowest echelon of a labyrinthine organization called the Central Registry of Births, Marriages, and Deaths. It is the task of this rigid and highly controlled bureaucracy to produce index cards that contain essentially meaningless and impersonal sets of dates and statistics about each individual in the city. The lonely José, whose hobby is to collect information about famous or notorious people, slips into the registry to pick up five more cards, and by chance he also collects a sixth card that records the name and birth, marriage, and divorce dates of an ordinary thirty-six-year-old woman, whose name is never revealed. José feels compelled to learn all he can about her, looking for information from various sources, including the woman's parents, and even breaking into her old school at night to find further information. In attempting to recover the unknown woman's identity, José realizes that he has fallen in love with her, but almost at once he lo-

cates the final piece of information about her—her death certificate. Understanding that she has committed suicide only a few days earlier, he is left with one final destination, the General Cemetery where she is buried.

The godlike Registrar, who heads the organization, has placed José under surveillance the entire time, but instead of punishing him for his independent investigation, he praises him for bringing positive new changes. The Registrar declares that the files of the living and the dead will no longer be separate, and that the living person's recovery and recognition of the lives of those who have gone before will be, in its way, an almost metaphysical act of resurrection. Additionally, in returning her name to the files of the living, Senhor José feels he is also recovering the nobility of his own identity, transforming himself from an unprepossessing cog in the machine of the Central Registry into someone of considerable worth.

## SUMMARY

All of José Saramago's novels are a complicated blend of light and dark, including both hope and despair and sustaining an authorial perspective that is unsentimental but nevertheless sensitive to both the sins and the suffering of humanity. Saramago's later novels build on his earlier deployment of the fantastic and supernatural, but they are more clearly symbolic or allegorical in nature. Saramago's later writing does not address the past but speaks to the present, but it is a present in which his earlier experiences of the totalitarianism of the Salazar regime have not disappeared but have been inventively reinstated in new and mysterious ways. While his work contains strong elements of pessimism, the various evils that Saramago explores never completely destroy the critical intelligence or sympathetic imagination of individual characters, raising the possibility that the human spirit may triumph over even the most dire adversity.

## DISCUSSION TOPICS

- Discuss the way in which his many years living under the repressive Salazar regime has shaped José Saramago's work.
- How do the inner lives of Ricardo Reis and Senhor José act as a contrast or alternative to their external circumstances?
- Discuss the way in which the Doctor's Wife, Senhor José, and Ricardo Reis demonstrate admirable qualities despite their dehumanizing circumstances.
- Discuss the meaning and value of Saramago's innovative writing style, including his use of symbol and allegory and his deployment of fantasy and the supernatural.
- Compare and contrast the three "crisis worlds" of *Blindness*, *The Year of the Death of Ricardo Reis*, and *All the Names*. What caused these societies to become weakened or ruined?
- Discuss the theme of the overlapping worlds of the dead and the living in *All the Names* and *The Year of the Death of Ricardo Reis*.
- Why does Saramago avoid the use of names for his characters in *Blindness* or *All the Names*?

# NATHALIE SARRAUTE

**Born:** Ivanovo Voznesensk (now Ivanovo), Russia

July 18, 1900

**Died:** Paris, France

October 19, 1999

*Sarraute, whose spare novels traced the subtle undercurrents of human relations, was a primary theorist and practitioner of the French New Novel.*

## BIOGRAPHY

The few facts that Nathalie Sarraute (sah-ROHT) relinquished about her life were as sparse and unembellished as her prose. She was born on July 18, 1900, in Ivanovo-Voznessensk, Russia. Her parents, Ilya Tcherniak and Paulina Chatounowski, had met while studying in Geneva to avoid the harassment that prevented Jewish students from attending Russian universities under Nicholas II. After her father obtained a doctorate in chemistry, they returned to Russia, where he opened a textile factory.

When she was two years old, her parents divorced. Sarraute lived with her mother in Paris for most of her early years and spent summers with her father in Russia. She spoke French from early childhood. Her mother remarried several years later and moved to St. Petersburg, Russia, where she collaborated on a literary review and published fiction under the masculine pseudonym of Vichrowski. From a young age, Sarraute had a desire to write that was enhanced by her acquaintance with writers and scholars. At age seven she timidly presented her first novel to a writer friend of her mother. His review, that she should learn to spell before she wrote novels, kept her from writing for almost thirty years.

Sarraute moved with her father, who had also remarried, back to Paris in 1910. As a result of her frequent travel between France, Switzerland, and Russia, Sarraute became fluent in Russian and French at an early age. She was a bright student who consistently earned high marks and was encouraged to pursue her own career by her father. She was reared in a community of Russian émigré intellec-

tuals who fostered her love of music, languages, and literature.

After obtaining her *baccalauréat* and *licence* from the Sorbonne in 1920, she began work in history at Oxford. The following year she traveled to Berlin to study sociology. In 1922, she entered the University of Paris Law School, where she met Raymond Sarraute, whom she married in 1925. She was an active member of the Paris bar from 1925 to 1941. In this period, she also had three daughters: Claude, Anne, and Dominique. Sarraute later said that she greatly valued her legal training. The oral arguments of the court proceedings helped her to reproduce the attacks and parries of spoken discourse in her fiction.

In 1932, Sarraute began to devote herself to writing fiction. She tried to publish a collection of short sketches, *Tropismes* (1939, revised, 1957; *Tropisms*, 1963), with little success. *Tropisms* was finally accepted for publication in 1939, but it passed virtually unnoticed by the critics. During World War II, she was forced to take refuge in the town of Parmain. Sarraute adopted the name Nicole Sauvage and hid from the Germans by posing as the governess of her own daughters. She did, however, continue writing during this period. Her novel *Portrait d'un inconnu* (1948; *Portrait of a Man Unknown*, 1958) was completed in 1946 and published with a preface by Jean-Paul Sartre, the noted existentialist writer with whom she corresponded during the war.

Sarraute attempted to explain her unorthodox and, at first, unpopular approach to writing in a collection of essays entitled *L'Ère du soupçon* (1956; *The Age of Suspicion*, 1963). These essays explained

her ideas about the development of the novel and her affinities with contemporary trends in France. She also continued to write fiction, publishing *Martereau* in 1953 (English translation, 1959), *Le Planétarium* (1959; *The Planetarium*, 1960), and *Les Fruits d'or* (1963; *The Golden Fruits*, 1964). *The Planetarium* was well received, and *The Golden Fruits* was awarded the International Prize for Literature. Sarraute also wrote several plays for the radio, including *Le Silence* (1964; *Silence*, 1969) and *Le Mensonge* (1966; *The Lie*, 1969). Her later novels include *Entre la vie et la mort* (1968; *Between Life and Death*, 1969), *Vous les entendez?* (1972; *Do You Hear Them?*, 1973), and *"Disent les imbéciles"* (1976; *Fools Say*, 1977).

Sarraute traveled widely and visited the United States several times to lecture or to serve as a writer-in-residence at various college campuses. Her works were translated into more than twenty languages, and all of her novels were translated into English. Her work deeply influenced the post-World War II generation of writers and readers. She died in Paris on October 19, 1999, at the age of ninety-nine.

## ANALYSIS

Sarraute described her first attempts to write as the almost spontaneous expression of certain sensations, or inner movements, that seemed to underlie everyday speech and gestures. Her aim to seize elusive sensations and preverbal impressions before they enter the consciousness led to an exploration of entirely new modes of expression.

Sarraute described *Tropisms* as a collection of short texts or fragments, containing "all the raw material that I have continued to develop in my later works." They have been, perhaps more aptly, called prose poems or microdramas. The only unifying link in the series of compact vignettes is the concept of tropisms. Tropisms (a biochemical term) are the instinctive movements of primitive organisms that expand or contract under external influences, such as light and heat. She noted similar impulses on a psychological plane that "form the infinitesimal but complex dramas concealed beneath our overt words and acts." Sarraute explores human psychology, then, from a new direction. Rather than depicting unique characters or remarkable individual traits, she describes universal drives and impulses that may not be spoken but that motivate communication and behavior.

Tropisms remained an essential element in Sarraute's writing throughout her career. She presented glimpses of anonymous lives in undistinctive settings and unremarkable situations. Particularities of time, place, and character were absent in Sarraute's works. To reinforce the concept of generality, Sarraute most frequently used the third person, and often the third-person plural. Characters were not named but were referred to as "he," "she," or "they." They are the representatives and guardians of society's values. Although some of Sarraute's sketches may appear as character portraits of certain types of individuals, typical of moral or allegorical tales, it is more accurate to describe her characters as incarnations of a tropism.

In Sarraute's fiction, there is never a unique individual, and there is rarely a special event. Her fiction does not describe a memorable occasion but a habitual mode of behavior or a repeated experience. Even in her more complex novels, there are no specificities of time or place. Her characters exist apart from any social or historical framework. The settings are usually generalized interiors or dreary urban landscapes. Space is confined, just as the characters are restricted. Natural landscapes, aside from a suburban park, rarely figure in Sarraute's works. Internal drama is the focus of her works, so that even minute actions or a few hastily spoken words generate an entire series of repercussions.

Satire is a strong element in Sarraute's writing. The mediocrity of the middle class is most often the target of Sarraute's irony. The frivolous concerns and useless occupations of women are frequently ridiculed as well. Even educated women, in what may be a gesture of self-directed irony, are depicted as bluestockings. Children are already lacking the will to resist the gray conformity of their elders. Throughout her works, there is an abundance of obedient, docile children, who will eventually grow into self-restrained members of society. They adopt the proper behavior and conventionalized attitudes of the adults who groom them to guard the status quo.

The worldview in Sarraute's work is generally pessimistic. There are few moments of delight and no open spaces or bright colors. Her characters are completely isolated, each living a compartmentalized existence. The loneliness of the human condi-

tion can be mitigated only by social interaction, but this contact often brings frustration and disappointment. The need to communicate often leads to hysteria or to debasement. For Sarraute (and for Fyodor Dostoevski, whom she greatly admired), the subsurface of human relationships is a ceaseless struggle for domination and control. Yet the form of Sarraute's novels—dialogues, conversations, and subconversations—substantiates the need for interaction.

In almost every sketch in *Tropisms*, there is an undercurrent of fear and misunderstanding. Misunderstanding results from a breakdown in communication or a failure to envision another's point of view. The inability to comprehend another person is unavoidable and results in the return of Sarraute's characters to their own private spheres. Tentative efforts at contact are usually rebuffed. Behavior is a puzzle without pattern or design, and her characters are watchful for threats to their conception of reality and security.

A surface of clichés, trite words, and trivial observations attempt to render the human condition bearable in Sarraute's work. Language cloaks the truth rather than revealing it. Clichés represent the tacit censorship that people perform on unpalatable or improper issues of human existence, such as sex, illness, and death. Clichés are not what everyone thinks or feels, but rather "what people force themselves to think and feel to avoid the vertigo of reality." The illusion of exerting control over other people or events is provided by the trite expressions of common consensus. A shared vocabulary reinforces the sense of community and excludes those who do not know the language. Repetition figures prominently in Sarraute's writing. Her characters, by repeating the same platitudes, shape existence into a "small, gray pellet." The yearning to escape society's code of communication is occasionally expressed in frustration or annoyance but is rarely achieved.

*Tropisms* exhibits much of the same thematic material and narrative method of Sarraute's later work. Its anonymity of characters, absence of plot, elimination of historical contingencies, and lack of physical description are characteristic of Sarraute's subsequent works. Furthermore, the ambivalent need for contact, the misunderstandings that complicate relationships, and the clichés that mask existential anguish continue to be of primary im-

portance in her later writings. The concept of tropisms, or the subsurface dynamics of human interaction, unified all Sarraute's fiction and represented a unique contribution to the development of the novel in the twentieth century.

## THE PLANETARIUM

**First published:** *Le Planétarium*, 1959  
(English translation, 1960)

**Type of work:** Novel

*A middle-class couple schemes to obtain the apartment of an elderly aunt and enter the fashionable, artistic community of Paris.*

*The Planetarium* has often been called Sarraute's masterpiece and has certainly been her most popular work. The novel is the most approachable of her works for several reasons. There is more evidence of a plot than in her other works, and the progression of the action is linear. There are also recognizable characters who can be identified not only by name but also by personality and relationships. Although there are several narrators, the shift in narration occurs at the beginning of each chapter, making the thoughts of the characters easier to apprehend.

The novel is structured around Alain Gumier's attempt to gain possession of his aunt's apartment and to ingratiate himself with the writer Germain Lemaire. This may seem to be very unpromising material for a novel, but Sarraute succeeds in extracting a range of emotional possibilities from the banal concerns of daily living. The disproportion between the insignificant events and the enormity of the tropisms that emerge from them is apparent from the opening chapter. In the opening pages, Alain's Aunt Berthe excitedly anticipates the installation of an oak door only to become distressed by the cheap nickel-

plated knob and by the nonchalance of the workmen. Typical of the primitive emotions characteristic of tropism, the trivial event assumes cataclysmic proportion, and the workmen become an advancing army of conquerors. Material objects, like the oak door or the leather chairs that Alain's mother-in-law later tries to give him, acquire symbolic importance and bring the tropisms to life.

Alain's maneuvering to ingratiate himself with Lemaire acts as a counterpart to his machinations to acquire the apartment. After a visit at his in-laws, where he unsuccessfully narrates the story of his aunt's oak door and is pressured to accept the leather chairs, which represent the mediocrity and established social code of his wife's parents, he visits Lemaire. Although he feels insecure, he repeats the story of his aunt's oak door to the appreciative response of the famous writer. Alain triumphs by attaining the friendship of Lemaire and the possession of his aunt's apartment.

The omniscient narrator provides information necessary for a reader's understanding, but the reader of *The Planetarium* must learn to recognize each character by his or her emotional states. Because the story is told by several characters, there is no single objective reality but a multiplicity of subjective responses. Certain psychic responses, however, are common to all of them: the desire for approval and acceptance, the need for security, and the wish to dominate rather than be dominated.

Stereotypes become modes of classification in an attempt to achieve stability. Ultimately, ideals and stereotypes alike disintegrate. By the end of *The Planetarium*, Alain loses faith in Lemaire and the symbol of the planetarium becomes clear. Alain had constructed an artificial universe in which Lemaire was a stellar figure surrounded by a cluster of satellites. Seen from a distance, she seemed fixed and perfect. A closer perspective brought change and motion. The planetarium Alain describes late in the novel was a false ideal, a shadowy projection of the real world.

## THE GOLDEN FRUITS

**First published:** *Les Fruits d'or*, 1963 (English translation, 1964)

**Type of work:** Novel

*The novel traces the discovery, rise to fame, and fall into obscurity of a fictional novel, The Golden Fruits.*

A parable of artistic creation, Sarraute's work describes the reputation of a fictional novel with the same title as her own. *The Golden Fruits* is first discovered by an elite few, championed by the critics, becomes popular with the masses, and then is gradually discredited and forgotten except by a few discriminating readers. Sarraute's work, however, is not a treatise about artistic values but a work about human interaction.

The book, a mundane object, prompts primitive emotional responses of snobbery, timidity, and fear. Sarraute ironically expresses the inner anxieties of even the most self-assured critics. The various shades of response are conveyed through spoken conversation and the counterpoint of unspoken subconversation. Conversation is not linked to individual characters, and the connection between conversations is also difficult to establish.

The response to the fictional book *The Golden Fruits* rarely emerges as genuine—direct contact between the audience and the aesthetic object—but as false, preconditioned by others' responses to the object. Sarraute catalogs the false response to the fictional novel as she depicts its rising popularity. In the first chapter, an elite group of connoisseurs is enthusiastically discussing *The Golden Fruits* as they do other works of art that have not achieved popular recognition. Their membership encourages conformity and security of shared aesthetic tastes. Domination is prominent in the discussions. Members of the group who did not initially like *The Golden Fruits* ignore their convictions to join in praising the work.

As it gains popularity, each passage of the fictional book is mined for meaning. The book is described in increasingly exaggerated terms until it is finally said to mark a turning point in literature. The hierarchy that passes pronouncements on what is considered art overwhelms the reader's ca-

capacity for independent response since opinions are assigned before the reader encounters the book itself. The critics see in *The Golden Fruits* only what they wish to see and are dismayed when they cannot find examples in the text to support their assertions. Two critics withdraw from society and speak of the text in such obscure terms that they draw their own following.

The foundation of Sarraute's satire of critical pretentiousness is the subjugation of the creative to the critical process. The artist's importance is diminished by classifying him or her according to predecessors. After the popularity of *The Golden Fruits* has subsided, the eccentricities of the author are cited as proof of the inauthenticity of the manuscript. The earlier unanimity of acclaim is matched by unanimity of repudiation. A lone voice finally questions the authority of the group. This voice advocates personal experience of the work.

Sarraute's novel concludes that there are no sure values in art just as there is no truth in a world of inauthentic values and mass opinions. The yearning for certainties in judgments of art is part of the search for security that characters pursue in Sarraute's other works. In the end, the reader of Sarraute's novel knows no more about the content of *The Golden Fruits* than do the fictional readers and critics depicted in her work.

## SILENCE

**First produced:** *Le Silence*, 1964 (first published, 1964; English translation, 1969)

**Type of work:** Radio play

*An anonymous storyteller interprets and questions the silence of his audience.*

Central to Sarraute's work is the desire to communicate and the exploration of language as a vehicle for this communication. Words and silence can trigger an entire range of reactions. In a novel, the silence of a character may not be noticeable, but the prolonged silence of an actor is obvious and disturbing to an audience. In *Silence*, the nonparticipation of one person brings up an entire realm of uncertainties.

As the play opens, M.1 has interrupted himself in the midst of describing an unspecified, exotic locale. He suddenly becomes embarrassed by his romantic effusion and believes that he hears the laughter of Jean-Pierre. Jean-Pierre, however, has been silent throughout the story and continues to remain speechless. Although M.1 is the first to feel intimidated by Jean-Pierre's silence, the group of anonymous spectators begins to feel uncomfortable as well. The force of M.1's reactions to the silence awakens their unease.

During the course of the play, M.1 variously interprets Jean-Pierre's silence, often in a contradictory manner. Jean-Pierre is alternately described as timid, arrogant, sensitive, anti-intellectual, or stupid. In this way, M.1 is transformed into a potential creator who composes and revises a personality for his spectator. The personality he devises for Jean-Pierre arises out of his imagination rather than his observations. M.1 is also keenly aware of aesthetic form, suggesting that his story might have been more acceptable if it were presented differently, for example within a beautifully bound book.

All of M.1's maneuvering is part of a desperate attempt at communication and approval, but he repeatedly confronts a wall of silence. His attentions to his audience shuttle between pleasing Jean-Pierre and courting the rest of his audience. The others gradually mirror M.1's obsession with the silence of Jean-Pierre. Whereas they first tried to distract him, they later attempt themselves to induce Jean-Pierre to speak. His silence eventually develops into perceived superiority.

The silence of Jean-Pierre serves, however, as the impetus for discussion and speculation (and is, after all, the basis of the play). In the play, there is a compulsive need to fill the silence even if it is with hackneyed expressions and clichés. It is only through words that individuals emerge from their isolation. Jean-Pierre remains an enigma and, therefore, an outsider. For that reason, he comes to instill fear and anxiety in the group.

When Jean-Pierre finally speaks, his words are so trivial that he in effect says nothing. Instead of reveling in the power he acquired during his silence, he was oblivious to it. The reactions of M.1 and the others are finally revealed as entirely subjective. Once Jean-Pierre speaks, he is reintegrated into the group and the incident is immediately forgot-

ten. M.I.'s denial of the episode perhaps suggests that the play itself is a dramatization of nonverbal reactions to everyday events.

### SUMMARY

Sartre wrote in his preface to Nathalie Sarraute's novel *Portrait of a Man Unknown* that "by tenaciously depicting the reassuring, dreary world of the inauthentic, she has achieved a technique which makes it possible to attain, over and beyond the psychological, human reality in its very *existence*." Sarraute consistently revealed the minute fluctuations of human behavior and perception in her works. A few words, spoken casually, form the nucleus of an entire internal universe. Evoking spontaneous memories and unconscious drives, the subtle psychology in her novels went beneath the surface of individual idiosyncracies to uncover universal human impulses.

*Le Mensonge*, 1966 (*The Lie*, 1969)

### DISCUSSION TOPICS

- How does Nathalie Sarraute's early experience as a writer exemplify the fact that writers sometimes receive the wrong advice about their work?
- Explain the basis of Sarraute's use of the term "tropisms."
- Are the children in Sarraute's works better described as victims of social norms or people who do not exercise their capacity for independence?
- Is Sarraute's view that "language cloaks the truth rather than revealing it" exceedingly pessimistic?
- Determine the symbolic possibilities of some of the material objects in *The Planetarium*.
- What is your interpretation of Jean-Pierre's silence in the radio play *Silence*.

*Nathalie Sarraute*

NONFICTION:

## JEAN-PAUL SARTRE

**Born:** Paris, France

June 21, 1905

**Died:** Paris, France

April 15, 1980

*Trained during the 1920's as a philosopher, Sartre emerged over the ensuing three decades as a major literary figure, thanks mainly to vivid fictional and dramatic illustrations of his developing existentialist philosophy.*

### BIOGRAPHY

Close kin on his mother's side to the Alsatian doctor and musician Albert Schweitzer, Jean-Paul Sartre (sahr-truh) was born on June 21, 1905, in Paris, France. He lost his father, Jean-Baptiste Sartre, to disease not long thereafter. His mother's name was Anne-Marie. Somewhat frail of health himself, with bad eyesight that would only grow worse with the passage of time, Jean-Paul grew up in a household filled with women and books, deciding early in life to assert his masculinity through writing. Consistently rewarded for his scholastic diligence with honors and high grades, the young Sartre moved quickly from the prestigious Lycée Henri-Quatre to the highly selective École Normale Supérieure, intent upon a career in teaching and scholarship. Already writing, discarding manuscripts that failed to suit him or his readers, Sartre uncharacteristically failed his first attempt, in 1928, at the highly competitive *agrégation*, or teaching credential. Yet he achieved the highest score when he retook the examination the following year. The person with the second-highest score, Simone de Beauvoir, herself a budding writer, would remain Sartre's companion and frequent consort for the rest of his life, even as both rejected the "bourgeois" option of marriage as too confining.

Increasingly involved in leftist politics, Sartre during the 1930's taught philosophy at Le Havre—

presumably the Bouville, or "Mudville," of *La Nausée* (1938; *Nausea*, 1949)—and elsewhere, with occasional breaks for travel and writing on the proceeds of a small inheritance. Although Sartre's creative writing was directed toward prose fiction, he also became increasingly interested in the theater, befriending the distinguished actor and director Charles Dullin, who, as a member of the famous "Cartel des quatre," had helped to revolutionize French dramatic art during the decade immediately following World War I. Encouraged by the success of his short story "Le Mur" ("The Wall"), dealing with the Spanish Civil War of 1936 through 1939, Sartre proceeded to complete and publish *Nausea*, drawing considerable attention as an "experimental" novelist.

Drafted into the French army at the start of World War II, Sartre was captured shortly after the fall of France in 1940 and was briefly held prisoner by the Nazis. It was during his incarceration that Sartre wrote his first play, ostensibly for the entertainment of his fellow captives. Although that effort would never be published and never again performed, Sartre, upon his release, continued to write plays along with essays and fiction, finding in the drama a particularly effective vehicle for his developing thought. Indeed, it was through such plays as *Les Mouches* (pr., pb. 1943; *The Flies*, 1946) and *Huis clos* (pr. 1944, pb. 1945; *In Camera*, 1946; better known as *No Exit*, 1947) that Sartre's philosophy of existentialism first became widely disseminated, few readers having the time or patience to attempt the massive treatise *L'Être et le néant* (1943;

*Being and Nothingness*, 1956), in which Sartre exposed his ideas for an audience of fellow philosophers. By the end of World War II, thanks mainly to his plays, Sartre had become a celebrity, his existentialism an international intellectual “fad” subject to frequent misinterpretation.

By about 1950, Sartre had abandoned prose fiction for good, leaving unfinished the fourth volume of the projected tetralogy *Les Chemins de la liberté* (1945-1949; *The Roads to Freedom*, 1947-1950). Increasingly involved in political journalism as founding editor of the periodical *Les Temps modernes*, with columns reprinted in several volumes under the collective title *Situations I-X* (1947-1975), Sartre had also begun work on literary-biographical studies of French authors. Throughout the 1950’s, however, Sartre would continue to write plays with varying degrees of success. *Les Séquestrés d’Altona* (pr. 1959, pb. 1960; *The Condemned of Altona*, 1960) showed Sartre at the top of his playwriting form but would in fact be his last original effort for the stage.

Although personally committed to Marxism, Sartre continued to refuse “card-carrying” membership in the Communist Party, preserving a spirit of critical independence even as he emerged, worldwide, as the most visible and articulate spokesperson of the radical French Left. In 1964, shortly after publication of his selective autobiographical essay *Les Mots* (1964; *The Words*, 1964), Sartre was awarded the Nobel Prize in Literature, which he declined for reasons both political and personal. Having long since adopted as his daughter a sometime mistress more than thirty years his junior, Sartre died on April 15, 1980, in his native Paris, with Simone de Beauvoir at his side.

## ANALYSIS

Almost from the start, Sartre tended to dismiss most existing literature as “inauthentic,” both politically and psychologically. Among the earlier literary critics of Marxist orientation, he distrusted the literary “canon” most of all because it depended upon the capitalist system for its mere existence: Publishing is, after all, a business like any other, and publishers are most likely to print, and profit from, books that encourage the political status quo. At a deeper level, Sartre questioned also the “authoritative” stance of traditional prose fiction, in which characters and their actions are fully “determined” by an omniscient narrator. “The

Wall,” a short story written and collected in *Le Mur* (1939; *The Wall, and Other Stories*, 1948), serves in many ways to illustrate Sartre’s developing theories of fiction, most fully expressed in the lecture-essay *Qu’est-ce que la littérature?* (1947; *What Is Literature?*, 1949), which calls for a new kind of narrative prose more closely related to “real life.”

Told in the first person by a most “unprivileged” narrator, a political prisoner awaiting execution at sunrise along with two others, “The Wall” limits exposition to Pablo Ibbieta’s own sensations and immediate reactions. The other characters, Pablo’s captors and fellow prisoners, are seen and portrayed through Pablo’s eyes alone. Militant and “macho,” Pablo tries hard to face death “cleanly” and with dignity, and he is increasingly alone with his thoughts as he observes the other prisoners’ reactions with more than a hint of disapproval. Detained for further questioning after the two others have been shot, Pablo suddenly finds humor in the situation and sends his captors off on a “wild goose chase,” deliberately misleading them as to the whereabouts of his fellow-conspirator Ramon Gris. In a “trick” ending amply prepared by the preceding action, Pablo’s practical joke will “backfire,” leaving him physically alive but psychologically “dead” after Franco’s troops find and kill Gris exactly where Pablo told them to look. Truth, implies Sartre, is frequently stranger than fiction; fiction, in turn, must reflect that strangeness in order to remain honest or “authentic.”

By the time *Nausea* was published in 1938 Sartre had moved somewhat away from “pure” literary experimentation toward the deliberate use of creative writing as a vehicle for his philosophical speculations. In addition to the later stories eventually collected with his first in *The Wall, and Other Stories*, he was recording observations for future use in his projected tetralogy of novels, to be known collectively as *The Roads to Freedom*. Thereafter, Sartre’s prose fiction tended to reflect his philosophy, and vice versa. It was not long, however, before Sartre found in the theater an even more effective outlet for his ideas, given the relative ease and simplicity of expressing character and behavior on the stage. In *The Flies*, upon which he began work not long after his release as a prisoner of war, Sartre managed to illustrate his concepts of “bad faith,” “freedom,” and “choice” in terms instantly grasped by audiences already familiar with the Orestes legend.

For at least fifteen years prior to the first performances of *The Flies*, Parisian audiences had grown accustomed to the use of ancient myths, preferably Greek, as vehicles for stimulating commentary on contemporary themes, thanks mainly to the plays of Jean Giraudoux. In planning and executing *The Flies*, Sartre used Jean Giraudoux's *Electre* (pr., pb. 1937; *Electra*, 1952) both as inspiration and as target, implicitly rebutting many of the older playwright's conclusions through the metaphysics of existentialism. Whereas Giraudoux portrays Electra as a heroine of sorts, Sartre sees and shows her as a coward who prefers the "comfort" of assumed guilt to the "anguish" of responsibility for her actions. There was also, for the play's first audiences, a strong political message implicit in Orestes' existential defiance of the prevailing social order, likened to that of France under Nazi occupation. For his next dramatic effort, best known in English as *No Exit*, Sartre touched only briefly on political concerns, preferring instead to present the psychological implications of his thinking. There, even more than in *The Flies*, his ideas began to take on a life of their own, readily grasped by spectators who knew or cared little about philosophy.

As expressed through his early plays as well as in his essays, Sartre's mature thought draws sharp distinctions between passive "essence" (a form of being that humanity shares, at birth, with rocks, plants, and animals) and active "existence," a uniquely human form of purposive being too often denied. Of all beings, Sartre maintains, the human form alone is capable of choosing itself, of creating itself through continuous acts of choice. Those human beings who refuse to choose or take responsibility for choices already made are guilty of bad faith (*mauvaise foi*), a fundamental dishonesty that is in its own way a form of death, at the very least a denial of "authentic" human life. Only after physical death, argues Sartre, should it be possible to define an individual human life, as the sum total of that individual's actions; until that time, any effort to identify or fix labels to oneself, to complete the utterance "I am . . ." with a predicate noun or adjective, amounts to premature living death, a refusal of the change and growth peculiar to authentic human life, or existence. By contrast, those who opt for existence are too busy choosing themselves for labels to be applied either by themselves or by the Other.

The Other constitutes for Sartre the greatest threat to individual freedom and responsibility. Each individual, as the Other, tends to limit "my" freedom by applying labels, by attempting to fix "my" essence; blind to "my" intentions, the Other sees and judges only "my" actions, intent upon completing the sentence "He/she is . . ." with a predicate that is tantamount to murder. Too often, contends Sartre, the individual responds—consciously or unconsciously—to such pressure by accepting, or in rare cases even seeking, the Other's definition, often masquerading as approval.

Combining psychology with sociology and politics, Sartre's mature expression, both creative and expository, continued to reach readers and spectators long after he had stopped writing either plays or fiction. A decade or so after Sartre's death, the rapid decline of European communism, an event he never foresaw and would no doubt have deemed impossible, cast serious doubt upon his powers as a political "prophet." Notwithstanding, the power of his best creative work remains intact, fit to challenge generations yet unborn when it was written.

## NAUSEA

**First published:** *La Nausée*, 1938 (English translation, 1949)

**Type of work:** Novel

*An intellectual records the growing awareness of his own futility.*

Among the earliest of Sartre's extant writings, begun and tentatively completed as early as 1936, *Nausea* first took shape in Sartre's mind under the working title "Melancholia," inspired by Albrecht Dürer's engraving *Melencolia I*, which depicts a disrupted and disturbed "thinker." Art, either as product or as process, looms large throughout the work, casting into the foreground Antoine Roquentin's growing sense of superfluity in a hostile, or at least indifferent, universe.

Invited on an archaeological expedition to Cambodia, the trained historian Roquentin, a former archaeology teacher, undergoes a kind of reverse "conversion" upon viewing a Khmer statuette

displayed to him as enticement to make the trip. Suddenly confronted with the immortality or “solidity” of art, Roquentin instantly feels himself “fluid” and “viscous” by contrast. Refusing his colleague’s offer, Roquentin decides to seek immortality of his own through completion of a scholarly project begun some years earlier. His subject is the life and career of the Marquis de Rollebon, a minor

figure in the French Revolution, whose papers his descendants have willed to the public library at Bouville, a port city closely modeled upon Le Havre. Spending much of his time in the public library of Bouville, the remainder in cafés and restaurants, Roquentin becomes increasingly, disgustingly aware of his own weight upon the earth’s surface, of his “existence” as object in a world threaten-

ingly filled with other “existing” objects both living and inanimate. (Significantly, the term “existence” had not yet assumed for Sartre the exact meaning to be applied in his later works.) In one early scene, Roquentin feels that a public park is “smiling” at him, and not in a friendly manner; similarly, a glass half-filled with beer appears to be “watching” him, and his own hand will loom before him as a sudden, monstrous presence, a beached crustacean with hair.

Roquentin’s disorientation, deriving at first from his awareness of nature (including his own) and art, soon extends to include his fellow mortals, living and dead, whose “existence” seems quite as unjustifiable as his own: If he, Roquentin, is superfluous, “in the way,” so, too, are those who have accepted without question their right to “exist.” Particularly odious to Roquentin’s developing consciousness are the capitalist founding fathers of Bouville, immortalized by commissioned portraits hanging in the town museum, and an acquaintance from the library known only as the Auto-didact or Self-Taught Man. A minor bureaucrat, the Self-Taught Man claims to have been converted to “humanism” (in Roquentin’s view, a kind of fuzzy-minded socialism) while serving in World

War I; spending most of his free time in the library, he attempts to fill the gaps in his formal education by reading all the books in alphabetical order, as listed by author’s name. Near the end of Roquentin’s journal, the Self-Taught Man will stand cruelly revealed as a barely repressed ped-erast, banished from the library for life by the Corsican security guard, who has never really liked him anyway.

Thanks to the “alienation effect” of Roquentin’s increasing maladjustment, *Nausea* quickly moves beyond psychological “case history” to scathing—and enduring—social satire, extending outward to embrace politics and art. Also singled out for satire, besides the Self-Taught Man and the bourgeois founding fathers, is Roquentin’s former mistress Anny, a second-rate performing artist whose “real-life poses” he has until now found rather entertaining. In his current lucid state, however, Roquentin quickly sees through Anny’s life of artifice, finding himself quite unable to participate, as before, in her perpetual game playing. Continually haunted by the contingency of human life as opposed to the permanence and “immortality” of certain works of art—including a ragtime tune that he first heard whistled by American soldiers in France in 1917—Roquentin allows his journal to dwindle, lamenting his inability to write a novel that, unlike his unfinished biography of Rollebon, might have enabled him to “make sense” of his experiences.

## No Exit

**First produced:** *Huis clos*, 1944 (first published, 1945; English translation, 1947)

**Type of work:** Play

*United in Hell, a mismatched trio of characters reconsider their botched lives.*

Perhaps the clearest articulation of Sartre’s developing existentialist philosophy, *No Exit* is notable also as a rousing piece of theater, stocked with good “parts” and memorable lines, a perennial favorite with amateur and semiprofessional drama groups. Into a high-rise Hell drawn more from science fiction than from Scripture and presided over

by a nearly silent functionary are cast three recently deceased characters, two women and a man, whose paths never crossed in life and likely never would have. Joseph Garcin, first to arrive, is a journalist whose pacifist convictions are somewhat at odds with his carefully cultivated “macho” image and his exploitative attitude toward women. Next to arrive in the carefully furnished room is Inès Serrano, a postal clerk who makes no secret of her lesbianism or of her parallel disregard for men. The third and last arrival, a vain, stereotypical “brainless blonde” with aspirations toward snobbery, soon polarizes the action by attracting both Garcin and Inès with her charms.

In its themes and language, *No Exit* often moves too close to popular culture, “soap opera” in particular, to be taken seriously as literature. Freely trading accusations, insults, and flirtations as each character seeks to get his or her own way, the trio quickly attracts and holds the spectator’s attention for approximately one hour’s uninterrupted playing time, taking turns as torturer and victim as they act out Sartre’s conviction, restated as a line in the play, that Hell is other people.

With the exception of Estelle Rigault, whose perceived beauty allowed her aunt and guardian to “marry her off” at an early age to a much older man with money, and whose subsequent life was led among the idle rich, the new inhabitants of the room with no exit are hardly surprised to find themselves in Hell; they are surprised only by the details of the place. Garcin and Inès have both died violently, in ways that both feel they richly deserved: Garcin has mistreated his wife, and Inès considers herself responsible for the death of a cousin whose wife became first her lover and subsequently her killer in a murder-suicide. Only Estelle has died a “natural” death, yet she, too, is soon revealed as a murderess, having drowned her newborn “love child,” whose father was too poor to be considered as a future husband.

Throughout the action to follow, it becomes clear that Estelle, although technically guilty of murder, is in Hell mainly because of her passive, unexamined life, lived in “bad faith” and in hopes of pleasing the Other, whomever he/she may be. Garcin, shot by firing squad at the start of World War II, ostensibly for his pacifist convictions, still fears that he might have been considered a deserter and a coward, having been arrested in flight

between Brazil and Mexico City. Inès Serrano, more lucid than the other two about their collective situation, may seem at first glance to be ill-placed in Sartre’s selective Hell, serving so often as the playwright’s “voice” and spokesperson. On reflection, however, it becomes clear that Inès has chosen her own Hell, never having questioned society’s judgment of her homosexual lifestyle; at the time, “damned women” was a common euphemism to denote lesbians, and Inès has accepted the label at face value, without ever trying to reach beyond it in search of genuine self-discovery. Still, it is Inès who will conduct most of the “hearing behind closed doors,” capturing the sense of the original French title. Garcin will remain torn between the two women, Estelle, who, trying hard as ever to please, appeals to his body, and Inès, whose superior intellect dares him to prove that he was not a coward when he fled Rio. Estelle could care less about Garcin’s cowardice, “so long as he kisses well”; Inès, meanwhile, covets Estelle’s affections and keeps Garcin’s advances eternally in check as she renders her “verdict” upon his motivations for leaving Brazil. The characters are indeed dead, the “bottom line” has been drawn beneath their lives, and nothing can be changed. Imprisoned in a fake-looking room that replicates the “bad faith” and falsehood of their lives, they are “doomed” to torture one another for all eternity. “Okay, let’s get on with it,” says Garcin as the curtain falls.

## SUMMARY

As the primary exponent and expositor of existentialism, Jean-Paul Sartre drew considerable attention from worldwide media during the years following World War II. He consolidated his reputation with memorable essays and with well-crafted plays that brought his philosophical ideas to instant but durable life on the stage, permanently establishing such concepts as “authenticity” and its opposite, “bad faith,” in the common consciousness. His first novel, *Nausea*, discovered outside France only after his plays had reached a wide audi-

ence, had already influenced the development of the French novel and continues to command attention as a minor masterpiece of psychology and satire in prose fiction.

## DISCUSSION TOPICS

- What future for human possibilities does Jean-Paul Sartre see?
- Sartre's *No Exit* has been called good theater but not "to be taken seriously" as literature. Can this highly successful play be considered nonliterary?
- What are the burdens imposed by Sartre's theory of freedom?
- Which does Sartre consider most important in life: art or political philosophy?
- Which does Sartre portray most convincingly in his fiction: existential success or failure?
- Is it necessary to study Sartre's philosophical works to understand his version of existentialism?

*Les Mots*, 1964 (*The Words*, 1964)

*L'Idiot de la famille: Gustave Flaubert, 1821-1857*, 1971-1972 (3 volumes; partial translation *The Family Idiot: Gustave Flaubert, 1821-1857*, 1981, 1987)

*Un Théâtre de situations*, 1973 (*Sartre on Theater*, 1976)

*Les Carnets de la drôle de guerre*, 1983 (*The War Diaries of Jean-Paul Sartre: November, 1939-March, 1940*, 1984)

*Lettres au Castor et à quelques autres*, 1983 (2 volumes; vol. 1 *Witness to My Life: The Letters of Jean-Paul Sartre to Simone de Beauvoir, 1926-1939*, 1992; vol. 2 *Quiet Moments in War: The Letters of Jean-Paul Sartre to Simone de Beauvoir, 1940-1963*, 1993)

*Le Scénario Freud*, 1984 (*The Freud Scenario*, 1985)

## DOROTHY L. SAYERS

**Born:** Oxford, England

June 13, 1893

**Died:** Witham, Essex, England

December 17, 1957

*Widely recognized for her meaningful contribution to modern detective fiction, Sayers also had unimpeachable credentials as a theologian and a Dante scholar.*

### BIOGRAPHY

Born in Oxford, England, on June 13, 1893, Dorothy Leigh Sayers (SAY-urz) was the daughter of the Reverend Henry Sayers and Helen Leigh Sayers. Her father was a classical scholar and, at the time of her birth, headmaster of Christ Church Cathedral Choir School. Her mother was the grandniece of Percival Leigh, one of the founders of *Punch*. Sayers always included the initial "L" in her name.

As often happened in the 1890's, Sayers's father was financially responsible for his mother, two unmarried sisters, and a brother who had been crippled by a stroke. He probably also considered himself responsible for their moral and spiritual well-being. When their Brewer Street house could no longer contain them all, they moved to Lincolnshire, where the Reverend Sayers took up the position of a country clergyman.

Sayers lived most of her childhood in an isolated rectory in the Fen Country. Her mother settled happily into the life of a country minister's wife. Her father believed that a good Christian helped others, and he often used his own funds to help his parishioners, even opening his house when necessary. Bluntisham Rectory was enormous but, even in those times, somewhat primitive. While candles and oil lamps lit the rooms, they also threw strange shadows on the wall. Hot water had to be hauled upstairs and then back down again. The entire fam-

ily found it quite a change from their house in Oxford, where they had running water and gaslights. Nevertheless, Sayers had plenty of fresh air and large lawns on which to play whenever her friends came to call.

Her early schooling took place at home. Her father usually taught boys and saw no reason to teach Sayers differently from the way he taught them. By the age of four, she could read; by six she had begun to learn Latin. She was taught French by a governess, and she also mastered German. Sayers entered the Godolphin School when she was sixteen. Her only knowledge about boarding school had come from books, and Godolphin did not quite fit her preconceived notions. Girls, however, were allowed some freedom there, and one of her essays was published in the school magazine. Measles, complicated by pneumonia, forced her to leave Godolphin for a time. She did return to school but chose to continue her studies at home. She won the Gilchrist Scholarship to Somerville College in Oxford.

Oxford challenged Sayers. She made friends and was able to expand her heretofore limited social opportunities with men. Of course, the rules governing behavior between the sexes were strictly enforced, but even so, she developed an unrequited passion for the choirmaster. She was graduated with distinction.

Teaching was one of the few professions considered suitable for women in the early 1900's. Sayers obtained a teaching post in Hull High School for Girls and taught modern languages there from 1915 to 1917. In 1917, her father exchanged par-

ishes with another clergyman and moved even deeper into the country. There was little for Sayers to do there except read and take long walks. The solitary walking scandalized her father's parishioners, as did her occasional cigarette. In those days women simply did not walk about unescorted and certainly did not smoke. She escaped from the country by taking a job with Blackwell's, a publishing house. Blackwell published her poems.

Back in Oxford, she met and fell in love with the man that some contend was the prototype for her most famous detective, Lord Peter Wimsey. Eric Whelpton did not return her love. Surprisingly, she took a post as his assistant at a very prestigious boys' school, Les Roches, in France. Rather than marry a French woman, Whelpton fled back to London, leaving Sayers to wind up his affairs and bring back his luggage.

She set about earning a master of arts degree and was among the first women ever to receive that degree from Oxford. In 1921, Sayers took a job in an advertising agency and achieved some success as an advertising copywriter. Some of her experiences there can be found in *Murder Must Advertise* (1933).

Her first book, *Whose Body?*, was published in 1923. She continued to work in the advertising agency, writing books at night. Despite an often grueling schedule, she published eighteen mysteries; in the next twenty years, she earned an incomparable reputation as a writer of detective fiction.

While all of this was going on, Sayers became romantically involved with a fellow writer named John Courson. Their affair lasted little more than a year. Following that, she quickly entered into a relationship with a motorcycle mechanic and became pregnant. She gave birth to a son in a private clinic and asked an eccentric cousin to rear him. She did not mention her son to even her dearest friends; he did not learn of his mother's identity until much later. In 1926 she married Captain Oswald Arthur Fleming. Fleming called himself a major but was always addressed as "Mac." Mac drank a lot and did not work very much. Perhaps that was one reason why their relationship was somewhat distant. Nevertheless, they stayed together until his death in 1950.

Sayers had stopped writing detective novels by the beginning of World War II. Nevertheless, she commented on the dramatic world events in the "Wimsey Letters" published by *The Spectator*. She

also returned to her first love: scholarly works. She wrote a series of plays about the life of Christ that focuses on the personalities of Jesus and his Apostles, and authored a translation of Dante that emphasized his unique qualities.

Sayers was awarded an honorary doctorate from the University of Durham. Several of her biographers relate how much she enjoyed that honor. Yet when she was offered an honorary doctor of divinity degree, she declined. Some people suppose that she felt unworthy of that honor because of her unorthodox lifestyle. One could also conjecture that she did so out of deference to the values that she had learned from her father.

Never very health conscious—she was overweight and was also a heavy smoker—Sayers died of a heart attack in Witham, England, on December 17, 1957. Sayers lived in interesting times. She was seven years old at the turn of the century, and when World War I broke out she was twenty-one. She lived through the Victorian era, the Jazz Age, and on into the Atomic Age. Her fiction reflects these momentous changes.

## ANALYSIS

The times in which she lived influenced Dorothy L. Sayers's characterizations as she merged manners and mores into her novels. When she first went to Oxford, women had to be accompanied by a chaperone to their lectures and tutorials. Although women earned degrees, Oxford did not confer them until 1920. Sayers was one of the first women to earn a master of arts degree from Oxford, and her female characters reflect the pioneering attitude necessary for that achievement.

In *Unnatural Death* (1927; also known as *The Dawson Pedigree*), Sayers introduces an ancillary sleuth, Miss Climpson. Alexandra Katherine Climpson, a spinster who has lived most of her life in boardinghouses, is a feisty lady with a large measure of common sense and an adventurous spirit. Over the course of Sayers's novels, Climpson becomes the head of an unusual detective agency that masquerades as a typing bureau and is staffed only by women. In other novels that follow, Lord Peter Wimsey often uses operatives from Climpson's agency to help him solve crimes. *Unnatural Death* revolves around women, one of whom has the distinction of being one of Sayers's most vicious and amoral criminals.

In a time when women were shielded by men from the unpleasant aspects of life, Sayers did not hesitate to introduce controversial, even unmentionable, themes into her books. For example, in *Unnatural Death* some of the characters are lesbians. In *Whose Body?* Lord Peter Wimsey observes a unique religious and biological anomaly that proves that the corpse is not Sir Ruben Levy.

Sayers's biographers and critics often speculate about Lord Peter Wimsey, her most famous detective. Some of them assume that he is an amalgam of the men with whom she was romantically involved, usually selecting Eric Whelpton and John Cournos to prove their point. Yet when Sayers talked about Wimsey she often joked. She once remarked that she interviewed a large number of people before she employed him. She admitted endowing him with the luxuries that she could not afford. A full-blown imaginary playmate for grownups could be another explanation for Wimsey. Given Sayers's sense of time and place, she would have been perfectly capable of inventing a man who would respect women, believe that they were morally and intellectually his equals, and accord them the dignity that they deserve.

Sayers aged and evolved the personalities of her characters. Four novels pairing Harriet Vane and Lord Peter Wimsey—*Strong Poison* (1930), *Have His Carcase* (1932), *Gaudy Night* (1935), and *Busman's Honeymoon* (1937)—best illustrate this aspect of her writing. Both Vane and Wimsey grow emotionally as their love story develops. *Busman's Honeymoon* is the last full-length novel in which Wimsey appears, although Wimsey and Vane are together again in two short stories. Wimsey welcomes his firstborn son in "The Haunted Policeman." He and Vane find the time to explore a local secret and play practical jokes with their three children in "Talboys." It has been said that Sayers received from her fans an extraordinarily large number of letters giving the Wimseys advice on child rearing. In any case, Sayers reviews the latest theories of rearing children in "Talboys" and concludes that children need to be treated as individuals.

That she was taught by her father and shared her early education with boys undoubtedly helped her to form her underlying assumptions about her identity, abilities, and prospects. That she achieved two college degrees in a time when women generally did not go on to higher education helped her

to develop a sense of purpose and integrity that she imparted to her female characters. In *Gaudy Night*, for example, the women not only display character and integrity, but they take pride in the quality of their work. Her appreciation that words have the power to influence others and evoke their behavior can be found in all of her work.

Sayers understood that personalities are central to the detective novel, and she applied this insight effectively. The human element became one of her central themes, overflowing into her scholarly works as well. Her translation of Dante, for example, helps the reader appreciate him as a historical person.

Sayers used language effectively. With only a few words she could set the stage and "flesh out" a character. This ability is demonstrated on the first page of *Strong Poison*. She employed a wide spectrum of language to develop her characters, ranging from the broad Scots accent found in *The Five Red Herrings* (1931, also known as *Suspicious Characters*) to the sensational speech delivered by one of the characters near the end of *Gaudy Night*. Quotations from learned works and obscure poets can be found sprinkled throughout all of her novels.

Sayers wanted to be known as a scholar, and toward the end of her life she resumed her scholarly pursuits. Yet her scholarship appears even in her detective fiction. She sets forth a puzzle, guides her readers to the finish in a leisurely and often elegant fashion, incorporates plausible and well-researched features into the plot, and manages to impart a sense of time and place. Her place in the pantheon of modern detective fiction cannot be underestimated.

## STRONG POISON

**First published:** 1930

**Type of work:** Novel

*This story offers a potent mix of arsenic, a well-hidden will, a séance, and two people who start to fall in love.*

In *Strong Poison*, Sayers introduces Harriet Vane, the love of Lord Peter Wimsey's life. Vane writes mysteries; Wimsey solves them. A little something in common never hurts a relationship and for

the moment, mysteries are all that they have in common.

With a few deft words Sayers draws her reader into a British courtroom and introduces the jury. Vane, a writer of mysteries, finds herself plunged into the most important mystery of her life. Accused of murdering her lover, and on trial for her life, Vane seems to be on the verge of meeting the hangman: If the jury brings in a verdict of guilty, the punishment will be death by hanging.

Vane had just finished some extensive research about ways to poison people, details that she had planned to use in her next book. She had even bought some arsenic. Vane's lifestyle, morals, and integrity were also called into question by the judge. She was living with, but not married to, the man she allegedly murdered. That was a living arrangement quite unbecoming a woman in the 1930's; in those years, women waited for the ring and the preacher before entering into a sexual relationship. Things do not look good for Vane. She may have to keep her date with the hangman.

Sayers presents Vane as an intelligent, but not conventionally pretty, young woman in her twenties. Although Sayers delineates the rest of the cast of characters, she shrouds Vane in mystery. Not so the victim; Sayers draws a complex portrait of him. These devices keep the reader guessing about Vane's innocence.

Sayers does not divulge Lord Peter Wimsey's reasons for attending the trial. Her readers may deduce, or perhaps assume, that he came to the trial because he believed his friend Chief Detective-Inspector Charles Parker made a serious mistake. Wimsey believes that Parker has arrested and brought to trial the wrong person. Although exhausted by the rigors of the trial, Vane greatly interests Wimsey. He must employ all of his crime-solving abilities if he is to save her. He asks Miss Climpson to help, and she embarks on an adventure that tests her skills and her conscience.

Wimsey eventually falls in love with Vane. As

soon as he has a chance, he proposes marriage. She does not accept his offer until the third book in the series. By this device, Sayers begins a leisurely development of these characters in three more novels. With the final novel, *Busman's Honeymoon*, both characters emerge as full-fledged human beings who espouse Sayers's philosophy and ethics.

## GAUDY NIGHT

**First published:** 1935

**Type of work:** Novel

*A series of unsettling and extremely unpleasant incidents in staid, respectable Oxford's Shrewsbury College plunge Harriet Vane and Lord Peter Wimsey into their most famous case.*

Sayers set this novel in Shrewsbury, a women's college. Sayers uses this novel to explore women's place and rights in the brave new postwar world. She refutes some of the biases attributed to Tertullian, Saint Thomas Aquinas, and other early philosophers that are so embedded in language as to be taken as fact. These assumptions still influence women's lives and the laws and social issues that affect them.

Still suffering from the repercussions of the trial and its attendant publicity, Vane decides to attend her college reunion, which has been named a Gaudy Night. Just as she begins to enjoy herself, she finds a particularly vicious note in her academic robe. After the gala weekend is over, some unpleasant incidents that began at Shrewsbury continue and start to escalate. Vane is asked to investigate.

Vane takes up residence at Shrewsbury and, under the cover of scholarly research, begins her inquiries. Inevitably she examines her own wants, needs, and motives. She must, for example, decide

why she calls Lord Peter Wimsey to help her. As Wimsey helps her find the culprit, he helps her come to the conclusion that men and women can love as equals. Vane decides that marriage need not be conducted along the old traditional lines. She discovers that women can retain their identities and their interests. Wimsey offers what he says will be his final marriage proposal, in impeccable Latin. Vane accepts him in equally correct Latin syntax.

By combining romance with mystery, Sayers introduced a subtle variation into the genre. This variation has been taken up by modern authors, and books in this new genre regularly appear on the best-seller lists.

#### SHORT FICTION:

- Hangman's Holiday*, 1933  
*In the Teeth of the Evidence, and Other Stories*, 1939  
*Lord Peter*, 1972 (James Sandoe, editor)  
*Striding Folly*, 1972

## SUMMARY

Dorothy L. Sayers played with words just as a poet does. Indeed, some of her first published works were poems. No doubt the discipline of this art form helped her construct the settings and dialogues that make her novels so memorable. Her fascination with the ways in which people use words differently shows up in the conversations she wrote for her fictional characters. She suggested using imagination—giving thought to the reader's situations and evaluations—in interpersonal communication so that better understanding could take place. She knew her tools and used them well.

Maxine S. Theodoulou

## DISCUSSION TOPICS

- To what tradition of detective stories should Dorothy L. Sayers's Lord Peter Wimsey novels be related?
- What does Harriet Vane contribute to Lord Peter Wimsey's career as an amateur detective?
- Peter Wimsey's manservant, Bunter, is a strong recurring character in Sayers's detective works. How does he contribute to Wimsey's success?
- Sayers argues that, ideally, Dante's *La divina commedia* (c. 1320; *The Divine Comedy*, 1802) should be read "straight through" for the story and the verse but agrees that readers cannot go unaided. Why not?
- What marks of distinction can one find in Sayers's translation of Dante?
- What medieval works other than *The Divine Comedy* did Sayers translate?

## FRIEDRICH SCHILLER

**Born:** Marbach, Württemberg (now in Germany)  
November 10, 1759

**Died:** Weimar, Saxe-Weimer (now in Germany)  
May 9, 1805

*Widely recognized as Germany's greatest playwright, Schiller dominates his country's stage to the present day. He was also a superb poet and essayist on aesthetics.*

### BIOGRAPHY

Poet and playwright Johann Christoph Friedrich von Schiller (SHIHL-ur) was born on November 10, 1759, in Marbach, Württemberg (now in Germany). His father was Johannes Kaspar Schiller, a captain, surgeon, and royal forester under Duke Charles Eugene of Württemberg. His mother, Elisabeth Dorothea Kodweiss, was a stout-minded, religious woman who had a strong influence on Schiller's early years. He had five sisters.

Schiller began his education at the age of seven, when he was enrolled in a Latin school at Ludwigsburg to be groomed for the clergy. During his time there, it was discovered that he had a great intellectual gift. When Schiller was thirteen, the duke of Württemberg ordered him to attend his military academy for intellectually gifted students at Karlsschule in Stuttgart. At first, Schiller was forced to study law, but he was allowed to switch to the newly formed medical curriculum. He had no interest in medical studies either but preferred it to law. Students at Karlsschule were allowed no outside visits, letters, or relatives. Their lives were regimented. Schiller managed to study poetry and drama, including the works of William Shakespeare, though it was against school doctrine. He also studied the Sturm und Drang (Storm and Stress) movement from German theater, which heavily influenced him in his early plays. In 1780,

he completed his medical studies at Karlsschule but was not allowed to practice medicine.

Schiller left Karlsschule with a completed manuscript of his first play, *Die Räuber* (pb. 1781, pr. 1782; *The Robbers*, 1792), written in the Storm and Stress style. In 1781, it was printed—at his own expense. That was the beginning of many debts incurred until the last few years of his life. The following year, it was produced, on January 13, at the Mannheim National Theater, where it created a sensation. After deserting an army position in Stuttgart, Schiller spent the next ten months as a fugitive. During his flight, he wrote two more plays: *Die Verschwörung des Fiesko zu Genua* (pr., pb. 1783; *Fiesco: Or, The Genoese Conspiracy*, 1796) and *Kabale und Liebe* (pr., pb. 1784; *Cabal and Love*, 1795).

Schiller signed on as a resident poet with a one-year contract at the theater in Mannheim. *Fiesco* was performed with only moderate success. On April 13, 1784, *Cabal and Love* was produced and became an audience favorite. Schiller's success marked him as a master of German drama and freed him from the tyranny of the duke of Württemberg. In 1784, he wrote a prose version of a work that he later rewrote as a play, *Don Carlos, Infant von Spanien* (pr., pb. 1787; *Don Carlos, Infante of Spain*, 1798). In its final form, it appears as blank verse. The play marked the end of Schiller's playwrighting for the next ten years.

Schiller turned next to composing poetry and short stories. In 1789, he attempted to write a novel, *Der Geisterseher* (1789; *The Ghost-Seer: Or, The Apparitionist*, 1795), which he later abandoned. The same period also saw the beginning of his his-

torical writings and philosophical essays. He met the great German writer Johann Wolfgang von Goethe, who secured a professorship of history for Schiller at the University of Jena. Schiller gave his first lecture in 1789. The new appointment, plus small pensions and stipends from various admirers, made Schiller financially independent, a situation that lasted only two years. In 1793, following the death of his nemesis, the duke of Württemberg, Schiller returned to his homeland and received a hero's welcome. During his years of exile he had become a famous literary personage. He made the trip with his wife, Charlotte von Lengefeld, whom he had married in 1790. During their visit to Stuttgart, a son was born.

The turning point in Schiller's life came the following year in July, 1794, when he became associated with Goethe and his Weimar Theater. Despite a ten-year age difference, the two became close friends. Schiller began writing plays again for Goethe's theater, as well as a number of poems and aesthetic essays. He moved to Weimar permanently in 1799. From that time until his death six years later at age forty-five, Schiller remained busy writing plays, translating foreign dramas by such writers as William Shakespeare and Jean Racine, and adapting other material for the stage. His masterpiece, *Wilhelm Tell* (pr., pb. 1804; *William Tell*, 1841), premiered in 1804.

On May 1, 1805, Schiller suffered acute lung inflammation. Despite his worsening condition, the writer refused to stop working. Schiller died on May 9 in Weimar. First buried in a local cemetery on May 12, his remains were transferred two years later to the vault of Duke Charles Augustus.

## ANALYSIS

Schiller was a German historian, essayist, poet, and playwright. During his short life, he wrote more than a dozen plays and a number of translations or adaptations for the stage. He also wrote history books, numerous essays, and a large number of poems. It was once said that if there was ever any hope of a German Shakespeare, Schiller would be that man. Each year, studies of Schiller's work reveal new essays, monographs, and books. His life, philosophy, and writings have been examined with great intensity. In Germany, he is regarded with intense admiration.

Schiller's achievements are remarkable because

they came at a time when German culture and language were held in ill repute. The country was dominated by the literary examples of foreigners, especially the French, Italians, and English. Even the language was not considered a proper form of literary expression. Schiller changed all of that. Almost single-handedly, he revitalized the language as a means of artistic expression, showing the world the power and importance of German culture. He firmly believed in, and wrote with conviction on, the civilizing, liberating, and cleansing mission of art. No matter which genre he adopted, Germany embraced him as a national hero during his lifetime. Stories are told of how he was lionized and worshiped whenever he appeared in public. His shadow loomed large and influenced such important individuals as Friedrich Nietzsche, Georg Wilhelm Friedrich Hegel, and Karl Marx.

The key to understanding so complex a figure as Schiller may well rest with his essays on aesthetics and his poetry. He believed that there was a vital connection between art and morality. It was a belief that deepened and changed over the years. In his poem "Die Künstler" ("The Artists"), for example, Schiller exalts art as a unifying force that helps humankind emerge from a bestial existence to a much higher spiritual plane until life itself becomes a work of art. Counter to the prevailing opinion of the time, Schiller refused to compartmentalize life. He believed that intellect, emotions and passions, bodily pleasures and pains, moral values, and the soul's immortality should be viewed not as separate entities but as unified ones. In some of his essays, Schiller argues that art should be complete and perfect in itself, rivaled only by religion. The basic ingredient is good taste, which Schiller applies not only to art but also to morality. He goes further and suggests that good taste applies even to political and social programs.

Schiller's philosophy views each person as a member of the community and art as the primary force of civilization. He places large demands on the artist in society, and rather than viewing that individual as a mere entertainer, he exalts him or her as a leader. His poem "Das Eleusische Fest" ("The Festival of Eleusis") makes it clear that without the cleansing contribution of the artist, all technical, commercial, political, and social advances suffer. In "Der Spaziergang" ("The Walk"), inspired by the tragic events of the French Revolution, he

shows how an artificially contrived urban civilization will, in time, be destroyed by its ferocious and vengeful nature. To Schiller, art inspires philosophy and religion; moreover, the artist is closer to nature than other people are because nature remains his or her true inspiration. In one of his philosophical lectures, Schiller postulated that people of the future would come into complete harmony with nature, becoming one with plants and animals, and would develop a high moral and social code of ethics.

Schiller's philosophy reverberates down through the ages and is still pertinent today. Alfred North Whitehead echoes Schiller's sentiments in *Science and the Modern World* (1925):

[G]reat art is more than a transient refreshment. It is something which adds to the permanent richness of the soul's self-attainment. It justifies itself both by its immediate enjoyment, and also by its discipline of the inmost being. Its discipline is not distinct from enjoyment, but by reason of it. It transforms the soul into the permanent realisation of values extending beyond its former self.

Schiller carried these principles of art into his plays, as well. His heroes, for example, are always inspired by the loftiest of ideals. If they fail, it is invariably because of the ignoble means that they employ or because they are betrayed by the very corruption that they are trying to eradicate. Schiller's quest for idealism in art and life, so well described in his poems and essays, caused serious problems in his dramas. The playwright grossly altered historical events and personages, inventing new characters to suit his purposes. In his play *Maria Stuart* (pr. 1800, pb. 1801; *Mary Stuart*, 1801), Schiller builds the play's conflict around two dominant personalities, Mary, Queen of Scots, and Queen Elizabeth I, meeting in a dramatic confrontation. Critics quickly pointed out that the two avowed enemies never met. Their stage characters were inaccurately portrayed. In addition, the fanatical figure of Mortimer was invented, and important dates and locations were altered.

Schiller took even greater liberties with *Die Jungfrau von Orleans* (pr. 1801, pb. 1802; *The Maid of Orleans*, 1835). His St. Joan, called Johanna, is told by the angels that she must never lose sight of her spiritual quest or her powers would vanish. St. Joan

inexplicably finds time for a romantic dalliance with a handsome English officer and, therefore, loses her special magic, as prophesied. She is banished from court and imprisoned by the English but eventually escapes. St. Joan dies at the end, not burning at the stake but with sword in hand on the battlefield, as she leads the French to one last battle against the English.

Schiller laughed at the criticism leveled at him. He stated that art must not be circumscribed by history. The artist must show life as it ideally should be lived and not as it really exists. Unlike the historical figures of *Mary Stuart* and *The Maid of Orleans*, Schiller's last play, *William Tell*, is based on the mythic medieval Swiss hero.

## WALLENSTEIN

**First produced:** *Wallensteins Lager*, 1798 (first published, 1800; *The Camp of Wallenstein*, 1846); *Die Piccolomini*, 1799 (first published, 1800; *The Piccolominis*, 1800); *Wallensteins Tod*, 1799 (first published, 1800; *The Death of Wallenstein*, 1800)

**Type of work:** Play

*General Wallenstein seeks to make peace with his enemies during the Thirty Years' War against the emperor's wishes. His plans are discovered, and he is assassinated. The war is destined to drag on endlessly.*

*Wallenstein* is a huge historical drama spread over three parts. Schiller began the work in 1796, and it was first drama written after his ten-year period of historical and philosophical writing. It covers an equally huge piece of history, the Thirty Years' War, which was fought throughout central Europe from 1618 until 1648. The war was fought between the Catholic forces of the Hapsburgs' Holy Roman Empire, headed at first by Emperor Ferdinand II of Austria, and the various Protestant states of Germany, Sweden, and France. Schiller had studied the period closely and had written a three-volume history of the conflict, *Geschichte des dreissigjährigen Krieges* (1791-1793; *History of the Thirty Years War*, 1799). A later German playwright, Berthold Brecht, used the same historical period in

*Mutter Courage und ihre Kinder* (pr. 1941, pb. 1949; *Mother Courage and Her Children*, 1941), although Brecht chose to write from the peasants' point of view.

Schiller takes as his hero Count Albrecht Wenzel von Wallenstein (1583-1634), a Bohemian Protestant who had converted to Catholicism. (Bohemia is now the western province of the Czech Republic.) In Wallenstein's youth, the Protestant Czech rulers had been replaced by German-speaking Catholics and incorporated into the Holy Roman Empire again as an Austrian possession. Wallenstein, therefore, has a foot in both camps. Historically, Wallenstein gained power and possessions in an ambitious advance until he was finally put in charge of all of the emperor's forces in the Holy Roman Empire (mainly Germany and Austria) and the Netherlands (Holland and Belgium).

The first and shortest part of the drama is *Wallensteins Lager* (pr. 1798, pb. 1800; *The Camp of Wallenstein*, 1846), which is set in 1633. Its drama mainly lies in the diversity of people and groups within Wallenstein's standing army of some 150,000 soldiers. They range from landless peasants to well-trained cavalry. As the war drags on, these soldiers have been corrupted by the conflict, so that rape, plunder, and murder seem commonplace. Yet they are fiercely loyal toward Wallenstein himself. Toward the end of the play, a monk, apparently sent by the emperor, denounces their many sins, and playgoers are reminded that this "religious" war is no such thing.

The second part of *Wallenstein* is a five-act play, *Die Piccolomini* (pr. 1799, pb. 1800; *The Piccolominis*, 1800). Max Piccolomini is a general brought in from the Hapsburgs' Spanish possessions, with a view to replacing Wallenstein. The emperor knows that Wallenstein is thinking of negotiating with the Swedes against his wishes, ostensibly to bring some sort of peace after sixteen years of fighting, and sees this as betrayal. Piccolomini's son, Octavio, falls in love with Wallenstein's daughter, Thekla. His father demands that Octavio choose between the treacherous Wallenstein and himself.

In the third part of the drama, *Wallensteins Tod* (pr. 1799, pb. 1800; *The Death of Wallenstein*, 1800), the two lovers commit suicide, and Wallenstein is eventually assassinated by some of the small-minded men whom he has trusted. His plans for peace and ambitious dreams for himself come to nothing.

## WILLIAM TELL

**First produced:** *Wilhelm Tell*, 1804 (first published, 1804; English translation, 1841)

**Type of work:** Play

*Legendary Swiss hero William Tell, as chronicled by Schiller, saves his country from the corruption of an evil tyrant and is hailed as a redeemer.*

*William Tell* is considered by most critics to be Schiller's dramatic masterpiece. It was an immediate success after its premiere at the Weimar Hoftheater on March 17, 1804. Schiller directed the production. It is his most widely translated drama and the one play likeliest to be associated with Schiller outside of Germany. Schiller's most popular play is also one of his shortest and the only one to have a happy ending.

Most people are acquainted with the William Tell legend without Schiller or his play. The exploits of the legendary Swiss hero who fought against tyranny and shot the apple off his son's head have now passed into folklore. Tell, as seen through Schiller's eyes, is depicted as a great hero, a man who exemplified the best in the Swiss people.

*William Tell* is a powerful blend of Swiss history and popular legend. Schiller rearranges recorded history, as usual, and eliminates or telescopes important events. Since he framed his play around a fictional character, however, the dramatic alterations are less emphatic than those in *Mary Stuart* or *The Maid of Orleans*. The focus of the play is on the Swiss people's oppression by Albert I, a Hapsburg emperor, who reduced Switzerland to an Austrian dominion. Ruling for him in Switzerland is the sadistic Vogt Hermann Gessler, who overstepped his authority and trampled on the people's rights.

The play opens with great impact. A man is flee-

ing for his life from imperial troops. Tell steps in and rescues him. Soon, the peaceful Tell is embroiled in his country's fight for freedom, which reaches a high point during the apple shoot in act 3, culminating one act later when he slays Gessler with an arrow. In act 5, there is a joyous festival, the arrival of the imperial assassin seeking refuge, and the celebration of Tell as a national hero and liberator.

*William Tell* is a fairy-tale play about a folk hero who triumphs over tyranny. As in any good fairy tale, the hero must do battle and defeat an evil figure, in this play Gessler, to free his people. Schiller uses the mythic legend, however, to advance his concept of political liberation. He takes the exciting conflict between good and evil, the commanding appearance of a likable hero, and a dozen spectacular outdoor settings and fuses them together with a people's struggle to overthrow a dictator. The heady mix makes for a compelling and visually exciting drama.

Schiller began a new dramatic work, "Demetrius," before he died, but only fragments survive; *William Tell* remains his last completed play. Throughout the years, it has received numerous productions. Some critics suggest that it may be the longest-running play in dramatic history. Schiller's success on the stage is rivaled worldwide by the continuing popularity of his poetic works.

### **"THE CONQUEROR," "THE GODS OF GREECE," AND "THE SONG OF THE BELL"**

**First published:** "Der Eroberer," 1777  
(collected in *The Poems of Schiller*, 1851);  
"Die Götter Griechenlands," 1788  
(collected in *The Poems of Schiller*, 1851);  
"Das Lied von der Glocke," 1800  
(collected in *The Poems of Schiller*, 1902)

**Type of work:** Poems

*Schiller's poetry is on a grand and lofty scale, full of philosophical ideas touching on art and morality, while extolling the best in humankind.*

"Der Eroberer" ("The Conqueror"), "Die Götter Griechenlands" ("The Gods of Greece"), and

"Das Lied von der Glocke" ("The Song of the Bell") are representative works belonging to three distinct creative periods in Schiller's life. The first period of his youth to 1784 is full of vigor, enthusiasm, and a certain self-righteous attitude. The poetry is supercharged with passion and reflects his influence by the Storm and Stress tradition that also fueled his early drama. The second period, dating from 1785 to 1789, demonstrates a growing maturity. The poems are still flamboyant, but there is greater concern for philosophical ideas. From 1790 to 1795, Schiller stopped writing poetry altogether, concentrating his energies on historical works and essays. When he resumed in 1795, he had fully matured as a poet. His compositions are confident and dynamic. His style is simple, yet powerful. He draws on a wide range of interests, including history, literature, and philosophy.

Schiller's first important poem, "The Conqueror," was first published in 1777 in *Schwäbischers Magazin*. The poet was energetic and full of revolutionary ardor. He takes aim at despots and their ruthless ambitions. His protagonist is an evil conqueror who has devastated the land with a sword dipped in blood. The warrior dies and ascends to Heaven, where he is judged before God. With arrogance, he sits on the scales of justice, and his deeds are piled opposite him. They balance evenly until the poet invokes a curse that tips the scales, sending the conqueror to Hell. "The Conqueror" is an attack on the despised duke of Württemberg. Schiller soon learned to sublimate his fury.

Schiller's second period witnessed a number of fine poems, of which "The Gods of Greece" is typical. It was first published in the March, 1788, issue of *Der Teutsche Merkur*. Schiller at this time was still full of rebellious spirit. He looked back to ancient Greece, idealizing the past. He contrasted its attempt to help humanity find peace with itself to the soulless concept of Christianity. Schiller later revised the poem in 1793, after its critical reception, by eliminating the passages on Christianity.

Schiller's best-known poetic work, "The Song of the Bell," is in the form of a ballad. The poem's genesis occurred when Schiller visited a bell foundry at Rudolstadt. The poem has a narrator, the master bell maker, who shows his apprentices how casting a bell is similar to living the various

phases of life. Schiller's bell stands for harmony, peace, and the possibility of creating a better society.

Schiller's poetry usually coalesced around a central tenet or idea. His aim was to appeal to the ear and the mind. Like the ancient Greek thinkers whom he admired, Schiller posed philosophical questions in his poetry about what is good, beautiful, and true in life and proceeded to answer them. The poet believed fully in humanity and anticipated a better future. Schiller grew as a poet, and his style changed from passionate and lyrical exultations to a classical mastery of simplicity and clarity.

## SUMMARY

Friedrich Schiller looms like a colossus on the German stage. He dominates the literary history of his period. A writer of strong convictions, he took the subject of humankind as his theme. Liberal idealism is at the foundation of Schiller's work. It permeates his politics, philosophy, historical works, aesthetic writings, poetry, and plays. Schiller ranks today as Germany's leading playwright and poet-philosopher. He has become a part of the nation's cultural heritage. One cannot find a city or town in Germany that does not have a street, square, or statue in his honor. Rarely has any literary figure ever made such an impact on his or her country.

## SIR WALTER SCOTT

**Born:** Edinburgh, Scotland  
August 15, 1771

**Died:** Abbotsford, Scotland  
September 21, 1832

*Beginning as a popular and enduring narrative poet, Scott became the most successful and influential English novelist of the early nineteenth century.*

### BIOGRAPHY

Descended from long-established families in the Border country, Walter Scott was born on August 15, 1771, in Edinburgh, Scotland. He was the second son of a prominent Edinburgh attorney, Walter Scott, and Anne Rutherford. Although sturdy and precocious at birth, Scott contracted infantile paralysis before age two, which left him permanently lame. Reared in the Border by relatives, he fell in love with the countryside, its lore and legendry. He roamed the burns and heaths at will, by foot and by pony; the landscape imprinted itself in his imagination. He also learned to read at age four, devouring his Aunt Janet's collection of English novels.

Although not an outstanding student at any level, Scott was an extraordinary hobbyist. From his schooldays, Scott had amassed antiques; by high school, his hoard was extensive. Without knowing it, he was helping to invent antiquarianism. By age twelve, he had recovered completely from his illness, becoming as enthusiastic about sports and horseback camping trips as he was about reading. These passions fueled his life.

Learning that most medieval romances were in French, he taught himself enough French to read the *contes* (short tales of adventure). After reading the Italian poets Torquato Tasso and Ludovico Ariosto in translation, he mastered Italian in order

to read the works of Dante. He also read Spanish and German fluently. After graduating from high school at age twelve, he took classes at the local college for three years but left without a degree. He then apprenticed himself to his father for four years and began law school.

Scott read law seriously enough to pass his examinations, but he also joined literary and social clubs, still spending his weekends in country rambles, searching for material. Admitted to the bar in 1792, he limited his practice, successfully soliciting appointments that left time for his recreations. In 1799, Scott became sheriff of Selkirkshire, later becoming clerk of session. He did the prescribed work religiously, but he guarded his free time.

He began writing almost accidentally, starting with a ballad collection. Simultaneously, a vogue for imitation medieval ballads spread from Germany throughout Europe. Enthused by the revival, he translated several ballads and composed imitations of his own. He also translated Johann Wolfgang von Goethe's drama about medieval robber barons, *Götz von Berlichingen mit der eisernen Hand* (pb. 1773, pr. 1774), as *Goetz of Berlichingen, with the Iron Hand* in 1799. In imitation, Scott decided to revive some of the old Scottish legends as verse romances, of the kind represented by Samuel Taylor Coleridge's *Christabel* (1816) and John Keats's "The Eve of St. Agnes." He eventually produced *The Lay of the Last Minstrel* (1805), about the folklore hobgoblin Gilpin Horner. When the poem sold out, Scott decided to move to the Border for the solitude required to write. Before selecting an estate in rural Tweedside, however, Scott invested

his savings in an old friend's printing house. The Ballantyne firm would ultimately absorb both his estate and his labors, finally condemning him to literary slavery.

Scott next tried a prose romance, dropping it to edit new texts of major writers. Yet he continued with narrative poems, especially *Marmion: A Tale of Flodden Field* (1808), *The Lady of the Lake* (1810), *Rokeby* (1813), and *The Lord of the Isles* (1815). Ballantyne nearly failed at the time of *Rokeby*, threatening to draw Scott with it. The crisis was averted, but Scott needed to open a new vein in his literary mine. Besides, the public was neglecting Scott's poems in favor of Lord Byron's.

Scott returned to his unfinished manuscript, transforming literary history in the process. The resulting novel, *Waverley: Or, 'Tis Sixty Years Since* (1814), published anonymously, created the genre of the historical novel and elevated the novel to a new plane of complexity, humanity, and depth. *Guy Mannering* (1815), *The Antiquary* (1816), and *Old Mortality* (1816), all masterworks, followed. Scott's health failed in 1817, and for three years he slowed down; still, he produced enduring works: *Rob Roy* (1817), *The Heart of Midlothian* (1818), *The Bride of Lammermoor* (1819), and *Ivanhoe* (1819), all the while also doing other writing. Thereafter, he continued to publish novels annually, perhaps ones less breathtaking than the earlier works, but of uniform quality and including masterpieces such as *Redgauntlet* (1824).

In 1825, Ballantyne finally collapsed. Scott's fortunes were inextricably entangled. To reduce the debt, he sentenced himself to his desk for up to twelve hours daily, six days weekly, relentlessly churning out fiction, history, biography. The next novel, *Woodstock* (1826), is well up to previous standards, and *The Fair Maid of Perth* (1828) contains some of his best scenes and characters; but the other novels are less successful. In other respects, however, he did some of his best work. Somehow, he found time to compose *The Journal of Sir Walter Scott* (1890), which displays some of his most natural and touching prose. *Tales of a Grandfather* (1828-1830) are beautiful, deft retellings of episodes from Scottish history, especially for children.

He made great strides toward reducing the debt, but it finally broke him. In November, 1830, he had a slight stroke; a more severe one followed four months later. He still would have kept to his desk,

but in his illness he came to believe that he had written himself free of his debts. A grateful government provided a vessel for him to tour the Mediterranean while recovering. After a year of touring, however, he began to decline, and he insisted on returning home to die. He died on September 21, 1832, in Abbotsford, near Galashiels, Scotland.

## ANALYSIS

Because late twentieth century literary fashions made Scott's kind of writing unfashionable, his status has slipped; like most of the top Victorian writers—Alfred, Lord Tennyson, Charles Dickens, and Henry Wadsworth Longfellow—he has fallen from favor in the audiovisual age. That is unfair. Scott not only altered the course of nineteenth century literature but also profoundly influenced Western culture. He developed an image of the popular hero that became standard, and this image continues to affect both behavior and education, to shape the values of both individuals and nations.

This influence occurred not just because he was, by any standard, the best-selling novelist of his time and one of the most reprinted of the nineteenth century. Scott was the first English writer to realize a comfortable living from writing; he would have been rich, had he not invested badly. Furthermore, he reaped profits before the passage of any international copyright act protecting him from foreign reprinting and translations. Imitators materialized everywhere; within five years, every nation, and practically every region, boasted of its own Scott—the United States, for example, celebrated James Fenimore Cooper.

The cult of historical fiction that he pioneered transformed novel writing in far-reaching, yet often unperceived, ways. For example, after Scott, practically every major novelist in England adopted the historical point of view. Thus, Dickens has only two professedly historical novels, but all except one are set at least in the previous generation. The same is true of William Makepeace Thackeray, George Eliot, the Brontës, Thomas Hardy, Robert Louis Stevenson, Rudyard Kipling, and most of Joseph Conrad. The major exception is the Anglo-American Henry James, and even he began by using the historical frame. Elsewhere in America, Nathaniel Hawthorne, Edgar Allan Poe, and Herman Melville all wrote explicitly historical works, as did those who at first sight apparently did not—

such as Mark Twain, Jack London, and even William Faulkner. In France, Alexandre Dumas, père, and Victor Hugo are unthinkable without Scott. It seems unlikely that Scott could have affected the very different Russians Fyodor Dostoevski and Leo Tolstoy, but both record their allegiance to him, and the emphasis on the psychology of human behavior and on history in both *Bratya Karamazovy* (1879-1880; *The Brothers Karamazov*, 1912) and *Voyna i mir* (1865-1869; *War and Peace*, 1886) derive from Scott.

Scott made the Western world conscious of historical precedence in a way that it had not been. In this respect, he helped consolidate the idea of national self-consciousness, which had been expanding since the Renaissance. He also introduced a modified image of the hero and of heroic behavior, which dominated the nineteenth century and still prevails. He helped create an ideal image of behavior, which became incorporated in educational systems. Because of his influential ideas, several generations were indoctrinated with this ideal, and it influenced major political and social policies, in his time and afterward.

This image runs parallel with the common neoaristocratic and colonialist attitudes of the time. It generated most nineteenth century social and political practices and doctrines, including the colonization of Africa, the migration westward in the United States—fueled by the doctrine of Manifest Destiny—and the Germanic movement to the east in Europe and Asia. It is not a radically different image from that of the traditional hero in Western male-dominant, aristocratic society. That is, the hero is primarily the idealistic, intrinsically noble good guy, protector of women, children, and the underprivileged. Typically, he finds himself and his class threatened by those who abuse the law for their own profit. Yet because his loyalty is to the honor of his cause, he does not withdraw. At the collapse of all civilized order, he discloses unexpected reserves of courage, prowess, and chivalry, even of athleticism, and obtains victory by allying himself with the forces of right.

This describes the archetypal Scott hero from *Waverley*, a figure that came to represent the conventional hero. With some variations, this figure continues as the stock hero of popular fiction and

entertainment, appearing every night on television. It has become a powerful cultural force, instilling principles of behavior that people often accept without thinking. It may, for example, predispose people to choose confrontation or violence when responding to apparent threats; it may reinforce a win-at-any-cost policy or an us-versus-them mentality, or, finally, it may cause one to sacrifice individual freedom for the sake of solidarity.

Perhaps Scott emphasizes one side of a complex picture. Yet he simply wanted to revive the principles of heroic chivalry endangered by modern incivility and crassness. Besides, although many of his heroes can be readily stereotyped, others cannot. The hero of *The Heart of Midlothian*, for instance, is female. In any case, Scott usually pays little attention to the putative hero and heroine, treating them as conventions, much like the obligatory “love interest” in mysteries. They serve merely as pretexts for what he is really interested in: in his “life” books, the scenes, pageants, manners, and characters of his ancestors, caught in moments of high national drama; in his “history” books, the distinctive quality of a moment in the evolution of Western culture. He is primarily intent on contrasting past with present to enliven one and illumine the other.

His lovers also serve as foils to highlight the characters whom he wants to spotlight, and in this respect Scott transcends his limitations and becomes a great comic writer. From the beginning to the end of his work, the supporting players, whether stock or rounded, get most of his attention, and he endows them with superabundant, zestful, loving detail. The lovers, already pallid when met, vanish almost at once; no one remembers Edward Waverley. The bit players, however, especially those of low degree, spring, sprawl, and spill forth from the pages. Scott gives them not only life and color; he also gives them speech. In the Scots novels, he elevates dialect to a new stage of character revelation. Previously, dialect was simply another device for poking fun. Scott makes it a supple, musical element, using it almost as a musician uses harmony. He gives his characters voices that echo in readers’ ears long after they finish the novels.

## THE HEART OF MIDLOTHIAN

**First published:** 1818

**Type of work:** Novel

*When her innocent sister faces execution for the murder of her infant, Jeanie Deans travels in 1736 from Edinburgh to London to request the king's pardon.*

Generally considered one of the finest of Scott's novels—though opinions vary widely—*The Heart of Midlothian* deals with the social and political difficulties in Scotland of the years after 1736. The 1707 Act of Union, decreeing a common parliamentary government for England and Scotland, was unpopular in the north. Furthermore, the exiled Stuart line, driven from the throne in 1688, continued to agitate for reinstatement. Rebellion broke out on several occasions, notably in 1715 and 1745, when formidable armies mustered, one even invading England.

Scott begins with another insurrection, the Porteous Riots of 1736, when a mob stormed the Edinburgh Tolbooth, the ancient city jail and guardhouse, to seize Captain John Porteous, commander of the Guard, sentenced to death for firing on a gathering. Although sentenced, Porteous had been reprieved, according to rumor, by Queen Caroline herself. The mob, led by an escapee, Geordie Robertson, carries along a young clergyman, Reuben Butler. While they ransack the Tolbooth, Butler observes Robertson trying to persuade Effie Deans, arrested for child murder, to escape. She refuses, as does a thief, Jem Ratcliffe. The mob tracks Porteous down and hangs him. In love with Jeanie, Effie's sister, Butler tells her what he saw—perhaps Robertson knows about the missing infant. Old Deans, torn between love for his wayward daughter and abhorrence of her crime, refuses to see her. Jeanie vows to save her. She is summoned to a midnight tryst on a haunted moor; there, the hidden Robertson, the father of the illegitimate infant, declares Effie's innocence, implicates a mentally disturbed woman, Madge Wildfire, and her vengeful mother, and tells Jeanie that only her lying—pretending to have known of Effie's prospective motherhood—can save Effie.

At the trial, Jeanie refuses to lie, though both Effie and her father urge her to do so. After the sen-

tencing, however, she resolves to walk to London, if she must, to gain a pardon. During the trip, she is kidnapped by Madge and her mother but escapes; as she does, the madwoman is killed by a mob, closing that line of inquiry. Jeanie meets Robertson again, learns he is of good family, and is put in touch with the duke of Argyll, who gains an interview with the queen and the king's mistress. Jeanie pleads her case with such simple virtue that they grant the pardon.

She hurries back to her family. The pardon is sent ahead; and even before her return she learns that Effie has eloped with Robertson. Jeanie marries Butler. Years later, she discovers that Effie has become the toast of English society. Effie engineers a final meeting, but her husband is killed in a skirmish with outlaws, one of whom is his illegitimate son.

The novel is full of incident and engaging characters and shows sophisticated handling of the romance and the romantic hero.

## IVANHOE

**First published:** 1819

**Type of work:** Novel

*A Saxon knight returns from the Third Crusade to recover his estate and his betrothed from a Norman supporter of the illegal ruler, Prince John.*

*Ivanhoe* is easily the best-known Scott novel, probably because it became a celebrated Hollywood epic in 1952. This celebrity reflects Scott's success in creating a heroic image that remains current. Yet the novel is rich in illuminating detail and is beautifully constructed; and, although research has found it inaccurate, it established the genre of fantasy romance.

The novel portrays the return of the Saxon Wilfred Ivanhoe from the Holy Land to his alienated ancestral estate. It is the early thirteenth cen-

tury, with King Richard I (or Richard the Lion-Hearted) held captive in Austria. In his absence, his brother John has taken the throne; he uses bribery and extortion to secure his position and intends to suppress the Saxon minority by force.

The first major event is a tournament at Ashby-de-la-Zouch, attended by all the principal nobility. John plans to showcase his power, a propaganda move. Yet events go against him. On the first day, his champions fall in man-to-man combat to a masked warrior, the Disinherited Knight, who awards his winnings to the Saxon lady Rowena. On the second day, in group combat, the Disinherited Knight wins again, though aided by another unknown, The Black Sluggard. Furthermore, a Saxon yeoman archer beats the Prince's Norman marksmen. At the end of the tournament, Ivanhoe collapses from concealed wounds and is taken for treatment to a rich Jewish merchant, Isaac of York, and his beautiful daughter Rebecca. The other knight, incognito, takes refuge in the cell of a hermit.

Returning home several days later, Cedric the Saxon agrees to protect Isaac's caravan when he finds it abandoned. Outlaws, however, employed by Front-de-Bœuf, a Norman baron, capture the train and hold it for ransom. Cedric's servants appeal to the archer Locks-

ley, who rallies his band of real outlaws, augmented by the monk and Black Knight, to storm the castle. Meanwhile, both Rowena and Rebecca are accosted while imprisoned; Rebecca keeps the bedridden Ivanhoe hidden. From the window, she reports the first assault to Ivanhoe; the attackers gain a foothold on the walls. Ulrica, a Saxon victim of Norman pillagers, sets fire to the bedchamber of

the wounded Front-de-Bœuf; he dies roaring, and the flames threaten the defenders. The assault is renewed, this time overwhelmingly. Ivanhoe and Rowena are rescued, but Bois-Guilbert carries off Rebecca. The brigand and the Knight resettle the ravaged land.

Meanwhile, deLacy, a Norman knight, reports to John that Richard has returned. John plots to waylay him, but deLacy resists. Isaac reports the kidnapping of his daughter to the master of the Templars, to which Bois-Guilbert belongs. She is summoned to a tribunal and tried as a sorceress; in defense, she calls for a champion. Richard is ambushed, but he and the outlaws beat back the attack. After revealing his identity, Richard is regaled by the men. He restores Ivanhoe to his inheritance. The band arrives at the Templars' tribunal as the trial of Rebecca is recommencing. The weakened Ivanhoe stands as champion and, though wounded, still overcomes Bois-Guilbert and releases Rebecca. He returns with Rowena to his fief.

Although inaccurate in historical reconstruction, *Ivanhoe* is the prototype of the romantic fantasy novel; still imitated, it has never been surpassed.

### SUMMARY

Mark Twain hinted at times that Sir Walter Scott was so influential that he caused the Civil War. This remark has some of the exaggeration of humor, but Twain was not entirely joking. He meant that Scott's concept of the romantic hero had so permeated society that armed resistance to perceived insult had become a common obsession. Men were conditioned to throw down the gage.

Scott undoubtedly popularized this image, if he did not invent it. He thus created the hero of popular culture. He also pioneered the modern novel and certain specific forms: the historical romance and the romantic fantasy. Further, he developed dialect as a means of character revelation and created a gallery of unforgettable characters.

*James L. Livingston*

## DISCUSSION TOPICS

- Sir Walter Scott was an extraordinarily popular novelist for many decades, but he was much less popular during much of the twentieth century. How do you account for his decline among readers?
- It has been argued that Scott was in many respects not a Romantic writer at all; for example, he was distrustful of emotionalism and of revolution. Has he been miscast as a Romantic writer?
- Consider why Effie Deans in *The Heart of Midlothian* is one of Scott's most outstanding characters.
- Scott has often been called the inventor of the historic novel. What historical novelists seem to have owed the most to Scott's initiative?
- Judge Scott's contribution to the tradition of Scottish ballads.

## W. G. SEBALD

**Born:** Wertach im Allgäu, Germany  
May 18, 1944

**Died:** Norwich, Norfolk, England  
December 14, 2001

*In his major prose narratives published in the 1990's and early twenty-first century, Sebald hauntingly explores the nature of memory, loss, despair, destruction, longing, and hope in the aftermath of the Holocaust and in the political and cultural shadows of post-World War II Europe.*

### BIOGRAPHY

Although he lived most of his life in England, Winfried Georg Maximilian Sebald (ZAY-bahlt) was born in the southern region of Bavaria, in the small German village of Wertach im Allgäu. One of four children, Sebald was born in 1944 to Georg and Rosa Genovefa Sebald. Sebald grew up in a quiet rural village, but he rarely saw his father. Georg had joined the German army in 1929, fought under Adolf Hitler, and was a prisoner of war in France when Sebald was born. Even after he returned from his internment in France, Sebald's father was not often home, working instead in larger towns where jobs were more plentiful than in Wertach. Georg enlisted in the new German army in 1954, leading to even more separation from his family. Little is known of Sebald's relationship with his mother, but Sebald's maternal grandfather, Josef Engelhofer, became the leading male figure in the young Sebald's life.

From 1950 until 1954, Sebald attended elementary school in Wertach and Sonthofen, and he attended secondary school in Immenstadt and Oberstdorf from 1954 until 1963. During his school days at Oberstdorf, his teachers showed him pictures of the Holocaust, but they were unable to explain adequately the meaning of the pictures to the students. This event haunted Sebald throughout his life, and many of his novels attempt to understand the German inability to come to terms with the Holocaust. In part because of his frustration with this overwhelming silence regarding post-World War II German history and in part because of the crowded classrooms of German uni-

versities, Sebald left Germany to study German literature in Switzerland, receiving a *licence des lettres* from the University of Fribourg in 1966. Sebald's years at Fribourg were the beginning of his lifelong love of French literature, his academic and writing careers outside of Germany, and his love for a fellow student, Ute, whom he married in 1967.

Over the next decade, Sebald completed an M.A. and a Ph.D., moving among teaching positions in England, Switzerland, and Germany. Once he completed his degree at Fribourg, Sebald took a position at the University of Manchester, where he earned his M.A. in German literature in 1968. Sebald then taught elementary school for one year at St. Gallen in Switzerland before returning to teach at the University of Manchester in 1970. In 1969, Sebald published his first book, *Carl Sternheim: Kritiker und Opfer der Wilhelminischen Ära* (Carl Sternheim: critic and victim of the Wilhelmine era), which met with some controversy because Sebald attributed fascist ideas to Sternheim, a Jewish writer. From 1970 to 1975, Sebald taught at the University of East Anglia in Norwich, England, and received his Ph.D. there. His dissertation, *Der Mythos der Zerstörung im Werk Alfred Döblins* (the myth of destruction in the work of Alfred Döblins), examined the life and work of the writer best known for his novel *Berlin Alexanderplatz* (1929). Although he returned to Munich in 1975 to work at the Goethe Institute, Sebald remained there only a year before returning to England to teach German literature at the University of East Anglia, where he became professor of modern German literature in 1988 and the director of the British Centre for Literary Translation in 1989.

Although he considered himself a teacher more than a writer, Sebald wrote a number of critical works on topics ranging from Austrian literature to contemporary German theater. Perhaps because of his own experience as an outsider, his writings focus on his fascination with exile, longing for home, and both cultural and individual memory. In 1985, he published his study of Austrian literature, *Die Beschreibung des Unglücks: Zur österreichischen Literatur von Stifter bis Handke* (the description on melancholy: Austrian literature from Stifter to Handke), in which he argues that the melancholy of these writers is an attempt to overcome depression rather than to give in to it. In 1988, Sebald focused on contemporary German theater by editing a volume of critical articles, *A Radical Stage: Theatre in Germany in the 1970's and 1980's*.

In the last decade of his life, Sebald gained recognition and prominence as a novelist. Many critics compared him to the German novelist Günter Grass for the way that Sebald raised questions about the German past, especially political and social questions about the Holocaust and the complicity of individual Germans in that event. Others compared Sebald to Franz Kafka and Walter Benjamin for Sebald's exploration of the nature of history and the place of an individual in a bureaucratic society out of control. Mostly, though, critics praised Sebald's beautifully lyrical prose, his haunting and evocative scenes of melancholy exiles wandering through a lost past, and his canny ability to establish a new genre—a mix of documentary and fiction that often included photographs. In fairly rapid succession, Sebald published a collection of poems and novels and won numerous awards for his work.

In 1988, Sebald published his first creative work, *Nach der Natur: Ein Elementargedicht*, which was published posthumously in English as *After Nature* (2002). He was awarded the Feder-Malchow Prize for Lyric Poetry in 1990, and that same year he published his first novel, *Schwindel: Gefühle*, later translated into English as *Vertigo* (1999). In 1992, Sebald published his second novel, *Die Ausgewanderten* (*The Emigrants*, 1996). *The Emigrants* won the Berlin Literature Prize and the Johannes Bobrowski Medal in 1994 and the Heinrich Böll Prize and the Mörike Prize in 1997. *Die Ringe des Saturn*, his third novel, appeared in 1995, and was published in English as *The Rings of Saturn* in 1998, when it was

awarded Best Fiction Book Prize by the *Los Angeles Times*.

In 1999, Sebald's book of critical essays, *Luftkrieg und Literatur*, explored the ways that post-World War II German literature failed to come to terms with the bombings of Germany in World War II. This collection was published in English posthumously as *On the Natural History of Destruction* (2003). In 2000, Sebald received the Heinrich Heine Prize and the Josef Breitbach Prize. Sebald's fourth novel, *Austerlitz*, appeared in Germany in February, 2001, and was published in an English translation in October, 2001.

In December, 2001, at the age of fifty-seven, Sebald died in an automobile crash near his home in Norwich, England. He received the Literary Prize of the City of Bremen and the National Book Critics Circle Award for Fiction, posthumously, in 2002. Sebald's death cut short the budding career of a major critic and novelist.

## ANALYSIS

Not long after *Austerlitz* was published in 2001, Sebald was killed in a car accident, robbing modern literature of one of its most distinctive voices. Critics hailed his work, which became more popular in the United States and Great Britain than in Germany. The literary critic Susan Sontag praised Sebald by proclaiming that his work was a noble literary enterprise and an example of literary greatness. Like Günter Grass, Sebald explores the political despair, social chaos, and individual guilt of post-World War II Germany, especially as individuals attempt to come to terms with loss and search to find explanations for the crimes perpetrated against Jews. Like Franz Kafka, Sebald offers portraits of outsiders living in exile continually trying to find their way into the castle or beyond the gates of the law. Like Marcel Proust, Sebald explores the halls of memory but interrogates its facility to be a repository of truth and examines its power to distort. Like Stendhal, Sebald exploits autobiography and twists it into fictional narratives. Like Jorge Luis Borges, Sebald playfully manipulates the borders between truth and imagination.

In his four novels—*Vertigo*, *The Emigrants*, *The Rings of Saturn*, and *Austerlitz*—Sebald explores themes of exile, memory, identity, history, and truth, beauty, and transience. Sebald questions the boundaries of realism by weaving photographs,

real people's names, and fictional characters in his novels. His writings in many ways resemble the German poet Rainer Maria Rilke's notebooks, *Die Aufzeichnungen des Malte Laurids Brigge* (1910; *The Notebooks of Malte Laurids Brigge*, 1930), with the narrators observing the activities of a variety of characters, including themselves. The narrators of Sebald's books, who are often doubles of himself, find themselves wandering through various urban and rural landscapes in search of themselves and their identities. For example, the narrator of *The Rings of Saturn* sets off on a walking tour of the eastern coast of England and meditates along the way about such seemingly disparate subjects as the natural history of herrings, Sir Thomas Browne's skull, Joseph Conrad, and silkworms, among other topics. The wanderers of Sebald's novels often end up circling and circling, wending their way down torturous paths to self-identity. Outsiders, they circle through time and space in search of themselves and for some kind of home. In *Austerlitz*, the narrator of the novel observes that the future, the present, and the past are connected in space and that individuals must always go in search of places and people with whom they are connected already in time and space. Thus, the lives of individuals become not only a remembrance of lost time but also attempts to connect the present and the future. In various ways, all of Sebald's books explore the nature of identity and the function of memory.

The narrators of Sebald's novels resemble the pilgrims of Homer's *Odyssey* (c. 725 B.C.E.; English translation, 1614), Dante's *La divina commedia* (c. 1320; *The Divine Comedy*, 1802), and James Joyce's *Ulysses* (1922). In *The Emigrants* and *The Rings of Saturn*, especially, the narrators—who always remain nameless but whose first-person narration draws readers intimately into the novel—act as guides on their own pilgrimages, as they conduct readers through the labyrinthine journeys of their own minds and through the littered and haunted past of European history. Above all, these characters are attempting to locate themselves in a larger scheme, and in order to do so they must wander from place to place in search of clues for the meaning of their past and their own identity. Sebald's postmodern quest narratives are intricately laced tales of revelation and self-revelation woven from the bricolage of history, architecture, photography, memoir, art, and literature.

Sebald's books contain such a dazzling array of elements that it is often difficult to think of them as novels. Rather, they are prose fictions in which he blends seamlessly fact and fiction, casts himself in the role of the main characters, features other living authors (and friends)—such as Michael Hamburger in *The Rings of Saturn*—as well as dead authors whom he admires—like Joseph Conrad in *The Rings of Saturn*—and inserts photographs into the narrative, sometimes family photographs purporting to be of his own family, without commenting on the photographs. The structure of Sebald's novels, the blend of fact and fiction, and the mixture of disparate elements often provides a literary challenge for his readers, but his playful tone, his absurdist humor, and his affable first-person narration invite the reader to accompany him, or the narrator, on a journey that reveals the meaning of long-neglected past events, the beauty and mystery of nature, and the despair and hope that motivates the human heart throughout personal and public history.

## THE EMIGRANTS

**First published:** *Die Ausgewanderten*, 1992  
(English translation, 1996)

**Type of work:** Novel

*These biographies of four exiled Germans meditate on the nature of loneliness and the depression that involuntary exile, as result of Jewish identity, brings.*

In *The Emigrants*, Sebald explores the nature of exile through an examination of the lives of four Germans who have voluntarily emigrated from their homeland to various places in Europe. The tales grow longer with each subject, and each story focuses on the loneliness, the pathos, the unreliability of memory, and the glimmer of hope that comes with the territory of exile. These are tales of sadness—each ends in suicide—and of the halting attempts each emigrant makes to start a new life in a world that is strange and uninviting to him. In the final two tales at least, Sebald himself may be the narrator, and one of the stories purports to concern his great-uncle Ambros Adelwarth. Whoever

the subject, each story contains Sebald's characteristic blend of fact and fiction, memory and forgetting, narrative and photography, as the narrator tries to retrace the footsteps of each of the emigrants.

In the first story, the narrator meets Henry Selwyn, a Lithuanian Jew who had immigrated to London quite by accident. Although Selwyn's family originally planned to leave Lithuania to settle in New York City, they settled instead in England when they realized that their original destination was farther than they wished to travel. Although the story opens on a hopeful note—the narrator and his wife are searching for a place to live in an area near Norfolk, England—it soon turns somber as the two come to a graveyard and an old man lying down near it. The opening pages of this story resemble Rilke's *The Notebooks of Malte Laurids Brigge* and their eloquent description of a run-down house and Malte's speculations about the house's inhabitants. Selwyn lives in the past, feeling guilty for hiding his Jewish identity from his wife (his real name is Hersch Serewyn) and reliving incidents, including a butterfly hunting expedition with writer Vladimir Nabokov, from his former life. The narrator's own memory of Selwyn is sparked on a train trip through Switzerland, when he sees a news story regarding an event in which Selwyn had long been involved. This first tale not only examines the nature of exile but also the reliability of memory.

The remaining three tales of these German exiles work in similar ways to explore the nature of happiness, memory, exile, hope, despair, and identity. The second tale focuses on Paul Bereyter, a schoolteacher modeled on one of Sebald's own teachers. This story begins at the end, when news reaches the narrator that a former teacher had killed himself. The obituary recalls Bereyter as a dedicated teacher who loved his pupils and loved the subjects—art, literature, and music—he taught. Because he is one-quarter Jewish, Bereyter was not allowed to practice his beloved profession during the Third Reich. The narrator learns from one of the teacher's close friends, though, that while Bereyter loved his students, he also held them in contempt for their willful disregard for the beauty of music and literature. Thus, the teacher's devotion to teaching fostered hopefulness in him for the future of the world, but his students' fail-

ures depressed him, leading him to hopelessness about the present and the future, destroying any dreams he had of a more perfect world.

The narrator of the third tale opens the story by remarking that exiles and emigrants tend to seek out their own kind. The story of Great-uncle Ambros Adelwarth concerns family more than the first two stories, and the narrator (Sebald?) inserts many family pictures into the narrative as a way of tracking the footsteps of an uncle whom he had only met once or twice in the past. There are not only family photographs, but there are also photographs of the places the uncle had visited. Adelwarth spent most of his life in New York, where he had a job as a valet for a wealthy family and developed a relationship with the family's younger son, Cosmo. When his lover dies, Adelwarth sinks into a deep depression that marks him for the rest of his life. In a story reminiscent of Thomas Mann's *Der Zauberberg* (1924; *The Magic Mountain*, 1927), Adelwarth commits himself to a sanatorium, where he hopes a variety of medications and therapies might cure him of his depression. The narrator contrasts the darkness of the sanatorium with the brightness and happiness of the French resort, Deauville, where he and Cosmo had spent many happy days. In the end, Adelwarth is exiled not only from his community but also from himself, a distance that leads to his death.

In the final story, Max Ferber—whose name in the German edition of *The Emigrants* is Max Aurach and who is likely modeled on the English Jewish painter, Frank Auerbach—has lived in Manchester, England, for twenty-two years, having moved from Munich in 1939 to Manchester's Jewish community. The opening of this tale is as haunting as some of the previous ones. The narrator, who is himself moving to Manchester (and, again, who might be Sebald), descends in an airplane over strange territory that he does not recognize. When he arrives in Manchester, his Sundays are so lonely that he must take long walks through the apparently deserted city in order to come to terms with his own feeling of exile. When the narrator comes across Ferber, the two begin to meet every day to discuss Ferber's art and to offer each other some kind of comfort and community in a city that is alien to each of them. Ferber's art expresses the lack of unity that he and the narrator feel as exiles in a strange land. Ferber attempts to overcome the loneliness and de-

spair of exile by withdrawing into his studio to practice his art. This withdrawal only results in a greater sense of alienation and a feeling of failure as an artist. When the narrator learns only after Ferber's death that he had been transported to England following *Kristallnacht*, and that Ferber had stopped speaking German on the day he arrived in England, never to speak it again, he begins to understand the tremendous loss of identity and memory that exile fosters.

## THE RINGS OF SATURN

**First published:** *Die Ringe des Saturn*, 1995  
(English translation, 1998)

**Type of work:** Novel

*This novel is a dreamlike sojourn of England in which the narrator meditates on subjects as far-ranging as Sir Thomas Browne's skull and silkworms.*

Much like Jean-Jacques Rousseau's *Les Rêveries du promeneur solitaire* (1782; *The Reveries of the Solitary Walker*, 1783), James Boswell's *The Journal of a Tour to the Hebrides with Samuel Johnson, LL.D.* (1785), and the letters between William Wordsworth and his sister, Dorothy, about his walking tour of the British Highlands, Sebald's *The Rings of Saturn* is a journal of a walking tour of eastern England in which the narrator—who at times appears to be Sebald himself—records his impressions and his dreams. Like much of Sebald's other work, the borders between illusion and reality, fact and fiction, and dreams and life are porous and permeable. The novel does not contain a specific plot that can be followed from beginning to end. Much like Joyce's *Ulysses* or Virginia Woolf's *Mrs. Dalloway* (1925), *The Rings of Saturn* records the narrator's thoughts in stream-of-consciousness-like fashion as he moves from one topic to another, with various images or events sending him into associative reveries.

As the novel opens, the narrator sets out to walk the county of Suffolk in order to overcome the emptiness he feels after he has completed a long period of work. He feels a joyous sense of freedom while he is traversing the countryside, even as he feels a disabling sense of horror when he encoun-

ters past events of destruction there. One year after he begins his walk, he finds himself in a state of complete immobility and must be taken to the hospital. There he looks out on the world from a small window and finds it difficult to judge reality from illusion; he thinks of himself as Gregor Samsa, the young man in Kafka's story *Die Verwandlung* (1915; *The Metamorphosis*, 1936), who wakes up to find himself transformed into a giant insect and who is no longer accepted by his family. More than a year after his discharge from the hospital, the narrator begins to assemble the recollections of his journey and of his hospitalization.

Chief among his recollections is his search for the skull of Sir Thomas Browne (1605-1682), a physician whose best known work is *Religio Medici* (wr. 1635; pb. 1642; authorized version, 1643), a collection of his opinions on religion. Browne also wrote several treatises on medicine, and his *Hydriotaphia, Urne-Buriall* (1658) is a meditation on various means of disposing of the dead that had been practiced in Britain. Browne's skull itself is an image of the interiority of one's self and the tendency of all individuals to look inward in order to discover personal identity. Many of the themes and images in Sebald's novel arise from the narrator's fascination with Browne and his work. Browne, like the narrator, was born under the sign of Saturn. Moreover, both the narrator and Browne are fascinated with death, especially the idea that nothing of the human being endures after death. Life, for the narrator, is a continuing process of transformation (metamorphosis) from one form into another. Death is simply a transformation into the iniquity of oblivion, and ceremonies of burial are attempts by the living to mark this transformation from life into death.

Images of dust, sand, ashes, fog, and mist pervade *The Rings of Saturn*. The ashes contained in the burial urn are much like the particles of sand on a beach or the dust particles that ring Saturn; they are particles of matter that remain after some form of destruction or transformation of organic matter. One of the epigraphs to the novel recalls that the rings of Saturn consist of ice crystals and meteorite particles that are fragments of a former moon that was destroyed. The narrator concludes that human civilization, from its earliest times, is little more than a strange luminescence whose waning and fading no one can predict.

The most pervasive theme of *The Rings of Saturn* is journey or quest. Like a modern pilgrim, the narrator sets off on his walk to discover himself and to attempt to assuage the feeling of despair that has overcome him. As he walks into the countryside, the organic unity of all life—with its disorder as well as its order—is revealed to him. Images of ferries, ferrymen (the classical image of the journey from the living to the realm of the dead), and airplanes also pervade the book. As he observes schools of herring and the fisherman who catch them at work, he begins to understand the destructive as well as the transformative power of nature. Along his journey, the narrator lives with his thoughts and his memories, but he also reflects on others who have made similar journeys. He devotes one set of reflections to writer Joseph Conrad, for example, who took his own footsteps into a heart of darkness in order to understand the human psyche and the interior life. Through his journey, the narrator learns that hundreds of fellow travelers—like Browne and Conrad—have preceded him and he cannot quiet the ghosts of repetition that haunt him.

## AUSTERLITZ

**First published:** 2001 (English translation, 2001)

**Type of work:** Novel

*Over a period of thirty years, Jacques Austerlitz struggles to solve the riddle of his identity as he tells the story of his life to a companion.*

More than any of his other novels, *Austerlitz* is Sebald's meditation on the power of memory and its role in the creation, transformation, and destruction of identity. Like his previous books, *Austerlitz* weaves fact and fiction, documentary and reality, photographs and writing into a powerful exploration of human psyche. However, unlike *Vertigo*, *The Emigrants*, and *The Rings of Saturn*, *Austerlitz* contains a relatively straightforward plot that most readers can follow without much difficulty. The characters often speak interchangeably and without quotation marks to distinguish the speaker, but Jacques Austerlitz does not meander too far off his path when he tells his story.

Late in life, Austerlitz sets out to learn his history. Raised as Dafydd Elias in Wales, he is now living in England, which he believes to be his native country. Austerlitz barely remembers his parents, and it takes some intense archival work for him to discover anything about his early life in Prague. Born in Czechoslovakia, Austerlitz's Jewish mother—who could not leave the country—sent her son to England in one of the many *Kindertransports* organized in Czechoslovakia before World War II to save children. The narrator meets up with Austerlitz in Belgium, where they strike up a friendship based on their mutual love of history and architecture. Ten years later, the two meet again in London, where Austerlitz begins to tell the story of his origins, unfolding for himself and the narrator his own identity and history.

Although his mother's decision to put her son on the *Kindertransport* most certainly rescued him from the Nazis, it shut the door on his ability to know himself. More important, he lost his family, his past, and his language. Much like Max Ferber in *The Emigrants*, who stops speaking German the day he arrives in England and thereby shuts himself off from his past, Austerlitz's loss of his native language shuts him off from his past. As far as he is concerned, he has been erased from life and culture. His family is not aware he is alive; he is no longer aware of his family's fate, and he no longer possesses the one tool that can help him to feel truly a citizen of his culture—his language. Even as he slowly learns about his past, he often panics as he looks at a picture of himself as a five-year-old child and is speechless and incapable of any lucid thought because the power of his absence from his childhood is so strong. He cannot comprehend the laws that govern the return of the past and feels unreal in the eyes of those who are now dead.

Austerlitz's conversations with the narrator enable him to reconstruct his history. Austerlitz discovers himself and his history not only through conversations with the narrator or trips to the archives in the library but also through photographs

of his mother and of places related to his childhood. A picture of a house sparks a clear memory of the home in which he was raised. Photographs complicate the relationship between the living and the dead. On the one hand, the photographs frighten him; on the other hand, they transport him and open the floodgate to memory and his understanding of himself. More than any of his other novels, *Austerlitz* captures Sebald's characteristic themes of loss and reconstruction of history and identity.

### SUMMARY

W. G. Sebald's remarkable novels bequeathed to readers powerful glimpses into the ways that people construct their identities, their memories, and their histories. His invention of a new genre—the docu-novel—allowed him to use facts, photographs, and fiction to probe some of the deepest questions of his time: Who is responsible for erasing the Jews from history—both individually and collectively—in the Holocaust? What is the nature of history? What tools can people use to reconstruct an identity that has been lost to them? How do people use language to oppress and liberate? How can humankind balance the destructive and the orderly forces of nature, and how can it understand its place in nature? How does revelation occur? Sebald's astonishing writings provide a philosophical and literary legacy for many generations.

Henry L. Carrigan, Jr.

## BIBLIOGRAPHY

### By the Author

#### LONG FICTION:

*Schwindel: Gefühle*, 1990 (*Vertigo*, 1999)  
*Die Ausgewanderten*, 1992 (*The Emigrants*, 1996)  
*Die Ringe des Saturn*, 1995 (*The Rings of Saturn*, 1998)  
*Austerlitz*, 2001 (English translation, 2001)

#### POETRY:

*Nach der Natur: Ein Elementargedicht*, 1988 (*After Nature*, 2002)  
*For Years Now*, 2001

#### NONFICTION:

*Die Beschreibung des Unglücks: Zur österreichischen Literatur von Stifter bis Handke*, 1985

## DISCUSSION TOPICS

- W. G. Sebald inserts many photographs in his novels. How do these photographs contribute to the power and meaning of the novel?
- In many of Sebald's writings, it is difficult to tell whether he is recording fact or telling a story that has no basis in fact. What are the benefits of weaving fact and fiction together as he does in his writings?
- Sebald often uses images, scenes, and phrases from other novelists. How does his use of these other works of fiction in his own novels enhance your reading of his novels?
- Why does each "biography" in *The Emigrants* grow increasingly longer?
- Discuss the similarities and differences among *The Rings of Saturn*, Dante's *La divina commedia* (c. 1320; *The Divine Comedy*, 1802), and James Joyce's *Ulysses* (1922).
- What is the role of language in *Austerlitz*?
- What is quest literature, and how are Sebald's novels examples of such literature?

## SENECA THE YOUNGER

**Born:** Corduba (now Córdoba, Spain)  
c. 4 B.C.E.

**Died:** Rome (now in Italy)  
April, 65 C.E.

*Seneca's tragedies are the only works of Latin drama to survive, and they deeply influenced Renaissance theater. His essays and letters successfully address a variety of moral and philosophical questions and are widely admired for their crisp style.*

### BIOGRAPHY

Lucius Annaeus Seneca (SEHN-ih-kuh), better known as Seneca the Younger, was born in 4 B.C.E. in Corduba (now Córdoba, Spain). His father, Seneca the Elder, was a conservative Roman knight who had achieved fame as an orator and teacher of rhetoric in Rome. His mother, Helvia, was an extraordinarily intelligent, gifted, and morally upright person whose love for philosophy had been checked only by her husband's rejection of the idea of education for women. The familial conflict was passed to the next generation: The oldest of the three brothers, Gallio, pursued a splendid political career, but the youngest, Mela, spent his life making money and educating himself (the poet Lucan was his son). Lucius Seneca, the second child and the bearer of his father's name, was torn between public life in the service of a corrupt state and life as philosopher, writer, and private man.

Coming to Rome at a very early age, Seneca received an education in rhetoric. Not only was it the first step toward becoming an orator with an eye to public offices; it also introduced the youth to the discussion of subtle ethical questions, and thus presented him with a specific model of intellectual inquiry that would shape his literary output. He encountered teachers of Stoic philosophy who taught a life of asceticism, equanimity in the face of adversity, and an evaluation of the daily work of the self,

which laid the foundations of the mature Seneca's eclectic philosophical beliefs.

In Rome, Seneca lived with an aunt who guarded the thin, feeble boy's precarious health. As a result of his aunt's lobbying, Seneca successfully entered public service in 33 C.E. Besides serving the state under the two difficult emperors Tiberius and Caligula, Seneca began to achieve wealth and fame as a lawyer; early works (now lost) made him a celebrated writer, as well. Yet his status at the top of Roman society also threatened his life. Only ill health saved him from the jealous wrath of Caligula, whose mistresses persuaded him of the pointlessness of executing a seemingly moribund man. In 41 C.E., however, the first year of the reign of Claudius I, a struggle for power among the women around the emperor brought Seneca into court on a trumped-up charge of adultery. Found guilty, he escaped death only because Claudius commuted the sentence into banishment to the barren island of Corsica. On Corsica for the next eight years, Seneca dedicated himself to philosophy and the writing of letters; probably, he also began to draft tragedies. The most powerful works completed in this era are his letters of advice and consolation to his mother, *Ad Helviam matrem de consolatione* (c. 41-42 C.E.; *To My Mother Helvia, on Consolation*, 1614), and the essay *De ira libri tres* (c. 41-49 C.E.; *Three Essays on Anger*, 1614).

Seneca was recalled by Claudius after the execution of Claudius's second wife, Seneca's enemy Messalina. Yet the exiled orator and writer, whose fame had grown during his absence, was not al-

lowed to retire to Athens. Instead, he was made the tutor of the young boy Nero, the adopted son of the emperor. Although the dating of all Seneca's nine tragedies is uncertain, most scholars believe that they were written, and privately recited or performed, in this period between his return in 49 C.E. and Claudius's death in 54 C.E., when Nero's accession propelled his tutor to the fore of imperial governance. In a nice demonstration of his characteristically wide range of literary skills, Seneca commenced to write both the official funeral eulogy of Claudius and the brilliant satire *Apocolocyntosis divi Claudii* (c. 54 C.E.; *The Deification of Claudius*, 1614), in which a bumbling and cruel former emperor is consigned to the underworld.

While helping to govern Rome during Nero's early reign, Seneca found time to write more essays, among which *De clementia* (c. 55-56 C.E.; *On Clemency*, 1614) clearly demonstrates a direct concern with the education of the young, absolute ruler. Yet with Nero's awakening thirst for power, Seneca found himself in a position of complicity, and his literary and rhetorical skills were compromised. In 59 C.E., after Nero ordered the assassination of his (Nero's) mother, it was Seneca who drafted the son's speech, which cleverly concealed the facts.

Seneca's final request for retirement in 62 C.E. was refused by Nero, who kept him in Rome, although removed now from the court. Seneca's best philosophical work was written during this time; in his remaining three years, he finished *De providentia* (c. 63-64 C.E.; *On Providence*, 1614) and wrote *Quaestiones naturales* (c. 62-64 C.E.; *Natural Questions*, 1614) and his influential *Epistulae morales ad Lucilium* (c. 62-65 C.E.; *Letters to Lucilius*, 1917-1925), in which he establishes the form of the essay. Early in 65 C.E., a probably false accusation implicated Seneca in a conspiracy to assassinate Nero, who ordered him to commit suicide. With Stoic tranquillity and in the tradition of Socrates and Cato the Younger, Seneca opened his arteries and slowly bled to death, dying in Rome. His literary accomplishments survived, and have influenced generations of readers.

## ANALYSIS

Seneca's tragedies, essays, and letters share a keen focus on the processes of making sophisticated ethical and moral choices. To this concern,

Seneca brings a terse and pointed style. In *Troades* (c. 40-55 C.E.; *The Trojan Women*, 1581), for example, Seneca dramatizes the effects of total power on the minds of those who wield it. There, in a chilling dialogue, the two Greek conquerors Pyrrhus and Agamemnon coldly deliberate whether they should kill the captive Trojan woman Polyxena.

PYRRHUS: No law spares a captive or prevents punishment.

AGAMEMNON: What the law does not forbid, shame forbids.

PYRRHUS: A victor can do whatever he likes.

AGAMEMNON: Who can do much should like to do least.

With similar poignancy, Seneca's essay *On Providence* raises the universal question of why bad things happen to good people; as a Stoic, Seneca suggests that negative events test both a good person's ability to overcome evil and his or her commitment to a balanced outlook on life. A wise person should accept with dignity the vicissitudes of life ordered by capricious Fate.

Yet Seneca's Stoicism is not uniform, and his writings always incorporate intellectual positions taken from different sources. In *Three Essays on Anger*, for example, many different philosophers are quoted to support Seneca's anti-Aristotelian argument that there is nothing useful or honorable in even short outbursts of anger. If this eclecticism has earned for Seneca the scorn of some purist critics, it has nevertheless served his practical aims well. Instead of developing a philosophical theory of his own, Seneca tests, and puts into his own language, different answers for such timeless questions as those that concern fulfillment and happiness, death and adversity, or the snares of luxury and power.

In his dramatic works, however, a trade-off is involved in Seneca's decision—influenced by his education as an orator and public speaker—to focus strongly on an ethical problem and to display proudly his epigrammatic brilliancy as a writer of declamatory speeches. Thus, in *The Trojan Women*, the character of Andromache coldly deliberates whether she should sacrifice her son or let the Greeks desecrate the tomb of her husband. While these two choices pose a genuine ethical dilemma, their lengthy analysis all but destroys her dramatic

believability as a grief-stricken mother and widow. Yet it is Seneca's overriding interest in the consequences of the extreme situation with which he confronts his characters that, together with his unmistakably terse Latin style, distinguishes his tragedies from their Greek sources (primarily the plays of Euripides, Aeschylus, and Sophocles), with which they share their subject matter, Greek mythology.

Ubiquitous violence is another trademark of Seneca's plays. Unlike his Greek predecessors, Seneca is not content to leave it offstage. Though scholars are still debating whether Seneca's plays were intended only to be read or (as may be the new consensus) were indeed performed for small, private audiences, this crucial formal difference between direct or recorded action sets Seneca apart.

Seneca's *Oedipus* (c. 40-55 C.E.; English translation, 1581) thus actually shows Jocasta's suicide, a desperate act at which she arrives after dramatic deliberations. In *Hercules furens* (c. 40-55 C.E.; *Mad Hercules*, 1581), the hero, deluded by the Furies, kills his wife and his children on stage. In *Phaedra* (c. 40-55 C.E.; English translation, 1581), the bloody limbs of Theseus's son Hippolytus are brought forth for all to see, and Medea kills her second child right before the horrified eyes of Jason (and the audience) in Seneca's version of *Medea* (c. 40-55 C.E.; English translation, 1581).

For Seneca, violence is an ever-present dramatic possibility. Often, the very threat of it chills his audience. Aegisthus's attempt to persuade Clytemnestra to murder her husband, Agamemnon, who has taken Cassandra as a mistress and killed Aegisthus's brothers, lends incredible dramatic power to Seneca's *Agamemnon* (c. 40-55 C.E.; English translation, 1581). In a similar dramatic exploitation of the primal rupture caused by a violent act, *Hercules Oetaeus* (c. 40-55 C.E.; *Hercules on Oeta*, 1581) offers a pointed cathartic depiction of the hero's sufferings after he has lost his skin to the poisoned robe in which his wife, annoyed by his infidelity, has wrapped him.

Seneca's use of violence fascinated Renaissance translators of his plays in Italy, England, and France and is discernible behind such gory masterpieces of the period as John Webster's *The Duchess of Malfi* (pr. 1614; pb. 1623). Beginning in the early nineteenth century, and certainly in the Victorian era,

readers recoiled in horror from Seneca's works. A Romantic preference for individually drawn characters over abstract dramatic conflict further lowered Seneca's stock. Contemporary influences and dramatic interests, such as the emergence of the Theater of Cruelty after World War II, have led to a revived appreciation of Seneca's tragedies. His brilliant examination of the passions that drive humans to acts of carnage and his eternal search for moments of saving grace in the midst of depravity have made him an extremely relevant writer.

## MEDEA

**First published:** c. 40-55 C.E. (English translation, 1581)

**Type of work:** Play

*Faced with the loss of her husband, Jason, and her two sons, Medea kills Jason's new wife, Creusa his stepfather, Creon, and her own children.*

Seneca's *Medea* has its Greek forerunner in a surviving play by Euripides of the same name, yet its brusque style and emphasis on Medea's passionate revenge make it thoroughly his own work. Reflecting Seneca's fondness for the supernatural, the play opens with Medea's prayers to the gods, with whom she seems uncannily familiar. Cursing her husband, Jason, for abandoning her in Corinth to comply with the wish of the local king Creon that Jason marry the king's daughter, Medea implores the "powers of feuding vengeance" to aid her.

Effectively drawing the audience into her confidence, Medea immediately promises "evil actions/of brutality unknown" which will nevertheless let Jason live to face "something worse" than simple death. The Chorus, however, sides with Jason and condemns Medea: The fact that she has helped Jason to steal the Golden Fleece from her father and killed her brother to distract her father from her elopement with Jason makes Medea a monster whom Jason is justified in leaving. Yet the question of Jason's exact culpability is not as important for the play as is Medea's passionate, but incredibly self-conscious, effecting of her revenge. In a tense dialogue with her Nurse, Medea shows clear knowledge that her plans will not only endanger her life

but also place her apart from the rest of humanity.

When King Creon appears, Medea persuades him, against his better judgment, to let her stay in Corinth until the day after Jason's wedding, when she has to leave for Athens. After a Choric interlude, which warns of the effects of human audacity, Medea finally confronts Jason. His argument that he acts only to save both of them from the hatred of the Corinthian king, who demanded his new marriage in exchange for their lives, is scornfully rejected by Medea, who proposes to fight Creon; yet Jason refuses to do so and forbids Medea to take with her their children, whom he loves dearly. Stunned by Jason's utter rejection, Medea gets ready to act; the Chorus warns of her powers.

In a brilliantly stylized scene Medea, granddaughter of the gods Sol (Sun) and Oceanus, now implores the aid of the supernatural in her creation of a poison that, when sprinkled on the robes that she will send to Creusa as her wedding gift, will kill the bearer and burn down the royal palace, destroying Creon as well. After a messenger informs her of the success of her plot, Medea takes a further step and kills her first son. After Jason has rushed on stage, she kills the second child in front of his anguished eyes. Her revenge complete, two flying serpents carry her away while Jason is left to mourn his total loss; full of bitterness, he renounces the existence of all gods.

## PHAEDRA

**First published:** c. 40-55 C.E. (English translation, 1581)

**Type of work:** Play

*Because her stepson Hippolytus does not return her incestuous love, Phaedra accuses him of raping her and moves Theseus, his father and her husband, to have Hippolytus killed; seeing his corpse, Phaedra commits suicide.*

By focusing exclusively on the passionate actions of the human characters, and by reducing the role of the gods so that they become mere instruments of Theseus's bitter rage against his son, Seneca's *Phaedra* becomes a moving study of the force of human emotions.

Pursuing his passion for the hunt with a determination worthy of his mother, the Amazon queen Antiope, young Hippolytus energetically readies his men and his hounds for a chase across the face of the known earth. After he and his teams are gone, Phaedra appears, bitterly scolding Theseus, who married her after Antiope's death, for leaving her in order to explore the underworld. Partly because she is dissatisfied with her lonely life, Phaedra now overtly acknowledges her forbidden love for Hippolytus.

From her first soliloquy to her ensuing discussion with her old Nurse, who tries to reason her out of her mad love but finally decides to help her, Phaedra remains painfully self-conscious of both the clearly dangerous consequences of her passions and her reason's inability to check her emotions.

Intensely aware of her heritage as the daughter of the Cretan queen Pasiphae, whose love for a bull created the Minotaur, Phaedra knowingly, yet also helplessly, embraces disaster. By giving her such a painful insight into her quandary, Seneca creates a complex, introspective character whose spiritual offspring can be found, for example, in William Shakespeare's *Lady Macbeth*.

After the Chorus reiterates the theme of Cupid's power, the Nurse tries to persuade Hippolytus, who has returned to Athens, to love a woman rather than to spend his time with men and dogs. In lines that fascinated the sonneteers of the Renaissance, the Nurse in vain evokes the pleasures of love. Unmoved, Hippolytus is met by Phaedra, who cunningly swoons and falls into his arms. Gradually confessing her love for him, Phaedra encounters first disbelief, then violent reaction and total rejection from her stepson. Imploring the gods, Hippolytus achieves tragic status by sensing that Phaedra's actions spell his own doom. "I am guilty, I have earned . . . death./ For I aroused my stepmother's desire." Ready to kill Phaedra as she flings herself at him, Hippolytus draws his sword but angrily throws it away once Phaedra tells him that, for her, to die at his hands would signify the consummation of her

love. Acting quickly, the Nurse retrieves the sword and decides to save Phaedra from Theseus's wrath by having her accuse her stepson of rape and using his weapon as evidence. Now, even the Chorus's praise for Hippolytus cannot save him.

As Theseus returns, the Nurse's plot develops according to plan, and Theseus is roused to a violent denunciation of his son. Full of anger and hatred, a slave to blind passion, he orders the gods to kill Hippolytus. In the face of this immense injustice, the Chorus, in hauntingly modern terms, criticizes the gods for the distance from humanity that keeps them from positive intervention. Hippolytus's death is rendered in graphic detail by a messenger, telling of a sea monster that frightened his horses, who in turn dragged the hunter to his death over tree stumps and rocks. The horror of the act is increased further when his bloodied remains are brought on stage, and Theseus collapses with grief; even the Chorus is stunned.

When Phaedra appears and sees what is left of Hippolytus, she is raised to realize how badly both adults have failed him by giving in to their passions. Intensely pained, she accuses her husband: "I am a stepmother, and I bring death,/ but you, a father,

are much worse than I." As a punishment for his rash, harsh, and false judgment, Theseus is left alive, while Phaedra stabs herself with Hippolytus's sword. Trembling with sorrow, he orders "a royal pyre" for his son's funeral and demands that Phaedra's corpse be thrown into a ditch and covered with earth, as one would dispose of a dead animal.

## SUMMARY

Seneca the Younger's focus on practical moral advice and his imaginative use of violence to depict the full force of the decisions forced upon his tragic characters have ensured him a fascinated audience. His witty, poignant, and epigrammatic language, eminently quotable, has further established his hold over the minds and memories of his readers and listeners. His dramatic creation of intensely self-aware protagonists, who, like Medea or Phaedra, fully understand the evil nature of the actions that they are compelled to commit, fascinated Renaissance playwrights and clearly contributed to the creation of William Shakespeare's characters Hamlet and Macbeth.

R. C. Lutz

## BIBLIOGRAPHY

### By the Author

#### DRAMA:

The dating of Seneca's plays is approximate; the following were written c. 40-55 C.E.:

*Agamemnon* (English translation, 1581)

*Hercules furens* (*Mad Hercules*, 1581)

*Hercules Oetaeus* (*Hercules on Oeta*, 1581)

*Medea* (English translation, 1581)

*Oedipus* (English translation, 1581)

*Phaedra* (English translation, 1581)

*Phoenissae* (*The Phoenician Women*, 1581)

*Thyestes* (English translation, 1581)

*Troades* (*The Trojan Women*, 1581)

#### NONFICTION:

*Ad Marciam de consolatione*, c. 40-41 C.E. (*To Marcia, on Consolation*, 1614)

*Ad Helviam matrem de consolatione*, c. 41-42 C.E. (*To My Mother Helvia, on Consolation*, 1614)

*De ira libri tres*, c. 41-49 C.E. (*Three Essays on Anger*, 1614)

*Epigrammata super exilio*, c. 41-49 C.E.

*Ad Polybium de consolatione*, c. 43-44 C.E. (*To Polybius, on Consolation*, 1614)

*De brevitate vitae*, c. 49 C.E. (*On the Shortness of Life*, 1614)

*Apocolocyntosis divi Claudii*, c. 54 C.E. (*The Deification of Claudius*, 1614)

## Seneca the Younger

*De clementia*, c. 55-56 C.E. (*On Clemency*, 1614)  
*De constantia sapientis*, c. 55-56 C.E. (*On the Constancy of the Wise Man*, 1614)  
*De beneficiis*, c. 58-63 C.E. (*On Benefits*, 1614)  
*De tranquillitate animi*, c. 59-61 C.E. (*On the Tranquility of the Soul*, 1614)  
*De otio*, c. 62 C.E. (*On Leisure*, 1614)  
*Quaestiones naturales*, c. 62-64 C.E. (*Natural Questions*, 1614)  
*Epistulae morales ad Lucilium*, c. 62-65 C.E. (*Letters to Lucilius*, 1917-1925)  
*De providentia*, c. 63-64 C.E. (*On Providence*, 1614)  
*Workes: Both Morall and Naturall*, 1614  
*Ad Lucilium epistulae morales*, 1917-1925 (3 volumes)  
*Seneca, Moral Essays*, 1928-1935 (3 volumes)

## DISCUSSION TOPICS

- Does the stoicism of Seneca the Younger ever undermine the effect of his tragedies?
- What thematic differences are there between Euripides' *Mēdeia* (431 B.C.E.; (*Medea*, 1781) and Seneca's *Medea*?
- What do Seneca's plays reveal about the characteristics of his Roman audiences?
- In addition to some of his characters, William Shakespeare was influenced by Seneca in the construction of his plays, in their supernatural features, and in other ways. Review this influence.
- Investigate Edith Hamilton's assertion that Seneca's tragedies exemplify "the Roman way as distinguished from the Greek way."

## VIKRAM SETH

**Born:** Calcutta (now Kolkata) West Bengal, India  
June 20, 1952

*Seth's work shows remarkable versatility and includes several volumes of poems, a surprising novel in verse, an award-winning travel book, the longest novel ever written in English, a novel that exploited his considerable knowledge of music, a libretto for the English National Opera, and a combination biography-memoir.*

### BIOGRAPHY

Vikram Seth (sayt) was born in Calcutta (now Kolkata) in the Indian state of West Bengal. His family moved around a lot and much of his early life was spent at boarding schools. His father was a shoe company executive, and his mother became a judge on the Delhi High Court. He has a younger brother, Shantum, and a younger sister, Aradhana.

Seth attended Welham Boys School and the Doon School, both in Dehradun, and in those years he has said he felt lonely and isolated. He went on to Tonbridge School in Kent, England, and then to the philosophy, politics, and economics program at Corpus Christi College, Oxford. He spent the period from 1975 to 1986 studying for a Ph.D. at Stanford University. He also received a Wallace Stegner Fellowship in Creative Writing (1977-1978) and worked with the Stanford poet Timothy Steele, whose influence led him to write traditional verse with formal rhyme and meters.

Seth left California to do field research in China from 1980 to 1982, gathering material for a doctoral dissertation that he never wrote. However, the remarkable feat of learning Mandarin Chinese in six months enabled him to translate Chinese poetry and to write the superb travel memoir *From Heaven Lake: Travels Through Sinkiang and Tibet* (1983). The memoir describes his hitchhiking tour

across the Himalayas and inspired some riveting passages, especially his account of the funeral ceremony near the Sera monastery in Lhasa. Seth witnessed human corpses being minced and crushed on a rock, with the human mash mixed with barley meal and the skulls pulverized by rocks before it was all blessed by a monk and served up to the hungry eagles waiting nearby. *From Heaven Lake* won him the Thomas Cook Travel Book Award for 1983.

In his first collection of poems, *Mappings* (1981), Seth displays a talent for nature writing as he "maps" his earlier life. Translations from Heinrich Heine, the Urdu poet Faiz Ahmed Faiz, and the Chinese poet Du Fu are graced by allusions to William Shakespeare, Marcel Proust, and other writers. *Mappings* was followed by *The Humble Administrator's Garden* (1985), a collection of poems set in China, India, and California. Some of the best lines in this volume are witty observations about the foibles of his family—a sister "immersed in sociology," his mother drinking ginger tea, and his father "Inveighing against politics and corruption." *The Humble Administrator's Garden* received the Commonwealth Poetry Prize for Asia in 1985. His first two volumes of verse were eventually followed by *All You Who Sleep Tonight* (1990), *Beastly Tales from Here and There* (1992), and *Three Chinese Poets: Translations of Poems by Wang Lei, Li Bai, and Du Fu* (1992).

Seth has not paraded his sexual tastes, but he has not hidden them either, saying in one poem that "Some men like Jack and some like Jill/ I'm glad I like them both . . ." Seth's mother, Leila Seth,

has explained in her memoir how difficult it was for her and Seth's father to understand Seth's homosexuality, but they loved him and accepted his life as he wished to lead it. In a television interview in India on January 21, 2006, Seth attacked the Indian penal code for its harshness toward homosexuals and condemned it as cruel and harmful. Although gay relationships do not dominate Seth's plots, the affair between Ed, who is gay, and Phil, who is mainly straight, is an important strand in the story line of *The Golden Gate: A Novel in Verse* (1986).

Seth has received numerous awards for both his prose and his poetry. Besides the awards for *From Heaven Lake* and *The Humble Administrator's Garden*, his novel *A Suitable Boy* (1993) was short-listed in 1993 for the *Irish Times* International Fiction Prize, and in 1994 it won the Commonwealth Writers Prize for best book, as well as the W. H. Smith Literary Award. In 2001, *An Equal Music* (1999) was honored with the Ethnic and Multicultural Media Award for best novel, and organizations in his native India have also bestowed awards on him.

#### ANALYSIS

Except for the Alexander Pushkin stanzas of *The Golden Gate*, Seth's narrative method is conventional. He does not manipulate time or point of view, nor does he indulge in postmodernist irony, and his characters are generally likable and believable. Seth has frequently been matched against Salman Rushdie, with some critics regretting Seth's choice of straightforward storytelling in the Victorian fashion. Mala Pandurang has defended Seth's technique on the grounds of his interest in social themes. Book 7 of *The Golden Gate*, for example, focuses on issues of nuclear power, with Phil passing out pamphlets in a crowd of antinuclear demonstrators, while Father O'Hare, "Bespectacled, short, nervous, chubby," harangues against "man-made doom."

One powerful theme of *A Suitable Boy* centers around the Zamindar Abolition Bill, which would confiscate the land of wealthy Muslim estate owners and redistribute it among the indigent. The prime advocate for the bill is Mr. Mahesh Kapoor, while one of the people who would lose heavily if the bill passes is Kapoor's old friend, Nawab Sahib of Baitar. The plight of the landless poor emerges when Maan Kapoor accompanies his Urdu teacher, Abdur Rasheed, to Rasheed's village home, where

the superb characterizations of the village people provide a counterweight to the trivial preoccupations of the Chatterji children. Rasheed is an intelligent man, a responsible working-class intellectual, and he awakens in the frivolous but decent Maan a social conscience. Mr. Mahesh Kapoor pushes through the Zamindar Abolition Bill. However, in succumbing to the pressure of an unhappy marriage and his zeal for social change, Rasheed loses his reason and kills himself.

In a concluding note to *An Equal Music*, Seth says that "Music to me is dearer even than speech," and talk of music and musicians is a common thread connecting his novels. For John in *The Golden Gate* (and probably for Seth), "[Arnold] Schoenberg's an ulcer generator," whereas a composition by Johannes Brahms creates "a continuous tenderness/ So deep it smooths out all distress." In *A Suitable Boy*, Nawab Sahib of Baitar invites a friend and the nawab's own two sons to hear the temperamental Ustad Majeed Khan sing *raags*. Seth tells of "The regally slow unfolding of the alaap, the wide vibratos on the third and sixth degrees," language that in its command of its subject anticipates the intuitive grasp of Western music that shines in *An Equal Music*, where Johann Sebastian Bach's *the Art of Fugue* and Franz Schubert's *Trout Quintet* become major characters in the drama. Shirley Chew has written that "Seth's novel can be said to aspire to the condition of music, and the more specific correspondences here are with musical rather than literary works."

Seth recalls in *From Heaven Lake* how moved he was by the flute player he heard in Kathmandu, finding himself drawn by the music into "the commonalty of mankind." This same feeling for music is everywhere evident in Seth's writings, as might be expected of someone who plays the Indian flute and the cello and sings Schubert lieder.

Children, nature, and animals all have minor roles in Seth's novels. In *The Golden Gate*, Ed keeps a green iguana christened Arnold Schwarzenegger—a "Great saurian from realms primeval!"—that fascinates the neighborhood children. "Schwarz" causes no problems for Ed, but John hates Liz's cat, Charlemagne, as much as he does Schoenberg. When Michael Holme, in *An Equal Music*, visits his former lover, Julia McNicholl, he meets not only her young son, Luke, but also Buzby, their "huge brown dog with a black face."

Buzby's antics ease the potentially awkward meeting of Michael and Luke. In *A Suitable Boy*, a bird comes to Lata at the end of part 13 in a poem, "The Fever Bird," from Amit Chatterji's volume with the same title. She is profoundly disturbed by the poem, by the bird's "call that skewers through [her] brain." The bird is also defined six hundred pages earlier as a "hawk-cuckoo," and its "brain-sick triple note" penetrates to Lata's subconscious, where she is struggling to choose a suitable boy to marry.

Seth often composes lovely passages of nature description, rich with details of birds and trees. Such a passage opens chapter 4 of *An Equal Music*, with Michael hoping to meet Julia at Round Pond in an appropriately autumnal scene, which he calls "this season of wood." Julia, however, does not appear, and he is left to muse on the bird song that comes to him through the "bare lattice" of a leafless chestnut tree. Section 12.5 of *The Golden Gate* describes spring in loving terms: The landscape is radiant with quince bursting in "shameless colonies/ On woody bushes," while blue jays croak and Easter lilies "effloresce/ In white and Lenten loveliness."

Seth's diction always sparkles, but nowhere is his language more playful and witty than in *The Golden Gate*. He devises rhymes that Lord Byron would have admired: "volition/Titian," "feisty/Christ—he," and "Marx/ecclesiarchs" are representative. The outrageous epithet, "putrefied orangutan," catches the eye, as does Janet Hayakawa's surname commemorating the famous semanticist and politician, S. I. Hayakawa. Literary allusions are everywhere in *The Golden Gate*, with Thomas Mann and Saint Bede the Venerable showing up in section 1.3 and Horace's cry "Eheu fugaces" about humankind's fleeting years soon following. Seth also refers to *Life's Little Ironies* (1894) by Thomas Hardy and *Zibaldone* (1898-1900) by Giacomo Leopardi, and he includes fragmentary quotations from Robert Louis Stevenson, Hannah Arendt, William Shakespeare's character Cassius, Theodore Roethke, John Milton's "Lycidas" (1638), and Andrew Marvell. However, the most elaborate play on literary sources comes in stanzas 9.24-9.26, where the cult of comic-book character Tintin is stirred up with talk of Bianca Castafiore, Haddock, and Gorgonzola, among others. In this whole complex tissue of cultural references, which appear throughout the novel's thirteen chapters, readers are left on their own.

## THE GOLDEN GATE

**First published:** 1986

**Type of work:** Novel

*Five characters dance around each other in a romantic pas de cinq, creating a lively arabesque until one of them dies in a car wreck.*

*The Golden Gate: A Novel in Verse* comprises thirteen books, or chapters, totaling 590 sonnets modeled after Charles Johnston's translation of Alexander Pushkin's long narrative poem, *Evgeny Onegin* (1825-1832, 1833; *Eugene Onegin*, 1881). The lines are written in iambic tetrameter, with an additional unstressed syllable affixed to lines one and three, five and six, and nine and twelve, thereby creating double, feminine rhymes in those lines, such as "fearful" and "tearful," "replying" and "crying," and "tissue" and "reissue." The rhyme scheme is *ababccdddefeggg*.

The novel is set in Northern California in 1980. John Brown, a twenty-six-year-old computer engineer, lonely and set in his ways, calls an old girlfriend, Janet Hayakawa, to lament his loveless plight. The enterprising Jan, who plays drums for a band called Liquid Sheep, quickly advertises on John's behalf in the personals column of the *Bay Guardian*, describing a "Well-rounded and well-meaning square/ Lusting for love." This beguiling plea hooks Liz Dorati, a veteran of Stanford Law School, who answers, "If you flout my charms, you are a tasteless lout." Liz's charms are not flouted and the carnal pleasures are intense, marred for John only by his hatred of Liz's cat, Charlemagne.

While Liz and John are enjoying their idyll, John's old school chum, Phil Weiss, is plodding along with his son, Paul, wondering what happened to his marriage. Then, through Liz and John, Phil meets Liz's brother, Ed, who sees in Phil just the soul mate he yearns for. Their affair is intense, if brief, and soon ends with a fist fight, fol-

lowed by Phil's plea that Ed not torment himself with guilt about their relationship. Phil asks, "What facet of our love outrages/ Your puritanical piety?" Book 8 concludes with Phil's eloquent defense of gay love and a final, exhausting night lying apart on the same bed.

The romance of John and Liz begins unraveling on Thanksgiving Day at the Doratis' home when Liz learns that her sister, Sue, has won a scholarship to study for a year in Paris, and Liz begins to wonder if committing to a life with John is what she wants. Thoughts of Paris evaporate instantly when Liz's father tells her that her mother has cancer. While Liz is absorbing this bad news, John is snooping around Liz's mail lying on the hall table; when he spies a letter addressed in a hand that he recognizes as that of their old friend Phil, he thrusts it at Liz, "With jealous loathing and dismay." This unexpected and unconvincing scene ends with John packing to leave immediately, still not knowing about Mrs. Dorati's condition.

The denouement is swift and tragic. After Phil and Liz marry, John and Jan struggle toward a happy union, dampened by the cold reception given an exhibit of her sculptures, but John's world collapses when Jan dies in a car wreck. John's spiritual condition is evidenced in the weeds that grow thick and rank in his flower beds and in the dust that covers everything in his "disordered rooms." Finally, when he gets Phil and Liz's announcement of the birth of a son they are naming John, he goes to the telephone to dry his tears by calling them with words of love, not bitterness. This tender conclusion makes a superb elegy.

## A SUITABLE BOY

**First published:** 1993

**Type of work:** Novel

*It is the early 1950's in the fictional city of Brahmpur in eastern India, and the widowed Mrs. Rupa Mehra is worrying about finding a suitable boy for her youngest daughter, Lata.*

*A Suitable Boy* is a tale of four families told in 1,474 pages. The widowed Mrs. Rupa Mehra has two sons, Arun, who is married to Meenakshi, a daughter of the prominent Chatterjis of Calcutta,

and Varun, a race track habitu  much picked on by the older Arun. She also has two daughters, Savita, married to Pran Kapoor, and the bright, attractive Lata, whose need for a proper husband preoccupies Mrs. Mehra.

The Kapoors also live in Brahmpur, where Mr. Mahesh Kapoor is minister of revenue for Purva Pradesh. The Kapoors have a daughter, Veena, whose husband, Kedernath Tandon, works in the shoe trade. Veena and Kedernath's nine-year-old son, Bhaskar, is a mathematical genius, who shares the same name as a famous Indian mathematician. (In a similar bit of onomastic play, Mr. Kapoor's secretary, Abdul Salaam, shares, with an extra vowel, the name of the Pakistani winner of the Nobel Prize in Physics for 1979, Abdul Salam.) Pran Kapoor teaches English at the university in Calcutta, while his easygoing younger brother, Maan, indulges himself with courtesans, drink, and gambling.

The other two families are the Muslim Khans of Brahmpur and the Hindu Chatterjis of Calcutta. The Begum Abida Khan lives alone, her husband having abandoned her to live in Pakistan. Her husband's brother, the widower Nawab Sahib of Baitar, oversees the Khans' affairs, which consist mainly of the doings of his married daughter, Zainab, and his two sons, Imtiaz and Firoz. The latter's close friendship with Maan Kapoor results in near-tragedy. The Chatterjis belong to the Calcutta elite. Mr. Justice Chatterji sits on the Calcutta High Court, studies Sanskrit classics, and with his wife entertains lavishly. His pretentious son-in-law, Arun Kapoor, is being cuckolded by his wife, Meenakshi, the Chatterjis' daughter, with Arun's best friend. Meenakshi and her lively younger sister, Kakoli, offend Mrs. Rupa Mehra with their sophistication. The oldest Chatterji son, Amit, studied at Oxford and writes poetry; the middle son, Dipankar, alternates between the mystical and the practical; and the youngest son, Tapan, lurks in the background of the family drama.

A major character outside of these family groups is the enterprising Haresh Khanna, whose social background is far below that of the Chatterjis, the Khans, and the Kapoors, although he suits Mrs. Rupa Mehra just right. He studied at Midlands College of Technology and has mastered the shoemaking business from top to bottom. His accent, his manners, his tastes, and his dress betray his modest

origins, but his industry, his confidence in himself, and his work habits guarantee success with the Czech firm that he brazens his way into. (One of the great pleasures of the novel is the detailed account of the shoemaking business, in which Seth's father also was employed.) Haresh had a serious love interest, but the girl's Sikh religion doomed their relationship.

Encouraged all the way by Mrs. Rupa Mehra, Haresh conducts a serious campaign to win Lata Mehra, who besides having become the rather languid romantic focus of Amit Chatterji has long desired a handsome and talented fellow Muslim student, Kabir Durrani. Kabir's father, Dr. Durrani, is a brilliant but somewhat vague mathematician whose friendship with the precocious Bhaskar constitutes one of the many small delights of Seth's intricate narrative. Kabir is a fine youth and returns Lata's love, but his religion makes their union impossible, and eventually Lata follows her mother's wishes and marries the suitable boy, Haresh Khanna. *A Suitable Boy* thus becomes in many ways an old-fashioned novel with a happy ending.

## AN EQUAL MUSIC

**First published:** 1999

**Type of work:** Novel

*Michael Holme, second violinist for the Maggiore Quartet, revives an affair with a now married girlfriend, a pianist who is going deaf.*

*An Equal Music* is set mainly in London and gets its title from a sermon by John Donne. Its first-person narrator, Michael Holme, is in his mid-thirties and plays second violin for the Maggiore Quartet. Michael grew up in northern England and studied at the Royal Northern College of Music in Manchester. Michael's former teacher at the Musikhochschule in Vienna, Carl Käll, has been long retired in Sweden, but he remains a powerful presence in Michael's imagination because he had foretold Michael's collapse at a concert: "It was because he had said I would fail, and I could see him in the audience and knew he had willed me to." A second haunting figure in Michael's life is Julia McNicholl, a fellow student whom he had loved and abandoned after his Vienna failure. All

of this happened ten years ago. Julia is now a wife and mother, and Michael bitterly regrets his decisions.

Michael's comusicians in the quartet are Helen, the viola player; Helen's older brother, Piers, first violinist; and Billy, cellist and composer. Leaving Wigmore Hall one night after a program of Joseph Haydn, Wolfgang Amadeus Mozart, and Ludwig von Beethoven, Michael runs into Julia, and their old romance is soon rekindled as an adulterous affair. The Maggiore Quartet's success wins it a contract to record Johann Sebastian Bach's *Art of Fugue*, as well as an important concert in Vienna. Piers, however, not knowing of Julia's deafness, invites her to join them in playing Franz Schubert's *Trout Quintet*. Ambiguities in their rehearsal force Michael to reveal Julia's deafness, a challenge that is surmounted by providing Julia a strong bass sound to follow, and the program at the Musikverein goes off well, despite Michael's debilitating nervousness.

Julia follows the quartet to Venice, and all is well until Michael reads a loving fax that Julia has sent her husband, and his cruel comments wound Julia beyond reconciliation. Back in London, Julia's husband, James, a former Boston banker, invites Michael to a party at which James's coolness tells Michael that he knows of the affair. Michael soon quits the quartet when he discovers that Julia has scheduled a performance of the *Art of Fugue*, and when he goes to hear her play at Wigmore Hall he leaves at the intermission and walks off in the rain.

## SUMMARY

Despite their broad differences in settings and subjects, Vikram Seth's novels *The Golden Gate*, *A Suitable Boy*, and *An Unequal Music* share a gratifying storytelling genius. Moreover, in the twists and turns of their plots they seldom fail to achieve credibility, and their language is always a pleasure.

*Frank Day*

## PETER SHAFFER

**Born:** Liverpool, England  
May 15, 1926

*One of the most significant innovative playwrights of his generation, Shaffer created plays that are uniquely theatrical and especially effective through imaginative and experimental staging.*

### BIOGRAPHY

Peter Levin Shaffer (SHAF-ur) and his twin brother Anthony were born in Liverpool to Jewish parents, Reka and Jack Shaffer, on May 15, 1926. The family left Liverpool in 1936 and moved around England until 1942, when they settled in London. Anthony also became a prizewinning playwright, best known for the play *Sleuth* (pr. 1970); younger brother Brian became a biophysicist, but after their father's death he took over management of the family's real estate firm.

Peter Shaffer attended St. Paul's School, but World War II interrupted his education and he worked as a coal miner in Yorkshire and Kent from 1944 to 1947. He later attended Trinity College, Cambridge, and earned a baccalaureate degree in history in 1950. While in college he coedited the student magazine *Granta* with his brother.

After Cambridge, Shaffer moved to New York and worked for Doubleday bookstores in midtown Manhattan. In 1951, Peter and Anthony Shaffer cowrote a detective novel, *The Woman in the Wardrobe*, under the composite pen name Peter Anthony. They collaborated on two subsequent novels, *How Doth the Little Crocodile?* (1952) and *Withered Murder* (1955). During these years Shaffer worked in acquisitions at the New York Public Library (1951-1954) and as a symphonic music editor for Bosey and Hawkes in England (1954-1955), and he served as a literary critic for *Truth* (1956-1957). He

later worked as a music critic for *Time and Tide* (1965-1972).

During the 1950's, he began writing radio and television scripts, including *The Salt Land* (1955) for ITV in Great Britain; *The Prodigal Father* (1955), a radio play produced and aired by the British Broadcasting Corporation (BBC); and *Balance of Terror* (1957), which was produced first by the BBC and later aired on the *Studio One* television series in the United States. Shaffer's theatrical career was launched with the London premiere of *Five Finger Exercise*, a play in two acts, at London's Comedy Theatre on July 16, 1958, directed by John Gielgud. Shaffer's only "well-made," naturalistic domestic drama portraying a family in crisis enjoyed popular and critical success, running for two years in London and winning Shaffer the *Evening Standard* Theatre Award for best new playwright. When it was later produced in New York in 1959, it garnered the New York Drama Critics' Circle Award for best foreign play.

His next plays, a pair of one-acts, *The Private Ear* and *The Public Eye*, premiered at London's Globe Theatre on May 10, 1962, then crossed the Atlantic in 1963 to New York. *The Private Ear* (pr., pb. 1962) concerns a sensitive, artistic, and naïve young man, Bob, who brings home an attractive secretary, thinking she shares his love of music. He fumbles around trying to impress her, but she rejects him when he tries to forcibly kiss her. Its companion play, *The Public Eye* (pr., pb. 1962), echoes back to Shaffer's roots in detective stories with a tinge of tongue-in-cheek humor.

Shaffer next wrote *The Merry Roosters Panto* (pr. 1963), a Christmas pantomime for children that was produced at Wyndham's Theatre in London.

Shaffer's first "think piece" and probably his most mythical play, *The Royal Hunt of the Sun* (pr., pb. 1964), was first produced in Chichester in 1964, moved to the National Theatre in London in December, 1964, and opened in New York the following year. It dramatizes Francisco Pizarro's conquest of the Incas and his search for the city of gold.

Shaffer was commissioned by Laurence Olivier to write his next play for the National Theatre, an extended one-act farce entitled *Black Comedy* (pr. 1965, pb. 1967). It uses a device that Shaffer refers to as a "Chinese convention" of reversing black and white. The opening scene is dark, as if the characters can see, when suddenly the lights "go out" for the characters but come on for the audience. The remainder of the play is staged in this style, which provides much of the comedy. Its less successful companion piece, *White Lies*, opened in New York together with *Black Comedy* in 1967 but was later revised as *White Liars* for the London stage in 1968.

Shaffer's next play, *The Battle of Shrivings* (pr. 1970), is based on his experiences in New York City. It tells the story of a group of protestors with a charismatic leader and is widely considered his most American play. It suffered a poor reception, so Shaffer rewrote and retitled it simply *Shrivings* (pb. 1973), but it was never produced.

Shaffer hit his artistic stride during the 1970's, however, with two National Theatre productions that would firmly establish his reputation as a major playwright: *Equus* (pr., pb. 1973), a play about a troubled young man, and *Amadeus* (pr. 1979, pb. 1980), the pseudobiographical account of Wolfgang Amadeus Mozart from the point of view of his archenemy, Antonio Salieri. *Equus* opened at the Royal National Theatre at the Old Vic in London and then ran for more than a thousand performances at the Plymouth Theatre on Broadway, winning the Tony and the Drama Critics' Circle awards in 1975. *Amadeus* opened in London in 1979 and won both the London Critics Award and the *Evening Standard* Theatre Award. When it opened on Broadway two years later, it also ran for more than a thousand performances and won the Drama Desk Award, the Critics Outer Circle Award, and five Tony Awards, including one for best play. In 1977, Shaffer adapted *Equus* for a film directed by Sidney Lumet, and his screen adaptation of *Amadeus* in 1984 won eight Academy Awards, including one for best adapted screenplay.

Shaffer's next play, a biblical epic entitled *Yonadab: The Watcher* (pr. 1985, pb. 1988), is set in Jerusalem in 1000 B.C.E. It opened at the Olivier Theatre under National Theatre sponsorship on December 4, 1985. The play deals with the incestuous rape of King David's only daughter, Tamar, by his eldest son, Amnon. In the program notes, Shaffer wrote that the play "owes its existence primarily to two sources: The Book of Samuel which I first read as a boy, and the book of Dan Jacobson called *The Rape of Tamar* (1970) which I first encountered in 1970." The modern novel and the ancient text linked in Shaffer's mind, compelling him to create a play: "The terrible directness of the original Testament attracted me as deeply as the emotional paradox discernible under the surface of the novel: the longing for creed in the incredulous, the profound ache for belief in the mockers of belief."

In 1987, Shaffer was awarded the prestigious honorary title of Commander, Order of the British Empire. His next play, *Lettice and Lovage* (pr., pb. 1987), written for the actress Maggie Smith, was first produced at the Theatre Royal in Bath. It is a comedy about an unusual friendship, posing the issue of history versus truth. Lettice Douffet loses her job as museum tour guide because she invents historical anecdotes to entertain and enliven the tourists who visit there. She is befriended by her superior at the National Trust, Lotte Schoen, who fires her but later feels guilty for consigning Lettice to an impoverished life. The two friends amuse each other and enlarge the dreary present by reenacting scenes from England's heroic past, inspired by "lovage," an herb used to flavor Lettice's favorite cordials. The play won an *Evening Standard* Theatre Award for best comedy in 1988 and was taken to Broadway in 1990. Shaffer returned to radio in 1989 with the BBC-aired play *Whom Do I Have the Honour of Addressing?*

In 1992, *The Gift of the Gorgon* (pr. 1992, pb. 1993) was produced by the Royal Shakespeare Company at London's Barbican Centre. In this play, a young academic travels to Greece seeking information about his father, a playwright who died mysteriously. The son is illegitimate, and he must gain the confidence of his father's widow. Flashbacks reveal that the father was arrogant and revengeful but also gifted. Although the widow is tempted to reveal her husband's suicide to the public, she finally decides to let his reputation remain

intact. The play was poorly received by the critics and the public.

In 1992, Shaffer won the William Inge Award for Distinguished Achievement in the American Theatre. Two years later, he became the Cameron Mackintosh Professor at St. Catherine's College, Oxford, a one-year position created to promote interest in theater. In the 1990's and into the twenty-first century, many of Shaffer's plays were revived and some were considered modern classics. He was knighted by Queen Elizabeth II in 2001.

### ANALYSIS

Peter Shaffer's plays are distinguished by a unique sense of theatrical design and structure and by a particular fascination with certain themes. One is the psychological conflict between the artistically gifted and the working lot. Although his plays depict the artistically gifted in a sympathetic manner, Shaffer seems to view creativity and imagination as dangerous attributes. His young, artistically gifted characters, such as Clive and Walter in *Five Finger Exercise*, Bob in *Private Ear*, Alan Strang in *Equus*, and Wolfgang Amadeus Mozart in *Amadeus*, exhibit more than a tendency toward self-destruction. Some of the other characters in these plays are simultaneously contemptuous and envious of the characters with artistic ability and sensitivity, unable to understand why the creative characters are different from other people. In *Five Finger Exercise*, for example, the obvious affection juxtaposed with a profound misunderstanding between father and son is a major point of contention within the family dynamic. In *Amadeus*, Antonio Salieri rails against a God who has rewarded an obscene boy (Mozart) with a superior gift that Salieri cannot hope to match, and the burnt-out psychiatrist in *Equus*, Martin Dysart, envies Alan's ability to experience great emotions and passions.

Another dominant theme in Shaffer's plays is a quest for religion versus spirituality. He examines the religion of the Incas in *The Royal Hunt of the Sun*, Alan's equine god in *Equus*, and biblical mores in *Yonadab: The Watcher*. Critics have noted that a particular recurrent character type is present in many of Shaffer's best plays: older men, experiencing a crisis in faith, who are confronted with primitive impulses that only exacerbate their situations. Pizarro and Martin Ruiz in *The Royal Hunt of the Sun*, Martin Dysart in *Equus*, Antonio Salieri in

*Amadeus*, and Mark Askelon in *Shrivings* all experience profound dissatisfaction with their cultures and lives. Shaffer shows how modern society has failed to provide a constructive outlet for ritualistic worship. To compensate, Alan in *Equus* manages to fabricate his own subjective faith and a form of ritualistic worship out of his fascination with horses and his mother's conventional Christianity.

Many of Shaffer's characters are mythic figures set within the framework of ritual drama. This is especially evident in *The Royal Hunt of the Sun* and *Equus*, two plays structured upon quest figures. In *The Royal Hunt of the Sun*, Pizarro describes his mission as "God hunting," and he views the Inca people as a primitive god in whom he wishes to believe. Like Dysart in *Equus*, Pizarro is fated to kill the god. Dysart and Pizarro are cynics, symbols of despair, and neither one succeeds in achieving his spiritual goal. Salieri is another despairing cynic who kills his young rival, whose talent he regards as godlike. It is Salieri's fate to outlive his reputation and to grow old as a forgotten man confined to an asylum.

The victims of these plays are younger than their adversaries. The dramatic conflict on a larger plane is, in all instances, between innocence and experience. Atahualpa, an Inca, trusts Pizarro; Alan Strang trusts Dysart, the doctor who will cure him by killing his spiritual potential; and the naïve Mozart trusts Salieri, who pretends to be his friend. In these plays there is conflict between the primitive and civilized worlds, with the suggestion that the first is bound to lose against the guile and treachery of the latter. In *Amadeus* the most devious character is the highly sophisticated Salieri. To a lesser degree, this dichotomy is depicted between the family and Walter in *Five Finger Exercise*. It is the family members whom Walter trusts and, in the end, it is they who destroy him. The conflict of the civilized and restrained against the primitive and romantic may be seen as a facet of the general clash between experience and innocence.

Shaffer is highly skilled in constructing a distinctive theater of spectacle. He has managed to translate symbolic action effectively into theatrical presentation by working with director John Dexter, and Shaffer incorporated Dexter's sets and props for *Equus* into the published text of the play. Many of Shaffer's plays, particularly *The Royal Hunt of the Sun* and *Equus*, depend upon flexible, inventive designs to advance the productions. The two key ac-

tions of *The Royal Hunt of the Sun* are presented in mime—the ascent of Pizarro’s army into the Andes Mountains and the massacre of the Incas. The second of these actions, like the mutilation of the horses in *Equus*, would be repugnant if represented literally and naturalistically.

Some critics have pointed out that Shaffer’s plays are male-dominated, relegating women to the margins of the major conflict as wives, mothers, lovers, and sisters. This is certainly true of his early and major plays; however his later plays, notably *Lettice and Lovage* and *The Gift of the Gorgon*, present middle-aged female protagonists who are not dependent upon a male presence and are fully developed as characters with motivations, objectives, and independent choices. M. K. MacMurrough-Kavanagh comments in her book *Peter Shaffer: Theatre and Drama* (1998) that they “emerge as finer human beings than the men with whom they deal since not only do they survive victimization at their hands, but they also refuse the option of vengeance against them.”

Shaffer has had the courage to take on large themes and has been criticized by some for being pretentious. He described *The Royal Hunt of the Sun* as being “about a man’s search for immortality,” explaining that the play was written to create spectacle and to make magic, “to convey the kind of excitement I believed could still be created out of ‘total’ theatre.” In writing for the stage, Shaffer intends to create “an experience . . . entirely and only theatrical.” Few would argue that he achieved this goal most successfully with *Equus*.

What is perhaps most remarkable about Shaffer’s work is his innate understanding of the medium for which he is writing. Having written novels, teleplays, radio plays, stage plays, and screenplays, his understanding of what makes a work successful cinematically versus theatrically is a rare talent. His own film adaptation of *Amadeus* is probably the best example of his abilities in this area. Overall, however, Shaffer will be remembered first and foremost as a playwright. He has made theatrical magic, questioned the values of the contemporary world, and pursued lost myths and rituals in an impressive canon of work. Through his plays Shaffer has reminded audiences of what the theater is about—ritual representation of human ideals and aspirations.

## FIVE FINGER EXERCISE

**First produced:** 1958 (first published, 1958)

**Type of work:** Play

*A family is forced to deal with undercurrents of resentment when a visiting tutor brings their emotions to the surface.*

Originally titled *Retreats*, the current title, *Five Finger Exercise*, is a clever and symbolic reference to a piano exercise for pianists. The play has five characters that must “exorcise” their conflicts, and piano music is used throughout to underscore and punctuate dramatically heightened moments. Shaffer has admitted the autobiographical nature of the play, stating in the preface to his collected plays that it “expressed a great deal of my own family tensions and also a desperate need to stop feeling invisible.”

The play focuses on the Harrington family, who are spending a holiday together in their cottage in Suffolk, England. There is a snobbish mother, Louise, who fancies herself a Parisian aristocrat; a working class father, Stanley, who has done quite well for himself and his family in the furniture business; a troubled and sensitive son, Clive, who is just entering college, drinks too much, and is trying to find himself; and a smart-mouthed, feisty, fourteen-year-old daughter, Pamela. The fifth character is a young German music tutor, Walter, employed by the Harringtons to teach Pamela to play piano.

Walter acts as a catalyst for the family in bringing their underlying resentments out into the open for discussion and resolution. Louise resents Stanley for stifling her creative nature, while Stanley dismisses Clive’s yearning for something more fulfilling than making furniture. Pamela thinks her brother is spoiled, and Clive feels unappreciated and misunderstood by his father. Walter, however, expresses only happiness and gratitude that he has found a family and a safe place to live. In conversations with each family member, Walter helps them see their situations more objectively, which helps them find solutions to their problems. He is the model of what Clive should become: an independent, self-sufficient, educated, and artistic young man, who is comfortable with himself.

Clive is jealous of his mother's attentions toward Walter and tells his father that they are having an affair, but he later regrets it when Walter proves to be his true friend. Once Louise and Stanley agree to go away together in an effort to save their marriage, Louise turns against Walter and asks Stanley to dismiss him. Although Walter begs to stay with the family, they remain firm, blaming Walter for their children's problems.

While Walter plays his gramophone upstairs, Louise learns about Clive's lie and rejects his apology. In the midst of their argument, Walter's record skips, and when Stanley knocks on his door he discovers that Walter has attempted to commit suicide by turning on the gas in his room. The others galvanize to save him, as they seem to suddenly realize what Walter has done for them, and he is resuscitated. The play ends with Clive praying for courage, which Gene A. Plunka, in his book *Peter Shaffer: Roles, Rites, and Rituals in the Theater* (1988), defines as "adhering to one's own norms and values no matter how different they are from the . . . accepted societal mores and standards."

This play deals in part with the difference between the truly artistic, romantic, and sensitive versus those who do not understand them. Shaffer explores this theme again in *Private Ear* and most effectively in *Equus*, when creativity and theatricality in his playwriting reach a summit.

## THE ROYAL HUNT OF THE SUN

**First produced:** 1964 (first published, 1964)

**Type of work:** Play

*The play dramatizes Francisco Pizarro's conquest of the Incas, his search for the fabled city of gold, and his extending the frontiers of the Spanish empire.*

"This story is about ruin," says Martin Ruiz at the beginning. Old Martin, a soldier of Spain now worth millions, serves as the chorus, telling the story of how Francisco Pizarro, a man in his sixties, managed to conquer an empire of twenty-four million Incans with an expeditionary army of one hundred and sixty-seven men. Ruiz regrets the day he first set eyes upon Pizarro.

The action then goes back forty years, when Pizarro is recruiting soldiers in Spain for his Peruvian expedition. Young Martin, at the age of fifteen, is schooled in the codes of chivalry and is an idealistic advocate of his king and religion. He eagerly enlists his services. The next scene introduces the churchmen: Valverde, the Dominican chaplain; his associate, the Franciscan de Nizza; Pedro de Candia, cavalier from Venice, in charge of weapons; and the arrogant Miguel Estete, overseer in the name of King Carlos who threatens to challenge Pizarro's authority in the New World. The expedition departs into the forest.

The third scene introduces the God-king Atahualpa, sovereign Inca of Peru; Villac Umu, his high priest; and Chalcuchima, his general. Atahualpa believes the white god is coming to bless him. This naïve belief will be his undoing.

The action alternates between the Inca court, fortified high in the mountains, and the approaching Spanish army. After six weeks, the army passes through the forest and arrives at the border of the Inca Empire, finding a road fifteen feet wide. The army is met there by the Incan General Chalcuchima, who brings commands that the Spaniards should visit the God-king at Cajamaarca, a month's march up into the mountains. After the Spaniards arrive, the sovereign Inca demands to see their god, whom he believes to be Pizarro. Valverde, angered by this blasphemy, orders Pizarro to attack. The first act ends with the mime of the great massacre. The Incans are massacred and Atahualpa is taken hostage. Pizarro crowns himself king.

Act 2, "The Kill," is about the conflict between Pizarro and the captive Atahualpa, who still has the power and authority to crush Pizarro and his army. Communication is at first complicated by Felipillo, the treacherous Incan interpreter, who lusts after the Inca's wife, but young Martin has learned enough of the Incan language to recognize Felipillo's deceit and advises Pizarro. The tactful and honest Martin from that point forward becomes the interpreter, and he is therefore "pry to everything that passed between them during the next months."

Pizarro, a cynic mainly interested in plunder, promises to set Atahualpa free if the Inca will fill with gold a room twenty-two feet long by seventeen feet wide. The trusting Atahualpa commands that

the gold be gathered from across his empire. Coming from a more honest culture, he does not entertain thoughts of Spanish treachery. During the time required to accumulate this treasure, Atahualpa debates the nature of divinity with the churchmen and the nature of kingship with Pizarro.

The Spaniards put pressure on Pizarro to kill the Inca, which he would rather not do. Pizarro soon realizes, however, that his reputation as conqueror will only be assured if he murders his Incan counterpart. Atahualpa calmly believes he cannot be killed because of his divinity. He tells the sixty-three-year-old Pizarro: "You will die soon and you do not believe in your god. That is why you tremble and keep no word. Believe in me." Torn between desire and duty, Pizarro finally allows a Spanish court to accuse Atahualpa "of usurping the throne and killing his brother; of idolatry and having more than one wife." The God-king is found guilty and murdered, failing the ultimate test of his divinity. Pizarro curiously seems to want to believe in Atahualpa's divinity and is devastated.

## EQUUS

**First produced:** 1973 (first published, 1973)

**Type of work:** Play

*A magistrate calls upon a skilled psychiatrist, Martin Dysart, to treat an adolescent boy who has blinded six horses with a metal spike.*

The success of *Equus* was attributable partly to the staging designed by John Dexter, who has also directed *Black Comedy* and *The Royal Hunt of the Sun*. Dexter helped Shaffer visualize the abstractions that give the play its power and the rituals that inform the play's spectacle. The play is about madness, and Shaffer manages to dramatize the fantasies of a disturbed boy's mind, as well as the frustrations of the psychiatrist, Martin Dysart, who is asked by his friend Hesther Salomon to cure the boy who has, for no apparent reason, blinded the horses.

Act 1 is a search for motive and meaning as Dysart interviews the boy and his parents. The boy is at first uncooperative but later comes to trust Dysart and reveals his psychological secrets. Using hypno-

sis, Dysart gets the boy to remember the experience and manages to put the boy on the road to recovery. Dysart seriously questions, however, whether he should treat the boy at all. The boy, Alan Strang, has a vitality and twisted imagination that fascinate the doctor. Dysart questions whether he should rob Alan of his uniqueness and make him normal, which is to say, ordinary. The play is shaped by Dysart's monologues and by two spectacles, Alan's "wild midnight ride" at the end of act 1 and his blinding of the horses at the climax of act 2.

Alan is a friendless loner, ignored by his parents. His worship of horses is solitary, not communal, reflecting Shaffer's own distaste for organized religion. Dysart becomes the boy's spiritual father, recalling the story of Abraham and Isaac as he sacrifices Alan to social norms. Alan trusts Dysart as his spiritual father, just as Isaac trusted Abraham, but Abraham trusted his God, as Dysart does not. The obedient Abraham is far different from the doubting Dysart; the parable is twisted to fit a new context. There are also biblical echoes of the Book of Revelations in Alan's incantations during his midnight ride.

The themes of *Equus* are primitive and elemental (worship, passion, and bestiality), psychosexual (masturbation, sexual frustration, and confusion), contemporary (professional burnout and the dysfunctional family), and ethical (the duty of the doctor to heal and to alleviate pain). All the male characters seem to have sexual problems. Alan and Dysart seem to have a problem in the way they relate to women. Frank, Alan's father, frequents pornographic film houses.

The key theme of *Equus* is reiterated by Dysart in his mad and rambling monologue that begins and ends the play: "Extremity is the point." Dysart is driven to distraction by what Shaffer has described as the "continuous tension" between "the Apollonian and the Dionysian," symbolized by Dysart and Alan, and between "the violence of instinct and the desire for order and restraint."

## AMADEUS

**First produced:** 1979 (first published, 1980)

**Type of work:** Play

*Composer Antonio Salieri feels threatened by the young Wolfgang Amadeus Mozart and plots to destroy him out of spite and jealousy.*

Shaffer has described *Amadeus* as “a fantasia on Mozartian themes.” The play is not a documentary biography, but Shaffer asserts that many of the elements of the play are true and that in no way has the specific nature of Wolfgang Amadeus Mozart the man or the composer been violated. On the other hand, one might protest that the Italian composer Antonio Salieri has been slandered by the drama.

The play is set in the imperial Austrian court in Vienna, musically dominated by Italians, foremost of whom is the court composer Salieri, who has pledged his soul to God in hopes of becoming the greatest composer of his age. Salieri has the ear of his emperor, but he is ironically forced by his own understanding of music to recognize a far greater talent in the foul-mouthed, vulgar libertine, Mozart, who is capable of creating music of sublime beauty.

The action is framed by the demented recollections of Salieri at the end of his life, in 1823. He is no longer a famous composer but a forgotten man made bitter and crazy by envy and cynicism. Salieri’s story begins in 1781, when Mozart performs for the archbishop of Salzburg. From that point on Salieri does everything in his power to conspire against Mozart and block his advancement at court. He hires a maid who spies on Mozart and reveals family secrets. After Mozart’s estranged father, Leopold, dies, Salieri, after seeing a production of the opera *Don Giovanni*, understands the composer’s sense of grief and guilt over his father’s death and devises a demoniac plan

that brings Mozart to the point of exhaustion and death.

The set for the play is abstract, a rectangle of wood set into blue plastic. It serves as Salieri’s salon, Mozart’s apartment, reception rooms, and opera houses. In addition, there is an upstage playing space enclosed by a proscenium that Shaffer describes as a light box, a useful device for theatrical trickery. Action originally designed for this space had to be modified for the film adaptation. For the screenplay, Shaffer also had to reinvent the play’s opening, provided by a chorus of voices of the citizens of Vienna. His solution was to begin with Salieri’s slashing his throat, which comes at the end of the original play’s text, and to frame the story with Salieri’s account of his dealings with Mozart. The film version creates a first impression of incoherent madness. The madness becomes more rational and controlled as Salieri tells his story to a bewildered and shocked priest, gradually building in intensity toward a climax of renewed madness. The old, mad Salieri finally calls out: “Forgive me, Mozart! Forgive your assassin!”

Even though the London production of 1979 proved to be the most popular play ever mounted by the National Theatre to that time, Shaffer, ever the perfectionist, continued to revise the play before its New York opening. “One of the faults,” Shaffer notes in the preface to the American edition, was “that Salieri had little to do with Mozart’s ruin.” The American version puts Salieri “where he properly belonged—at the wicked center of the action.” Later still, Shaffer revised the script all over again for the film version, creating one of the most remarkable film adaptations in the history of cinema. The film won eight Academy Awards.

### SUMMARY

Peter Shaffer’s plays use unique theatrical design—including sets, props, mime, and stylized action—to present his abstract, psychological, and metaphysical themes in the proper theatrical context: a conflict between people. His plays often depict the victory of the experienced, the civilized, and the godless over the naïve, the primitive, and the romantic. Shaffer’s works have been successful on both sides of the Atlantic and on stage and screen.

## DISCUSSION TOPICS

- How does Peter Shaffer deal with the issue of religion in his plays? Does he deal with spiritually differently than he does religion?
- In *Lettice and Lovage*, Lettice is fired for making up stories about historical events to entertain the tourists. Is it acceptable to alter historical details for dramatic purposes? How historically accurate are *The Royal Hunt of the Sun* and *Amadeus*? Judging from his plays and not his remarks, what is Shaffer's opinion on the issue of historical accuracy?
- How does Shaffer portray women in his plays? Does his dramatic treatment of them change significantly, and, if so, how?
- Why does Shaffer rework and rewrite his plays to be produced on the screen? Are there different writing requirements for a film than for a play? How successful has Shaffer been in translating his stage plays into screenplays?
- Some critics have suggested that John Dexter's staging of Shaffer's plays, especially *Equus* and *The Royal Hunt of the Sun*, made them more successful in production than they would have been with a less inventive director/designer. Would you agree? What is the importance of a director in the theater? Should playwrights always collaborate with a director in developing their plays?
- In *The Gift of the Gorgon*, Shaffer portrays a rather unlikable playwright who calls drama teachers "dry sticks" because they misinterpret his plays. Which matters most—what the playwright says about the play or what the playwright says with the play? Is it necessary or even important to know anything about the playwrights in order to understand and interpret their plays?

## WILLIAM SHAKESPEARE

**Born:** Stratford-upon-Avon, Warwickshire, England  
April 23, 1564

**Died:** Stratford-upon-Avon, Warwickshire, England  
April 23, 1616

*Shakespeare is generally considered the greatest dramatist in English and one of the greatest writers of all time, famous for his use of language, character portraits, and keen insight into human nature and human problems.*

### BIOGRAPHY

Like many commoners who lived and died during the Renaissance, William Shakespeare left only a meager record on which scholars have been able to make inferences about his life both in his hometown of Stratford-upon-Avon and in London. Nevertheless, painstaking research of available church and civic records has allowed biographers to construct a reasonable portrait of the man commonly considered the greatest English writer and one of the world's most significant literary artists. The documentary record, collected and analyzed painstakingly in scholarly monographs such as Samuel Schoenbaum's *William Shakespeare: A Documentary Life* (1975), suggests Shakespeare led a comfortable middle-class life, marketing his plays and managing a successful acting company, the profits from which made him wealthy and allowed him to spend considerable time in Stratford-upon-Avon during the final years of his life.

Baptismal records in Trinity Church, Stratford-upon-Avon, indicate that Shakespeare was baptized on April 26, 1564; working backward, scholars have fixed by common agreement the date of his birth as April 23 of that year. He was the eldest son of John Shakespeare and Mary Arden, respectable city business people who achieved some status in the little community along the Avon River in western England. John Shakespeare rose to become an

alderman and served for a time as bailiff, the highest office in the city. His son was undoubtedly educated in the grammar schools there. If the plays are any indication, William received a sound grounding in Christian ethics, rhetoric, and classical literature. He obviously understood Latin and possibly even some Greek, though Ben Jonson complained that Shakespeare's classical education was seriously wanting. Because he did not attend a university, he did not benefit from the kind of entrée into polite society that contemporaries such as Jonson and later John Milton would have experienced. By the time Shakespeare began writing plays, he was conversant with ancient and modern historians and with philosophers such as Michel de Montaigne. His clear use of writers, such as Giovanni Boccaccio and Geoffrey Chaucer, supports the claim that he was also quite familiar with literary works of the Continent and his native England.

In 1582, Shakespeare married Anne Hathaway, a woman eight years older than he. The couple eventually had three children: a daughter, Susanna, and twins, a boy the Shakespeares called Hamnet and a girl, Judith. No doubt at some time during the decade of the 1580's the aspiring playwright left his family in their Stratford-upon-Avon surroundings to make his fortune in London. There is no evidence that during his time away from his hometown Shakespeare was ever estranged from his wife and children. On the contrary, available evidence suggests he took great pains to maintain his domestic ties during the decades that he spent working in London.

By 1592, Shakespeare had become sufficiently well known in literary circles to be the object of a now-famous attack by the English poet and playwright Robert Greene, who complained that the young upstart was being presumptuous in trying to compete with more distinguished members of the literary establishment. Contemporary records refer to Shakespeare's *Henry VI, Parts I, II, and III* (pr. c. 1590-1592, pb. 1594-1595) as early as 1589, and from that date until 1613 his comedies, histories, and tragedies were performed in open-air theaters and later in the private venues frequented by nobility and well-to-do citizens. During the 1590's, Shakespeare also tried his hand at nondramatic poetry, publishing *Venus and Adonis* (1593) and *The Rape of Lucrece* (1594). He also began writing sonnets, a fashionable practice in the 1590's, eventually completing a sequence of 154 poems which were published in 1609.

Sometime around 1595 Shakespeare became a shareholder in the Lord Chamberlain's Company, an acting troupe. In addition to his work as a playwright, he also performed on stage, appearing in his own works and in those by others, including dramas by rival playwright Jonson. Shortly after the ascension of James I to the English throne in 1603, he joined the King's Men, a troupe that enjoyed the special patronage of the sovereign. During these years of intense business activity in London, he maintained close ties to Stratford-upon-Avon, purchasing property and occasionally finding himself the plaintiff or defendant in various lawsuits there. Meanwhile, every year saw the introduction of one or more new Shakespeare plays into the London "season." In 1608, he had become sufficiently well off to enter into a contract with half a dozen other theatrical entrepreneurs to purchase the second Blackfriar's Theater in London. By 1610, it appears he had tired of London life. Evidence indicates that in that year he returned to Stratford-upon-Avon, where he enjoyed a life of active retirement. He continued to work on various dramatic productions, collaborating with younger playwrights on a number of scripts. He died at his home in Stratford-upon-Avon on April 23, 1616, and was buried there two days later.

## ANALYSIS

The high opinion in which Shakespeare has been held since the middle of the eighteenth cen-

tury has often led to hyperbole in discussion of his literary merits. In *The Riverside Shakespeare* (1974), Harry Levin has observed that Shakespeare's works have been "accorded a place in our culture above and beyond topmost place in our literature. They have been virtually canonized as humanistic scriptures, the tested residue of pragmatic wisdom, a general collection of quotable texts and usable examples" for guiding human actions. The dramatist's works rank beside the Bible as the documents most referred to when explaining and illustrating the variegated qualities of human nature.

Any analysis of the general qualities of Shakespeare's plays must focus initially on the writer's ability to create characters. More than any other author in English, Shakespeare has been able to bring to life individuals who have the mark of reality about them. Throughout the dramas, Shakespeare tries to avoid the use of type characters, working instead to individualize his creations through patterns of speech and thought. In an age when society believed people were governed by "humors" and the dominant characteristics one exhibited were a consequence of these physical states, Shakespeare was somewhat unusual. His great contemporary, Ben Jonson, prided himself on his ability to capture the essence of types in his dramas. Shakespeare, on the other hand, strives always to achieve distinction among his kings, fools, lovers, and villains.

Like most of his contemporaries, Shakespeare makes extensive use of both literary and historical sources for his dramas. Almost nothing in the Shakespeare canon is wholly original. Some of the earliest works are highly derivative; *The Comedy of Errors* (pr. c. 1592-1594, pb. 1623), for example, is taken from a Roman comedy. As he matured in his art, Shakespeare was able to transform materials from diverse sources, such as Plutarch's *Bioi paralleloi* (c. 105-115 C.E.; *Parallel Lives*, 1579) and Raphael Holinshed's *Chronicles* (1577) into original works of dramatic art. His Julius Caesar and Brutus, his Richard II and Prince Hal, are modeled on the figures Shakespeare discovered in the histories he read. He was not at all averse, however, to changing his characters' motivations or even making them younger or older than they actually were if the dramatic interest of his plays was better served.

As important to him as the historical records

on which he drew were the writings of both ancient and contemporary philosophers, whose ideas Shakespeare incorporates into his dramas. His writings are filled with allusions to various ancient authors, as well as to works by his contemporaries. He seems to have been especially influenced by the new movement in Humanism, exemplified best by the works of the French essayist Michel de Montaigne. Many of Shakespeare's plays exhibit an appreciation for the Aristotelean concept that virtuous action is a kind of golden mean between two extremes; for example, heroism lies between cowardice and foolhardiness.

Among Shakespeare's most notable contributions to literature was his innovative use of language. Like many of his contemporaries, he wrote much of his work in blank verse, the unrhymed iambic pentameter lines first used in English by Chaucer almost two hundred years earlier. He freely invented words and phrases that have since passed into the English language; to him is attributed the first use of words such as "lonely," "laughable," and even "critic." Additionally, his ability to turn out particularly apt and pithy phrases has resulted in the elevation of many of his coinages into aphorisms. "The devil can quote scripture" and "All that glitters is not gold," both adapted from *The Merchant of Venice* (pr. c. 1596-1597, pb. 1600), are but two examples. Many of the speeches he created for his characters have been taken out of context and recited as philosophical or patriotic dicta: Jacques's discourse on the seven ages of man in *As You Like It* (c. pr. 1599-1600, pb. 1623), or John of Gaunt's poetic survey of his homeland, "This royal throne of kings. . . This blessed plot . . . this England," in *Richard II* (pr. c. 1595-1596, pb. 1600), are examples of many that could be cited.

Because the Elizabethan stage was usually a bare platform with little scenery and few props, Shakespeare often uses language to paint the scene for his audience. Direct references spoken by the characters make it clear to the audience, in the theater or at home with their texts, where a scene is taking place: "This castle hath a pleasant seat," King Duncan says upon arriving at Macbeth's home, notifying the audience that the scene has shifted; the young exiles in *As You Like It* are told that "This is the forest of Arden," so that the audience, too, will know where the action is now occurring.

More than any other dramatist, Shakespeare

makes extensive use of metaphor to drive home a point. What some have dismissed as excessively "flowery" language is actually the dramatist's way of creating vivid pictures in the imagination of playgoers and readers. Hence, when Richard II returns from the wars in Ireland, he acknowledges his joy by comparing himself to "a long-parted mother with her child" who, upon reunion, "plays fondly with her tears and smiles in meeting." In the same play, when the soon-to-be-deposed king realizes how little support he has, he complains to his henchmen that it is now time to "Make dust our paper, and with rainy eyes/ Write sorrow on the bosom of the earth." Among Shakespeare's favorite metaphors is that of the garden, to which he compares both individuals and the state. In *Othello, the Moor of Venice* (pr. 1604, pb. 1622), the villain Iago dismisses the excuses made by Othello's rival, Roderigo, for failing to win Desdemona by reminding him that "our bodies are our gardens, to the which our wills are gardeners." In both *Richard II* and again in *Henry IV, Part I* (pr. c. 1597-1598, pb. 1598), the state of England is compared to a garden, which is in disarray because of the civil strife brought on by the king's profligacy and his usurper's inability to unite the rebels after Richard is deposed. Through the use of such language, Shakespeare makes his audience aware of the state of both individual and political affairs, drawing them into the action and allowing them to see the consequences of human acts.

## HENRY IV, PARTS I AND II

**First produced:** *Part I*, c. 1597-1598 (first published, 1598); *Part II*, 1598 (first published, 1600)

**Type of work:** Play

*An errant young prince learns how to rule his people before ascending the throne as England's greatest monarch.*

It is no surprise that, near the beginning of the seventeenth century, Shakespeare and others in England were much concerned about the problems of royal succession. The aging Queen Elizabeth I had no direct heirs. Some feared a bloody

war among potential claimants to the throne. As a means of illustrating what might happen should usurpation occur, the playwright drafted four plays centered on the deposition of an earlier monarch, Richard II, and the eventual rise to power of one of England's greatest monarchs, Henry V.

The two parts of *Henry IV* dramatize the rebellion that plagued the reign of Henry IV, who had replaced his weak cousin, Richard II, as England's ruler. At the play's opening, the king's forces are assembled to battle those of the rebels, led by Henry Percy, called Hotspur. While political machinations go on at court, Henry IV's eldest son, Prince Hal, spends his time consorting with a group of dissolute brigands headed by the fat, life-loving Sir John Falstaff. Not until battle is imminent does Hal join his father; yet on the field at Shrewsbury he acquits himself well, felling Hotspur and leading the king's forces to victory.

In the second play, which continues the story after the Battle of Shrewsbury, Hal seems to slip back into his old habits. Falstaff appears to be leading the prince into a life of crime, and the Lord Chief Justice enters the fray to arrest the criminals Hal calls friends. At the end of the second play, however, when Henry IV dies, Hal assumes the throne and immediately banishes his friends, including Falstaff, directing that they be tried and punished for their crimes.

One of the enduring critical questions about these plays is why the prince turns on his friend almost immediately after ascending the throne. The answer lies in a clear understanding of the dramatist's thematic interests. In both plays, Shakespeare is concerned with the issue of regal succession. Even more important, however, he is interested in displaying the development of Prince Hal as a monarch. The young prince deals throughout with two "fathers": his real father, Henry IV, whose whole life is consumed with politics, and Jack Falstaff, who recognizes no laws but those that satisfy his own interests. That Hal must eventually choose between the two is made apparent in a long scene early in *Part I*, when the prince and Falstaff engage in role-playing. Speaking in his father's voice, Hal tells his friends that, when the time comes, he will indeed banish Falstaff. Such is the way, he suggests, that kings must act. Even before this point, however, he acknowledges he is merely humoring himself by associating with Falstaff and his band of rob-

bers, learning from them how the commoners view their ruler. In his first soliloquy, he says, in reference to them, "I know you all, and will awhile uphold/ the unyok'd humor of your idleness." Hal may enjoy cavorting with Falstaff and his crew, but he recognizes he will one day be required to assume his rightful position as England's ruler.

Hal's progress throughout the two plays dramatizes the proper education for kingship. He is intent on mastering the qualities that mark a good monarch: majesty, grace, and courage. In *Part I*, Hotspur and Falstaff serve as foils for the prince; the former's rash behavior leads to the downfall of the rebels, while the latter's cowardice almost costs the king's forces a victory. Similarly, in *Part II* Falstaff stands in opposition to the Lord Chief Justice, as Hal is able to see how important adherence to the law is for a man who would rule well.

## AS YOU LIKE IT

**First produced:** c. 1599-1600 (first published, 1623)

**Type of work:** Play

*Four couples explore the nature of love and discover its importance to society while wandering in the forest of Arden.*

*As You Like It* is typical of Shakespeare's great comedies in many respects. The action of the play occurs in two locales, so that the values taken for granted at court may be presented for examination in the foreign setting of the forest. What might be described as the pattern of pastoral comedy is played out in this drama. The heroes and heroines of the play are forced to leave the city and retreat to the forest, where they learn the simple values of rustic life.

The dramatic action is precipitated by the usurpation of the country's throne by Duke Frederick, who deposes his elder brother, Duke Senior. When the play opens, Duke Senior has retreated to the forest of Arden. His daughter Rosalind has been allowed to remain at court, but her popularity makes Frederick jealous, so she too is banished. Frederick's daughter Celia, bound to Rosalind by strong ties of affection, accompanies her to Arden. They are pursued there by Orlando, also a victim of per-

secution; his older brother Oliver hates him simply because he also is popular. In the forest, Rosalind disguises herself as a man for safety's sake. Her disguise allows her to test Orlando's love and to offer sage advice to other pairs of lovers, notably the shepherd Silvius and his beloved Phebe; the fool, Touchstone, and the object of his desire, Audrey; and Celia and Oliver who, while visiting Arden in search of his brother, is converted miraculously from his hatred for Orlando when the latter saves him from an attack by a lioness.

In the forest of Arden, Rosalind and Orlando discover what mature love really is: not something simply earthy or entirely ethereal, but rather a total, healthy appreciation of the beloved that allows one to recognize faults but forgive them readily.

The other three pairs of lovers serve as counterpoints to Rosalind and Orlando, representing the various forms of incomplete love. Throughout the play, the lovers are reminded of the tenuous nature of their feelings by the melancholic Jacques, who sees that all human efforts eventually end in death. The fool Touchstone, whose name signifies his role as a judge of others' actions, also

serves to call the other characters "back to earth" in a way, pointing out the irrationality of so much of their behavior when they are spurred on by love.

At the end of the play, however, all four pairs of lovers are married, signifying what for Shakespeare is the proper culmination of sensible courtship. The triumph of love at the end of the drama suggests Jacques's cynical view of life and society can and must be overcome if people are to create a harmonious society. Even Duke Frederick is cured of his greed and reconciled with his brother when he pursues the fugitives into the forest. It is significant, too, that most of those who have come into this magic land of Arden agree to return to the city after the marriage ceremony. There, presumably, they will live more wisely and fully, having learned the power of love and its role in perpetuating what is best in society.

## HAMLET

**First produced:** c. 1600-1601 (first published, 1603)

**Type of work:** Play

*The prince of Denmark plots to avenge the death of his father but dies tragically in trying to overthrow his uncle.*

There is little debate that Shakespeare is the greatest Renaissance tragedian, and that *King Lear* (pr. c. 1605-1606, pb. 1608) and *Hamlet, Prince of Denmark* are the best examples of his work in that genre. Since its first production at the beginning of the seventeenth century, *Hamlet* has been the subject of intense critical inquiry, and the figure of Hamlet has been among the most intensely studied of any of Shakespeare's creations. Intellectual, self-reflective, alienated, and seemingly paralyzed by doubts about both himself and the circumstance in which he is called upon to act as an agent of revenge, Hamlet has come to be considered the quintessential modern hero.

For the subject of his drama, Shakespeare turned to a story already popular in English theaters; at least two earlier productions of the sad tale of the Danish prince had appeared in London playhouses. In many ways, *Hamlet* is typical of a subgenre immensely popular in Shakespeare's time: the revenge play. Most of these were bloody spectacles in which almost every character dies in the final act. The body-strewn stage in act 5 of *Hamlet* continues this tradition, as does the central action of the drama: the need for the young Hamlet to avenge the death of his father, the king, whose ghost informs Hamlet early in the play that he (the king) had been poisoned by Hamlet's Uncle Claudius so Claudius could become king and marry Hamlet's mother, the queen Gertrude.

The central dramatic interest in the play is the character of its hero. Hamlet sees himself as the "scourge and minister" of some higher order, returned from school in Germany to set right the disorder in his realm caused by his uncle's murderous action. Unfortunately, the sensitive prince is not callous enough to ignore the doubts he has about the exact cause of his father's death. He has been told by his father's ghost that Claudius committed

murder; other hints to that effect abound. The prince feels he must delay his revenge, however, until he is certain Claudius is guilty.

Compounding Hamlet's problem is the fact that his mother, whom he loves dearly, has married his uncle soon after the old king has died. It is not at all clear to Hamlet whether his mother has had a hand in the murder, whether she is simply unaware of Claudius's treachery, or whether she believes Claudius is innocent. Much is made of the mother-son relationship; Hamlet spends considerable time trying to convince his mother that she has made a mistake in marrying Claudius. Only when she finally comes to accept his view that the new king is somehow guilty does Hamlet decide to act. His decision is precipitated by several other actions as well, most notably the efforts of his supposed friends Rosencrantz and Guildenstern to have him killed.

Many critics have observed that Hamlet is really too sensitive to effect the revenge that he intends. He is by nature melancholic, possessing a fatalistic disposition that borders on the suicidal. His most famous soliloquy focuses on the virtue of

ending his life. "To be, or not to be," he begins his musings; that is, indeed, a central question for him, since he sees little benefit in continuing to live in a world where injustice reigns. Nevertheless, he decides to act to avenge his father's murder—once he is certain he knows who has been involved in the plot to kill him. Viewing the world as a place where

things are seldom as they seem, he spends a good portion of his time trying to sort appearance from reality. He invents various devices to help illuminate the truth, such as his elaborate arrangement for a dumb show that will re-create the murder of his father in the presence of Claudius to try to make the king reveal his guilt. Hamlet is not satisfied simply to take vengeance on his uncle clandestinely; he wants Claudius to admit his guilt.

For centuries, scholars have debated Hamlet's inability to act even when he has the opportunity to do so. Early in the play, his inactivity can be attributed to his lack of assurance that Claudius is guilty.

Were he to kill the new king without justification, he would be seen as no better than a murderer himself, and no good would come of his action. Nevertheless, when he does appear to have sufficient evidence of Claudius's role in his father's murder, the prince still seems paralyzed. In a crucial scene after Claudius has seen the dumb show and left the room visibly upset, Hamlet finds his uncle praying in the castle's chapel. It is a perfect chance to slay the king, but Hamlet refrains because he says he does not want to send his uncle's soul to heaven. Such casuistry has been reason for several critics to claim that Shakespeare is simply drawing out the drama until the final catastrophe. By the final act, Hamlet has become totally fatalistic. Having killed Polonius accidentally, he has already bloodied his hands; he accepts the challenge of Polonius's son, Laertes, with resignation, knowing that he will probably be killed himself. In the final scene, all of the principals meet their end—and almost all by some mischance of fate. Despite the resounding encomium pronounced over the body of the slain prince, the bleak ending offers little encouragement for an audience who has witnessed this great tragedy. Surprisingly, however, the ending seems justified, in that order has been restored to the Danish kingdom, although won at a terrible price. Such is the lesson of most great tragedies, and *Hamlet* ranks with the very best examples of the genre.

## THE TEMPEST

**First produced:** 1611 (first published, 1623)

**Type of work:** Play

*Under the guidance of a statesman turned magician, a group of castaways on a Mediterranean island learn what it means to be truly human.*

When Shakespeare came to write *The Tempest* in 1610, the recent establishment of English colonies in the New World spurred interest among the dramatist's contemporaries in the differences among peoples in the two hemispheres. That led to philosophical speculations about human nature itself: Are all people the same, no matter where they live? How much does one's environment affect one's be-

havior and, more importantly, one's outlook on life? These are the questions that underlie Shakespeare's last drama, a play that transcends the traditional definitions of tragedy or comedy to encompass elements of both.

The action in *The Tempest* is set on a remote island where Prospero, the rightful duke of Milan, has been living in exile with his daughter, Miranda. They are attended by airy spirits and by the subhuman creature Caliban. As the play opens, Prospero creates a storm that causes a shipwreck. The castaways from the ship include the young nobleman, Ferdinand, whose interest in Miranda becomes apparent from the moment he sees her. For her part, Miranda does not know how to respond to Ferdinand's attention. She has never seen a man other than her father, although Caliban, certainly a male, displays some lurid interest in her, and she is appropriately repulsed by him. While the young lovers are working out their relationship, Prospero's brother, Antonio, who had usurped Prospero's throne, arrives at the island in search of Ferdinand. Prospero takes this opportunity to set things right, convincing his brother to give up his claims to the throne. At the play's end, everyone is ready to return to Milan, fortified with what they have learned about virtue while on the island.

More than one critic has pointed out the highly metaphoric nature of this drama and the extensive use of lyrical language throughout. *The Tempest* may be Shakespeare's most poetic play. That is not surprising, since Prospero is the dramatist's most definitive portrait of the artist. Like the poet (the word comes from the Greek, meaning "maker") who creates from nothing an illusion of reality and a commentary on truth, Prospero sustains the world around him on the island largely through his own efforts, and others are dependent on him for their very lives.

Hence, a central theme of this play is the investigation of the nature of reality itself. Throughout, Shakespeare deals with problems of reality and illusion. His central character, Prospero, has the powers of a magician; he is able to cast spells, affect the elements, and influence action by invoking mystical powers. This master of illusion suggests on more than one occasion that what is real is not always what one perceives, and that life itself is merely an illusion, a fiction grounded in reality but transcending it. In fact, the implication is that what

is most valuable about human nature cannot always be explained in realistic terms. Equally important is Shakespeare's contrasting nature with art or artifice. Prospero's world is one that he has constructed (often, it is suggested, with the help of his magic) out of the natural world that he has found on the island. Through this contrast, Shakespeare is able to explore an issue that was becoming of significant concern to his contemporaries: Are individuals better in their natural state, or in the civilized society that they have created? If one assumes Caliban is the playwright's example of "natural man," it is clear on which side of the debate Shakespeare rests. Order, decorum, and artifice are held in high esteem by the admirable characters in this drama—and, by implication, they are the values in which Shakespeare himself believes.

## SONNETS

**First published:** 1609

**Type of work:** Lyric poetry

*In a series of 154 poems, Shakespeare tells the story of an older poet captivated by a younger man and simultaneously enthralled by a sensual woman.*

To appreciate Shakespeare's accomplishments in creating his sonnets, it is important to understand the history of the genre. Both the form of the individual sonnet and the idea of the sonnet sequence were developed in the fourteenth century by Petrarch, who wrote a series of poems celebrating a beautiful but unattainable woman he called Laura. Petrarch's formula became a model copied by poets throughout Europe during the next two hundred years. Generally the speaker in the poems is a man who explores his feelings for a particular woman and laments the fact that she will not reciprocate his feelings. These fourteen-line poems are divided into two major sections; usually a problem or argument is presented in the octet, and a resolution provided in the sextet. A tight rhyme scheme binds each section together, making the construction of a sonnet particularly challenging.

By the 1590's, a number of English poets had tried their hands at composing sonnets; among the more notable sequences were those of Sir Philip

Sidney and Edmund Spenser. It is not surprising, then, that Shakespeare took up the challenge of writing a sonnet sequence. Like his contemporaries, he initially circulated his poems in manuscript; the first publication in 1609 may have occurred without his consent. Unlike most other sonneteers, however, Shakespeare modifies the form of the Petrarchan sonnet, substituting for the octet-sextet pattern a format of three quatrains followed by a concluding couplet. Working with his new rhyme scheme, he takes greater liberties in constructing his arguments. Rather than posing a problem in the first eight lines and offering a resolution in the concluding six, he often uses the quatrains to develop a theme or examine a subject from three different perspectives before bringing his argument to a close in the couplet.

Even more importantly, he abandons the convention of having his speaker address his works to an unattainable lady. Instead, he creates a cast of characters whose story is told through the individual poems. His speaker is an older poet who has developed an affection for a younger man. That young man's attentions are also courted by a rival poet and by a sensual woman who is the older poet's mistress. The first 126 sonnets are addressed to the young man; in most of the remaining ones the older poet speaks to or about the woman. This complex dramatic situation allows Shakespeare to explore in his sequence of 154 poems three major themes: the nature of love, the vicissitudes of time, and the permanence of poetry.

While individual sonnets may be understood without reference to their place within the sequence, an appreciation for the tensions created by the overarching structure of the sequence gives added poignancy to particular poems. For example, Sonnet 18 opens with a question, asking "Shall I compare thee to a summer's day?" The poem is an extended comparison of the young man to a natural phenomenon. In some ways this sonnet is Petrarchan, in that the first two couplets work together to present an argument, while the final six lines offer an answer to the dilemma posed in the first eight lines. In the first and second quatrains the speaker points out some of the unpleasant aspects of a time of the year often thought of as decidedly pleasurable. The "rough winds" often shake the newly sprung flower buds. The season itself is short. The sun, that "eye of heaven"

thought to give gentle warmth and a golden hue to the day, is sometimes too hot, or its aura dimmed by the vagaries of climate. The stress is on the changeability of the natural world. By contrast, in the sextet the poet promises that the young man's "eternal summer"—his beauty and youth—will not fade, because the speaker has the power to make these qualities permanent through his verse. The speaker personifies the concept of death in order to continue his argument, stating "Nor shall death brag" that the young man "wander'st in his shade"—that is, that the young man has died. Of course, the youth may die physically, but he will live on in the "eternal lines" of this poem, since as long as "men can breathe, or eyes can see," this sonnet will keep the youth alive to readers.

The poet makes a similar argument in Sonnet 65, in which the ravages of time are compared to a number of tempestuous natural occurrences, asking in a series of four questions how can "beauty" compete against the inevitability of decay and change. The first two quatrains lay out a litany of destruction in which Time is personified as a ravaging, vengeful, and jealous enemy. "Sad mortality" is stronger than the strongest manmade objects ("brass") or natural phenomena ("boundless sea"). There seems no way simple beauty ("summer's honey breath") can withstand the ravages of nature, when "Time decays" even "rocks impregnable" and "gates of steel." In the third quatrain the poet asks how he might protect the young man from what seems to be his inevitable fate. Comparing him to a jewel, the poet wonders how he might lock away this treasure to keep Time from gathering him up. He ponders further how he might keep back the "swift foot" of Time from running off with the young man—that is, stealing away his beauty and eventually his life. Again, the solution presented in the couplet suggests that the "miracle" of immortality lies in the "black ink" of poetry. Because the poet has written about the young man, the youth will be forever present and forever young in the lines of the sonnet.

Just how far Shakespeare was willing to go in flaunting conventions of the sonnet sequence can be seen in Sonnet 130, in which the older poet describes the woman with whom he is in love. This is the same woman who is angling to seduce the young man who has captured the older poet's affections. Whereas the traditional lady addressed in

sonnets is blond, fair-skinned, and ethereal, the “mistress” spoken of in this poem is dark and earthy. Shakespeare uses a series of contrasts to emphasize her qualities, beginning by noting her eyes “are nothing like the sun”—not bright and dazzling. “Coral” is more red than her lips; her breasts are not white like snow, but “dun.” He calls her hairs “black wires,” and finds her cheeks lack the soft pallor of roses. In one of the more stunning comparisons, he says there is much more delight in perfumes than in his mistress’ breath, which “reeks.” Nevertheless, although her voice is raspy and unmusical, he loves to hear her speak. Unlike the women praised by other sonneteers who are supposedly akin to goddesses, his mistress “treads on the ground”—that is, she is a real woman whose attractions are likewise commonplace yet substantial. As a result, the poet says his beloved is as “rare” as any woman who has been compared—somewhat ridiculously, in his view—to heavenly objects. This anti-Petrarchan comparison not only gives a touch of humor to Shakespeare’s sequence but also suggests that his ideas of sexuality and human relationships are grounded in reality rather than clouded with some form of Platonic idealization.

Since their publication in 1609, Shakespeare’s sonnets have generated considerable interest from both critics and biographers. Many attempts have been made to determine the identities of the people whom Shakespeare immortalizes in his sonnet sequence. For centuries critics attempted to explain away the hints of homosexuality suggested by the older poet’s fascination with the young man;

more recently those tendencies have been addressed more dispassionately, or even celebrated. The technical mastery of individual poems has been the subject of thousands of commentaries, most noting Shakespeare’s exceptional ability to use metaphor both as a means of description and as a vehicle for offering insights into the perennial issues of human love, the nature of mutability, and the function of poetry.

## SUMMARY

William Shakespeare’s status as an artist is succinctly captured in the opening line of Matthew Arnold’s sonnet dedicated to the dramatist: “Others abide our question; thou alone art still.” Although eighteenth century writers, critics, and playgoers found his work too artificial, too complicated, and too much given to extravagant wit and wordplay, since the nineteenth century he has been accorded primacy of place among English writers of all genres. Even in the late twentieth and early twenty-first centuries, when new critical approaches to literature caused serious revision in the reputation of many other writers, Shakespeare remained universally revered as a writer of the first order, able to bring to life fictional creations in situations that teach the reader some of the eternal truths about human nature. To use another of Arnold’s phrases, Shakespeare continues to serve as a touchstone against which artistic excellence is measured.

## DISCUSSION TOPICS

- What does William Shakespeare consider the proper relationship between rulers and subjects in society?
- In his sonnet sequence, Shakespeare writes repeatedly about poets and poetry. What does he see as the role for poetry in society?
- What would Shakespeare consider to be the ideal relationship between parents and children?
- How does Shakespeare make use of history in creating the plots of his plays?
- What dramatic use does Shakespeare make of minor characters in his plays, especially characters from the lower classes?
- In portraying women, in what ways is Shakespeare bound by attitudes toward gender relationships common to his own age? Is there evidence that he represents a more modern view regarding such relationships?
- Many of Shakespeare's works deal with matters of romantic love. How does he use conventions from the medieval courtly love tradition, and in what ways does he present more progressive views of romantic relationships?
- How does Shakespeare make use of Renaissance conventions of dramatic tragedy? How does he modify these for specific thematic purposes in plays such as *Hamlet*, *Macbeth*, *Othello*, *King Lear*, or *Julius Caesar*?

## GEORGE BERNARD SHAW

**Born:** Dublin, Ireland

July 26, 1856

**Died:** Ayot St. Lawrence, Hertfordshire, England

November 2, 1950

*While he is widely considered the most important and innovative British dramatist of the twentieth century, Shaw was also an essayist and critic.*

### BIOGRAPHY

George Bernard Shaw was born in Dublin, Ireland, on July 26, 1856, the son of English Protestants. He left school at the age of fourteen and worked for five years in a land agent's office. At the age of twenty, Shaw left Ireland for London. Two years earlier, Shaw's mother had moved to London together with his two sisters, leaving her alcoholic husband and following her voice teacher. Her instructor arranged for the young Shaw to write several articles on music for a satirical weekly review, *The Hornet*. Shaw remained without any fulfilling employment or literary success during his first decade in London. After initially working as a clerk, he soon turned to literature, writing several novels between 1886 and 1905. None of these was successful. Most notable among them are *Cashel Byron's Profession* (1886) and *Love Among the Artists* (1900).

During this time societies for philosophical discussion were flourishing in London. Shaw joined the humanist and progressive Zetetical Society and the Dialectical Society, as well as literary societies. In order to overcome his shyness, he forced himself to speak at every meeting. After attending a lecture by the American Henry George in 1882 and, in 1884, reading Karl Marx's *Das Kapital* (1867, 1885, 1894; first translated as *Capital: A Critique of Political Economy*, 1886, 1907, 1909), Shaw turned to social-

ism, which was to remain a strong presence in his plays. For the next twelve years he spoke as a socialist propagator once or twice a week all over London. This experience taught Shaw to present his arguments in dialectic dramatic form and to enliven them with his humor.

Socialist politics dominated Shaw's career as a local government councillor in St. Pancras in North London from 1897 to 1903. Shaw's politics also led him to become one of the founders of the Fabian Society, for which he edited *Fabian Essays in Socialism* (1889) and wrote many well-known socialist tracts. The Fabian Society did not have a proletarian element but was a group of middle-class intellectuals who shared Marx's criticism of middle-class institutions. Its members believed in the gradual promotion of socialism rather than revolution. Shaw was never a conventional socialist: His political views were influenced by his admiration of vitality and power as well as by his belief in an active and individually willed kind of evolution, urged on by what he called the Life Force.

From 1886 to 1889, Shaw wrote unsigned art criticism for the *World*. He then worked until 1890 as music critic for the newly founded *Star* newspaper before becoming the *World's* music critic. Shaw admired Wolfgang Amadeus Mozart and Richard Wagner and introduced new standards for judging performers and composers, often mocking conventional taste and fashionable preferences. From 1895 to 1898, he wrote drama criticism for the *Saturday Review*. His reviews were deliberately provocative and challenged contemporary English ideas about plays and acting. During this period he also

wrote *The Quintessence of Ibsenism* (1891) and *The Perfect Wagnerite: A Commentary on "The Ring of the Nibelungs"* (1898), tributes to artist-philosophers whom he admired. In 1898 Shaw married the wealthy Charlotte Payne-Townshend and subsequently devoted himself almost exclusively to writing plays.

His music and drama criticism, as well as his socialist politics, were to shape his career as a playwright. Shaw used conventional dramatic structure and even conventional themes for highly unconventional purposes. From the beginning, Shaw hoped to shock his audiences into taking a new look at their society and its moral problems. His first play, *Widowers' Houses* (wr. 1885-1892, pr. 1892, pb. 1893), was begun in 1885 with his friend and fellow socialist William Archer. Shaw finished the play independently in 1892. *Widowers' Houses* deals with slumlords, revealing through techniques of inversion and reversal the social and economic conditions responsible for the problem. Shaw's next play, *Mrs. Warren's Profession* (wr. 1893, pb. 1898, pr. 1902), discusses prostitution, well-meaning brothel keepers, and the laws of supply and demand. Since his plays were short-lived on stage, Shaw published them at his own expense. In 1898, *Plays: Pleasant and Unpleasant* appeared with long, provocative prefaces addressing a variety of issues, including theatrical censorship. The collection included Shaw's first two plays, as well as *Arms and the Man* (pr. 1894), *The Man of Destiny* (pr. 1897), and *Candida: A Mystery* (pr. 1897), the first of a series of portraits of remarkable women. These early plays voice the need for a more creative and vital approach to life, a theme that is further developed in *Three Plays for Puritans* (pb. 1901), containing plays produced between 1897 and 1906. Those plays continue Shaw's attacks on petty bourgeois morality, advocating instead original virtue and defiance of accepted codes.

At the end of the beginning of the twentieth century, Shaw became famous first in continental Europe, then in the United States, and then also in England. He met the actor-director-playwright Harley Granville-Barker, who contributed to the success of his plays at the Court Theatre from 1904 to 1907. Shaw's belief in unconventional morality, and his admiration of vitality, dominate *Man and Superman* (pr. 1903, pb. 1905) and *Back to Methuselah* (pb. 1921, pr. 1922). Shaw's plays of the early

twentieth century include *John Bull's Other Island* (pr. 1904, pb. 1907), a play about Ireland's grievances against England, *Major Barbara* (pr. 1905, pb. 1907), and *The Doctor's Dilemma* (pr. 1906, pb. 1911), which deals with the moral problems of doctors and artists.

After he had been investigated by the Joint Select Committee on Stage Censorship in 1909, Shaw wrote a series of plays that attempt to separate pure religion and morality from muddy social standards. These include *The Shewing up of Blanco Posnet* (pr. 1909, pb. 1911), *Pygmalion* (pb. 1912, pr. 1913 in German, pr. 1914 in English), *Androcles and the Lion* (pr. 1912 in German, pr. 1913 in English, pb. 1916), *Heartbreak House* (wr. 1913-1919, pb. 1919, pr. 1920), and *Saint Joan* (pr. 1923, pb. 1924). Shaw's morality of complete individual responsibility, self-discipline, and heroic effort without reward is detectable in all of these plays.

In 1925, Shaw was awarded the Nobel Prize in Literature. He continued writing almost until his death at the age of ninety-four, but his later plays have received little attention. His late prose works, *The Intelligent Woman's Guide to Socialism and Capitalism* (1928) and *The Adventures of the Black Girl in Her Search for God* (1932), are better known than plays such as *The Apple Cart* (pr. 1929, pb. 1930), which discusses the problems of monarchy and democracy, *Too True to Be Good* (pr. 1932, pb. 1934), and *The Simpleton of the Unexpected Isles* (pr., pb. 1935). He died on November 2, 1950, in Ayot St. Lawrence, Hertfordshire, England. Although Shaw left no school and few avowed disciples, his influence continues to be felt.

## ANALYSIS

Shaw became a playwright who knew the conventional tricks of the theater but was determined to use drama as a means of shaking audiences out of their complacencies, hypocrisies, and thoughtless acquiescence to all kinds of social evil. In *The Quintessence of Ibsenism*, Shaw presented the Norwegian Henrik Ibsen as a realistic and reforming playwright who addressed problems of modern life and introduced genuine discussion in his dialogue, qualities that Shaw admired and emulated. Shaw was not drawn to Ibsen's more profound and symbolic plays but valued instead those that attacked middle-class conventionality and hypocrisy. In the wake of Ibsen, Shaw abandoned the Victorian idol-

ization of William Shakespeare and opened British theater to social criticism and political debate. He wanted to displace the artificialities of the Victorian stage (which he called “Sardoodledom” after the French playwright Victorien Sardou) with a theater of vital ideas about society and ethics.

Following what he considered to be the quintessence of Ibsen, Shaw saw his role as that of a prophet who must suggest to his society ways of developing into a better civilization. He once proclaimed, “I am by profession what is called an original thinker, my business being to question and test all the established creeds and codes.” Therefore he undertook a moral analysis of contemporary civilization. Like the Victorian novelist Charles Dickens, one of his influences, Shaw wanted to be a radical reformer as well as a synthesizer of all that was best in the thinking of his time. While he was joined in his critical and humorous look at contemporary society by fellow Irishman and dramatist Oscar Wilde, Shaw’s ultimate goal was reform, whereas Wilde’s was ridicule.

Although he did not reject all traditional norms and commonly accepted standards, Shaw questioned everything. Through dramatic action and intellectual debate in dialogue, his early plays often initially persuade the audience that the conventional hero is the villain and the conventional villain is the hero. Then Shaw usually swings everything around again so that the conventional hero can again become the hero. What now makes him a hero has been drastically redefined. Shaw follows this pattern in *Candida*, *Man and Superman*, *Major Barbara*, and *Arms and the Man*. He shows paradoxes that arise from the conventional views and hypocrisies of his audience. Having thus destroyed the audience’s self-confidence, Shaw then allows one of his very vital heroes to proclaim the Shavian vision of society or politics or religion.

This vision was shaped by Shaw’s socialism and his secular religion, which is based on a belief in humanity’s will to improve. Shaw adopted the view that willpower is the driving force of human existence from the German pessimistic philosopher Arthur Schopenhauer. Shaw called this energetic will the Life Force, which became the God of his secular religion. In Shaw’s life-preserving philosophy, the will to improve is collective. The desire for personal well-being is subordinated to the desire for the common good. Yet the will to live better lives

is imperative. In “The Revolutionist’s Handbook,” which is contained in *Man and Superman*, Shaw writes that the eighteenth century believed in a

deus ex machina, the god who helped those who could not help themselves, the god of the lazy and incapable. The nineteenth century decided that there is indeed no such god; and now Man must take in hand all the work that he used to shirk with an idle prayer.

Since humanity is responsible for its own destiny, it needs to rely on the Life Force to guide it toward an improved kind of existence.

Shaw has created a variety of characters that embody this Life Force or parts of it. In *Man and Superman*, which is concerned with the breeding of a superman as the ultimate goal of willed evolution, Don Juan is the spokesman for the Life Force in the play’s “Don Juan in Hell” sequence. He defends the ecstasy of philosophical thought and the joy of humanity’s creative evolutionary urge for a better world and for self-improvement against Everyman’s barren worldliness and the Devil’s view that humankind is destroying itself. Shaw admires Don Juan as a strong character who is driven by his own will instead of having anything forced on him and as someone who believes that humanity is improving and must be further improved.

The theme of creative evolution is further explored in *Back to Methuselah*. Shaw himself considered this play his masterpiece. Here the Life Force enables people to perfect their species to the point where they can live for three hundred years, long enough to acquire enough experience and wisdom to become disembodied intellects. Unlike the evolutionist Charles Darwin, who had argued that evolution is a process of adapting to one’s environment, Shaw believed that people are driven to change by their will to live better lives. In his preface to the play, Shaw wrote that:

God helps those who help themselves. This does not mean that if Man cannot find the remedy no remedy will be found. . . . What it means is that if Man is to be saved, Man must save himself. There seems no compelling reason why he should be saved. He is by no means an ideal creature.

Shaw considered it his task to make his spectators and readers more ideal creatures by compelling

them to question conventions and traditional belief systems. His plays achieve this education through intellectual discussions between the characters that are enriched by Shavian wit and comedy.

## CANDIDA

**First produced:** 1897 (first published, 1898)

**Type of work:** Play

*The socialist speaker, reverend Morell, comes to realize that it is his wife Candida who makes his success possible.*

*Candida: A Mystery* is included among “Plays: Pleasant” in George Bernard Shaw’s first collection of plays, *Plays: Pleasant and Unpleasant* (1898). Like each of the other “Plays: Pleasant” (*Arms and the Man*, *The Man of Destiny*, and *You Never Can Tell*), *Candida* presents a youthful figure whose informal moral reflections help other characters to understand their lives better. This youth is the nervous eighteen-year-old nobleman Eugene, who returns with Candida to her house and husband in London. Candida’s husband is the socialist reverend Morell, a famous speaker who also runs his household in an egalitarian fashion; since there is only one maid, Morell, his wife, and his secretary assume some of the household chores. Morell seems very much in control of his world until Eugene tells him that he (Eugene) is in love with Candida and that she is probably repulsed by Morell. Eugene’s revelation and reflections undermine Morell’s apparent security and control and show his fragility. An additional complication arises when Morell’s despised father-in-law, the unscrupulous businessman Burgess, comes to talk to Morell for the first time in three years. Burgess is appalled at Morell’s suggestion that they would get along fine if they agreed to be honest with each other. Morell should openly consider Burgess a scoundrel and Burgess should openly call Morell a fool.

Morell and Eugene ask Candida to choose between them. After expressing her indignation, Candida chooses the weaker of the two men, her husband. She reveals that while she does everything to make Morell believe that he is the master of the house, the responsibility for their family and

household rests in fact on her shoulders. She knows that Morell has always been spoiled by success and that she therefore has to act as his mother, his sister, his wife, and the mother of his children all at the same time. Morell’s security crumbles as he realizes how dependent his prominent position is on his protective wife. While at the beginning of the play his heroism seemed to be based on his own strength and skills, ultimately it rests on the recognition of his own weakness and on his acceptance of Candida’s hidden protective leadership.

Shaw referred to *Candida* as his version of Ibsen’s *Et dukkehjem* (pr., pb. 1879; *A Doll’s House*, 1880). Unlike Ibsen’s play, Shaw’s version presents the man and not the woman as the doll. Morell is the one controlled by Candida, not vice versa. Shaw considered this situation reflective of English society, which he saw as ultimately in the hands of women.

*Candida* is Shaw’s most naturalist play. Naturalist drama shies away from discussions of abstract ideas and seems to be concerned only with the scene and characters shown on the stage. Like Ibsen in his plays, Shaw had to find covert means in *Candida* to comment on the dramatic situation and characters and to show the wider social implications of this situation. Although *Candida* seems as simple and straightforward as its heroine, the play is Shaw’s most elaborately written and enigmatic early dramatic work. When it was published in 1898, Shaw subtitled it *A Mystery*, whereas he had called it “A Domestic Play” in the original manuscript.

## MAJOR BARBARA

**First produced:** 1905 (first published, 1907)

**Type of work:** Play

*An arms producer convinces his family that his business is necessary rather than immoral and that it helps eradicate poverty, the worst of evils.*

*Major Barbara* is a literary use of myths and their cultural references. Its conception was facilitated by the two-volume 1890 publication of Sir James George Frazer’s *The Golden Bough* and its treatment of the Christian Gospel story as only one myth

among others. Shaw based *Major Barbara* on several Christian legends; the myth of Barbara, the patron saint of gunners and miners, is linked with a version of Christ's mission, betrayal, passion, and ascension. These Christian elements are combined with the myth of Faust, who sells his soul to the Devil in exchange for knowledge and power. The combination and alteration of these myths as well as numerous discussions on ethics and religion make *Major Barbara* one of Shaw's most ambiguous plays, one that continues to provoke rival interpretations.

In a kind of drawing-room comedy, the play's first act introduces the Undershaft family: the bourgeois Lady Britomart, a caricature of the grande dame; her husband, the weapons producer Andrew Undershaft, from whom she has been separated for decades; their daughters Barbara and Sarah and their fiancés; and the slow-minded, pampered son Stephen. Lady Britomart invites her husband to her house in order to ask him for more money to support their children and to make him reconsider his decision that in keeping with tradition his weapons enterprise can be inherited only by a foundling. Their daughter Barbara, a Salvation Army major, invites Undershaft to see her shelter. He agrees to do so if she will visit his weapons factory.

The play's second act is set in Barbara's Salvation Army shelter, a Dickensian illustration of poverty. While looking for his girlfriend, the strong, unruly Bill Walker slaps two women. He feels remorse for his deed and offers one pound to be forgiven, but Major Barbara does not accept his money. She wants to convert his soul instead. As she is about to convert him to the Salvation Army and to Christian behavior, her superior accepts five thousand pounds each from a whiskey distiller and from Undershaft. These donors embody alcoholism and violence, evils that Barbara has been fighting. She resigns over this undermining of principles. Simultaneously, a man who had apparently

been converted to the Salvation Army only hours earlier steals Bill's pound. Barbara loses her grip on Bill's soul and must realize that she has failed in her work as a missionary.

Shaw stressed in his preface that in Andrew Undershaft he has created a man who understands that "the worst of our crimes is poverty" and that humanity's foremost endeavor must be to avoid poverty. Upon seeing the poor in his daughter's soup kitchen, Undershaft says that,

Poverty blights whole cities; spreads horrible pestilences; strikes dead the very souls of all who come within sight, sound or smell of it. . . . [The millions of poor people] poison us morally and physically: they kill the happiness of society: they force us to do away with our own liberties and to organize unnatural cruelties for fear they should rise against us and drag us down into their abyss.

Therefore the eradication of poverty is Undershaft's main goal. He can achieve it in his own factory town, in which the play's third act is set, through the production of weapons, which he sells indiscriminately to anyone who can pay for them. While Barbara is preserving her moral ideals but failing in her battle against poverty, Undershaft is presented as disregarding traditional morality but succeeding in using the profits of an objectionable business for providing for all the needs of his workers. Although Undershaft announces that his philosophy is based on "money and gunpowder," describing himself as "a profiteer in mutilation and murder," he is doing more good for his workers than Barbara is for the poor in the Salvation Army shelter.

The happiness of its inhabitants, and its deadly purpose, make Undershaft's factory town an ambivalent place between heaven and hell. When the inheritance is discussed again, Barbara's fiancé Adolphus Cusins, an unemployed professor of Greek, turns out to be a foundling. Cusins accepts the inheritance of the tempter/devil Undershaft even though he is still planning to "make war on war." Barbara realizes that the factory town will be a better place than the Salvation Army to save souls because there nobody will convert out of a need for charity or food.

## PYGMALION

**First produced:** 1913, in German; 1914, in English (first published, 1912)

**Type of work:** Play

*A phonetics professor teaches a flower girl to talk like a duchess but fails to treat her like one.*

Like *The Doctor's Dilemma* (pr. 1906, pb. 1911), *Pygmalion* is a problem play that examines a social issue. Shaw deals here with the assumptions of social superiority and inferiority that underlie the class system. He demonstrates how speech and etiquette preserve class distinctions. As he wrote in the play's preface, "It is impossible for an Englishman to open his mouth without making some other Englishman hate or despise him." *Pygmalion* therefore tries to illustrate the arbitrariness of basing a person's worth on his or her pronunciation.

The phonetics professor Henry Higgins is an expert in dialects and accents. At Covent Garden he phonetically transcribes all that the innocent flower girl Eliza Doolittle says. Since he boasted of his successes in educating social climbers in speech, Eliza comes to Higgins's house the next day, asking to be taught to speak like a lady so that she might be employed in a classy flower store. A fellow phonetics professor, Colonel Pickering, offers to cover the expenses of the experiment if Higgins can pass Eliza off as a duchess at a garden party six months later. Sure of his abilities, the tyrannical and condescending Higgins is enticed by the Frankensteinian challenge "to take a human being and change her into a quite different human being by creating a new speech for her."

While Higgins is successful in transforming Eliza in terms of speech, his rough manners, rudeness, and swearing do not teach her the accompanying social etiquette. Eliza betrays her lack of refinement at a parlor party not through her pro-

nunciation but through what she says. The comic climax is reached when she uses the vulgar expression "Not bloody likely," although she pronounces it in a ladylike manner.

Higgins and Pickering seem unaware that their experiment has transformed Eliza not only in terms of her speech. Even after she has successfully passed for a lady at a garden party, Higgins still does not treat her like a lady. Higgins's excuse is that while Pickering may treat a flower girl like a duchess, he would also treat a duchess like a flower girl, since he believes in treating everyone equally, regardless of his or her social class. Feeling disappointed and humiliated, Eliza leaves Higgins by night, no longer willing to be treated like a servant. She believes that she has risen to a higher social class and claims that social class is not determined by one's pronunciation but by the respect with which one is treated.

In the meantime, money has been left to Eliza's father by a rich American. This unexpected wealth has transformed him from an alcoholic dustman into a middle-class man in terms of behavior and ideology, although not in terms of pronunciation. Since it is based on money and not on accent, his character transformation seems more secure than his daughter's, although both seem ambivalent about their new status.

Although the play leaves Eliza and Higgins's future open, Shaw wrote in his afterword that she will marry the petit bourgeois Freddy and open a flower and vegetable shop with him instead of continuing to endure Higgins's unrefinement and rudeness. She has been struggling throughout the play to liberate herself from the professor's tyranny.

In *Pygmalion*, Shaw links the Cinderella story of a transformation from rags to riches with a Frankensteinian creation of a new life. Underneath the play's comedy, questions are raised about the justifiability of social distinction and the role of women in a patriarchal society. Although Shaw felt ambivalent about the feminist movement of the early twentieth century, he presents Eliza as suffering degradation and escaping from it with the help of Pickering's civility, Mrs. Higgins's understanding, and her own awakened self-reliance. *Pygmalion* was later made into the popular musical comedy *My Fair Lady* (1956).

## SAINT JOAN

**First produced:** 1923 (first published, 1924)

**Type of work:** Play

*The country girl Joan assumes command of the French army in the fight against the English; after leading France to victory, she is burned as a heretic.*

In the protagonist of *Saint Joan*, Shaw has created his most lasting embodiment of the Life Force, a figure who is superior in character and vision and who tries to elevate ordinary people to her level by becoming their leader. Shaw's Saint Joan is funny and self-confident; she is guided by practicality and common sense but does not fit the traditional image of a religious martyr. Although *Saint Joan* is filled with comic moments, it is considered Shaw's only tragedy. Yet it has also been called a comedy containing one tragic scene.

Joan's legend had been revived in France during World War I; an ambitious Hollywood film, *Joan, the Woman*, had been released in 1917; and in 1920 Joan was canonized. The ensuing interest in Joan of Arc also seized Shaw and especially his wife. In Joan's assertion of her will against institutional restraints Shaw recognized so many of his convictions that, as the famous drama critic-historian Eric Bentley has written, Shaw would have had to invent Joan had she never existed. In the play's preface, Shaw praises "the vigor and scope of her mind and character, and the intensity of her vital energy."

Although she is a warrior, Joan is also a preserver of life. As she appears on the scene, the hens start laying eggs again. In her enthusiasm she appeals to the French soldiers because "she's so positive." Joan's affirmation of life and the indestructibility of her vital energy are felt throughout the play. Even when Joan is burned as a witch, the executioner admits that

Her heart would not burn; and it would not drown. I was a master at my craft . . . but I could not kill The Maid. She is up and alive everywhere.

Guided by voices, the eighteen-year-old country girl Joan is set on liberating France from the English, who are occupying half of the country in

1429. Through perseverance and persuasiveness she manages to be appointed commander of the French army by the Dauphin Charles. Joan leads the soldiers to victory by giving them back their courage. In something of a miracle, Orleans becomes the first city to be freed from English occupation.

When the English are losing battle after battle, the Earl of Warwick and his chaplain persuade Cauchon, the bishop of Beauvais, that Joan must be a witch because she could not have been so successful otherwise. He calls her death a "political necessity." While Cauchon is not convinced that Joan's military victories make her a heretic, he is angered by what he perceives to be Joan's pride and her disregard for the Church. He blames her for asserting that she is guided by God and not by the Church and for crowning Charles herself in the cathedral of Rheims. What her accusers also cannot accept is Joan's unwomanly behavior and attire. She dresses as a soldier and protests, "I will never take a husband. . . . I am a soldier: I do not want to be thought of as a woman."

Joan falls victim to the Church's intolerance of nonconformists and to the revenge of the English. In the figures of Warwick and his chaplain, Shaw criticizes English nationalism and patriotism. At her trial Joan is unwilling to put her obedience to the Church above her obedience to God. She refuses to comply with the Church's demand that she denounce her voices as those of the devil. Although Joan is pronounced guilty, the Inquisitor, in private, calls her "innocent." Nonetheless she is burned as a witch.

In the play's epilogue Joan appears to King Charles in a dream twenty-five years after her execution. Her guilty verdict has been annulled. She is joined in Charles's dream by those responsible for her death and is universally hailed. Finally, a papal messenger of the year 1920 announces that Joan has just been made a saint. As she offers to come back into the world, however, all shy away. Joan must realize that she is ahead of her time. Her famous last words are: "O God that madest this beautiful earth, when will it be ready to receive Thy saints? How long, O Lord, how long?" Shaw believed that the ordinary world was not yet sufficiently prepared for the superior being he envisioned. His epilogue makes *Saint Joan* less a historical play than a passion play, reminiscent of

Christ's Passion. It connects the past to Shaw's present, illustrating that little has changed. *Saint Joan* remains Shaw's most popular play, although he himself did not rate it that highly.

### SUMMARY

In his nearly forty plays and numerous other writings, George Bernard Shaw's primary goal was not the entertainment but the education of his audience. His socialist vision created fictional worlds designed either to present a more ideal form of human existence or to criticize what he considered to be the flaws of his society. While his plays typically present a character who embodies the vitality that he considered essential for reform and the creation of a better world, he saw his contemporaries still far from achieving the kind of enlightened and egalitarian society he envisioned.

Josef Raab

### DISCUSSION TOPICS

- What did George Bernard Shaw's early music and drama criticism contribute to his own dramatic development?
- What did Shaw learn from Henrik Ibsen?
- Did Shaw have an excessive optimism about human nature?
- Explain how Shaw's Life Force animates his play *Major Barbara*.
- What view of religious duty does Shaw communicate in *Saint Joan*?
- Does the musical *My Fair Lady* do justice to *Pygmalion*, the play on which it was based?

## MARY WOLLSTONECRAFT SHELLEY

**Born:** London, England  
August 30, 1797

**Died:** London, England  
February 1, 1851

*Shelley's reputation rests on her technically flawed, thematically rich masterpiece of imagination, *Frankenstein*.*

### BIOGRAPHY

Mary Wollstonecraft Godwin was born in London, England, on August 30, 1797. Both of her parents were celebrated political radicals. Mary Wollstonecraft, her mother, authored *A Vindication of the Rights of Woman, with Strictures on Political and Moral Subjects* (1792) and was an early advocate of sexual equality. William Godwin, her father, was a utopian-anarchist best known for his *An Enquiry Concerning Political Justice and Its Influence on General Virtue and Happiness* (1793). Despite their free-thinking ways, Wollstonecraft and Godwin were wed five months prior to their daughter's birth. Mary's birth was difficult. Her mother became ill and died ten days later.

Concerned with Mary's welfare, Godwin courted numerous women, intent upon finding for her a suitable mother. On December 21, 1801, Godwin married Mary Jane Clairmont. She had two children of her own, six-year-old Charles and four-year-old Jane (later called Claire). The marriage was flawed by money problems and lifelong friction between Mary and her stepmother. Mary came to idealize her natural mother, whose works she read avidly. Though not a literary person, the new Mrs. Godwin did possess business sense, encouraging Godwin to become a publisher. Godwin's vocation

and reputation as a man of letters granted Mary valuable exposure to such literary giants as William Wordsworth and Samuel Taylor Coleridge. Despite being deprived of the formal education that her natural mother would have wished for her, Mary thus became deeply acquainted with the literary and philosophical issues of her day.

Mary's intellectual development did not make her relationship with her stepmother any more cordial. Distance was required, and Mary did manage to get away from the household, most notably living in Dundee, Scotland, from 1812 to 1814, with the relatively conventional Baxter family. Mary's imagination soared in the ruggedly beautiful Scottish countryside, and life with the Baxters proved to be a revelation.

Visiting her father in November, 1812, Mary had met Percy Bysshe Shelley for the first time. An as yet unknown poet, Percy Shelley was drawn to William Godwin by the latter's radicalism. Indeed, Percy took some of Godwin's ideas more seriously than Godwin himself. Not unrelated to this was Percy's whirlwind courtship of Mary upon her permanent return from Scotland in May of 1814. Godwin was not pleased. Percy was already married, albeit unhappily, and, in Godwin's eyes, Mary was prohibitively young. The two lovers remained unswayed by Godwin's opinion and ran off on July 28.

The relationship was both deeply romantic and somewhat bizarre. The young couple went to Europe, ready to live on love, and sometimes having to do just that. Percy and Mary became true soul mates, sharing abundant enthusiasm for literature

and ideas. On the other hand, the two were not alone. Mary's half sister Claire (formerly Jane) accompanied them. Just why she did so is not clear, but the fact that the three were so often together ultimately raised scandalous rumors. In addition, Mary often was agitated by Claire's presence. She thought Claire wished to compete for Percy's attention.

Plagued by money woes, the trio returned to England in September, 1814. In February, 1815, Mary gave birth to a daughter, the first of her four offspring with Shelley. Unfortunately, the baby died two weeks later. The following January (1816) saw the successful birth of a son, William. That May, under pressure from creditors and again accompanied by Claire, Mary and Shelley returned to Europe, this time residing in Switzerland. At this point, they made the acquaintance of Lord Byron, already a celebrated poet. It was after an evening of reading ghost stories at Byron's mansion that Mary first conceived the plot of *Frankenstein: Or, The Modern Prometheus* (1818). In addition, Byron and Claire became lovers, though definitely not soul mates.

The Shelleys returned to England at the end of August. In December, Percy Shelley's wife, Harriet, apparently committed suicide, as did Mary's half sister Fanny, who was in love with Percy. At least partly in order to gain custody of his children by Harriet, Shelley married Mary on December 30, 1816. (The attempt to gain custody was, however, unsuccessful.) In 1817, Mary finished *Frankenstein*, gave birth to a daughter, Clara Everina, and published her *History of a Six Weeks' Tour Through a Part of France, Switzerland, Germany, and Holland* (1817), a journal of her European travels.

On March 11, 1818, *Frankenstein* was published and the Shelleys departed on a third European odyssey. In September, Clara died after a brief illness. William, who so far had lived the longest, contracted malaria and followed her to the grave the next June. This last death was an especially tough one for Mary. She continued to work during this period, however, researching her second novel, *Valperga: Or, The Life of Castruccio, Prince of Lucca* (1823), and beginning preliminary work on *Mathilda*, published posthumously in 1959.

On November 12, 1819, Mary gave birth to Percy Florence, the only one of her children who would live to adulthood. The Shelleys continued to

live in Italy, visited by a gallery of friends and literary figures. Sadness, however, once again overshadowed the Shelley household. In June, Mary suffered a miscarriage that might have been fatal if not for quick action by Percy. Then, in July, Percy and a friend died in a boating accident. Mary's magical liaison with the poet had ended.

Mary was now a widow. More than that, she was the great Shelley's widow, expected by some very different sorts of people to be faithful keeper of the flame. Returning to England, she did this rather skillfully. According to the wishes of her father-in-law, Timothy Shelley, upon whom she depended for income, she withheld publication of her biography of Shelley. She did, however, produce valuable annotated editions of Shelley's poetry and prose. She also continued to write prolifically on her own, supplementing her income and giving vent to her considerable creative and analytic energies. Over the last twenty-five years of her life, she published four novels—*The Last Man* (1826), *The Fortunes of Perkin Warbeck* (1830), *Lodore* (1835), and *Falkner* (1837)—and found time to produce a revised version of *Frankenstein* (1831). She also published a travelogue, *Rambles in Germany and Italy* (1844), numerous short pieces (mostly stories, but occasionally poems and incidental nonfiction), and was a busy contributor to the biographical volumes of *Lardner's Cabinet Encyclopedia*.

In addition to financial pressures, Mary's later life was plagued by blackmail attempts and a falling out with most of her friends. She was helped through these troubled times by her son Percy. As a man of ideas, Percy was a disappointment to Mary. She came to appreciate, however, his loyalty and quiet affection. When Percy married in 1848, his wife also became a faithful companion to Mary. Spurned by the pretentious literary and social world in which she had never quite felt comfortable, Mary was sustained by the warmth of family ties. She died, after a series of strokes, on February 1, 1851, at Chester Square, London, and was laid to rest in St. Peter's Churchyard, Bournemouth, England, between her illustrious parents.

## ANALYSIS

Mary Wollstonecraft Shelley produced a multitude of correspondence, novels, and other sundry works. Criticizing her work as a whole is difficult for a number of reasons. First, the range of her work—

from historical romance (*The Fortunes of Perkin Warbeck*) to horror (*Frankenstein*) and futuristic tragedy (*The Last Man*)—is extremely broad. No two of Shelley's novels are of precisely the same genre. Second, she does not fit neatly into the literary categories of her time. Though *Frankenstein* is sometimes mistaken for a gothic novel, it eschews that genre's love of the supernatural and is uncharacteristically cerebral. Finally, literary analysis of her work as a whole is still at a relatively underdeveloped stage.

Despite these problems, several common threads emerge as basic to Shelley's work. The first of these has to do with style. For her time, Shelley was a highly economical and dispassionate writer. Her works are rarely overwhelmed with weighty details or convoluted language. On the other hand, she often sacrificed characterization and plot for the sake of narrative flow.

Thematically, Shelley's work is characterized by a strong autobiographical tendency, a consistent concern with the apparent and real nature of family life, and a sophisticated treatment of larger philosophical and social questions. The geographical settings of Shelley's novels reflected her own travels, and many of the characters in her later novels, especially, were said to be based on literary celebrities whom she had known. In *The Last Man*, for example, Shelley herself is represented by both Lionel Verney (the narrator and "last man" of the title) and his sister Perdita. The utopian Adrian would seem to be modeled after Percy Bysshe Shelley, while the egotistic Lord Raymond represents Lord Byron. Shelley's penchant for basing her fiction on real-life models is probably best illustrated by *Mathilda*. In this tale, a young woman resembling Shelley herself experiences an incestuous relationship with her father and is saved from her own guilty depression by a young man again resembling Percy Bysshe Shelley. That the novel was suppressed, partly by Shelley and partly by her father, is an indication not that such an incestuous relationship took place but that Shelley's readers were conditioned to see her work as autobiographical in a more literal way than she or her father wished.

As the topic of incest suggests, Shelley often treated the question of family ties in greater depth than was usual for her time. No doubt this reflected her own disappointments in this regard. Birth and death were inextricably linked for Shelley. Her own

birth had resulted in the death of her mother, and she had lost three of her own children in infancy. In addition, her husband had died while still a young man, and her father was distant, distracted at different points in his life by Shelley's stepmother and by persistent money problems. These concerns are reflected in a number of Shelley's novels—perhaps, in one way or another, in all of them. *Lodore*, for example, presents the story of a mother who sacrifices everything for her daughter, arriving at the conclusion that all of life's rewards are illusory except for the honest affection felt for a loved one. In *Falkner*, Shelley provides an apology for her husband's first marriage, attempting to absolve him of the blame for Harriet's suicide.

Shelley's concerns were not limited to real and ideal versions of hearth and home. She could apply her art to a much broader canvas—to the formation of the English monarchy in *The Fortunes of Perkin Warbeck* or to the future of the human race in *The Last Man*. Set in the twenty-first century, the latter novel presents an image of broad social progress. Yet all is not well in the world. Freedom has not quashed the seeds of conflict in human nature. The use of a new weapon lets loose a tragic plague, one that ultimately brings an end to the human race. Shelley describes a future in which humanity's moral progress lags sadly behind its technological capacity for destruction.

## FRANKENSTEIN

**First published:** 1818

**Type of work:** Novel

*A young scientist discovers the secret of animating dead tissue, with hideous consequences.*

*Frankenstein; Or, The Modern Prometheus* is the work for which Shelley is remembered by the general public. The story unfolds in a series of letters from Robert Walton, an enterprising arctic explorer, to his sister in England. Walton reports the sighting of a giant manlike creature driving a dogsled in the icy distance. This scene is followed by the rescue of a man whose sled had become stranded in the ice floe. This man is Victor Frankenstein.

As he recovers his health, Frankenstein relates

his story. He tells of his warm family life in Geneva and of his early enthusiasm for the speculative natural philosophy of alchemists such as Cornelius Agrippa. At the age of twenty-one, he leaves to study science at Ingolstadt. There, he learns the difference between modern science and mysticism. He embraces scientific method but holds onto one of the dreams of his former models—the creation of life. Ultimately, he completely embraces this goal, assembling a being of huge scale in order to simplify its construction. When his creature gains life, Frankenstein is instantly revolted. He exits the flat and wanders about, hoping that the spark of life in the creature will expire spontaneously. The following day, the creature has disappeared, and Victor is visited by his best friend, Henry Clerval, who, unaware of the creature's existence, helps Victor to regain his composure over the next several months. In early May, Victor's younger brother William is murdered outside Geneva. A servant is accused of the crime. Upon his return home, Victor catches a brief sight of the creature, whose existence has nearly slipped Victor's mind. He senses that the creature is responsible for his brother's murder, but he remains silent as the servant is convicted of the crime. After the trial, while vacationing in the Alps, Victor meets the creature on a glacier. There, he learns of the creature's cruel rejection by humankind, its self-education (the creature is easily the most articulate character in the book), and its subsequent revenge on its creator. Though the creature did indeed murder William, Victor is torn between hatred and sympathy. Reluctantly, he agrees to animate a female companion for the creature.

After months of indecision, Victor retires to the Orkney Islands (north of Scotland) to begin the work that he has promised. Midway through, in sight of the creature himself, he becomes fearful of the havoc that might be caused by a race of such fiends. He destroys the lifeless torso over which he stands. The creature vows to be with Victor on Victor's wedding night (he is engaged to a cousin) and departs. After murdering Victor's friend Clerval, a crime of which Victor is briefly accused, the creature disappears. Victor is wed in Geneva and awaits his confrontation with the creature. Instead, the creature slips into his bedroom, murders his bride, and escapes. Finally, Victor goes to the authorities. Finding no hope there, he pursues the creature

himself, winding up on Walton's ship. There, he dies from the exhaustion of the hunt. The novel closes with a visit to Walton's ship by the creature. The creature laments the death of his creator and departs, vowing to take his own life.

As is clear, Shelley's novel is not quite the grave-robbing horror story associated with the original Hollywood version starring Boris Karloff. Instead, the book exemplifies all the characteristics of Shelley's work noted previously. Stylistically, Shelley moves the narrative along at a rapid pace, avoiding weighty details or intricate plotting. The result is a book that is easily read and in which the geographic settings are striking, in part because they have so little with which to compete in the way of description. On the other hand, there is only one well-realized character, the creature himself, which, in this case, happens to be enough. In addition, *Frankenstein* is—to put it frankly—hopelessly contrived, with coincidence appearing as a law of nature. Indeed, one reason for the distortions of the film and dramatic versions of the story has been the need for a narrative that makes a little more sense than the novel does when held up to critical scrutiny.

the book's geographic settings come right out of the author's various travels. For another, the creature's reading list, including John Milton's *Paradise Lost* (1667, 1674) and Plutarch's *Bioi paralleloi* (c. 105-115 C.E.; *Parallel Lives*, 1579), closely mirror Shelley's own reading fare at the time that she wrote the novel. On a more profound level, the novel reflects Shelley's experience with the traumas of birth and rejection.

This discussion raises the issue of family. Victor Frankenstein turns his back on an idyllic family life in favor of an unsavory scientific quest. Yet the creature aches for the nurturing affection and guidance that can be provided by a loving family. Finally, the novel can be seen as a tale of what happens when women are omitted from the process of

procreation. The result is a creature who is unnatural and unloved. This last omission is the direct cause of the creature's hideous crimes.

Larger philosophical themes also abound in *Frankenstein*. One might begin with the reference to Prometheus in the subtitle and the references to *Paradise Lost* in the text. Prometheus is best known as the mythic figure who stole the secret of fire from the gods and gave it to humanity, an act for which he was severely punished. This association suggests that Victor is a victim of his own hubris in seeking the divine power of creation. Less well known is the myth in which Prometheus creates the human race, providing a clear parallel with Victor. Milton's work poetically examines the fall from grace in Eden according to the Old Testament. Frankenstein's creature expressly compares himself to Adam. In this case, paradise is not lost; it was never part of the bargain according to Victor's foggy conception of his task.

*Frankenstein* also suggests the dangers of amoral science or unrestrained rationality, the imperfection of civil justice, and the superficiality of human judgment. It is perhaps most basically a book about the concurrent limits and limitlessness of human nature and human knowledge. It encourages one to remember that the power to create may produce consequences that cannot be foreseen or controlled.

## SUMMARY

While Mary Wollstonecraft Shelley's *Frankenstein* myth has become a caricature in the public mind, her novel stands up well across the centuries. Moreover, Shelley's other works are emerging from obscurity. In the twenty-first century, Shelley's vision of the then-distant future in *The Last Man* should continue to gather new readers.

Ira Smolensky and Marjorie Smolensky

## BIBLIOGRAPHY

### By the Author

#### LONG FICTION:

*Frankenstein: Or, The Modern Prometheus*, 1818

*Mathilda*, wr. 1819, pb. 1959

*Valperga: Or, The Life of Castruccio, Prince of Lucca*, 1823

*The Last Man*, 1826

*The Fortunes of Perkin Warbeck*, 1830

*Lodore*, 1835

*Falkner*, 1837

#### SHORT FICTION:

*Mary Shelley: Collected Tales and Stories*, 1976

#### DRAMA:

*Midas*, pb. 1922

*Proserpine*, pb. 1922

#### NONFICTION:

*History of a Six Weeks' Tour Through a Part of France, Switzerland, Germany, and Holland*, 1817 (with Percy Bysshe Shelley)

*Lardner's Cabinet Cyclopaedia*, 1838 (numbers 63, 71, 96)

*Rambles in Germany and Italy*, 1844

*The Letters of Mary Shelley*, 1980 (2 volumes; Betty T. Bennett, editor)

## DISCUSSION TOPICS

- Does Mary Wollstonecraft Shelley's literary work reflect her mother's preoccupations?
- Why is Shelley's *Frankenstein* the only gothic romance that has found a considerable reading audience in recent decades?
- What makes *Frankenstein* different from typical gothic romances of the late eighteenth and nineteenth centuries?
- Has *Frankenstein*'s influence on modern horror writers been unfortunate?
- Does *Frankenstein* raise questions similar to issues now raised by stem cell research?

## PERCY BYSSHE SHELLEY

**Born:** Field Place, near Horsham, Sussex, England  
August 4, 1792

**Died:** At sea off Viareggio, Lucca (now in Italy)  
July 8, 1822

*Among the most prolific and versatile of all poets, Shelley wrote some of the most surpassingly beautiful lyrical and philosophical works of the English Romantic movement.*

### BIOGRAPHY

In a way, life was good to Percy Bysshe Shelley—and not so good. He was born on August 4, 1792, in Field Place, Sussex, England, the firstborn son of a wealthy Whig aristocrat, Timothy Shelley, whom he loathed, and Elizabeth Pilford. His life became a permanent rebellion against parental and every other kind of authority. His verse envisions a reformed world where people would eat no flesh and thereby grow healthier, gentler, and more loving; where women would be freed from wedlock; and where all would be liberated from the restraints imposed by authority. For this, he was shunned by polite society, excoriated by literary critics, and ignored by the public.

Shelley spent part of his education at Eton and at Oxford. He was expelled from Oxford for refusing to claim authorship of *The Necessity of Atheism* (1811), a pamphlet that he had printed and sent to professors and bishops to provoke debate. Reduced to living off pocket money donated by his sisters, he met and married Harriet Westbrook after her father threatened to send her away to school. She was a girl of sixteen. He took her first to Edinburgh, Scotland, and to York, where his best friend tried to seduce her, thence to Ireland and several towns in Wales, where Shelley was nearly assassinated for rescuing sheep from slaughter, and finally back to London, all in three years' time. Soon Shelley abandoned Harriet and their children to

run off with a girl of sixteen, Mary Wollstonecraft Godwin, daughter of reformer William Godwin and feminist Mary Wollstonecraft. Mary's half sister Claire Claremont joined them and became their constant companion. Upon their return from a second romp through Europe in 1816, two women in their circle committed suicide: Harriet and Mary's half sister Fanny, who was hopelessly in love with the poet. Free to marry, Shelley and Mary were wed. After a judge ordered him to relinquish custody of his children by Harriet, Shelley left England with Mary and Claire for Italy, fortified by a large income from his grandfather's inheritance.

Such were the external events of Shelley's youth, the rocky soil in which the seeds of his genius took root. First came a slim volume of poems called *Original Poetry by Victor and Cazire* (1810), written with his sister Elizabeth, and then the gaudy *Queen Mab: A Philosophical Poem* (1813; revised as *The Daemon of the World*, 1816), a diatribe against wealth, aristocracy, tyranny, and its tool, religion. Late in 1815, Shelley embarked upon a mythic quest for a perfect counterpart in love in *Alastor: Or, The Spirit of Solitude, and Other Poems* (1816), a motif that recurs in *The Revolt of Islam* (1818) and *Epipsychidion* (1821). The latter two works are veiled autobiographical allegories of his relations with several women, including the Contessina Emilia Viviani, daughter of the governor of Pisa, whose confinement to a nunnery until the governor could find a groom who demanded no dowry struck Shelley's pity for victims of parental abuse.

In 1816, the Shelleys took Claire to a tryst with the poet Lord Byron at his home near Lake

Geneva. Shelley commemorated his friendship with Byron in *Julian and Maddalo: A Conversation* (1824). The excursion had unexpected literary repercussions. While they were amusing themselves with ghost stories one evening, Byron's physician proposed a contest to see who could write the best horror story. He himself produced a tale of vampires. Byron and Shelley quit after a first try. Mary, however, produced the greatest horror novel ever, *Frankenstein: Or, The Modern Prometheus* (1818).

Under the influence of the ancient Greek poets and philosophers, Shelley was growing more idealistic, and his poetry undertook higher aims. In "Hymn to Intellectual Beauty" and *Mont Blanc* (1817), lyrics of a finer grace and timbre, Shelley discerned the ultimate object of his mature work, an "unseen Power" moving through Nature, an ideal form of truth available to the imagination in moments of awe and wonder. For reasons of health and a fear that custody of his children by Mary might be taken from him, Shelley went to Italy in 1818. There, he produced the works on which his reputation depends. In "Ode to the West Wind," he manages to harness his creativity to the "unseen Power" behind Nature. In *Prometheus Unbound: A Lyrical Drama in Four Acts* (1820), his most comprehensive myth of human renewal and change, he explores its remote, godlike character. That is followed by three quite diverse dramas: *Hellas: A Lyrical Drama* (pb. 1822), a glorification of liberty inspired by the Greek insurrection; *Oedipus Tyrannus: Or, Swellfoot the Tyrant* (pb. 1820), a mockery of King George IV, a work that was suppressed by the government after only a few copies were sold; and *The Cenci* (pb. 1819, pr. 1886), a dramatic poem based on an actual Italian case at law involving a count who raped his daughter and was killed in revenge. Some critics have called it the greatest verse drama in English since William Shakespeare's plays. Shelley penned a grotesque attack on the poet William Wordsworth titled *Peter Bell the Third* (1839). There were several political outbursts as well, most notably *The Mask of Anarchy* (1832), expressing outrage at the massacre of workers at Manchester. In a scant three days, Shelley wrote *The Witch of Atlas* (1824), a puzzling frolic on the power of poetry, somewhat akin to *Queen Mab*. The years in Italy were as versatile as they were prolific.

Yet frailty and disappointment were taking their

toll. Feelings of dejection and despair mounted with the recurrent lapses of health, the deaths of two children, Mary's depression, and the years of public scorn. As he mourns the death of the poet John Keats in *Adonais: An Elegy on the Death of John Keats* (1821), Shelley seems resigned to death as a victory over cruel life. His last, unfinished poem, *The Triumph of Life* (1824), depicts the gloomy spectacle of Life vanquishing virtually all great individuals and artists.

Death came to Shelley unexpectedly on July 8, 1822, off Viareggio, Lucca (now in Italy), by drowning. His boat was sunk during a storm, probably overrun by a larger vessel manned by men determined to steal money from Byron. Weeks later, his corpse was identified by the book of Keats's poems thrust into his pocket. Shelley's body was burned on the beach, his remains interred near Keats's at the Protestant Cemetery in Rome.

## ANALYSIS

Although he stands accused of sentimentality, wild impulse, and lyrical flights of fancy, Shelley was a deep thinker whose poetry asks and answers the fundamental questions in life: What is the hidden Power behind Nature? What is its moral purpose? Can humans connect with it and be saved from the hard knocks of experience? Rejecting orthodox beliefs, Shelley formulated his own myth to explain the mysteries of the universe.

Shelley's thinking matured with remarkable rapidity. In a poetic career of scarcely a dozen years, he passed from skeptical materialism to Platonic idealism and a resigned despair. Fascinated with scientific experimentation, Shelley early insisted that belief be based only on what is verified by sensory experience or on what can be logically deduced from it. This materialism led him to deny the claims of religion. His agnostic faith in the human imagination lasted a lifetime. In early writings, he agitated for liberal causes: free expression, vegetarianism, Catholic emancipation, and self-rule for Ireland. He adopted Godwin's Necessitarianism, a belief that reason will undo the tyranny of class and wealth, ushering in an age of perfection.

Soon after his liaison with Godwin's daughter began, however, Shelley formed an ideal concept of love that supplanted Necessitarianism. *Alastor* depicts the poet lured from self-absorbed solitude by a female soul very like his own. Yet the quest is

doomed because his soul cannot be embodied in another. In "Hymn to Intellectual Beauty" and *Mont Blanc*, he pursues an ideal Spirit of Beauty and an "unseen Power." The demon of materialism has been expunged, for Shelley has decided that beauty is in neither the beholder nor the object beheld but in the Platonic idea of beauty itself, separate from examples of beauty in nature, available only to the imagination.

In "Lines Written Among the Euganean Hills," the poet, viewing Venice below, contrasts the beauty of nature with the misery of humanity that science cannot comfort. In his mind, he imagines a union with the unseen Power, yet, lacking love, his heart goes unfulfilled. Shelley achieves that personal union with the unseen Power that moves through Nature in "Ode to the West Wind." As the destructive Autumn gales lift clouds, waves, and leaves before them, the poet prays to the wild Spirit to lift him, too. Being human, however, his connection with the Power is more intimate, for it stimulates his imagination to produce glorious thoughts.

Shelley's idealistic vision attained its fullest victory in *Prometheus Unbound*, a myth to explain how love releases the creative imagination from bondage in the self. Jupiter has punished Prometheus by nailing him to a rock. Cut off from his lover, Asia, his powers divided against themselves, he gains wisdom from suffering. Prometheus is renewed as his hatred for Jupiter dwindles to pity. Asia rejoins him, and awesome Demogorgon overthrows Jupiter to release humankind from the tyranny of heaven. Shelley's apocalypse is at hand: Humankind achieves love, wisdom, power, and goodness. Freedom allows human imagination to enjoy the fourfold excellence that eluded Shelley's poet-quester. With "The Cloud" and "To a Skylark," two sublime lyrics from the same period, Shelley again evokes the evanescent Spirit of Beauty and the unseen Power of Nature.

One more victory is granted the poetic imagination in *The Witch of Atlas*. Created by magic and perfect in beauty, the Witch symbolizes the power of poetry. She emerges from her cave to dispel the illusions of nymphs who think they can dwell amid Nature's beauties forever. She tells them that such beauties must fade, that even the ocean will dry up like a drop of dew. Then she departs in a magic boat with a robotic hermaphrodite that she has

fashioned. Together, they travel the world, overturning political and religious authorities as they fan the flames of human desire. So great is her power that she undoes the doom of death for the most beautiful people whom she finds. Encompassing both sexes in one, her companion finalizes the Alastrian quest, but something is missing: It is an artifact, incapable of loving interrelationship.

Shelley's vision was turning dark. The optimism of *Prometheus Unbound* is utterly reversed in *The Cenci*, with its gory incest, torture, sexual perversion, and murder. In *Epipsychidion*, the Alastrian quest is revisited. Yet the poet's high aspiration fails because physical and spiritual love cannot be one and the same. The poem ends with the poet cursing his own words as chains that keep him from scaling the heights of heavenly love. Its broken rhyme scheme suggests an inability of any poem to keep the promises that imagination makes.

*Adonais* mourns the death of Keats and also Shelley's own frustrations with human experience in life. The remote and often heartless Power behind Nature never fails to bring the plants back to life in the Spring. Yet it snuffs out a poet's creative spirit once and for all. This despair pervades Shelley's final effort, *The Triumph of Life*, a work dominated by the poetry of Dante in the Purgatorial tone of the whole fragment, down to the terza-rima form of its stanzas. As Dante was guided by Vergil in Dante's *La divina commedia* (c. 1320; *The Divine Comedy*, 1802), so Shelley is guided by the philosopher Jean-Jacques Rousseau, the self-deluded high priest of Natural Religion, now hideously deformed and blinded by the glare of the chariot. Among the sorry parade of Life's victims, they recognize the great artists and most powerful people in history, all of their hopes dashed. Shelley realized that human experience keeps the real and the ideal from uniting. People who strive to do good discover that the means of doing good may actually be far from good. Even a poet discovers that the poem cannot make a dull reader feel the warmth of imagination that the poet felt when first inspired to write it.

In the end, Shelley accepted the fact that compromise and delay would thwart his hopes for a radical reformation of society. He even resigned himself to accepting death as a blessed victory over the cruel injustices of life. Yet he always affirmed his

faith in the redeeming transformation of imaginative insight, which can reveal the permanent ideals of truth and beauty and love that make life joyful.

## “ODE TO THE WEST WIND”

**First published:** 1820 (collected in *Prometheus Unbound: A Lyrical Drama in Four Acts*, 1820)

**Type of work:** Poem

*The poet seeks to unite the powers of his imagination with the wild Spirit that flows through all of Nature.*

In “Ode to the West Wind,” Shelley defies the remote, impersonal character of the unseen Power behind Nature and strives to establish a personal relationship with it. The poem manages to reconcile the poet’s terrific emotional intensity with the elegant, even stately formal pattern of the regular Horatian ode. Using heroic meter (iambic pentameter) throughout, Shelley made each of the five stanzas into a sonnet with four terza-rima tercets and a closing couplet. The poetical effect is rather unlike that of the usual sonnet. Shelley’s interlocking rhymes sweep a reader along like gusts of wind, and the couplet pounds its message home with direct clarity and force.

The first three stanzas, addressed to the wild west wind, praise its irresistible power, marking its effects on all things in nature: clouds in the air, waves on the sea, leaves in the forest, even “the oozy woods which wear the sapless foliage of the ocean.” Poets usually address the mild, warm winds of Spring that bring nature to life, but Shelley confronts the cold, wild “breath of Autumn’s being,” which acts as both destroyer and preserver. The hidden Power behind Nature is not always friendly to humankind. The morality or immorality of its operations may not be discernible. Thus, the poet stands, appropriately, in awe of it. Each of the first three stanzas ends with a plea for the wind to take heed and hear the poet’s prayer.

The fourth stanza turns introspective. The poet wonders whether he might be used as the leaves have been, tossed about and left for dead by the indifferent force. He humbles himself, admitting that his powers have faded since boyhood, when

I would ne’er have striven  
As thus with thee in prayer in my sore need.  
Oh, lift me as a wave, a leaf, a cloud!  
I fall upon the thorns of life! I bleed!  
A heavy weight of hours has chained and bowed  
One too like thee: tameless, and swift, and proud.

Then in the final stanza the poet casts off the humility with the simile and claims a more intimate, metaphoric, mythic relationship with the wild Spirit. “Make me thy lyre,” he demands, first to accompany the Power and turn the wind into sweet music, and then boldly to become it, “Be thou me.” The poet has found that “soul out of my soul.” He yokes the great hidden Power to his own imagination to scatter among humankind the glowing spark of his verse “to quicken a new birth.” Thus, the Shelleyan poet becomes the prophet of an apocalyptic revolution to redeem humankind from torpid experience.

Then, suddenly, after such thunderous bursts of emotion, the poem ends as quietly as a sigh with perhaps the finest, most wistful and haunting line in all English poetry, a question: “If Winter comes, can Spring be far behind?”

## PROMETHEUS UNBOUND

**First published:** 1820

**Type of work:** Lyrical drama

*A modern myth is made to show how love unleashes creative powers that free humankind from tyranny.*

Shelley’s reputation is based on the 1820 volume of verse containing *Prometheus Unbound*, a lyrical drama on a cosmic scale that presents more fully than any other poem Shelley’s philosophy of life.

In ancient mythology, Prometheus was the smartest of the Titans. He separated humanity from the gods and gave it fire, symbolizing imaginative powers of thought. Jupiter punished him by nailing him to a rock in the Caucasus mountain range. Shelley begins his sequel to Aeschylus’s play *Prometheus desmôtēs* (date unknown; *Prometheus Bound*, 1777) with Prometheus still in that predicament after some time has elapsed. The Titan de-

scribes his ordeal and tells the hopeful Ione and the faithful Panthea that he has secret knowledge of the time when Jupiter will fall from power. Misery has made Prometheus wise. He has realized that hatred makes one like the object of hate, and thus his bondage is primarily internal, self-imposed, and even within his will to end. His hatred for Jupiter having cooled to mere pity, Prometheus wants to gather his sundered strength, reunite with his beloved Asia, and recall the curse that he had cast upon Jupiter. However, he cannot remember it and Nature is too fearful to utter it, so he summons the Phantasm of Jupiter to repeat it. Once divulged, the curse is repudiated by Prometheus, who declares, "I wish no living thing to suffer pain." Earth mistakenly thinks Jupiter's victory is now complete, and Mercury carries that message to Jupiter while Panthea goes in search of Asia. As the first act closes, Prometheus has been regenerated, but the creatures of earth are still slaves to the tyranny of heaven, still split apart by self-hate, blaming themselves for committing sins and abandoning ambitions.

In the five scenes of the second act, Asia learns of Prometheus's change of heart and sets out on a symbolic journey to rejoin him. She passes through the world of sensuous experience to the higher level of ideal Truth and Beauty. That is the realm of Demogorgon, an awesome deity not named in the classical pantheon but invented by Shelley. Gazing into his cave, Asia beholds the deep Truth and finds it imageless. Only the radiant reflection of her own beauty appears. Demogorgon is beyond the forms and shapes and images of things; utterly fundamental, he is sheer process, the inevitability of change. Asia's love has stirred him to action. When she asks him the fateful hour of Jupiter's fall, he responds, "Behold!" This work is no stage play. Shelley has collapsed the familiar dimensions of time and space into an ideal, eternal moment and place within the human mind.

Jupiter opens the third act by confidently declaring his omnipotence. However, his fate is about to be sealed, for it had been prophesied that his son would return to overthrow him at the destined hour, just as he himself had overthrown Saturn. Indeed, that fatal child is Demogorgon, now making his way toward Jupiter's throne in the Car of the Hour. He arrives and delivers his ultimatum, "Descend, and follow me down the abyss." Thus, Jupi-

ter is deposed and free will is restored to humankind. Hercules releases Prometheus to rejoin Asia. The rest of the drama surveys the regeneration of humanity and nature in the new Promethean age of perfection. Earth sings out the joys of Shelley's apocalypse, when Man as one harmonious soul sports gentle and free in the familiar world made newly beautiful by love. The last word belongs to Demogorgon, who professes Shelley's artistic credo:

To love, and bear; to hope, till Hope creates  
From its own wreck the thing it contemplates;  
Neither to change, nor falter, nor repent;  
This, like thy glory, Titan, is to be  
Good, great and joyous, beautiful and free;  
This is alone Life, Joy, Empire, and Victory.

## ADONAI: AN ELEGY ON THE DEATH OF JOHN KEATS

**First published:** 1821

**Type of work:** Poem

*The death of a great poet in youth is pondered by another great poet who soon followed him to an early grave.*

*Adonais*, Shelley's lamentation on the death of John Keats, has been called the greatest pastoral elegy in English. It belongs to a tradition some twenty-three centuries old stemming from laments by ancient Greek poets Bion and Moschus. Similarly, and like John Milton's "Lycidas," Shelley's elegy contemplates the larger tragic implications of the loss of a gifted poet, which subtracts from the world its most precious asset, genius.

The pastoral elegy is a highly conventional form. Typically, it includes reference to the deceased as a shepherd, the trappings of pagan mythology, the mourning of all nature, a procession of mourners, a contrast between revival in spring and the finality of

death, and a praise of immortality. Shelley adapted these elements from tradition but jettisoned the conventional mechanics in a final strophe, an inspired Platonic exaltation. Throughout, the poet employed the elegant Spenserian stanza: two cross-rhymed quatrains in heroic meter with a final Alexandrine, using but three rhymes, *ababbcbcc*.

Shelley and Keats had met but were not close friends. Learning of his illness, Shelley invited Keats to live with him in Italy, but the arrangements were never completed. Shelley wrote *Adonais* four months later.

Shelley blamed hostile literary critics for the poet's death and so enhanced a theme developed elsewhere in his own neglected verse, the mortifying effects on civilization of the common person's contempt for genius. He depicts the poet as a shepherd whose flocks are "quick Dreams . . . passion-wingèd Ministers of thought," but after his death and "after their sweet pain/ They ne'er will gather strength, or find a home again." Thus, the first part of the poem urges all to weep for Adonais, who is dead. (The name is a form of Adonis, the handsome young man loved by Venus and killed by a wild boar and lamented by Bion. It also recalls Adonai, the holy name of God used in place of the ineffable name Yahweh.) Indeed, all nature weeps, so profusely that a mourner can wash the corpse with starry dew. Spring, for grief, throws down her kindling buds, moving the poet to state the central tragedy of the situation: "Ah, woe is me! Winter is come and gone,/ But grief returns with the revolving year." The gross forms of nature die to be revived in Spring, but the unique creative power of a poet vanishes forever when he dies.

To the funeral come the mountain shepherds, Keats's poetical friends recognizable among them: Byron, the famous "Pilgrim of Eternity," Leigh Hunt, "gentlest of the wise," and Shelley himself,

one frail Form,  
A phantom among men; companionless  
As the last cloud of an expiring storm  
. . . . .  
A pardlike Spirit beautiful and swift—  
A Love in desolation masked;—a Power  
Girt round with weakness.

The critics also come, in the forms of snakes, wolves, beaten hounds, ravens, carrion kites, and

vultures. The poet bids "Hot Shame" to burn upon their brows.

Then, in the last seventeen stanzas, Shelley's whole tone shifts. He bids the reader not to mourn for Adonais, since Death is dead, not he, and Adonais has only awakened from the dream of life. Now made one with Nature, he has become a portion of the loveliness he once made more lovely. Adonais is transformed into a star, radiant and eternal. Shelley contrasts his eternal white radiance with the temporary distortion of life, symbolized by a dome of many-colored glass that stains the white light until Death tramples it to bits. The light of day may eclipse the twinkling stars, as ordinary life may dim the power of genius. Yet death conquers life and frees the eternal Spirit to find pure beauty and love in the abode of the Eternal. In Shelley's myth, a genius defeated by life wins from death a permanent afterlife.

## A DEFENCE OF POETRY

**First published:** 1840

**Type of work:** Essay

*A great Romantic poet explains the essence of poetry to critics who think that it is useless in the modern world.*

Shelley wrote *A Defence of Poetry* as a reply to Thomas Love Peacock's *The Four Ages of Poetry* (1820). Peacock thought that poetry grows less relevant as society advances and that Romantic poetry is barbaric and childish. Shelley admitted that some people and ages are less poetical than others, but he argued vehemently that poetry is humanity's highest mental faculty, relevant to every age. Shelley sees poetry as the power of understanding and imagining new combinations of thought. Thus, it is the source of all knowledge and progress. He rejects small-minded definitions of poetry as word games played with rhymes and meters. Even prose can be poetry inasmuch as it expresses the imagination.

A poet sees a world not yet seen by most people. He grasps order hidden beneath chaos, truth scrambled by superstition, beauty smeared by corruption. Poets create new forms of opinions and action that enable society to progress. Thus, they

wield more power in society than politicians and business executives. "Poets," Shelley declares, "are the unacknowledged legislators of the world." For example, Dante gave medieval Europe a new Christian myth that made it less violent and more free. Ultimately, poetry enlarges the mental and moral capacities of humankind.

Shelley contrasts poetry with reason. Reason is calculating selfhood; poetry, the impulse toward pleasure and love. "Poetry, and the principle of Self, of which money is the visible incarnation, are the God and Mammon of the world," he states. For Peacock to insist on poetry serving commerce is to turn everything upside down. Reason is under humanity's will, but poetry works under an invisible influence, like the wind, which makes coal burn brighter. Similarly, inspiration fans the flame of a poet's imagination, and he or she writes as if under the direction of an outside force. Such a heated exercise of imagination is, for Shelley, better than the resulting poem, for the poem is necessarily a thing; the poem, however, can impart to others something of the poet's contact with a new truth.

In an age of commerce or an age of reason, when the unpoetical principle of selfish greed gains ascendancy, even the poets may grow less and less poetical. Yet poetry has the power to flash out

again, like "a sword of lightning . . . which consumes the scabbard that would contain it." Finally, in rebuttal to Peacock's attacks on Romantic poets, Shelley predicts, rightly, that they will be remembered for their intellectual achievements. What he says of their works is surely true of his own as well, that they are impossible to read "without being startled with the electric life which burns within their words."

## SUMMARY

Percy Bysshe Shelley created a Romantic myth to compete with religions and philosophies that explain humanity's relationship to the world. His agnostic faith was, by turns, drawn to materialistic and idealistic viewpoints. Finally, he despaired of radically reforming the world in his life, but he maintained his faith in the power of the human imagination to glimpse ideal truth and beauty that lie beyond experience. The cosmic power that runs the world remains remote for Shelley, and, unmindful of human desire, so nature's beauties are false idols. Only in surges of creative imagination can humans unite with this power, a spirit that cannot be embodied in experience.

John L. McLean

## DISCUSSION TOPICS

- Compare the imagery of Percy Bysshe Shelley's "Ode to the West Wind" with that of John Keats's "To Autumn" (1819). What do the differences suggest about the poets' attitudes toward nature?
- What is a lyrical drama? How is it meant to be experienced?
- Is *Prometheus Unbound* a rejection of Aeschylus's tragedy?
- How does Shelley's *Adonais*, a pastoral elegy, illustrate aspects of coming to terms with death that exist in life today?
- In *A Defence of Poetry*, what is Shelley's understanding of the relationship between reason and imagination?
- Investigate the numerous verse forms, some of them very difficult, which Shelley employed.
- How does Shelley's appreciation of nature differ from that of William Wordsworth?

## NEVIL SHUTE

**Born:** Ealing, Middlesex, England

January 17, 1899

**Died:** Melbourne, Victoria, Australia

January 12, 1960

*Shute's characters show that hard work, ingenuity, and compassion can lead to extraordinary accomplishments, while laziness, pride, and complacency lead to real and lethal danger.*

### BIOGRAPHY

Nevil Shute (shewt) was born Nevil Shute Norway in Ealing, Middlesex, England, the second and only surviving child of Arthur Hamilton Norway, a civil servant working for the post office, and the former Mary Louisa Gadsden. Shute spent a few miserable early years at Hammersmith School, but after a period of truancy was sent to Lynam's School in Oxford. Shute recalled this time as a happy introduction to Oxford, where he eventually returned to Balliol College as a mathematics student, graduating in 1922. During the Easter Rising in Dublin, Ireland, in April, 1916, Shute served as a volunteer stretcher-bearer and later entered the Royal Flying Corps. He was discharged because of a stammer he developed during early childhood.

In 1922 Shute joined the de Havilland Aircraft Company as an aeronautical engineer. He was deputy chief on the rigid airship project, building the R100, one of the last of the British airships. During the next six years, Shute worked as a deputy chief engineer during the day and in the evenings wrote his first novels, of which two were published: *Marazan* in 1926 and *The Mysterious Aviator* (also known as *So Disdained*) in 1928. At this time, he wrote two other novels, *Stephen Morris* and *Pilotage*, which were posthumously published in one volume entitled *Stephen Morris* in 1961.

In 1930, after the crash of the government-built R101 virtually ended the aircraft industry in England, Shute founded his own company, Airspeed, Ltd., which designed and manufactured airplanes. From 1930 to 1938, Airspeed, Ltd. produced a number of small recreational and commercial airplanes, immersing Shute daily in intense aeronau-

tical design and construction. During this time, he met his future wife, Frances Mary Heaton, a young doctor, at a recreational flying club. Despite his busy schedule, Shute continued writing in the evenings and published two more novels, *Lonely Road* in 1932, and *Kindling* (also known as *Ruined City*) in 1938.

By 1939, Shute felt economically secure, so he decided to try writing full time. However, with the advent of World War II a few months later, he joined the British navy and was assigned to the Admiralty's Department of Miscellaneous Weapons Development, remaining there until 1944. During these years, while serving as the head of the engineering section, he wrote five more novels: *Ordeal* (1939; also known as *What Happened to the Corbetts*), *An Old Captivity* (1940), *Landfall: A Channel Story* (1940), *Pied Piper* (1942), and *Pastoral* (1944). After the war ended in 1945, Shute published *Most Secret* (1945), a novel he had written in 1941 but had been censored during the war because of its sensitive subject matter. He served as a correspondent for the Ministry of Information and traveled to Burma, where he wrote a film script, *Vinland the Good* (1946), and gathered material he later used in *The Chequer Board* (1947).

In 1948, he published *No Highway*, an aeronautical mystery concerned with the recent discovery of metal fatigue; flew his own plane to Australia and back; and researched three new novels: *A Town Like Alice* (1950), *Round the Bend* (1951), and *The Far Country* (1952). Shute suffered a heart attack in 1952, after which he decided to move his family to Australia. After that move, his novels generally were about his adopted country. He wrote *In the Wet*

(1953), expressing his many concerns about the future of the British Empire. He also wrote his autobiography, *Slide Rule: The Autobiography of an Engineer* (1954), primarily covering his life up to his founding of Airspeed.

After recovering from his heart attack, Shute explored the Australian outback and traveled to the United States to explore the Rocky Mountains. While he traveled, he gathered material for two more novels: *The Breaking Wave* (1955; also known as *Requiem for a Wren*) and *Beyond the Black Stump* (1956). Despite suffering a second heart attack, Shute bought a sports car, took up racing, and began his most widely known novel, *On the Beach* (1957). He completed another novel, *The Rainbow and the Rose*, in 1958, and began *Trustee from the Toolroom* (1960), a novel that was interrupted by a major stroke. Despite his physical infirmities, Shute managed to finish *Trustee* and began work on a major memorandum for the Australian government concerning the economic conditions for artists in Australia. In November, 1959, Shute started his last novel, the unpublished, "Incident at Eucla," a work which was in his typewriter when he died on January 12, 1960.

## ANALYSIS

Although Nevil Shute wrote full time for twenty years, he never thought of himself as an author; instead, he considered himself to be a middle-class engineer, who wrote for other middle-class people. Work provided the focus for Shute's life, and the characters he created reflect his devotion to his job and his belief about the importance of work in the lives of his characters. Shute's own moral character and devotion to duty are characteristics he gave his characters. They are decent, moral, and heroic without being boring or stuffy; indeed, they are often fascinating. Another facet of Shute's characters is their ability to work hard at arduous tasks. Shute himself liked to do two jobs at a time, theorizing that working on more than one job provided relief from stress, especially if the second job was very unlike the first. In *An Old Captivity*, the main character, a pilot, can see that the entire work of an expedition to Greenland will fall on his shoulders; nevertheless, he goes ahead and does it all.

Shute believed that in any situation the ordinary person would respond as decently as possible. At the end of *Ordeal*, the main character's wife notes

that the couple had always tried to live quietly and decently and do their jobs. His characters are also heroic and willing to sacrifice themselves. In *Landfall: A Channel Story*, a young test pilot volunteers to test a new type of plane to be shot off the deck of an aircraft carrier. The government has pressed for the testing, and although badly injured, the pilot manages to survive to tell the developers what they ought to do to make the new plane work. Although young, the pilot is heroic in his determination that the tests must not fail, lest the war itself be lost.

Shute's plots came from many sources: from work, from anecdotes he heard from friends, or from fears or concerns about items he read in the newspaper. He carried a notebook to keep track of ideas, words, and jokes to use in his novels. Once Shute heard about a fatal practical joke involving a plane flying, with landing lights on, at low altitude toward an oncoming train. Apparently the plane could not be maneuvered quickly enough and smashed into the engine, and both pilot and train engineer were killed. With typical economy, Shute used the incident in *Beyond the Black Stump* to dispose of a minor character. Shute also used his notebook to help him remember interesting incidents that could be used for novels. While in the Far East after World War II, Shute heard about a group of women and children who had been forced to march all over Malaya during the war because the Japanese did not have a prisoner of war camp where they could be sent. That story was the basis for *A Town Like Alice*.

As Shute grew older, he became increasingly concerned about the proliferation of atomic weapons and pessimistic about his government's ability to deal with modern crises. That concern appeared in two novels, *In the Wet* and *On the Beach*. *In the Wet* is an allegory that reflects his fears about the growth of socialism in postwar Britain. He applauded the lessening of class structure and called for more opportunities for the educated middle-class. *In the Wet* is set in a dreary 1980's, where the only British institution that has grown is the civil service. Here, Shute argues for a "meritocracy" rewarded by more than one vote per person. Everyone of age would have one basic vote; a college degree would bestow a second vote. Additional merit for foreign travel or earning a living abroad would earn another vote, as would raising two children to age fourteen without divorcing, with a fifth vote for

founding and running a business, a sixth for being a church minister, and the last at the queen's pleasure. Such a system would guarantee that those who worked hard would be rewarded by having more say in important government issues.

Shute's youthful optimism was modified later in his career. His early novels hint that people only had to do their duty and everything would turn out all right. Sometime in the late 1940's and 1950's, however, Shute's vision darkened; he began to write about people haunted by a lack of religion, hounded by love, and destroyed by an increasingly insensitive society. He began to wonder whether work might not serve as religion for people too busy for traditional modes of worship. *Round the Bend* presents just such a proposition. The narrator, Tom Cutter, runs an airline in Bahrain. The airline has become his life and his family, yet he is not happy or satisfied. He hires a friend, Connie Shaklin, as his chief engineer. Suddenly the airline is running much smoother; the employees are happier. When he notices that the employees spend their lunchtime listening to Shaklin preach, Cutter is intrigued and joins them. He hears Shaklin say that becoming perfect demands doing a perfect job, and that you cannot separate the two. Soon Cutter has to send Shaklin away because many people are following him and proclaiming him a messiah for workers. In his new position, Shaklin continues to teach his message that good work and morality are the same thing.

Although *Round the Bend* was not especially well received by the critics, it put into words what Shute had believed his entire life about the importance of work and especially about aeronautics: laziness and a lack of attention to detail were great evils. He always thought that accidents happened because someone was foolish, negligent, or lazy, not because God willed them. Shute warns his readers to take stock of how they are living and working and forces them to look into the future to see the results of uncontrolled technology. He asks his readers to assess their own lives, as does the narrator of *In the Wet*, who says that people can make their own heaven or hell in their daily lives, finding the kingdom of heaven within them while they live.

## A TOWN LIKE ALICE

**First published:** 1950

**Type of work:** Novel

*The story of a woman who survives a Japanese death march and of the Australian who helps her, even at the cost of his life.*

*A Town Like Alice*, more than any other work, reveals Shute's feelings about Australia. Shortly after his first visit, Shute decided to move there. He bought a little farm in Victoria, and over time decided to make it his permanent home. He came to love and respect the hard-working people he met there, and he was fascinated by the distances people had to travel to get ordinary things like groceries, clothing, or medical care.

The "Alice" of the title is Alice Springs, a town right in the center of the continent, halfway between Darwin and Adelaide. Originally founded as a service center for the ranchers in the area, Alice Springs had grown to a delightful small city in the years after World War II.

The novel opens as the narrator, lawyer Noel Strachan, describes the history and establishment of a trust, as well as his dealings with the legatee, twenty-six year old Jean Paget. To him, she seems a pleasant enough woman, but she has an enduring sadness about her. Although she smiles, she doubts that she will ever marry or have a family. Over the course of the next few meetings, he learns her history. The child of English settlers in Malaya, Jean had worked as a typist. When Malaya fell to the Japanese army during World War II, Jean found herself among a group of thirty women and children forced by the invaders to march throughout Malaya because the Japanese lacked a female war camp on the island.

As Jean tells him her story, Noel is shocked at the hardships she faced. Most of the women and children died, some were victims of diseases like cholera or malaria, some succumbed to snakebite or starvation, while others were just worn out by the relentless walking in tremendous heat and humidity. Only Jean and a few others are left when, at one village, she meets another prisoner, a young Australian, Joe Harmon. Forced to serve as a truck driver and mechanic by the Japanese, Harmon is touched by the plight of the English women and

manages to get small items for the group—soap, medicine, and some meat in the form of five roosters he steals from the local Japanese commandant. His punishment is swift and horrible; he is crucified in front of the whole village.

When the Japanese commander dies, the women and children beg to be allowed to stay in the village, and they spend the rest of the war there. Jean returns home to England, but as she later tells Noel, she drags around as if she were in her seventies. When she receives the first money from her legacy, she goes back to Malaya to build a well for the villagers who had taken pity on the captives. She decides to go on to Australia to find Joe Harmon's home, an outback settlement, Willstown. In Willstown she is surprised and delighted to learn that Joe did not die but has survived. She finds him and they fall deeply in love. The rest of the novel tells how they marry and how she is able to help the lonely little outback town by building a factory to employ the locals.

## ON THE BEACH

**First published:** 1957

**Type of work:** Novel

*A small group of people face the end of the world, making plans that they cannot fulfill and hoping for a miracle that does not come.*

If *A Town Like Alice* is an old-fashioned love story, *On the Beach* is a dark tale of the atomic age. A nuclear war has eliminated all life in the Northern Hemisphere, leaving only Australia to await the spread of radioactive contamination that will end human life on Earth. Shute depicts people faced with inevitable doom, but his characters do not despair. They spend their last months of life as normally as they can, planning their gardens, going to work, watching car racing, and even going back to school. Nowhere does Shute better exemplify his belief in the decency, morality, and conscientiousness of the ordinary middle-class person. There are several different nationalities, professions, and social classes portrayed, yet even while facing their greatest fears, the characters are brave up until the end.

Dwight Towers is the last American naval com-

mander left in the world. He has been appointed commander in chief of a combined American-Australian navy, and following the nuclear holocaust he abides by the rules of a navy that no longer exists. He is also faithful to his wife, even though she has died halfway across the world from him. He never gives more than a kiss to Moira Davidson, the more than willing daughter of a wealthy farmer, because he tells her that he would like to think of his family alive until September, the month the atomic cloud is expected to reach Australia.

Throughout, Shute peoples this novel with characters facing their destruction boldly and staying busy until the end. Admittedly there are a few more loud parties and a bit more drinking, but generally everyday events move forward at Shute's usual leisurely pace. Peter and Mary Holmes plan their garden. Having a new baby, Mary refuses to accept the fact that the life she has so recently borne will be taken away. She talks about radiation sickness as if it were a cold or the flu from which they might all recover. Eventually Mary comes to accept her fate and is happy that they will all die together on the same day—no one will have to remain behind alone.

The character who develops most completely is Moira Davidson. At first she deliberately gets drunk, meaning to stay that way until the bitter end. After she meets Dwight Towers, however, she changes. She helps him in many ways, not only in dealing with the painful thoughts of his distant family but also in the purchase of gifts to take home to his children—a fishing rod for his son and a pogo stick for his daughter. Mary Holmes is aghast at the thought that Dwight and Moira are living in some sort of never-never land, but Moira gives Dwight the greatest gift she can: the freedom to go to his death without a guilty conscience. Moira's essential goodness shines through as she fights her normal desire for a husband in order that she be fair to a dead woman, half a world away. Moira reflects Shute's confidence in people's

ability to restrain their desires so they can achieve a greater good.

While Shute is sympathetic to his characters, he has only scorn for whatever government caused the nuclear catastrophe. The war apparently was of very short duration and not much is known about it, save for the sketchy information Dwight Towers brings to Australia. No one is sure who dropped the first bomb, but there were about 4,700 bombs dropped in all. No one knows who dropped the cobalt bomb that released the deadly radiation cloud drifting steadily southward. Shute does away with the notion that people are too sensible or rational to risk a nuclear war. He says the war was caused by nuclear proliferation, with every country amassing a stockpile of atomic weapons. From there it was inevitable that all the bombs would one day be used.

## SUMMARY

Nevil Shute was a modern stoic who faced his strokes, heart attacks, and failing health with fortitude as he continued to write. As an engineer, he could have presented a world in which science and technology gave humanity glorious opportunities. Instead, he presented a warning. It is interesting to note that *On the Beach* is set in 1963, only a year after the actual Cuban Missile Crisis occurred. At that time, reality brought the world very close to the fate that the novelist had described. It is a warning that only the ordinary people of the earth can save it and an affirmation that people, even in the face of death, can know how to live.

Julia Meyers

## DISCUSSION TOPICS

- What is Nevil Shute's opinion of warfare? What does he seem to think are the shortcomings displayed by government institutions at wartime?
- Is Shute's view of humanity optimistic or pessimistic? Can the characters in his novels ever really escape the consequences of their own actions?
- What is Shute's opinion of work? How do his characters' careers affect their viewpoints?
- Why do airplanes repeatedly appear in Shute's novels? How does the use of airplanes and flying act symbolically in his novels?
- How is technology presented in Shute's works?
- What is Shute's view of marriage? Does he support or challenge traditional marital roles for the men and women in his works?

## SIR PHILIP SIDNEY

**Born:** Penshurst, Kent, England  
November 30, 1554

**Died:** Arnhem, the Netherlands  
October 17, 1586

*A major literary figure of the English Renaissance, Sidney wrote poetry, a prose romance, and a pioneering critical treatise that are considered classics.*

### BIOGRAPHY

Penshurst Castle in the southern English county of Kent was the setting for Philip Sidney's birth on November 30, 1554. His circumstances were privileged ones; not only had his father, Sir Henry Sidney, served as gentleman of the Privy Chamber to Edward VI, but his mother, Lady Mary Sidney, claimed membership in an aristocratic family—her father, John Dudley, having been created duke of Northumberland in 1551. Upon the accession of Queen Elizabeth I in 1558, Sir Henry was appointed to a series of important political posts. As his tenth birthday approached, Philip Sidney was enrolled in Shrewsbury Grammar School; matriculation at Oxford followed in 1568. A particularly promising young man who was expected to inherit the title of earl of Leicester from his uncle, Sidney was sent after his graduation on a three-year Grand Tour of the Continent to prepare him for a life of leadership by allowing him to mingle with influential people and learn the art of politics at first hand. At some point upon his return, he came to know Walter Devereaux, earl of Essex, who wished to promote a marriage between young Sidney and his daughter Penelope. Although this union never materialized, Penelope became the Stella of the first great sonnet sequence in English, Sidney's *Astrophel and Stella* (1591).

In 1577, Mary, Sidney's younger sister, married

Henry Herbert, earl of Pembroke, and went to live at Pembroke's Wiltshire mansion, Wilton House. Thereafter, Sidney often visited there, and later that year at Wilton began to write a long romance that he called *Arcadia* (1590, 1593, 1598; originally titled *The Countess of Pembroke's Arcadia*). During this period, Sidney performed minor diplomatic missions for the queen but was often bored by inactivity. The first public evidence of his writing ability, however, are his *Discourse on Irish Affairs* (1577), a defense of his father's regime as lord deputy of Ireland, of which only a fragment exists, and *The Lady of May* (1578), an entertainment for the queen.

Sidney had several poet friends, including Fulke Greville, with whom he had gone to school, and Sir Edward Dyer; in 1579, he met another, Edmund Spenser, who worked as a secretary to Sidney's uncle, the earl of Leicester. These men discussed the weak state of English poetry in contrast to the healthy situation in France and Italy; all of them were destined to contribute to the resurgence of English verse. Two of the many books dedicated to Sidney in 1579 were Spenser's *The Shepheardes Calendar*, usually considered the first important work of the English literary rebirth, and a curious attack on the drama and literature generally, by a man named Stephen Gosson. Embarrassed and angered by Gosson's *The Schoole of Abuse* (1579), Sidney wrote the most comprehensive defense of literature yet attempted by an Englishman, *Defence of Poesie* (1595), also known under an alternate title, *An Apologie for Poetry*. Although not published until 1595, well after Sidney's death, this treatise un-

doubtedly circulated in manuscript form considerably earlier.

It was apparently another unpleasant event for Sidney, the marriage of Penelope Devereaux to Lord Rich in 1581, that sparked the composition of *Astrophel and Stella*. Although there is no independent evidence of an affair between Sidney and Penelope, the extravagant praise of Stella and the indignant allusions to Rich ("rich fool") in this sequence of 108 sonnets and 11 songs suggest some sort of continuing involvement of the two after the earlier marriage scheme had failed. Sidney continued working on the romance that he now called *The Countess of Pembroke's Arcadia* in honor of his sister. After completing a 180,000-word version of the work in 1580, he began a longer and more intricate revision thereafter, which he did not live to complete. Whichever version is considered, *Arcadia* stands as the most impressive work of prose fiction in English before the era of the English novel began in the eighteenth century.

In the fall of 1583, Sidney married Frances Walsingham, daughter of a man who held the key office of principal secretary in Queen Elizabeth's Privy Council. Also in that year, Sidney was knighted by the queen. Still underemployed as late as 1585, Sidney, who had supported colonization schemes of Martin Frobisher and Sir Walter Raleigh, decided to accompany Francis Drake on a voyage to the New World, but upon being appointed governor of Flushing in the Netherlands, he abandoned this plan. England was then engaged in a continuing struggle with Spain for control of the Netherlands, and Sidney led military expeditions against Spanish forces. In September, 1586, he was seriously wounded in one of these efforts, lingered for some weeks, and died at Arnhem, the Netherlands, on October 17, 1586, before his thirty-second birthday. He was mourned throughout England and a good portion of Europe. Spenser, Raleigh, Greville, and Sidney's sister the countess of Pembroke were among the two hundred or so people who composed elegies on his death.

## ANALYSIS

In the Elizabethan era, aristocrats, who tended to regard literature as an inappropriate vocation, rarely published their writings. Nonetheless, some of them, including Sidney's good friend Fulke

Greville, wrote poetry of high quality that they circulated privately among their friends. Sidney, who probably would have become an earl had he lived a few more years, shared the attitude of the English nobility and published none of the works that today are regarded as his greatest. He spoke slightly of his writings, for example referring to his *Defence of Poesie* as an "idle, ink-wasting toy." Such conventional behavior should not mislead today's readers into supposing that Sidney was not a serious writer. It is true that he did his writing in periods of enforced idleness, and it is possible that he might have written little or nothing if the queen had given him more employment of the diplomatic or administrative sort for which he felt qualified. The point is that he did write brilliantly and, like all first-rate writers, surely recognized the literary value of his works.

Of his three most important works, the one that he probably began first (there is no way to be sure), *Arcadia*, illustrates his developing interest in many aspects of prose narrative. It began as a pastoral romance, a genre that Greek writers had practiced as far back as around 200 C.E., and that Continental writers had revived earlier in Sidney's century. In the pastoral, the setting is rural, the characters are mainly shepherds (or rulers of a land of shepherds), the pace is deliberate, and life is uncomplicated. There are young lovers, of course, and their frustrations are usually domestic ones, such as family opposition, perhaps because a set of parents have their own candidate for spouse of their son or daughter. Such situations generate a certain amount of conflict and narrative interest but do not allow for the larger issues of war and politics dear to composers of epics. The *Old Arcadia*, as it is usually called, is a skillfully composed romance of this type.

The unfinished *New Arcadia* reflects the adventurous man of the world that Sidney was. Chivalry and heroic deeds become prominent, and reflections on law, government, and morality are sprinkled throughout. Sidney built into his story dozens of poems in forms both traditional and experimental. Since the narrative breaks off in the midst of a sentence in the third book (the original version was in five books), it is impossible to tell how it would have ended. Subsequent editors tried to blend the *New Arcadia* with a modified version of the clearly inappropriate old ending, but the old conclusion does not suit the later work.

It may be a disservice to Puritans to call Gosson's *The Schoole of Abuse* a puritanical document, but clearly Gosson intended it to appeal to readers who regarded literature as at best idle and at worst dangerous to moral health. He directed his charges particularly against the drama, and a half century later Puritan feeling against plays became strong enough to close down all the London theaters. Sidney chose to enlarge his discussion, for he considered an attack against any good literature on moral grounds an attack against all literature.

Although Sidney had probably been thinking about the nature of poetry for some time, Gosson's attack drove him to a comprehensive defense of, or "apology" for, poetry. It should be noted that "defense" and "apology" are synonyms; there is nothing apologetic in the common sense of the word about Sidney's treatise. He attempted to blend the best things, old and new, that had been said in behalf of poetry, which for Sidney signified what today would be termed, more broadly, "literature"—as one of his statements therein—"It is not rhyming and versing that maketh a poet"—implies. The *Arcadia* wove together considerable "rhyming and versing" with a lengthy prose narrative and in Sidney's mind may well have been more of a work of poetry than his sonnet sequence, *Astrophel and Stella*. The form of *Defence of Poesie*, a classical oration, indicates that Sidney deemed it a serious subject worthy of a "classical" treatment. Sidney (who was capable of very blunt and direct language), chose for his defense a formal and elegant style of prose, and he responded to Gosson's charges that literature promoted immorality by devising a powerful argument for the moral worth of poetry.

Sidney's verse, aside from the poems contained in *The Lady of May* and the *Arcadia*, consists of a collection of varied poems and translations under the title *Certaine Sonnets* (1598), verse translations of the first forty-three Psalms, *The Psalmes of David, Translated into Divers and Sundry Kindess of Verse* (1823), and *Astrophel and Stella*. Not all the poems of *Certaine Sonnets* are sonnets in the modern sense, but two that are, "Thou blind man's mark, thou fool's self-chosen snare" and "Leave me O Love, which reachest but to dust," have been anthology favorites and demonstrate Sidney's moral and religious sensibility. The latter ends with a pledge to "Eternal Love." The Psalms translations, a favorite exercise among Christian poets of the Renais-

sance, also show his fondness for experimentation with many types of poetic line and stanza.

*Astrophel and Stella* is a blend of the old and the new. Sonnets and sonnet sequences date back at least to the time of Dante—the late thirteenth century—and in the following century another Italian, Petrarch, composed a celebrated sequence of love sonnets about a woman named Laura. Other Continental poets, especially French ones, enthusiastically imitated this Italian form, but it was not until well into the sixteenth century that English poets began to practice the sonnet. With Sidney, the English extended sonnet sequence began, its characteristic theme most often a stormy or unhappy love affair. With the publication of a pirated edition of Sidney's *Astrophel and Stella* in 1591, a vogue of sonnet writing swept England, producing within a few years notable sequences by Edmund Spenser, Michael Drayton, Samuel Daniel, and, of course, William Shakespeare.

Sidney lived in a time of intense interest in the drama, and though he did not write plays other than the semidramatic entertainment *The Lady of May*, his sonnet cycle is intensely dramatic. Individually, the poems are a series of lyrical outbursts of feeling or meditations on a theme related to love, but collectively they imply a situation that, characteristically, is only vaguely sketched. There is no story in the strict sense, and although the sketchily portrayed situation can in the case of Sidney's sequence be associated with his relationship to the young woman Penelope Devereaux, it is a mistake to take it too autobiographically. In fact, one of Sidney's most impressive accomplishments is the creation of the character of Astrophel.

## DEFENCE OF POESIE

**First published:** 1595 (also known as *An Apologie for Poetry*)

**Type of work:** Essay

*The effects of poetry are to delight readers and motivate them to the practice of the virtuous life.*

In response to Stephen Gosson's narrowly moralistic condemnation of poetry *The Schoole of Abuse*, Sidney's *Defence of Poesie* sets forth a large-minded

justification of literature as a legitimate pleasure that is at the same time an incentive to the practice of virtue. He leads up to this moral defense with a series of lesser, but nevertheless important, defenses, beginning with poetry's long-standing reputation. In nations long admired, such as classical Greece and Rome, poetry was a "nurse" and a "lightgiver," the kind of thing that was presented to young children as a preface to "tougher knowledges." If societies such as these gave precedence to poetry, it surely must be a worthy thing.

Closely related to reputation are the good names that poetry has borne. In Rome, Sidney says, the poet was a *vates*, which signifies a seer or prophet. In other words, he or she was considered to be a person who possessed a special fund of knowledge like that of those who were able to predict the future. In Greece he was a *poietai*, which meant "maker" and which forms the basis of the English word "poet." Thus, the poet is both a seer and a maker.

Sidney goes on to consider the "principal object" of poetry in relation to other occupations, all of which have some aspect of the natural world as the object of their attention. Astronomers study the stars; musicians, sounds; physicians, the human body. The poet, however, "not tied to any subjection," ranges throughout nature for his or her material and even goes beyond nature, because he or she can imagine things better than nature has actually produced. Poets are the maker of makers, and therefore the Greek name for a poet is particularly appropriate.

Sidney then gathers together two of the most famous definitions of poetry from the ancient world. Aristotle thought of poetry as a mimetic art—that is, an art of imitation. Horace defined it as an art that both teaches and delights. For Sidney, these two notions are quite compatible, and it remains for him to reinterpret these Aristotelian and Horatian concepts according to his own understanding of poetic art.

Before undertaking this task, Sidney classifies poets into three categories. The first category, religious poets, includes David in his Psalms and Homer in the hymns attributed to him. Philosophical poets are those such as the Roman Lucretius, who wrote the philosophical treatise *De rerum natura* (c. 60 B.C.E.; *On the Nature of Things*, 1682), which sets forth an atomic theory of the day. The

last category, however, the one that interests Sidney the most, he refers to as "indeed right poets." They imitate, for the purpose of teaching and delighting, not merely what has been, is, or will be in the world, but also what may be and what should be.

In this respect, the poet as a teacher has great advantages over philosophers, who guide people in thinking, including, of course, thinking about morality, but who do not normally inspire them to act, and over historians, who can supply many examples of virtuous activity in the past but who do not provide precepts for guidance. These teachers have other defects, as well. Philosophers, for example, are often obscure and difficult, while historians must report incidents of wickedness going unpunished, which might actually encourage wickedness in the reader. Like the philosopher, the poet is concerned with moral precepts; like the philosopher, the poet's art is concrete and able to stir the audience with accounts of deeds and events expressed in vivid images. The poet, however, suffers none of the disadvantages of philosopher or historian. As Sidney summarizes the poet's superiority, "He doth not only show the way, but giveth so sweet a prospect into the way, as will entice any man to enter into it."

Sidney professes himself unable to understand the sort of criticism that Gosson (whom he never mentions by name) has made of poets. He reviews—very favorably, of course—the various forms that "right poetry" can take: heroic, lyric, tragic, comic, satiric, pastoral, and others. He finds nothing to justify the charges of poetry's enemies. While it is true, he concedes, that comedy shows people misbehaving, the effect of a good comedy is to arouse contempt for such people.

A classical oration must contain a substantial refutation of charges by opponents, so Sidney patiently answers Gosson's. Perhaps the most interesting is Plato's banning of poets from his ideal republic. To Sidney, Plato himself is "most poetical" of all philosophers; therefore, Sidney would hate to confess him to be an enemy of poetry. He argues, however, that Plato did not intend to ban all poets but only those who spread false religious ideas, and that, in his *Iōn* (399-390 B.C.E.; *Ion*, 1804), Plato spoke more favorably of poetry.

It remains for the patriotic Sidney to survey briefly the history of English poetry—the first such survey of its type. From the medieval period he

mentions only Geoffrey Chaucer, who was indeed the only poet before the Renaissance who was well known in the era of Queen Elizabeth I. From his own century Sidney praises the earl of Surrey, like Sidney a writer of sonnets, his friend Spenser, and Thomas Norton and Thomas Sackville's *Gorboduc* (pr. 1561; pb. 1565), a play usually considered the first English tragedy. At the time of the composition of *Defence of Poesie*, of course, Shakespeare was only a youth, and many of the other great achievements of the English literary renaissance were yet to come.

Sidney closes his defense with a highly charged summation that reiterates his deep conviction (one that he shared with Spenser) that poetry does not merely lead its audience to accept virtuous principles but also motivates people to the practice of virtue. At the very end, he utters a semiserious curse against the person who cannot appreciate poetry: that, owing to lack of skill in sonnet writing (so important in winning the heart of a loved one), such a person will “never get favor” and, after death, will be forgotten “for want of an epitaph.”

## ASTROPHEL AND STELLA, SONNET 31

First published: 1591

Type of work: Poem

*The lover Astrophel expresses to the moon his melancholy over Stella's failure to respond.*

The thirty-first sonnet in the sequence *Astrophel and Stella* begins with the line “With how sad steps, O moon, thou climb'st the skies.” Like many other sonnets in this sequence, it is modeled after the form of the sonnet made famous by the Italian poet Petrarch. The poem is made of two main parts, an eight-line “octave” and a six-line “sestet.” The octave rhymes *abbaabba*, where *a* represents the first rhyme used and *b* the second. This scheme is the almost invariable rhyme pattern of the Italian sonnet; the sestet, in this poem *cdeede*, permits other variations.

Sidney also follows the traditional form in tailoring the content to the form; it, too, has two parts. In the octave, Astrophel asks the moon, which looks somehow sad to him, whether it, too, is subject to

the emotion of love; he uses the traditional figure of Cupid's arrow, which characteristically wounds lovers. Surely, the moon, having observed many lovers, knows the feeling of unrequited love, and Astrophel judges the moon to be a kindred spirit.

Having established this relationship with the moon, the lover asks a series of questions, the effect of which is to reveal more clearly the sorry state of his love affair. He asks first whether “constant love” on the moon is taken as a lack of “wit” (intelligence). Behind this question lies his perplexity that Stella cannot appreciate his fidelity to her. He asks whether beautiful women on the moon are as “proud” as they are on earth. Whereas the lover is humble in his allegiance, the fair beauty remains distant and proud. His next question, whether scornful lunar beauties nevertheless “love to be loved,” shows more than a tinge of resentment. He cannot be sure that Stella loves him, but she clearly enjoys his attention. His final question, whether on the moon “ungratefulness” is considered virtuous, is his most bitter one. Given the fact that Astrophel has already recognized (in Sonnet 25) Stella's beauty as the beauty of virtue, his doleful conclusion is that her failure to appreciate him must be an aspect of her virtue.

The language of this sonnet is vigorous and direct. The ten one-syllable words of its first line set a deliberate pace for the musing lover, and words such as “sad,” “silently,” and “wan” in the first two lines immediately establish the mood. It is probably not possible for the moon to serve poets in quite the way it did Sidney now that humans have visited it and walked in its dust, but lovers still feel able to communicate over great distance by gazing at it concurrently, and disappointed lovers such as Astrophel can still think of it as a silent companion to which their sorrows can be told. Thus, Sidney's sonnet still speaks as eloquently of a lover's disappointment as it did four centuries ago.

## ASTROPHEL AND STELLA, SONNET 74

**First published:** 1591

**Type of work:** Poem

*The lover, unschooled in the art of poetry, explains how he has become successful at composing sonnets.*

Sonnet 74 of *Astrophel and Stella*, “I never drank of Aganippe well,” comes at a later stage of Astrophel’s pursuit of Stella. It should be noted that a sonnet sequence with love as its theme implies, but does not tell, a story. It is not a continuous narrative but the expression of the various emotional states, situations, and reflections of its speaker.

In the case of *Astrophel and Stella*, there are reasons for identifying its speaker with its author. The latter’s nickname appears in the character’s name, while the first part of that name, in addition to being a word for “star” (making him a “star-lover,” for “phil” is also a Greek root meaning “love”), calls to mind another Latin word for “star,” one of whose forms, *sideris*, looks very much like “Sidney.” Furthermore, Stella has been explicitly identified as the wife of the Lord Rich who married Penelope Devereaux, the woman once proposed as a wife for Sidney. Therefore, it is easy to imagine these poems as expressing Sidney’s own thoughts and feelings.

Although there may be a considerable amount of Sidney in Astrophel, nevertheless Sidney is not Astrophel. Sonnet 74 furnishes some evidence that Sidney is quite capable of distancing himself from his character, in this case through humor. The Aganippe well is at the foot of Mount Helicon and is sacred to the Muses, the deities who inspire creative endeavor. Astrophel asserts that he has never had anything to do with the Muses and, as a matter of fact, disclaims any knowledge of how poetry is produced. Nor has he stolen any ideas from any other poet. He insists, however, that he has been able to compose smooth flowing verse. How has he managed to do it? The answer, which he reveals in the last line, is that his “lips are sweet, inspired with Stella’s kiss.”

He has not exactly gotten a kiss from Stella, but he has managed to give her one while she was sleeping, and that kiss has not only restored his good

spirits but also inspired a string of sonnets, including number 74.

Astrophel there is a plainly comic figure, almost a bumpkin. His “smooth” verse includes a line such as the following: “But (God wot) wot not what they mean by it.” (“Wot,” by the way, means “know.”) He is conducting a dialogue with himself, as though he himself cannot understand what has suddenly turned him into a poet, until it suddenly comes to him like a burst of inspiration.

This poem inclines toward the English form of the sonnet, which Shakespeare later made famous. The rhyme scheme of the octave is *abababab*; that of the sestet, *cdcdce*. The pattern of alternating rhymes comes close to the *abab cdcd efef gg* pattern that Shakespeare later used, a scheme that resulted in three quatrains and a couplet rather than the Petrarchan octave and sestet. This poem, however, retains the characteristic turning point at the end of the octave. It is in the octave that Astrophel insists that he has never been a poet before, while in the sestet he raises the question of how he has suddenly become one, answering it in the ending couplet. There, as often in Shakespeare, the couplet has a distinctive function: It tersely answers Astrophel’s question.

## ASTROPHEL AND STELLA, SONG 11

**First published:** 1591

**Type of work:** Poem

*The lover pleads with Stella beneath the window of her room but is finally dismissed.*

Unlike many sonnet cycles, Sidney’s *Astrophel and Stella* contains eleven songs interspersed among the sonnets. Not all Renaissance compositions called songs are in fact singable, but Sidney’s are, particularly number 11, “Who is it that this dark night . . . ?” which has received several musical settings. It consists of nine five-line stanzas, each an exchange of two lines sung by Stella and three by Astrophel. In the ninth stanza, she urges him to “begone.” It is the climactic part of the sequence, coming after Sonnet 104; in the last four sonnets, he will attempt, with only partial success, to come to terms with his rejection.

Stella has previously urged him in another dialogue song (8) to end his suit out of respect for her “honor” (presumably because she is married—though unhappily so), but she left it open for Astrophel to admire her from afar. His presence beneath her window now indicates how difficult it is for him to follow this advice. In this poignant dialogue song, she parries in succession each of his pleas. First, she expresses surprise that he is there at all and that his interests have not shifted to someone else. When he vows that he cannot change, she suggests that absence from her will probably solve the problem. He admits that the passage of time in many cases makes lovers forget their old passions, but he will remain “faithful” to her. Surely he will meet more beautiful women, Stella points out, but he claims that he will see their beauty as merely “counterfeiting” hers. Reason, Stella says, counsels him to cease indulging in such emotions; his love for her is actually based on reason, he responds. She concedes that his unavailing love for her inflicts “wrongs” on him that should bring it to an end, but he proclaims himself willing to suffer any pain that this love inflicts.

Realizing that Astrophel will counter any argument that she can make, Stella suggests that someone may be listening and that, if he stays longer or returns, she will be angry. Because Astrophel does not want to “endanger” her, he agrees to leave, complaining of the injustice of his fortune and, bitterly in the final line, of the fact that he must yield to “louts.” It is clear that Astrophel considers Stella’s husband a “lout.”

*Astrophel and Stella* is one of the most dramatic of Renaissance sonnet sequences, and this eleventh song brings the conflicts within, and between, the lovers to a high point. The expression of love is all on Astrophel’s side; each pair of lines that Stella speaks sounds curt and detached. The reader knows from earlier poems that Stella really does love Astrophel, however, and that she is now stifling all feeling because she knows that, if she gives him the slightest encouragement, he will never stop pursuing her. He pours his feelings out, but he loves her enough to recognize the discomfort and even danger that a continuation of their relationship may produce, and so he leaves.

## CERTAIN SONNETS 32

**First published:** 1598

**Type of work:** Poem

*A speaker weary of earthly vanities rejects as futile all love except heavenly love.*

Sonnet 32, beginning “Leave me, O Love, which reachest but to dust” appears at the end of the *Certain Sonnets*, which the countess of Pembroke published in 1598, a dozen years after her brother’s death. The sentiment of the poem, together with its position in this rather miscellaneous group of poems, has led commentators over the centuries to regard it as Sidney’s “last word” on the subject of love and even to think of it as a coda to *Astrophel and Stella*, rejecting love of the sort that Astrophel professes. Its cry of “farewell, world” in its next-to-last line has even suggested the possibility of its being a deathbed effort.

Manuscript evidence, however, has nearly established that this fine sonnet was written before Sidney even began his sonnet sequence. He probably wrote it in 1581, at the age of twenty-seven, when he had no reason to suppose that he would be leaving this world soon. It may seem contradictory that Sidney, after composing a poem of this sort, should then probe so elaborately into the kind of love “which reachest but to dust,” but his imagination was versatile and his approach to his art flexible. He may have sincerely believed what he says in this sonnet and still have been able to plunge energetically into an imaginative investigation of what it was like to be Astrophel—and, to repeat, there was certainly some Astrophel in Sidney.

Interestingly, this sonnet takes the Shakespearian *abab cdcd efef gg* form, which indicates that, later in *Astrophel and Stella*, Sidney went back to the Italian type—more difficult to do in English because rhymes do not come so easily as in Italian. The organization of the content also reflects the English form, for each of the three cross-rhymed quatrains reiterates with different imagery the speaker’s disgust with earthly love and his determination to focus on “higher things.”

In the first quatrain, the rhyme on “dust” and “rust” characterizes the love that fades. In the second, images of seeing and light develop the notion of the superiority of heavenly “beams,” while in the

third the speaker seeks to “take fast hold” of divine love and reject the evil that might cause him to “slide” away from his heavenly destination. The final couplet is a “farewell” to the world and a final entreaty to “eternal love” to uphold him. If not Sidney’s last thoughts on love, this sonnet states eloquently the conviction that the greatest of earthly pleasures pale in the light of eternity.

### SUMMARY

Sir Philip Sidney may be England’s finest example of the Renaissance man. Along with Edmund Spenser, he not only did more than anyone else to inaugurate the great age of English Renaissance poetry, but also displayed diverse talents as writer, diplomat, administrator, and soldier. Few writers have excelled at fiction, poetry, and criticism, but Sidney, in *Arcadia*, *Astrophel and Stella*, and *Defence of Poesie*, made lasting contributions to each of these genres despite the fact that his were pioneering attempts in English literature. Both the sonnets and his treatise on poetry continue to be essential items for students of Elizabethan literature.

Robert P. Ellis

## BIBLIOGRAPHY

### By the Author

#### POETRY:

*Astrophel and Stella*, 1591 (pirated edition printed by Thomas Newman; 1598, first authorized edition)

*Certaine Sonnets*, 1598

*The Psalmes of David, Translated into Divers and Sundry Kindes of Verse*, 1823 (with Mary Sidney Herbert, Countess of Pembroke)

*The Complete Poems of Sir Philip Sidney*, 1873 (2 volumes)

*The Poems of Sir Philip Sidney*, 1962 (William A. Ringler, Jr., editor)

*The Psalms of Sir Philip Sidney and the Countess of Pembroke*, 1963 (J. C. A. Rathmell, editor)

#### LONG FICTION:

*Arcadia*, 1590, 1593, 1598 (originally entitled *The Countess of Pembroke’s Arcadia*)

#### DRAMA:

*The Lady of May*, pr. 1578 (masque)

*Fortress of Perfect Beauty*, pr. 1581 (with Fulke Greville, Lord Brooke; Phillip Howard, the earl of Arundel; and Baron Windsor of Stanwell)

#### NONFICTION:

*Discourse on Irish Affairs*, 1577 (extant only in a fragment)

*Defence of Poesie*, 1595 (also as *An Apologie for Poetry*)

## DISCUSSION TOPICS

- Consider Sir Philip Sidney’s *Defence of Poesie* as a synthesis of the best critical ideas about poetry available to him.
- What was Sidney’s initiative in discussing prior English poetry?
- As an early English sonnet writer, what did Sidney contribute to the form in *Astrophel and Stella* and his other sonnets?
- The speaker in Sonnet 74 of *Astrophel and Stella* is a character to be distinguished from the author. How does Astrophel characterize himself, and how is the reader expected to understand him?
- What are the literary sources of Sidney’s original *Arcadia*?
- How did Sidney’s approach change when he undertook the *New Arcadia*?
- William Shakespeare’s Sonnet 55 (“Not marble, nor the gilded monuments”) has been interpreted by some as referring to Sidney’s “powerful rhyme.” How convincing do you find this theory?

## HENRYK SIENKIEWICZ

**Born:** Wola Okrzejska, Poland  
May 5, 1846

**Died:** Vevey, Switzerland  
November 15, 1916

*In his trilogy of historical novels set in seventeenth century Poland, Sienkiewicz produced a great national epic for his homeland. In Quo Vadis, his novel of ancient Rome, he raised universal issues about the future of civilization, while at the same time creating a compelling adventure and love story.*

### BIOGRAPHY

Henryk Adam Aleksander Pius Sienkiewicz (shehn-KYAY-vihch), a descendant of minor Polish and Lithuanian nobility, was born in 1846 in the Russian-ruled part of a Poland that had been taken over and partitioned by Russia, Prussia, and Austria in the previous century. Although he came to be regarded as the great literary spokesman for the Polish nation, that nation did not legally exist throughout his entire lifetime, not regaining its independence until two years after his death.

Sienkiewicz's parents pushed him to study law at the University of Warsaw, but he soon transferred, first into medicine, and then into history and literature, where his true interests lay. He left the university in 1871 without completing his degree and began a career in journalism, writing reviews and columns for the *Gazeta Polska* (Polish gazette) and other publications, using the pen name Litwos. He also wrote an early novel, *Na marne* (*In Vain*, 1899), which appeared in installments in the journal *Wieniec* (garland) in 1872.

In the late 1870's and early 1880's, in addition to his journalism, he wrote a number of short stories, including "Szkice węglem" ("Charcoal Sketches"), "Bartek zwycięzca" ("Bartek the Conqueror"), "Latarnik" ("The Lighthouse Keeper of Aspinwall"), and "Janko muzykant" ("Yanko the Musician"), most of which focus on the lives of simple

peasants, in keeping with the teachings of positivism, a philosophy popular in Polish literary circles at this time.

In 1874, Sienkiewicz became literary editor of *Niwa* (field), a weekly Polish publication. He also translated the French writer Victor Hugo and began traveling, first within Europe and then, in 1876, to the United States on an expedition with fellow writers, artists, and intellectuals to establish a commune in California. The commune failed because none of the writers and intellectuals knew how to farm, but Sienkiewicz gathered valuable experience on the trip, some of which he used in articles for the *Gazeta Polska*, later collected as *Listy z podróży do Ameryki* (serial, 1876-1878, book, 1896; *Portrait of America: Letters*, 1959), and some of which—for example, his experiences on the plains with native Indians—is said to have inspired his fictional descriptions of the wild lands of the Ukraine and the Cossacks who lived there. He himself compared the American Wild West to the Ukrainian wild lands.

After returning to Poland in 1879 and marrying Maria Szetkiewicz in 1881, Sienkiewicz became editor of the daily newspaper, *Slowo* (the word) and also began work on the trilogy of historical novels that first made his name: *Ogniem i mieczem* (1883-1884, serial, 1884, book; *With Fire and Sword: An Historical Novel of Poland and Russia*, 1890), *Potop* (1884-1886, serial, 1886, book; *The Deluge: An Historical Novel of Poland, Sweden, and Russia*, 1891), and *Pan Wołodyjowski* (1887-1888, serial, 1888, book; *Pan*

*Michael: An Historical Novel of Poland, the Ukraine, and Turkey*, 1893; also known as *Fire in the Steppe*, 1992), published in serialized installments. *With Fire and Sword* was an instant success in Poland, and by the next decade Sienkiewicz was also becoming well known abroad; the novel was translated into thirty languages, with the first English translation, by Jeremiah Curtin, appearing in the United States in 1890. Translations by Curtin of the second and third volumes of the trilogy appeared in 1891 and 1893, respectively.

In 1891, Sienkiewicz traveled to Egypt and other parts of Africa, contracting malaria, but also gathering material for another set of "letters" from a foreign continent, *Listy z Afryki* (1891; letters from Africa), and for a children's book, *Wpustnyi i puszcz* (1910, serial, 1912, book; *In Desert and Wilderness*, 1912). He also published two contemporary novels in this period, *Bez dogmatu* (1889-1890, serial, 1891, book; *Without Dogma*, 1893) and *Rodzina Połanieckich* (1895; literally "the Połaniecki family" but translated as *Children of the Soil* in 1895).

Sienkiewicz also began turning his attention to the ancient world at this time, publishing the short stories "Wyrok Zeusa" ("The Verdict of Zeus") and "Pojdźmy za Nim" ("Let Us Follow Him") in 1890 and 1892, respectively. The latter story, about two pagans converting to Christianity, anticipated the central theme of Sienkiewicz's next great success, the novel *Quo Vadis*, serialized in 1895-1896 in Polish and quickly translated into English (*Quo Vadis: A Narrative of the Time of Nero*, 1896) and many other languages. The novel was a worldwide best seller and was adapted into plays, ballets, films, and an opera. The name *Quo Vadis* was even used for cigars, restaurants, and a racehorse.

For the next decade and a half Sienkiewicz was the most famous Polish writer in the world, but *Quo Vadis* marked the end of his most productive period. He spent the next four years on another historical novel, *Krzyżacy* (1900, serial, 1906, book; *The Knights of the Cross*, 1900; also known as *The Teutonic Knights*, 1943). After that he produced only two more novels for adults, *Na polu chwały* (1903-1905; *On the Field of Glory*, 1906), a short, unsuccessful historical work, and four years later a contemporary novel expressing disapproval of revolutionaries, *Wiry* (1908-1910, serial, 1910, book; *Whirlpools: A Novel of Modern Poland*, 1910). He also published some short stories, a children's novel, and a pam-

phlet in defense of Polish schoolchildren against Prussian repression.

Honors began to pour in, though. He was called one of the greatest Poles of all time, ranked alongside the astronomer Nicolaus Copernicus. In 1905, he received the Nobel Prize in Literature, primarily for his historical trilogy, the citation singling out his achievement as an epic writer and the presenter of the award saying that Sienkiewicz had concentrated the essence of his nation in his works.

When World War I broke out, Sienkiewicz moved to Switzerland, where he died and was buried in 1916. In 1924, after Poland had won its independence, his remains were sent to Warsaw to be reinterred in St. John's Cathedral.

## ANALYSIS

Under the influence of the Polish positivist movement, which emphasized the need to educate the people and gradually improve society, and which called for literature focusing on the middle class and the common people rather than on the aristocracy, Sienkiewicz at the beginning of his career wrote stories about the plight of the peasants. In "Bartek the Conqueror," he wrote about a simple Polish peasant, drafted to fight on the Prussian side in the Franco-Prussian War, who ends up torn between obeying his Prussian superiors and aiding some fellow Poles who are fighting on the side of the French.

This issue of divided loyalties is a recurring theme in Sienkiewicz's works, from the Polish soldier Kmicic in *The Deluge* having to decide whether to follow his traitorous commander, to the Cossacks in *With Fire and Sword* having to decide whether to rebel against the Polish Commonwealth, to Marcus Vinitius in *Quo Vadis* deciding whether to stay true to Rome and its traditions or to join the new movement of Christians. There is even Prince Yeremi in *With Fire and Sword*, who has to decide whether to obey his government's orders to negotiate with the rebel Cossacks or disobey them in the name of the greater good of saving the commonwealth.

This issue of divided loyalties is a personal and psychological one, but it is connected to social causes, in particular the cause of Poland as a nation threatened or ruled by others. Even in *Quo Vadis*, which on the surface is a tale of ancient Rome, the issue is how to deal with a tyrannical empire much

like the Russian empire of the late nineteenth century.

Thus although Sienkiewicz drifted away from positivism, writing more about upper class characters or characters like Yanko the child musician, who has a talent that does not fit with his peasant status, he still focused on social themes in the manner of the positivists, in his case the theme of Poland's status as a nation. It is possible to see most of the themes and situations in his fiction as reflecting the Polish national situation. Many of his heroes, such as Pan Yan in *With Fire and Sword*, Marcus Vinitius in *Quo Vadis*, and Kmcic in *The Deluge*, spend much of their time ill or wounded, tended by others, waiting helplessly while others step forward to rescue them or the women they love, all suggesting the situation of helpless Poland, divided between three conquering empires and unable to rescue itself.

Similarly, the Hamlet-like indecision of the hero of *Without Dogma* has been seen to reflect the paralysis of Poland in the nineteenth century. One message of Sienkiewicz's fiction seems to be that Poland is unable to assert its nationhood. Indeed, he may even be saying it would be imprudent to do so, if the early Christians of *Quo Vadis* represent the Poles of the nineteenth century. The Christians resolutely refrain from fighting back against Roman tyranny; they preach acceptance of suffering, patience, and forgiveness, and yet Sienkiewicz frequently reminds the readers of *Quo Vadis* that Christianity conquers Rome in the end.

The message would seem to be one of prudence, of patience in the face of Russian rule. Yet Sienkiewicz is also the novelist of battle. Especially in the trilogy, he depicts one battle after another. He is celebrated for his ability to depict scenes of war. Even in *Quo Vadis* the most memorable scenes are the ones of the gladiators and wild animals in the arena, and the most gripping moment involving a Christian is not any of the passive deaths that most of the Christians allow themselves to be led to but the fight put up by the strongman Ursus. Thus though on the one hand Sienkiewicz seems to preach prudence, on the other he seems to be wishing for conquest and victory by force. He decries revolution in *Whirlpools*, but he is at his most enthusiastic depicting uprisings, battles, and similar events in the trilogy.

The trilogy is also a great celebration of Polish

nationhood, harking back to a time when there was a great Polish empire in Europe. It is true, though, that Sienkiewicz chooses a time period when the Polish empire was under threat; each of the novels of the trilogy shows the empire embattled. In *With Fire and Sword*, there is an uprising of Cossacks against Polish rule; in *The Deluge* there is a Swedish invasion; and in *Pan Michael* there is a threat from the Turks and Tartars.

In other words, Sienkiewicz in this way also is a novelist in conflict; he is both celebrating Polish greatness and indicating its precarious nature. What is more, to a certain extent he is questioning the morality of old Polish rule, for in *With Fire and Sword* Pan Yan, the Polish officer, is forced to admit that the Cossacks have legitimate grievances against their Polish rulers. Perhaps all empires lead to tyranny, or perhaps Sienkiewicz for a moment is letting the Polish empire of the seventeenth century represent the Russian one of the nineteenth.

There is also the issue of the decline of European civilization. Especially in *Quo Vadis*, though the Roman empire of Nero may be a despicable tyranny that deserves destruction, it does put on grand spectacles that Sienkiewicz delights in portraying. He also delights in portraying the elegant aristocrat, Petronius, who is very much attached to the old world, even though he despises Nero. If Rome falls and the pure and virtuous Christians triumph, is that entirely good? Though he seems to be celebrating the early Christians, Sienkiewicz also seems to be suggesting that some aspects of the old empire might be worth retaining, and though he seems to be preaching the virtues of purity and egalitarianism, he also seems to be identifying with the luxurious snobbishness of Petronius.

If Sienkiewicz is thus not a thoroughgoing proponent of throwing out the old order in the social and political sphere, he is also very much a traditionalist in terms of literary form. Not for him any of the innovations associated with modernism, and thus after the first decade of the twentieth century his popularity began to fade, and he came to be regarded as somewhat passé. Some critics also dismiss him as a writer of soap operas and second-rate epics, a teller of adventure tales in the mode of Alexander Dumas, *père*, rather than a true epic author like Homer.

## WITH FIRE AND SWORD

**First published:** *Ogniem i mieczem*, 1883-1884, serial; 1884, book (English translation, 1890)

**Type of work:** Novel

*The forces of the Polish Commonwealth with great difficulty suppress a rebellion by Cossacks.*

*With Fire and Sword* is the first volume of Sienkiewicz's celebrated trilogy of life under the Polish Commonwealth of the seventeenth century. It opens almost in the midst of battle between the rebellious Cossacks of the Ukraine, in the southeasternmost reaches of Polish-ruled territory. Led by Bohdan Hmyelnitzki, the rebellious Cossacks press into the interior of the commonwealth from the wild lands on the border. Hmyelnitzki has allied himself with the foreign Tartars, which appalls Pan Yan, the Polish officer sent by Prince Yeremi to keep order. There are all sorts of shifts and maneuverings, along with murders, as the two sides sort themselves out. Hmyelnitzki first must get rid of some Cossack rivals, which he does by accusing them of traitorous association with a Polish spy. To a certain extent, Hmyelnitzki seems more concerned about internal rivals than the ostensible enemy.

Intertwined with the military adventure story is the story of Pan Yan's love for the princess Helen, a sweet and pure girl mistreated by her greedy relatives. Throughout the book Pan Yan is both trying to defeat the Cossack rebellion and get back together with Helen, who has fallen into Cossack hands. He has trouble doing this, however, because he himself is captured at one point and at another point is ill and exhausted, so it is his servant Jendzian and his friend Zagloba who rescue Helen.

Zagloba, who is often compared to William Shakespeare's lovable rogue Falstaff, is a celebrated character in the novel. Though given to drink and jocularly, he is serious when he needs to be.

Another popular character in the novel is the Lithuanian knight Longinus, who is comical in his self-imposed purity but also appealing and a good fighter.

After an army of the Polish Commonwealth is defeated by the Cossacks, much to the despair of

Pan Yan, who looks on helplessly as a prisoner of war during the graphically described battle, Prince Yeremi enters the fray, but even he is forced to retreat at first, and then he is kept from acting because the new leaders of the commonwealth decide to negotiate rather than fight.

While all this is going on, Pan Yan, now set free, searches for his beloved Helen, but never quite finds her; instead he hears various depressing rumors about her fate, including a false one that she is dead. In fact, she is still alive, imprisoned at first by a Cossack who wants her to marry him and then put in the custody of a witch and a dwarf, in a section of the novel with fairy-tale overtones.

Despite the desire of his government for negotiations, Prince Yeremi decides that the Cossacks must be crushed and so renews the war. The climax of the book is the siege of Zbarajh, which Pan Yan helps lift by slipping through enemy lines to bring help. The result is a crushing defeat of the Cossacks and a victory for the Polish Commonwealth.

## QUO VADIS

**First published:** 1895-1896, serial; 1896, book (English translation, 1896)

**Type of work:** Novel

*Early Christians struggle to survive in the Rome of Nero.*

*Quo Vadis* is a novel set in ancient Rome at the time of the Emperor Nero and the early Christians. The title, a quotation from the New Testament, is Latin for "where are you going?" and on the most literal level refers to the scene in which the Christian apostle Peter has to decide whether to stay in Rome or leave it. In the scene, Peter is on his way out of Rome when he is confronted by a passerby who asks him the question; Peter's response is that he is returning to Rome to make that city the Christian capital in accordance with visions he has seen.

On one level, this is a statement that the Christian church will find its center in Rome rather than in the Middle East, where Christianity originated. On another level, if the novel is in some way referring to the relationship between Poland and Russia in the nineteenth century, then the title question

can be seen as a question for Poland and its future. The scene with the “Quo vadis” question comes near the end of the novel and looks forward to the ultimate triumph of Christianity that the narrator discusses in the closing chapters.

The opening chapters of the novel place the reader in the very non-Christian milieu of Nero’s imperial court, with its orgies and spectacles. Christianity comes into the story because the young Roman officer Marcus Vinitius falls in love with a Christian girl named Ligia, the daughter of a foreign king defeated by Rome. Ligia is drawn to Vinitius but is put off by his crude advances and flees with the help of her strongman servant Ursus.

Both angry and love-sick, Vinitius enlists the help of his uncle Petronius, the arbiter of elegance at Nero’s court, and a Greek soothsayer, Chilo, to find Ligia, who has gone into hiding. Chilo is the one who discovers that Ligia is a Christian being harbored by fellow Christians. Vinitius goes to seize her with the help of a Roman gladiator, but Ursus kills the gladiator and wounds Vinitius, who ends up being nursed by the Christians.

Vinitius, a dedicated soldier and supporter of Rome, is astonished by what he learns about the Christians’ devotion to virtue, purity, and forgiveness. He thinks their approach to life is madness, and yet he is drawn to it as if by a magic spell. Eventually, he converts and is reunited with Ligia, their union blessed by the Christian leaders Peter and Paul, who reject the ascetic denunciation of love voiced by another Christian, Crispus.

Meanwhile Nero, who fancies himself an artist and who wants a spectacle about which to compose a grand poem, decides to set Rome on fire so that he can write about a devastated city. The idea of

Rome burning has been foreshadowed many times in the novel, and finally Nero does have the city put to the torch. When the populace reacts angrily to this destruction of their home, Nero puts the blame on the Christians, whom he has rounded up and sent to their death in the arena.

Ligia is one of the Christians rounded up, and Vinitius is in despair over losing her again, though he tries to follow the Christian teachings of acceptance and looks forward to seeing her in Heaven. When Ligia is sent into the arena, however, along with her servant Ursus, Ursus is able to kill the bull that would have killed them, and the audience roars its approval and insists on their going free.

They end up escaping to Sicily and living happily ever after, but the novel switches away from them at the end to depict the last days of Petronius, who has fallen out of favor at court and must die. Petronius never fully understood his nephew’s conversion to Christianity, but he did his best to help him and his new Christian friends, which is part of the reason he falls out of favor. Petronius comes across as a most sympathetic and appealing character, almost contradicting the novel’s apparent celebration of Christian purity because he is so appealingly impure and dedicated to immediate pleasure.

## SUMMARY

Henryk Sienkiewicz is very much a novelist of Polish nationalism. In his great trilogy, he conjures up the glories of the Polish past to comfort nineteenth century Poles, whose very country had disappeared. Even in *Quo Vadis*, his famous novel of ancient Rome, he seems to be writing about the Polish situation, with the repression of the Christians by the Roman empire representing the repression of nineteenth century Poles by the Russian empire. Sienkiewicz became world famous through his historical epics, being celebrated for his ability to intertwine military adventures with love stories, but his fame faded with the coming of the modernist movement.

Sheldon Goldfarb

## BIBLIOGRAPHY

### By the Author

#### LONG FICTION:

*Na marne*, 1872 (*In Vain*, 1899)

*Ogniem i mieczem*, 1883-1884 (serial), 1884 (book;  
*With Fire and Sword: An Historical Novel of Poland  
and Russia*, 1890)

*Potop*, 1884-1886 (serial), 1886 (book; *The Deluge:  
An Historical Novel of Poland, Sweden, and Russia*,  
1891)

*Pan Wołodyjowski*, 1887-1888 (serial), 1888 (book;  
*Pan Michael: An Historical Novel of Poland, the  
Ukraine, and Turkey*, 1893; also known *Fire in the  
Steppe*, 1992)

*Bez dogmatu*, 1889-1890 (serial), 1891 (book; *With-  
out Dogma*, 1893)

*Rodzina Połanieckich*, 1895 (*Children of the Soil*, 1895)

*Quo vadis*, 1895-1896 (serial), 1896 (book; *Quo Va-  
dis: A Narrative of the Time of Nero*, 1896)

*Krzyżacy*, 1900(serial), 1906 (book; *The Knights of the  
Cross*, 1900; also known as *The Teutonic Knights*,  
1943)

*Na polu chwały*, 1903-1905 (*On the Field of Glory*,  
1906)

*Wir*, 1908-1910 (serial), 1910 (book; *Whirlpools: A Novel of Modern Poland*, 1910)

*Dzieła*, 1948-1955 (60 volumes)

#### SHORT FICTION:

*Yanko the Musician, and Other Stories*, 1893 (includes “Yanko the Musician” and “The Lighthouse Keeper of Aspinwall”)

*Lillian Morris, and Other Stories*, 1894

*Hania*, 1897 (includes “Tartar Captivity” and “Charcoal Sketches”)

*For Daily Bread, and Other Stories*, 1898

*Let Us Follow Him, and Other Stories*, 1898

*Sielanka: A Forest Picture, and Other Stories*, 1898

*Life and Death, and Other Stories*, 1904

*Tales*, 1931

*Western Septet: Seven Stories of the American West*, 1973

*The Little Trilogy*, 1995

#### NONFICTION:

*Listy z podróży do Ameryki*, 1876-1878 (serial), 1896 (book; *Portrait of America: Letters*, 1959)

*Listy z Afryki*, 1891

#### CHILDREN’S LITERATURE:

*W pustyni i puszcz*, 1910 (serial), 1912 (book; *In Desert and Wilderness*, 1912)

## DISCUSSION TOPICS

- To what extent does Henryk Sienkiewicz sympathize with Petronius in *Quo Vadis*?
- To what extent are Sienkiewicz’s writings in the tradition of Polish positivism?
- Why does Sienkiewicz choose the troubled seventeenth century as the setting for his trilogy about the glories of the old Polish Commonwealth?
- Sienkiewicz’s novels have been dismissed as soap operas. To what extent is this a fair judgment?
- Discuss the parallels of ancient Rome with nineteenth century Poland in *Quo Vadis*.
- If Sienkiewicz is a supporter of the Christian virtues of forgiveness and turning the other cheek, why does he write so enthusiastically about military battles?

## GEORGES SIMENON

**Born:** Liège, Belgium

February 13, 1903

**Died:** Lausanne, Switzerland

September 4, 1989

*Belgian writer Simenon created French detective Jules Maigret, featuring the character in more than eighty novels. Using his own name and numerous pseudonyms, the prolific Simenon wrote more than four hundred novels and novellas and more than a thousand short stories.*

### BIOGRAPHY

George Joseph Chrétien Simenon (see-muh-NAWN) was a man ruled by his passions. Whatever he loved, he did to excess. This was true in both his professional and personal lives. Simenon was an able publicist for himself, and one of his passions was retelling tales of his own life. He wrote two autobiographical novels and four autobiographies. After his retirement in 1973, he stopped writing fiction to concentrate on his memoirs, of which he produced twenty-one volumes. For his biographers, the challenge was not too little information but too much, and much of the information provided, even from Simenon's own hand, was often contradictory.

One of the most prolific writers in the history of literature, Simenon kept to a rigorous creative schedule that would leave him nearly exhausted at the end of each work. Not only could he write a book in twelve days, he did this as his routine: seven days to write the book and five days to edit it. Typing in excess of eighty pages per day, Simenon would lock himself away in his study and produce several books each year. A legend grew around Simenon's writing speed. According to the legend, Simenon once contracted to write an entire novel while sealed in a glass case. No evidence exists that this really happened, but it was a commonly held belief. Any accounting of Simenon's work is based on estimates or best guesses. Having written in so many genres, using varied pseudonyms, and having written a prodigious amount of material make an exact count impossible. He wrote under such names as Bobette, Germain d'Antibes, Jacques

Dersonnes, Georges d'Isly, Luc Dorsan, Jean Dorsange, Jean Dossage, Jean du Perry, Georges Martin Georges, Gom Gut, Kim, La Deshabilleuse, Monsieur Le Coq, Plick et Plock, Georges Sim, Gaston Vialis, G. Violis, and Christian Brulls.

Simenon was born in Liège, Belgium, on February 13, 1903, the eldest of two sons born to Désiré and Henriette Simenon. Simenon's relationships with his father and mother were contrasting. While he adored his father, who often made allowances for Simenon's youthful indiscretions, his relationship with his mother was strained for his entire life. His mother made no secret that she preferred Simenon's younger brother, Christian, and she would not spend the money Simenon gave her when he was earning a fortune as the most widely published author in the world. When Simenon was fifteen, his father, an accountant, suffered a heart attack, and Simenon subsequently left school.

The following year, Simenon joined the newspaper *Gazette de Liège* as a reporter. He began associating with a group of young men who saw themselves as brilliant artists and thinkers. They called their group La Caque (The Cask), which was an appropriate name because they spent most of their free time drinking. Simenon was a fringe member of this group that was ultimately more renowned for its troublemaking than its genius.

It was through members of La Caque, however, that Simenon met Regine Renchon, the woman would become his first wife and the mother of his oldest son. Simenon called her Tigy, and he would refer to her by this name for the rest of his life. Simenon had an odd habit of changing the spell-

ing of the name or completely renaming the significant women in his life.

Early in his life, Simenon had wanted to join the priesthood, but at the age of twelve he had his first sexual encounter, with a girl of fifteen, and he developed an enormous sexual appetite. He was especially fond of prostitutes, once having traded his father's watch for sex with a black woman. It is impossible to discuss Simenon's work without mentioning his sex life. It was central to everything he did. Simenon once boasted of having had sex with more than ten thousand women, and he was known to need sex several times each day. His sexual partners would include his wives, his nurses, his maids, his cooks, his housekeepers, and, of course, countless prostitutes. No matter where he lived, it was said Simenon always knew the location of the nearest brothel. His wives accepted his unfaithfulness and in some cases encouraged it. Sex for Simenon was like any of his other passions, such as smoking, collecting pipes (he had hundreds of them), or changing his address.

He became engaged to Tigy in 1921. That was a very important year in Simenon's life: his beloved father died and his first novel, *Au Pont des Arches*, was published. Continuing to work in newspapers, writing under various pen names, Simenon began to distance himself from his past. One of Simenon's La Crique friends was Joseph Kleine, a drug addict and failed art student. Kleine committed suicide one night shortly after having talked with Simenon. Kleine's death, the death of Simenon's father the same year, and his strained relationship with his mother all contributed to his decision to finally leave Liège for Paris.

Though he sailed all over the world, lived in five different countries, and moved several times within France, Simenon was forever associated with Paris. After World War II, when Nazi collaborators were sought, Simenon struggled to protect his reputation with the French people. While it was true Simenon was popular during the Occupation and German filmmakers admired his novels, there was no evidence Simenon went out of his way to aid the Germans. Single-minded Simenon wanted most of all to be left alone with his family and his work.

Simenon moved his family to Canada in 1945. Denyse Ouimet (spelled "Denise" by Simenon) was hired as resident secretary. She soon became Sime-

non's mistress and eventually his second wife and mother to his three youngest children. The family soon left Canada, settling in Bradenton Beach, Florida. After a 1947 tour of Havana, the family settled in Arizona. Simenon's family life became complicated, living with his wife, his son, and two mistresses. After Denise became pregnant, Simenon married her and divorced Tigy on subsequent days in Reno, Nevada, in 1950. Denise and Simenon moved their home to Lakeville, Connecticut. Simenon lived in the United States for ten years, producing some of his best novels including, *Trois Chambres à Manhattan* (1946; *Three Beds in Manhattan*, 1964; also as *Three Bedrooms in Manhattan*, 2003), *La Neige était sale* (1948; *The Snow Was Black*, 1950; also as *The Stain in the Snow*, 1953; and *Dirty Snow*, 2003), and *Feux rouges* (1953; *The Hitchhiker*, 1955; also as *Red Lights*, 1975). Simenon considered becoming an American citizen, but he was discouraged by McCarthyism in the 1950's.

The Simenon family returned to Europe in 1955, first living in Cannes, France, and then settling in a castle near Lausanne, Switzerland. In 1961, Denise hired a new maid, Teresa Sburelin. She would become Simenon's mistress and his companion for the rest of his life. Denise and Simenon had three children: John, Marie-Jo, and Pierre. At Epalinges, in the Swiss Alps overlooking Lake Geneva, they built their dream home in December, 1963. Four months later, Denise left for a psychiatric clinic and never returned. In 1970, Marie-Jo suffered a nervous breakdown, and Simenon's mother died.

The last Maigret novel was written in early 1972, and Simenon moved to a small house with Teresa and Pierre. Simenon retired from writing fiction, spent the remainder of his life writing his memoirs, and rarely gave interviews. In 1978, Marie-Jo committed suicide in her Paris apartment. An autobiographical account of her personal struggles was published posthumously in tandem with her father's work, *Mémoires intimes* (1981; *Intimate Memoirs*, 1984).

Simenon died at age eighty-six at his home in Lausanne. His ashes were mixed with Marie-Jo's and spread in the family garden in the shade of Simenon's favorite tree. His surviving children were informed of his death by radio, after his cremation.

## ANALYSIS

Paris in the early 1920's was one of the world's cultural centers, the beacon for free thinkers, young artists, writers, and performers. It was inevitable that a man of Simenon's talents would be drawn to the City of Light. While working in Paris, writing under his favorite pseudonym, Georges Sim, he was repeatedly rejected by Colette, the noted French author and editor of *Le Matin*. After several unsuccessful attempts, she called him in for a consultation. She told him his writing was "much too literary." This criticism, along with his experience as a journalist, led Simenon to look at his work more critically and to pare his work so that every word of every sentence performed some necessary role. In 1923, Tigy and Simenon, then twenty, were married in Liège, and Simenon began to live solely on the money he made from writing.

Simenon had a torrid love affair with African American entertainer Josephine Baker, who epitomized Paris chic in the 1920's. This relationship proved too intense for Simenon, who grew jealous of Baker's attention to other men. To escape the affair, Simenon set sail with Tigy and her maid, Henriette Liberge, who was called Boule by Simenon. Sailing on canals in France and Belgium aboard their ship *The Ostrogoth*, the many towns and cities they visited provided background and all-important atmosphere in Simenon's later novels.

Simenon's novels are usually thought of as two different brands, one named for himself, or Simenons, and the other for his most famous creation, or Maigrets. The Simenon brand is a psychological novel, usually dark in atmosphere. The Maigret brand is more formulaic, but, like the Simenons, also tightly written. The character of Inspector Jules Maigret is diametrically opposed to his author. Maigret is reliable, faithful, patient, and a steady influence. Both author and detective, however, do share a fondness for pipes. Maigret seeks to understand the criminal mind, not to judge it. He does not work by clues so much as by intuition. In a Maigret novel the lines dividing good and bad are blurred. Moral values are unassigned, and the books end with the perpetrator being brought to justice, but one feels sorry for the criminal because his motivations have been laid bare by the author

and noted and then analyzed by Inspector Maigret.

Simenon's first Maigret novel, the first novel to be published under his own name, *Pietr-le-Letton* (1931; *The Strange Case of Peter the Lett*, 1933; also known as *Maigret and the Enigmatic Lett*, 1963), was published in 1931. Like Dorothy L. Sayers or Sir Arthur Conan Doyle, Simenon had a love-hate relationship with his detective character. Simenon would stop the detective series and swear to never write another title, only to resume after several years. Like Sayers and Doyle, Maigret thought he had better books to write. The *roman policiers* (police novels) paid the writer's bills. Simenon had extravagant tastes, wives, family, and mistresses to support. The last forty years of his writing career were spent jumping back and forth between the detective novels and the serious novels he preferred to write.

The *roman durs* (hard novels) were built on atmosphere, terse dialog, little scenery, dark themes, and sympathetic characters with minor flaws that became major problems when exposed to the proper circumstances. Simenon always pushed his characters from behind, a little at a time, until the crises they faced were fully revealed to both them and the reader and their fates unmistakable to both as well.

As a writer, Simenon was respected in his lifetime. André Gide considered Simenon one of the greatest of French writers and maintained years of correspondence, mostly about Simenon's writing methods. In 1937, Simenon announced to the world that he would win the Nobel Prize in Literature within ten years. Sadly, he never did win the prize. He sat by and watched as lesser writers won distinction. Critics waited for a major opus, a large work that would serve as a capstone to Simenon's career. It never came. Simenon once said that all of his smaller novels should be viewed together as one work. It was unknown whether Simenon's lifestyle, his brashness, his brevity, or his prolific output prevented him from winning greater acclaim, but he was admired and respected by other writers. Simenon himself admired Ernest Hemingway, Dashiell Hammett, and James M. Cain. One can see his influence on their work and their influence on his work.

## THREE BEDROOMS IN MANHATTAN

**First published:** *Trois Chambres à Manhattan*, 1946 (English translation, 2003; also as *Three Beds in Manhattan*, 1964)

**Type of work:** Novel

*A lonely man and woman without direction find each other in New York City and experience the intensity and uncertainty of new love.*

*Three Bedrooms in Manhattan* is semiautobiographical, based on Simenon's meeting with his second wife, Denise Ouimet. In Simenon's role is French actor François Combe, a man jilted by his more-famous French actress wife. He has come to New York to escape his demons, not to mention his former wife, her younger lover, and the French press.

Combe has been in the city for several weeks, moving into a series of more decrepit apartments. He is ashamed to have anyone see his latest residence. He walks into a neighborhood bar late one night to escape the squalor. Sitting at the bar is a fairly attractive woman, and she strikes up a conversation with Combe. Her name is Katherine, but Combe likes to call her Kay.

Simenon describes the chance encounter of two desperately lonely people. As Kay is perched on her barstool, temporarily homeless, she tells herself that she will become attached to the next man she meets. She meets Combe. Meanwhile, Combe tells himself that he is just visiting New York, and he can go home and resume his career any time he wants. He spends his days drinking and carousing with his fellow French show business expatriates. Combe is more than fifty years old now and unbelievable in leading man roles. He is reduced to walk-on character parts requiring a middle-aged Frenchman. Kay calls him Frank.

Their first night together resembles a forced march through a desert; the hot, unforgiving desert is replaced by the cold night and the equally unforgiving city streets. They latch on to each other like two people who are drowning, each hoping the other knows how to swim. Clinging to each other, they walk and walk, stop for a drink, play a tune on the jukebox, and repeat the process over

and over until the sun comes up and exhaustion claims them.

Since she has no home and he is ashamed of his, they find a seedy hotel. It is their first bedroom in Manhattan. After passionate love making, they fall asleep as the city awakens to start the day.

After the initial thrill of the physical encounter, Kay and Frank speed through the early stages of romance. Frank is the more emotionally damaged of the two. He is tormented by his failed marriage, and he is deeply paranoid and distrustful of Kay. He imagines her past dalliances, and they haunt him. His jealousy is wild and threatens to destroy their relationship before it has a chance to grow.

After only two days, Frank realizes that Kay loves him. In a few short days, Frank and Kay go through all the stages of young love: blind romance, all-consuming physical fire, and hopeless addiction to each other. Frank can not stand to be away from her. He is afraid to leave her alone, afraid he will return to find her gone.

As they begin to settle into a routine in his apartment, Kay receives word that her only child, her daughter, is gravely ill in Mexico. She must be with her. Frank realizes she must go, and he grudgingly takes her to the airport, and with fear he watches her walk away. As the days pass without her, his doubts return with a vengeance. He spends the aching hours alone, and he begins to revert to his life before Kay, drinking heavily and carousing with theater friends.

While with his friends, he talks of nothing but Kay, and a pretty young woman listens intently. Her name is June. Still professing his great love for Kay, he takes June to his and Kay's bedroom. They make love, and the next morning while still lying in bed together, the telephone rings. It is Kay. She is on her way home. She hears something in Frank's voice and asks him what is wrong. He tells Kay nothing that he should. June leaves, and Frank decides to tell Kay everything.

Frank takes Kay directly from the airport back to

the diner where they first met. They walk and they drink much as they did that first night, and they finally arrive at the apartment, and he has not cleaned up the mess. Everything is just as he and June left it, as if to say, "Here is what I have done. Deal with it."

Kay deals with it. It is at this moment that Frank says to Kay what he has never said: He loves her. He says it, and he means it. Through the night, they stay in the apartment, though not on the bed. They leave first thing the next morning, closing the door behind them.

## DIRTY SNOW

**First published:** *La Neige était sale*, 1948  
(English translation, 2003; also translated as *The Snow Was Black*, 1950, and *The Stain in the Snow*, 1953)

**Type of work:** Novel

*In an occupied country lawlessness prevails, and one disturbed young man searches for his own humanity while struggling to understand the essence of decency.*

Frank Friedmaier is a young man who lives on the third floor of a tenement in an unnamed city under foreign occupation. Frank shares his apartment with his mother, Lotte, who runs a brothel, and various prostitutes in her employ. Frank is a pimp, and he is the antihero of *Dirty Snow*, a novel often critically acclaimed as Simenon's greatest work.

Almost all of Simenon's novels are studies of a single character. Simenon explores the world through Frank's sociopathic perception. Early in the novel, Frank kills a man he does not like but hardly knows in order to impress other men he hardly knows who do not like Frank. Law has been replaced by a perverted state of nature, dividing citizens into two camps: those who quietly endure or secretly resist the occupation, or those, like Frank and his mother, who cater to the occupiers.

Frank's great obsession is his neighbor, Gerhardt Holst, and Holst's virgin daughter, Sissy. Sissy is infatuated with Frank, and Frank abuses Sissy's affection in order to capture her father's attention.

Holst represents dignity and decency and paternal discipline, qualities Frank has never experienced but seeks to understand.

One of the key events in the novel is when Frank leads Sissy to what she believes will be her first sexual experience, but Frank substitutes his friend, Fred Kromer, for himself, and Kromer rapes Sissy while Frank listens at the door. Frank wants to be recognized, to get attention for his awful deeds, and especially to force Holst to deal with him as a person. However, Holst continues to ignore him, even as Sissy suffers a nervous breakdown and a lengthy illness.

Defying authority, Frank yearns to be arrested, to undergo correction. Frank wants discipline, a father figure. One day, with no warning or any resistance on Frank's part, he is arrested. His crime, one he is unaware of committing, is possessing stolen currency.

Frank languishes in prison, and every morning a group of prisoners is marched into the courtyard and executed. He is treated like an animal, isolated from the other prisoners, tormented by his interrogator, a man Frank thinks of as "the old gentleman."

Months pass, and Frank's mother and her prostitutes come to visit. Frank is questioned routinely in long sessions with "the old gentleman" punctuated by beatings. Finally, Holst and Sissy come to visit him. In Frank's tired, twisted mind this visit vindicates his existence, provides him with redemption. Holst finally recognizes Frank's existence, and Frank finally surrenders his will. He confesses everything. He only wants to die at a place and time of his captor's choosing. One rainy morning, at long last, he joins a line of prisoners and is taken out into the yard and shot.

This sobering book is Simenon's war novel, though written in 1948 in the comfort of the United States. Simenon did not abandon France during the Occupation, but Simenon was not French, and the occupation he writes of is not based on the occupation of France in World War II but is based more on the occupation of Simenon's home country of Belgium during World War I.

The occupation Simenon knew best was that of Liège, when, as a boy, he learned that everyone cheated the system in order to survive. Simenon believed that a man learned most of what he needed to know by the age of eighteen, and if he

had not learned a lesson by then, he probably was not going to learn. *Dirty Snow* represents what Simenon learned, as a youth, of enemy occupation.

## RED LIGHTS

**First published:** *Feux rouges*, 1953 (English translation, 1975; also as *The Hitchhiker*, 1955)

**Type of work:** Novel

*An alcoholic husband and his long-suffering wife, caught in a loveless marriage, survive a crisis that pulls them together.*

Steve Hogan and his wife Nancy are traveling by car from their Long Island home to pick up their kids from a summer camp in Maine. The annual trip brings heavy traffic over the weekend, when city dwellers escape to the country. *Red Lights* portrays the mundane that has turned dangerous, the worst-case scenario brought to reality.

Steve has not admitted his alcoholism to himself or to anyone else. Like many of Simenon's characters, Steve is dancing on the rim of the abyss, one misstep away from disaster. Simenon gives Steve that little push, not even a shove, closer to a nudge, but it is just enough.

Steve is in denial about his drinking and about his marriage. Steve and Nancy's marriage is in trouble. They seldom even speak to each other, living their lives in separate orbits.

During the long car trip, Steve and Nancy are left no choice but to interact. Steve is a weak man, and the strain proves too much. He fortified himself with a stiff drink on the way home before leaving for the trip, and he had another drink at dinner, and he needs a third drink instead of just wanting it. A few hours into the trip, city traffic behind them, Steve makes his first tavern stop. Nancy waits in the car.

Another few hours of driving and Steve gets the urge to stop again for another drink. His drinking becomes the topic of conversation between them. If he stops again, Nancy says, she will go on without him. He will have to find his own way to Maine. Steve, asserting his manhood, is in the mood to show Nancy who is boss. He stops at another tavern, and he takes the keys with him.

While sitting at the bar, Steve begins to contemplate the meaning of manhood. What makes a real man? Steadily advancing into a stupor, Steve strikes up a conversation with the strange man who sits down by him at the bar. The radio in the bar plays in the background, and a story about an escaped convict from Sing Sing Prison has the barflies talking. As time passes, Steve begins to imagine that the man sitting next to him is the escaped convict. The man quietly leaves the bar. Steve thinks this stranger, this escaped convict, is a real man.

Enough time has passed, and Steve thinks Nancy will have learned her lesson. He staggers out to the car, gets behind the wheel, and finds Nancy gone. The note that she left says she has walked to the bus depot. In her place is the stranger from the bar. Steve is right; the stranger is the escaped convict.

The convict is Sid Halligan. He has a gun and persuades Steve to drive. It does not bother Steve's conscience to drive. He thinks Nancy will be fine. As Steve drives on through the night, harboring the criminal in his car, avoiding police roadblocks, he wishes that he had Halligan's nerve. Steve wishes that he were more of a man, more like Halligan.

Steve drives off the road, waking Halligan. The car has a punctured tire, and Steve is without a spare. Steve passes out by the side of the road, and morning finds him alone with his wallet missing.

With the few bills he has left in his shirt pocket, Steve slowly begins to pull himself together. He calls Maine, but Nancy is not there. Steve walks to a roadside diner. He looks and smells like he has been drinking all night. He attempts breakfast.

As he picks at his food and wonders about Nancy's whereabouts, the locals discuss a "mystery woman" found along the side of the highway last night. Steve's ears perk up when the description matches Nancy. Panicked, Steve calls the local hospitals until he finds the right one. He has his car repaired and finds his way to Nancy's bedside at a hospital in a small Massachusetts seaside town.

Nancy does not want to speak to him. She might be afraid of him or ashamed of herself. Steve does not understand, at first, what has really happened to Nancy. The police spell it out for him. She was raped by Halligan. Nancy blames herself for leaving Steve, and Steve blames his drinking. With help from the police, Steve cleans himself up and begins

to act responsibly. Meanwhile, Halligan is finally captured and positively identified by both Nancy and Steve.

As the novel concludes, Nancy believes their marriage had been a happy one but it will never survive this crisis. Steve believes their marriage can survive but that their marriage had not been a happy one for many years. Steve and Nancy come to terms and agree to stay married. They will go on with the kids and with each other, but the future will be different. Steve will stop drinking, and he and Nancy and their family will face life honestly and without fear.

### SUMMARY

The two brands of Georges Simenon novels—the Maigret novels, or *roman policiers* (police novels), and the Simenon novels, or *roman durs* (hard novels)—have some important similarities. Both benefit from tight writing, a stingy use of vocabu-

lary, and a complete lack of extraneous or superfluous detail, and they all explore the human character. The human character in Simenon is most often represented by one person, and that one person is trapped in a predicament of his own making. Simenon pushes the character to his breaking point, testing his mettle.

In *Three Bedrooms in Manhattan*, *Dirty Snow*, and *Red Lights*, each man experiences desperation. Each man is desperate to resolve inner conflict, whether it is an inability to love, a lack of humanity, or a refusal to recognize one's own faults. Simenon pushes each man to the abyss of personal crisis, prodding him with truth until the man either plunges to his fate or steps back from the brink of disaster to commence his salvation. The purpose of this exercise, repeated in each novel, is always to understand and never to judge.

Randy L. Abbott

*Le Train*, 1961 (*The Train*, 1964)

## DISCUSSION TOPICS

- How does Frank's self-imposed exile in *Three Bedrooms in Manhattan* compare to Georges Simenon's own self-imposed exile in the United States?
- How might Simenon's relationship with his mother have influenced his behavior with other women?
- Does Simenon's writing style, fast and brief, prevent him from receiving more serious consideration as a writer of literature?
- In *Dirty Snow*, what does Frank Friedmaier's experience with foreign occupation say about Simenon's opinions of having endured life in both occupied Belgium and France?
- What does Simenon's aim in writing fiction—to understand and not to judge—suggest about Simenon's own life?
- In *Red Lights*, how does Steve and Nancy's inability to communicate with each other contribute to the crisis they experience?

*Maigret et le voleur paresseux*, 1961 (*Maigret and the Lazy Burglar*, 1963)  
*La Porte*, 1962 (*The Door*, 1964)

## ISAAC BASHEVIS SINGER

**Born:** Leoncin, Poland

July 14 or November 21, 1904

**Died:** Surfside, Florida

July 24, 1991

*Generally considered the outstanding Yiddish fiction writer of the twentieth century, Nobel laureate Singer immortalized a vanishing way of life.*

### BIOGRAPHY

Isaac Bashevis Singer was born on either July 14 or November 21, 1904. Although his birth was recorded in nearby Radzymin, his actual birthplace was Leoncin, Poland, a village near Warsaw. Isaac's mother was Bathsheba Zylberman Singer, the daughter of the Orthodox rabbi of Bilgoray. His father, Pinchas Mendel Singer, was the Hasidic rabbi of Leoncin. Isaac had an older sister, Hinde Esther Singer, and an older brother, Israel Joshua Singer. Two years after Isaac's birth, Bathsheba had another boy, Moishe. After Pinchas Mendel Singer had lived in Leoncin for ten years, he and his family moved to Radzymin, where the rabbi was supposed to direct a yeshiva, or talmudic college. There seemed to be no provision for a salary, however, and financially desperate, in 1908 the family moved to Krochmalna Street in Warsaw, where Pinchas Mendel made a meager living from fees earned as judge of an ecclesiastical court.

Even as a young child, Singer was already asking questions about the meaning of life and joining in the family discussions about theology, morality, and politics. In his home, Singer encountered very different viewpoints. His father was scholarly and mystical; his mother, practical and rational. His brother Israel Joshua was a rationalist and, eventually, a socialist and a Zionist, who at twenty-one left home to live a bohemian lifestyle and write secular fiction.

In 1917, when he was fourteen, Singer went to Bilgoray for a visit with his grandparents and remained there for four crucial years. During this time, he was not only observing life in a village that had remained essentially unchanged for centuries, but he was also reading non-Jewish philosophy, science, and literature, and thus venturing out of the restricted environment in which he had been reared. Thus, at the same time he was absorbing the traditions of his people and moving away from them. His family, however, still expected him to become a rabbi. In 1921, he was sent to the Tachkemoni Rabbinical Seminary in Warsaw, but after a year of miserable poverty and intellectual boredom, he left. In 1923, Singer began working for a literary magazine; he supported himself by proof-reading and translating and, like his brother, worked at his writing.

Both Israel and Isaac had chosen to write in Yiddish. As for genre, the first works by Isaac to be published were short stories, while Israel was producing novels. Israel's second novel sold so well in the United States that in 1934 he decided to move to New York.

With Adolf Hitler consolidating his power day by day and intensifying his campaign of hatred for the Jews, Isaac, too, decided to leave Poland for good. There was nothing to hold him there. His common-law wife, Runya, a Communist, had left him to go to Russia, taking their little son, Israel, with her; she was never to return but would rear her child in Israel. Singer's novel *Der Sotn in Gorey* (1935; *Satan in Goray*, 1955) had met with a lukewarm reception. Furthermore, he missed his older

brother, who was his closest friend and his mentor. In 1935, Singer left Poland forever.

During his first ten years in New York, however, Singer had great difficulty writing. There are several possible explanations for his creative block: his discovery that Yiddish, in which he was writing, seemed to be a language whose readership was disappearing; his concern about his family in Poland; and perhaps even feelings of inadequacy because his brother was now famous under the name of I. J. Singer. At any rate, although he was a regular contributor to the *Jewish Daily Forward*, Isaac seemed unable to write any publishable fiction for five years. Then, in 1940, he married an immigrant from Germany, Alma Haimann Wassermann. Perhaps his marriage helped him to emerge from his depression; perhaps he was becoming adjusted to his new home. Whatever the cause, he began to write short stories. Even after his brother died unexpectedly in 1944, leaving him bereft, Singer continued his writing. The following year, his novel *Di Familye Mushkat* (1950; *The Family Moskat*, 1950) began to appear serially in the *Jewish Daily Forward*. In 1950, as *The Family Moskat*, it was the first of Singer's novels to be published in English. The sales figures made it clear to Singer that his financial success would depend not on Yiddish publication but on translations from the Yiddish. From that time forward, Singer worked very closely with his translators, including Joseph Singer, the son of I. J. Singer, who was responsible for the English versions of many of his works, and his own son from his first marriage, Israel Zamir, who produced Hebrew versions of Singer's short stories.

The next two decades were very productive. Singer's first collection of short stories in translation, *Gimpel the Fool, and Other Stories*, appeared in 1957. Furthermore, as they would throughout his life, his novels continued to appear as serials in the *Jewish Daily Forward*, written in Yiddish and later translated into English. They included the family epic *Der Hoyf* (1953-1955; *The Manor*, 1967, and *The Estate*, 1969). Singer was also writing books for children, including *A Day of Pleasure: Stories of a Boy Growing Up in Warsaw* (1969), which won a National Book Award the following year.

During the 1970's, Singer continued to work in a variety of genres. His short-story collection, *A Crown of Feathers, and Other Stories* (1973) won another National Book Award. Two autobiographical

volumes, *A Little Boy in Search of God: Mysticism in a Personal Light* (1976) and *A Young Man in Search of Love* (1978), received high praise from critics. Singer also turned to drama. A number of his short stories were made into plays, including *Yentl, the Yeshiva Boy*, which was produced on Broadway in 1974, then filmed as *Yentl* in 1983. The 1989 film adaptation of *Enemies: A Love Story* (1972), originally published in Yiddish as *Sonim, de Geshichte fun a Liebe* (1966), received two Academy Award nominations, one for best actress and the other for best screenplay.

In 1978, Singer received the Nobel Prize in Literature. The citation praised him for his art in narrative and noted that although the background of his works was the Polish-Jewish tradition, they revealed the human condition, which transcends cultural barriers. In his acceptance speech, Singer commented on the values that he had learned from the humble people whom he had known in childhood, who spoke in a vanishing tongue, the language of a people in exile.

In the final decade of his life, Singer published one of his least successful novels, *Der Bal-Tshuve* (1974; *The Penitent*, 1983), which lacked the humor and the complexity of his earlier works. Many critics believe that his real masterpiece is *The Collected Stories of Isaac Bashevis Singer* (1982). After a series of strokes, Singer died in Surfside, Florida, on July 24, 1991.

## ANALYSIS

The world of Singer is an extremely limited one. Almost without exception, his characters are Eastern European Jews or Jewish residents of the United States who emigrated from Eastern Europe. All of his settings are Jewish communities, whether they are the little Polish villages, where so many of his short stories take place, the Jewish ghetto in Warsaw, a Jewish section of New York City or of Miami Beach, or the Jewish homeland, Israel.

Even though Singer's characters and his settings are limited, his novels may be placed three hundred years back in time or set in the present. *Satan in Goray* and *Der Knekht* (1961; *The Slave*, 1962) both take place in Poland in the middle of the seventeenth century, when Bogdan Khmelnytsky and his Cossacks were committing the most barbaric atrocities and destroying whole Jewish villages. *The Manor* is set in the latter half of the nineteenth cen-

tury; *Der Kuntsnmakher fun Lublin* (1958-1959; *The Magician of Lublin*, 1960), at the end of the nineteenth and beginning of the twentieth century; and *The Family Moskat*, in the first half of the twentieth century, ending with the Nazi occupation of Warsaw. At the beginning of *The Penitent*, Singer indicates that he is quoting a story told to him in 1969.

The historical setting of the novels is important because they are realistic works. It is difficult, however, to date many of Singer's stories. This timeless quality results from their setting, the little Jewish villages of Eastern Europe, where life remained relatively unchanged for centuries, and from their folkloric content; the demons in these stories might be playing their tricks two hundred years into the past or during the years of Singer's own childhood. On the other hand, those stories that deal with the breakup of the traditional society, with Jews lost in non-Jewish Warsaw or lost in America, before and after the Holocaust, are tied to their particular time in history.

As a whole, Singer's fiction shows his preoccupation with the loss of an old way of thinking, feeling, and believing, which resulted both from the seductive appeal of the modern world and from the Nazis' annihilation of millions of those who adhered to the tradition. The uncertainties and the disagreements of critics, as they attempt to define Singer's attitude toward traditional Judaism, seem to reflect the author's own vacillations and uncertainties.

For example, *The Penitent* is a brief, seemingly simple novel. At the Wailing Wall in Jerusalem, Joseph Shapiro, an American, approaches Isaac Bashevis Singer, whose disciple Shapiro had been in New York, reading all of his books and faithfully attending his lectures. They arrange to meet, and the rest of the book is Shapiro's account of his disillusionment with modern life and his return to traditional Judaism, which, ironically, includes his abandoning the reading of secular books such as Singer's.

*The Penitent* was serialized in Yiddish in 1974. Nine years later, when it was published in translation, Singer appended a note, insisting that while he believes in God, he cannot see His mercy in the world that He created, and that while he agrees with Shapiro's diagnosis of the sickness of modern humanity, he does not believe that he or anyone

else can escape temptation simply by immersing himself in orthodoxy. Even after reading this note, Singer's critics were uncertain to what degree the anger in Shapiro, which Singer had noted, was really the anger of the author himself. Therefore, some of them considered the book his worst, a mere diatribe, while others thought it to be a deliberately constructed masterpiece of irony.

This kind of confusion may be explained by Singer's ability to hold a number of opposing convictions at any given time. Therefore, his readers find it almost impossible to persuade themselves that Singer is in sympathy with whatever position they hold. Those who have embraced the modern world are troubled by Singer's disgust with it and by his advocacy of traditional restraints, as well as by his mysticism; on the other hand, those who advocate a return to orthodoxy are shocked by his attitude toward sex, which Singer seems to consider a joyful, rather than an evil, experience, and by the impish humor that tends to overcome him at the most serious moments.

As Sarah Blacher Cohen pointed out, the play *Yentl*, which was developed from one of Singer's short stories, illustrates his habit of showing both sides of an issue at the same time in order to point out that whatever choice a human being makes will have disadvantages and may even lead to disaster. *Yentl* is a young girl in a nineteenth century Polish village who wishes to know as much as she can about her faith. Unfortunately, she lives in a society that bars women from theological studies. Therefore, because of her devotion to her God, *Yentl* commits a sin: She rejects her own female identity, disguises herself as a man, and enters a yeshiva. Then, when she falls in love with another student, Avigdor, she cannot admit her femininity. In fact, she actually marries a woman, thus committing another sin. At the end of the play, *Yentl* has lost Avigdor to her own unlawful wife, and she must leave the community, probably once again to study in the disguise of a man, thus sinfully rejecting her own sex forever.

Singer is obviously sympathetic to *Yentl*'s problems, which, after all, arise from her desire to serve God, rather than from any intent to defy Him. On the other hand, Singer does not justify *Yentl*'s action. As a traditionalist, he clearly feels that, by denying her womanly desire to marry and have children, as well as by engaging in deliberate deceit,

Yentl has made a wrong choice. Perhaps, as Cohen suggests, it is God who must be indicted for somehow making a mistake, putting a man's soul into a woman's body. To question God's decisions, as Singer frequently does in his works, is as traditional as the Torah itself. Yet though he himself broke from his orthodox background, Singer expresses his uneasiness about abandoning the old customs by emphasizing the sense of alienation felt by all individuals in his fiction who similarly abandon their ancient customs. Even though he cannot go back in time, as Shapiro is attempting to do, it is clear that Singer identifies Shapiro's problem as his own and as the problem of every Jew in the modern world.

## THE SLAVE

**First published:** *Der Knecht*, 1961 (English translation, 1962)

**Type of work:** Novel

*Although love causes a Jewish man to reject the laws of his people, that love also brings him to even more profound devotion.*

On the most superficial level, *The Slave* is simply a historical novel, set in the seventeenth century, about a Jewish man, Jacob of Josefov, who, at a time when many Jews were being massacred, was fortunate enough simply to have been captured by robbers and sold to a farmer, Jan Bzik, in a remote area of Poland. There are, however, many kinds of slavery described in the book. If at first Jacob is enslaved by the Poles, later he is the slave of lust and then a slave of the prejudice both of the Christians and of his Jewish brothers.

*The Slave* is also the story of alienation. Because he is a faithful Jew, Jacob is an alien among the Christians; however, because of his forbidden love for a non-Jewish woman and his deepening religious awareness, he is also an alien among his own people. Singer's choice of his protagonist's name underlines the importance of the theme of alienation. After the biblical Jacob's lost son, Joseph, rose from the depths of slavery to become the pharaoh's adviser, it was Jacob who moved his family to alien Egypt.

*The Slave* is divided into three parts. In the first

part, Jacob is desperately trying to keep his religious laws among debased and violent peasants who, though they think of themselves as Christians, are actually primitive pagans, governed by no moral law. When Jacob attempts to keep himself physically clean, when in obedience to his dietary laws he refuses to eat their nonkosher meat, and, above all, when he avoids taking part in their drunken debauches and sexual orgies—in other words, when he emphasizes his otherness—most of the peasants become distrustful and angry. Only the protection of Jan Bzik and the sympathy of his daughter, Wanda Bzik, keep Jacob from being killed. Yet even Wanda, who aids Jacob in his religious observances, cannot understand why, although he will sleep with her, he refuses to marry her. She is so deeply in love with Jacob that she offers to take his faith, even though by doing so she would risk her death, as well as his. Then emissaries from a Jewish community arrive with ransom money, and Jacob leaves.

After he has settled in the village of Pilitz, Jacob finds that he cannot get along without Wanda. His feeling for her is more than lust; it is love. Therefore, despite the danger, Jacob risks his life to bring her out of the mountains. Wanda has no problem about becoming Jewish. Neither the Christians in the area nor the Jews of Pilitz, however, must know that Wanda was a Polish Christian. Therefore, Jacob and Sarah, as she is now named, decide that she will pretend to be a mute, because by speaking she could easily expose her own background. For a time, their deception is successful. She is accepted as “dumb Sarah.” When Sarah goes into labor, however, she calls out in Polish, thus betraying the fact that she is not Jewish. Shocked, as well as fearful of Christian retribution, the village immediately treats her as an outcast, refusing to feed her or to help her in any way. After she dies in childbirth, Jacob flees with the newborn baby, whom he has named Benjamin, after the youngest son of the biblical Jacob, whose mother also died at his birth.

In the final section of the novel, which takes place twenty years later, Jacob returns to Pilitz, planning to find Sarah's body and to take it back with him for final burial in Israel, where Jacob now lives and where Benjamin is a lecturer in a yeshiva. Over the years, Jacob has grown spiritually, inspired by the example of Sarah, who was more devoutly Jewish than the people who scorned her. Ja-

cob, however, is not able to take her to Israel. In Pilitz, he becomes ill and dies. While he is being buried in the Jewish cemetery, the grave diggers find Sarah's body, which had supposedly been buried outside holy ground. They realize that when the cemetery was expanded, her burial place had been included, perhaps accidentally, but more likely as an indication of the judgment of Providence. Husband and wife are buried together, accepted and honored at last.

### ENEMIES: A LOVE STORY

**First published:** *Sonim, de Geshichte fun a Liebe*, 1966, in *Jewish Daily Forward* (English translation, 1972)

**Type of work:** Novel

*Jewish survivors of the Holocaust who have made their way to New York City find that they cannot escape the past.*

With *Enemies: A Love Story*, Singer entered a new phase in his literary career. This was the first of his novels to use the United States as its setting and also the first in which almost all of the characters were Holocaust survivors. Of all his novels, *Enemies* is probably the most complex, at least where tone is concerned. On one hand, his survivors are so haunted by their memories of the death camps, so tormented by guilt because they survived, and so tortured by their loss of faith, that they seem more dead than alive. This is the stuff of tragedy.

At the same time, *Enemies* has all the elements of a classical farce. The characters engage in self-dramatization and verbal exaggeration. They shout and throw things. Moreover, the central character, Herman Broder, is a trickster like the scheming servants in the witty plays of the English Restoration period. Because Broder has very little control over his life, he achieves his goals through trickery. He invents elaborate falsehoods in order to conceal his actions from his employer, his girl friend, his mistress, and his wife, even from casual acquaintances. As his affairs become more and more tangled and his lies more and more complex, the pace of the novel becomes increasingly hectic until the inevitable happens: Broder's victims meet, com-

pare notes, confront him, and combine against him.

The most accurate classification of *Enemies* would be as a tragicomedy. Though he does contribute to his own downfall, Broder lacks the stature of a tragic hero. However, he is a man to be pitied. He still has nightmares about the Holocaust, which deprived him of his entire family, including his wife and his children. He is not an ingrate; he has not forgotten that he was saved by the family's Polish maid Yadwiga, who hid him in a hayloft. After liberation, Broder married her in a civil ceremony and brought her to the United States, where she keeps his apartment immaculate, cooks his favorite foods, and displays her love for him in every way she can. Broder supports the household by ghostwriting speeches and articles for a nearby rabbi, who is too busy making profitable public appearances to do his own work. Broder, too, is living a lie: He pretends to Yadwiga that he is a book salesman, who is expected to make frequent business trips; in fact, when he is supposed to be in Philadelphia, he is in bed with his tempestuous mistress Masha, another Holocaust survivor. Having obtained a divorce from her husband, Masha wants Broder to abandon Yadwiga and marry her. However, her hopes are dashed by the reappearance of Broder's supposedly dead wife, Tamara. Broder now has three women to deal with, two of whom insist that they are pregnant. The novel ends with two deaths, a birth, and the disappearance of the man who found that lovers could indeed end up as enemies.

### SHOSHA

**First published:** *Neshome Eksameditseyes*, 1974 (English translation, 1978)

**Type of work:** Novel

*In Warsaw, during the period of Hitler's rise, a young Jewish writer searches for love and meaning.*

*Shosha* is a realistic novel that is undisguisedly based on Singer's own life. The protagonist, Aaron Greidinger, is the son of a rabbi. Aaron's younger brother is named Moishe. The family even lives

first at the actual address of the Singer family in Warsaw, number 10 Krochmalna Street, then later in rural Galicia. Like Singer, Aaron is an aspiring writer. He moves to Warsaw, becomes a proof-reader and translator, and becomes involved with a Communist girl. In the 1930's, like all the other Jews in Poland, he is living from day to day, waiting for Adolf Hitler's invasion and probably for death.

There are, however, important differences between Singer's life and that of Aaron. Perhaps the most crucial difference is that, in the novel there is

no older brother to guide Aaron, to help him in his career, and eventually to make it possible for him to escape to America. In contrast, Aaron must rely on friends and lovers for affection, for companionship, and for encouragement. *Shosha* is really the story of how Aaron's life and thought were influenced by his relationships with five women and one man.

The man is Dr. Morris Feitelzohn, a philosopher without a university, a nonstop talker with encyclopedic knowledge, and a noted lover of women, whom Aaron meets at the center of bohemian life in Warsaw, the Writers' Club. Aaron's discussions with Dr. Feitelzohn, who has an opinion on every subject, force the young man to think deeply. Furthermore, although Dr. Feitelzohn has no money and even borrows from the impecunious Aaron, he knows everyone. Several of his friends have an important influence on Aaron's future.

One of these friends is Celia Chentshiner, the wife of a wealthy man who encourages her extramarital affairs as long as she continues to mother him. Aaron soon discovers that Celia's only real interests in life are erotic. Even her passion for literature and the arts is based on the fact that cultural conversations with gifted men such as Dr. Feitelzohn and Aaron stimulate her sexually. Celia's affairs with them and with others, however, are in actuality an attempt to conquer boredom. Like many of Singer's characters, she is alienated from her tra-

ditions and unable to find anything to replace them.

Another of Dr. Feitelzohn's friends is Sam Dreiman, a wealthy American, whose mistress, Betty Slonim, is an actress. Unlike Celia, Betty is interested in men primarily so that she can advance her career in the theater. Encouraged by Betty, Sam becomes interested in a story that Aaron intends to write and pays him to write it as a play, with Betty in the starring role. The advance solves Aaron's financial problems; however, the play is no good, partly because Aaron has had to change it radically in order to please Betty, and partly because he has spent so much time with women, including Betty, that he has not really done it justice.

Another of the women who is important in Aaron's life is Dora Stolnitz, a fanatical Communist. Even though his mind tells him that he could well be imprisoned if the police raid her apartment, he cannot prevent himself from spending the night with her. Unfortunately, there is no place in her life for Aaron, who is an anti-Communist.

Tekla, the kind and cheerful Polish maid in Aaron's apartment house, is important primarily because of what she represents to Aaron. Unlike Celia, Betty, and Dora, all of whom make demands on life, Tekla wishes only to give of herself. It is people such as Tekla, Aaron decides, who enable one to believe in the goodness of God.

The woman with whom Aaron falls in love is in many ways like Tekla. Shosha lives on Krochmalna Street, where she and Aaron were childhood playmates. She is neither intelligent nor well educated, but she is totally devoted to Aaron. When, to the horror of his friends at the Writers' Club, Aaron marries Shosha, he is perhaps attempting to return to his childhood and to a world without ambivalence, governed by common beliefs and by unalterable rules.

Thirteen years later, some time after the end of World War II, Celia's husband and Aaron meet in Israel and compare notes about their friends and relatives, most of whom, including Shosha, were either murdered or died of hardship. As the book ends, the two men are still unable to find an answer for the question that Dr. Feitelzohn posed so many years ago: Why, if there is a good God, does He permit such suffering?

## “GIMPEL THE FOOL”

**First published:** “Gimpl Tam,” 1945  
(collected in *Gimpel the Fool, and Other Stories*, 2006)

**Type of work:** Short story

*A good man, who is deceived and mocked by everyone around him, discovers that he is not the fool that they think he is.*

Like many of Singer’s stories, “Gimpel the Fool” takes place in a shtetl, or Jewish village, in Poland, at an unspecified time before the Russian Revolution. Although it is full of details reflecting life in such a village, the story has the universal quality of a moralistic folktale, including the appearance of an evil spirit and a visitor from beyond the grave.

From the beginning of the story, it is indicated that someone called a fool in this world may not really be a fool by other standards. After he introduces himself as “Gimpel the Fool,” the narrator and protagonist proceeds to disagree with the appellation that he has been given throughout his life. He is not really a fool, he says, but simply a man who does not suspect others and, when he finds that he has been deceived, does not like to attack them. In other words, he is trusting and forgiving. Such qualities, Singer’s story suggests, should be valued, not mocked.

In the first section of the story, Gimpel describes all the tricks that were played on him during his youth, when, after he was orphaned, he became a baker’s apprentice. No matter what impossible event that he was told had occurred, he would run outside to see. Because he could be deceived so easily, everyone called him a fool. As the rabbi whom Gimpel consulted told him, however, the real danger in this world is not being a fool, but being evil. Gimpel is not evil.

When the community decides to get Gimpel married, he is certainly not deceived about the character of the bride whom they have chosen for him. Elka is dirty, shrewish, and promiscuous. With the whole village so determined on the match, however, Gimpel consents, assuring himself that once they are married, Elka will respect his authority. Unfortunately, she does not. Even on the wedding night, his wife refuses to sleep with him. Then, when Elka has a son four months after the wed-

ding, Gimpel discovers the reason why the village was so intent on the marriage.

During the next twenty years, Gimpel continues to forgive Elka for her infidelities, to treat her kindly, and to love her offspring. Then, when she is dying, Elka asks her husband’s forgiveness and reveals that none of their six children is his.

It is this shock that enables the Evil Spirit to tempt Gimpel, to urge him to deceive others as they have always deceived him. For the first time in his life, Gimpel does an evil deed. He urinates into his bread dough. Before he can distribute the bread, however, Elka comes to him in a dream and tells him that he is a fool for doing wrong, that he will pay for it in the next world, as she is paying for her evil deeds. Gimpel buries the bread, distributes his money among the children, and becomes a wanderer and a teller of stories. Now he has a new attitude toward lies. In his perspective, all things are possible, and therefore true; it is only the time and place that may be inaccurate. A happy man, Gimpel looks forward to his reunion with his wife, who now comes to him lovingly in dreams, and to life after death in a place where there is no deception.

## “ALONE”

**First published:** “Aleyn,” 1962 (collected in *Collected Stories: “Gimpel the Fool” to “The Letter Writer,”* 2004)

**Type of work:** Short story

*In a corrupt modern world, a man resists seduction by a demon.*

After he moved to the United States, Singer wrote a number of stories such as “Alone,” which reflect his conviction that the modern world is corrupt and doomed. Some of these stories are set in New York, others in Miami. “Alone” is particularly interesting because, although the setting is Miami Beach, instead of a Polish village, the pattern of the story is very much like that of the folkloric tales. There is a protagonist with a lesson to learn, an unwise wish that comes true, and an attack from a demon, which tests the hero’s virtue.

“Alone” is told in the first person. The narrator is a Jewish man who is spending the summer in Mi-

ami Beach, instead of in New York with his wife, because he suffers from hay fever. Tired of the noisy fellow guests in his hotel, he utters his wish: that he could be all alone in a hotel. The narrator's wish comes true. Bankrupt, the hotel where he is staying is closed. The guests he dislikes depart, and he moves to a room in a cheap hotel not far away, where, as he wished, he is the only guest. No one is in this hotel but the hunchbacked Cuban girl at the desk and himself.

Already tired of being alone, the narrator takes a bus to the end of the line and back, musing on the landscape that he is passing, a physical and moral desert, which humankind has disguised in order to indulge its vices, including greed, promiscuity, and cruelty. Later that evening, a hurricane hits, and as it is reaching its height, the Cuban girl asks to be admitted to his room, explaining that she is afraid. Although to him she looks like an animal or a witch, the narrator permits her to stay. Later, begging him to see that she is not a beast but a woman, the girl tells him about her life of abuse, neglect, and poverty. When she concludes by offering herself to him, however, the narrator rejects her, explaining that he must be faithful to his wife, as God mandates. Infuriated, she spits on him and leaves. The next day, the Cuban girl triumphantly tells the narrator that he must leave because the hotel is being closed.

Although to the protagonist the importance of the episode is his successful resistance to the sin of lust, Singer suggests that in fact he is guilty of another sin, that of pride. His initial wish to be alone is evidence of that sin; the narrator does not seem to think of any of his fellow guests as human beings, but only as impediments to his own desires. Even

though he repents of his wish, once again he separates himself from humanity by feeling only revulsion toward the girl at the desk. Because she is from Cuba, a place that he associates with witchcraft—in other words, because she is different from him—he assumes that the Cuban girl is a demon. Even when she tells him her sad story, he shows no pity for her, and at the end of the story, he is still focusing only on what he considers to be her witch's attempt to seduce him. Ironically, as Singer suggests, while one is resisting one kind of sin, the forces of evil may be playing their ultimate trick by sending another to take possession of the soul.

## SUMMARY

The fiction of Isaac Bashevis Singer is of great historical importance because it preserves ways of thinking and acting that have almost vanished. In the communities that he describes, religion is the central reality, and behavior is decided on the basis of faith. Although there can certainly be cruelty and deceit within the shtetl—or outside it, as in modern Warsaw, New York, or Miami Beach—when Singer's characters move away from that faith and that sense of community, they feel a sense of alienation and futility.

Singer's works are most valuable not as works in a particular tradition, however, but as universal accounts of human frailty, suffering, and, sometimes, of human goodness. Like *Shosha*, Singer's fiction usually ends not with answers but with questions. It is this kind of intellectual honesty, this insistence on coming to an understanding with his God about the purpose of life in this world, that is Singer's most impressive achievement.

Rosemary M. Canfield Reisman

## DISCUSSION TOPICS

- Many of Isaac Bashevis Singer's novels and short stories have been classified as tragicomedies. How do his works blend the elements of comedy and those of tragedy?
- How do Singer's works reflect the tradition of storytelling that is so prevalent in small, rural communities?
- Does Singer see the loss of a sense of community as a major obstacle to his characters' happiness?
- Why did the Holocaust cause many Jews to lose their faith?
- Even those of Singer's characters who say they no longer believe in God often feel guilty. Why?
- What does Singer see as the major problems in male-female relationships? What are the problems in marriage?
- How is the theme of alienation reflected in Singer's works?

## ZADIE SMITH

**Born:** London, England  
October 27, 1975

*Smith is recognized as a vibrant young multicultural voice of the new millennium, arriving on the literary scene in 2000 with a brilliant, wide-ranging, innovative, and humorous first novel depicting the multiracial culture of her native north London.*

### BIOGRAPHY

Zadie Smith was born Sadie Smith on October 27, 1975 in the Willesden area of north London, the daughter of a British father and a Jamaican mother. Willesden would become the setting of her first novel, *White Teeth* (2000), and the novel's main character, Irie, would also be the daughter of a Jamaican mother and an English father. Smith changed her name to the more exotic Zadie as a child. Smith's early interests were in the performing arts; she was a tap dancer until the age of fifteen. She was also an ardent fan of old Hollywood musical films and actress Katharine Hepburn, knowledge she would draw on in writing her second novel, *The Autograph Man* (2002). For a time she earned money as a jazz singer; both of her younger brothers are rap singers in Great Britain. Smith attended Hampstead Comprehensive School until the age of eighteen and King's College, Cambridge University, from 1994 to 1997, graduating with a degree in English literature.

While at Cambridge, Smith published short stories in the *May Anthologies*, the annual collection of work by students at Oxford and Cambridge universities. Her work attracted the attention of the publishing world, and while still a university student she was offered an advance of £250,000, or approximately \$400,000, for her first two books. The size of the advance for such a young, unknown writer put her name in the news even before her first book was published.

*White Teeth*, Smith's first novel, was published in January, 2000, when the writer was only twenty-four years old. The book, a saga of three families in multicultural north London, was an immediate best seller, and Smith became a literary celebrity.

As a clever and inventive writer and a young and attractive woman of mixed race at the turn of a new century, Smith became a symbol of a new multiethnic strain of British writing. *White Teeth* won a host of awards, including the Guardian First Book Award, the Commonwealth Writers' First Book Award, and the Whitbread Book of the Year Award, all in 2000. *White Teeth* was adapted for British Broadcasting Corporation television, broadcast in 2002, and has been translated into more than twenty languages.

Smith was writer-in-residence at the Institute of Contemporary Arts in London from 2000 to 2001 while writing her second novel, *The Autograph Man*, which appeared in 2002. This novel, which was narrower in scope but deeper in character development than *White Teeth*, was not as well received, more than likely because it was impossible to live up to the media attention that had attended the first novel. Set in London and New York, the novel's main character is a Chinese-Jewish autograph collector. One of the themes of the novel is an exploration of the nature of fame and celebrity, possibly in reaction to Smith's experience after the publication of *White Teeth*. *The Autograph Man* won the Jewish Quarterly Review's Wingate Literary Prize in 2003. Also in 2003, Smith was included in *Granta* magazine's list of Twenty Best Young British Novelists.

In 2002 and 2003, Smith lived in the United States, teaching, studying, and writing as a fellow at the Radcliffe Institute for Advanced Study at Harvard University. While there, she began work on a collection of literary essays.

Smith's third novel, *On Beauty*, was published in 2005. Set in London and on the campus of a fic-

tional American university, the novel depicts the disintegration of the marriage of Howard Belsey, a liberal white art history professor married to a vibrant African American woman, and his collision with his ultraconservative Anglo-Caribbean arch-rival, Monty Kipps. *On Beauty* was short-listed for the 2005 Man Booker Prize and won the Orange Prize for Fiction in 2006.

In addition to writing novels, Smith has edited and contributed and written introductions to several anthologies of fiction, and she has been a contributor of short stories to *The New Yorker* and *Granta* magazines. Smith married the poet and novelist Nicholas Laird, whom she had met while a student at Cambridge, in 2004. They settled in Kilburn, north London, not far from where she grew up, and in 2007 were collaborating on a musical based on the life of writer Franz Kafka.

#### ANALYSIS

Zadie Smith is recognized for her wide-ranging, panoramic novels, deeply plotted with an extensive cast of characters. Because of these characteristics, along with the element of social satire, the word “Dickensian” has been frequently used by critics when describing her work. However, Smith’s themes, and the society of which she is a keen observer, are distinctly twenty-first century.

A primary theme of Smith’s work is multicultural identity. Most of her characters identify with more than one culture, country, and ethnicity: Irie Jones, the principal character of *White Teeth*, is the daughter of a working-class white British father and a Jamaican mother living in multiracial north London. Alex-Li Tandem, the protagonist of *The Autograph Man*, is a Chinese-Jewish north Londoner, and the Belseys of *On Beauty* are an interracial couple. Numerous other characters in all three novels are of hybrid ethnicity and/or displaced geographically. The siblings Adam and Esther Jacobs in *The Autograph Man* are black and Jewish, born in Harlem and living in London. The Muslim brothers Millat and Magid in *White Teeth*, whose parents are both immigrants from Bangladesh to Great Britain but who are raised separately, one in Chittagong, one in London, are identical twins symbolically torn in half. Ironically, the brother brought up in Bangladesh becomes a conservative white-wigged lawyer, more British than the British,

while the brother raised in London becomes associated with a militant Islamic group. The message is that each individual must forge his or her own identity, without mirror or model, and that the contemporary world is multiethnic or global to an extent never before known in European history.

Coincidence, chance, and the unpredictability of life in spite of the best efforts of some of Smith’s characters to control outcomes are also themes in Smith’s work. In *White Teeth*, Marcus Chalfen’s FutureMouse project is an attempt to completely control genetics, to the point that every event in the mouse’s short life will be predicted, controlled, and observed. However, in the climactic scene at the end of the novel, FutureMouse escapes, evading Chalfen’s plans. Archie Jones in *White Teeth* bases important decisions on the toss of a coin; Li-Jin Tandem’s autographed pound notes, a central image in *The Autograph Man*, are created while gambling on the outcome of a wrestling match; all of Howard Belsey’s attempts at control are thwarted, from raising liberal intellectual children in his own image to the chaos of his pivotal lecture on Rembrandt, when he arrives late, soaked with perspiration, and without his notes.

Smith is noted for her style, her vivid description of settings and mannerisms, and especially for her ear for speech. While all three novels employ an omniscient third-person narrator, the use of free, indirect speech in the voice of her many characters showcases her use of dialect, ranging from Archie Jones’s working-class speech, to the hip language of the youth of north London or Boston’s Roxbury, to the discourse of academia. Nonlinear plot development heightens an emphasis on coincidence, ambiguity, and unpredictability. Humor and irony abound in her use of language and social satire, which occasionally shades into farce.

Like her characters, Smith’s work is not easily categorized. It is a hybrid: part popular culture and part dense literary writing. Critical reception has been mixed, perhaps because each book is so different from the others, because the scope of her work is vast, and because expectations have been so shaped by the amount of publicity associated with Smith. Nevertheless, each book has been an award-winner and a best seller, greatly appreciated by the public.

## WHITE TEETH

**First published:** 2000

**Type of work:** Novel

*This novel is a multigenerational, multicultural saga of three families living in north London at the turn of the millennium: the Joneses, a white working-class Englishman married to a Jamaican woman; the Bangladeshi Muslim Iqbals; and the Jewish-Catholic atheist Chalfens.*

*White Teeth* is a complex and multilayered novel, with a wide cast of characters and a twisting plot ranging over many years and several continents. The story follows the fortunes of two best friends, World War II buddies Archie Jones, a white working-class man married for the second time to the much younger Clara, a Jamaican woman, and Samad Iqbal, a Bangladeshi who works at an Indian restaurant in London and marries the much younger Alsana. Naturally enough, their children Irie Jones and the twin Iqbal brothers, Magid and Millat, are friends in multicultural present-day north London. Samad, concerned that his boys are losing their culture, sends one brother, Magid, home to be raised by relatives in Chittagong. Irie and Millat, caught smoking marijuana in the schoolyard, agree to be tutored by classmate Joshua Chalfen in order to avoid harsher consequences. The Jewish-Catholic-atheist Chalfens are a stereotypical white liberal family, delighted to welcome such multicultural diversity into their home. Irie Jones has an unrequited desire for Millat; Joshua Chalfen has an unrequited love for Irie.

Marcus Chalfen is a genetic engineer who is working on a project called FutureMouse. Every event in FutureMouse's life will be programmed and predictable; the mouse is to live for exactly seven years, from 1993 to December 31, 1999, the eve of the new millennium. The many threads

of the novel come together at an event where FutureMouse will be introduced to the public. All the living characters are present: the senior Joneses and Iqbals; Irie, who has both embraced her Jamaican ancestry by returning to live with her grandmother and decided to go to university under the influence of the educated Chalfens; Joshua Chalfen, who has defied his father by becoming an animal rights activist; Magid, who has become Marcus's protégé and publicist; and Millat, whose militant Islamic group is determined to disrupt the event. Coincidences abound, chance meetings occur, all attempts to control outcomes fail, and the event ends in chaos and FutureMouse escapes.

The novel ends with a snapshot of the future: On December 31, 1999, Irie Jones and Joshua Chalfen, now lovers, are in Jamaica with Irie's grandmother. Irie's daughter, now seven years old, is with them. Just before the FutureMouse unveiling, Irie had slept first with Millat, then gone directly to Magid, ensuring that, since the twins have exactly the same genetic material, the child's father will never be known. Thus the child carries all the threads of multiethnicity in one body, and the novel ends on a note of hope on the eve of the millennium.

The book, a youthful first novel, has been criticized for this optimistic view of multicultural Britain, which is perhaps unrealistic. Nevertheless, the wide scope of the book, with its rich twists and turns of plot, its abundance of sharply defined characters and the sometimes unexpected connections among them, and its social observation, humor, and language all combine to make the novel technically impressive and popular with readers.

## THE AUTOGRAPH MAN

**First published:** 2002

**Type of work:** Novel

*This novel explores the nature of celebrity and loss through the story of Chinese-Jewish north Londoner, Alex-Li Tandem, the professional autograph dealer of the title, who has attempted to escape the reality of his grief at the loss of his father through substance abuse and focusing on the artificial lives of Hollywood film stars.*

*The Autograph Man* is set in a fictional north London suburb called Mounjtjoy. The novel opens with a prologue in which the young Alex-Li Tandem attends a wrestling match with his father, Li-Jin, and his two friends, Mark Rubenfine and Adam Jacobs. They meet Joseph Klein, who introduces the boys to autograph collecting. At the end of the prologue, Alex's father collapses and dies of a brain tumor just at the moment the boys are rushing forward to get the autograph of the wrestler Big Daddy. Throughout most of the novel, the inability to face the death of his father and escaping reality by collecting autographs are Alex's predominant character traits.

Book 1 is set fifteen years later in Mounjtjoy. Alex has become a professional autograph dealer. He especially desires the autograph of 1950's Hollywood film star Kitty Alexander, to whom he has

written weekly for thirteen years. The four boys of the prologue are still close friends. Alex has a girlfriend, Adam's sister Esther, but lives a superficial life and seems unable to connect with other people. His friend Adam, a black Jewish mystic, urges him to read the mourner's Kaddish on the anniversary of his father's death, but Alex resists the idea.

Book 1 presents Alex's obsession with the cult of celebrity and the brittle shallowness of this life with satirical and sometimes ribald humor and ends as he finally receives his desire, Kitty Alexander's autograph, in the mail.

Book 2 is set in New York, where Alex is attending an autograph fair and trying to find Kitty at her return address in Brooklyn. When he finds her living in genteel poverty he persuades her to return with him to London, so he can make her rich by auctioning some of her rare autographs and letters. After a television news story wrongly reports Kitty's death, Alex makes even more money than he imagined. Throughout book 2, Alex grows in self-knowledge, and he gives his commission on the sale of Kitty's letters to a dying fellow autograph man as evidence of his character development.

In the final scene of book 2 and the epilogue, Alex places his father's autograph in the place where he had contemplated placing Kitty's and recites the mourner's Kaddish in the synagogue with all of his friends present. He finally acknowledges his connection to his father, a living hero, and elevates him above the artificial heroes of Hollywood films.

Like *White Teeth*, *The Autograph Man* observes and satirizes the subcultures of north London's multicultural inhabitants, but Smith's second novel is both narrower in scope and deeper in exploration of character than her first. It is inventive in form and clever in its wide range of references to both popular and literary culture. Irony and metaphor abound. Alex-Li Tandem, the autograph collector, is repeatedly unable to sign his own name, but in the touching moment when he gives his commission from the sale of Kitty's letters to the dying Brian Duchamp, he clearly signs his name to the check, taking possession of his identity in compassion. Alex-Li Tandem has taken a journey from substituting celebrity for reality to compassion and self-knowledge. However, the novel moves quickly back into vulgar humor as Alex follows this act of compassion by getting roaring drunk. One must never forget that Smith's work is funny; humor is always an important component of her commentary.

## ON BEAUTY

**First published:** 2005

**Type of work:** Novel

*Set at a fictional elite university town outside Boston, On Beauty is a social satire that describes the clash between two professors, the liberal Howard Belsey and the conservative Monty Kipps, and the subsequent disintegration of their academic and personal lives.*

The cast of characters in *On Beauty* includes the members of the liberal Belsey family, white English Howard married to African American Kiki, and their three children, Jerome, Zora, and Levi; the conservative Anglo-Caribbean Kipps family, Monty, Carlene, and their children; as well as a host of other students and academics at fictional Wellington College. The novel pays homage to E. M. Forster's *Howards End* (1910) from its opening line, to the cross-cultural friendship of liberal Kiki Belsey and the dying conservative Christian Carlene Kipps, to the conflict between cultural liberals and conservatives.

As the novel opens, the Belsey's oldest son, Jerome, while spending a summer in London, has come under the influence of Howard Belsey's academic and philosophical archrival, Monty Kipps. Jerome has become a believing Christian, to the dismay of his atheist and ultrarational father, and has fallen in love with Monty's lovely daughter, Victoria. The antagonism between the two men is intellectual and academic; they are both art historians specializing in Rembrandt and have radically different approaches to interpreting the artist's work.

Howard is an antihero. As the novel opens he is trying to cover up his affair with a female colleague. Later he engages in an affair with Victoria Kipps. He is sometimes amusing, but his morals are too loose to make him a likable character. His approach to art is purely theoretical; he has spent his career deconstructing other people's ideas of good and beauty to the ultimate detriment of his own soul.

Monty Kipps is not above reproach either; he is having an affair with his graduate assistant while his devoted wife is dying of an unnamed disease. The two rivals' worlds and families collide when Kipps

invited to give a lecture at Wellington. Kiki becomes friends with Carlene, drawn to her by compassion and a mutual love of family. Howard is irresistibly drawn to sexually liberated Victoria Kipps, now a student at Wellington, while his daughter Zora, under the influence of Howard's former mistress, poetry teacher Claire Malcolm, champions Monty Kipps's right to advance his conservative agenda as a free speech issue. Ultimately both men lose their wives, and Howard's valued intellect deconstructs along with his personal life.

Some of the most compelling scenes in this large and ambitious novel concern race and class. The encounter at an outdoor concert on Boston Common, when Zora picks up Carl's Discman instead of her own, is reminiscent of the scene in *Howards End*, when the Schlegel sisters encounter the working man Leonard Bast and take his umbrella home by mistake. Carl, a young black man from the ghetto, is invited to audit a poetry class at Wellington and turns out to be a better poet than most of the students, as well as an objective observer of the sometimes cutthroat campus politics. Levi, the youngest Belsey son, is determined to escape from liberal white Wellington, and in some of the most humorous scenes in the novel he does his best to look and act like a ghetto kid. Class and race boundaries are crossed in both instances.

After a series of rapid plot twists, both families have crumbled. There is no redemption in the ambiguous ending. Carlene Kipps has died, Kiki has left Howard and is involved in a lawsuit with Monty for possession of the valuable painting that Carlene bequeathed to her, and Howard's career is in decay. In another ambitious novel filled with witty observation and commentary on academia, family life, politics, and pop culture, Zadie Smith has accomplished her goal of creating a twenty-first century novel of manners in homage to her literary mentor, Forster.

## SUMMARY

Zadie Smith is a technically gifted young writer whose work crosses racial and cultural boundaries. In her own life, Smith, raised in a multiethnic working-class area, was educated at Cambridge University and became a writer, moving across class boundaries while exploring the blurred lines among ethnic boundaries in contemporary urban life. Her characters are multiracial and global in

their travels, moving easily in time between past roots and present chaos, and in place from London, to various countries of origin and memory, to New York and to New England. Boundaries between liberal and conservative are also crossed, especially in the friendship between Kiki Belsey and Carlene Kipps in *On Beauty*. Smith's witty and contemporary voice, the wide scope of her novels, the vulnerability of her characters, and her social satire are elements of her work which have contributed to her phenomenal success with critics and public alike.

## DISCUSSION TOPICS

- Crossing racial and cultural boundaries has been a hallmark of Zadie Smith's career. Discuss this idea in the context of each of her books and its characters.
- Many critics felt that Smith's second novel, *The Autograph Man*, did not live up to the promise of her widely acclaimed first novel, *White Teeth*. Do you agree? Why or why not?
- Some of the scenes in Smith's novels are laugh-out-loud funny, such as the scene in *White Teeth* when Irie Jones decides to have her hair straightened. What scenes in her books made you laugh?
- Smith's work has been described as a brilliant mixture of references to both pop and high culture. List some examples of each type of culture referred to in her books, such as films, pop stars, and literary references.
- One of Smith's themes is the unpredictability of life. Discuss some examples of the role that chance and coincidence play in her work. Archie Jones's tossing of the dice to make important decisions is an image of chance. Can you think of other scenes or images that emphasize life's unpredictability?

## ALEKSANDR SOLZHENITSYN

**Born:** Kislovodsk, Soviet Union (now in Russia)  
December 11, 1918

**Died:** Moscow, Russia  
August 3, 2008

*The author of several seminal works of fiction and nonfiction and a Nobel Prize winner, Solzhenitsyn is generally recognized as one of the leading writers of the twentieth century.*

### BIOGRAPHY

Aleksandr Isayevich Solzhenitsyn (sohl-zuh-NEET-suhn) was born on December 11, 1918, in Kislovodsk, a small Caucasus town near Rostov-on-Don in the Soviet Union (now in Russia). Six months before he was born, his father died in World War I in an accident while serving in the czarist army, for which he had volunteered. His mother, Taissa Zakharovna Shcherbak, had a difficult time rearing her family because of their social origin and because of the turmoil in Russia during the revolution and after the war. The family moved to Rostov in 1924, where Solzhenitsyn attended high school and the University of Rostov, studying mathematics and physics. He discovered early that his true love was literature and enrolled in a correspondence literature course. He sent his stories for publication but was repeatedly rejected. He transferred to the Moscow Institute of Literature, Philosophy, and History, married in 1940, and was graduated with honors on a Stalin scholarship in the summer of 1941. In the fall of the same year, he was inducted into the army, where he served with distinction almost to the end of World War II, earning medals and citations and rising to the rank of captain.

In February, 1945, Solzhenitsyn made a near fatal mistake by writing a letter to a friend in which he

blamed “the moustached one” (a reference to Soviet dictator Joseph Stalin) for the defeats of the Soviet army. The letter was intercepted, and he was sentenced to eight years in concentration camps. His prison years postponed the realization of his primary ambition to become a writer, but they furnished him with the material for practically all of his works. He devised his works while still in prison and, since he could not write, memorized most of them, such as his first novel, *Odin den’ Ivana Denisovicha* (1962; *One Day in the Life of Ivan Denisovich*, 1963). For the first four years, he served as a mathematician in a prison research institute near Moscow, and this provided him with the material for his novel *Vkrughe pervom* (1968; *The First Circle*, 1968). He was released in 1953, after having served every day of his sentence in various camps.

After his release, he was not allowed to return to Moscow but had to spend three more years in the so-called inner exile in Kazakhstan, where he taught in local schools and where his stomach cancer was diagnosed, giving him only a short time to live. He overcame the disease, and this experience inspired him to write *Rakovy korpus* (1968; *Cancer Ward*, 1968). He finally returned home in 1956 and taught in a school in central Russia, which he depicted in his best short story, “Matrenin dvor” (“Matryona’s House”). A year later, he was rehabilitated and exonerated from any wrongdoing. He returned to Moscow and resumed his marriage.

Solzhenitsyn was finally able to write down the works conceived and memorized in camps. In 1962, he submitted for publication his novel about a concentration camp, *One Day in the Life of Ivan*

*Denisovich*. Since the Soviet leaders were looking for material to discredit Stalin, the novel was published, creating a worldwide sensation. A few more of his stories appeared, but soon the doors were closed to him. He was unable to publish his larger novels, *The First Circle* and *Cancer Ward*, but, having been circulated underground, they were eventually published abroad. By this time, Solzhenitsyn had become very active in the struggle against the totalitarian system, addressing publicly the leaders and boldly demanding freedom not only for writers and other artists but also for all citizens. In this struggle, he was on a collision course with the authorities, and it was only a matter of time until he was arrested and sent to a concentration camp again. His papers and manuscripts were confiscated in 1965. In 1966, a short story was the last work of his published in Russia for a long time.

The bestowing of the Nobel Prize in Literature on Solzhenitsyn in 1970 was not only a gratifying recognition of his work but also a further salvo in the war between him and the Soviet regime. He divorced his first wife and married another woman while continuing to fight and write. In 1971, he published *Av gust chetyrnadtsatogo* (*August 1914*, 1972), the first of four volumes in a work collectively titled *Krasnoe koleso* (1983-1991; *The Red Wheel*, 1989). In 1973, the first part of another ambitious work, the three-volume documentary *Arkhipelag Gulag, 1918-1956: Opyt khudozhestvennogo issledovaniya* (1973-1975; *The Gulag Archipelago, 1918-1956: An Experiment in Literary Investigation*, 1974-1978), appeared in Paris. Apparently that was the last straw for the authorities, for in February, 1974, he was arrested again, but instead of being sent to a prison, he was expelled from the country. He came first to Germany, and after visiting Switzerland and Norway, in 1976 he moved to Vermont, in the United States.

The expulsion from his homeland was not the end of Solzhenitsyn's struggle. He was now free to speak out more openly and to disseminate his views even more widely. He demanded that his confiscated manuscripts be returned to him; surprisingly, the authorities obliged, apparently for fear of antagonizing him further. He made public appearances and made statements, as in his famous Harvard University address, warning the West to be vigilant and resolute in its opposition to the Soviet regime. He completed *The Gulag Archipelago* and

continued to work on *The Red Wheel*. He also insisted that he would return to his homeland when his freedom was granted.

He was able to attain these goals in the 1990's, as the changing political climate in his home country eventually led to the collapse of the Soviet Union. In 1990, the Soviet government restored his Russian citizenship, and the next year his treason charges were formally dropped. Solzhenitsyn and his wife, Natalia, returned to Russia in 1994, settling near Moscow. The Solzhenitsyn Prize for Russian Writing was established in 1997. On June 12, 2007, then-Russian President Vladimir Putin visited Solzhenitsyn's home to present him with an award for his work.

After his return to Russia, Solzhenitsyn published numerous works, including short stories, a series of prose poems, a memoir about his years in the West, and a two-volume book examining the history of Russian-Jewish relations, *Dvesti let vmeste, 1795-1995* (2001; two hundred years together). In the latter work, he debunked the claim that a "Jewish conspiracy" incited the Russian revolutions of 1905 and 1917, and he urged Russians and Jews to accept their complicity with the Communist government.

He also continued to generate controversy by criticizing Western materialism and denouncing Russian bureaucracy and the loss of spirituality. He called upon Russians to abandon their materialism and return to the virtues of the Russian Orthodox Church. These views led some Russians to brand him a "reactionary utopian" but were of little interest to Western readers, who had formerly embraced his anti-Soviet writings. Solzhenitsyn died of heart failure in Moscow on August 3, 2008. He was eighty-nine years old.

## ANALYSIS

Solzhenitsyn wrote a number of novels, stories, and works based on documentary, political, and sociophilosophical matters. Several dominant themes recur. First, almost all of his works are autobiographical, directly or indirectly. He was compelled to transform his turbulent personal experiences into artistic expression, transcending the experiences of an individual. In several of his works, Solzhenitsyn himself can be easily detected. Through such methods, he gave his works authenticity and veracity. His artistic acumen, however, al-

lowed him to raise his writings above mere description of his experiences.

Because the everyday life that Solzhenitsyn depicts is inseparable from historical and political reality, his works deal, in one form or another, with the peculiar experiences of his characters before, during, and after World War II. For that reason, his writings are imbued with political and social issues, perhaps more so than those of many other writers of his stature. Consequently, his works can be seen as overly politicized and lacking universal appeal, leaving indifferent those readers uninterested in historical and political issues. Solzhenitsyn's powerful artistic abilities, however, lend his potentially pedestrian subject matter an aura of high artistic quality.

Similarly, because Solzhenitsyn was obsessed with issues that were often a matter of life or death to him, his works seem to lack versatility, and he is in danger of being called a one-theme writer. That, however, is an oversimplification. While it is true that most of his characters are faced with similar dilemmas and ordeals, they also differ enough to make distinct individual responses.

The overriding theme in Solzhenitsyn's works is the relationship between the individual and his or her society. Drawing from his own experiences (incarceration, a long stint in concentration camps, his struggle against an oppressive regime), he presents with an uncanny sharpness and candor the dilemmas that his characters face. The characters continually wrestle with, or openly ask, searing questions: How can the Soviet society treat its own citizens with such unconcern and brutality? Have the people really transgressed against the law, and, if so, is the punishment commensurate with the crime? Why do no extenuating circumstances or leniency exist in civilized societies? Why must the accused always prove his or her innocence while the state is not required to prove his or her guilt? Even worse, why is the state not even concerned with this process at all? Most important, who has given those representing the state the right to judge another individual, imprisoning and often killing that individual? Even though his characters are concerned with other necessities of everyday life, such as food, clothing, work conditions, love, hatred, and rela-

tives left behind, they return constantly to these questions, groping for answers.

The answers that Solzhenitsyn provides are few but convincing. While it is true that his characters are victims of injustice unparalleled in history, they are not without salvation. The author sees that salvation in the need, even the imperative, for each character to preserve his or her dignity in the face of the frontal assault upon it. Solzhenitsyn believed that tyrants are helpless against victims who have nothing left to lose; moreover, the tyrants cannot give back the freedom they have taken away from the victims because they themselves are not free. Furthermore, if the victims can preserve their dignity, they can in the end claim victory even if they pay the ultimate price of death.

In dealing with highly ethical issues, Solzhenitsyn followed the tradition of great Russian writers of the past, such as Fyodor Dostoevski, Leo Tolstoy, and Anton Chekhov. He had more in common with them, however, than simply a concern with morality. His style is closer to that of the nineteenth century writers than to that of his contemporaries. For that reason, some critics consider Solzhenitsyn a throwback—a splendid one, to be sure—to the high standards of the golden age of Russian literature. His style is no simple imitation of the past masters by any means. There is a high dramatic quality in his novels and stories (he has also written a few plays), in his building and resolving of conflicts, and in the interaction of his characters, including a keen understanding of them that at times ranks with the best of Dostoevski. There is also an unmistakable poetic quality in his works (he also wrote poems in prose), which, unfortunately, is often lost in translation.

The fact that Solzhenitsyn wrote in several genres speaks not only for the versatility of his talent but also for his total commitment to his vocation. He is a perfect example of an engaged writer, a writer with theses, common in twentieth century world literature. He was also a writer with a mission, with which he seemed to be obsessed. That mission was to return to human beings the dignity taken away by the unfeeling force of political totalitarianism. He achieved that purpose with the power of his artistic talent.

## ONE DAY IN THE LIFE OF IVAN DENISOVICH

**First published:** *Odin den' Ivana Denisovicha*, 1962 (English translation, 1963)

**Type of work:** Novel

*Humankind can survive all indignities inflicted upon it by preserving its own dignity.*

The publication of *One Day in the Life of Ivan Denisovich* in 1962 created a sensation, both in the Soviet Union and abroad, for three reasons: The author was unknown, the novel showed a remarkable maturity for a novice, and the subject matter was daring and explosive. Solzhenitsyn was soon to become well known worldwide; he quickly proved that he is indeed an accomplished writer; and the subject matter soon ceased to be explosive, even unusual. Yet the novel continues to be praised as a genuine work of art.

To a degree, the reason for its high esteem lies in the novel's remarkable stylistic simplicity. The novel describes one day in a Soviet concentration camp in the 1950's, as experienced by the protagonist, carpenter Ivan Denisovich Shukhov, and a cast of supporting characters. The reader follows in detail every step of the inmates, from the reveille at dawn, through their work at building an edifice that they do not quite understand, until they return to barracks in the evening darkness. The author concentrates on Shukhov's reactions to everyday happenings, on his ability to adapt to situations and, simply, to survive. Even though as a carpenter he cannot be taken to speak for the author,

there is no doubt that many of Solzhenitsyn's own experiences are reflected in Shukhov's actions and reactions.

There is a deliberate reason for the author's building of Shukhov's character almost to the point of an archetype. Undoubtedly, in years of incarceration and isolation from the outside world, Solzhenitsyn had thought often about the reasons for the unjust mistreatment of himself and his compatriots, but also about the answer to such injustice. In Shukhov he found the answer. A simple, hardworking man (it is no coincidence that he is a worker, for whose benefit the revolution was allegedly fought), a good man who bears no grudge even against his torturers, a level-headed and resourceful man who sees a silver lining in every cloud, he accepts the undeserved punishment stoically and without philosophizing about it. He would rather help his fellow inmates than make it harder for all of them; he would rather work than dwell on his misery; and he does not want the circumstances to consume him. Moreover, he takes great pride in his work, as if he were working for himself. Whenever he helps more fortunate inmates, he expects to be rewarded, but if he is not, he does not lose any sleep over it. At the end of the day, as he prepares for sleep, he considers it to have been an almost happy one:

They hadn't put him in the cells; they hadn't sent his squad to the settlement; he'd swiped a bowl of kasha at dinner; the squad leader had fixed the rates well; he'd built a wall and enjoyed doing it; he'd smuggled that bit of hacksaw blade through; he'd earned a favor from Tsezar that evening; he'd bought that tobacco. And he hadn't fallen ill.

It is this attitude that, Solzhenitsyn believed, can enable the victim not only to survive but also to preserve human dignity in the ordeal and one day rebuild a seemingly shattered life. Thus, amid grim reality and seeming hopelessness, Solzhenitsyn saw a ray of hope.

## THE FIRST CIRCLE

**First published:** *V krughe pervom*, 1968  
(English translation, 1968)

**Type of work:** Novel

*One who wants to remain a decent human being should not serve the Devil under any circumstance.*

*The First Circle* depicts four days in December, 1949, in a special prison near Moscow where people are conducting research on specific projects for the state and the secret police. Again drawing from his personal experiences, Solzhenitsyn speaks out through the protagonist of the same age, mathematician Gleb Nerzhin, who is serving a ten-year sentence for having been suspected of unspecified activities against the state. He is surrounded by fellow inmates, the assisting personnel (all of them secret police agents), and the authorities. The inmates enjoy a favored status because of their expertise and potential usefulness to the state, which explains the title, taken from Dante's *La divina commedia* (c. 1320; *The Divine Comedy*, 1820) as the first and the least punishing of the nine circles of Hell designed for sinners in Christian mythology. The inmate specialists are working on two main projects, a decoder of human voice and a scrambler, both of which the state intends to use in controlling the telephone communications of their citizens. Many of the inmates are reluctant to lend their services to the evil intentions of the state, but some want to use their service to attain benefits for themselves, even an early release. The real competitors, however, are prison authorities who are vying among themselves for success of the projects, so that they can impress the ultimate order-giver, Stalin. Within these two spheres, the dramatic tension of the novel uncoils.

Nerzhin is an intelligent, humanistically inclined person, fully aware of the moral dilemma confronting him and other inmates (Zeks, as they

are called). He is torn between pangs of conscience and personal sorrow stemming from the suffering of his faithful wife, who endures much on account of her husband. In constant meetings with his colleagues, Nerzhin discovers that they all react differently to the dilemma: from willingness to cooperate for personal gain, to reluctance to "sell one's soul" to the devil, to outright rejection after a painful soul-searching. Nerzhin belongs to the last category, refusing to help the state entrap other victims; he would rather go to the next, much harsher circle of Hell instead, realizing that it may be ten or twenty-five years before he regains his freedom, if at all. His reasoning is firm, however: "If you know when you die that you haven't been a complete bastard, that's at least some satisfaction." Thus, Solzhenitsyn reduces a complex ethical dilemma to the simple preservation of one's personal dignity, which, in turn, is perhaps the most difficult thing a person can do. As in *One Day in the Life of Ivan Denisovich*, he points at the solution of the central problem that his compatriots are forced to face.

Aside from this central dilemma, the novel offers many other aspects: several sharply sketched portraits of Soviet rulers and officials, from Stalin down to the smallest henchman; the way the Soviet prison operates; several heartrending human dramas, some of which concern love between Zeks and their families and between Zeks and their female assistants; the enormous waste of human potential; a rich variety of psychology of the imprisoned; and various aspects of freedom among both the rulers and the ruled. Solzhenitsyn also depicts the relationship, and conflicts, between the prisoners and guards, prisoners and higher authorities, authorities themselves, prisoners and other prisoners, and prisoners and their own consciences. These concentric circles reinforce structurally the basic premise of the novel, that of the nine circles of "guilt" and punishment. In building such a monumental edifice, worthy of Tolstoy and Dostoevski, Solzhenitsyn wrote a work of lasting and universal value.

## CANCER WARD

**First published:** *Rakovy korpus*, 1968  
(English translation, 1968)

**Type of work:** Novel

*Faced with a life-threatening disease, a man is forced to reexamine his entire life and thinking.*

*Cancer Ward* is also based on Solzhenitsyn's personal experiences, this time on his bout with cancer. The protagonist, Oleg Kostoglotov, a thirty-four-year-old political exile, is afflicted with cancer in the prime of his life and approaches it with a mixture of hope and despair. The entire novel takes place in a cancer hospital separated from the world; this circumstance makes for an oppressive atmosphere of isolation, but it also enables the patients to turn inward and reexamine their past. Solzhenitsyn again creates a score of characters, each different in his or her reaction to the illness and in the ability to cope with it, yet all coming to the same conclusion that this experience is an ultimate test of their will to survive, not all of which depends on the doctors and medicines alone. Predictably, all patients show different fortitude and reaction to the blow that fate has dealt them.

In addition to the patients' silent but excruciating process of reexamination, there is a relationship between doctors and patients to be considered. All doctors make gallant efforts to save their patients, fully aware that their resources are limited; in fact, the main doctor eventually succumbs to cancer herself. Solzhenitsyn uses this relationship to test the ability of medical science to save lives, and also to voice, through Kostoglotov and the doctors, his views about the meaning of life

in general. The final outcome, illustrated by the protagonist's (and Solzhenitsyn's) seeming conquest of the disease, indicates a hope that even such calamitous misfortune can be successfully averted, if only temporarily; the main thing is to keep fighting.

There is a much wider interpretation of *Cancer Ward*. In limiting the action to the hospital inhabited by patients from all walks of life, Solzhenitsyn creates a microcosm in many ways resembling the larger world outside. By forcing patients to wrestle with existential topics such as the meaning of life and death, guilt, punishment, and the relationship between human beings, he symbolically transfers the focus to the whole state, the macrocosm of the Soviet Union. The implication is that the entire state is stricken with a deadly disease and that the only way to overcome it is by reexamining the basic premises of its existence and by fighting through determination and hope toward healing. The brotherhood of pain and the common menace of death thus become the only way of realizing the severity of affliction, personified best by the painful reevaluating process of the main character, Kostoglotov. His insistence on knowing everything about his illness, for example, is a reflection on his suppressed right as a citizen to know the truth.

The supporting cast of characters fits this scheme. A former high official, Pavel Nikolaevich Rusinov, represents the unfeeling ruling class unable to understand how disease can afflict them also. The two chief doctors, Ludmila Afanasyevna Dontsova and Vera Kornilovna Gangart, do everything in their power to help, that is, to right the wrong. The young boy Dyomka, dying from leg cancer contracted by playing football, symbolizes the heavy price that the future of the nation has to pay. Several other patients demonstrate, one way or another, the generality of affliction and the common effort necessary for restoration to health.

To reduce the interpretation of *Cancer Ward* to political symbolism, however, robs it of its much wider application. The novel also applies to all humankind and, in doing so, attains a universal meaning.

## AUGUST 1914

**First published:** *August chetyrnadtsatogo*, 1971; revised, 1983 (English translation, 1972; revised, 1989)

**Type of work:** Novel

*The novel examines the circumstances leading to the Russian Revolution in an attempt to establish the truth about it.*

*August 1914* is the first installment in a four-volume effort under the common title *Krasnoe koleso* (*The Red Wheel*). The first Russian edition was published in Paris in 1971 and in English in 1972; the second, enlarged edition appeared in Russian in 1983 and in English in 1989. The second volume, *Oktiabr' shestnadtsatogo* (1984), appeared in English translation in 1999 as *November 1916*; the third and fourth volumes, *Mart semnadtsatogo* (1986-1988) and *April' semnadtsatogo* (1991), have yet to be translated.

Solzhenitsyn relied heavily on documentary material, obtained from historical archives, and on historical figures active in the first month of the war between the Russians and Austrians and their allies, the Germans. At the same time, he created fictitious characters who serve the purpose of commenting upon the war and expressing the author's views, especially Colonel Vorotyntsev, who is to a large degree the author's alter ego. Solzhenitsyn exchanges the masterfully depicted battle scenes with those of civilian life, all contributing to the reader's understanding of the events. As was customary with him, he surrounds the main figures, such as General Samsonov, with a host of minor characters. The result is a huge, mosaic-like canvas of a historic event in the tradition of Tolstoy.

As in practically all of his works, Solzhenitsyn is primarily after the truth. His prime concern is magnified here by the simple fact that the events in 1914 directly led to the revolution in Russia and that the history of World War I was tailored heavily to reflect the views of the victors—the Bolsheviks. The ultimate truth of *August 1914* is, as Solzhe-

nitsyn saw it, that the czarist government was inept and corrupt and that its weaknesses, rather than the strength of the Bolsheviks, prepared the way for their eventual triumph. This premise is illustrated best at the end of the novel by the generals' blaming Samsonov for the defeat, rather than admitting their own failures.

Solzhenitsyn also pursues his well-established thesis that the responsibility of the individual—that is, his or her dignity—is the ingredient that spells victory or defeat in the constant struggle for a decent life. The treatment of fellow human beings goes a long way toward determining how he or she will react; the better the treatment, the greater the chances for a success, and vice versa. Thus, Solzhenitsyn went beyond the mere writing of a historical novel; he used this book to establish some basic truths about how humans behave as social beings, which could then be used to understand the subsequent events in Russia.

The enlarged edition of *August 1914* contains fifteen new chapters amounting to more than three hundred pages, all running consecutively. They do not change the basic premises of the first edition's plot, but they do add considerable material pertaining to the machinations behind the front lines, as well as further historical background.

### SUMMARY

Aleksandr Solzhenitsyn considered his vocation as a mission toward the obtainment of the truth. All of his works serve this goal in one way or another. That he had an ax to grind against the system, which at one point almost cost him his life, was overshadowed by a higher purpose of fulfilling the noble mission of an artist—to serve the truth.

Solzhenitsyn was to a large degree successful in this endeavor, thanks primarily to his powerful artistic qualities, through which he rendered invalid the assertion that he was basically a writer of political and historical works. His meteoric rise to the status of a leading writer in world literature speaks for itself.

Vasa D. Mihailovich

## BIBLIOGRAPHY

### By the Author

#### LONG FICTION:

*Odin den' Ivana Denisovicha*, 1962 (*One Day in the Life of Ivan Denisovich*, 1963)

*Rakovy korpus*, 1968 (*Cancer Ward*, 1968)

*V krughe pervom*, 1968 (*The First Circle*, 1968)

*Avгust chetyrnadtsatogo*, 1971, expanded version 1983 (*August 1914*, 1972, expanded version 1989)

*Lenin v Tsyurikhe*, 1975 (*Lenin in Zurich*, 1976)

*Krasnoe koleso*, 1983-1991 (includes *Avгust chetyrnadtsatogo*, expanded version 1983 [*The Red Wheel*, 1989]; *Oktiabr' shestnadtsatogo*, 1984 [*November 1916*, 1999]; *Mart semnadtsatogo*, 1986-1988; *Аprel' semnadtsatogo*, 1991)

#### SHORT FICTION:

*Dva rasskaza: Sluchay na stantsii Krechetovka i Matryonin dvor*, 1963 (*We Never Make Mistakes*, 1963)

*Dlya pol'zy dela*, 1963 (*For the Good of the Cause*, 1964)

*Krokhотnye rasskazy*, 1970

*Rasskazy*, 1990

#### POETRY:

*Etyudy i krokhотnye rasskazy*, 1964 (translated in *Stories and Prose Poems by Alexander Solzhenitsyn*, 1971)

*Prusskie nochi*, 1974 (*Prussian Nights*, 1977)

#### DRAMA:

*Svecha na vetru*, pb. 1968 (*Candle in the Wind*, 1973)

*Olen'i shalashovka*, pb. 1968 (*The Love Girl and the Innocent*, 1969; also known as *Respublika truda*)

*Plenniki*, pb. 1981 (*Prisoners*, 1983)

*Dramaticheskaya trilogiya-1945: Pir Pobediteley*, pb. 1981 (*Victory Celebrations*, 1983)

#### SCREENPLAYS:

*Znayut istinu tanki*, 1981

*Tuneyadets*, 1981

#### NONFICTION:

*Les Droits de l'écrivain*, 1969

*A Lenten Letter to Pimen, Patriarch of All Russia*, 1972

*Nobelevskaya leksiya po literature 1970 goda*, 1972 (*The Nobel Lecture*, 1973)

*Solzhenitsyn: A Pictorial Autobiography*, 1972

*Arkhipelag Gulag, 1918-1956: Opyt khudozhestvennogo issledovaniya*, 1973-1975 (*The Gulag Archipelago, 1918-1956: An Experiment in Literary Investigation*, 1974-1978)

*Pis'mo vozhdyam Sovetskogo Soyuza*, 1974 (*Letter to Soviet Leaders*, 1974)

*Iz-pod glyb*, 1974 (*From Under the Rubble*, 1975)

*Bodalsya telyonok s dubom*, 1975 (*The Oak and the Calf*, 1980)

*Amerikanskiye rechi*, 1975

*Warning to the West*, 1976

## DISCUSSION TOPICS

- Investigate the concentration camps in Aleksandr Solzhenitsyn's works as microcosms of Soviet society.
- Relate *One Day in the Life of Ivan Denisovich* to other novels that describe only a single day in the life of a protagonist.
- In what significant ways is Shukhov unlike his creator?
- Explain the significance of Gleb Nerzhin being a mathematician in *The First Circle*.
- Explain the appropriateness of the title *The First Circle*.
- Explain this statement: Kostoglotov in *Cancer Ward* is a character who can best be understood by cancer patients.

*The Mortal Danger: How Misconceptions About Russia Imperil America*, 1980

*East and West*, 1980

*Kak nam obustroit' Rossiю? Posil'nye soobrazheniia*, 1990 (*Rebuilding Russia: Reflections and Tentative Proposals*, 1991)

*Russkii vopros*, 1994 (*The Russian Question: At the End of the Twentieth Century*, 1994)

*Invisible Allies*, 1995

*Dvesti let vmeste, 1795-1995*, 2001

MISCELLANEOUS:

*Sochineniia*, 1966

*Stories and Prose Poems by Alexander Solzhenitsyn*, 1971

*Six Etudes by Aleksandr Solzhenitsyn*, 1971

*Mir i nasiliie*, 1974

*Sobranie sochinenii*, 1978-1983 (10 volumes)

*Izbrannoe*, 1991

## SOPHOCLES

**Born:** Colonus, near Athens, Greece  
c. 496 B.C.E.

**Died:** Athens, Greece  
c. 406 B.C.E.

*One of the three great tragedians of ancient Greece, Sophocles created dramatic masterpieces that explored the limitations of human knowledge and the cost of heroic perseverance.*

### BIOGRAPHY

In modern Athens, Greece, the birthplace of Sophocles (SAHF-uh-kleez) in Colonus stands well within the city limits. Yet at the beginning of the fifth century B.C.E., at the time when Sophocles was born (c. 496 B.C.E.), Colonus remained an identifiable community with its own traditions and heroes. One of those heroes had, according to legend, been an exiled Theban king who vanished mysteriously in a grove at Colonus and who continued to protect the area until Sophocles' own day. The name of this exiled Theban king was Oedipus, a figure who would one day be central to three of Sophocles' most famous tragedies.

Little is known about Sophocles' father, a man named Sophilus. An anonymous biography of Sophocles has been appended to some of the author's manuscripts. This biography suggests that Sophilus may have owned slaves who worked in the construction and bronze-making industries. Moreover, to judge from the quality of his son's education, Sophilus must have been quite wealthy. Sophocles studied music under Lamprus, regarded by the Greek biographer Plutarch and others as one of the most traditional and conservative teachers in Athens at that time.

Tradition indicates that, as a boy, Sophocles sang in the chorus that celebrated the Athenian naval victory over the Persians at Salamis. Later in his

life, however, Sophocles stopped appearing on stage because of his weak voice. As an adult, Sophocles is known to have played the title role in one work and performed the lyre in another. With these exceptions, Sophocles ended the custom by which Athenian playwrights would assume the leading roles in their own tragedies.

The anonymous biography of Sophocles also states that the poet learned the art of tragedy from Aeschylus. It is not clear, however, whether this means that Aeschylus actually served as Sophocles' tutor or merely that Sophocles began writing his works in imitation of the older poet. In any case, the student quickly began to equal, or even surpass, the master. Throughout the fifth century B.C.E., prizes were awarded to playwrights who, in the opinion of judges, composed the finest tragedies at each year's Festival of Dionysus, called the Great Dionysia. In 468 B.C.E., Sophocles won his first tragedy award over Aeschylus with a trilogy of plays that included the *Triptolemus*, which no longer survives. One ancient legend says that, in this initial contest against Aeschylus, the passions of the audience ran so high that the ten Athenian generals awarded the victory rather than the customary ten civilian judges.

Sophocles was to receive the first prize approximately twenty times, more frequently than any other playwright. He often won second prize and never, say the ancient authorities, came in last. In 438 B.C.E., Sophocles won the tragedy victory in his first contest against Euripides, whose plays that year included the *Alkestis* (438 B.C.E.; *Alcestis*, 1781).

Sophocles was universally described by contemporary authors as a kindly and pious man. He held a priesthood in the cult of the healer god Alcon or Halon, founded a shrine of Heracles, and seems to have maintained a special devotion to the god Asclepius. After his death, Sophocles himself was worshiped as a divine hero under the name Dexion.

Sophocles was also actively involved in the political and military life of the Athenians. He held several public offices, was one of the stewards in charge of the treasury of the Athenian empire, and served as general, along with the statesman Pericles. A fragment of the *Epidemiae* by Ion of Chios says that Pericles was not much impressed by Sophocles' military skill and regarded him as no better as a general than any nobleman would be. Ion says that Sophocles later stole a kiss from one of the servants and then remarked, "Perhaps I'm not as bad a strategist as Pericles thinks!"

Another story, possibly legendary, says that near the end of his life, Sophocles was placed on trial for senility by one of his sons, who wished to gain control of the family fortune. Sophocles is said to have defended himself by reading to the jurors passages from his *Oidipous epi Kolōnōi* (401 B.C.E.; *Oedipus at Colonus*, 1729), which he composed while in his nineties. At the end of the trial, Sophocles is quoted as remarking, "If I am Sophocles, then I am not mad. If I am mad, then I am not Sophocles." Sophocles died shortly after this trial in about 406 B.C.E., at the age of ninety or ninety-one, in Athens. The Spartan general Lysander, who was besieging Athens at the time, so respected the poet that he allowed the Athenians to leave their city and bury Sophocles on the road to Deceleia.

## ANALYSIS

Plutarch says that Sophocles himself saw three periods in his work: an early period of ponderous tragedies written in imitation of Aeschylus, a middle period of plays that were bitter and artificial, and a late period in which his tragedies best exemplified fullness of character and were those that he considered his best works. While the poet's judgment concerning his first two periods seems excessively harsh, it does confirm at least one general impression. Sophocles' early plays, such as the *Aias* (early 440's B.C.E.; *Ajax*, 1729) and the *Antigonē* (441 B.C.E.; *Antigone*, 1729), reflect the influence of

Aeschylus. Aeschylus's use of the "double bind"—the situation in which a character will be doomed no matter which course is chosen—in such works as the *Oresteia* (458 B.C.E.; English translation, 1777) and the *Hepta epi Thēbas* (467 B.C.E.; *Seven Against Thebes*, 1777) has affected the presentation of both Antigone and Creon in *Antigone*. Moreover, Aeschylus's preference for long, and sometimes obscure, compound words has a parallel to Sophocles' use of language in such early works as the *Ajax* and the *Trachinai* (435-429 B.C.E.; *The Women of Trachis*, 1729).

Yet Sophocles was not content to write tragedies exactly as Aeschylus had done. Tradition reports that Sophocles introduced several innovations in the staging of Greek drama, such as the use of a third actor, scene painting, and a slightly larger chorus. The real contribution of Sophocles, however, was in his approach to plot and character. The later a Sophoclean tragedy is, the more its plot tends to be focused upon an individual hero. This tendency is quite different from the tragedies of Aeschylus, which usually deal with an entire household or even trace a story over several generations.

In Sophocles, the individual hero is always at the core of the story. Perhaps for this reason, six of Sophocles' seven extant tragedies are named for their central characters. On the other hand, five of Aeschylus's seven extant tragedies took their name from the chorus or from some other group of mythological figures. Perhaps also for this reason, Sophocles, unlike Aeschylus, did not write connected trilogies but allowed each play in a trilogy to deal with a different character and a different story.

Sophocles' approach to character has also affected the construction of his tragedies in other ways. The long passages of monologue, familiar from Aeschylean drama, are now replaced by dialogue. Information that the audience needs to understand the plot is allowed to emerge gradually through conversation between the characters. Moreover, exchanges between characters with differing points of view—Antigone and Creon, Teucer and Menelaus, Oedipus and Polyneices—are able to provide the audience with insight into the psychological motivation of each individual.

This psychological motivation is frequently the key to another element of Sophoclean tragedy: the role of fate. It is frequently noted that nearly every

tragedy by Sophocles hinges upon the fulfillment of an oracle or a prophecy. Yet this does not necessarily mean that Sophocles believed that humanity was a pawn in the hands of the gods. It is always true that, in Sophoclean tragedy, the destiny of the characters follows logically from their own choices. The gods may predict human suffering, but they are rarely the primary causes of disaster in these works. “Character,” the Greek philosopher Heraclitus once said, “determines a person’s destiny.” In Sophoclean tragedy, fate is always founded upon this maxim.

One major way in which character determines destiny in these plays is through the “heroic flaw.” In *De poetica* (334-323 B.C.E.; *Poetics*, 1705), Aristotle speaks of a tragic flaw, mistake, or error of judgment (*hamartia*) that brings a character from prosperity to ruin. In Sophocles, this tragic flaw is almost always the very same quality that brought about the hero’s greatness. Thus, Ajax’s pride, Antigone’s inability to compromise, Oedipus’s thirst for knowledge, and Heracles’ confidence in his own abilities are initially responsible for the success of these characters. Ultimately, however, these same heroic flaws destroy the persons whom they once made great.

## ANTIGONE

**First produced:** *Antigonē*, 441 B.C.E.  
(English translation, 1729)

**Type of work:** Play

*A young woman is condemned to death for burying her brother in violation of the king’s decree.*

*Antigone*, *Oedipous Tyrannos* (c. 429 B.C.E.; *Oedipus Tyrannus*, 1715), and *Oedipus at Colonus* are not a trilogy in the true sense. That is to say, they were not originally written to be performed on a single occasion. Rather, these three plays represent Sophocles’ return to the same body of myths several times during his long career as a dramatist. Nevertheless, the Theban plays, as they are called, together tell the complete story of Oedipus from the height of his power as king of Thebes to the execution of his daughter for the burial of his son, Polyneices.

*Antigone*, although it concerns the last events in the mythic history of this family, was the first of the three plays to be written. In it, certain elements of plot seem to indicate that Sophocles, in this early period of his career, was still imitating the works of his predecessor Aeschylus. For instance, both Antigone and Creon find themselves caught in a “double bind,” a situation in which they are doomed no matter which course of action they choose. Although Antigone suffers because she violates the law of Creon by burying her brother Polyneices, she would have neglected her religious duty had she left him unburied. Creon suffers because he regards his will as more important than the demands of the gods, although political pressures compelled him to punish the traitor of his city.

Antigone and Creon thus represent the two sides that may be taken toward any issue of great importance. Antigone defends the will of the gods, emphasizing the bond that she has to her family more than that which she has toward the state. Creon defends the need for law and order in a community, viewing civil law as more important than the will of the individual.

While these two points of view come into conflict in the *Antigone*, Sophocles does not regard them both as equally correct. Every character in the play, including the chorus and even Creon himself in the end, declares that Antigone was right and that Creon was wrong. Yet the justice of Antigone’s cause is not sufficient to save her. Many characters in Sophoclean tragedy suffer, not despite being right, but because they were right.

The *Antigone* illustrates, therefore, that there is a price to be paid for heroic inflexibility. It is unthinkable that Antigone, as Sophocles has drawn the character, would choose compromise rather than death. Her destruction follows inevitably from her unswerving devotion to the cause in which she believes. Nevertheless, it is one of the ironies of the *Antigone* that Creon also suffers because of his inflexibility and confidence. The very quality

that made Antigone seem admirable makes Creon seem stubborn and petty. In the end, their fates are determined less by the nature of the cause that they defend than by the manner in which they defend it.

## OEDIPUS TYRANNUS

**First produced:** *Oidipous Tyrannos*,  
c. 429 B.C.E. (English translation, 1715)

**Type of work:** Play

*A prosperous king of Thebes learns that, because of a curse, he has unknowingly killed his father and married his own mother.*

The chorus at the end of a Greek tragedy will frequently state that human knowledge is limited and that the gods work in ways that human beings do not expect. No tragedy deals with this theme more explicitly than *Oedipus Tyrannos*. Despite Oedipus's great confidence in his own knowledge, he is shown throughout the play to be wrong about nearly everything. By the end of the tragedy, Oedipus realizes that he had not even known who he was, where he had been born, or how unfortunate he had been. His fate illustrates the dangers of overconfidence: No matter how certain one may be about things, there is always the possibility that one may be wrong.

Oedipus goes from being a powerful and confident king at the beginning of the tragedy to being a blind beggar at the end. In part, this downfall is the result of his own anger. Oedipus states explicitly that it was due to anger that he killed the man who had blocked his way at the crossroads (line 807); this man turns out to have been Oedipus's father, Laius. Yet it is also stated several times that Oedipus was destined to kill Laius (lines 713-714) and to marry his mother, Jocasta (lines 789 to 793). These two views are not at all contradictory; both Oedipus and fate have determined his suffering. The ancient Greek view was that an event need not have but a single cause. Actions could be "overdetermined," that is, caused both by the will of the gods and by the nature of the individuals who perform them.

Moreover, Oedipus is an illustration of Heraclitus's dictum that "Character determines a person's

destiny." It is Oedipus's nature to be confident, brash, and desirous of the truth. These are the qualities that enabled him to defeat the Sphinx and that led to his greatness. These are also the qualities that lead to his downfall in this play. As is often the case in Sophoclean tragedy, the same "heroic flaw" that produced the central character's success also leads to his suffering.

Sophocles contrasts Oedipus with Teiresias, the blind seer, in this play. Ironically, the character who is blind can "see" the truth much more clearly than can Oedipus, who prided himself on his "insight." Only when Oedipus himself is blind does he "see" the truth. Genuine truth, Sophocles suggests, is not derived from mere observation of physical realities. Rather, truth is perceived through an inner wisdom and is possible only when one is not distracted by the things of this world.

## ELECTRA

**First produced:** *Ēlektra*, 418-410 B.C.E.  
(English translation, 1649)

**Type of work:** Play

*After years of waiting, Electra is reunited with her brother, Orestes, who punishes their mother for killing their father.*

The story of Electra was treated by the three major classical tragedians, each in his own characteristic way. For Aeschylus, the story of Electra in the *Choēphoroi* (458 B.C.E.; *Libation Bearers*, 1777) is but a single episode in the sweeping history of a family; it is the second play of the *Oresteia*, a connected trilogy that presents the story of Electra's household from the return of her father, Agamemnon, to the acquittal of her brother, Orestes. For Euripides, the *Electra* was a psychological profile of a woman who had endured outrage and humiliation for nearly a decade; Euripides openly criticized Aeschylus's treatment of this story and changed many details of the plot. For Sophocles, Electra became the embodiment of heroic defiance, a return to many of the themes earlier explored in the *Antigone*.

Indeed, there are many ways in which Sophocles' version of *Electra* bears a closer resemblance to

his *Antigone* than to the treatments of Electra by the other two playwrights. First, Sophocles contrasts both Electra and Antigone with a sister (Chrysothemis and Ismene, respectively) who is willing to compromise in order to live in peace. Both Electra and Antigone, in Sophocles' version of their stories, devote themselves to a cause to such an extent that they forego husband and children; Aeschylus's Electra has at least the serving women for comfort, and Euripides' Electra is even married. Most important, perhaps, Sophocles' *Electra* depicts the vengeance against Clytemnestra and Aegisthus as an end to the household's suffering; in both Aeschylus's and Euripides' versions, there is foreshadowing of Orestes' pursuit by the Furies, who will seek to punish him for this murder. Thus, Sophocles' *Electra*, like his *Antigone*, represents the price that must be paid for heroic endurance.

Yet while Antigone paid with her life for defying Creon, Electra emerges triumphant at the end of this play. By the close of the tragedy, Electra's vengeance has been fulfilled, her patience has been justified, and her enemies have been destroyed. The audience is able to witness her joy as vengeance is achieved. Nevertheless, Electra's cries of joy are as chilling as they are deserved. Electra has gained her victory only at an appalling personal cost. She has devoted her youth to the memory of her father and has planned her vengeance for nearly a decade. Heroism comes at a price far higher than the chorus, Chrysothemis, and even most members of the audience would be willing to pay.

## OEDIPUS AT COLONUS

**First produced:** *Oidipous epi Kolōnōi*,  
401 B.C.E. (English translation, 1729)

**Type of work:** Play

*After years of wandering as a blind exile,  
Oedipus is received in Athens, where he  
undergoes a mysterious apotheosis.*

*Oedipus at Colonus* was written in 406 B.C.E., shortly before Sophocles' death, and was not performed until five years later. Since the play dates to about forty years after the *Antigone* and more than

twenty years after *Oedipus Tyrannus*, it is not surprising that the figures of Creon, Antigone, and even Oedipus himself seem somewhat different from Sophocles' earlier presentation of them. Creon, in particular, is wholly unlike his depiction in the other two plays. The Creon of *Antigone* was stubborn and mistaken but he did, at least, attempt to do what was right as he understood it. The Creon of *Oedipus Tyrannus* was patient and reasonable, a minor character who was completely sympathetic during his brief appearance on the stage. In *Oedipus at Colonus*, Creon is pure evil; his function is to provide a villainous foil for Oedipus and Theseus, and that he does to perfection.

Creon's role as the stereotypical villain in this work makes *Oedipus at Colonus*, like *Electra*, seem more like a melodrama than a tragedy in structure. For example, there is in this work no fall of a noble character to a more humble position, no reversal of fortune from good to evil, no "tragic flaw." Indeed, by the end of the play Oedipus is elevated from poverty to heroic status and will be worshiped even among the gods after his death. Yet it must be remembered that Greek tragedy did not always adhere to the general outline that Aristotle described. It must be remembered, too, that Aristotle wrote the *De poetica* (c. 334-323 B.C.E.; *Poetics*, 1705) more than half a century after the death of Sophocles. To force *Oedipus at Colonus* to fit Aristotle's form of the "perfect tragedy" would damage the work. One of the great appeals of the *Oedipus at Colonus* is that its structure is so unlike that of any other tragedy.

*Oedipus at Colonus* was Sophocles' final homage to the district in which he was born and to that area's most famous hero. Written in a period when Athens was already losing the Peloponnesian War to the Spartans, this play reminds the Athenians of their own glorious past and of the hero who protected them. In the tragedy's most famous ode (lines 668-719), Sophocles celebrates, not only the physical beauty of Athens and Colonus, but also its

civic virtues: its hospitality, its perseverance, its ability to recover even from the most formidable opposition and defeat. These virtues, the poet suggests, could yet be the salvation of Athens if the city's people would renew their confidence in their gods, their heroes, and themselves.

Like the perfected Athens that Sophocles describes, Oedipus in this tragedy draws his strength from some mysterious source. Despite years as a blind beggar, Oedipus becomes restored to moral strength as the plot unfolds. He spurns the treachery first of Creon and then of Polyneices. Finally, without even permitting anyone to guide him (lines 1520-1521), Oedipus himself leads Theseus into the grove where his miraculous transformation will take place. The account given by the messenger (lines 1586-1665) is not the death of a blind, old beggar but the apotheosis of a hero. Like Athens herself, Oedipus may have been guilty of many crimes, but he has been chosen by the gods to be special and is elevated at the very moment when he had seemed most humbled.

### SUMMARY

Sophocles was the poet of the hero. The central characters of his tragedies are each “larger than life” and willing to endure bitter opposition because of their adherence to a conviction. Many times, this same unwillingness to yield both results in the hero's greatness and is the cause of the hero's suffering. A “heroic flaw” makes the hero different from ordinary people; it is the reason why heroes are admired but it is also responsible for their destruction. The hero is simply too great to live in an imperfect world.

To ordinary individuals, for whom heroic excellence is beyond their grasp, Sophocles counsels moderation. Human knowledge is limited, the

### DISCUSSION TOPICS

- What are the formal differences between the tragedies of Sophocles and those of his greatest predecessor as Greek tragic playwright, Aeschylus?
- How do Sophocles' Theban plays differ from typical trilogies?
- Does *Antigone* convey the impression that there is no such thing as justice?
- Is it convincing to explain Oedipus's downfall as the result of a “flaw”?
- How do the surviving versions of the Electra story confirm the greatness of the three principal Greek tragic playwrights?
- How does Sophocles induce readers to empathize with protagonists whose stubbornness overpowers the knowledge which they have and which could preserve them?
- How could Sophocles' audience accept his reimagining of legendary characters that appear in more than one play?

poet argues, and people rarely understand as much as they think they do. Passionate adherence to a principle in the face of logic and opposition can cause grief, even destruction. For heroes, this outcome is an inevitable condition of their greatness. For the ordinary person, however, stubbornness is foolhardy: One must always be ready to be proven wrong.

## WOLE SOYINKA

**Born:** Ijebu Isara, near Abeokuta, Nigeria  
July 13, 1934

*Soyinka's plays, poetry, and other works combine Western and traditional African forms with elements of Nigerian culture to speak for human rights.*

### BIOGRAPHY

Akinwande Oluwole Soyinka (sho-YIHNG-kah) was born on July 13, 1934, in Ijebu Isara, near Abeokuta, western Nigeria, where he grew up. His parents were from the Ijebu and Egba ethnic groups, both of which spoke Yoruba. "Abeokuta" means "under the rock," referring to the home of the town's guardian deity. Soyinka's parents were Christian, and Nigeria was then under British colonial rule. Soyinka was reared with roots in the Yoruba culture but was heavily influenced by Western thought.

He attended schools in Nigeria until he was twenty and then went on to the University of Leeds in England in 1954. At that time, the university had an unusually active drama department, and Soyinka had the opportunity to see and act in a variety of plays. After graduating with honors in 1957, he remained in England for a few years, working as a script reader and eventually as a writer with the Royal Court Theatre in London. This association gave him the chance to see many of England's best directors, actors, and playwrights at work. He produced his own first play, *The Swamp Dwellers*, at the Royal Court Theatre in 1958.

In the meantime, the Arts Theatre in Ibadan had opened as the first theater presenting Nigerian works to a Nigerian audience. *The Swamp Dwellers* (pr. 1958, pb. 1963) and another one of

Soyinka's plays, *The Lion and the Jewel* (pr. 1959, pb. 1963), were performed there in 1959. Audiences were gratified to discover an African playwright who could create fine characters and dialogue in English. Soyinka was urged to come home.

He returned in 1960, sponsored by a Rockefeller Foundation grant. The grant enabled him to travel throughout Nigeria, studying traditional festivals, art, and literature. He formed a drama troupe and produced, directed, and acted in a performance of his play *A Dance of the Forests* (pr. 1960, pb. 1963). In 1960, Nigeria gained independence from Britain. *A Dance of the Forests*, which won a prize during independence celebrations, depicts the conflicts between traditional African values and the values of British colonialists. Like all of Soyinka's plays, it incorporates Yoruban proverbs and traditional dance and music, demonstrating Soyinka's belief in the need for cultural as well as political independence.

Soyinka taught at Nigerian universities in Ibadan, Lagos, and Ife over the next several years. He produced and published seven more plays that gained increasing recognition in London and New York and helped other Nigerian dramatists produce and publish their work. He also wrote a novel, *The Interpreters*, published in 1965.

In 1965, he was arrested for allegedly contributing to an illegal radio broadcast critical of the government. He was acquitted of the charges. In 1967, as Nigeria moved toward civil war with the eastern region of Biafra, Soyinka published several letters in Nigerian newspapers criticizing the conflict and demanding a cease-fire. He was arrested and jailed without charges in 1967. He remained a political prisoner for two years and two months, spending

fifteen of those months in solitary confinement. Later, he wrote about his experiences in *Poems from Prison* (1969) and in a memoir, "The Man Died": *Prison Notes of Wole Soyinka* (1972).

His prison term left a strong mark on his work. Always concerned with social and political matters, Soyinka's writings after prison became more passionate about human rights and social change. He was not afraid to criticize the corruption and greed of Nigeria's postcolonial African rulers. Many of his later satirical plays, including *Madmen and Specialists* (pr. 1970; revised pr., pb.1971), *Opera Wonyosi* (pr. 1977, pb. 1980), and *A Play of Giants* (pr., pb.1984), denounce Nigeria's military rulers. Shortly after his release from prison, Soyinka went into political exile. He lived in Ghana, England, and the United States until 1975, when the regime that had imprisoned him fell.

During the 1970's and 1980's, Soyinka wrote more than a dozen plays, which were produced in Nigeria, Ghana, England, France, and the United States. He edited the journal *Transition/Ch'Indaba* in Ghana, using the journal to criticize Africa's military dictators, in particular Uganda's Idi Amin. He also published volumes of poetry and literary criticism, as well as two fascinating autobiographical volumes, *Aké: The Years of Childhood* (1981) and *Isarà: A Voyage Around "Essay"* (1989), a tribute to his father. *Aké: The Years of Childhood* was named by *The New York Times* as one of the twelve best books of 1982.

In 1986, Soyinka was awarded the Nobel Prize in Literature. His Nobel lecture, "This Past Must Address Its Present" (1986), soundly criticizes apartheid in South Africa and affirms the power of art to bring about social change. He continued to condemn political oppression, and by this time familiar with many of the major governmental and resistance figures in several countries, he worked behind the scenes to bring important figures together for diplomatic talks. After the dictator General Sani Abacha came to power in Nigeria in 1993, Soyinka openly worked against him. Faced with threats of arrest, Soyinka fled Nigeria in 1994 and moved to the United States, where he taught at Emory University in Atlanta, Georgia, and continued to write poetry, essays, and plays. The Abacha government formally charged him with treason in 1997.

Soyinka returned to Nigeria in 1999, after Abacha

was deposed, to teach at the University of Ife. In 2006, he published his fifth volume of memoirs, *You Must Set Forth at Dawn: A Memoir*, chronicling his last years in Nigeria and his life as an exile. That year, he was invited to present a keynote address at a writing conference in Bangkok, Thailand, but cancelled his speech in protest of abuses by the Thai military. In 2007, he publicly criticized widespread fraud in that year's Nigerian presidential elections.

## ANALYSIS

It would be simplifying only a little to say that Soyinka's writing can be divided into two phases. All of his work is marked by a social consciousness and a skillful intermingling of Western and traditional West African culture. Soyinka's interment as a political prisoner in Nigeria, however, changed him and his artistic vision forever.

His first plays were performed shortly before and shortly after Nigeria gained independence from British colonial rule. The conflict brought about by overlapping and opposing cultures is the subject of the early plays, including *The Swamp Dwellers*, *The Lion and the Jewel*, and *A Dance of the Forests*. In each of these plays, the setting is West Africa, and the main characters are Africans who come into contact with European ways and values.

Soyinka is not a detached observer of cultural clash. His sentiments lean heavily toward the traditional culture. His dialogue contains many Yoruba proverbs. Traditional song, dance, costume, and ritual are also part of his plays; Yoruban deities are invoked. These traditional elements are not presented as interesting curiosities. In these plays, Soyinka emphasizes how Nigeria is politically independent of Great Britain and how his native country must take pride in tradition and claim cultural independence. Nigerian art must use Nigerian elements; artists must help the Nigerian people celebrate their heritage, instead of yearning, as the schoolteacher does in *The Lion and the Jewel*, for a European life that is not theirs.

Serious as these ideas are, the early plays often present them through comedy and satire. Both the village "bale" (leader) and the schoolteacher in *The Lion and the Jewel* are somewhat ridiculous figures. Their exaggerated speeches are funny and demonstrate their weaknesses. *The Trials of Brother Jero* (pr. 1960, pb. 1963) presents a preacher who is

a very humorous buffoon. In *The Road* (pr., pb. 1965), Professor is a comic scalawag, while Samson is a comic coward.

These early plays are also marked by obscurity. The young Soyinka was, in effect, creating the modern English Nigerian theater, and he was determined that this theater would defy the expectations of Nigerians and Europeans alike. Beginning with *A Dance of the Forests*, Soyinka experimented with different ways to structure his plays. *A Dance of the Forests* has a plot of sorts, and characters and dialogue. On the other hand, the chronology is skewed, the dialogue is filled with hard-to-understand proverbs, and the action is interrupted for dances and rites that are not explained. Critics have argued for decades about the meaning of this play. Experimentation has always made Soyinka's greatest plays hard to understand—often more something to be experienced and felt than to be analyzed and understood.

The work Soyinka produced after his release from prison is clearly the work of the same gifted man. The man is older, however, and more in control. The later plays, while still rich and dense, are not so obscure; these plays also have a note of seriousness and urgency. The political satire of *The Road* still appears, but without *The Road's* softer comic elements. After prison, Soyinka's targets for satire are not Westerners or would-be Western Africans. Instead, he targets the weaknesses and corruption of Nigerian military rule.

Of his work before his prison term it might be said that his chief concerns were for honoring and validating traditional African culture in an increasingly Westernized world. After prison, his attention shifted slightly, so that his focus was on the broader issue of human freedom and on bringing the world's attention to political tyranny in Africa and around the world. In *Death and the King's Horseman* (pb. 1975, pr. 1976), he shows clearly that freedom is tied up with responsibility. *Opera Wonyosi* attacks the greed and tyranny of many contemporary African rulers; this play argues that freedom must mean freedom for all.

Several of Soyinka's works since the 1970's deal directly with specific corrupt regimes in Nigeria, Uganda, or other African countries; apartheid in South Africa received particular attention through the 1980's, and Nigeria through the 1990's and beyond. These specifically targeted works also deal

on a general level with human rights and freedoms, and these plays have been performed and well received throughout the world.

Through his long career, Soyinka has been much more than a playwright, although he will be best remembered for his more than twenty plays. He also is an accomplished actor and has directed plays and films. He has published many articles of literary criticism in African, European, and American journals, collecting the most important of them in *Myth, Literature, and the African World* (1976) and *Art, Dialogue, and Outrage: Essays on Literature and Culture* (1988). He has published five volumes of memoirs. These volumes demonstrate Soyinka's dedication to African tradition and belief and show how his family and his people became the sources of his creative imagination.

He also has published two novels, *The Interpreters* and *Season of Anomy* (1973), which are not as strong as the plays. *The Interpreters* is an especially difficult novel because of its modernist approach to plot and language and because of many allusions to Yoruba tradition that are not explained.

More than his novels, Soyinka's poetry approaches the greatness of his plays. From his earliest volume, *Idanre, and Other Poems* (1967), through his later works, including *Mandela's Earth, and Other Poems* (1988) and *Samarkand and Other Markets I Have Known* (2002), his poetry shows the same concerns for social and political criticism as his drama. He may comment directly on politics, as in his early poem "Civilian and Soldier" or the later "Mandela's Earth." Other poems, such as "Season," use natural imagery to speak of universal truths.

Soyinka has long been recognized as one of the most important African figures in world literature. In 1986, he received the Nobel Prize in Literature—the first African to win that honor. The Swedish Academy praised him for his dedication to traditional culture and to human rights. He has not been universally accepted in Nigeria, where he has been criticized—even imprisoned—by political figures he has challenged. He has also been rejected by left-wing Nigerians, who see him as too European.

Soyinka's writing reflects his life: Immersed in two worlds, it draws on African and Western forms and sources. It uses the English language to bring Yoruba culture to the world.

## THE LION AND THE JEWEL

**First produced:** 1959 (first published, 1963)

**Type of work:** Play

*In a small Nigerian village, a schoolteacher with Western ideas confronts a cunning village chief whose power is threatened by modern ways.*

*The Lion and the Jewel*, written in London, was one of the first of Soyinka's plays to be performed in Africa. It was performed at the Ibadan Arts Theatre in 1959, where it was well received. *The Lion and the Jewel* was the first major play to draw on traditional Yoruba poetry, music, and dance to tell a Nigerian story in English. The play enabled Nigerian drama to become part of world theater.

*The Lion and the Jewel* is a comedy set in the small remote village of Ilujinle. There are three central characters: Lakunle, an eager but naïve schoolteacher who accepts Western ideas and modernity without really understanding them; Baroka, the village chief, who sees modern ideas as a threat to his power; and Sidi, the jewel of the village, a beautiful woman who will choose one of the men for a husband. The characters are exaggerated: Lakunle is arrogant and talks too much, and Baroka is cunning, but they are ultimately likable. Unlike many of Soyinka's later plays, there is no evil in this play, and the author pokes only gentle fun at his characters. In the end, the men will have to deal with each other. As Baroka says, "the old must flow into the new."

The play focuses on several conflicts that Soyinka presents but does not attempt to resolve. Lakunle and Baroka embody the contrary urges toward modernity and tradition. They personify the two sides of the major social and political issue in Africa during the last half of the twentieth century. They are not so far apart as they may think. Both look to the same Yoruban god, Sango. Both are skilled performers. Both are attracted to the same woman. Their conflict also is a universal one, between youth and age. Lakunle has new ideas, but he is inexperienced and brash. Baroka is afraid of progress, but he knows more of life.

The women in the play present other themes. Sidi chooses to marry the lion Baroka, who is much older than she, instead of the younger Lakunle be-

cause Baroka is more experienced as a lover and because he shares her view of marriage. Lakunle refuses to pay a bride price because he thinks the custom is old-fashioned and demeaning. Sidi believes the bride price will guarantee her rights and will not marry without it. Meanwhile, Baroka's senior wife Sadiku seethes inside. Women have little power in the traditional society, but they are beginning to question their role.

Soyinka presents these themes through an artful mingling of Western and Yoruban elements. Scenes of plot and action alternate with flashbacks employing dance and mime. The stage is peopled with Yoruban drummers, dancers, and one masked figure. The play closes with a grand marriage dance, invoking the gods of fertility. Like all good drama, *The Lion and the Jewel* uses local and personal elements to tell a universal story.

## DEATH AND THE KING'S HORSEMAN

**First produced:** 1976 (first published, 1975)

**Type of work:** Play

*A man refuses to answer a call to give up his life, placing his entire people in disharmony with the world of the ancestors.*

*Death and the King's Horseman*, one of Soyinka's tragedies, presents a representation of the Yoruba worldview. In Yoruba cosmology, there are three worlds: the world of the living, the world of the dead, and the world of the unborn. This play focuses on what connects all three worlds—transition, the pathway on which members of the different worlds meet and interact.

The opening of the play involves the ritual ceremonies for the burial of a dead king. Elesin, the king's horseman, attired in glorious robes, enters

the village marketplace in a majestic dance procession, followed by praise-singers and drummers. Elesin dances until he is in a trance, a state of transition. He performs poetry and song about the world of the ancestors and the connectedness of the three worlds.

The purpose of this ceremony is to help the dead king travel peacefully to the world of the dead. It should conclude with the suicide of Elesin, whose soul will accompany the king's. Elesin sees a beautiful woman in the crowd and demands one night of love with her before he dies. Iyaloja, the mother of the marketplace, reluctantly agrees.

Also in the village is the British colonial district officer, Pilking. He is well-meaning but unable to understand or respect the Yoruban people. He also performs a dance at a gathering of his own people—a mocking imitation of an African dance in captured regalia. When Pilking hears of Elesin's intention to die, he has him arrested to prevent it.

Soyinka makes it clear in his preface that this is not a mere clash of cultures; this is not simply a case of the white colonialist interfering with native culture. Elesin has failed to perform his duty, and his failure has cosmic significance. The white officer is a catalyst, but he cannot otherwise affect the village. The cosmic world is untouched by colonialism and materialism.

Elesin's son Olunde, a doctor, returns from England. He has heard of the king's death and assumes that his father's death is near. Olunde reveres native culture and has had wide experience of Western culture. He tries unsuccessfully to make Pilking understand Yoruban belief. Ashamed to see his father's failure, he kills himself in Elesin's place.

When Elesin sees his son's body, he takes his own life. This suicide is the result of shame, however, not duty, and it cannot repair the bonds that have been broken. The young bride, pregnant from her one night with Elesin, appears. She ritually closes her husband's eyes as Iyaloja says, "Now forget the dead, forget even the living. Turn your mind only to the unborn."

## "SEASON"

**First published:** 1967 (collected in *Idanre, and Other Poems*, 1967)

**Type of work:** Poem

*Observing the decaying fields at the end of the growing season, the speaker remembers that decay leads to new growth.*

"Season," one of Soyinka's most widely anthologized poems, is in the Grey Seasons section of his first poetry collection, *Idanre, and Other Poems*. The poem is easily accessible to readers around the world because of its simple and universal theme. Many of Soyinka's early poems are of this type. In later poems, Soyinka more frequently turns directly to politics, requiring more knowledge of historical figures and events on the part of the reader.

"Season" is spoken by a narrator who is involved with growing and harvesting. At harvesttime he or she surveys a cornfield and considers how ripening and decay are intermingled. Although the final message is one of hope, the tone of the poem is dark and mournful.

The poem opens with a short statement of the theme: "Rust is ripeness." The word "rust" can carry many meanings, and all these meanings work in the poem. It can be oxidized iron, a symbol of decay. There is a fungus called rust that can attack plants (destruction) but which is itself alive (creation). Rust is also the color of the corn, when ripe, that is grown in many parts of Africa (creation). "Rust is ripeness" points out a central paradox of life.

The poem contrasts two seasons of life, youth and age, using subtle manipulation of verb tense to develop the ideas. The first stanza describes youth—"mating time"—with images of light and dance, leaves and feathers. The mating time is described in present tense, but the speaker remembers that "we loved to hear" the sounds of it. The past tense points out that the time has passed for "us."

The second stanza describes the harvesttime, when the people "draw/ long shadows from the dusk." The imagery is of darkness and dryness, and the verbs are in the present tense. This is not a time without hope. Twice in the six-line stanza Soyinka uses the word "await." At the opening of the stanza,

the speaker is “awaiting rust.” By the end of the stanza, reminded of the creation that follows destruction, he amends it to “we await/ The promise of the rust.”

Critics have pointed out that early in his life, Soyinka took as his personal muse the Yoruba deity Ogun. Ogun is a god of artistic skill but also a god of war. This dual nature—of creation and destruction—echoes the ideas of growth and decay found in “Season.” Soyinka was fascinated with the ambiguities Ogun represented. He turned again and again in his poetry and plays to this idea that destruction and creation were forever tied.

## YOU MUST SET FORTH AT DAWN

**First published:** 2006

**Type of work:** Nonfiction

*Soyinka recounts his career as an intellectual and an activist, remembering the friends, colleagues, and enemies who shaped his political philosophy.*

*You Must Set Forth at Dawn* is Soyinka’s fifth book of memoirs, but unlike the previous four it does not limit itself to a relatively confined span of time. This long and dense volume, instead, looks back as far as Soyinka’s earliest days as a university student in London, covering more than fifty years in the theater, in the academy, and in the political world, while avoiding mention of his family life.

The first section of *You Must Set Forth at Dawn*, placed before the chapters Soyinka labels as “Part I,” is “IBA—For Those Who Went Before,” and it establishes the approach Soyinka takes to the material in this memoir. It opens abruptly, in medias res, as Soyinka is on a plane heading toward Nigeria, remembering past plane trips: his return from exile and his trip to bring back the body of another political exile, his friend Femi Johnson. From here he moves on to an anticipation of and reflection on the loss of cactus in the bush landscape near his home in Abeokuta, and then on to a consideration of the human landscape and its loss of another friend, the late former vice chancellor at the University of Ife, Ojetuni Aboyade. Soyinka moves freely from anecdote to anecdote, from re-

flection to narrative to dialogue to poetry; the section’s twenty-eight pages are broken up into nine separate episodes. While the body of the book is roughly chronological, the frequent digressions and the references to an African history that the author knows far better than many of his readers makes this a challenging memoir for his non-Nigerian audience.

One of the most interesting features of this volume is Soyinka’s vivid and insightful portraits of several of the national leaders with whom he has interacted, including French president François Mitterrand, Tanzanian president Julius Nyerere, and others. As the memoir unfolds, Soyinka describes personal relationships with nearly all of the important figures in the history of Nigeria over the past fifty years. He tells, for example, of his admiration for and friendship with African National Congress leader Nelson Mandela; he relates his secret attempts in 1991 to arrange diplomatic meetings between Mandela and his rival for political power in South Africa, Inkatha Freedom Party leader Mangosuthu Buthelezi, with the aid of another African Nobel laureate, Nadine Gordimer, and of Ibrahim Babangida, then president of Nigeria. Soyinka also describes his relationships with internationally important writers, including Gordimer, the British poets W. H. Auden and Stephen Spender, and Nigerian writers Chinua Achebe and Ken Saro-Wiwa, as well as curators at the British Museum, media executives and personalities, business leaders and military officials.

As the book moves into the twenty-first century and into Soyinka’s late sixties and seventies, he remains a central political figure. While frequently throughout the memoir Soyinka yearns for solitude, for time to fish and read, he never is given—or never chooses—a solitary life. The memoir concludes where it began, at the airport when Soyinka arrives back in Nigeria after years away, surrounded by a cheering, out-of-control throng of well-wishers welcoming him home.

### SUMMARY

Wole Soyinka’s politically committed art has earned him censorship, time in prison, and the Nobel Prize in Literature. His plays incorporate Yoruba and Western traditions in a manner that conveys a realistic understanding of the place of both in postcolonial African life. Soyinka’s works

argue for independence—political, intellectual, and cultural—from all forms of repression. Sometimes difficult and experimental, his plays bring a portrait of Nigerian life to the world stage.

## DISCUSSION TOPICS

- How is landscape important in Wole Soyinka's works?
- How does Soyinka depict power in his works? Is power generally a strengthening or a corrupting force?
- In *Death and the King's Horseman* and other works, how does Soyinka present suicide or sacrifice as a potentially redemptive act?
- How does Soyinka deal with issues of violence in his works? Under what circumstances does he seem to condone violence?
- Based on his literary works, does Soyinka seem optimistic or pessimistic about the human condition?
- In Soyinka's view, why it is important to know about the past? How does the past shape the future?

## MURIEL SPARK

**Born:** Edinburgh, Scotland  
February 1, 1918

**Died:** Florence, Italy  
April 13, 2006

*A poet, critic, biographer, and dramatist, as well as a fiction writer, Spark is best known for her formal, witty novels.*

### BIOGRAPHY

Muriel Spark was born Muriel Sarah Camberg in Edinburgh, Scotland, on February 1, 1918, the daughter of Bernard Camberg, an engineer, and Sarah Elizabeth Uezzell Camberg. When Spark was still very young, she began to write, and later, at James Gillespie's Girls' School in Edinburgh, she was labeled the school poet. She attended Heriot Watt College from 1935 to 1937. In 1937, she married Sydney O. Spark and settled down in Rhodesia. They had a son, Robin Spark. Muriel Spark's attitude toward her life in Africa is reflected in her short stories set in Africa, which show colonial society as meaningless, dull, and occasionally violent. Her attitude was doubtless colored by the fact that her marriage was failing; it was later dissolved. However, because of World War II, she was trapped in Rhodesia until 1944.

On her return to England, Spark became a writer for the propaganda branch of the British Intelligence Service and lived in London for some years after the war. During this period, although she occasionally published a poem or two, her primary concern was supporting herself and her son by various jobs, including writing for a jewelry trade publication and working for a press agent. After editing the *Poetry Review* for two years, she started her own magazine, *Forum Stories and Poems*, which failed after two issues. Even though she was

unable to devote full time to writing, Spark was dedicated to her craft. In fact, although she enjoyed the company of men, she had already decided that she could not be a good wife, as well as a good mother and a good writer, and therefore another marriage was impossible.

Although she was to achieve fame through her novels, Spark's first book-length works were in other genres. An edition of Anne Brontë's work, prepared jointly by Spark and the critic and poet Derek Stanford, never appeared in print, but in 1950 Spark and Stanford published an edition of essays titled *Tribute to Wordsworth*. Spark's first independent critical work was *Child of Light: A Reassessment of Mary Wollstonecraft Shelley* (1951; revised as *Mary Shelley*, 1987). It was followed by a collection of her own poems, *The Fanfarlo, and Other Verse* (1952), and by other critical works, including that which has received the highest acclaim, *John Masefield* (1953).

While writing her work on Masefield, Spark began to reassess the novel genre. Even though she had won a short-story contest in 1951, up to this point she was committed to poetry, which she considered superior to fiction. Yet she now admired the narrative technique evident in Masefield's novels, as well as in his verse. Evidently she was changing her mind.

Spark was also changing her mind about religion. Although her father was Jewish and her Edinburgh school was Presbyterian, Spark did not have any religious commitment until 1953, when she became a High Church Anglican. Then, after reading the Roman Catholic theologian John Henry Newman and receiving instruction in Roman Catholi-

cism, she was converted to that faith. Spark was received into the Roman Catholic Church in 1954.

At this time, Spark was having serious physical and mental problems. Her physical difficulties were solved in part by financial aid from a number of people, which enabled her to obtain better food and much-needed medical attention; her psychological problems were eased after a period of therapy. During her stay in Kent, where she was recuperating from her illness, Spark produced her first full-length novel, *The Comforters* (1957). Its reception set the pattern for later critical reaction to her works: Even though critics praised the book, they disagreed as to how it should be interpreted. They were even more confused by her second novel, *Robinson* (1958), an allegory, which was not a success.

With *Memento Mori* (1959), Spark began a series of realistic novels. Although *Memento Mori* did not fall into the pattern of the rebellious “angry young men” who were then dominating English literature, perhaps because Spark was neither angry nor young and certainly not male, this novel was a financial success, and Spark could now become a full-time writer. The following year, she published *The Ballad of Peckham Rye* (1960) and *The Bachelors* (1960), novels that are both set in London, where she was now living.

Spark’s skill in developing action through dialogue, which is evident in her novels, is also reflected in her success in dramatic works. In 1961, a number of her radio plays that were written for the British Broadcasting Corporation were published in *Voices at Play*. The next year, her adaptation of *The Ballad of Peckham Rye* for radio won the Prix Italia, and her play *Doctors of Philosophy* (pr. 1962) was produced in London. The novel, however, remained Spark’s primary interest.

While the early works had reflected her preoccupation with Catholicism, by 1961 Spark was ready to seek a reconciliation between her new faith and her Jewish heritage. That year, she spent two months in Israel conducting research for a new book. A prizewinning novel, *The Mandelbaum Gate* (1965), was the result of her efforts.

After eighteen years in England, Spark felt she needed the creative stimulus that a change of residence would provide. In 1962, she accepted the offer of an office from *The New Yorker*, which had published the novel *The Prime of Miss Jean Brodie* (1961), and for four years she spent most of her time in

New York City. In 1966, however, Spark moved to Italy, dividing her time between an apartment in Rome and a country home in Tuscany. Over the next four decades, she continued to turn out one distinguished novel after another; her final work, *The Finishing School*, appeared in 2004. Spark also published collections of poetry and short stories; wrote *Curriculum Vitae: Autobiography* (1992), which covered her life up to the publication of her first novel; revised her earlier nonfiction works on Mary Wollstonecraft Shelley and John Masefield; and produced a new critical study entitled *The Essence of the Bröntes: A Compilation with Essays* (1993).

On April 13, 2006, Good Friday on the Church calendar, Muriel Spark died in a hospital in Florence, Italy, at the age of eighty-eight. Spark was buried three days later in the Tuscan town of Civitella della Chiana.

## ANALYSIS

In Spark’s early fiction, one does not find the kind of passionate quest for the meaning of life so familiar in the often autobiographical novels of other authors. When she began to write novels, Spark was already a mature person, who had already arrived at her own certainty. Indeed, she did not publish her first novel until four years after her conversion to the Christian faith and three years after her commitment to Roman Catholicism. While her setting, her subjects, and her techniques varied with the passage of time, the vision of reality that underlies all of her work never changed. It is this vision that explains the many characteristics of Spark’s novels that have most puzzled her critics.

As a Christian, Spark believed that while human beings are on this earth, they live in not one world, but two, the temporal and the eternal. The theme of all of her works, then, involves the relationship between those two worlds. One must never forget that, to Spark, the purpose of life in the temporal world is to prepare for life with God in eternity. Therefore, human successes and failures must be judged rather differently than they are when the focus is on this world alone.

Spark’s religious vision had an important influence on her plots, which seem to swing between the trivial and the tragic with an almost dizzying effect. For example, in *The Mandelbaum Gate*, the basic situation is as serious as that in any other adventure story set in the contemporary Middle East.

Despite the warnings of people who have lived in that area for some time, the protagonist, Barbara Vaughan, a half-Jewish Englishwoman, slips into Jordan in disguise, determined to see her fiancé, and, as a result of her foolish action, places herself beyond the protection of her friends or her government. At best, she can be arrested; at worst, she may well be executed as a spy. However, after Barbara is hidden in a house of prostitution, which is also a center for spies, all sorts of improbable people begin to arrive, and, for a time, the novel becomes a comedy, indeed, almost a farce. It is difficult to know whether the author means for her readers to take the intrigue seriously or whether the story is a parody of the form in which it seems to be cast.

In the same novel, there seems to be a disproportion between the difficulties of the lovers, Harry Clegg and the indomitable Barbara, and the author's almost offhand resolution to their problems. Because Barbara is Roman Catholic, she spends a great deal of time agonizing about her liaison with Harry, who is divorced. At one point, she even offers to leave the Church in order to marry him; however, it is clear that, in reality, she will not bring herself to abandon her salvation for love. Finally, through a twist of fate or perhaps an act of Providence, it is discovered that Harry was reared a Catholic, and that since his non-Catholic marriage was invalid, he can marry Barbara after all. While Barbara's spiritual torment has persisted through most of the book, the solution appears with a suddenness reminiscent of Gilbert and Sullivan. Furthermore, as a number of critics have pointed out, Spark devotes only one sentence to subsequent events, merely stating that Harry and Barbara had a happy marriage.

Spark's abrupt changes of tone, as well as the detachment with which she treats the most tragic events, can be explained by her spiritual convictions. Although she displays compassion for those who suffer in this world, Spark also makes it clear that, in God's view, the fact that Barbara and Harry are finally able to marry is a purely temporal and temporary matter. What is far more important is the struggle for Barbara's soul, which, it is suggested, would have been lost had she abandoned the Church.

Yet Spark must not be accused of simply following the party line. As her interviews made clear, she

was hardly sentimental about her coreligionists. In fact, in her fiction she obviously identifies with her female protagonists, often new converts, who are appalled by narrow-minded, paranoid, and even vicious Catholics, such as Georgina Hogg in *The Comforters*, who seem determined to engulf them.

Spark had no illusions about the Church on earth; she saw it as often being dominated by people who are more interested in attaining power over others than in embodying the principles of Christ. It is no accident that, for her fictional treatment of the Watergate scandal, *The Abbess of Crewe: A Modern Morality Tale* (1974), Spark chose a Benedictine abbey as the setting and an assortment of nuns and priests as the conspirators. These include Alexandra, who manages to get herself elected abbess through bugs, burglary, and slander, and Father Baudouin, a Jesuit priest who helps organize the burglary. Even though Spark's focus is on Watergate, not on the supposed events at Crewe, it is obvious that she recognizes a parallel between political events outside the Church and those within it. Spark repeatedly commented that she became a Catholic because she was spiritually compelled to do so, because she felt that the Church was the way of salvation, not because she felt that it or any other organization composed of human beings was perfect. The Church, too, has both a secular reality and a spiritual reality. Like Dante, Spark was aware of the fact that the attainment of power within the Church in this world does not necessarily mean that one will be similarly honored in the next.

The sense of perspective that Spark received from her faith caused her to create sinners who are appealing and intelligent and saints who seem to be fools. For example, in *The Abbess of Crewe*, the handsome Jesuit Father Maximilian, who is well informed about sin, has no moral scruples about participating in the election plot; similarly, in *The Ballad of Peckham Rye*, the charming Dougal Douglas manipulates everyone whom he meets for his own purposes, complicating and even destroying their lives. Significantly, Dougal later becomes a monk and then a writer. On the other hand, the ineffectual Freddy Hamilton of *The Mandelbaum Gate* rescues Barbara from her captors and saves her life, while the obtuse Joanna Childe of *The Girls of Slender Means* (1963) turns out to be the most courageous young woman in the May of Teck Club.

Spark's sense of perspective also explains the

distance that she maintains from her characters and her willingness to make witticisms at their expense. On a spiritual level, Joanna is to be a superb creature; on a temporal level, however, she is large, humorless, and generally bewildered. Spark does not find it inappropriate to laugh at Joanna's elocution lessons or at her inability to grasp the reality of what is occurring around her. Sometimes Spark even seems to laugh at tragedy. When the stupidest of the girls in *The Prime of Miss Jean Brodie* runs up and down dithering in a laboratory fire, Spark points out that she will later die by behaving exactly the same way in a hotel fire. Some critics have considered such comments to be not merely dispassionate but also heartless; others admire Spark's detachment and enjoy her black humor. Yet it may be that what seems shocking in Spark is, in reality, a revelation of her faith. If this world is only temporary, then the actual departure of a physical being from it is indeed insignificant. Spark saw death as merely a transition to eternity. It is this basic Christian emphasis, this insistence that everyday events are important only as they relate to the development of the eternal soul, which is essential for understanding Spark's novels.

## THE COMFORTERS

**First published:** 1957

**Type of work:** Novel

*A young Catholic woman finds herself listening to the novel in which she is a character.*

*The Comforters*, Spark's first published novel, is not only the story of the outlandish actions and interactions of a group of English eccentrics but also a novel about writing a novel. Spark later said that the reason she wrote *The Comforters* was to see whether she could do it; with her new interest in fiction, she was interested not only in writing a novel with the usual characters and plot but also in the process of creation itself.

At any rate, the work can be said to consist of two mysteries. One of them involves Louisa Jepp, a

strong-minded old lady who seems to have a source of income of which her family is unaware. No one has worried much about it until she has a visit from her grandson, Laurence Manders, who possesses, or is possessed by, an obsessive curiosity. Laurence decides to uncover the source of her money; admittedly, her unusual collection of new friends, along with the diamonds hidden in the bakery goods, are enough to make anyone suspicious.

The second mystery involves the protagonist, Caroline Rose, who, like so many of Spark's heroines, is a high-strung young woman, given to bouts of illness, and a recent convert to Catholicism. After she has run away from a Catholic retreat center, made unbearable by the self-righteous bossiness of Georgina Hogg and by the paranoid sanctimoniousness of the others in attendance, Caroline finds herself hearing the sound of typing and of voices saying the words that have very recently appeared in Spark's novel. Naturally, she fears for her sanity and tries to find someone else who can hear what she hears. When she turns for help to her former lover, Laurence, he has two mysteries to solve.

Although the intricacies of the plot and the eccentricities of the characters in the novel produce a comic effect, *The Comforters* also has a serious theme—the exploration of Christian conduct, particularly the matter of Christian charity. This theme is introduced at the beginning of the book, when Caroline becomes so irritated with the other Catholics at the retreat house that she leaves. In contrast, both Laurence's father, Sir Edwin Manders, and his mother, Lady Manders, avoid facing such problems, Sir Edwin Manders by retreating whenever things get difficult at home and Lady Manders by refusing to admit the possibility that there are hypocritical and evil people in the world. Clearly, what Spark is saying is that charity does not mandate blindness or sentimentality and that Christian conduct begins with a realistic look at life. It is no accident that Caroline is both the sincere convert and the accidental novelist. Like the author, Caroline is observing herself as she creates a novel and, at the same time, observing herself as she creates her own Christian life.

## MEMENTO MORI

**First published:** 1959

**Type of work:** Novel

*A number of elderly people are disturbed by an anonymous caller, who reminds them of a truth that they would rather ignore: they must die.*

With *Memento Mori*, her third novel, Spark abandoned the experimentation of her first two works and began to write with the sureness of one accomplished at her craft. Now, too, her efforts were being rewarded financially; it was this novel that established her as a full-time writer. The popularity of *Memento Mori* is not surprising. While, like *The Comforters*, this novel has eccentric characters, complex relationships, and puckish wit, both its subject and the direction of its plot are made clear from the very first chapter.

The subject of *Memento Mori* is death. Its characters are elderly people, who, in the course of the novel, must deal with their friends' deaths and with their own. Their attitudes are revealed by a unifying plot device: A number of them receive telephone calls from someone who says simply, "Remember you must die." What is peculiar is that none of them can agree as to the quality of the caller's voice. Ironically, at the end of the novel, although the characters who have been receiving the calls have all died, the caller has never been identified.

At the beginning of the book, Dame Lettie Colston receives one of the mysterious calls and discusses it with her brother, Godfrey Colston. Dame Lettie is not unduly bothered by the call; she has reported it to the police, and she regards it as more a nuisance than anything else, something to be put out of one's mind. As for Godfrey, he is too busy with old age to think about death. He is always irritated with his wife, Charmian Colston, a successful writer, who is intermittently confused. He is also preoccupied with his sexual needs, which are ful-

filled when he sits staring at women's stocking tops and garters.

Like Godfrey, most of the characters in the novel are still clinging to life as if their time on earth will never end. When they gather for the funeral of Lisa Brooke, her relatives, friends, and former lovers are all preoccupied with their old annoyances. Dame Lettie scolds Godfrey for glaring; Janet Sidebottom snubs Lisa's rapacious housekeeper, Mrs. Pettigrew; and the Amazonian Tempest Sidebottom is as angry as Dame Lettie about the impossible behavior of the poet Percy Mannering.

Unfortunately, at this gathering Dame Lettie decides that Mrs. Pettigrew would be the perfect person to look after Charmian. Despite Mrs. Pettigrew's machinations in regard to Lisa's estate, it never occurs to Dame Lettie or to Godfrey that, if the housekeeper were in their employ, she might be a threat to any of them. What they do not realize is that while class and property once made them secure, age has now made them vulnerable. Simply because she is somewhat younger than they are, a person such as Mrs. Pettigrew can victimize her employers, capitalizing on Charmian's confusion and on Godfrey's sexual needs in order to seize power in the household and eventually to acquire the Colston money.

From the time that Lettie's interest in Mrs. Pettigrew is mentioned to her, Charmian's former companion, eighty-two-year-old Jean Taylor, who is now confined to a public nursing home, warns of the damage that the housekeeper can do. Jean sees all around her evidence of the way in which the elderly are treated, the patronizing flattery and the insulting tirades. Jean also sees that, like their social superiors, the old ladies in her ward spend their last days in bickering.

Only Charmian and Jean accept the approach of death with dignity. Despite Godfrey and Mrs. Pettigrew, Charmian moves to a nursing home, where she can live with the humor and grace that have always been characteristic of her. As for Jean Taylor, she has long ago decided to offer her death up to God. Therefore, she patiently endures the irritability of the other old ladies and the idiocies of the staff. When, at the end of the book, Spark describes the deaths of her various characters, it is clear that, from the vantage point of eternity, the cause of physical death is not important. What is

important is to remember that everyone must die and then to spend one's days on earth in spiritual preparation for that inevitable end.

## THE PRIME OF MISS JEAN BRODIE

**First published:** 1961

**Type of work:** Novel

*A self-centered teacher manipulates the minds, and influences the lives, of a group of young students.*

Structurally, *The Prime of Miss Jean Brodie* is one of Spark's simplest novels, focusing as it does on a single character's influence upon those who are closest to her. The protagonist is Miss Jean Brodie, a teacher at a staid Edinburgh school. At first, she seems to be a highly sympathetic character because of her passion for teaching and her independence of spirit. Instead of merely drilling her students, she tries to develop their minds. Even her bitterest enemies cannot deny the fact that the small group of girls chosen to be her intimates, "the Brodie set," seem to have a great deal of knowledge about music, art, history, political science, and current events. It would seem that these girls are indeed fortunate.

As Spark describes the gatherings of the Brodie girls, however, it becomes clear that Miss Brodie's influence is not altogether benign. She expects the few girls whom she chooses from her class to be totally loyal to her alone throughout their time in school. She ridicules the concept of team spirit, so that they will have no other attachments in their later years, when they would normally be in other groups. Furthermore, she manipulates the girls by insisting that she can perceive their real identities and by assigning roles to them based on those arrogant assumptions. Thus, Eunice Gardiner is the gymnast, Sandy Stanger, the reciter of vowels, and Rose Stanley, the sexual specialist. It is obvious that, while Miss Brodie continues to explore her own nature, her girls must depend upon her for their own development.

While Spark, in her usual detached fashion, narrates the story of Miss Jean Brodie, she provides enough clues to make it clear that she is describing a person who, while personally appealing, is actually obsessed with pride. One of these clues is Miss Brodie's admiration for the Fascists; with her insistence on blind loyalty to the flawless leader, she operates like the dictators whom she admires. Another is the fact that while Brodie will not permit any questioning of her own authority, she considers herself to be above the rules that apply to ordinary mortals. She sees no need to observe the moral customs of her community, but she boasts to the girls about her sexual adventures, which she fictionalizes until they seem as romantic as the great love stories of history. Similarly, she scornfully repudiates the authority of her headmistress, not on a matter of principle but simply because she refuses to bow to anyone.

Miss Brodie's admiration of excess leads her to suggest Anna Pavlova as a role model for her girls, not merely because she was a great dancer, but, perhaps more important, because of her legendary fits of temperament. As for career goals, Miss Brodie will settle for nothing less than high drama; she wants Rose to be a famous lover and Eunice, a martyred missionary. By the end of the novel, when such talk has resulted in the death of a girl who ran away to fight in the Spanish Civil War, it is clear that Miss Brodie is, in fact, a false messiah.

Convinced that she must be stopped, one of her girls betrays Miss Brodie. Ironically, at the conclusion of the novel, her betrayer, now a cloistered nun, identifies Miss Brodie as the most important influence of her youth. One may ask whether she is emphasizing Miss Brodie's good qualities, which in the tradition of tragedy are overshadowed by her all-encompassing pride, or whether she is implying that, by experiencing a false messiah, she could find the true one.

## THE GIRLS OF SLENDER MEANS

**First published:** 1963

**Type of work:** Novel

*In a London hostel filled with young women, good and evil struggle for dominion.*

*The Girls of Slender Means* illustrates Spark's belief that what may seem like trivialities are actually important events on the path to salvation or damnation. Certainly, in 1945 there is not much serious conversation at the May of Teck Club, a hostel in bombed-out London where some forty girls, mostly students and office workers of good background, can be appropriately housed. Spark can easily summarize the subjects of discourse at the club as being love and money, the latter needed to buy clothes and cosmetics in aid of the former. Except for a few such as Jane Wright, who has ambitions in the publishing business, and Joanna Childe, who, after one failed love affair, has decided to devote her life to poetry, the girls' major amusements are gossip and flirtation. The greatest success at the latter is the beautiful, self-centered Selina Redwood, who collects men of all sorts, including Nicholas Farrington, an irresolute young man, most recently the author of a book in favor of atheism.

The title that Spark chose for this book is particularly apt. In the first sentence, she points out the obvious meaning: The story is set at a time when everyone in England had limited means. When the girls' most exciting adventure turns out to be wriggling through a bathroom window to sunbathe on the roof, however, it is clear that a slender bodily structure is indeed the means to satisfaction. Right at the point when one of the girls is stuck in the window, the comedy turns to drama. An unexploded bomb detonates, destroying the fire escapes, and when a gas main ruptures, a number of girls are trapped on the top floor. Then, of course, the slender ones can slip up to the roof, from which they can be rescued. Meanwhile, the firemen are working frantically to open a blocked-off hatch, so that the remainder can be rescued before the building collapses. At the moment that the last one, Joanna Childe, is on the ladder, the end comes, and the young woman dies in the ruins.

Less important than the matter of who lives and who dies is Spark's description of the girls' behavior during those critical minutes. For example, the slim Selina slips back into the house, not to help the others, but to rescue a prized Schiaparelli dress. On the other hand, Joanna calmly recites the appropriate psalms and waits until last to climb the ladder, missing her own chance to escape by only a few seconds. For Nicholas, who has been on the roof throughout the rescue effort, this episode is a turning point. Inspired by Joanna's faith, he commits himself to Christianity, becomes a missionary, and later, when the survivors have returned to their everyday lives, dies a martyr's death in Haiti.

The conclusion suggests still a third interpretation of the title. Most of the girls, though they are not as evil as Selina, nevertheless are spiritually impoverished. In contrast, Joanna has so rich a faith that she is able to escape from her self. Among Spark's characters, Joanna is one of the few saints. Moreover, because it concludes with spiritual triumph both for Joanna and for Nicholas, in the context of Spark's vision, *The Girls of Slender Means* is a novel with an unequivocal happy ending.

## THE FINISHING SCHOOL

**First published:** 2004

**Type of work:** Novel

*Lust, jealousy, ignorance, greed, ambition, and murderous urges possess the faculty and the students at a so-called finishing school.*

In her final novel, *The Finishing School*, Spark again demonstrated her gift for satirical comedy. The targets of her satire are the proprietors of College Sunrise, a school temporarily based in Lausanne, Switzerland, and the teenage students whose well-to-do parents deposit them there, mistakenly assuming that their offspring will emerge with a store of useful knowledge. What the parents do not know is that Rowland Mahler and his wife, Nina Parker, have set up the school purely as a moneymaking project. Though he teaches creative writing with authority, at twenty-nine Rowland has not yet published anything of note. However, with their income from the school, which is actually run by his long-suffering wife, he has no need to work.

At last he has time to finish the great novel he is sure he has within him. Unfortunately, Rowland finds that he cannot write it: He has developed a severe case of writer's block.

Eighteen-year-old Chris Wiley, who is one of Rowland's creative writing students, has no such problem. He is moving right along with a novel about Mary, Queen of Scots, and despite the author's inexperience and his cavalier attitude toward historical fact, he is already being contacted by potential publishers. Rowland's jealousy of the younger writer, intensified by his unacknowledged sexual feelings for him, rapidly develops into an obsession so overwhelming that Rowland can think of nothing but killing his rival.

Such a plotline could well fit a tragedy or one of the darker mysteries. However, like traditional satirists, Spark is at least as interested in exposing folly and pretense as she is in pointing out instances of vice. Adopting the posture of limited omniscience, she moves from mind to mind, recording the random thoughts of her characters and thus revealing their secret selves. For example, while Nina appears to be totally devoted to her husband and his goal, she envisions a future without him. It is hardly surprising that she ends up in London with an art gallery owner, Israel Brown, whom she met in Lausanne. Chris, too, has thoughts he does not share. Not only does he sense Rowland's sexual interest in him but he even discovers that the tension between them is essential to his own creativity. Even minor characters in *The Finishing School* have secret impulses. Dr. Alice Barclay-Good, a sixty-year-old

guest lecturer, responds with professorial dignity to Chris's questions about Mary, Queen of Scots, her special interest. Later Chris comes to her room to compliment her and to continue the discussion. By the time he slips into bed with her, her mind is on his red hair and his youth, and nothing else matters.

Though in keeping with Spark's Catholic perspective, *The Finishing School* presents examples of all the seven deadly sins, the author approaches her subject by pointing out that human beings fall into sin by deceiving others and deceiving themselves. Like the great satirists who preceded her, she knows that the surest way to reform others is to show them their own errors in the follies of others.

## SUMMARY

In a time when most critics and writers limited their interest to success and failure in this world, Muriel Spark provided an interesting alternative. Like her friend and patron Graham Greene, Spark believed that it is only the spiritual reality that gives significance to temporal events.

Although the wit that enlivens her narratives may be considered a divine gift, Spark's detached tone can be explained by the long-range view dictated by her faith, which considers this world merely a testing ground for the next. Eccentric characters, preposterous plots, swift shifts between comedy and tragedy—all of these are enough like life itself to suggest that Spark's God, too, has a sense of humor.

Rosemary M. Canfield Reisman

## BIBLIOGRAPHY

### By the Author

#### LONG FICTION:

*The Comforters*, 1957

*Robinson*, 1958

*Memento Mori*, 1959

*The Bachelors*, 1960

## STEPHEN SPENDER

**Born:** London, England  
February 28, 1909

**Died:** London, England  
July 16, 1995

*One of the Oxford Group, Spender broke with the poetic aestheticism of the early twentieth century, producing poetry—and later essays, plays, and novels—that became increasingly political.*

### BIOGRAPHY

Stephen Howard Spender was the second of Edward Harold and Violet Hilda Schuster Spender's four children. His father, who died when Spender was seventeen, was a journalist and public speaker. His mother suffered from nervous ailments, most likely manic depression. She died before her husband; the children were left to the care of two great-aunts and an uncle.

Before his father's death, Spender earned money by printing medicinal labels on his own press. He collected his poems when he was eighteen and printed them on his press as *Nine Experiments, by S.H.S.: Being Poems Written at the Age of Eighteen* (1928). Two years later, he printed W. H. Auden's first collection, *Poems* (1930).

From 1928 until 1930, Spender attended Oxford University, where he formed a close bond with Auden. He left a year short of completing his baccalaureate. The group of poets with whom Spender is most often associated was referred to as the Auden group, although this was a loose fraternity of writers who held no meetings, did not necessarily know one another, and were dissimilar in many respects. Others prominent in the group were Cecil Day Lewis, Louis MacNeice, and Christopher Isherwood.

Isherwood wooed Spender away from Oxford short of a degree, urging him to come to Germany,

at that time bristling with intellectual excitement overshadowed only slightly by the specter of Fascism. Spender mingled happily in the homosexual society of Berlin, Hamburg, and Vienna. He was openly bisexual throughout his life. He married Agnes Marie Pearn in 1936, and, after his divorce from her, married the pianist Natasha Litvin in 1941. They had two children, Matthew Francis and Elizabeth.

From 1939 to 1941, Spender was coeditor of *Horizon* with Cyril Connolly. From 1953 until 1966, he held a coeditorship of *Encounter* with Irving Krystol and Melvin Lansky, but he vacated the post immediately upon learning that the magazine was backed by the Central Intelligence Agency (CIA).

During World War II, Spender was a fireman, and after the war he was a counselor in the United Nations Educational, Scientific, and Cultural Organization's (UNESCO) section of letters. He held the Ellison Chair in Poetry at the University of Cincinnati in 1953, a Beckman Professorship at the University of California in 1959, and had writer-in-residence and visiting professor appointments at such universities as Northwestern, Cambridge, Connecticut, South Carolina, and Vanderbilt during the next twenty years. He served as consultant in poetry to the Library of Congress in 1965 and as a fellow at Wesleyan University's Institute for Advanced Studies in 1967.

From 1970 to 1975, Spender occupied the chair in English literature at University College, London. Beginning in 1975, he served as president of the English Centre of PEN International. In 1986, Queen Elizabeth II knighted Spender; fifteen years

earlier, in 1971, he had won the queen's Gold Medal for Poetry.

Consistently energetic and productive, Spender published numerous volumes of poetry and collections of essays, seven plays or adaptations of plays, short stories, two novels, an autobiography, a volume of his letters to Isherwood, and his journals from 1939 to 1983. He also edited many volumes of poetry and prose and published translations from German, Spanish, Greek, and French. Spender died in 1995 at the age of eighty-six.

### ANALYSIS

Stephen Spender held few illusions about his poetic stature. While acknowledging that he had a considerable stock of compelling ideas to write about, he realized he did not have the sense of form that results in first-rate poetry. Few scholars challenge this insightful self-criticism.

This is not to say that Spender is a weak poet. In terms of ideas, he is in a class with Britain's great triumvirate of Romantic poets of the early nineteenth century. He has frequently been compared to Percy Bysshe Shelley. He never, however, achieved the technical perfection of his Romantic predecessors. He revised his poems endlessly, but he usually failed to give them the magic that would substantially improve them.

His later poetry does not suggest a significant advance in his ability as a poet. Indeed, some of his best verse was produced before he was twenty-five. After World War II, Spender published less poetry, devoting himself instead to translation, critical essays, and books about travel, politics, social problems, and intellectual history.

Spender and his generation of British poets grew up in the shadow of T. S. Eliot, who, with the publication of *The Waste Land* (1922), was catapulted into an Olympian literary prominence. Spender, having matured in the period between two wars, was fully aware of the economic strife caused by the Great Depression of the 1930's and the political strife that led to World War II. He spent considerable time in Germany and Austria. In the mid-1930's, having joined the Communist Party, Spender was sent to Spain, where the Spanish Civil War was raging.

The social dislocations of Spender's formative years significantly affected all of his writing, most of which railed against the inequities he observed

and much of which was antiwar. He considered Wilfred Owen, who died in World War I, the most outstanding poet of that war.

Owen's writing, rather than that of Eliot, reflected the kinds of pacifist sentiments Spender was most comfortable expressing. In "Two Armies" (1937), for example, he captures the daylight drama of fierce battle, then retreats behind the lines at night and writes about those involved in the battle and its effect upon them. Owen was also much affected by the writing of Rainer Maria Rilke, Ernst Toller, and Federico García Lorca.

Whereas Eliot was concerned centrally with abstract ideas, Spender was concerned with social and economic realities. In "Pylons," published in *Poems* (1933, 1934), Spender celebrates the great steel structures of Britain's rural electrification program rather than bemoaning the loss of a more rustic past.

During the 1930's, Spender, like many intellectuals of the period, was reaching for beliefs that might serve as a framework for his understanding. In *Forward from Liberalism* (1937), he writes of the disappointment of liberalism in an age of economic disintegration and international turmoil. He considered liberalism incapable of dealing with the growing fascism he saw engulfing much of Europe. Spender considered communism the only reasonable antidote to the cancer sweeping across much of the Continent, so he joined the Communist Party.

His involvement with communism, however, was little more than a brief flirtation. He announced his membership in the Communist Party in an article in *The Daily Worker*, but at the same time criticized the party harshly. He went to Spain at the party's behest, but there is no record of his having attended even a single party meeting. Soon his membership lapsed, but not before he had developed his enthusiasm for García Lorca's poetry, which affected his later writing.

Having lived through international chaos during his formative years, Spender was able to write with exceptional compassion, insight, and understanding about the social upheavals of the 1960's, which he chronicled in what, in many respects, was his most successful book, *The Year of the Young Rebels* (1969), a collection of essays about the unrest and violence of young people in the United States, Czechoslovakia, and elsewhere in the 1960's.

Nearly fifty years separate the publication of Spender's two novels, *The Backward Son* (1940) and *The Temple* (1988). The first is set in a British school for boys similar to the one Spender attended shortly after the death of his mother. His memories of this experience were not happy. *The Temple*, first written in 1929, is about a youth who leaves Oxford in 1929 and goes to Germany, where he falls in with literary and artistic homosexuals, much as Spender did. The last chapter, added years later, deals with the protagonist's return visit in 1932 and with the rise of Adolf Hitler. The book is of considerable historical significance.

Spender admitted early in his life to being fundamentally autobiographical in all of his writing. He is an unfailingly forthright author. Besides his autobiography covering his life to 1939, *World Within World: The Autobiography of Stephen Spender* (1951), he published *Letters to Christopher: Stephen Spender's Letters to Christopher Isherwood, 1929-1939*, with "The Line of the Branch"—*Two Thirties Journals* (1980) and *Journals, 1939-1983* (1986), both strongly autobiographical works.

His much-read book about writing poetry, *The Making of a Poem* (1955), is deeply personal, essentially describing Spender's own mode of writing poetry. Even his more detached books of literary and social criticism—*The Destructive Element: A Study of Modern Writers and Beliefs* (1935), *European Witness* (1946), *The Struggle of the Modern* (1963), *Love-Hate Relations: A Study of Anglo-American Sensibilities* (1974), and *The Thirties and After: Poetry, Politics, People, 1933-1970* (1978)—are personal statements more bound up in Spender's own life and sensibilities than in scholarly research on literary or social topics.

During the last half of his life, Spender became somewhat disillusioned by society. The vibrant, dynamic causes of his youth had disappeared. He did not express any particular liking for the society that developed after World War II. Much of his later writing focuses nostalgically on a past that perhaps seemed better in distant memory than it was in reality.

## WORLD WITHIN WORLD: THE AUTOBIOGRAPHY OF STEPHEN SPENDER

**First published:** 1951

**Type of work:** Autobiography

*Dealing with Stephen Spender's first thirty years and mostly with eleven of those years, World Within World occupies a central position in the author's writing.*

Spender is at his best and is most comfortable in writing autobiography. His life consistently was a search for meaning, as is apparent in his choice of the poem with which his autobiography begins. Its first two lines, "To break out of the chaos of my darkness/ Into a lucid day, is all my will," describe the essence of what *World Within World* is about and, indeed, of what Spender's creative life was about. Spender went through life seeking enlightenment, questing after answers to eternal questions.

*World Within World* deals with a number of major themes, which Spender enumerates in his introduction: love, poetry, politics, the life of literature, childhood, travel, and the development of his attitudes toward moral problems. These concerns are played out before a backdrop of a world between two major wars. The heart of the book deals with the years from 1928 to 1939, crucial years in world history, particularly in the history of the world of which Spender was a part.

During those years, Spender's personal conflicts were mirrored on a large scale by the conflicts brought about by the rise of fascism in Germany, Austria, and Italy and by the spread of communism throughout Eastern Europe. Spender, between 1920 and 1937, experienced new cultures—notably German, Austrian, and Spanish—and wrote about them in such works as *Vienna* (1935) and his drama, *Trial of a Judge* (pr. 1938).

At the same time, he was finding his own sexual

identity, which, in his Oxford days, was homosexual. In Europe, he engaged in both homosexual and heterosexual relationships, which he writes about with candor in *World Within World*. Although he experienced some guilt about the homosexual aspects of his life, he found in his encounters with men who shared his intellectual and artistic leanings an identification that he did not find with women, whom he valued more for the intimacy they offered him.

It is ironic that Spender's first marriage ended two months before Adolf Hitler's invasion of Poland ignited World War II. On a personal level, this was a time of disintegration for Spender, while on a global level, this was a time of disintegration for the Western World. The analogy was not lost on Spender.

During the 1930's, Spender, with several volumes of verse in print before the end of the decade, established himself as a poet. He is still thought of essentially as a poet, although his writing talents lay more in his essays about literature and politics and in his translations.

*World Within World* captures as well as any book of its day a critical time in the history of Western civilization. It presents the time through the personal vision and reactions of a sensitive artist. It is also more factually reliable than many autobiographies.

## JOURNALS, 1939-1983

**First published:** 1985

**Type of work:** Journal

*This autobiographic journal records Spender's life from the time at which World Within World ends.*

Because *World Within World* details Stephen Spender's life only to his thirtieth year, readers hoped for a second autobiographical volume from him, but he never wrote that volume. Possibly *Journals, 1939-1983*, along with *Letters to Christopher*, with its addenda of journal entries, were Spender's way of adding more autobiographical information to the published material about his life.

A major portion of the journals is concerned

with the period from the end of World War II (1945) to the early 1950's, when the author was moving toward the life of editor and international lecturer that would fill much of his time in the decades ahead. Reprinted in this volume is his diary recounting the dissolution of his marriage and the beginning of World War II. This diary was consciously written for publication, as a considerable number of entries in the journal seem to have been.

Perhaps Spender, badly stung by criticism of his poetry and other writing, appreciated the journal form because it gave him freedom to express himself with little regard to maintaining the sustained form required of poetry or the novel. The Spender that emerges from this collection of journal entries is more a man capitalizing on past recognition than one who is still involved in creating new poems or exploring fresh modes of expression. As in his autobiography, Spender is dependably candid, although he is guarded in talking about his homosexual associates, identifying them quite often with single upper-case letters rather than with whole names.

Spender's portrayals of Christopher Isherwood, Cyril Connolly (his coeditor of *Horizon*), Conrad Aiken, Louis MacNeice, and other literary figures are valuable and honest. His commemoration of Allen Tate is moving. The towering literary presence in the collection, however, is unquestionably W. H. Auden, with whom, as with Isherwood, Spender had a love-hate relationship.

More in the journals than in any of Spender's other writing, readers can peer beneath the surface character that is Stephen Spender. Spender wrote in *World Within World* that in producing autobiography one writes of two people, the person one knows oneself to be and that person as he or she is perceived by society.

The journal form creates a dynamic not often found in autobiographical writing. The real person emerges subtly, almost unbeknownst to the author, between the lines that essentially—especially in journals that were written with an eye toward publication, as these were—depict the subject, often unguardedly, in relation to his or her setting.

In his depiction of Auden especially, Spender reveals much about himself. Auden was often an intrusive element in the Spender household, arriving without warning and demanding full attention

regardless of what else was going on. Spender might have controlled that situation had he been more assertive. He assumed instead the role of victim, although he seems to have convinced himself that he did not enjoy being one.

## COLLECTED POEMS, 1928-1985

**First published:** 1985

**Type of work:** Poems

*Collected Poems, 1928-1985 is the most comprehensive collection of Spender's poetry to date.*

Most of the major collections of Spender's work—*Poems* (1933, 1934), *Selected Poems* (1940), *Ruins and Visions* (1942), *The Still Centre* (1939), *Selected Poems* (1964), and *The Generous Days* (1969, 1971)—contain many of the same poems, but in subsequent editions Spender revised numerous poems. Critics quarrel with many of these revisions, contending that Spender was at his poetic best in the first decade of his productive life—1930 to 1940—and that his revisions of many of the earlier poems have robbed them of their vitality and poetic integrity.

Such considerations aside, it is clear that Spender, seventy-six years old when *Collected Poems, 1928-1985* was published, intended it to represent his poetic career. He personally selected the poems in this collection to give his readers and posterity an overview of more than half a century of his work.

In addition to heavily revising many of the poems for both the 1955 and 1985 editions of his collected verse, Spender omitted some of his best poetry written during the most critical period of his intellectual and artistic development and pub-

lished in *Ruins and Visions*. In that book, he is a young artist dealing with global and personal problems—political upheaval that led to war, an economic depression, the dissolution of his marriage—and writing about them compellingly.

Rather than arranging his work chronologically for the 1985 edition, Spender chose to present the poems in thematic groups such as "Preludes," "Exiles," "Ambition," and "War Poems." The collection also includes some so-called diary poems, focusing on personal matters, that he produced after 1955.

Not all of Spender's revisions did damage to the original poem. An example is "The Uncreating Chaos," which first appeared in *The Still Centre*. It was revised extensively for the 1955 edition and again for the 1985 edition. Both revisions add a vitality and dynamism that the original lacks and a directness and clarity that are missing in the earliest versions of the poem.

On the other hand, in his "Elegy for Margaret," a paean commemorating the death of his beloved sister-in-law, Spender's revision misses the mark by destroying the metaphor he attempted to build. Early in the poem, Margaret is the boat charging through turbulent seas; in the revision, the metaphor changes in midverse. This revision vitiates the image Spender worked earlier in the poem to establish. Despite its faults, the 1985 edition of Spender's poems is important in suggesting the poet's evaluation of his own work.

## SUMMARY

Stephen Spender was a worthy but not a great talent. He was right for his time. With the amelioration of the political conditions about which he wrote most fluently in the 1930's, he found his circle of topics narrowing. Spender overcame this problem by plunging into a broad range of literary activities. As an anthologist, editor, translator, and literary and social critic, he made a continuing contribution to literature. That he is likely to be remembered primarily as a poet is somewhat ironic, because it is in areas other than poetry that he made his most lasting contributions.

## EDMUND SPENSER

**Born:** London, England  
c. 1552

**Died:** London, England  
January 13, 1599

*Spenser was the leading poet of sixteenth century England and the author of The Faerie Queene, the major English Renaissance epic.*

### BIOGRAPHY

Edmund Spenser achieved recognition during his lifetime as a major English poet; nevertheless, he spent twenty years of his life in Ireland, occupying a variety of positions in the colonial government. His contemporaries described him variously as the English Vergil and as a second Geoffrey Chaucer. Even so, much of what has been written about his life and accepted as biographical fact is elaborated out of Spenser's fictional works or is based on conjecture rather than evidence. Modern scholarship cannot ascertain where and when his works were written, nor can it provide any detailed knowledge of Spenser's patronage connections.

Spenser was born in London, England, around 1552, the son of John and Elizabeth Spenser. He attended the Merchant Taylor's School in London, where the headmaster was Richard Mulcaster, later well known as a humanist educator. On May 20, 1569, Spenser entered Pembroke Hall, Cambridge. He was entered as a sizar, a poor student who acted as a servant to earn his room and board.

Spenser received a B.A. in 1573 and an M.A. in 1576. His university degrees qualified him for a position in the church, a profession that many of his classmates probably chose. He could also have become a schoolmaster, continued at the university while working toward a degree in divinity, or tried to establish himself in the household of a prominent nobleman or in the government. Those who

intended to pursue a career in government usually came from families with strong connections to the court or Privy Council, and they frequently followed their university degrees with legal training from one of the Inns of Court, the four law schools in England. Spenser lacked the advantage of family connections, and there is no record of his having attended one of the Inns of Court.

By 1578, Spenser had become the secretary of the former headmaster of Pembroke College, Dr. John Young, archbishop of Rochester. Spenser later served Robert Dudley, earl of Leicester, but anecdotes concerning his close relationship to Leicester and his friendship with Sir Philip Sidney, Leicester's nephew, are unlikely to be true because of the social barriers that would have existed between a mere secretary and powerful courtiers such as Leicester and Sidney. On October 27, 1579, a marriage was recorded at Westminster between Machabyas Chylde and an Edmounde Spenser, possibly the poet. References in later documents to two children, Sylvanus and Katherine, are assumed to refer to offspring from this marriage.

Some scholars have speculated that either a manuscript satire or his first published poem, *The Shepheardes Calender* (1579), got Spenser into trouble and that he was punished by being sent to Ireland, but the lack of any corroborating evidence makes this hypothesis improbable. It is more likely that Spenser's appointment as secretary to Arthur, Lord Grey of Wilton, was a mark of favor resulting from his patronage connections to Leicester and Sidney. Grey was made lord deputy of Ireland on August 12, 1580, and Spenser accompanied him as

his secretary. Under Grey, he acted as the clerk of the Privy Council for twenty pounds a year. He worked mainly at Dublin Castle, although he may have accompanied Grey on some of his expeditions. In March, 1581, he replaced Lodowick Bryskett as clerk of the Chancery for Faculties; in this post, his duties would have involved administering the licenses and dispensations issued under the authority of the archbishop of Dublin. Spenser may have purchased this seven-year appointment from Bryskett; in any case, since he was still employed as secretary to Lord Grey, he probably hired someone else to do the actual work.

In 1582, Lord Grey was recalled to England in disgrace; he was reported to have been too severe in his treatment of the Irish. Rather than returning with Lord Grey, however, Spenser remained in Ireland, acting as a colonial administrator. The potential economic rewards were attractive. Like many other English colonials, Spenser profited when the lands of Irish rebels were seized by the English and reallocated to loyal subjects of the Crown. In 1586, he was assigned 3,028 acres in Cork from the vast estate of the earl of Desmond, an Irish nobleman who had successfully rebelled against the Crown. In 1589, Spenser succeeded Bryskett as clerk of the Council of Munster.

Spenser may have taken possession of Kilcolman Castle and his lands in Cork in 1588, but that seems unlikely since he did not receive a lease until 1590, when he was granted a perpetual lease for £1,717 pounds a year. Like other Englishmen who were granted such leases, he was called an “undertaker” because he had undertaken to plant a colony at Kilcolman consisting of at least twenty-four households of English settlers. Sir Walter Raleigh owned 42,000 acres around Lismore Castle, located about thirty miles from Spenser’s holdings. Spenser suggests that Raleigh’s encouragement prompted him to publish part 1 (books 1 to 3) of *The Faerie Queene* (1590). He dedicated the first installment of his English epic to Elizabeth I. In recognition of his achievement, on February 26, 1591, the queen awarded him an annual pension of fifty pounds.

Spenser completed the second installment (books 4 to 6) of *The Faerie Queene* in 1596, again dedicating his epic to Elizabeth I. On November 12, 1596, James VI of Scotland wrote to Elizabeth requesting that she punish Spenser for his negative portrait of James’s mother, Mary, Queen of Scots.

Although he was not punished, the second part of *The Faerie Queene* did not result in advancement or specific marks of royal favor. While in London in 1596, Spenser may have written *A View of the Present State of Ireland* (wr. 1596, pb. 1633), a dialogue concerning the administration of Ireland, which, however, was not published until 1633, several decades after his death.

In 1598, Spenser was named sheriff-designate for Cork, but he may never have served as sheriff. The relations between the Irish and the colonial government were growing steadily worse. Spenser’s property in Kilcolman was attacked and burned, and he took refuge with his family in the walled city of Cork. On December 9, 1598, he left for London bearing dispatches from the Munster government to the Privy Council; he delivered these messages on Christmas Eve and was paid the usual stipend of eight pounds.

Two weeks later, on January 13, 1599, Edmund Spenser died in London. Ben Jonson later told his young friend William Drummond of Hawthornden that Spenser died for lack of bread in King Street, but this gossip occurred more than twenty years after Spenser’s death. William Camden, the great Elizabethan historian, however, also reports that Spenser died in poverty, and although modern scholars have pointed to Spenser’s pension and to his having recently received a stipend of eight pounds, the testimony of a contemporary historian must be given substantial authority. Camden has also recorded a poignant description of Spenser’s funeral, which he reveals was paid for by the earl of Essex. Spenser’s body was carried to Westminster Abbey by his fellow poets; they wrote elegies and threw both their verses and the pens with which they had written them into his grave.

## ANALYSIS

In 1600, Camden described Spenser as the leading poet of the age, indicating that Spenser had immediately established himself as a major poet. The body of his work differs from that of many nineteenth and twentieth century poets because each of his works is written consciously within certain literary conventions. Instead of attempting to find thematic connections among his works, each work of art needs to be assessed in relation to the earlier classical, Continental, and English works that Spenser adopted as models.

Many of Spenser's minor poems are also linked to identifiable occasions or with specific patrons: *Daphnaïda* (1591), an elegy on the death of Douglas Howard, wife of Sir Arthur Gorges, was dedicated to Helena, marchioness of Northampton, Gorges's aunt by marriage. *Prothalamion* (1596) celebrates the double wedding of two daughters of Edward Somerset, earl of Worcester, on November 8, 1596. *Fowre Hymnes* (1596) is internally dated September 1, 1596, and is dedicated to the sisters, Margaret, countess of Cumberland, and Anne, countess of Warwick.

Spenser's first major work, *The Shepheardes Calender*, a sequence of pastoral eclogues, appeared in 1579. *The Shepheardes Calender* was licensed in the Stationers' Register to Hugh Singleton on December 5, 1579, and the rights of publication were reassigned to John Harrison on October 29, 1580. Spenser is described merely as the "new poet," and his authorship seems not to have been immediately known. The authorship of the preface and glossary is attributed to an unidentified E. K., but scholars have conjectured that Spenser and his friend Gabriel Harvey were involved in preparing these commentaries on the text. The model for the typographical layout of the woodcuts, arguments, eclogues, and mottoes was the edition of Jacopo Sannazaro's *Arcadia* (1504; *Arcadia and Piscatorial Eclogues*, 1966) printed by Francesco Sansovino in Venice in 1571.

The structure of *The Shepheardes Calender* is remarkably complex. The twelve eclogues are linked to the twelve months of the calendar; they are accompanied by woodcuts, brief prose arguments, commentaries, and notes. The poem makes use of a number of genres, including love complaint, debate poem, pastoral singing match, panegyric, pastoral elegy, parable, and religious satire. Its metrical virtuosity is formidable; only January and December are in the same verse form. Judging from the number of editions printed during Spenser's life, *The Shepheardes Calender* was extremely popular with Spenser's contemporaries. New editions were printed in 1581, 1586, 1591, and 1597. The two later editions may have been printed in response to the interest generated by the publication of *The Faerie Queene* in 1590 and 1596.

*The Shepheardes Calender* illustrates the way in which Spenser wrote within certain conventions. He uses the framework of his classical predeces-

sors, Theocritus and Vergil, to explore a variety of pastoral forms. Instead of expressing his personal feelings in the way that a modern poet might, Spenser consciously plays with forms and themes derived from literary tradition. He expects his readers not only to respond to his poem as a work of art in its own right but also to know how his predecessors handled the conventions of the pastoral elegy and to evaluate his work in relation to literary tradition.

Colin Clout, the central figure of *Shepheardes Calender*, is a shepherd, lover, and poet. Throughout his later works, Spenser used the name Colin Clout for his persona. Colin Clout is the central figure in *Colin Clouts Come Home Againe* (1595), and later in book 6 of *The Faerie Queene* (1596) Colin Clout again functions as a symbol of the poet-author. Even so, one cannot assume an absolute identification between Spenser and Colin Clout but should approach Colin Clout's love for Rosalind as an artful convention and pay attention to the language and images used to portray his unhappy lover.

The name Colin Clout was inspired by John Skelton's *Collyn Clout* (1522) and carries with it connotations of lower class and rustic. In *The Shepheardes Calender*, Spenser establishes Colin as the disciple of Tityrus, who was understood to be the persona of Vergil, author of the great Roman epic, and of Chaucer. Like Tityrus, Colin (Spenser) wants to write a national epic. Technically speaking, Vergil and Chaucer are not Spenser's sources, nor is he paying tribute to their influence on his work. Using the forms and conventions that they used, he wants to write verse that will challenge comparison with that of two of his greatest predecessors.

It was not until 1590, more than a decade after the appearance of *The Shepheardes Calender*, that the first part of Spenser's greatest work, *The Faerie Queene*, appeared in print. The first three books of *The Faerie Queene* owe much to epic and romance conventions, and each one celebrates a virtue derived from Christian and classical tradition. In book 1, the Redcrosse Knight, representing the virtue of holiness, assists a fair lady, named Una (the one true faith) in freeing her parents (Adam and Eve) from the dragon (sin). Redcrosse's quest will be successful when he has conquered the dragon and restored the lost Eden.

In achieving his quest, he encounters highly

complex figures such as Duessa (double or false religion, Roman Catholicism, and Mary, Queen of Scots) and personifications of abstract states of mind such as Despaire. The battle between Redcrosse and the dragon in canto 11 of the first book should be read allegorically and typologically. Images of ships, seas, and sea monsters associate the dragon with the Spanish Armada, but the dragon is also sin and Satan. Typologically, Redcrosse parallels Saint George, the English fleet, and Christ.

Book 2 turns to the classical virtue of temperance, which is portrayed in the adventures of the knight Guyon. He attempts to achieve the golden mean of “nothing too much.” While it is virtuous to be chaste and rational, it is a mistake to repudiate the sensual and emotional. He visits the cave of Mammon, where he is tempted not only by material wealth but also by honor. In order to prepare for his final battle against sensual intemperance, he visits the House of Alma (soul), where he learns about his own psyche and where his inner fortitude is restored. His principal opponent is Acrasia, who presides over the Bower of Bliss, a beautiful garden in which sensual beauty has become excessive and overshadows spiritual and heroic values. Guyon does not destroy Acrasia; he binds or restrains her, indicating that sensuality has its place in human nature but that it must not be allowed to control the individual.

In book 3, the narrative structure is more loosely organized, but Spenser focuses on Britomart, a female knight who embodies chastity. He interlaces the adventures of Florimell (flowers and vegetation) and Marinell (sea), Amoret (beloved) and Scudamour (shield of love), Belphebe (beautiful Diana, Elizabeth I) and Timias (loyalty, honor, Sir Walter Raleigh), and numerous other figures with those of Britomart. Nevertheless, it is Britomart who completes the quest of freeing Amoret from the house of Busirane. No consensus has been reached concerning the precise meaning of this episode. Some critics think that Amoret needs to be freed from her own fear of sexuality or that Scudamour, her husband to be, has been too bold in his wooing of her. Yet others think that Spenser is elevating chaste married love over the adulterous conventions of medieval courtly love. Britomart’s own connection with Queen Elizabeth seems clear because Britomart’s marriage will create a dynasty

culminating in the birth and reign of the Virgin Queen.

Spenser’s *Complaints* (1591), a collection of satires, meditations, and laments on the world’s vanity and satirize social ills, were published in 1591, but some of the poems may have been written much earlier. *Complaints* was entered in the Stationers’ Register on December 29, 1590, and was printed by William Ponsonby early in 1591. The collection consists of nine separate works: “The Ruines of Time,” “The Teares of the Muses,” “Virgils Gnat,” “Prosopopoia: Or, Mother Hubberds Tale,” “Ruines of Rome, by Bellay,” “Muiopotmos: Or, The Fate of the Butterflie,” “Visions of the Worlds Vanitie,” “The Visions of Bellay,” and “The Visions of Petrarch.”

Ponsonby’s statement that he collected the poems without assistance from Spenser was rejected by an earlier generation of scholars, who assumed that sixteenth century authors “saw their works through the press” and proofread each sheet shortly after it was printed. Since copyright belonged to the publisher or bookseller, authors had far less control over the publication of their work in the sixteenth century than they do presently. None of the corrections made in the text of the *Complaints* during printing would require Spenser’s presence in the printing house.

One of the most intriguing poems in this collection is “Prosopopoia.” Spenser uses the beast fable to describe the adventures of a fox and an ape as they travel through England exposing—and participating in—social abuses. Spenser describes “Prosopopoia” as having been written in his youth, but since no manuscript copies seem to have existed prior to the 1591 printed text, there are no substantive grounds for postulating an earlier version. The poem describes social ills, showing that a simple landowner may be fooled by greedy servants, demonstrating that an ignorant and venial priest may abuse his office and take advantage of his parishioners, and confirming that self-seeking opportunists may rise to prominence in a corrupt court. Except for interest in the topical satire in “Prosopopoia,” the *Complaints* have received little attention from critics, but these meditations and satires offer readers insight into the kind of poetry that Spenser’s contemporaries appreciated.

In *Colin Clouts Come Home Againe*, Spenser returned to the pastoral as a genre, but, as with

“Prosopopoia,” he remains engaged by the impact of court patronage on courtiers and poets. This long eclogue describes Spenser’s trip to court under the auspices of Sir Walter Raleigh, offers complementary negative and positive views of the court, and pays tribute to contemporary poets and patrons.

The dedication of *Colin Clouts Come Home Againe* is addressed to Raleigh and is dated December 27, 1591, from Kilcolman. Spenser revised the poem before its publication in 1595, because in it he alludes to the death of Ferdinando Stanley, earl of Derby, on April 16, 1594. Still, the reference to Kilcolman in the title suggests that “home” for Spenser has become Ireland rather than England. In this eclogue, Spenser describes his meeting with the Shepherd of the Ocean (Raleigh) and the pleasure that they take in reading their verses to each other. He also narrates the story of his trip to the court of Cynthia (Elizabeth I). *Colin Clouts Come Home Againe* not only explores love as the subject of poetry but also examines the capacity of the court to support and sustain the needs of poets. Although Cynthia herself remains an untarnished ideal, the court is far from being a congenial place for the poet.

The second part of *The Faerie Queene* was published in 1596 and, like the first part, uses the conventions of epic and romance but is more somber in tone. Book 4, which continues the action of book 3 and begins the second part, is devoted to the virtue of friendship, but included in friendship is concord, a social virtue. Book 5, the Legend of Justice, is divided into three sections concerning English common law, the relationships among law, justice, and equity, and, finally, the application of justice to contemporary events. In this book, Spenser makes use of his own experiences as a civil servant in Ireland. He, however, seems skeptical about the degree to which justice can be understood as governing human experience.

Book 6, the Legend of Courtesy, examines chivalric values in a pastoral context. Sir Calidore falls in love with Pastorella, the fair daughter of the shepherd Meliboe, but his sojourn among the peaceful shepherds is disrupted when brigands attack the community and kidnap Pastorella. Sir Calidore rescues Pastorella as Sir Calepine saves Serena from the cannibals. The principal villain of book 6 is the Blatant Beast, who stands for slander

and the misuse of language; conversely, Calidore’s vision of the Graces dancing on Mount Acidale (canto 10) exemplifies poetry and the harmony of language.

Spenser died before *The Faerie Queene* was finished, but ten years after his death, an addition was made to his epic. The “Mutabilitie Cantos” include canto 6, containing 55 stanzas, canto 7, containing 59 stanzas, and canto 8, containing 2 stanzas. “The Mutabilitie Cantos” juxtapose a solemn inquiry into whether mutability or order controls the universe, and a comic story of the adventures of Faunus, who attempts to spy on Diana when she is bathing. These cantos were not published until they mysteriously appeared in the 1609 folio printed by Matthew Lownes, approximately a decade after Spenser’s death. Since Spenser was not involved in their publication, one cannot be sure how much credence to give the printer’s headnote stating that “both for Forme and Matter, [they] appeare to be parcell of some following Booke of the *Faerie Queene*, under the legend of *Constancie*.” They might also be a remnant of an unfinished mythological poem, but most critics have preferred to think of “The Mutabilitie Cantos” as the conclusion of *The Faerie Queene*.

## THE FAERIE QUEENE

**First published:** Part 1, 1590; part 2, 1596

**Type of work:** Poem

*Books 1 to 3 celebrate the virtues of holiness, temperance, and chastity, while books 4 to 6 praise friendship, justice, and courtesy.*

Spenser’s *The Faerie Queene* was published in two parts: the first part (books 1 to 3) appeared in 1590; the second part (books 4 to 6), with which the first part was reprinted, appeared in 1596. The dedication to the 1596 edition is addressed to Elizabeth I, whom Spenser describes as the empress of England, France, Ireland, and Virginia. He adds that he is consecrating “these his labours to live with the eternitie of her fame.” Although *The Faerie Queene* makes use of romance, as well as epic conventions, Spenser intended the poem to function as an English epic, a celebration of the emerging British empire. In his letter to Sir Walter Raleigh dated Jan-

uary 13, 1589, he states that the “generall end therefore of all the booke is to fashion a gentleman or noble person in vertuous and gentle discipline.” Spenser also states that he will use the Aristotelian virtues as a means of organizing the themes of his epic, indicating that he will write a twelve-book epic, portraying in Arthur the twelve private moral virtues that he exercised before he was king. If this work is well received, he adds, he may continue by describing how Arthur came to embody the twelve “politick” virtues after he became king. When the second part appeared in 1596, the title page described the poem as “disposed into twelve bookes, fashioning XII morall vertues,” but no suggestion is given regarding whether the moral virtues are private or public.

One of the most distinctive stylistic features of *The Faerie Queene* involves Spenser’s use of allegory and typology, both of which are unfamiliar to a modern audience and have therefore often been misinterpreted. Renaissance authors inherited a tradition of reading texts allegorically from medieval writers. The method of reading Homer’s works and the Bible in terms of a fourfold allegory derived from Alexandrian exegesis of these texts. According to this method of reading, anything that was not educational or useful in a text should be interpreted figuratively. No level of meaning would be taken literally. A reference to the Temple of Jerusalem, for example, would be interpreted historically as the Temple of Jerusalem, allegorically as the Church on earth, morally as the individual believer, and anagogically or mystically as the final communion of the saints in heaven.

Renaissance readers and writers think of allegory somewhat in the way that modern readers think of symbolism; meanings are concealed in the imagery and narrative. In Spenser’s case, the allegory is not continuous, nor is it consistent. Elizabeth, for example, is represented by the maiden hunter Belpheobe and by Britomart, the female knight, who will marry Artegall (equal to Arthur), the knight of justice. The offspring of Britomart and Artegall will produce the Tudor dynasty culmi-

nating in Elizabeth, but in book 5 Elizabeth is also represented in Mercilla, a queenly figure who dispenses both justice and mercy.

A character or event frequently is to be interpreted on multiple levels of significance: In book 1, Redcrosse knight is the champion of the virtue holiness, but he is also the embodiment of Saint George, the patron saint of England and the defender of the one true Protestant church. Instead of trying to arrive at a specific interpretation of *The Faerie Queene*, one needs to be aware of the potential multiplicity of meanings that may be suggested in any one episode.

Interpretation of Spenser’s allegory is rendered more difficult because, during the eighteenth century, the significance of the term “allegory” changed, creating confusion about what a Renaissance author intended when he wrote allegory. Instead of being used to refer to the structure of images and narrative incidents, allegory came to be used as a synonym for personification. Spenser does use personification, for example, in the monsters Error in book 1 and Lust in book 4, but under the rubric of allegory he also includes other genres such as fable, prophecy, and parable and devices such as irony (saying one thing but meaning another), hyperbole, and historical and contemporary allusions.

George Puttenham, in his *The Arte of English Poesie* (1589), makes an interesting distinction between mixed allegory, in which the poet tells the readers what the metaphor means, and full allegory, in which the poet allows the readers to determine the meaning. According to Puttenham’s definition, the play *Everyman* (1508) would be considered a mixed allegory because the author reveals that Good Deeds means a Christian who follows Christ’s teaching; on the other hand, William Shakespeare’s *Hamlet, Prince of Denmark* (pr. c. 1600-1601, pb. 1603) would be considered a full allegory because the character Hamlet is a specific Danish prince but can also represent Everyman. Most modern handbooks of literature reverse these classifications and would consider *Everyman* “more allegorical” than *Hamlet*.

*The Faerie Queene* fits Puttenham’s definition of full allegory. When Spenser refers to his poem as a “dark conceit,” he is alluding to the structure of images and to the narrative and rhetorical techniques in the poem, not to a structure of ideas outside it.

In the letter to Raleigh, he comments: “To some, I know, this Methode will seeme displeasaunt, which had rather have good discipline delivered plainly in way of precepts, or sermoned at large, as they use, then thus dowlily enwrapped in Allegoricall devices.” The allegory, for Spenser, consists of “cloudy devices,” not of precepts or sermons.

Typology, another device used throughout *The Faerie Queene*, is even less familiar than allegory to modern readers. The term comes from *typos* (Greek, “to strike”). In biblical typology, a type is defined as a detail in the Old Testament that foreshadows its antitype in the New Testament. The detail may be a person (Adam, Moses, and David are all types of Christ); it may be an event (the Passover and the crossing of the Red Sea foreshadow the Redemption); or it may be an institution (the Levitical priesthood and the ritual of the old Temple are figures of the blessings of the spiritual priesthood of Christ).

In Nowell’s Catechism, which every sixteenth century reader would have known, the master asks, “Why should not the Decalogue refer to the Israelites alone, because God’s introduction declares: ‘Hear, O Israel, I am the Lord thy God, which brought thee out of the land of Egypt, out of the House of bondage.’” The student is supposed to answer that the pharaoh of Egypt is the figure of the devil ready to oppress the Christian and that Moses’ rescue of the Israelites from bodily bondage is a type of Christ’s delivery of all of His faithful followers from the bondage of sin (antitype). Spenser’s readers would have interpreted the battle between Redcrosse knight and the dragon in canto 11 of book 1 typologically. The imagery used to describe the three-day battle makes it clear that Redcrosse is triumphing over Satan, but the imagery also summons images of the Passion and of the harrowing of hell.

In most of Spenser’s verse, including his justly acclaimed short masterpiece, *Epithalamion*, one finds him using the techniques of allegory and typology.

## EPITHALAMION

**First published:** 1595

**Type of work:** Poem

*This work is a hymn in celebration of marriage.*

*Amoretti* (1595), a sonnet sequence printed with the *Epithalamion*, differs from most Petrarchan sequences because instead of depicting the suffering of an unfulfilled lover, *Amoretti* moves from courtship to the lovers’ fulfillment in marriage. The *Amoretti*, a sequence of eighty-nine sonnets, and *Epithalamion*, a verse celebration of a wedding day, were printed together by William Ponsonby in 1595, but they were entered in the Stationers’ Register on November 19, 1594. Ponsonby’s title page describes them as “written not long since,” and they have been interpreted as documents in Spenser’s biography.

Since the *Amoretti* contains references to wooing, it has been assumed that the woman addressed is Elizabeth Boyle, Spenser’s second wife. If Edmund Spenser is the Spenser who married Machabyas Chylde in 1579, Machabyas had presumably died by 1591. According to numerological and astronomical analyses deriving from the sonnet sequence and wedding poem, Spenser married Elizabeth Boyle sometime between 1591 and 1594. Internal references indicate that his *Epithalamion* was probably written for his own wedding, which according to astronomical and numerological images seems to have taken place on June 11, St. Barnabas Day, possibly in 1594. The dedication to the published texts, however, does not specify a biographical link between Spenser’s life and these poems. Ponsonby dedicates the poems to Sir Robart Needham, whom he thanks for having brought the poems from Ireland to England.

The term “epithalamium” derives from Greek and means literally “before the bridal chamber,” but it has come to stand for many different kinds of works, including lyrics praising marriage and actual descriptions of marriage. Conventionally, the spokesman of the wedding poem is a social figure in charge of the festivities or a guest at the wedding, but Spenser varies these conventions because in his poem the bridegroom himself is the poet. His

poem intermixes the conventions of the sonnet sequence and the wedding poem.

The poem has a mythological frame; both human beings and gods are wedding guests, but in stanza 10, the bride is given a *blazon*, a head-to-toe description of her beauty borrowed from the conventions of the Petrarchan sonnet. Spenser's bride is first a "mayden Queene," then her neck is like a "marble towre" and her body a "pallace fayre," but Spenser never lets the reader forget the sensuousness of the occasion. The lips of his bride are "lyke cherries charming men to byte," her breast like a "bowle of creame uncrudded." This magnificent celebration of wedded love concludes with Spenser's prayer that his poem, "in lieu of many ornaments," will be to his wife a "goodly ornament," and that his consecration of their marriage in song will be "for short time an endlesse monument."

### SUMMARY

On his tombstone, Edmund Spenser is described as the "prince of poets," high praise indeed for a poet who was born only about ten years before Shakespeare. His *The Faerie Queene* ranks as one of the most important national epics, and it is one of the best Renaissance efforts to preserve medieval romance while emulating the classical epics.

Jean R. Brink

## DISCUSSION TOPICS

- How does the sequence of Edmund Spenser's publications reflect his determination to be a major poet?
- Compare Spenser and Sir Philip Sidney's conceptions of the moral purposes of literature as expressed in the former's dedicatory letter to Sir Walter Raleigh regarding *The Faerie Queene* and the latter's *Defense of Poesie*.
- How does Spenser demonstrate his versatility in *The Shepheardes Calender*?
- What epic features are there in *The Faerie Queene*?
- What are the characteristics of Spenser's lady knight, Britomart?
- What original features mark Spenser's *Epithalamion*?
- How do the themes in Spenser's *Amoretti* differ from the themes in most sonnet sequences of his time?

## CHRISTINA STEAD

**Born:** Rockdale, New South Wales, Australia  
July 17, 1902

**Died:** Sydney, New South Wales, Australia  
March 31, 1983

*Stead's controversial novels and short stories survived both popularity and neglect before they achieved international recognition for excellence.*

### BIOGRAPHY

Christina Ellen Stead was born in a Sydney suburb on July 17, 1902, the eldest child of David Stead, a leading Australian naturalist. Christina's mother, Ellen Butters Stead, was the last of ten children born to a gold miner. Ellen shocked her own devout mother when she married David, an avowed atheist, at the age of twenty-five. Christina was born eleven months later, but before the child was three, her mother died from a burst appendix.

David Stead's sister, Florence, and her young daughter went to live with the Steads after Ellen's death. About two years later, David Stead married a wealthy woman named Ada Gibbons and moved the family into a large house where the couple had six children in ten years. When the house had to be sold to pay off debts, the extended family moved to a modest home in Watson's Bay, at the mouth of Sydney Harbor. An uneasy relationship with her stepmother may have contributed to Stead's early desire to leave home, a story reflected in her autobiographical novel, *The Man Who Loved Children* (1940, 1965).

Stead trained at Sydney Teacher's College and taught in the inner city in 1923, but she was transferred several times before she resigned in 1925, finding herself unsuited for teaching. She found an office job and saved for two years to earn money to go to Europe. Within a week after arriving in London, Stead found a job in a bank. Her boss, William Blech, who would eventually become her husband, was an American of Jewish background, steeped in left-wing politics and European art, culture, and history. Blech, although married, was estranged from his wife, who would not agree to a divorce.

Stead flowered under the intellectual stimulation Blech provided, and when he accepted a banking job in Paris in 1929, she followed him. Living with Blech in Paris, she obtained work at the same bank, which would later provide material for *House of All Nations* (1938). The worldwide economic depression confirmed Stead's left-wing political convictions.

Stead had been writing steadily since she left Australia, and Blech, who believed in her talent, presented her work to publishers. In 1934, *The Salzburg Tales* and *Seven Poor Men of Sydney* appeared. *The Salzburg Tales* won critical raves, but her first novel received mixed reviews. The following year saw the collapse of the Paris bank where Stead and Blech worked, and the couple set sail for New York. Stead's *The Beauties and Furies*, a novel of café life in Paris, was published in London and New York in 1936. Blech and Stead left for Spain later that year, but soon returned to New York where they contributed articles to *New Masses*, a journal of the Communist Party of the United States.

Blake (Blech had changed his name) threw himself into writing and political activism while Stead pursued work on what was to be her most famous novel, *The Man Who Loved Children*. The book was praised, but only critic Clifton Fadiman, writing in *The New Yorker*, recognized it as a great book. Stead continued to write for *New Masses*, worked as a Hollywood scriptwriter, and with Blake compiled an anthology from the classics titled *Modern Women in Love* (1945).

During the 1940's, United States government agencies were investigating radicals. The Federal Bureau of Investigation (FBI) developed extensive

files on Stead and Blake, and Stead was mentioned in the publications of the House Committee on Un-American Activities (1938-1954) three times. In 1946, the couple returned to war-ravaged Europe, which, compared to the anticommunist United States, seemed safer. Shortly before they left, Stead published *Letty Fox: Her Luck* (1946), which was vilified as obscene and was eventually banned in her home country, Australia.

For the next decade Stead and Blake wandered about Europe while she kept up a steady output of novels, stories, articles, and reviews. Blake finally obtained a divorce from his estranged wife, and he and Stead were married in London on February 23, 1952. The couple settled in England and endured financial difficulties for the next decade. Stead read for publishers, translated novels, and did some office work, which took a toll on her own writing. In 1962, two stories appeared in a Sydney journal, reviving interest in her work in Australia. Interest was also growing in the United States, where a spate of Stead's short stories appeared and *The Man Who Loved Children* was republished to acclaim in 1965.

Blake's health began to deteriorate. He died in 1968, and Stead was left devastated. The following year, she was offered an Australian National University Creative Arts Fellowship for four months. At the end of 1969, Stead returned to England and spent the next four years trying to regain her old writing rhythm. She published reviews as well as ten short stories, and she worked on a long novel, *I'm Dying Laughing: The Humourist* (1986). These were lonely years of financial hardship and little intellectual stimulation, and in 1974 Stead returned to Australia.

The last decade of Stead's life brought recognition and honors. She served as writer-in-residence at Monash University and at Newcastle University, and she was awarded an honorary membership in the prestigious American Academy of Arts and Sciences and an honorary doctorate from the University of New South Wales. Plagued with loneliness and increasing ill health, she died of septicemia in a hospital on March 31, 1983.

## ANALYSIS

In interviews and essays, Stead repeatedly confirmed that her work was highly autobiographical, yet her fiction is not merely a retelling of her life.

Significant events she experienced are closely connected to her representation of these events in her fiction. Her two best-known novels, *The Man Who Loved Children* and *For Love Alone* (1944), are often mistakenly read as autobiographical documents rather than the accomplished works of fiction they are.

The generally loose structure of most of Stead's novels consists of series of scenes in which there is little description or interpretation and almost no authorial comment. Stead sets up a scene and lets the characters speak. They present and, in a sense, betray themselves; the reader follows their dramatic monologues, dialogues, stream of consciousness, oration, argument, and justification. Her characters reveal themselves through fantasy, dreams, and the subconscious as well as through rational ideas. The hidden and fantastic are as important to each character's reality as the obvious and the rational, lending complexity to the characters and additional layers of meaning to the novels.

Stead declared that she was a naturalist and that she had been trained by her naturalist father. This training began when Stead was very young; she recalled sleeping for a time in a packing case filled with zoological specimens and being told realistic bedtime stories of bird, sea, and animal life. Later, she read books from her father's library on geography, biology, and evolution, as well as William Shakespeare, Friedrich Nietzsche, Lord Byron, and Johann Wolfgang von Goethe. Her family background in natural history provides the realistic details that underpin Stead's work. Naturalism in the novel usually includes the idea that character is formed by heredity and environment, with no connection to a spiritual world. This is a concern that Stead grappled with all of her life, and which she dramatized in her posthumously published novel, *I'm Dying Laughing: The Humourist*. Moral issues of individuality versus conformity lead to a tragic conclusion in the novel. While Stead took care to imply the social influences that drive her characters, she infused them with such spirituality that they transcend what is usually expected of naturalism in fiction.

Love is another major theme in Stead's fiction, a theme brought into sharp focus in her novels *For Love Alone* and *Letty Fox: Her Luck*, both written after Stead had formed an intense relationship with Marxist writer Ralph Fox. He appears in *For Love*

*Alone* as the character Harry Girton, for whom the heroine develops a passion at the same time she is in love with her devoted husband. Stead declared that *For Love Alone* was the first novel she had written about love, a subject very important to her. Although Stead's love for her William Blake was deep and lifelong, her love for Fox marked the beginning of her exploration of love as a creative force.

*Letty Fox: Her Luck* explores the love theme through one of Stead's recurrent character types: the young woman trying to break free of the bonds of tradition in order to achieve self-realization. This character type first appears in *Seven Poor Men of Sydney* as Catherine, who rejects family ties and respectability, but fails to achieve fulfillment. Letty Fox's picaresque tale is told in the first person and was one of the first novels in English to speak frankly about subjects such as impotence and female sexual aggression. Although Letty pursues a promiscuous life, exploring "free love," she finds her experiences costly, repetitive, and often painful. She finally settles for marriage and pregnancy to provide the self-fulfillment for which she has been looking. Yet an irony exists in Letty's cheerful acceptance of her fate; there is a strong suggestion that Letty is lying to herself as well as to the reader.

Perhaps the most important character type in Stead's work is the tyrannical father. He appears briefly in *Seven Poor Men of Sydney* and in the story "Overcote" in *The Salzburg Tales*. In the latter he is the smug, egoistic schoolmaster who denies his children independence, spoils their chances of marriage and a career, and then sinks into self-pity when they turn away from him. The same type of character appears as Andrew in *For Love Alone* and as Sam Pollit in *The Man Who Loved Children*. The tyrannical father is modeled on Stead's own father, yet the fictional representation of him is so powerful that some critics have considered Sam and his fictional wife, Henny, to be almost mythical figures.

Two of Stead's later novels show a deep disillusionment with ideas of social and political liberation that dominated the intellectual scene between the two world wars. *Dark Places of the Heart* (1966; published in England as *Cotter's England*, 1966) and *I'm Dying Laughing: The Humourist* focus on the mundane details of daily life, but the heroines play

out their personal power struggles amid countless political debates. The major stylistic techniques of these two novels are contrast rather than connection, movement rather than reflection or explanation, and repetition and accumulation of detail. One of the great achievements of *Dark Places of the Heart* is the successful blending of the realistic and grotesque into a single vision. These techniques tend to diminish the author's narrative voice and trivialize political concepts in favor of the characters.

Stead's subject is that most traditional of novelistic subjects: human character. Stead's characters are fairly common sorts of people who have a capacity to express themselves more fully than men and women usually do in real life. The people who are overwhelmed in her novels go under because they cannot compromise their individuality; the most memorable of her characters remain stubbornly unique. In every case, there is more to them, and they are more interesting than the environments that shaped them.

## SEVEN POOR MEN OF SYDNEY

**First published:** 1934

**Type of work:** Novel

*The only one of Stead's novels set entirely in Australia depicts a group of young adults trying to find meaning in their lives through politics, religion, or personal relationships.*

Although *The New Yorker* (March 9, 1935) found *Seven Poor Men of Sydney* "disappointing," Australia's *Bulletin* (November 28, 1934) focused on Stead's evident skill: "*Seven Poor Men* is a remarkable book if only for its virtuosity." To readers of the 1930's, who were growing in their awareness of the influence of modernism in fiction, Stead's first novel may have been puzzling, but to later generations it does not seem difficult. *Seven Poor Men of Sydney* contains the poetic style, use of monologue to define character, and picaresque structure that were to become hallmarks of her fiction.

The novel has no plot in the conventional sense, although a thematic pattern emerges from the developing personal and social relationships among

family members and friends. The major characters in the novel are Michael Baguenault, an alienated war veteran; his sister, Catherine, an idealistic political activist; their cousin, Joseph, a poor printer of devout Catholic faith; and Baruch Mendelsson, a young Jewish intellectual who works with Joseph. The first two chapters are occupied with Michael, intense and introspective, who rejects his family (except for Catherine), his church, and his school. He falls in love, is rejected, enlists in World War I, and returns to Australia suffering from nervous disorders. He takes up with several young socialists with whom Catherine works in the movement.

The novel shifts focus to Joseph Baguenault and Baruch Mendelsson, who work at Chamberlin's printing press. Business is bad, salaries are in arrears, and Chamberlin is incompetent. Another employee, Withers, is plotting to take over the press. There is much discussion of socialism and capitalism, with each character responding to these ideas according to his or her individual viewpoint. There are flirtations and infatuations, and many minor characters. The story returns to Michael and Catherine and to Michael's increasing sense of alienation. The climax occurs in chapter eight when Michael, after a period of wandering, intoxication, hallucinations, and unfulfilled love, is swept to his death from the treacherous cliffs of Fisherman's Bay. This event drives Catherine to an asylum and shakes Joseph's religious faith, although at the end of the novel Joseph is tranquil as he reflects on the trials of long ago.

Each character is at the mercy of forces beyond his or her control, and each reacts to this fact in individual, different ways. Michael is the only one to surrender to personal and public chaos; the others survive. *Seven Poor Men of Sydney* is about youthful idealism and the way urban poverty affects human lives. It is more modern than many other novels of its time because of the way it concentrates upon its characters' inner lives in a poetic, expressionistic way. Despite its apparently haphazard structure, the novel develops unity through conflict, a thematic organizing device that recurs in Stead's later novels.

## THE MAN WHO LOVED CHILDREN

**First published:** 1940, 1965

**Type of work:** Novel

*A mismatched couple's bitter marriage ends in the wife's suicide, while the husband's eldest daughter struggles to escape the family.*

An autobiographical novel, *The Man Who Loved Children* is built on series of conflicts of increasing intensity involving the marriage of Sam and Henny Pollit. The conflicts culminate in a tragic climax. The second theme, of Louisa's escalating conflict with her domineering father, is also played out in scenes of her attempts to break free. Another organizing device is juxtaposition: Sam and Henny, the female principal and the male, adults and children, and delusion versus reality.

The antagonism is well established between Sam and Henny as the novel opens. They are not speaking to each other, but soon their silence is broken by Sam's self-serving speeches and Henny's bitter tirades. A protected daughter of a wealthy family, Henny is incapable of running the large household of children and assorted relatives with inadequate finances and Sam's constant attempts to subvert her authority. When Sam joins an expedition, he leaves her, pregnant and in poverty, to spend the winter in a freezing house. On returning, Sam finds that Louisa, his daughter from an earlier marriage, has become increasingly defiant. After Henny gives birth to a boy, Sam receives news that Henny's father has died and their fine house in Washington, D.C., must be sold to pay debts.

Sam loses his job, and when the family moves to a crumbling old house on a mudbank in Maryland, his attempts to retain control of Louisa grow meaner. Henny lives in misery between the noise of Sam's renovations and her scrabbles for money to feed the family. Finding her stepmother's despair unbearable, Louisa prepares a poison tea, but understands the enormity of her action too late. Henny grabs the cup and drinks, knowing what it is. When Louisa tells her father what she has done, Sam refuses to believe her. Louisa eventually defies Sam and finds the strength to leave him for a better life with relatives in Harpers Ferry.

Stead's eye for the details of the sordid under-

pinnings of domestic life is entirely realistic, but the speech used by major characters is artificial. Sam coaxes, badgers, and engulfs the others with a steady monologue of baby talk, song lyrics, foreign dialects, and pious moral pronouncements. Henny also has her speech mannerisms; she sings and jokes with the children, and her tirades are full of hysterical exaggeration and filth. Her tirades are more honest than Sam's, however, for he lies about his life to preserve his ego. Their contrasting speeches about family life lay bare the central irony of the novel.

Louisa also reveals herself in strongly individualized language, and she attains a degree of psychological independence from her father by writing and telling her own stories and poems. Sam finds this threatening, and when Louisa develops a secret language of her own, he is furious. In the symbolic language of myth, fiction, and poetry, Louisa has found the words to defy her father and find her freedom.

## DARK PLACES OF THE HEART

**First published:** 1966 (published in England as *Cotter's England*, 1966)

**Type of work:** Novel

*A left-wing journalist and her charming brother struggle with each other for power against a background of exhaustion, housing shortages, malnutrition, and injury in postwar England.*

The main character in *Dark Places of the Heart* is Nellie Cook, who grew up in the working-class Cotter family in England's industrial north. A bohemian rebel since youth, in middle age Nellie is a shallow, loquacious, restless tyrant with a need to dominate the people in her life. Her particular obsession is her brother, Tom, who returns home after a hopeless affair with a married woman who has died of cancer. Nellie analyzes Tom's affair relent-

lessly, continually trying to prevent him from taking up with any other woman. Tom seduces Nellie's friends one after another.

Nellie is married to George Cook, a labor negotiator who is on the Continent attending labor congresses. Although she works for a socialist newspaper, she has no real grasp of politics or social conditions; her main interest is controlling the unfortunate women she collects in her rambling house in a scruffy London suburb. In this novel the reader sees a culmination of Stead's technique of exposing each character in his or her own words: Nellie constantly describes herself in myths of origin about her family and her supreme importance in Tom's life, while Tom charms everyone he meets with stories of his colorful adventures. Sister and brother both exert a mesmerizing power of speech.

Some of the scenes of the novel take place in Bridgehead, where Nellie and Tom visit their ailing mother, their embittered sister, Peggy, and their ancient Uncle Simon, who is an abused victim in the household. The Cotter family home in Bridgehead is important for the incisive and unsentimental picture it gives of working-class customs, beliefs, and attitudes. There are also hints of childhood incest, mental illness, and other dark secrets in the family's past. In this late novel, Stead merges the political theme with individual character and personal relationships more successfully than in any other of her books.

Nellie's husband, George, is offered a good job in Geneva, and he promises to send for Nellie when he is settled. She remains in England, is betrayed by her friends and husband, fights with her editor, and subsists on tea and alcohol while her lungs deteriorate. Finally, George sends for Nellie to join him in Geneva, where he has a good job, but he dies a short time later in a skiing accident. Nellie invites Tom to the funeral and returns to her house near London with a photograph of herself and Tom, holding hands and smiling at the funeral. Stead's cool sympathy for her characters enables the reader to understand the failures and betrayals of the novel that are made inevitable by ignorance, social conditions, and the powerful drive for personal gratification.

## SUMMARY

Christina Stead staked out her territory exploring the myths and delusions that drive ordinary

people. She writes with startling accuracy of the dark obsessions developed in that intense microcosm of society, the family. Her technique of portraying characters through each one's own words, dreams, and imagination achieves a layered novelistic reality at odds with the details of scenery, interiors, and artifacts of daily life. Always interested in the effects of society on the individual, Stead writes about characters who are often from the lower rungs of the social ladder. Each character is more than a reflection of his or her times, despite the serious political underpinnings of Stead's novels.

Sheila Golburgh Johnson

## STENDHAL

**Born:** Grenoble, France

January 23, 1783

**Died:** Paris, France

March 23, 1842

*As well as brilliantly depicting the people and morals of his day, Stendhal was one of the most important innovators in the history of the novel.*

### BIOGRAPHY

Stendhal (stehn-DAHL) is the most widely recognized pseudonym of Marie-Henri Beyle. He was born in Grenoble, a provincial city in the southeast of France, on January 23, 1783. He was alive during the time of the great upheaval in French and European society brought about, in the first place, by the French Revolution and subsequently by the rise and fall of Napoleon I. Stendhal had intimate experience with the latter phenomenon.

Grenoble was not a place where Stendhal felt at home. He had little time for its narrow outlook in matters of politics and religion, and its atmosphere was out of touch with the burgeoning spirit of liberty of the author's boyhood. Much of what Stendhal came to oppose in human affairs and behavior he initially found in his father, with whom he was severely in conflict. This antagonism was made worse by, or perhaps had its source in, the death of the novelist's mother when he was seven. In his candid and innovative, though unfinished, autobiography, *Vie de Henri Brulard* (wr. 1835-1836, pb. 1890; *The Life of Henry Brulard*, 1925), he details with almost embarrassing intimacy his love for his mother. This autobiography's title draws attention to Stendhal's love of pseudonyms. He is thought to have used more than two hundred pseudonyms.

In 1799, having completed his education at Grenoble, Stendhal went to Paris and enrolled in the École Polytechnique, intending to study math-

ematics. The attractions of the capital, however, soon militated against study, and by 1800 he had secured a commission in Napoleon's army. His duties took him to Milan, where he began a lifelong love affair with Italy. One of the four Italian words inscribed on his tomb is "Milanese," and it was in his adopted native city, finally free of the constraints of Grenoble, that he entered into the first of many ardent and arduous emotional liaisons.

His first visit to Milan lasted until 1802. In that year, he resigned his army commission and returned to Paris. For a number of years, he attempted to live an artistic life and was a frequenter of literary salons. Unable to afford the lifestyle that his ambitions required, he rejoined the army in 1806 and worked as a quartermaster. This position took him to Germany, Russia, and Austria. Stendhal did not see direct action, but in other respects, imaginative as well as physical, he was profoundly affected by the demands of military life. He resigned his army position in 1813 for health reasons and retired to Milan, where he remained until 1821.

These years saw Stendhal's first publications. These consisted of works of criticism and, as such, are an important introduction to his fiction (though not for their contents). The criticism takes the form of biography, Stendhal's first book being *Vie de Haydn, de Mozart, et de Métastase* (1815; *The Lives of Haydn and Mozart, with Observations on Métastase*, 1817), followed by *Histoire de la peinture en Italie* (1817). Both works are notable for their plagiarism; yet they are also notable for their concern with style and sensibility, matters that are central to

Stendhal's fiction. In addition, the biographical mode is one that his two great novels adapt and develop.

Both these works were published under the name Beyle. *Rome, Naples, et Florence en 1817* (1817, 1826; *Rome, Naples, and Florence in 1817*, 1818) was the first book of his to appear under the name Stendhal. Taken in conjunction with the biographies, it establishes the repertoire of effects upon which Stendhal's fiction was to draw. Like his biographical studies, however, Stendhal's travel works, of which there are a number, are innovative in showing how individual sensibilities may be stimulated and engaged. Travel is not only fundamental to the plot development of Stendhal's fiction but also a means of revealing the way that the world educates his protagonists.

Stendhal spent the years 1821 to 1830 in Paris, again attempting to live the artistic life. This period saw the production of such key works as *De l'amour* (1822; *Maxims of Love*, 1906) and, in the following year, *Racine et Shakespeare* (1823, part 1; 1825, part 2; *Racine and Shakespeare*, 1962), an important document in the widespread cultural debate of the day on the differences between classicism and Romanticism. It was not until 1827 that Stendhal produced his first novel, *Armance* (English translation, 1928). It was followed in 1830 by the first of his masterpieces, *Le Rouge et le noir* (*The Red and the Black*, 1898). The year 1830 also saw a revolution in France. Stendhal accepted the new regime that the so-called July Revolution had brought into power. As a result, he was appointed consul, first at Trieste, then at Civitavecchia, a posting whose gloom was relieved by its nearness to Rome. With numerous leaves of absence, mostly in Paris, where he wrote most of his other travel pieces, memoirs, and fiction, including his second great work, *La Chartreuse de Parme* (1839; *The Charterhouse of Parma*, 1895), Stendhal held this posting until his death, of apoplexy, in Paris, on March 23, 1842.

## ANALYSIS

Stendhal's prediction that his work would not be appreciated until fifty years after his death was not entirely borne out by events. In his lifetime, he won the esteem of, among others, Honoré de Balzac, the other major French novelist of the day. Yet, there is a certain amount of truth in Stendhal's forecast, not merely because his first translation

into English did not occur until the later years of the nineteenth century. Translations obviously gave his work a wider audience, but the fact that they came to the attention of an international readership at a time when the criticism of fiction was becoming a more pronounced fact of cultural life led to a more influential appreciation of his distinctive artistic ambitions and accomplishments as a novelist.

It is because of its psychological interest that Stendhal's fiction is regarded so highly. That is also why it is significant that his first publications were works of criticism and of observation in a broad sense. These early works establish the bases for the kind of transition in imaginative prose that Stendhal's novels represent. Many of his concerns may be crudely reduced to his fascination with the dual, and interdependent, relationship between reason and emotion. It is from this fascination that he derives his power as a portrayer of characters. As a result, his fiction was instrumental in elevating character over story.

The shift in emphasis revealed in Stendhal's work is very much part of a larger shift in sensibility that occurred in European culture during Stendhal's apprenticeship as a writer. This transition is from the ostensible stability and sense of proportion of the predominantly neoclassical art of the eighteenth century to the Romantic art of the nineteenth century. Such a reorientation of sensibility did not occur overnight, but gradually, through a publicly perceptible process of realignment. As Stendhal himself suggests, this realignment was not necessarily exclusively revealed in the literature of the day. His most comprehensive investigation of the phenomenon, *Racine and Shakespeare*, involves great writers from other eras and praises Shakespeare for his Stendhalian spontaneity, exuberance, and vividness.

Stendhal is not merely an important analyst of the culture of his day. As his biography reveals, he was also intimately involved with the history of his times. This history, and Stendhal's experience of it, was dominated not merely by the activities of Napoleon but also by his mythic status. Napoleon was perceived by the European mind at large as the spirit of the age. To Stendhal, this spirit was dynamic, ambitious, energetic, resourceful, impassioned, and foolhardy. His response to it, as the characters of Julien Sorel in *The Red and the Black*

and Fabrizio del Dongo in *The Charterhouse of Parma* reveal, was generous. At the same time, however, it was impossible for Stendhal to identify completely with it. The youth of a Julien and Fabrizio inspires their daring, verve, and vitality. Yet it also inspires Stendhal's most tenderly ironic critique of such qualities. His artistic ambition is to reconcile the passions of his heroes to his own dispassionate reason.

Stendhal's most important contribution to the development of the novel is his use of it to produce systematic critiques. This use not only underwrites his conception of his heroes but also shows the novel to be a means of reflecting on contemporary individuals and morals. The irony that Stendhal applies to his youthful protagonists is used much more incisively to reveal the hypocrisies, evasions, and trivialities of public life in the wake of Napoleon. It is in the figures of Julien and Fabrizio that Stendhal expresses most cogently the philosophy that he named *Beylisme*. This outlook lauded the energetic, and perhaps even reckless, pursuit of happiness as the highest human calling and the animating power of all activity. Such an emphasis on individuality is a testament to the range, originality, and significance of Stendhal's writings.

## THE RED AND THE BLACK

**First published:** *Le Rouge et le noir*, 1830  
(English translation, 1898)

**Type of work:** Novel

*This story depicts the career of a talented young man in postrevolutionary France.*

Originally published in 1830, *Le Rouge et le noir* first appeared in English translation as *The Red and the Black* in 1898. Its many subsequent editions in different English translations testify to its classic status. Written in an economic and, for the most part, slyly understated style, its claim to be counted among the finest novels of the nineteenth century is undoubted.

Perhaps the only feature of *The Red and the Black* that is not entirely original is its plot. It was taken by Stendhal from a story that appeared in a newspaper, the *Gazette des Tribunaux*, in 1827, concerning

Antoine Berthet, the son of a laborer, whose career had something of the same rise and fall as that of Julien Sorel, the novel's hero. The similarity between the two cases is not merely an intriguing side-light on the composition of *The Red and the Black*. It also speaks directly to the reality of the novel's concerns, which draw not only on the newspapers of the day but also on the recent history of France. As Julien well knows, the example of Napoleon I, to which he is unwisely devoted, has made it possible for someone who is provincial, talented, and ambitious, but without social connections, to have his dreams of success realized.

Julien embodies the duality that Stendhal perceived to exist between spirit and reason. He is a lover who is also a hypocrite, a cleric who becomes a soldier, an innocent who commits a crime. He possesses a winning measure of spontaneity, verve, and daring. Yet these natural qualities are continually placed in the service of a socially inspired image of himself. It is to this image that Julien is enslaved. For all of his success, he spends much of his time unhappy, confused, and on the defensive. He wages two self-promoting campaigns, one in Verriere, the other in Paris. Though he wins a number of battles, he loses the war and becomes, like Napoleon, his idol, that war's most visible and notorious victim.

Stendhal organizes *The Red and the Black* so that his conception of duality becomes inescapable. Its overriding presence is obviously called to the reader's attention in the title. There has been much critical debate as to what "red" and "black" refer. "Red" is thought to suggest the hot-blooded vigor of the Napoleonic era. That era's conservative and small-minded aftermath, on the other hand, is said to be denoted by clerical black. Julien's career seems to confirm what his advisers imply, that the church's uniform is the only one in which he will be able to secure the career to which his talents entitle him. A narrower reading of the color code calls attention to the political climate of

the post-Napoleonic period, with red standing for republicanism and black for clerical conservatism. It is also possible to see the colors as referring exclusively to Julien. His inner life is vivid, while on the outside he seems largely colorless.

While Stendhal allows the reader to ponder the title's various possibilities, he is quite explicit in providing by other means a comprehensive sense of the dual elements in his protagonist's career. Not only does *The Red and the Black* have a two-part structure, but the stories in each of them are counterparts of one another. The natural world of Verriere, with its walks, gardens, and children, yields to the artificial world of Paris, with its salons, carriages, and callow youths. More important, Julien's affair with Madame de Renal is conducted with a ruthlessness that belies his spontaneous nature and exploits hers. The affair with Mathilde de la Mole, on the other hand, shows Julien to be the exploited one, in turn a victim of a loved one's bad faith. Thus, not only is each of Julien's two stories complementary; each provides an ironic commentary on the other. Aware of the twin force of image and reality, artifice and nature, hypocrisy and honesty, but deprived by his character of the power necessary to regulate this awareness, Julien falls afoul, not of the time but of his inability to secure his place within it.

## THE CHARTERHOUSE OF PARMA

**First published:** *La Chartreuse de Parme*, 1839  
(English translation, 1895)

**Type of work:** Novel

*This tale describes a fateful conflict between emotional idealism and political reality, set in early nineteenth century Italy.*

Stendhal's second great novel, *The Charterhouse of Parma*, was first published in Paris in 1839 and had to wait more than fifty years before appearing in an English translation in 1895. Like *The Red and the Black*, its vivid characterizations, intriguing plot, and ironical style immediately confirmed its status as one of the major achievements of the nineteenth century novel.

Almost ten years separate the original publication of *The Charterhouse of Parma* from *The Red and the Black*. The interval did not, however, produce a change in Stendhal's fictional themes or methods. Once again, the protagonist is a young man, and the environment in which he comes face to face with the world and his situation and destiny in it is one of political intrigue. Again, the protagonist's fate seems to be decided by his emotional nature, and the expression of that nature is subject to ruinous social manipulation. The larger backdrop to the novel's plot is the Napoleonic era. Yet it is used to illuminate the character of the protagonist, Fabrizio del Dongo, and to prepare the reader for the struggle for autonomy and individuality that Fabrizio must undergo. As in *The Red and the Black*, this struggle constitutes the bulk of the novel.

What might be referred to as the Fabrizio narrative in *The Charterhouse of Parma* opens with a series of his misadventures in pursuit of military glory. The presentation of an ignorant, inexperienced, confused, but spirited Fabrizio at the battle of Waterloo has long been considered not only a high point in the depiction of the individual in history but also a telling instance of the essentially modern character of Stendhal's imagination. The impetus that inspires Fabrizio to flounder self-deceivingly in the wake of Napoleon's army, however, is the same one that guides his behavior throughout the novel. This impetus is romantic in nature. Its generous and outgoing aspects are dramatized, but with a more sensitive irony than that of *The Red and the Black*.

Fabrizio's angelic appearance is, understandably, taken at face value by those who love him. Yet their acceptance of him is the basis of the tragic experiences that he brings their way. This acceptance places a far greater emphasis on the moral and spiritual dimension of the characters, which the remoteness of the novel's setting accentuates. The persistence with which remoteness of setting is featured throughout, ending in the charterhouse itself, and the fact that it tends

to force the characters to tap their own internal resources, lends the work as a whole a distinctly operatic air, which Stendhal, the author of a biography of Italian composer Gioacchino Rossini and a life-long lover of opera, undoubtedly cultivated.

The interest of *The Charterhouse of Parma* is at once more intimate, more desperate, and of greater human significance than that of *The Red and the Black* because the plot revolves around the inescapable nature of feeling. This orientation is embodied most substantially by the Duchess Sanseverina, who is the novel's most operatic, and most memorable, character. Through his development of the Duchess, Stendhal underlines his conception of duality. The means of doing so are quite different from those used in *The Red and the Black*. There, the focus was on ambition, mediated through the inadequacies of human society. The focus of *The Charterhouse of Parma* is love, mediated through the frailties of human nature. Fabrizio is the most obvious embodiment of these frailties. The manner in which he embodies them, however, reveals their existence more critically in the women around him. Of these, the Duchess is the

most affecting, the most compelling, and the character above all others in Stendhal's fiction who reveals this author's belief that the pursuit of happiness is ironically life's joy and tragedy.

## SUMMARY

Two novels may not seem much upon which to base an enduring reputation, even if they are as distinguished as *The Red and the Black* and *The Charterhouse of Parma*. Yet even without these two novels, Stendhal would still have a place in literary history. His place is secure not only because of the quality and interest of his other work, including his lesser-known, unfinished, and inferior fiction, but also because of the precision with which the man himself felt the pulse of his time. His acuteness can be perceived in the political sophistication that suffuses his novels and his wry regard for the foibles and fashions of the day. Above all, Stendhal is noteworthy for attaining within himself the freedom to express a spirit tempered by reason, and to employ this reason without denying his emotions.

George O'Brien

## LAURENCE STERNE

**Born:** Clonmel, Ireland  
November 24, 1713

**Died:** London, England  
March 18, 1768

*As one of the prominent figures writing during the rise of the English novel, Sterne helped explore and define its possibilities.*

### BIOGRAPHY

Laurence Sterne was born on November 24, 1713, in Clonmel, Ireland, to a respected Yorkshire family (his great-grandfather, Richard Sterne, had been archbishop of York). His father, Roger Sterne, was a young ensign, and Laurence spent his early years in towns and cities all over England and Ireland. The second of seven children, only three of whom lived to adulthood, he left at age ten for school in Halifax, England. There he was taken under the wing of his uncle Richard Sterne, a community leader who became a second father to him.

Roger Sterne squandered the family's wealth before his death in Jamaica in 1731. When Richard Sterne died the following year, Laurence, now detached from his mother, was penniless. In 1733, he entered Jesus College, Cambridge; after first working to earn the tuition for his education, he was awarded one of the Sterne scholarships established by his great-grandfather. He studied Latin, Greek, mathematics, rhetoric, and philosophy (which included geography, ethics, and the natural sciences). He admired the Greek philosopher Plato and the English thinkers John Locke and Sir Isaac Newton. Matriculating in 1735, Sterne received his degree, most likely in early 1737.

Already indebted to associates such as his lifelong friend John Hall, Sterne had few options but to go into the church. He was admitted to the Or-

der of Deacons and given an assistant curacy in St. Ives, an unimpressive post. For two decades, he lived a pastoral life, climbing the parochial hierarchy of Yorkshire with the help of political contacts, which included his uncle, the Archdeacon Jaques Sterne. With each post—prebendary of Givendale, vicar of Sutton, commissary of the Peculiar Court of Tollerton—came increased lands and their incomes. Sterne's duties were both religious and political. He preached regularly and oversaw cases in the spiritual courts. As a rising clergyman and nephew to Jacques Sterne, he became involved in Yorkshire's political life, contributing political articles to the *York Gazetteer* and publishing political pamphlets.

On March 30, 1741, Sterne married Elizabeth Lumley. A daughter, Lydia, was born on October 1, 1745, but she died the following day. A second Lydia was born on December 1, 1747; she would grow to be her father's beloved and only child. Elizabeth's health was poor, and the marriage was not happy; Sterne is known to have entertained other women during frequent visits to York. As a country parson, he read widely, played various musical instruments, liked painting and hunting, spoke mediocre French, may have participated in amateur theatricals, and farmed his land with reasonable success.

In 1758, with a staid life, a stale marriage, no hopes for more children, and an awareness of the fragility of middle age, Sterne withdrew from his parochial duties and moved to York in the hope of career advancement. When ongoing feuds with his uncle dashed his hopes, he turned to his favorite avocation, writing. In early 1759, he published a satirical pamphlet, *A Political Romance*. Aimed at po-

litical rival Dr. Francis Topham, the controversial piece was suppressed. Sterne's disappointment led him to a more ambitious project, a two-volume work of biting topical satire called *The Life and Opinions of Tristram Shandy, Gent.* (1759-1767; commonly known as *Tristram Shandy*).

The year 1759 was a tumultuous one. Sterne endured more frequent and violent attacks of the tuberculosis that eventually killed him. His wife and daughter were also ill; Elizabeth was schizophrenic and fancied herself the queen of Bohemia. Both his mother, from whom he had long been distant, and his uncle died that spring. *Tristram Shandy* was rejected by printers.

Sterne sat down to revise it, removing personal allusions, broadening the satire, and infusing the book with sentiment. He borrowed money to publish the two volumes in late 1759. A singer named Catherine Fourmantel, with whom he was passionately infatuated, introduced the book to the influential actor David Garrick. *Tristram Shandy* was an immediate success, selling well in London and garnering both praise for its delightful wit and censure for bawdiness considered unbefitting a parson. Sterne drafted a defense against his prudish detractors, but such charges plagued him throughout his life.

Sterne was a celebrity when he rolled into London in 1760. He was the subject of biographical sketches in magazines, sat for the famed portraitist Joshua Reynolds, and was taken into the favor of the rakish Prince Edward, duke of York. *Tristram Shandy* sold out quickly, and Sterne quickly arranged for publication of two volumes of his sermons, which appeared in May as *The Sermons of Mr. Yorick* (1760, 1766).

Sterne's life was transformed. He traveled frequently between London, York, and Coxwold, where he was given a living as parson in 1760. He set to work on volumes 3 and 4 of *Tristram Shandy*, which were published in January, 1761, followed by volumes 5 and 6 the following December. Given the sensation that the novel caused, imitations and spurious editions were rampant. Sterne publicly denounced them and finally adopted the practice of personally signing all authentic copies, generally about four thousand per edition. He spent most of 1762 and 1763 in France, returning to England in 1764. Volumes 7 and 8 of *Tristram Shandy* appeared in early 1765.

Sterne passed the winter of 1765-1766 traveling through Italy and then returned to write volume 9 of *Tristram Shandy*. Amid bouts of illness, he solicited subscriptions for a book based on his travels, *A Sentimental Journey Through France and Italy* (1768; commonly called *A Sentimental Journey*). In January, 1767, he fell in love with Eliza Draper, the wife of a diplomat in India, and began a diary that would later be published as *Journal to Eliza* (1904). That autumn, Elizabeth and Lydia finally returned to York, staying with Sterne briefly before arranging to live separately under his support.

Sterne went to London in December, 1767, and *A Sentimental Journey* was published two months later. Soon after, he became seriously ill and spent his last weeks in bed surrounded by friends and supporters. He died peacefully in London on March 18, 1768, of heart failure. After his death, Lydia prepared volumes 5 through 7 of *Sermons by the Late Rev. Mr. Sterne*, published in 1769.

## ANALYSIS

Part of Sterne's allure was his capacity for self-portrayal, and the appellations of Laurence Sterne, Tristram Shandy, and Parson Yorick were, with the arrival of fame and success, interchangeable. Many a writer has produced more starkly autobiographical material, but few have so completely intertwined their real and fictional personas. Thus, while the specific "facts" of Tristram or Yorick's existence differentiate them from their author, their personalities and tempers are completely those of Sterne. He made no effort to draw distinctions: He attributed his own sermons to Yorick and included one in *Tristram Shandy*; he listed actual dates of composition or travel in fictional narratives; and he constantly reminded his readers of his role as a storyteller. In some ways, he was, through his writing, creating the gentleman that he wished himself to be.

This intermixture of real and fictional worlds is a sign less of carelessness than of the assumptions under which Sterne worked. He wrote for a learned audience, many of whom knew him personally. He published serially or by subscription, so his work was responsive to the whims of the market. He composed quickly, and spontaneity is a trademark of his style. During the eighteenth century, the novel as a form was not highly evolved or defined, and calling *Tristram Shandy* and *A Sentimental*

*Journey* novels by twentieth century standards is a generous use of the term. With the exception of the sermons, Sterne's work does not fit established forms but mixes mock and real autobiography, mock and real anthology, travelogue, essay, and political satire. To search for any more recognizable form is to miss the point of Sterne altogether.

Sterne's roots as a writer are in the parsonage. Grounded in classical rhetoric—the formal art of communication and persuasion—Sterne quickly became a skilled sermonist. The careful construction of argument, use of parable and example, and ability to turn a compelling phrase all carry over into his nonreligious writings. In addition, Sterne was erudite, and his familiarity with Renaissance literature and knowledge from military strategy to obstetrics, the doctrine of “humours,” royal lineages, and archaeology give his writing a learned, if not encyclopedic, quality.

Yet amid the erudition, Sterne never loses his humanity, most remarkably expressed in his wit, sentiment, and bawdiness. Wit was a sign of the learned eighteenth century gentleman. Clever punning was in vogue, and satire was a prime source of both entertainment and social change. The roots of Sterne's satire were political, but he was not at heart a political being. Rather, as theatrical metaphors throughout his work convey, Sterne was an entertainer: Both on paper and in court, he was a talented jester. Nothing was safe from the reach of his humor, yet it was never baldly malicious. For Sterne, whose life was marked by disappointment and frailty, laughter was a means of transcending the harshness of reality. More than entertaining others, he was, through humor, feeding his own vitality.

His quick and sharp wit, on the other hand, could easily melt into a pool of sentimentality. That, too, ennobled a gentleman, the combination of patience, empathy, earnestness, innocence, long suffering, and extreme sensitivity exemplified best by Uncle Toby's pain on the death of a fly in *Tristram Shandy* or the various refined love affairs of the Shandys, Yorick, and Sterne. The *Journal to Eliza*, which Sterne may or may not have intended to publish, takes romance and melancholy to striking extremes of pathos and humorlessness.

Finally, Sterne is celebrated for his bawdiness. Certainly, eighteenth century English sensibilities

were not as prudish as their Victorian successors, but even in a society of loose tongues and swaggering rakes, indecencies were not customary from the clergy. Sterne, however, could not deny the connections between the eyes, the mind, the heart, and the sexual organs. Allusions to anatomy and desire are only thinly veiled, and they come in a characteristic spirit of good humor and honesty. His bawdiness is not gratuitous or pornographic; rather, it is integral to his vision of the world. Sterne has been criticized consistently, beginning in his own time, for lasciviousness and impropriety; at the same time, his candor, and the controversy that it arouses, has brought entertainment to millions of readers.

## THE LIFE AND OPINIONS OF TRISTRAM SHANDY, GENT.

**First published:** 1759-1767

**Type of work:** Novel

*An easily distracted gentleman attempts to narrate the details of his life and the opinions that he has formed along the way.*

*The Life and Opinions of Tristram Shandy, Gent.* is a long, challenging, and delightful work. Written serially over nine years, it does not exhibit unity of action or tell a single, identifiable story. Rather, it is unified by an overriding purpose—to tell the title character's life and opinions as honestly and completely as possible—and a unique style, whereby that purpose is thwarted and diverted by digressions and embellishments that grow out of the life and opinions themselves.

“Life and Opinions” was an acceptable autobiographical format for an eighteenth century gentleman. Sterne set out both to use it and to ridicule it through the character of Tristram Shandy. “Old Tristram” was the name given to a statue of a bearded beggar at the Halifax parish church from Sterne's adolescence. “Shandy” was Yorkshire slang for “odd” or “crazy.” Together they suggest an offbeat character; Sterne added gentility, charm, and an incapacity for direct thought or action. Tristram is the first-person protagonist of the nine volumes of the book, and in his life and opinions

he introduces an array of other characters: his pompous father Walter, his gentle Uncle Toby, the Corporal Trim, Parson Yorick, the servant Susannah, his brother Bobby, his beloved Jenny, the Widow Wadman, his friend Eugenius, and a variety of other learned gentlemen.

If *Tristram Shandy* can be said to have a plot, it has two: Walter Shandy's attempts to raise the perfect son and Uncle Toby's courtship of the Widow Wadman. Both prove unsuccessful. Their failures figure the novel's large structure, for Tristram's desire to tell his story completely also meets with failure. Underlying all the failures of the Shandy men, however, is a delight in the process of striving, be it Walter's composition of the "Tristrapaedia," by which his son will be educated, or Toby's lawn reenactment of the siege of Namur, where he received the groin wound that would ultimately precipitate his romantic failure.

Moreover, if Tristram's failure is his inability to tell a story like a straight line, it is also his triumph, for interwoven are comments, opinions, anecdotes, diagrams, and entire documents, real and fictional. Digression is the Shandean way, and the reader can expect a surprise around every corner, be it the anecdote about Corporal Le Fever or the cumbersome "Slawkenbergius' Tale." Tristram also uses unorthodox punctuation for effect, liberally litters his text with physical devices—a black page, a marble page, and even missing pages—and spontaneously devotes chapters to a variety of topics, including a "Chapter on Chapters." He directly addresses the reader, characterizing and then either castigating or pandering to him or her, thus creating an important and dynamic relationship.

Critics have debated how to classify the novel, what Sterne means by it, and whether or not he intended the cryptic last chapter, writing as he did with increasingly ill health, to mark the end of the entire work. Whatever the answers to these questions, in *Tristram Shandy* Sterne created a unique work that explores the limits of a fledgling form, the novel, and in many ways prefigures literary experiments and forms to come.

## A SENTIMENTAL JOURNEY

**First published:** 1768

**Type of work:** Novel

*A British parson recounts his travels and experiences in France and Italy.*

Twentieth century British novelist Virginia Woolf, commenting on the style of *A Sentimental Journey Through France and Italy*, wrote:

The very punctuation is that of speech, not writing, and brings the sound, the associations, of the speaking voice with it. The order of the ideas, their suddenness and irrelevancy, is more true to life than to literature. There is a privacy in this intercourse which allows things to slip out unproved that would have been in doubtful taste had they been spoken in public. . . . We are as close to life as we can be.

These comments, which could apply to *Tristram Shandy* as well, underline Sterne's relationship to the stream-of-consciousness style that Woolf, Irish novelist James Joyce, and others would develop and perfect a century and a half later. Sterne did not set out to develop a style, but in *A Sentimental Journey* the combination of urgent delight in the flight from morality and easy familiarity with a specific readership create the immediate and intimate style that Woolf describes.

In volume 7 of *Tristram Shandy*, Tristram recounts his trip through France to escape illness; *A Sentimental Journey*, in a similar vein, is Parson Yorick's account of his travels. Sterne's book is at once a response to contemporary travel books—Tobias Smollett's had appeared two years before—that criticize the host culture and a burlesque of the Grand Tour of Europe that was a traditional part of a gentleman's education. It is also a picaresque narrative in the tradition of the Spanish writer Miguel de Cervantes's *El ingenioso*

*hidalgo don Quixote de la Mancha* (1605, 1615; *Don Quixote de la Mancha*, 1612-1620), which Sterne greatly admired.

Sterne's Yorick goes to France and Italy seeking understanding, with a heart open to the people and the places that he visits. There are still elements of satire, especially where the upper class and artistic elite are concerned, but Sterne is gentler and mellowed, and Yorick's travelogue comes directly from the heart. While *A Sentimental Journey* incorporates much material from Sterne's own travels, it is a work of imagination, dependent on extrapolation and fancification of actual experience. Yorick is a humorous and sentimental man who delights in the lives of common people and finds himself in ridiculous postures under the influence of love, lust, and infatuation. Yorick's narrative includes descriptions and catalogs of people and places and a wide variety of travel difficulties and accidents that imbue it with humor and pathos. In the end, Yorick is cast as a "man of feeling," in true eighteenth century tradition. Sterne here brings to life *The Sermons of Mr. Yorick*, which his audience knew and loved well, and through the all-

too-human observations and adventures of a sentimental journeyer, he further educates, edifies, and entertains.

## SUMMARY

In his introduction to a 1935 limited edition of *Tristram Shandy*, Christopher Morley wrote, "Perhaps *Tristram Shandy* should be read first at not over 20 years, and again at not less than 40." Whether Laurence Sterne would have agreed is questionable, but it is clear that his writing offers a dazzling combination of youthful vitality and experienced wisdom that has wide appeal. Though Sterne's contemporary reader was a certain type of eighteenth century aristocrat, Sterne's direct and intimate style speaks to many beyond that limited group and era. His humor and candor, even in more liberal-minded epochs, continue to be disarming in their simple truthfulness. Sterne is not a simple author, for much of his language and erudition is of a past world, yet for readers who approach his works as he approached life, with open heart and ravenous mind, his spirit is unmistakable.

Barry Mann

## BIBLIOGRAPHY

### By the Author

#### LONG FICTION:

*The Life and Opinions of Tristram Shandy, Gent.*, 1759-1767

*A Sentimental Journey Through France and Italy*, 1768

#### NONFICTION:

*A Political Romance*, 1759

*The Sermons of Mr. Yorick*, 1760 (volumes 1-2), 1766 (volumes 3-4)

*Sermons by the Late Rev. Mr. Sterne*, 1769 (volumes 5-7)

*Letters from Yorick to Eliza*, 1773

*Letters of the Late Rev. Mr. L. Sterne to His Most Intimate Friends*, 1775 (3 volumes)

*Sterne's Letters to His Friends on Various Occasions, to Which Is Added His History of a Watch Coat*, 1775

*In Elegant Epistles*, 1790

*Journal to Eliza*, 1904

## DISCUSSION TOPICS

- In what ways do the works of Laurence Sterne defy the emphasis on reason and order which were important in his time?
- What was the basis of Sterne's admiration of Miguel de Cervantes' *Don Quixote de la Mancha* (1605, 1615; English translation, 1612-1620)?
- Is there a relationship between Sterne's Yorick and the Yorick of William Shakespeare's *Hamlet, Prince of Denmark* (pr. c. 1600-1601, pb. 1603)?
- What is sentimental in *A Sentimental Journey*?
- What stylistic features of *Tristram Shandy* were imitated by twentieth century novelists?
- Why does Walter Shandy fall so far short in his attempt to raise the perfect son?

## ROBERT LOUIS STEVENSON

**Born:** Edinburgh, Scotland  
November 13, 1850

**Died:** Vailima, near Apia, Samoa  
December 3, 1894

*Stevenson was a skillful and thoughtful literary stylist who transformed popular genres into genuine works of art.*

### BIOGRAPHY

Robert Louis Stevenson was born in Edinburgh, Scotland, on November 13, 1850, the only son of Thomas Stevenson and Margaret Balfour. His mother's family and ancestors were primarily clergymen and physicians; his father's family and ancestors were engineers. On both sides of his large extended family (both his mother and father were the youngest of thirteen children) were successful, wealthy, socially prominent professionals. His father's family, in fact, was famous in Scotland. The family firm designed and built lighthouses that had become famous landmarks, and "Stevenson" was a name to reckon with: Robert Louis's father, Thomas, and grandfather, Robert, both appear in Scotland's national portrait gallery. He was born into privilege, therefore, and was expected to carry on the tradition of a wealthy, successful professional life.

When Stevenson was an infant, his mother developed symptoms of tuberculosis, and she was an invalid for much of his first decade. After his third year, Stevenson also became sickly, plagued with fevers and fits of coughing. Eventually, he contracted what was diagnosed as tuberculosis, and much of his adult life was a scramble to stay one step ahead of the disease. He spent much of his childhood, then, as an invalid; the attitudes and habits of mind

that he developed as a result meant that he was destined not to occupy the position that his family expected. He developed the eye and the attitude of the observer. He was destined to become, as it were, a perpetual tourist—a tourist of the imagination.

The day-to-day practical care of the child was given to his nanny, Allison Cunningham ("Cummy" to the family), a very pious Presbyterian who read to the invalid child for hours from the Bible and popular melodramatic literature of the day. Hers was a "blood and thunder" religion, and young Stevenson became conscious at an early age of martyrdom, sin, and judgment. He was a precocious child with a large and unexpectedly grave vocabulary and surprisingly adult concerns about religious matters.

He did not read until he was seven, but he loved to listen to stories told to him not only by Cummy but also by his father, who would invent and recite adventurous yarns to help his son get to sleep on bad nights. By the time he was six, young Stevenson was creating his own stories and sometimes dictating them to his nanny. That is how he came to do his first important piece of "writing." One of his uncles offered a cash prize to the cousin who could write the best history of Moses. Stevenson won the prize. His second important piece of writing, and his first published work, at age sixteen, was also commissioned by his family: When Stevenson was sixteen, his father, impressed by his son's knowledge of Scottish Presbyterian history, asked him to write a history of Scotland's eighteenth century religious, political, and military conflicts. The resulting pamphlet, "Pentland Rising," was paid for by his father.

His father's appreciation of Stevenson's writing ability did not, however, mean that the family expected Stevenson to become a professional writer. He was enrolled in the University of Edinburgh in 1867, when he was sixteen, with the full expectation that he would get an engineering degree and join the family firm. Stevenson was not a good student, however; he attended classes sporadically. He had developed bad study habits and a bad attitude toward academia from the constant interruptions to his schooling that his chronic illness had produced. What Stevenson did with his university time was to explore the streets and byways of Edinburgh, frequenting pubs, observing people, and taking notes in his by-then indispensable journal. He had become a tourist in his hometown—the mark of a writer.

In 1868, he met his first important mentor, Fleeming Jenkin, professor of engineering at the University of Edinburgh. Jenkin invited Stevenson to his home, which was a gathering place for artists, writers, and scholars. There, in an informal setting, Stevenson received the intellectual challenge and discipline that he had not received in the formal college classes that he had avoided. Another person important to him was Charles Baxter, a fellow student who became his lifelong friend and, eventually, literary agent.

When Stevenson finally told his father that he could not be an engineer and had to be a writer, his father made a countersuggestion: Go to law school. His father reasoned that a law degree would be a safety net if the writing did not succeed. Stevenson accepted this suggestion, pursued his studies with reasonable diligence, and was admitted to the bar in 1875. He never practiced law, however; during his law school years, he came to a parting of the ways with his father and met his second important mentor.

In January, 1873, Stevenson's father, a staunch Presbyterian, discovered that Stevenson not only had ceased to be a true-believing Presbyterian but also had lost his belief in Christianity. This discovery precipitated a debate and an estrangement that was not to be fully resolved until 1881, when the father became absorbed in the son's writing of *Treasure Island* (1881-1882, serial, 1883, book).

In the late summer of 1873, at the house of one of his cousins, Stevenson met Frances Sitwell, a thirty-two-year-old woman separated from her

husband, who became his confidant and idealized love object. That relationship, by all accounts, remained platonic, in spite of Stevenson's desires. He also met Sitwell's friend Sidney Colvin, professor of fine art at the University of Cambridge and an "insider" in the world of literary publishing. Colvin, the most important influence on Stevenson's career, became Stevenson's literary and publishing mentor. He guided Stevenson into making a small name for himself in the 1870's by helping him to get his travel and opinion pieces published in literary journals.

Three years after he had met Colvin, and one year after his relationship with Sitwell had cooled, Stevenson met his future wife, Fanny Osborne, an American separated from her husband and temporarily living in France. His attraction and eventual marriage to her either annoyed or outraged Stevenson's friends and family. His mentors and friends felt that he was on the verge of making his mark on literary England, and they did not feel that Osborne was a kindred spirit; they also felt that the emotional drain of caring for an instant family (Osborne had two children) would divert energy away from literary endeavors. His family was shocked by his developing a liaison with a woman who was not yet divorced.

Stevenson pursued the liaison, however, against all objections. After Osborne had been back in California for a year, Stevenson left Scotland to join her there. The trip was physically punishing, and he almost died upon arriving in Monterey, where Osborne was staying. He survived, however, and in 1880 married Osborne in San Francisco. He spent the next two months continuing to recuperate while living in an abandoned miner's cabin on Mount St. Helena, at the head of the Napa Valley.

His trip to California and his stay in the Napa Valley were watershed events; his writing matured, and he became more than a pleasant writer of travel and opinion pieces in literary journals. He became a serious observer of the duality of humankind, a serious explorer into the interior of the divided human heart. Monterey and St. Helena also provided the physical settings for *Treasure Island*, the book that established him.

Stevenson had left for California without the knowledge of his parents, indeed, without leaving them any means of contacting him. His father, however, hearing that he had fallen ill in Califor-

nia, had sent him money. His father, in fact, would support Stevenson and his family as long as the father lived. Stevenson's writing did not make enough money to support a family until the success of *The Strange Case of Dr. Jekyll and Mr. Hyde* (1886) in the United States earned for him a lucrative contract with Charles Scribner's Sons in 1887, the year of his father's death.

Between 1880 and 1887, Stevenson's life was a continual search for a climate and a location that would ease his pain. He was susceptible to cold, damp, physical exertion, or stress, any of which could cause him to collapse with a fever or with blood filling his mouth. From 1880 to 1884, he lived mainly in rented cottages and resorts in Scotland and on the European continent, but in 1884 his father purchased (as a present to Fanny) a home in Bournemouth, on the southern coast of England, where Stevenson and his family lived from 1884 to 1887. Even in a resort area like Bournemouth, however, Stevenson's life was still a running battle with sickness.

In spite of his physical trials, the period from 1880 to 1887 was extraordinarily productive; during that period, he wrote the principal works by which he is known today: *The Silverado Squatters: Sketches from a California Mountain* (1883), *Treasure Island*, *A Child's Garden of Verses* (1885), *The Strange Case of Dr. Jekyll and Mr. Hyde*, and *Kidnapped* (1886). That period also produced his most important friendship; he became friends with Henry James, the only person who fully understood him artistically.

When his father died in 1887, Stevenson used some of his inheritance to finance a sailing trip to the South Seas, still in search of a climate and location in which he could flourish physically. He finally found such a place in Samoa. It was the first place where he could engage in reasonably vigorous physical activity and not suffer days of immobilizing pain. The perpetual tourist had wandered to the ends of the earth, but he had found his home. He and his wife cleared the ground and built a home on the Samoan island of Upolu. In that home, he died of a stroke on December 3, 1894.

## ANALYSIS

Stevenson was a professional writer, in the broadest sense of that term. He was an essayist, a poet, and a writer of fiction (he even tried his hand at plays in collaboration with W. E. Henley, a British

poet and essayist). It is true that, until *The Strange Case of Dr. Jekyll and Mr. Hyde* took the United States by storm in 1887, he could not survive economically without his father's help. Yet his love of words and his delight in their use were strong enough that he had to write, and he would have written no matter what. Writing was not only his occupation, it was his calling. This attitude means that in Stevenson's work one encounters a variety of genres and styles. It also means that technique and "manner" will be foremost; his work will manifest a certain "finish" or "polish." In his nonfiction work, this polish means that his serious themes will be very easy to digest. In his fiction and poetry, it means that his serious themes will hardly be noticed. That is both Stevenson's bane and his salvation. He survives, but in the popular imagination, not in the critical pantheon. Consequently, his books are still in print because readers are still delighted and moved by them, not because readers feel the need to discuss and analyze his works as they would the works of his contemporary Henry James.

Stevenson was an inveterate tourist, even in his own country, so travel writing constitutes a significant part of his literary output. His first commercially published book, *An Inland Voyage* (1878), is an account of a Continental canoe trip with a friend in 1876. *Edinburgh: Picturesque Notes* (1878) and *Travels with a Donkey in the Cévennes* (1879), his next two books, were also travel documents. *The Silverado Squatters*, perhaps his best writing in this genre, is an account of his "honeymoon" in the summer of 1880 with his new bride and stepson, plus assorted visitors, in an abandoned miner's cabin. This book is deceptively simple, subtly humorous, and shrewdly perceptive.

Stevenson's first novel was *Treasure Island*, serialized in *Young Folks* magazine in the fall and winter of 1881-1882 and first published in book form in 1883. Evident in this novel are the techniques and themes that dominate Stevenson's fiction. The novel is narrated in the first person in a seemingly transparent, "artless" manner. A plain person is trying to record the facts of his experience as precisely and completely as he can:

Squire Trelawney, Dr. Livesey, and the rest of these gentlemen having asked me to write down the whole particulars about Treasure Island, from the

beginning to the end, keeping nothing back but the bearings of the island, and that only because there is still treasure not yet lifted, I take up my pen in the year of grace 17—, and go back to the time when my father kept the “Admiral Benbow” inn, and the brown old seaman, with the sabre cut, first took up his lodging under our roof.

A plain beginning, except that the startling phrases “there is still treasure not yet lifted” and “with the sabre cut” provide a brief flash of the vividly colored world into which the reader is about to be seduced. This deceptive straightforwardness is a key element in all of Stevenson’s fiction. His first-person protagonists, plain men that they are, also end up being “hangers-on” in their own stories; there is always a minor character who becomes the focus of the reader’s attention as this character becomes the focus of the narrator’s attention. Jim Hawkins, narrator of *Treasure Island*, is overwhelmed by Long John Silver, the cook on his voyage; David Balfour, narrator of *Kidnapped* and its sequel, *Catriona* (1893), is overwhelmed by Alan Breck, his guide through the highlands of Scotland. In *The Strange Case of Dr. Jekyll and Mr. Hyde*, Mr. Utterson, the matter-of-fact lawyer from whose point of view the third-person narrative is told, is overwhelmed by the title characters.

These minor characters assume great importance in their stories because they are vivid mixtures of appealing and repulsive qualities. They are fascinating characters because they combine great capacity for good with great capacity for evil. This dimension raises the issue of Stevenson’s dominant theme: moral ambiguity in human actions. Stevenson is a moralist, but a hard-headed moralist, not a writer of tracts. His novels provide an unflinching examination of the difficulty of either taking the right action or judging actions rightly. Alan Breck has blood on his hands, but he is a loyal and selfless friend to the narrator of *Kidnapped*. The attractive protagonist of the medieval romance *The Black Arrow* (1888) saves a minor character’s life but is nevertheless bitterly reproached by that character for having been put in the life-threatening situation in the first place. Right prevails in *The Black Arrow*, but only after much destruction has made such a triumph hollow. That is the type of world found in the novels that have largely been confined to the children’s literature

bookshelf. The deceptive straightforwardness and “plainness” of the telling, the vividness of the incidents, the fascinating complexity of the characters’ personalities—these divert all but the most careful readers from conscious consideration of the serious themes that dominate Stevenson’s fiction.

*A Child’s Garden of Verses* ranks with *Treasure Island* and *The Strange Case of Dr. Jekyll and Mr. Hyde* in long-lasting popularity. In Stevenson’s poetry, as in his prose, however, “transparency” masks subtlety. A contemporary critic, quoted in J. C. Furnas’s brilliant biography of Stevenson, *A Voyage to Windward* (1951), makes the point that *A Child’s Garden of Verses* is

not (as too easily supposed) a book of verse for children, but a book of verse about children. Children, of course, like many of the pieces, but essentially the poems are the disclosure of a child’s mind. . . . Never was there a set of playful verses about children more completely free from mawkishness. There is no attempt to make them songs of innocence.

In his verses, as in his fiction, then, Stevenson the serious artist uses popular genres (travel writing, the adventure story, the gothic horror tale, historical romance, light verse) to exercise his considerable writing skill and flesh out his moral and philosophical values. Stevenson’s advantage and disadvantage, then as now, is a skill so considerable that one revels in the telling and only with difficulty thinks about the values.

## TREASURE ISLAND

**First published:** 1881-1882 (serial); 1883 (book)

**Type of work:** Novel

*In eighteenth century England, a teenage boy entangled in a search for buried pirate treasure receives some complex lessons about trust and loyalty.*

*Treasure Island* was first a map that Stevenson drew for the amusement of his stepson. The map proved so interesting that he created a story to go along with it, reading installments of the story to

his family as he finished them. Stevenson's father, who happened to be visiting on the day of one of those readings, became so attracted to the story that he made plot suggestions, at least two of which were followed (the contents of Billy Bones's trunk and Jim Hawkins in the apple barrel).

The novel was published in serial form in a boys' magazine, *Young Folks*, and it follows the format of the standard boys' adventure novel: A boy is drawn into a fantastic, dangerous adventure, but through courage, integrity, and the help of a heroic mentor, he comes through the adventure unscathed, wiser, and more mature.

Stevenson, however, improvises on this theme. His hero, Jim Hawkins, gets hold of a map made by a famous pirate, Captain Flint, to show the location of a large treasure that Flint had buried. Hawkins enlists the aid of two adult friends to help him find the treasure. So far, Stevenson has established a plucky boy and possibly heroic mentors. The adults, however, have bad judgment in hiring crew for the voyage to Treasure Island, and there are dangerous conflicts among crew and passengers once the island is reached. Those conflicts are resolved partly by luck, partly by shrewdness, and partly by stupidity and superstition. The treasure is finally retrieved, but in a way no one had anticipated. The boy comes through the adventure unscathed, but the major villain is not brought to justice, and the boy's last words in the novel are

Oxen and wain-ropes would not bring me back again to that accursed island; and the worst dreams that ever I have are when I hear the surf booming about its coasts, or start upright in bed, with the sharp voice of Captain Flint [the parrot of the ship's cook] still ringing in my ears: "Pieces of eight! pieces of eight!"

The story does not end, then, with the voice of newly found wisdom. Though *Treasure Island* is a standard boys' adventure on first glance, on sec-

ond glance its themes and attitudes are more adult than juvenile.

*Treasure Island* was originally published as *The Sea Cook*, and the original title shows how big a part Long John Silver, the ship's cook, plays in the story. Jim Hawkins is the protagonist, but, as the original title suggests, Silver is perhaps the most important character in the story. He is certainly the most complex and the most fully realized character. In this, his first novel, Stevenson creates what may be his most memorable character in Long John Silver. The complexity of this character foreshadows Stevenson's techniques and concerns in most of his fiction.

## KIDNAPPED

**First published:** 1886

**Type of work:** Novel

*In eighteenth century Scotland, a teenage orphan who has been kidnapped escapes with the aid of a heroic fugitive, but he must survive a long chase through the Scottish highlands before he can avenge his kidnapping and gain his fortune.*

*Kidnapped*, like *Treasure Island* before it, was serialized in *Young Folks*, the boys' magazine. It is the most Scottish of Stevenson's novels in dialect, vocabulary, and worldview. Like *Treasure Island*, it follows the pattern of a popular genre, in this case the historical romance. Stevenson sets his story in 1751, five years after the defeat of a Scottish rebellion against the English-German King George II. King George has brutally "pacified" the Scottish Highlands, and Stevenson places his protagonist, David Balfour, in conversation with a principal agent of that pacification at the moment when that agent is assassinated (the assassination is a historical fact). Those who witness the assassination suspect Balfour of complicity, and he barely escapes with his life, fleeing for weeks across the Highlands in the company and under the protection of Alan Breck, the man who was historically (and in the novel) accused of the murder.

Under the cover of orthodoxy, however, Stevenson does heretical things with the genre. Morally ambiguous characters abound. Balfour's kidnap-

per, a ship's captain, is an excellent seaman and dotes on his mother. David's uncle is a thoroughly unlikable character, but he suffers more than any other character in the novel. Alan Breck is a deserter and a turncoat, but he is unshakably loyal to Balfour, even at the risk of his life.

Breck and Balfour, the two principal characters, are an odd couple whose developing friendship constitutes the main business of the novel. Their relationship is made vivid and believable by Stevenson's deft hand: Balfour is provincial and stodgy, Breck is worldly-wise and extravagant, but readers can believe that they are drawn to each other because Stevenson's incidents generate the passions in each of them that inevitably make them interdependent. This concern with the niceties of a relationship is another liberty that Stevenson took with this genre.

Once again, then, Stevenson makes of a popular genre something that is more than the sum of its parts. Boys had read *Kidnapped* with fascination in *Young Folks*, but adults read it later in book form with even more fascination. Indeed, Henry James, whom some suspect of never having been a boy, believed that *Kidnapped* was the best thing that Stevenson had done.

## THE STRANGE CASE OF DR. JEKYLL AND MR. HYDE

**First published:** 1886

**Type of work:** Novel

*A lawyer, curious and suspicious about a nefarious character's influence on his (the lawyer's) wealthy, respectable client, finally discovers the horrible truth about their relationship.*

One night, Stevenson's wife was disturbed by the movements and sounds of her sleeping husband;

he seemed to be having a nightmare. She woke him. He was indeed having a nightmare, but he complained, on being awakened, that he had not come to the end of what was proving to be a fascinating tale. That morning, he rapidly wrote down the story that he had dreamed, adding an ending. When he read the tale to his wife, she was dissatisfied; she thought that it was simply a "crawler" (standard gothic horror tale) and that he should develop the moral issues inherent in the tale. He argued with her vigorously but in the end accepted her view and burned the first draft. The tale still had a strong enough hold on him, however, that he composed the second draft (the version that was published) in only three days.

Released to the public, the tale captured the public imagination and has not let go to this day. *The Strange Case of Dr. Jekyll and Mr. Hyde* made Robert Louis Stevenson a household name, and it made Stevenson's fortune. In less than a year, "Jekyll and Hyde" was an English colloquialism. In 1887, when Stevenson went to the United States, it was his notoriety from *The Strange Case of Dr. Jekyll and Mr. Hyde* that induced Charles Scribner's Sons to offer him a lucrative contract. That contract gave him his first taste of financial independence.

The story that produced such wide-ranging effects begins very quietly with a sketch of the passive, observant, tolerant Mr. Utterson, Dr. Jekyll's lawyer, the man from whose point of view this third-person narrative is told. Utterson's tolerance is being strained a little by Jekyll's curious deference to a Mr. Hyde, a man to whom Utterson takes an instant dislike. Only gradually does the intensity of the narrative increase as Utterson becomes more curious and Hyde becomes more disreputable. The story comes to a climax as Utterson helps break down a door to get at Hyde. The lawyer moves, then, from tolerance to judgment, from observer to participant; if it were not for the title of the tale, one would call Utterson the protagonist.

Following this climax is a series of letters to Utterson by a friend of Jekyll, then to Utterson from Jekyll himself; these letters, in effect, tell the story twice more from two new perspectives. These retellings clarify all remaining plot mysteries but preserve as unexplained the central mystery of the human capacity for evil. That mystery, the mystery of moral ambiguity in human judgment and action, intrigued Stevenson throughout his career.

## SUMMARY

Robert Louis Stevenson's life is a study in contrasts, if not contradictions: His parents were wealthy, but he spent the first half of his adulthood one step ahead of genteel poverty. His ancestors for three generations were pillars of the community, but he was a perpetual tourist. His family was very religious, but he became an iconoclast and an agnostic. His family made its living building lighthouses; he was to make his building imaginary worlds. In these contradictions; he rivaled the best of his complex characters. His life was an attempt to contain, and, in a sense, to live up to his own complexity. In time, however, the craftsman, the iconoclast, and the moralist became reconciled and unified, and Stevenson was still growing as an artist and as a man on the day that he died. The deeply rooted family tree flowered in Stevenson's short life.

Isaac Johnson

## BIBLIOGRAPHY

### By the Author

#### LONG FICTION:

*Treasure Island*, 1881-1882 (serial), 1883 (book)  
*Prince Otto*, 1885  
*Kidnapped*, 1886  
*The Strange Case of Dr. Jekyll and Mr. Hyde*, 1886  
*The Black Arrow*, 1888  
*The Master of Ballantrae*, 1889  
*The Wrong Box*, 1889  
*The Wrecker*, 1892 (with Lloyd Osbourne)  
*Catriona*, 1893  
*The Ebb-Tide*, 1894 (with Osbourne)  
*Weir of Hermiston*, 1896 (unfinished)  
*St. Ives*, 1897 (completed by Arthur Quiller-Couch)

#### SHORT FICTION:

*The New Arabian Nights*, 1882  
*More New Arabian Nights*, 1885  
*The Merry Men, and Other Tales and Fables*, 1887  
*Island Nights' Entertainments*, 1893

#### POETRY:

*Moral Emblems*, 1882  
*A Child's Garden of Verses*, 1885  
*Underwoods*, 1887  
*Ballads*, 1890  
*Songs of Travel, and Other Verses*, 1896

## DISCUSSION TOPICS

- Examine Captain Silver and Alan Breck as instances of Robert Louis Stevenson's morally ambiguous characters.
- Compare Stevenson's *The Strange Case of Dr. Jekyll and Mr. Hyde* with other works by contemporaries, such as Henry James, Joseph Conrad, and Oscar Wilde, that treat divided personalities.
- Did Stevenson's aptness at telling exciting stories obscure other aspects of his artistry?
- In what respects is *Treasure Island* a novel for adults?
- Examine the evidence that *A Child's Garden of Verses* is about, not for, children.

DRAMA:

*Deacon Brodie*, pb. 1880 (with William Ernest Henley)  
*Admiral Guinea*, pb. 1884 (with Henley)  
*Beau Austin*, pb. 1884 (with Henley)  
*Macaire*, pb. 1885 (with Henley)  
*The Hanging Judge*, pb. 1887 (with Fanny Van de Grift Stevenson)

NONFICTION:

*Edinburgh: Picturesque Notes*, 1878  
*An Inland Voyage*, 1878  
*Travels with a Donkey in the Cévennes*, 1879

## TOM STOPPARD

**Born:** Zlín, Czechoslovakia (now in Czech Republic)  
July 3, 1937

*Stoppard is one of the most important and influential modern British dramatists, praised and imitated for his ability to capture the mood and spirit of the time using references and allusions to literature ranging from William Shakespeare to the present.*

### BIOGRAPHY

Tom Stoppard (STOP-ahrd) was born Tomas Straussler, the second son of Eugene and Martha Straussler, in Zlín, Czechoslovakia (now in Czech Republic), on July 3, 1937. His father was a Jewish physician who worked for the Bata Shoe Company. In 1939, to protect the family from internment when the Nazi invasion was imminent, the company transferred the Straussler family to Singapore. There the Straussler children attended a multinational American school until the Japanese invasion of 1942 sent them fleeing to Darjeeling, India. Stoppard's father, however, remained behind and was killed; his mother later married a British major, Kenneth Stoppard, whose name the Straussler children took. In 1946, the Stoppard family moved to England and settled in the Bristol area in 1950. Stoppard was educated at Dophin School, Nottinghamshire, and Pocklington School, Yorkshire, but did not continue on to a university. His knowledge of the theater and the dramatic arts is mainly self-taught.

Stoppard worked as a journalist for the *Western Daily Press* in Bristol for the next four years and then for the *Bristol Evening World* for two more years. He wrote feature articles, humor columns, and second-string drama criticism. This involvement with theater criticism led to a new career and is reflected in his rapier attacks on drama critics in

*The Real Inspector Hound* (pr., pb. 1968). He next became a freelance journalist and writer. As drama critic for the *London Scene* from 1962 to 1963, he reviewed well in excess of a hundred plays. He also began writing radio and television plays.

A 1964 Ford Foundation grant enabled him to stage his first play, *A Walk on the Water*, in Hamburg, Germany. He married Jose Ingle in 1965; they had two sons before their marriage dissolved in 1971. His first real success, *Rosencrantz and Guildenstern Are Dead* (pr. 1966, pb. 1967), began as a one-act comedy in verse titled *Rosencrantz and Guildenstern Meet King Lear*, the product of a Ford Foundation cultural picnic for promising young playwrights. It was first produced in its present form at the 1966 Edinburgh Festival and then was booked at the National Theatre in London in 1967. The London production, which was followed by a New York production that won several awards, launched his career as a major playwright.

In 1972, Stoppard married Miriam Moore-Robinson, a physician, television interviewer, and writer, and they had two sons. In the mid-1970's, he directed some London productions and began writing screenplays for Hollywood. His screenplay credits include *The Romantic Englishwoman* (1975), *Despair* (1978), *The Human Factor* (1979), *Brazil* (1985), *Billy Bathgate* (1991), *Shakespeare in Love* (1998), and *Enigma* (2001).

Stoppard has received numerous honors, among them the John Whiting Award (1967), the Prix Italia (1968), the Tony Award (1968, 1976, 1984, 2000), the New York Drama Critics Circle Award (1968, 1976, 1984), the Hamburg Shakespeare Prize (1979), the Outer Circle Award (1984), and

the Drama Desk Award (1984). He was a Theater Hall of Fame inductee in 1999. His screenplay for *Shakespeare in Love*, cowritten with Marc Norman, received an Academy Award, Golden Globe Award, and Writers Guild of America Award for the best original screenplay. In addition, he received honorary degrees from the University of Bristol, Brunel University (Uxbridge, England), the University of Sussex (Brighton), Leeds University, University of London, Kenyon College (Ohio), and York University. In 1978, he received the Commander, Order of the British Empire from the Royal Society of Literature; he was knighted in 1997 and received the Order of Merit in 2000.

### ANALYSIS

Stoppard is sometimes linked by critics with his near-contemporary Harold Pinter. Both playwrights share similarities of temperament and background, though the works they produce have little in common. Stoppard and Pinter both come from immigrant families (Stoppard is, in his own phrase, a “bounced Czech”); both reject, at least in their early work, the realistic and naturalistic styles of their predecessors; both began their careers in the aftermath of the “angry young man” period stimulated by John Osborne’s *Look Back in Anger* (pr. 1956, pb. 1957). Both Pinter and Stoppard came to playwriting almost accidentally from practical nonuniversity backgrounds, Pinter from acting and Stoppard from journalism and theater criticism. Since both men began as outsiders breaking into a clannish and traditional field of work, it is perhaps not surprising that they brought with them startlingly original points of view, perspectives from the outside that meshed smoothly with the revolution prompted by Osborne’s play. With *Look Back in Anger* came a new enthusiasm for realistic working-class drama, passionate works that confronted social problems and politics. It was the end of the polite drawing-room drama of the previous era. Yet Pinter and Stoppard changed not only content but also style and approach, the former with his “theater of menace,” the latter with his “high comedy of ideas.”

Perhaps as a result of its originality, Stoppard’s work has been difficult to classify. Most reviewers and commentators agree that he is a writer in love with language, a magician with verbal pyrotechnics who is unmatched in modern drama for the sheer

exuberance of his style. Even the most untrained observer at a live production recognizes this gift in Stoppard—the words and phrases are so rapid and plentiful that a single viewing is never adequate.

Beyond this linguistic agility, however, there is little agreement. Stoppard has been accused by reviewers such as John Simon and Stanley Kauffmann of being facile, shallow, and pretentious. *Jumpers* (pr., pb. 1972), his second major play, was particularly criticized for its author’s tendency to present philosophical debate on stage without integrating it into the stage action. His refusal to be serious even about figures such as Vladimir Ilich Lenin and James Joyce has been interpreted as a refusal to take his role as a writer seriously. The more academic critics of Stoppard, on the other hand, have praised his moral vision, his refusal to capitulate to relativism, and the very frivolity of his approach, which is sometimes compared to that of Oscar Wilde. His avoidance of trendy political and social subjects has sometimes been seen as integrity. Stoppard himself claims to show conflicting characters and statements on stage without taking a personal position; like many writers, he prefers to let his work speak for itself.

Whatever the ultimate judgment of Stoppard’s seriousness or lack thereof, there can be no question about the impact of his major plays and incidental work. He has stimulated a wide range of reaction in the theater, in academia, and in the perception of the general public. He is without question one of the most significant of modern English playwrights.

### ROSENCRANTZ AND GUILDENSTERN ARE DEAD

**First produced:** 1966 (first published, 1967)

**Type of work:** Play

*Rosencrantz and Guildenstern, minor characters in Shakespeare’s Hamlet, become the main characters in an absurdist drama about the interpretation and meaning of existence.*

The title *Rosencrantz and Guildenstern Are Dead* is a direct quotation from William Shakespeare’s *Hamlet, Prince of Denmark* (pr. c. 1600-1601; pb. 1603), a line delivered by the English ambassador

to Horatio at the close of the play. In Shakespeare's play it is but a minor detail, one of the many threads of the play brought to a close at the end of major events. In Stoppard's play it is of major significance, for it marks the death of the main characters. Stoppard's play depicts the "offstage lives" of Hamlet's boyhood friends, Rosencrantz and Guildenstern, and demonstrates how they might feel about being used as pawns who are ultimately executed with no understanding of the reason. As minor literary characters they of course have no lives apart from their roles in *Hamlet*, and this lack allows Stoppard to use them as ideal representatives of modern absurdist-existentialist protagonists—empty, "flat" characters who are uncertain of their identity and their purpose and who thus speculate endlessly about what they should do next. Their only moments of sharp definition come when the characters from *Hamlet* sweep on stage, and Rosencrantz and Guildenstern briefly speak the lines and act the parts created for them by Shakespeare.

Meanwhile Hamlet, Gertrude, Claudius, and the other members of the court go about the serious business of *Hamlet* offstage, and "Ros" and "Guil," as they are called in Stoppard's work, are left to their own trivial devices, such as flipping coins, arguing with the players who put on the play-within-the-play, and alternately disagreeing and making up. Their behavior raises questions about actors and acting and about the nature of reality: Are these characters more "real" when engaged in the fictive role Shakespeare created for two actors to play or when existing "on their own" outside the context of his play? Ros, Guil, and the "Players" discuss the importance of blood, love, and rhetoric in a play and the question of role-playing as reality. Ros and Guil are controlled by the action of Shakespeare's play; yet they remain under the illusion that they have choices to make and debate whether to go home or see how events transpire and whether to go to England with Hamlet. Inevitably, despite their fears and doubts and hesitations, they act as the moment demands, in accordance with the Shakespearean script.

This behavior by the main characters, many critics have pointed out, is heavily influenced by Samuel Beckett's *En attendant Godot* (pb. 1952, pr. 1953; *Waiting for Godot*, 1954). Beckett's play is also set in

a "place without visible character," as Stoppard describes it; features two somewhat pathetic figures waiting for some outside person to enter their lives and give them meaning; and explores issues of identity, fate, and probability. Stoppard clearly means for his audience to recognize and enjoy this parallel with *Waiting for Godot* and to allow the resonances of one work to inform the other. In *Waiting for Godot*, Gogo and Didi play word games to pass the time as they wait for Godot, who apparently will come and provide a purpose for their wait. In much the same way, Ros and Guil flip a coin endlessly as they wait for the characters of *Hamlet* to enter and give their lives purpose. Since Ros and Guil seem "modern," the audience is led to consider what has happened to drama and philosophy in the period from Shakespeare's time to their own. The confident, eloquent, and grand in *Hamlet* has become uncertain, banal, and trivial, with a concern not with heroes and kings but rather with trying to make sense of anything at all. Ros and Guil question whether anyone is watching them at all—even the fact of an audience is brought into doubt. Death is the only certainty. Because of its blend of absurdist humor, metaphysical inquiry, and literary allusion, the play's literary and dramatic precursors are often identified as T. S. Eliot and Luigi Pirandello, writers who define modernist concerns.

More than one critic has pointed out that *Rosencrantz and Guildenstern Are Dead* is a long play in which almost nothing happens: The only real "action" is in the brief interruptions by members of the main play and when Ros and Guil board a ship to travel to England and to their deaths. Yet the play seems full of incident, with much coming and going, much speculation about location and time, and many time-consuming activities, such as the flipping of coins. As the first of what Stoppard calls his "high comedies of ideas," this play, like *Hamlet*, raises questions about illusion and reality, about sanity and insanity, about what is relative and what is absolute. It has also been termed a highly intellectual comedy, yet rather surprisingly one that has enjoyed wide popular appeal in Great Britain, the United States, and beyond. As the work that made Stoppard's reputation, it continues to be the object of anthologies and critiques.

## JUMPERS

**First produced:** 1972 (first published, 1972)

**Type of work:** Play

*A retired music-hall singer married to a professor of moral philosophy is investigated for possibly shooting her husband's rival at an acrobatic exhibition.*

*Jumpers* hinges on the absurd but very amusing idea that the members of the faculty of philosophy at a major British university are also members of an amateur acrobatic team, the “jumpers” of the title. Sir Archibald, the vice chancellor, a “first-rate gymnast” himself, has packed his school with gymnastically talented thinkers, a combination admitted to be unique. Stoppard’s witty premise brings a dead metaphor to life through the “mental gymnastics” of Sir “Archie” and George, the professor of moral philosophy, as they argue and debate over philosophical principles and over Archie’s attentions to George’s wife Dotty, who is having an affair with her husband’s superior. George’s attention, however, is distracted by his need to prepare his side of a public debate with Duncan McFee, a rival philosopher who has enjoyed considerably more success than George. Dotty, whose state of mind seems to be just what her name implies, may have shot and killed McFee during an acrobatic exhibition in George and Dotty’s apartment. Inspector Bones, a detective, comes to investigate the murder, but he is so starstruck by Dotty, a retired music-hall singer, that he is easily distracted.

The comedy results in part from conversations based on incorrect assumptions (Inspector Bones thinks George knows of McFee’s murder, but George does not) and from farcical interplay, as when Inspector Bones arrives with flowers for Dotty and is met by George, whose face is smeared with shaving cream and has a bow and arrow in hand.

The confusion does not end with the main characters; there is also a secretary who stripteases on a trapeze, a live tortoise, a dead hare, and two astronauts fighting on the moon. Yet Stoppard is able to bring a fair measure of order out of this chaos, and by the end of the play the audience has begun to accept the logic, or illogic, of this household. Stoppard makes little effort at suspending the audience’s disbelief, however, for his main interest is in the long declamations by George, who continually tests the logic of his arguments for the existence of God and the absoluteness of good and evil by rehearsing them aloud. These declamations allow Stoppard to include a recitation of the logical paradoxes of the Greek philosopher Zeno, who “proved” that an arrow released from a bow can never reach its target because it must first reach a midpoint in its flight, and before that the halfway point to the first midpoint, and so on in an infinite series of midpoints that can never be crossed. The focus on philosophical and logical cruxes such as these and on an ongoing debate between relativistic ethics and philosophical absolutes makes the play intellectually challenging even as the lunatic plot amuses.

*Jumpers* enjoyed less success than *Rosencrantz and Guildenstern Are Dead*, with a number of reviewers complaining about the shallowness of the characters (little about Dotty is revealed, and the audience is not encouraged to care about George) and the superficiality of the plot (as in the earlier play, there are few “events” beyond what is described above). A just criticism is that the “jumpers” metaphor never really works. One reviewer notes that the practical problems of finding gymnasts who can act or actors who can jump led to a witty sideshow rather than to an integral element of the play, an integration of the sort that occurs with the *Hamlet* sections of *Rosencrantz and Guildenstern Are Dead*. Also, *Hamlet* brings with it its own credibility and seriousness, while George’s maunderings seem too often the self-indulgence of a tiresome old fool, which of course he is. Yet *Jumpers* also seems very much a play of its time, with its nudity, mocking of authority, and attempts to shock the audience with the outrageous. The late 1960’s and early 1970’s were a period of wild experimentation in the theater, and Stoppard’s effort seems in perfect accord with that sensibility.

## TRAVESTIES

**First produced:** 1974 (first published, 1975)

**Type of work:** Play

*Dadaist poet Tristan Tzara, James Joyce, and Vladimir Ilich Lenin become involved with one another and with the British consul in Zurich, Switzerland, in 1917.*

*Travesties* concerns a number of possible travesties (or burlesques), including one by the playwright. First is the artistic philosophy of Tzara, who, like his fellow practitioners of Dada, tries to reverse all the bourgeois notions of the proper role of art and literature; Tzara “composes” a poem by cutting out all the words from a Shakespearean sonnet, putting them in a hat, and pulling them out at random. Another candidate for travesty status is Joyce, who, his genius as a writer notwithstanding, seems to have behaved in a spiteful and money-grubbing way toward someone he might well have thanked. Lenin’s travesty could well be his fleeing his scholarly pursuits in Zurich to lead a revolution that would end with the deaths of millions under Joseph Stalin. Henry Carr, the British consul in Zurich, gets involved in an undignified squabble with Joyce over some theater tickets and a pair of pants, and the case goes to court. The most likely travesty, however, may be the play itself, with Stoppard poking fun at his story, told from the point of view of an aged and confused Carr, about these unlikely characters coming together in Zurich, a conservative and conventional town. This travesty, then, would be Stoppard’s burlesque version of events, his focus on the grotesque in a story that is essentially true in its basic details.

Tzara, Joyce, and Lenin were all, in fact, residing in Zurich at about the same time and must have used the Zurich public library. Stoppard discovered that Joyce, on the lookout for a profit, produced an English-language version of Oscar Wilde’s *The Importance of Being Earnest* (1895) and that Carr was persuaded to play the part of Algernon, with some success. Joyce and Carr had a dispute over some tickets that Carr had been given to sell and over Carr’s purchase of a pair of pants to wear as part of his costume. Joyce paid Carr only ten francs, “like a tip,” and the two found them-

selves in a Swiss court suing and countersuing, to the credit of neither. Tzara was moving in the same circles, while Lenin was using the library every day to research his book on imperialism and may well have been kept under surveillance by Carr. Stoppard interweaves these historical characters, with Tzara and Carr falling hilariously into the roles and language of *The Importance of Being Earnest*, as the poet pursues Gwendolen, here Joyce’s secretary, and Carr chases Cecily, now the Zurich librarian. Throughout, Lenin speaks lines Stoppard gleaned from his speeches and from various biographies and reminiscences about the Russian leader, lending a credible and serious tone to the manic romantic involvements of Carr and Joyce.

The situation allows Stoppard to compare and contrast three revolutionaries—in poetry, in the novel, and in politics—with the perhaps not surprising conclusion that there is little about which they can agree beyond the need for a revolt. Stoppard’s sympathies clearly lie with Joyce’s artistic practice, but he is careful to show Tzara and Lenin in sympathetic lights, allowing each to speak for himself and present his position. The related question of the proper role of art in society is explored directly or by implication in the varying philosophies of each character: Lenin’s utilitarian theory, which would later become socialist realism; Tzara’s goal of dumbfounding the bourgeois with perversity; and the complexities of Joyce’s self-referential psychology. Yet when the tone becomes too serious Stoppard regularly resorts to parody of *The Importance of Being Earnest*, deflating the high grandeur of his world-class revolutionaries. Art is for art’s sake and needs no utilitarian defense.

A final note on the staging may make Stoppard’s approach clearer. In the first production of *Travesties*, staged by the Royal Shakespeare Company at the Aldwych Theatre in London in 1974, Henry Carr, played by the immensely talented John Wood, was initially seated at an upright piano to one side of the stage. He represented the “old” Henry Carr, who was remembering his youth in Zurich and his odd associates in 1917, and the play that followed was his distorted reverie. Wood played the piano and sang musical comedy pieces, casting the entire evening as an eccentric entertainment by a possibly senile old man. To search for “truth” within such a framing device is clearly perilous, and Stoppard’s stage directions and other

comments indicate that this stagy burlesque of the seriousness that follows is entirely his intention. He “squats” happily, as one commentator noted, on the fence between the popular and the academic, intriguing both sides but belonging to neither.

## THE REAL THING

**First produced:** 1982 (first published, 1982)

**Type of work:** Play

*Henry, a middle-aged dramatist, leaves his wife and marries again, only to face his new wife's infidelity with a younger man.*

*The Real Thing* refers to true married love, a condition that Henry has to learn to preserve after divorcing his first wife. The play begins with a clever device, a scene between Max and Charlotte, who seem to be husband and wife. Charlotte has just returned from a business trip, and Max has discovered her infidelity. When he confronts her, she walks out on him. The reader then discovers that this scene is actually from a play, “House of Cards,” written by Henry, the main character of *The Real Thing*, who is in “real life” married to Charlotte. Henry is having an affair with Annie, Max’s real wife, so the situation of the play-within-the-play parallels that of the main play, although with a different cast of characters. When Henry leaves Charlotte and Annie leaves Max, Henry and Annie marry and are very much in love. The story jumps forward two years, when Annie is acting in a provincial theater in Glasgow and is tricked into having an affair; the play in which she is performing is John Ford’s *Tis Pity She’s a Whore* (1633). Henry, one of the “last romantics,” must avoid Max’s failure to keep his marriage intact but must also find some dignity and strength that will attract Annie, in spite of her guilt over committing adultery.

With this play Stoppard departs from his previous experiments in stagecraft and the avant-garde. There is no absurdist-existential empty stage, no acrobats swinging from chandeliers, no Dada poets, and no Russian revolutionaries. Instead, the audience sees the pain and suffering of a middle-aged man and his slightly younger second wife, characters who are mature, articulate, and highly

sensitive to nuance. Both, in spite of their intelligence and skill with language, have made terminal mistakes in their first marriages; both have found “the real thing” in their second marriage but are unsure of how to hold on to it. Annie’s affair is not dismissed cynically by Annie, Henry, or Stoppard as the price of a civilized lifestyle in London; this is not the clever smart-set comedy of Noël Coward. Annie has betrayed her husband, and she and Henry must come to terms with that dishonesty. Yet Stoppard also shows the adultery as a human event for which it is difficult simply to condemn Annie, who has been somewhat neglected by her husband and who intended no harm (she says her lover “came in under the radar”). Henry also recognizes that the harmless flirtation of everyday life, and especially of life in the theater, can lead to irreversible involvement with one small push; it is almost rude not to notice such flirtation, he says.

What is interesting about the emotional and psychological subtleties of *The Real Thing* is that they are so new to Stoppard’s canon. His earlier plays were criticized as superficial, as comedies of ideas without involvement. In this play he is still exploring the existential moment and the need to create meaning and coherence but is doing so in domestic circumstances, in the interstices of everyday lives that all readers can recognize. There may be an autobiographical element in *The Real Thing*, as commentators have noted, since Stoppard was divorced and remarried, but more significantly he exhibits intense human sympathy for the pain of his characters, a sympathy absent and usually impossible in the contexts of his earlier plays.

Yet Stoppard’s intellectual concerns continue in *The Real Thing*. The title, which perhaps should end in a question mark, summarizes the problem for all of the characters: How can one distinguish between the bogus and the true? The “House of Cards” play-within-the-play is not real, although it initially seems to be, just as Annie’s affair initially promises true love. A subplot raises the question of

what true political commitment involves (a question critics have asked about Stoppard) and of what defines true generosity and gratitude. There are repetitions and echoes of earlier scenes, with some acting as mirror images of each other. In spite of the apparent radical departure from his past style, *The Real Thing* remains pure Stoppard.

## THE COAST OF UTOPIA

**First produced:** 2002 (first published, 2002)

**Type of work:** Plays (includes *Voyage*, *Shipwreck*, and *Salvage*)

*The historical figure Alexander Herzen and his circle, exiled from Russia in the first half of the eighteenth century, try to provoke revolution in their homeland from afar in a trilogy depicting their disorderly, idealistic “voyage.”*

The title *The Coast of Utopia* derives from the key motivation of almost all of the characters in this dramatic trilogy—the search for a perfect society. Ironically, utopias, as nonexistent (the word literally means “no place”), can have no coast. Yet this truth is repeatedly denied as Stoppard’s huge cast of revolutionaries and fellow travelers (forty-four actors in seventy roles in the New York production) insist that a new secular Eden lies just beyond the horizon, virtually within sight. The main candidates for that paradise are Russia and, briefly, France. The characters’ travels, from Russia to France, Germany, Switzerland, England, and Italy, meld their personal voyages, their political quests, and the coastal metaphor contained in the title of each part of the trilogy: *Voyage*, *Shipwreck*, and *Salvage*. The political activists expect a triumphant return home after places of temporary exile, mere jumping off points.

Stoppard’s courage in taking on this massive project is noteworthy. Beyond simple cast size, there is no explicit contemporary relevance to the discussion, and much is firmly anchored in nineteenth-century political history, primarily the painful attempts to drag Russia into the modern world. The central characters may be unrecognizable by the nonspecialist, and the issues—the relative merits of Immanuel Kant and Friedrich Wilhelm Joseph von Schelling’s theories of reality—can be im-

penetrable even to the well-read. *The Coast of Utopia* is not art for art’s sake but is rather political theory for political theory’s sake, an uncompromising eight-hour-plus trek through the intellectual debates and issues of a long-past period. The politics, however, are always conjoined with the domestic lives of the radicals, who have difficult family politics, practicing a clumsy, awkward free love, complicated by a raft of small children running about the stage. Stoppard grounds his political debates in family life and personal relationships, showing how individual personalities shape the debate. The drama lies in the people professing the ideas, not just in the ideas themselves.

*Voyage* begins in 1833 on the estate of Alexander Bakunin, dramatizing the life of this wealthy landowner, his wife, and four daughters. It features his son, Michael, a willful, restless future radical prominent in the later plays; Alexander Herzen, a more restrained revolutionary and intellectual; Herzen’s childhood friend, Nicholas Ogarev; and their political circle, including the wonderfully drawn Vissarion Belinsky, an impoverished literary critic who insists, almost plausibly, that Russia has no literature. Author Ivan Turgenev appears in all three plays as a foil for the committed revolutionaries, creating art rather than trouble.

*Shipwreck* moves to Paris, Dresden, and Nice, following Herzen in particular as the other self-exiled Russians swirl around the Herzen family. The failure or “shipwreck” of the French Republic in 1848 is particularly shattering to the radicals, who nevertheless adopt new theories and models for the reform of Russia.

*Salvage* again features the Herzen household from 1853 to 1865, now in London and Geneva, with Herzen and Ogarev publishing *The Bell* in Russian and sending this muckraking newspaper to émigré groups and into Russia, even as they are superseded by harder-edged, uncompromising successors.

The American premiere of this trilogy, significantly revised by Stoppard, opened in New York City in 2006 to enthusiastic audiences and positive reviews, especially for its spectacle. Unlike earlier more intimate works, *The Coast of Utopia* is a grand mural, an opera of ideas, with all the virtues and drawbacks of a very large, ambitious work, one requiring an equally ambitious and expensive staging.

## SUMMARY

Tom Stoppard's major plays in many ways represent the times in which they were written. *Rosencrantz and Guildenstern Are Dead* is clearly in the style of Samuel Beckett's *Waiting for Godot*, a play out of the 1950's and the existential-absurdist tradition. *Jumpers* has the manic energy and outrageous non sequiturs of swinging London in the 1960's and early 1970's. *Travesties*, although written shortly after *Jumpers*, returns to a slightly more conventional format, while *The Real Thing* is on the surface a play from a much earlier time. *The Coast of Utopia*, in turn, reflects a twenty-first century attempt to reexamine the debates of the past in order to shed light on utopian yearnings. Yet first to last, these disparate works remain uniquely those of Stoppard, with his typical concerns for distinguishing illusion from reality, for finding one's way in a confusing and unforgiving world. Stoppard's work has the conservatism of comedy, keeping one foot firmly planted in the earthiness of the comic, as if in distrust of too many abstractions, too many high-flying ideas. Finally, each play is a linguistic tour de force, inventive, sometimes lyrical, and always hypnotizing.

Andrew Macdonald

## BIBLIOGRAPHY

### By the Author

#### DRAMA:

- A Walk on the Water*, pr. 1963 (televised; revised and televised as *The Preservation of George Riley*, pr. 1964; revised and staged as *Enter a Free Man*, pr., pb. 1968)

## DISCUSSION TOPICS

- What thematic concerns and stage techniques seem to run throughout Tom Stoppard's career, from his earlier works, such as *Rosencrantz and Guildenstern Are Dead*, to *The Coast of Utopia*? List and briefly describe several concerns and techniques.
- How has Stoppard's work evolved and changed? List characteristics that make *The Coast of Utopia* unique, even for Stoppard's canon.
- In what ways is Stoppard an outsider in British society, both because of his origins and because of the kinds of plays he has chosen to write?
- Stoppard's plays are both connected to real, historical events and written in a style that is at the opposite extreme from documentary and realistic depiction of characters and events. Explain how historical reality and staginess show up in his plays.
- Stoppard's approach might be called "the comedy of serious ideas." What are these ideas? How are they made comic?
- A signature feature of Stoppard's plays is their language, often evident in spectacular speeches meant to dazzle the audience by their rapid sequence of different ideas and their engaging sound. Choose a speech or two and explore how Stoppard tries to dazzle.
- Whether minimal or elaborate, the staging Stoppard describes for his plays is never conventional. Describe the staging that he specifies for one or two plays.
- What makes *Rosencrantz and Guildenstern Are Dead* such a fascinating commentary on William Shakespeare's *Hamlet* (pr. c. 1600-1601, pb. 1603)? How is it both familiar and strange, old-fashioned, and avant-garde?

*Tom Stoppard*

*The Fifteen-Minute Hamlet*, pr. 1976, pb. 1978  
*Every Good Boy Deserves Favour*, pr. 1977, pb. 1978 (music by André Previn)  
*Night and Day*, pr., pb. 1978  
*Dogg's Hamlet, Cahoot's Macbeth*, pr. 1979, pb. 1980  
*Undiscovered Country*, pr. 1979, pb. 1980 (adaptation of Arthur Schnitzler's play *Das weite Land*)  
*On the Razzle*, pr., pb. 1981 (adaptation of Johann Nestroy's play *Einen Jux will er sich machen*)  
*The Real Thing*, pr., pb. 1982  
*The Dog It Was That Died, and Other Plays*, pb. 1983  
*The Love for Three Oranges*, pr. 1983 (adaptation of Sergei Prokofiev's opera)  
*Rough Crossing*, pr. 1984, pb. 1985 (adaptation of Ferenc Molnár's play *Play at the Castle*)  
*Dalliance*, pr., pb. 1986 (adaptation of Schnitzler's play *Liebelein*)  
*Hapgood*, pr., pb. 1988  
*The Boundary*, pb. 1991 (with Clive Exton)  
*Arcadia*, pr., pb. 1993  
*The Real Inspector Hound, and Other Entertainments*, pb. 1993

## DAVID STOREY

**Born:** Wakefield, England  
July 13, 1933

*Storey is a painter, poet, playwright, and novelist, whose reputation is based chiefly on his plays and novels. His close association with the Royal Court Theatre during the late 1960's and 1970's led to productions of many of his best-known plays, while his career as a novelist has earned him many literary awards.*

### BIOGRAPHY

The third son of Frank Richmond and Lily Cartwright Storey, David Storey—professional rugby player, teacher, artist, novelist, poet, and dramatist—was born on July 13, 1933, in Wakefield, a cathedral town in the north of England, famous for the Wakefield cycle of medieval mystery plays. Storey's father, a self-educated miner, consistently encouraged his sons' education as a means of rising to the middle class. For the father, however, the middle class evidently did not include painters or writers. The generation gap between father and son, at least in 1963, posed "no hope of reconciliation." Among the most reclusive of his contemporaries, Storey has preferred to express the inevitable and painful alienation from his working-class roots in his writing rather than in interviews.

In the introduction to the first volume of his collected plays, he writes of an early experience in the theater. At the age of nine, he was taken by an elder brother to see William Shakespeare's *Hamlet, Prince of Denmark* (pr. c. 1600-1601, pb. 1603) at the Grand Theatre in Leeds. He recalls his irritation with the absurdity and pretense of the performance. What was missing in the production was drama, something he vividly experienced the next day. Having missed the last bus, he and his brother had to walk the twelve miles to Wakefield, arriving home at dawn. There was, in his words, much agitation, relief, and recrimination on the part of his parents, who had called the police to report their missing sons. That same drama of personal conflicts, with its attendant residue of guilt, remains the thematic hallmark not only of Storey's plays but also of his novels.

His education and early jobs reflect his own at-

tempts to free himself from restricting, centuries-old, working-class routines. He attended Queen Elizabeth Grammar School from 1951 to 1953, and although he was offered a geography scholarship at Reading University, he chose a fourteen-year contract with the Leeds Rugby Club, eventually playing out only four of the fourteen years. He used his first rugby earnings to enroll at the Wakefield School of Art and then at London's Slade School of Art. He commuted for three years between London and Leeds, winning prizes in painting at Slade.

In 1956, Storey married Barbara Rudd Hamilton, a London University graduate from Yorkshire, and they resided in London's Hampstead district. They had two sons and two daughters. To support himself and a family, Storey at various times worked as a postman, show tent constructor, farmworker, teacher in Islington (in north London), and fellow at University College, London. His plays draw strongly on those experiences, as in his play about a schoolteacher, *The Restoration of Arnold Middleton* (wr. 1959, pr. 1966, pb. 1967); another play about the construction and tearing down of a tent at a wedding reception, *The Contractor* (pr. 1969, pb. 1970); another about the activities in the dressing room at a rugby match, *The Changing Room* (pr. 1971, pb. 1972); *The Farm* (pr., pb. 1973); and a play about a school of art, *Life Class* (pr. 1974, pb. 1975). Of his various jobs, only his experience working as a postman has yet to find its way into a play.

During his early years of teaching, he wrote of wanting "to get something down in the shortest possible time that would convey my then feelings of frustration and despair." The despair was caused by having had seven novels rejected by publishers. In three days in 1959, Storey wrote a play, *To Die with*

*the Philistines*, which was similarly rejected by major London theaters but produced at the Traverse Theater in Edinburgh in 1966 under a “suitably revised title,” *The Restoration of Arnold Middleton*. It was then staged a year later at London’s epoch-making experimental theater, The Royal Court. From experiment to establishment, the play eventually found its way to a commercial West End theater, and Storey’s career as playwright was launched. An impressive succession of plays followed, most of them produced at The Royal Court during its heady experimental years. From 1972 to 1974, Storey served as associate artistic director at The Royal Court.

For his play *Home* (pr., pb. 1970), Storey won awards from the *Evening Standard* and the New York Drama Critics Circle. *The Contractor* won both the London Theater Critics Award for Best Play and the Writer of the Year Award from the Variety Club of Britain; *The Changing Room* received the New York Drama Critics Circle Award. Storey’s novels have also garnered prizes. *This Sporting Life* (1960) won the Macmillan Fiction Award, *Flight into Camden* (1960) earned the John Llewelyn Rhys Memorial Prize, *Radcliffe* (1963) won the Somerset Maugham Award, and *Saville* (1976) received the Man Booker Prize.

## ANALYSIS

Storey has said that he is best known in England for his novels and in the United States for his plays. He has spoken also of being dismissed in the theater as a novelist and in literary circles as a playwright. His own attitude toward his work is divided. He feels a sentimental attachment to the novel, but writing plays gives him a sense of control that is lacking in writing fiction.

Central to Storey’s writing is the sense of life as a process of integration, disintegration, and renewal. In his play *In Celebration* (pr., pb. 1969), for example, three brothers return home to celebrate their parents’ fortieth wedding anniversary. They confront their past and then disperse again to their respective lives. Other familial relationships are dramatized in his plays about a football team, a crew of workmen, an art class, or inmates at a mental institution. His novels also depict estrangement from family and friends as a process of changing circumstance.

Storey’s plays deal with changing times, when

the old is about to give way to the new. He is one of a number of dramatists of his generation whose roots are in the working class. In his close association with the Royal Court Theatre he joined in the spirit of the Angry Young Men, a term for such playwrights as John Osborne, Arnold Wesker, and John Arden. He shares with Harold Pinter a keen ear for the rhythms of everyday language and an equally keen eye for physical details that eventually translate into a play. The genesis of most of Pinter’s plays is a visual image of two people in a room, one standing and the other sitting. Similarly, Storey recalls having been struck by an image that remains at the end of *The Contractor*—a white metalwork table left on an otherwise empty stage. The table and two white metalwork chairs became the opening scene for his next play, *Home*.

Most of Storey’s novels deal in one way or another with characters from working-class families, depicted with a keen eye for the detail of local color and dialect. Generally, the novels are more thoroughly realistic than his plays, even if they sharply focus on a single character.

Within these broad thematic and stylistic concerns, specific themes, such as the work ethic—particularly the vibrant physicality of work or play—haunt his plays. In communal activity, where rules and rituals are shared, body and soul blend in an artistic entity. At times, the physical and spiritual are mutually hostile, as in Storey’s own experience on a rugby team among players who had difficulty accepting a painter in their midst.

Storey also contrasts the unity of old beliefs and their fragmentation in successive generations. In *In Celebration*, for example, the parents insist on an education for their sons, but their eldest son, in turn, questions the value of education for his own children. Much the same is true of the father-son relationship in the novel *Saville*. Not until the third or later generation does reconciliation seem possible, as demonstrated in his play *Early Days* (pr., pb. 1980). Until then, there are only painful choices to be made and guilt to be endured.

Storey attaches great value to family in both a literal and a figurative sense. The bond formed by family or by mutual endeavor matters deeply. For his characters, work provides a communal bond that may substitute when family ties are weakened or destroyed. This often occurs when the younger generation rises out of the working class. The

term “generation gap,” a fashionable sociological phrase of the 1960’s, is in Storey’s plays a deep emotional and spiritual conflict between youth and age, between the old and the new, between the spiritual and physical. It is, in metaphysical terms, a confrontation between birth and death, as in *Early Days*, a play about an aged, once-successful diplomat who confronts his own decline. In its largest sense, this play is about an incurable sense of loss at the passing of time. Similar issues arise in the novel *As It Happened* (2002), in which an emeritus professor assesses his future after a failed suicide attempt.

With plays as physical as *The Changing Room*, at one extreme, and as artily abstract as *Home*, at the other, Storey’s work has posed some classification problems for critics. No definition of his style is as effective as Storey’s own three-part categorization. Under the heading “poetic naturalism,” he has placed *The Contractor* and *The Changing Room*. *In Celebration* is a “very traditional literary play,” and his “overtly stylistic” plays include *Home*. These four plays are his best known. *In Celebration* is famous for its treatment of the family theme. *The Contractor* and *The Changing Room* are recognized for breaking new stylistic ground. *Home* is remembered for its Beckettian echoes made unforgettable by the acting of Sir John Gielgud and Sir Ralph Richardson.

Storey’s novels, on the other hand, tend to a more direct realistic style. They nevertheless share many of the same thematic concerns. Virtually all of them are vaguely autobiographical, dealing with how characters who rise out of the working class can destroy or badly skew family and personal relationships. The central characters in these stories live in a close, personal world set against a rapidly changing society. Their lives are fragmented and distorted by the forces of class, family, money, and career. The later novels often confront issues of growing old and assessing a life’s value, such as *A Serious Man* (1998), about a successful playwright, or *As It Happened*, about a retired professor.

## THIS SPORTING LIFE

**First published:** 1960

**Type of work:** Novel

*Rising out of the working class, a young man enters into a lucrative career as a professional rugby player but loses his emotional bearings in the process. He ends up isolated and trapped in a world that may soon have no further use for him.*

Storey began his career as a novelist during the 1950’s, writing several novels before finally seeing both *Flight into Camden* and *This Sporting Life* published in 1960. Arthur Machin, the central character of *This Sporting Life*, is a professional rugby player, as Storey himself had been. Rugby is his life. Inside it, he knows his place and takes some pride in what he can do, but outside it he cannot fully relate to anyone. He is aware that two powerful, moneyed men in the mill town that hosts the rugby team dictate the terms of his life. Mr. Weaver and Mr. Slomer, mutual enemies, make things difficult, since deference toward one may be taken as a slight by the other. Launching what could become a lucrative, if short-lived, career in the hard-hitting, brutal sport of rugby, Arthur becomes beholden to Mr. Weaver in several ways, including receiving money advances and automobiles from him.

Standing outside the rugby world is another significant character: Arthur’s landlady, the widow Mrs. Hammond. Arthur rents a room from her when he first joins the team. He helps her with chores and with her two young children, Lynde and Ian. Eventually he seduces her. They begin a regular sexual routine. Yet, he is never quite able to sort out his relationship with her. He stays as her boarder long after he could afford better lodging. He buys her trinkets, a television, a fur coat, and other valuables, making her feel like a kept woman. She gradually becomes bitter and then angry. She throws him out, but from that moment her own life begins to deteriorate. By the end he only relates to her by sitting at her side, holding her hand, as she lies in a coma on her deathbed.

Storey plays two time periods against each other to build the sense of a fragmented, uncontrolled, and alienated life. Events in the present, written in

the present tense, are juxtaposed against those from the past, written in the past tense, that meet with the present at the beginning of part 2. Moreover, the novel is written in first-person, giving an egocentric quality to the narrative. Arthur refers to Mrs. Hammond only as “Mrs. Hammond,” never using her first name, Val, until she is no longer in any condition to respond. He also is alienated from his father and mother because they both view Mrs. Hammond as a loose woman. As a final irony, Storey ends the novel with a long account of a rugby match played after Mrs. Hammond’s death, as if rugby is all that Arthur has left. Sadly, in a few more years he will not have even that.

## IN CELEBRATION

**First produced:** 1969 (first published, 1969)

**Type of work:** Play

*A family reunion turns into a painfully honest confrontation of three sons with one another and with their parents.*

The most recurring of Storey’s themes, family conflicts, is nowhere more forcefully rendered than in *In Celebration*, first produced at The Royal Court. For their parents’ fortieth wedding anniversary, Andrew, Steven, and Colin Shaw—lawyer, teacher, and labor arbitrator, respectively—return to a grimy mining village to take their parents to the best local hotel for a celebratory dinner.

The dinner at the town’s most posh hotel serves as an occasion in act 1 for the renewal of familial relationships. In act 2, the acrimonious purging of family secrets, which for many years had lain unspoken beneath the surfaces of small-town respectability, takes place.

All three sons are the beneficiaries of a university education. Andrew and Steven are married and have families, and Colin is about to marry. All three seem to have fulfilled their parents’ dreams for them. Steven and Andrew have taken on the responsibility of parenthood. Colin, to his parents’ satisfaction, announces his intention to marry, adding that he will do so only because it is “less embarrassing to be married than not to be.”

Yet with rituals established—education, jobs,

and family—something is amiss. Andrew, the eldest and most cynical of the sons, has given up law to become an artist. Steven has “packed in” the much-talked-about novel he is writing. Colin’s reluctance to marry, having an implication of homosexuality, foreshadows marital problems.

After the elder Shaws have retired and the sons have had a minor quibble about who sleeps where, their sleep is interrupted by Steven’s crying, the result of nightmares he has experienced since early childhood. The four men, safely out of the hearing of the mother, indulge in recriminations about the past.

Andrew has already recounted his mother’s farming him out to a neighbor for six weeks when Steven was born. Andrew had unsuccessfully pleaded to be admitted to her room. Now free to choose for himself for the first time in his life, he exchanges law for painting. He recalls laboring for “a home, a car, a wife . . . a child . . . a rug that didn’t have holes . . . I even married a Rector’s daughter.”

The deepest psychic wound involves the death of Jamie, the oldest brother, at the age of seven, when Andrew was nearly five and Colin nearly two. Mrs. Shaw, six months pregnant with Steven, attempted suicide because of an accumulated sense of guilt for Jamie’s death, ostensibly caused by pneumonia but, according to Andrew, actually caused by “galloping perfection” and beatings from his father. That perfection was marred from the beginning by the Shaws’ marriage, compelled by a pregnancy that greatly dismayed Mrs. Shaw’s family. According to Andrew, his mother was “raised up by a [pig] farmer to higher things than being laid—in a farm field—by a bloody collier.” The brothers eventually leave, Andrew to continue his painting, and Steven and Colin to confront their respective futures.

Some of Storey’s other plays also deal with the breakdown of traditional family relationships, including *The Restoration of Arnold Middleton*, *The Farm*, *Mother’s Day* (pr. 1976, pb. 1977), and *Sisters*

(pr. 1978, pb. 1980). The same theme also appears in several of his novels, including *Flight into Camden*, *Saville*, and *Thin-Ice Skater* (2004).

## THE CONTRACTOR AND THE CHANGING ROOM

**First produced:** *The Contractor*, 1969 (first published, 1970); *The Changing Room*, 1971 (first published, 1972)

**Type of work:** Plays

*The harmony and energy of a rugby team and a construction crew constitute other kinds of families.*

Companion pieces first produced at the Royal Court Theatre, these two plays are the most striking examples of Storey's plot technique of omitting the play's central event from the onstage action in favor of dramatizing the characters' inner states of being. The omitted events consist of a rugby match in one play and a wedding in the other. In *The Changing Room*, Storey substitutes locker-room action and conversation for the game; *The Contractor* substitutes the construction and dismantling of a wedding tent for the wedding ceremony.

The main feature of both plays is the physical activity that creates a bond among the participants and is seldom realized in situations outside of sports or the workplace. What makes the routines in work or play so vibrant and what sets these plays apart is the absence of conflict, except for the communally shared criticism of the outside world. For Storey, teamwork can reach heights that "like art, [can become] something transcending, both to the performer and observer."

The clock in the brutally rough game of rugby runs constantly, and time-outs occur only for disabling injuries. *The Changing Room's* locker-room rituals take place before a game, during a time-out, and at the end. All thirteen men on the team are at one point or another naked and participate in towel-slapping and joking with a flow of energy that is both sensory and rhythmic. Similar rhythms are experienced by the crew constructing a wedding tent for their boss's daughter's wedding in *The Contractor*. Although middle class, the owner of the

company and his family have moments in which they join in the spirit of the work. It is into this physical rhythm and flow of energy that the audience is drawn.

Ordinary lives and dialogue, consisting exclusively of nondramatic conversations that reflect the daily lives of most people, inform the plays. Within the plays' ordinary events the extraordinary is contained. Storey dramatizes life as it is lived. In the fragments of conversational exchanges, characters reveal the dramas of their inner lives. In both plays, Storey creates poetry from the naturalistic dialogue, much of it in local dialect and some of it in bursts of song.

## HOME

**First produced:** 1970 (first published, 1970)

**Type of work:** Play

*Two men and two women in a mental institution find dignity in a haunting and poetic recalling of their pasts.*

The idea for *Home*, first produced at the Royal Court Theatre, occurred to Storey when he was struck by the concluding image of *The Contractor*—a metalwork table on an otherwise bare stage. *Home* opens upon a bare metal table, with two occupied metal chairs, outdoors at a mental institution. That there are only two chairs poses problems of seating when two women join the two men.

The men are middle class. Harry, a heating engineer, and Jack, a distributor of foodstuffs in a wholesale store, exhibit sensitivity and some gentility as they recall fragmented bits of their pasts. Marjorie and Kathleen, on the other hand, are anything but likely companions for the two men. They are concerned with physical matters, particularly their ailments, and they indulge in the kind of gossip and quibbling that have characterized their lives. They bicker especially about chairs, which are continually being carried on and off the stage. For all four, the present is about making things as comfortable for one another as possible.

Within this framework, Storey draws the interior landscapes of his characters in the tradition of the so-called plotless play. Characters freely exchange

bits about their lives and their times in attempts to make sense of things. Christmas, for example, is not the season of good cheer it is supposed to be because “the moment money intrudes . . . all feeling goes straight out the window.” The men discreetly recall their sexual inclinations, the camaraderie of wartime, and the large families of the past. The diminishing of England itself is suggested in Jack’s fragmented references to “this little island.” Harry replies, “Shan’t see its like,” and “The sun has set.” In this personal and historical elegy something is gained: The human bond formed among the four characters has allowed them to give voice to a moving experience of commonality.

## SAVILLE

**First published:** 1976

**Type of work:** Novel

*Colin Saville is the son of a coal miner who rises out of the working class to become a teacher by his early twenties. In the process, his relationships with his family and others become strained.*

Saville is a rich and detailed chronicle, an ambitious undertaking that tracks the progress of Colin Saville, the eldest son of a coal miner, from the 1930’s through the 1950’s and over the span of more than five hundred pages. It is regarded as Storey’s most significant work, and it won the prestigious Man Booker Prize, Britain’s top literary award for fiction.

The Saville family lives in the coal-mining district of Yorkshire. Colin’s father, Harry Saville, leads a life of backbreaking work in the coal pits. Harry hopes for something more for his sons, Colin, Steven, and Richard, but especially for Colin, whose education is a matter of priority. Harry is good-natured but also ignorant and slow-witted. The mother is somewhat depressed and lethargic, and the brothers are distant and unmotivated. Ironically, Colin’s success pulling himself out of the coal-mining life and into a career as a teacher and poet creates resentment and bitterness in the family he leaves behind.

The story is realistic and objective, written in third-person voice. Despite that, the perception

borders on first person, as every episode puts Colin at the center and all other characters are defined in terms of his relation to them—his father, his mother, or his brothers, for example. Nothing in the narrative is outside his direct experience. However, there is an important exception, for the novel begins some years before Colin’s birth. The first chapter and most of the second chapter deal with the birth and early life of Andrew, the son who died six months before Colin was born.

The exception is deliberate, for Storey creates a kind of ghostly presence hovering over Colin, who was expected to be the worthy replacement for Andrew. A much later scene has Colin visiting the cemetery where Andrew is buried and exorcizing his brother’s ghost to liberate himself so he can pursue his own life.

The life of the Savilles in Saxton, Yorkshire, is a microcosm set against the larger world of the Great Depression, World War II, the gradual breakdown of the British class system, and the fall of the British Empire. These forces contribute to Colin’s opportunity to shape a new life beyond the coal pits, but they also drive a wedge between Colin and his family. It is not that the family is cruel, loveless, or untrusting. Colin feels a strong bond and a sense of responsibility for his family. Similarly he develops strong friendships with others in his neighborhood. However, his abilities and his determination take him to new experiences far outside the realm of friends and family.

There are those who would like to pull Colin back and others who unwittingly hamper his ambitions. Among the former are the masters in his school, who like to abuse him verbally and hold him in check, as if they would prefer that he fail to realize his talents. Among the latter are Stafford, a friend and the son of one of the mine owners, whose social status ultimately alienates him from Colin. Colin’s love for Margaret, the daughter of a well-to-do physician, is similarly thwarted by the strictures of society. It is as though he becomes classless and belongs nowhere in that strange, unstable world of post-World War II England. Indeed, Elizabeth, a middle-aged woman who becomes a sort of substitute mother, tells him, “You don’t really belong to anything. . . . You’re not really a teacher. You’re not really anything. You don’t belong to any class, since you live with one class, respond like another, and feel attachment to none.”

In Colin's farewell meeting with Margaret, who stays in Saxton while he moves to London, she says that changing the scenery does not change who one is, and she describes Colin "of belonging nowhere; of belonging to no one; of knowing that nowhere you stay is very real."

### SUMMARY

David Storey's metaphor for life is the family. Much of his work consists of imaginative recreations of his own family. He was himself one of three sons of a Yorkshire coal miner, and many of the families he has depicted in his novels and plays, including *In Celebration*, *Saville*, *A Prodigal Child* (1982), *Present Times* (1984), *Stages* (pr., pb. 1992), and *A Serious Man*, fit a similar description. He often uses the same names, such as Andrew, Colin and Steven, for more than one of his characters.

Even when a family is not literally at the center of the story, the idea of family emerges in relationships formed for a particular occasion, such as a rugby match, a construction job, or recovery from mental illness. In these variations of the family unit, bitter conflicts are absent for the brief time that a communal spirit takes over; rules and rituals make harmony possible. Such harmony may be denied: The Shaw family in *In Celebration*, for example, does not achieve it, and it evaporates toward the end of *Saville*.

In opting for the story whose main event is not dramatized, Storey has made a distinctive, immediately recognizable contribution to modern English drama. He has also created compelling novels out of the material of memory and vivid imagination.

## DISCUSSION TOPICS

- In what ways did Great Britain undergo radical social changes in the years following World War II? How are these changes reflected in the plays and novels of David Storey?
- Compare the way family is depicted in *Saville* and in *In Celebration*.
- The game of professional rugby figures prominently in at least two of Storey's works, *This Sporting Life* and *The Changing Room*. How does Storey use the game as a way of creating a contrast with the larger world?
- Compare and contrast Storey's plays and his novels. Does writing for the stage require a different approach than writing prose fiction?
- Why do Colin in *Saville* and Arthur in *This Sporting Life* fail to create enduring or meaningful relationships with the women they love?

## AUGUST STRINDBERG

**Born:** Stockholm, Sweden

January 22, 1849

**Died:** Stockholm, Sweden

May 14, 1912

*Strindberg was one of the leading figures in modern drama. He pioneered the drama of psychological realism and created a form of expressionistic drama that gave dramatic structure to subjective reality.*

### BIOGRAPHY

Johan August Strindberg was born in Stockholm, Sweden, on January 22, 1849, the son of Carl Oscar Strindberg, a steamship agent with an aristocratic background, and Ulrika Eleonora Norling, a domestic servant. When Strindberg was four years old, his father went bankrupt, and the family, constantly on the move, lived under impoverished conditions in which food was scarce. His relationship with his parents was an ambivalent one. Though he admired his father's aristocratic ties, Strindberg frequently saw his father as a hostile force. Though he felt that his mother was violent and unreasonable, he came to see maternity as something sacred. A sensitive and anxious man, Strindberg returned to his youthful experiences for material for his works. Hunger, both physical and spiritual, became a recurrent motif in his later works. Bankruptcy came to represent not only the economic condition of his characters but also their existential condition. The class difference between his parents absorbed him in a constant analysis of class warfare; his ambivalent relationship with his mother carried over into his marriages; and the search for the mother figure became an obsessive theme running throughout all of his work.

When Strindberg was thirteen, his mother died, and his father remarried. Influenced by his mother's evangelical Pietism, Strindberg developed a

scrupulous devotion to religion that eventually became transformed into a fervent skepticism. Religion, skepticism, and the quest for God would remain as focal issues in Strindberg's life and works.

In 1867, the eighteen-year-old Strindberg pursued the study of modern languages at the University of Uppsala, where he found the academic atmosphere stifling. He later became a tutor in the house of Dr. Lamm, who encouraged him to pursue medicine, but Strindberg failed his chemistry examination, left the university, and tried unsuccessfully to become an actor. Acting led him to playwriting, and after writing his verse drama *Hermione* (pb. 1871), he returned to the university to engage in literary studies.

Strindberg launched his career as a dramatist when *I Rom* (pr., pb. 1870) was produced by the Royal Dramatic Theatre. Subsequently, Strindberg received a stipend from the king. After he left the university, he became a journalist and continued to write plays. His *Mäster Olof* (pb. 1878, pr. 1890; *Master Olof*, 1915), a historical prose drama, moved beyond the stilted form of the patriotic chronicle play. He also fell in love with Siri von Essen, a Finnish aristocrat, married to Baron Carl Gustav Wrangel. When she divorced Wrangel in 1877, Strindberg entered his first marriage. In various dramatic forms, Strindberg used the relationship between a lower-class man and an aristocratic woman while the menacing figure of the baron became a haunting presence in his early and later works.

Strindberg became a controversial writer. *Giftas I* (1884; *Married*, 1913), a collection of short stories,

brought him to court on a charge of blasphemy because of sarcastic remarks about the Eucharist. Though he was acquitted, the trial put pressure on his already unstable marriage to Siri, whose acting career was constantly being interrupted. During this period, Strindberg became obsessed with the idea that a league of women was conspiring against him, he thought that his wife was trying to have him committed, and he doubted whether he was the father of his own child. Many of his delusions were fictionalized in *Le Plaidoyer d'un fou* (1893 in German; 1895 in Swedish; *A Madman's Defense*, 1912), an autobiographical novel, and reappeared in his major naturalistic works: *Fadren* (pr., pb. 1887; *The Father*, 1899), *Fröken Julie* (pb. 1888, pr. 1889; *Miss Julie*, 1912), and *Fordringsägare* (pb. 1888 in Danish; pr. 1889; pb. 1890 in Swedish; *Creditors*, 1910). Having corresponded with philosopher Friedrich Nietzsche and author Émile Zola, Strindberg began to embrace naturalism, started an experimental theater in Copenhagen in 1889, and began to acquire an international reputation.

After his divorce from Siri, Strindberg moved to Germany and joined a bohemian artists' colony. Later he met and married journalist Frieda Uhl. Again Strindberg's paranoia led to the dissolving of this marriage in 1894. That same year he went to Paris, where he experienced a psychotic breakdown known as his "Inferno" crisis. Feeling himself to be the victim of mysterious powers, he believed it necessary to read symbols and portents in everyday occurrences. After his bout with psychosis, Strindberg questioned the nature of objective truth and saw the world in terms of symbols and signs. He brought these perceptions into play in his drama *Till Damaskus, första delen* (pb. 1898, pr. 1900; *To Damascus I*, 1913).

In 1901, he married actor Harriet Bosse, another career woman. Despite his feelings toward her, Strindberg's jealousy and his other delusions led to their divorce in 1904. During his last years Strindberg continued to experiment with dramatic form, collaborated with August Falck in founding the Intimate Theatre, wrote and produced a series of chamber plays, and settled in Falck's residence, called The Blue Tower. Retired and suffering from stomach cancer, Strindberg continued to be honored by torchlight parades and gala performances. The man who did battle with God and the Devil was said to have held the Bible to his chest, saying, "All

is atoned for." His role as rebel, victim, and pilgrim was played out in his life as well as in his works. He died in Stockholm on May 14, 1912.

## ANALYSIS

Strindberg was a prolific writer. He wrote plays, short stories, novels, poems, autobiographies, literary criticism, histories, works on folklore, political tracts, studies on Chinese language and culture, treatises on chemistry, and reams of letters and journals. He is best known, however, for his work as a dramatist. His dramatic canon has an incredible range. He wrote compact one-act dramas focusing on intense conflicts between several characters as well as massive epics covering vast territories and significant lapses in time. He wrote sardonic comedies, historical dramas, fantasies based on fairy tales, family dramas portraying volatile conflicts between husbands and wives, pilgrimage plays that follow one character's odyssey through life, and symbolic dramas with ghostlike characters. Most of Strindberg's dramas are intensely autobiographical works in which characters caught in the grip of powerful forces engage in the psychological torment of themselves and others.

One recurring theme in Strindberg's dramas is the theme of sexual warfare. Since primitive times, male fantasy has projected the dual image of woman as either good mother or evil seductress, an image that Strindberg adopted. The maternal ideal for Strindberg is seen in a caring and nurturing woman, but this ideal is perverted by the Strindbergian woman's quest for power and dominance. His women are subtle destroyers of men, driving them to insanity or killing them slowly through various means of psychological torment. Even children are used as pawns in a deadly battle to the death. Laura in *The Father* drives the Captain insane and robs him of his paternal power. Julie is both repulsed by and attracted to men and always tries to exert her dominance over them. The mother in *Pelikanen* (pr., pb., 1907; *The Pelican*, 1962) takes on a lover and drives the father to his death with her infidelity.

The male hero in Strindberg's plays is a prototype of the alienated heroes of modern drama. Caught in a world of perpetual doubt and suspicion, he finds himself a victim in a cruel world. He often experiences a paralysis of the will and is controlled by overpowering forces that consciously or

unconsciously manipulate his life. In his quest for an ideal, he finds himself thwarted at every turn by the complexities of the world order. He may search hopelessly for a mother figure, as do the Captain in *The Father* and the Unknown in *To Damascus I*. He may try to break the bond of a stratified social order, as Jean does in *Miss Julie*, or he may seek for an ideal love that transcends the world of social stigmas and existential guilt. Yet no matter how hard he seeks to find a way out of his entrapment, he is left defeated and completely incapacitated.

Many critics consider Strindberg as a subjective dramatist more concerned with his own personal struggles than with social issues. Yet Strindberg is interested in class warfare. In *Miss Julie* and *Spöksonaten* (pb. 1907, pr. 1908; *The Ghost Sonata*, 1916), he shows how flimsy is the base of aristocratic power. A miller prostitutes his wife to purchase a title from the king. Thus originates the aristocratic bloodline of *Miss Julie*. In *The Ghost Sonata*, the Colonel is a fake aristocrat who has gained his military title from an honorary position in the American volunteer service. The power structure is always questioned in Strindberg. The new monied aristocracy, of which Jean is now a part, is as shallow as the old aristocracy. Jean is like Hummel, the capitalist entrepreneur in *The Ghost Sonata* who turns out to be a vampire destroying human lives.

Strindberg also stands at the forefront of modern drama when he focuses on the theme of doubt and uncertainty in a world where truth is impossible to discern. The world of Strindberg's drama is wrapped in lies and deceptions. Fathers do not know that their children are their own. Aristocracy and birthrights are called into question. Two false witnesses determine the truth in a court of law. People are never what they seem to be, and those who try to acknowledge the truth are declared insane. Strindberg also focused on two themes that would become predominant in modern drama: the notion that reality depends on one's subjective perception and the idea that life is built on a series of illusions.

Strindberg's major drama can be classified into three major periods: his naturalistic period, his expressionistic period, and the period of his chamber plays. Discontented with the popular moralistic melodramas of his time, Strindberg created naturalistic dramas that probe the psyches of modern individuals. The motivations of his characters are

complex, multiple, and usually concealed. Driven by psychological and sociological influences, his characters maintain a thin grasp on their identity and possess a fragmented sense of self. The conflict in his naturalistic dramas focuses on a few individuals battling for psychological domination. External action gives way to internal struggles in which one person subtly drives the other to his or her death in a form of psychological murder. The battle is most often played out in sexual warfare in which the woman, the weaker sex, drains the words and ideas from others and often destroys an intellectually superior male. These dramas have few characters, one setting, a short time span, and a singular thread of action. Strindberg also called for realistic acting, a functional set with real props, subtle makeup, stage lighting, and the elimination of the intermission.

After his Inferno crisis, Strindberg moved away from naturalism to expressionism and was again at the vanguard of creating new dramatic forms. His dream plays of this period are intensely personal journeys through the mind of a central consciousness. Character in these plays becomes even more unstable and fragmented. Just as in a dream, characters, reduced to types, split, multiply, and transform themselves so that one character may be seen in many guises. Time and place change at random as one scene fades into another. The structure is episodic, and similar actions recur in different forms. Dialogue varies between the cryptic and the poetic. Objects and people take on symbolic significance. In his expressionistic dream plays, Strindberg recast the medieval drama of sin and reconciliation into a modern psychodrama in which reality becomes a matter of subjective perception.

Late in his career, Strindberg experimented with a more intimate form of drama that he called chamber plays because of their resemblance to chamber music. In these plays, Strindberg returned to the short play with a small ensemble of characters. The form of the chamber play is tighter and more compressed than the expressionistic dream play. The plays are based on thematic movements rather than linear plots. They display a series of images juxtaposed and intertwined like the themes in a sonata. The plays focus on a world of discord, sin, guilt, retribution, and reconciliation. Their mood is somber and elegiac. Combining realistic scenes with grotesque symbolic images, they

envelop the audience in a muted spectacle of sight and sound that borders on the surrealistic. They pave the way toward modern absurdist drama. Strindberg was a relentless experimenter who opened up new vistas for modern drama and influenced many of the great dramatists of the twentieth century.

## THE FATHER

**First produced:** *Fadren*, 1887 (first published, 1887; English translation, 1899)

**Type of work:** Play

*Fighting for control of her child, a wife drives her husband to insanity and death by making him doubt that he is the child's father.*

*The Father* is often seen as a tragedy in which larger-than-life characters engage in a life-or-death struggle centered on a family conflict. Like a Greek tragedy, *The Father* has a tight plot structure, a narrow time frame of twenty-four hours, one locale, and a hint of the fatalistic forces at work behind the scenes. It has often been compared to the story of Agamemnon, who was trapped and killed by his wife Clytemnestra because he had sacrificed their daughter. *The Father* is also similar to Euripides' *Bakchai* (405 B.C.E.; *The Bacchae*, 1781). In *The Bacchae*, Pentheus rejects the god Dionysus and his women worshipers the Maenads, only to be torn to pieces by them. In *The Father*, the Captain rejects feminine forces, both spiritual and physical. Thus, a household of women turns against him and figuratively tears him to pieces. An evil or fatalistic force seems to haunt the house. The Captain senses the web of fate that is being spun around him. His daughter, Bertha, hears maternal ghosts in the attic mourning over a cradle. Bertha's grandmother, who is antagonistic to her father, warns her that spirits who are ignored seek vengeance.

*The Father* not only examines the battle of the sexes but questions the patriarchy, the male power structure, by casting doubts on paternity or fatherhood. The Captain wishes to assert his rights as father and husband. He tells his wife that when she married she bartered her rights in exchange for his financial support of her. Marriage, according to

the societal order, is an exchange in which the woman agrees to be mastered in order to be supported. Thus, masculine law gives the father the sole right to determine the education of his child. Old Margaret, the Captain's former nursemaid, argues that a mother has only her child, whereas the father has other pursuits. The Captain, however, insists that his burden is greater than his wife's because he is responsible for the whole family.

The Captain, a military man who surrounds himself with symbols of masculine power (military tunics, rifles, game bags), represents the power of the patriarchy. However, the play questions the certainty of fatherhood itself. In the very first scene, the Captain tries to get one of his cavalry soldiers to accept the responsibility for impregnating one of the kitchen maids. Nojd admits to having slept with her but implies that there have been others, so that it is impossible to determine who is the father of the child. Nojd feels that it would be drudgery to support another man's child. His wife, Laura, picks up this issue and notes that if fatherhood cannot be determined, how can the father have rights over the child? She says that she can prove that Bertha is not his child. The Captain, who has always held to his patriarchal privilege of passing on his soul to his child and obtaining immortality through his progeny, feels his power slipping away. The play begins to cast doubt on paternity. Johansson was forced to become the father of Old Margaret's illegitimate child when he could not be certain that he was the father. The Captain implies that the wives of both the Pastor and the Doctor were unfaithful, thus questioning their paternity. Fatherhood is called into question, and with it, masculine power. Laura turns masculine law against the Captain by having him declared certifiably insane, thereby divesting him of his power. Since he claimed mastery as provider, she will now discard him and use his provisions.

If fatherhood is being questioned, motherhood is being elevated. The Captain, rejected by his mother, makes his wife his "second mother" and surrenders his will to her like a child. He keeps his old nursemaid with him and she treats him as her "big boy." In the end, the nurse slips a straitjacket over him, pretending that she is dressing a little boy. As he is dying, he longs to lie on a mother's breast. He puts his head down on the nurse's lap, comparing her to the Virgin Mary, thus ironically

replicating the Pietà, the body of Christ in Mary's arms. The play ends with Bertha coming to Laura in the semblance of an ironic Madonna. Behind the personal tragedy, *The Father* encompasses a powerful social drama.

## MISS JULIE

**First produced:** *Fröken Julie*, 1889 (first published, 1888; English translation, 1912)

**Type of work:** Play

*An aristocratic woman sleeps with her servant and commits suicide rather than face dishonor.*

*Miss Julie* is not simply the tragedy of an aristocratic woman with a self-destructive personality and an ambivalent feeling toward men. It is also more than a naturalistic study about a victimized woman torn apart by family strife. *Miss Julie*, a drama of paradoxes and reversals, is about the breakdown of the social order. The play begins on the celebration of Midsummer's Eve, a carnival-like festival allowing for the breakdown of social and sexual distinctions. Miss Julie, the lady of the house, would rather dance with the peasants than visit relatives with her father. Jean, her servant, is more concerned than the reckless Julie about propriety. In keeping with Midsummer's Eve, Julie wants all rank laid aside and asks Jean to take off his servant's livery. Julie and Jean then reverse roles. He drinks wine, she prefers beer; he is concerned about his reputation, she is negligent and foolhardy; he dreams of climbing, she dreams of falling.

In *Miss Julie*, aristocracy itself is a paradox. Jean

fights to become a new aristocrat, but the aristocracy to which he aspires is a sham. Young ladies use foul language, their polished nails are dirty underneath, and their perfumed handkerchiefs are soiled. Miss Julie's family title was obtained when a miller let his wife sleep with the king. Thus, the aristocratic title was earned through sexual corruption. Jean's fiancé, Christine, who is not above thievery and fornication, cannot live in a house where the mistress sleeps with a servant. Jean, who realizes the hypocrisy behind aristocracy, is not beyond buying himself a bogus royal title. He cannot have Julie's noble blood (which was gained by corrupt means), yet he can make their children nobility (by purchasing a less-than-reputable title). In *Miss Julie*, the authenticity of aristocracy is questioned.

In the midst of midsummer madness, not only are class barriers falling but gender distinctions are also becoming confused. Miss Julie's father married a common woman; yet this common woman was given control of his estate. Another reversal of roles has occurred: The commoner ruled over the aristocrat. Julie's mother also reversed gender roles and reared Julie to ride and hunt and to wear men's clothes. Furthermore, she turned the whole estate into a carnival world in which the men did the women's work and the women did the men's work. When the father reexerted his control and restored order, she burned down the estate. He was then forced to borrow her money to rebuild, thus reversing the power structure again. The same ambiguous relationship between commoner and aristocrat is played out between Jean and Julie. Julie, the woman, makes her fiancé's jump over whips like trained animals and delights in having Jean kiss her shoe. She becomes the seducer while he becomes nervous about his reputation. In his bedroom, she is the one who becomes sexually aggressive while he is the one who is shocked.

Banned by the censors, *Miss Julie* was produced at a private performance in Copenhagen in 1899, was later proclaimed a revolutionary naturalistic drama, and is now one of Strindberg's most anthologized plays.

## A DREAM PLAY

**First produced:** *Ett drömspel*, 1907 (first published, 1902; English translation, 1912)

**Type of work:** Play

*The daughter of the Hindu god Indra comes down to earth to discover that humanity is miserable and pitiable.*

*A Dream Play* is an expressionistic drama built on a montage of scenes following the journey of a central character. The Daughter of Indra is a goddess who comes down to earth in the form of a beautiful woman to find out why humanity is so discontent. Like Christ, she experiences the pain of being human. At first, she is hopeful that love will conquer all, but after she listens to the anguished cries of humanity, experiences the pain of family life, and discovers that reform will always be stifled by the self-righteous, she can only look upon humanity with compassion. She finally realizes that human beings are creatures who hopelessly harbor spiritual aspirations but are held down by the weight of their fleshly existence. When she ascends back into the heavens, she throws her shoes into the fire of purification as she leaves a world of never-ending conflicts and contradictions.

The play is built around the disappointments and dreams of three men: an officer, an attorney, and a poet. The officer is a high-ranking military officer and teacher. As the action of the play progresses, he changes from a youthful, effervescent, well-groomed soldier to an aging, weary, unkempt derelict as he hopelessly spends a lifetime waiting for his dream lover, the opera singer Victoria. Restless and self-pitying, he is constantly irritated by the injustice and repetitiveness of life but continues to hold on to the romantic notion that love will cure all ills. When he rescues the Daughter of Indra from the drudgery of domestic life and takes her to Fairhaven, a romantic paradise, he lands in Foulstrand, a modern-day inferno, where he witnesses

the everlasting misery of the human condition. In his constant failure to find true love, he represents disillusioned romanticism.

The attorney is disgruntled. Through his dealings with the crimes and viciousness of humanity, he has acquired a pale, haggard, and discolored face, along with blackened and bleeding hands. Denied his doctorate by the self-righteous academicians, he becomes a Christ figure who suffers rejection because he defends the poor and the helpless. More of a realist than the officer, he sees human beings as flawed creatures trapped between their commitments to odious duties and their desire for life's elusive pleasures—pleasures that always result in recriminations. He marries the Daughter of Indra and enlightens her on the inhuman torments of living in poverty and the constant antagonisms of family life. Later, he continually reminds her of her sacred duty to her child.

The poet is an erratic visionary who bathes in mud in order to come down from the ethereal regions of lofty thought and to immerse himself in the dirt of life. Caked with mud, he is protected from the flies. Being both idealistic and cynical, he sees through life's injustices and hypocrisies and rails against the gods. Though an earthbound creature hampered by his bodily existence, he still reaches for spiritual rejuvenation. When those around him are abandoning hope, he realizes that human redemption will only come through suffering and death.

In *A Dream Play*, Strindberg felt that he had created a new form. That form, later termed expressionism, was adopted by the German dramatists and became a trend in modern drama.

## THE GHOST SONATA

**First produced:** *Spöksonaten*, 1908 (first published, 1907; English translation, 1916)

**Type of work:** Play

*A young student in search of a beautiful girl enters a house full of ghoulish characters and is surrounded by deception, guilt, and death.*

In *The Ghost Sonata*, Strindberg paints a picture of a fallen world based on illusions and deceptions, where human beings, bound together by common guilt, are condemned to suffer for their sins. Only by escaping this world can one find peace and happiness. In this world, filled with death and decay, people are not what they seem to be. Under the veneer of respectability lies corruption.

*The Ghost Sonata* makes use of both spatial and temporal metaphors. Strindberg sees all humanity as linked by a common network of guilt and sin; the house that the student, an idealistic young man, seeks to enter becomes a symbol for humanity and the social system. The consul, the upper class, lives on the top level; the colonel, the middle class, lives on the ground level; and the superintendent, the lower class, lives below. The poor are found outside the house clamoring at the doors.

Hummel, an old man in a wheelchair, is old enough to know all the inhabitants of the house and understands how they are linked by a chain of guilt and betrayals. The consul (upper class) has slept with the superintendent's wife (lower class); their daughter, the second generation, perpetuates the chain, for she is having an affair with the aristocrat (upper class), who is married to the consul's daughter (upper class). The aristocrat links all the classes in their sins. He has married the consul's daughter (upper class), slept with the colonel's wife (middle class), and is having an affair with the Lady in Black, the daughter of the superintendent's wife (lower class). Thus, all the generations and social classes are interconnected in a house of sin.

The play is also a journey. It begins on a sunny Sunday morning, with steamship bells announcing a voyage. The bright sunlight shines on the student's dream house. As hidden sins are revealed

and ominous pacts are planned, however, clouds appear; eventually it rains. As the student enters the house, the atmosphere becomes gloomy and claustrophobic. The mummy lives in the closet, and the ghost supper provides an eerie scene. As Hummel, who is trying to expose the inhabitants of the house, dies in a closet behind a death screen, the student symbolically invokes the light with his "Song of the Sun." The hope soon proves futile, however, as the ogre cook is persecuting the young lady and draining the nourishment from her food. Finally, the young lady, bathed in radiant light, dies as the vision of the Isle of the Dead appears. Having begun on a Sunday with a Sunday's child seeking resurrection from a night of death, the play ends in a transcendental vision of the dead. The subtle interplay of light and dark intertwines with the play's themes.

In *The Ghost Sonata*, one can see how Strindberg's work foreshadowed modern avant-garde theater. His drama is based on a series of images, not on a linear plot. Motivation is often ambiguous, and the nature of individual identity is questioned. Characters haunted by vague anxieties and grotesque visions are trapped in confined worlds where it is impossible to decipher the difference between truth and illusion. Language becomes an ineffectual means of communication, and often silence is all that is left. A relentless experimenter, Strindberg left a legacy that would influence dramatists such as Eugene O'Neill, Sean O'Casey, and Friedrich Dürrenmatt, who said, "Modern drama has come out of Strindberg: We have never gone beyond the second scene of *The Ghost Sonata*."

### SUMMARY

August Strindberg is an influential figure in the history of modern drama. His dramas probe the psyches of alienated, confused, and disturbed characters who are crushed by social, personal, and existential pressures. He brought to the forefront of modern drama the intense struggles and inner workings of troubled sexual relationships. His dramas explore the central themes of modernism: the alienation of the individual, the subjective nature of the truth, the illusory nature of experience, and the existential struggle to create meaning in a meaningless universe. Strindberg also experimented with various dramatic forms: the tightly

constructed and carefully motivated structure of naturalism, the broad, expansive form of subjective expressionism, and the mystical and evocative composition of symbolism.

Paul Rosefeldt

## DISCUSSION TOPICS

- What do feminist critics have to say about the women in August Strindberg's plays?
- What later dramatists have been most interested in Strindberg's favorite themes?
- To what extent can the traits of Strindberg's expressionistic plays be related to expressionism as seen in other arts, such as painting?
- Were Strindberg's own experiences with women the basis of his preoccupation with troubled sexual relationships?
- Was Strindberg primarily a subjective dramatist?

## JONATHAN SWIFT

**Born:** Dublin, Ireland  
November 30, 1667

**Died:** Dublin, Ireland  
October 19, 1745

*Straddling the gap between ancient and modern ways of thinking, Swift gave to young and old alike new ways of viewing human life from satirical perspectives.*

### BIOGRAPHY

Jonathan Swift lived a long, active public life, though its beginning and end were cloaked in darkness. He was born on November 30, 1667, in Dublin, Ireland, to Jonathan and Abigail Erick Swift. His parents had recently moved from England to Dublin, where Swift was born a few months after his father had died. Mysteriously, he was soon separated from his mother, perhaps kidnapped and taken to England, as he later believed. Supported by an uncle, he studied at Kilkenny Grammar School and Trinity College, Dublin.

Late in 1689, he established residence at Moor Park as secretary to Sir William Temple, the man of letters and elderstatesman. Temple had arranged the marriage of Princess Mary to William of Orange; their accession to the throne in 1688 inaugurated the Glorious Revolution, which brought England relative stability after the upheavals of the Puritan Revolution, the Protectorate, and the Restoration. At Moor Park, a strong friendship blossomed between Swift and Esther Johnson, the “Stella” of his famous *Journal to Stella* (1766, 1768). He took the girl of eight under his tutelage, taught her how to write, and, many believe, secretly married her. They remained close friends until she died in 1728.

Swift returned briefly to Ireland in 1690, having

contracted a disease of the inner ear that plagued him until death with fits of giddiness, nausea, and deafness. He soon returned to Temple’s service, ever anxious to obtain preferment from his patron. In 1694, he returned to Ireland; he was ordained an Anglican priest in 1695 and took a parish near Belfast, where he was ill received. On April 29, 1696, his proposal of marriage was declined by Jane Waring, whose counterproposal he would reject four years later.

Returning to Moor Park, Swift became embroiled in the Phalaris controversy. Scoffing at the new science and philosophy then sweeping through Europe, Temple wrote an essay to champion the superiority of ancient learning over modern, foolishly citing as proof the spurious *Epistles of Phalaris* (1695). When the scholar William Wotton criticized Temple, Swift wrote *The Battle of the Books* (1704) to defend Temple and the ancients. Later, the keeper of the king’s library, Richard Bentley, proved that the epistles were a fourteenth century hoax. Swift, however, had discovered his satirical powers. *A Tale of a Tub* (1704) established him as a man of letters, though it probably hindered his career in the church.

In the decade after Temple’s death in 1699, Swift held several posts in the Church of Ireland, but he visited England often on church business or to pursue literary aims. He formed a literary circle in London with the writers Joseph Addison, Richard Steele, and Alexander Pope. During this period, Swift supported the Whig Party. His first major publication, *A Discourse of the Contests and Dissensions Between the Nobles and the Commons in Athens*

and Rome (1701), defended the Whig lords against Tory attacks led by Robert Harley, who later became Swift's close personal friend and patron. His comic wit found a fit target in the Dissenting astrologer John Partridge, whom he pilloried in the popular *Predictions for the Year 1708* (1708). Swift left the Whigs in 1710 and became a Tory pamphleteer under Harley, who steadily gained ascendancy in the court of Queen Anne. Whig toleration of religious dissent troubled Swift. *Argument Against Abolishing Christianity* (1708) and "The Sentiments of a Church of England Man" (1711) set forth his firm belief in central religious authority and intolerance of Dissenters, whom he saw as a threat to the peace of the kingdom, as well as the church.

Swift hoped that his political connections would make him a bishop, but instead he was appointed dean of St. Patrick's Cathedral in Dublin in 1713. Ill-received, he returned to London after his installation. He found himself in a new circle, the Scriblerus Club, with the writers William Congreve, John Gay, Thomas Parnell, Pope, and Harley, who were dedicated to ridiculing false taste in learning. Swift was followed back to Ireland by a young lady, Esther Vanhomrigh (called "Vanessa" in his writings), whom he had met in London in 1707, and who had fallen desperately in love with him. Their relationship was typically perplexed, Swift playing the friendly mentor and guide, she desiring much more. Swift commemorated it in *Cadenus and Vanessa* (1726). There is no conclusive evidence to prove that Vanessa was his mistress and Stella his secret wife.

Though not an Irish patriot, strictly speaking, Swift came to abhor English domination of Ireland and to deplore the disorganization within Ireland that was both the cause and the effect of the English dominance. His *A Proposal for the Universal Use of Irish Manufacture* (1720) urged Irish citizens to keep profits at home by not buying imports from England. The *Drapier's Letters to the People of Ireland* (1735) stopped a scheme to debase Ireland's coinage and made Swift a national hero. Then came *Gulliver's Travels* (1726), an immediate, smashing success, and the only writing for which Swift was ever paid. He continued issuing pamphlets, among them *A Modest Proposal for Preventing the Children of Poor People of Ireland from Being a Burden to Their Parents or the Country, and for Making Them Beneficial to the Public* (1729; commonly known as *A Modest Pro-*

*posal*). In the 1730's, he wrote some of his best poems, most notably *Verses on the Death of Dr. Swift, D.S.P.D.* (1739), which predicts what people will say of him after he dies, and *On Poetry: A Rhapsody* (1733).

Swift's last years were darkened by senility. In March, 1742, he was ruled mentally incompetent. In September, he was paralyzed and sank into dementia until death came on October 19, 1745, in Dublin. He was buried in St. Patrick's beside Stella, "where savage indignation can no longer tear the heart," according to his epitaph.

### ANALYSIS

Swift lived through times of great change in politics, religion, and learning. Divine authority, medieval scholasticism, and Renaissance humanism were being supplanted by materialistic, mechanistic, empirical skepticism, thanks largely to the work of philosophers Thomas Hobbes and John Locke and the incalculable influence of French mathematician René Descartes. Men such as Temple and Swift preferred the serene assurances of the old order based upon rational Christian humanism. They saw the acids of modernism dissolving spiritual authority and the moral values of the landed aristocracy.

From the moment of his precarious birth, Swift was in search of a place in life. Without noble ancestry, he used his talents with words to secure a high standing in society, first under Temple and later Harley, men whose snobbish and repressive instincts he affected. He maintained a stalwart faith in the Anglican establishment and despised free-thinking dissent. He scorned the new money-grubbing middle class and the follies of projectors who meant to perfect society. Yet Swift was also possessed of a diabolical imagination, and from it grew the wildly inventive satires against the very reason and order that he so devoutly defended in other writings. His mind embodied the contradictions of his age. Swift was an orthodox cleric who hated bishops, a rationalist with slight faith in reason, a believer afraid to plumb the mysteries of his faith.

Swift often hides behind a narrational mask, a persona who poses as author, be it Isaac Bickerstaff, M. P. Drapier, or Lemuel Gulliver. The diabolical wisdom or folly is theirs, though a reader surely feels that he or she is face to face with Swift. Yet these masks must not be mistaken for Swift. Very of-

ten he is holding up a persona to ridicule, such as the dispassionate social scientist whose “Modest Proposal” would cure hunger by killing babies. Swift was emotionally incapable of the comprehensive vision of a William Blake, but Swift, too, had intellectually penetrated the contrary nature of humanity and seen through to the heart of darkness. His unblinking insight into human nature, as sane as it is said to be insane, forms the basis for his incomparable ironic satires.

The enormous body of Swift’s writings displays four distinct yet overlapping personalities. First is the straightforward, plain-talking voice of common sense. Most of the pamphlets take this tack. The ideas are quite orderly, the doctrine utterly orthodox, the prose style plain and simple. He adopts this mood to attack political or religious confusion, as in his *The Drapier’s Letters to the People of Ireland, A Project for the Advancement of Religion, and the Reformation of Manners by a Person of Quality* (1709), and *The Conduct of the Allies and of the Late Ministry, in Beginning and Carrying on the Present War* (1711).

Second is the comic wit of roaring laughter to be found in *The Battle of the Books* and the Bickerstaff materials. Swift’s *Predictions for the Year 1708*, which he wrote under the Bickerstaff pseudonym, poked fun at a quack astrologer and predicted that he would die on March 29. When he did not die, Swift nevertheless issued the seemingly factual *An Elegy on Mr. Partridge* (1708). Partridge’s rebuttals were met with *A Vindication of Isaac Bickerstaff, Esq.* (1709). Swift had scored a hit on the pretensions of a “heavenly” pseudoscientist who was attacking the Anglican Church. London laughed long and hard at Bickerstaff’s urbane barbs. Swift’s comedy masks serious intent. The zany goings-on in *A Tale of a Tub*, for example, ridicule religious enthusiasm.

Third is the diabolical mode of the ironical satirist who pens *Gulliver’s Travels*, *A Modest Proposal*, and *A Tale of a Tub*. Savage indignation lashes out at every corruption of morals or reasoning that humankind is capable of undertaking. Fancy is cut loose from all moorings to lacerate vanities and illusions. Playfully, even inconsistently, by turns this spirit may be witty and light, or coarse and vulgar, even dismally misanthropic. Swift in this humor is unmatched in English literature.

Fourth is the least familiar of Swift’s personalities, the childlike personal friend. The passionless Swift shows himself in poems such as *Cadenus and*

*Vanessa* and in his private letters to Stella to be capable of genuine tenderness and warmth. Long passages from his famous *Journal to Stella* are in baby talk, the most intimate kind of communication by which one friend engages another.

Swift was the first English writer to gauge the full force of the displacement that modernism would work upon traditional values and ways of thinking. His official self longed for institutional order, but his demonic imagination let him know that human nature could not be tamed or improved by so weak a rider as reason. As such, his disgust was enormous, and he dared to show human nature as it is. Little wonder that Swift is understood by children and often misunderstood by scholars and clerics.

## GULLIVER’S TRAVELS

**First published:** 1726

**Type of work:** Novel

*A surgeon sets out on four sea voyages that take him beyond the wildest stretch of his imagination.*

Lemuel Gulliver, the title character of *Gulliver’s Travels*, is a capable, brave, and educated Englishman whose unlucky adventures drive him to sickness and madness. His simple, straightforward way of telling his story suggests that he lacks the imagination to understand what he has experienced.

Gulliver is shipwrecked off the shore of Lilliput and captured by humans only six inches tall. Practical man that he is, he promises to obey their laws controlling him. He finds Lilliput, not unlike Europe, in a state of perpetual and petty disorder. Low-heelers and High-heelers squabble over politics much as do the Whigs and Tories of Swift’s day. Courtiers compete for distinctions by leaping over sticks and other such ridiculous games. Protestants and Catholics are mirrored as Big-enders and Little-enders, who cannot agree on which end of the egg should be cracked first. The war between England and France is parodied in the conflict between Lilliput and its neighbor Blefuscu. Gulliver becomes a hero by wading into the surf and carrying off the tiny Blefuscan navy. When he puts out a fire in the palace by urinating on it, he falls from favor at court and joins the Blefuscans, who help him

salvage the wrecked ship in which he makes his escape.

Gulliver's next voyage takes him to Brobdingnag, the opposite of Lilliput. Proportions are reversed. People stand as tall as steeples. Gulliver is a caged pet exhibited as a freak. The queen buys him and brings him to court, where he is imperiled by the lewd curiosity of the ladies, by a dwarf who nearly drowns him in a bowl of cream, and by a monkey who almost dashes his brains out.

Yet Brobdingnagian society is a utopia, based on useful studies of poetry and history, not on metaphysics, theology, and speculative science, as in Europe. The king rules a prosperous state not torn by strife. In Brobdingnag, a law cannot be written using more than twenty-two words, and to comment on laws is a capital crime. Horrified by Gulliver's description of England's government, the king concludes that Englishmen must be "the most pernicious Race of little odious Vermin that Nature ever suffered to crawl upon the Surface of the Earth."

His third voyage, to Laputa and other islands, is the most fantastic of them all. Gulliver finds himself on the airborne island of Laputa. Its people are devoid of practicality, so lost in abstraction that servants must flap their mouths and ears with inflated bladders to keep their minds on conversations. Though bent upon music, mathematics, and astronomy, they lack reason and cannot construct walls perpendicular to the floor. The monarch is proud of his dominion over the island of Balnibari below. Any mutiny can be literally crushed by dropping Laputa upon it, smashing whole towns. Yet the monarch is reluctant to use this power for fear of cracking Laputa, and, besides, Laputians own country estates on the nether island. Swift here satirizes England's dominion over Ireland.

At the Academy of Lagado, Gulliver witnesses the absurdities of misapplied scholarship. There, the projectors experiment with building houses from the top down, making pillows out of marble, extracting sunshine from cucumbers, and the like. He visits nearby Glubbdubdrib, where the governor by sorcery summons dead persons back to life

for a day. Gulliver thus meets with Alexander the Great, Homer, Aristotle, and René Descartes, who admits his philosophy is confounded conjecture. In Luggnagg, Gulliver views the ghastly spectacle of human immortality. The wretched Struldbrugs live forever, not in perpetual youth but in unending decay. From there, Gulliver makes a short trip to Japan, and thence back to England.

Gulliver leaves behind a pregnant wife to make his final journey to a land ruled by intelligent horses, called Houyhnhnms. These purely rational creatures know neither pride nor passion. Without love or lust, they procreate merely to meet a social obligation. They live in stoical calm, without government and without crime. They are served by a despised underclass of Yahoos, depraved, libidinous creatures quite unlike themselves but strongly resembling humans. Gulliver shares the Houyhnhnms' disgust and disdain for them. When a lusty Yahoo woman tries to embrace him, he is repulsed. The Houyhnhnms, however, decide that Gulliver must live as a Yahoo or else leave, so he departs on a Portuguese ship with Captain Pedro de Mendez. Still, Gulliver cannot bear the smell of the captain and crew. He shuns their civilities and tries to jump overboard. He arrives in England only under shackles. Now too proud to associate with humans, whom he sees as Yahoos, Gulliver faints when his wife kisses him, and he abandons his family to consort with horses at pasture.

Gulliver himself has become the object of the satire, for he has lost all reason and proportion. The very Houyhnhnms he so admires do him the greatest wrong, but he scorns humanity with irrational pride. Having seen him from so many different perspectives, a reader recognizes that Gulliver's weaknesses are those of humankind.

## THE BATTLE OF THE BOOKS

**First published:** 1704

**Type of work:** Essay

*In the library of Saint James, the modern books battle for supremacy over the ancient books.*

Swift wrote *The Battle of the Books* in 1697 to buttress his beleaguered patron Sir William Temple in a controversy over the relative merits of ancient learning and modern learning. Gentlemen with old Tory money or new Whig pretensions affected a haughty disdain for the new philosophy of Descartes and the new social science of Hobbes, and their disdain affected Swift. They saw in modernism a childish self-absorption, disregard for the classics, disrespect for traditional authorities, and bad manners. Swift ridiculed the new trends by contrasting them with the sound wisdom and graceful art of the old masters.

In the library of Saint James, the modern books square off against the ancients in a mock-epic battle. Before they clash, a bee breaks through a spider's web, to the discomfiture of both. The spider chides the bee for destroying its intricate trap. Wiping off the obnoxious threads of the web, the bee spurns the spider for erecting such a petty and disgusting contrivance. Their witty sparring goes to the heart of their differing natures. The spider represents modernism; the bee, classicism. They hurl vituperative charges at each other. The bee accuses the spider of spinning everything out of his own guts, such as the regurgitated threads of its web and the venom that it injects into entangled flies. The spider accuses the bee of being no better than a thief, visiting one beautiful flower after another only to steal nectar and flee. The bee replies that the flowers are multiplied, not destroyed, by his beneficial rapine; he returns to the hive with honey and wax, thus furnishing sweetness and light.

Armed with their ink made of bitter venom, the moderns issue an ultimatum to the ancients: either abandon their glory-smitten summits of prestige or let the moderns come with their spades to level the peaks that overshadow the lower tops of modern mountains. When the ancients refuse, the moderns close ranks. The bumbblings of a modern librarian have caused confusion on the shelves.

René Descartes has been set beside Aristotle, Plato shoulder-to-shoulder with Thomas Hobbes, and Vergil hemmed in between the modern poets John Dryden and George Wither. The ancients are captained by Temple and Pallas Athena, goddess of wisdom. The moderns are led by Momus, god of faultfinding, who calls on the malignant deity Criticism in her cave, where she dwells with Ignorance, her father and husband; Pride, her mother; and her children, Noise, Impudence, Dullness, Vanity, Positiveness, Pedantry, and Ill-Manners. Criticism comes to the library to rally her troops, but the moderns fall into disarray. Descartes is felled by Aristotle's arrow. The poet Abraham Cowley hurls his spear at the poet Pindar, but misses. Pindar disables a dozen or so of the Cavalier poets. The modern poet Dryden swaps armor with Vergil (Dryden had translated his epic poem *Aeneid* into English), but he finds Vergil's helmet nine times too big for him. Homer slays the modern poet John Denham. Another modern poet, John Oldham, falls to Pindar. Clearly, the ancients have carried the day, but peace talks are convened, and the matter ends inconclusively.

Swift's mockery is devastatingly effective, witty, and fun. His sarcastic jest is proven true: Some of these modern authors would have been all but forgotten were it not for Swift's record of their clash with the ancients.

## A TALE OF A TUB

**First published:** 1704

**Type of work:** Novel

*A diabolical wit ridicules the attempts of Christian sects to divert the attacks of materialistic science on religious faith.*

*A Tale of a Tub* is Swift's wildest adventure in satirical humor. Speaking through a diabolical persona of his own making, he pillories the corruptions of churches and schools. The title refers to the large tub that sailors would throw overboard to divert a whale from ramming their boat. In Swift's satire, the whale is Thomas Hobbes's *Leviathan* (1651), a political monster born of Descartes's mathematical philosophy. Institutional Christianity is the ship

that might be sunk in such an onslaught, and its timbers have already been loosened by schismatic factions.

The book is an allegory of church history. A father wills suits of clothes to his three sons, with directions that the suits never be altered. Brothers Peter, Martin, and Jack represent Catholic, Anglican, and Puritan sects, respectively. Peter upgrades his garments with gold lace, shoulder knots, and such trappings. Martin removes the false ornamentation from his without tearing the cloth. Jack zealously rips his garment to shreds to get rid of all ornament.

This basic allegory is richly embellished with outlandish digressions, parodies, puns, quibbles, unstructured foolery, and displays of odd erudition. The diabolical narrative takes every opportunity to prick the pretensions of pedants, religious dissenters, and perfectionists whose projects try to remake human society along rational lines. Swift thought that human reason is rather weak, blown flat in fact by the merest gust of desire, and so people should behave themselves and be governed by institutions such as the Church of England. Yet his diabolical narrator weakens this myth of order and reason by showing how vulnerable the mysteries of religion are to skeptical scrutiny.

Dressed in his sanctimonious vestments, Peter looks ridiculous issuing papal bulls on the superstitious doctrine that bread can be turned into mutton. The excesses of religious enthusiasts are reduced to absurdity in Jack's rantings and in a scatological satire on a sect of Æolists, who believe that wind is the essence of all things, the original cause and first principle of the universe. In their most ridiculous rite, Æolists seat themselves atop barrels that catch the wind and blow inspiration into their posteriors by means of a secret funnel. Sacred sermons are delivered by their priests in oracular belches, or bursts of internal wind.

This maniacal conception reemerges in the famous Digression on Madness. There, the modern upsurges in religion, politics, and science are diagnosed as a form of madness, caused when the brain is intoxicated by vapors arising from the lower faculties. This vapor is to the brain what tickling is to the touch. Real perceptions are disordered in a happy confusion. Thus, happiness for moderns amounts to "a perpetual Possession of being well Deceived." In the madhouse world of *A Tale of a*

*Tub*, the modern man cut off from classical culture is lucky to be a fool among knaves, like the book's demoniac narrator.

## A MODEST PROPOSAL

**First published:** 1729

**Type of work:** Essay

*A social scientist proposes that poor people sell their babies as food to be eaten by the rich.*

Swift's *A Modest Proposal* has been called the greatest work of irony ever written. A dispassionate social scientist surveys the poverty in Ireland and structures his proposal in five parts after the classical rhetorical pattern: *exordium* (introduction), *narratio* (narrative), *confirmatio* (confirmation), *confutatio* (refutation), and *peroratio* (peroration).

The *exordium* evokes the familiar sight of female beggars followed by many children dressed in rags. The image suggests the problem of poverty, overpopulation, and hunger that the narrator proposes to solve with his "fair, cheap, and easy method" of fattening the poor babies for a year and then selling them as delicious delicacies for the tables of the rich.

In the *narratio*, the narrator coldly calculates the number of babies needed. Out of one and a half million people in Ireland, he reckons only two hundred thousand couples are breeders. Subtracting thirty thousand whose parents can afford them, and fifty thousand who die in the first year of life, and sparing twenty thousand for breeding purposes, he figures only one hundred thousand babies will be sold for slaughter each year. Instead of being a burden on families or welfare agencies, these children will contribute to the feeding and clothing of thousands of others, since their skins can also be tanned for leather.

The *confirmatio* explains the public benefits of the scheme. This meat is not seasonal and thus sup-

plies the cyclical scarcity of fresh meat. A poor mother can clear a profit of eight shillings per child. In a land torn by religious strife, the number of Catholics would be greatly lessened. The new industry would push the gross national product higher. Parents would save not merely eight shillings but the far greater cost of rearing the child for years. If poor people saw a profit from pregnancy, they would be more inclined to marry and then to be more tender and caring with the family.

The narrator admits that the population would be lowered, but he thinks it should be. He scorns politicians for overlooking other solutions, such as taxing émigrés and banning imports from England. By including these proposals in the *confutatio*, Swift ironically endorses them. The narrator reminds readers that these are unwanted children who would likely rather be dead. He closes his *peroratio* by professing that he lacks self-interest: "I have no children by which I can propose to get a single penny; the youngest being nine years old, and my wife past childbearing."

Of course, Swift was saying one thing and meaning another. He means to condemn the wickedness

of equating human life with monetary value. References to slavery and abortion widen the scope of this satire on the many ways in which people put a price on life. This outrageous proposal is called "modest" because it rejects the extremes of voluntary abortion before birth and euthanasia for the aged and diseased.

## SUMMARY

Readers insensitive to Jonathan Swift's ironies have dismissed him as a crazy man who hated humanity. Others have concluded that he was a humane Christian who valued human life. Upheavals in politics, religion, and learning made Swift think that the modern world was going crazy. He longed for a stable, reasonable order in society based on institutions, such as the church, that seek to correct humanity's vanity and pride. Yet his diabolical imagination told him authority was drowning in change. Swift embodied and recorded the profound contradictions of his era better, perhaps, than any other English writer.

John L. McLean

## BIBLIOGRAPHY

### By the Author

#### LONG FICTION:

*A Tale of a Tub*, 1704

*Gulliver's Travels*, 1726 (originally entitled *Travels into Several Remote Nations of the World, in Four Parts, by Lemuel Gulliver, First a Surgeon, and Then a Captain of Several Ships*)

#### POETRY:

*An Elegy on Mr. Patrige*, 1708

*Cadenus and Vanessa*, 1726

*On Poetry: A Rapsody*, 1733

*Verses on the Death of Dr. Swift, D.S.P.D.*, 1739

*The Poems of Jonathan Swift*, 1937, 1958 (3 volumes; Harold Williams, editor)

#### NONFICTION:

*A Discourse of the Contests and Dissensions Between the Nobles and the Commons in Athens and Rome*, 1701

*The Battle of the Books*, 1704

*The Accomplishment of the First of Mr. Bickerstaff's Predictions*, 1708

*Argument Abolishing Christianity*, 1708 (first pb. as *An Argument to Prove That the Abolishing of Christianity in England May, as Things Now Stand, Be Attended with Some Inconveniences, and Perhaps Produce Those Many Good Effects Proposed Thereby*)

*Predictions for the Year 1708*, 1708

*A Project for the Advancement of Religion, and the Reformation of Manners by a Person of Quality*, 1709

*A Vindication of Isaac Bickerstaff, Esq.*, 1709

*The Conduct of the Allies and of the Late Ministry, in Beginning and Carrying on the Present War*, 1711

*A Proposal for Correcting, Improving, and Ascertaining the English Tongue, in a Letter to the Most Honourable Robert Earl of Oxford and Mortimer, Lord High Treasurer of Great Britain*, 1712

*The Public Spirit of the Whigs, Set Forth in Their Generous Encouragement of the Author of the Crisis*, 1714

*A Letter from a Lay-Patron to a Gentleman, Designing for Holy Orders*, 1720

*A Proposal for the Universal Use of Irish Manufacture*, 1720

*A Modest Proposal for Preventing the Children of Poor People of Ireland from Being a Burden to Their Parents or the Country, and for Making Them Beneficial to the Public*, 1729

*The Drapier's Letters to the People of Ireland*, 1735

*A Complete Collection of Genteel and Ingenious Conversation, According to the Most Polite Mode and Method Now Used at Court, and in the Best Companies of England, in Three Dialogues*, 1738

*Directions to Servants in General . . .*, 1745

*The History of the Four Last Years of the Queen, by the Late Jonathan Swift DD, DSpD*, 1758

*Journal to Stella*, 1766, 1768

*Letter to a Very Young Lady on Her Marriage*, 1797

*The Correspondence of Jonathan Swift*, 1963-1965 (5 volumes; Harold Williams, editor)

#### MISCELLANEOUS:

*Miscellanies in Prose and Verse*, 1711

*Miscellanies*, 1727-1733 (4 volumes; with Alexander Pope and other members of the Scriblerus Club)

## DISCUSSION TOPICS

- Jonathan Swift claims that “his satire points at no defect/ But what all mortals may correct,” but do any of his characters ever correct their defects?
- In a letter to Alexander Pope, Swift proclaimed himself a misanthropist. Was he?
- Is *Gulliver's Travels* in part a satire on travel literature?
- Is a conservative viewpoint essential to a satirist as successful as Swift?
- Is Swift too conservative to be convincing in *The Battle of the Books*?
- Aside from heartless English landlords, whom is Swift satirizing in *A Modest Proposal*?
- Is logic itself one of the targets of Swift's satire in *A Modest Proposal*?

## ALGERNON CHARLES SWINBURNE

**Born:** London, England  
April 5, 1837

**Died:** Putney, London, England  
April 10, 1909

*The author of varied works of verse and prose and an influential member of the intellectual circles of his time, Swinburne is best remembered for his highly personal, and intensely musical, poetic style.*

### BIOGRAPHY

Algernon Charles Swinburne was born on April 5, 1837, in London, England, to Captain (later Admiral) Charles Henry Swinburne and Lady Jane Swinburne. Much of Algernon Swinburne's early life was spent in the wild, idyllic setting of his family's estate on the Isle of Wight, where, with his brother and four sisters, he could enjoy the freedom of nature. This freedom contrasted sharply with the discipline of tutors who were to prepare the young Algernon to enter Eton at the age of twelve.

All of his life, Swinburne was to suffer the effects of his unusual physique. His slight and delicate body, punctuated by a great mass of red hair, might have earned him harsh hazings in the atmosphere of the English public school had his considerable courage not allowed him to stand up to all possible tormenters. He could not escape the physical discipline of Eton, however, and, like many other schoolboys of his time, he retained a perverse desire for the floggings that were then regularly administered. Swinburne's slight physique was joined to a nervous disposition that caused him to alternate between frenzied bursts of energy and corresponding periods of depressed reverie. The same energy that allowed him to read and recite poetry for hours on end turned to violence under the in-

fluence of drink and caused Swinburne to be barred from certain households. Throughout his life, however, he retained loyal friends, whom he frequently entertained with readings in the distinctively high, singsong voice that he was said to have inherited from his mother.

Several of Swinburne's most important friendships, especially those with the poets William Morris and Dante Gabriel Rossetti, were formed during his years at Oxford. Swinburne entered Oxford in 1856, and though he never completed the examinations for his degree, he wrote widely for undergraduate publications and began the work on the Tristan legend that would lead to his *Tristram of Lyonesse, and Other Poems* (1882). Although Swinburne's study of Greek may have gotten a comparatively slow start, he had an enduring love for both French and Greek literature, on which he would draw for many of his own works.

After leaving Oxford, Swinburne settled in London near the British Museum and began work on a number of literary projects, poems, plays, and criticism. One of his contributions to *The Spectator* in 1862 introduced the poetry of Charles Baudelaire to the English reading public. Between 1862 and 1863, Swinburne shared a house in Chelsea with Rossetti, whose wife had recently died. This bachelor household received visits from many prominent men of letters but was the scene of so much riotous conduct on Swinburne's part that Rossetti finally asked him to leave.

Thus began a pattern of Swinburne's life for the next fifteen years. Unable to resist a frenzied participation in London social life, he would drive and drink himself to exhaustion, after which he would regain his health through a period of recuperation with his family. These returns home were not always voluntary. Swinburne's father, alerted by his friends as to the poet's condition, came to remove him forcibly from his lodgings, until Swinburne threatened to hide from his family if he were similarly carried off again. After a trip to France and Italy in 1863 and 1864, Swinburne faced one of the great disappointments of his life when, in 1865, his cousin Mary Gordon married a military officer twenty-one years her senior, with whom she went to live in Scotland. Swinburne had been extremely close to Mary and may have entertained the hope of marrying her, although there is no indication of explicit romantic involvement between them.

After the publication of *Atalanta in Calydon* (pb. 1865), a tragedy written in verse, Swinburne was to become famous for his writings. He had for some time been composing the poems that would be included in his *Poems and Ballads* (1866), but his friends advised him not to publish because of the scandalous subjects of some of the pieces. Swinburne, however, was not to be dissuaded, and, upon publication, his work was so violently attacked that the publisher promptly withdrew the balance of the edition from sale. The work was immediately reissued by another publisher. With *Songs Before Sunrise* (1871), Swinburne turned to political questions, supporting freedom in Italy. During composition of this work, he suffered a period of accidents and ill health. In July, 1868, he fainted in the reading room of the British Museum, a room from which he was subsequently to be banned.

In the fall of 1868, Swinburne traveled to France, where he shared a house in Normandy with his friend George Powell and met Guy de Maupassant, who was part of a rescue of Swinburne from drowning when the tide had swept him out to sea. Back in England, Swinburne rejoiced at the fall of Napoleon III in 1870 and was saddened by the definitive rupture of his friendship with Rossetti in 1872. During this time, he was drinking heavily and causing friends and family concern for his health.

After the death of his father in 1877, Swinburne used his inheritance to set himself up in London,

where he would publish *Poems and Ballads: Second Series* (1878). Reduced to sickness by continued heavy drinking, he was finally rescued from himself by his friend Walter Theodore Watts-Dunton. With the cooperation of Swinburne's mother, Watts-Dunton took over the handling of Swinburne's financial affairs. He moved the poet into his own home, "The Pines," near Wimbledon and gradually weaned him from drinking brandy to drinking beer. By intervening as he did in the poet's life in 1879, Watts-Dunton was to give him nearly thirty tranquil years before his death.

In 1882, Rossetti died without ever resuming contact with Swinburne. Late that year, Swinburne traveled to Paris as the guest of Victor Hugo, but his enjoyment of the visit was greatly hampered by his increasing deafness. Despite his affliction, Swinburne would continue until the end of his life to declaim his poetry to avid listeners. He died on April 10, 1909, in Putney, London, England.

## ANALYSIS

Swinburne's lyrical virtuosity knew very few limits. Writing largely in English but occasionally in French, he could mimic the styles of a wide range of other poets. His own very personal style developed early, however, and would mark his major poems as distinctively his own. From the first publication, *Atalanta in Calydon*, that launched his literary reputation, his readers were struck by his heavy alliteration and use of rhythms quite different from traditional iambic pentameter. One of the best-known lyrics from *Atalanta in Calydon* is typical:

When the hounds of spring are on winter's traces,  
The mother of months in meadow or plain  
Fills the shadows and windy places  
With lisp of leaves and ripple of rain.

The alternation of anapestic and iambic feet gives these lines an uneven, discordant feel, while the alliteration ("mother of months," "lisp of leaves," "ripple of rain") adds musical echoes that suggest a contrasting harmony. The verse is united as much by the choice of sounds as by the rhythms.

Apart from his unusual meter, Swinburne deliberately set out to shock his readers through his choices of subject matter. His background had exposed him to the traditions of both Catholicism and the Church of England, but Swinburne early

evolved a distinctly antireligious view. His was not a calm opposition. Just as the Black Mass finds its structure in the inversion of normal ritual, Swinburne draws on religious sources to deliver a contrary message. "Dolores," one of the poems that Swinburne's friends had warned him not to publish in the first series of *Poems and Ballads*, posits a heroine clearly the opposite of the Virgin Mary. Swinburne's subtitle to the poem, *Notre dame des sept Douleurs*, reinforces the analogy. Yet while Mary represented virtue, Dolores becomes the emblem of vice: "Seven sorrows the priests give their Virgin;/ But thy sins, which are seventy times seven,/ Seven ages would fail thee to purge in." As Mary represented chastity, Dolores is the power of female seductiveness. Of her lips, Swinburne writes, "Men touch them, and change in a trice/ The lilies and languors of virtue/ For the raptures and roses of vice." She not only sins but also tempts others to sin.

Swinburne's pervasive musicality underlines the seductiveness of "lilies and languors" and "raptures and roses" amid a continuing use of largely anapestic rhythm. Meanwhile, the flower imagery traditionally linked to Mary becomes inverted to described Dolores: "O mystical rose of the mire." For Swinburne, sin becomes an analogy to prayer: "I have passed from the outermost portal/ To the shrine where a sin is a prayer."

Despite his extensive use of Christian allusion in "Dolores," Swinburne also links his heroine to pre-Christian goddesses: "Thou wert fair in the fearless old fashion." That was the worship that Christianity destroyed: "What ailed us, O gods, to desert you/ For creeds that refuse and restrain?" Yet Swinburne predicts that Christianity will in turn "pass and their places be taken" because "the worm shall revive thee with kisses." The fusion of sexuality and death implicit as the worms give Dolores not a kiss of death but one of life reflects Swinburne's overt preference for language that would shock. Not only is Dolores repeatedly invoked as "Our Lady of Pain," a description that might be applied to Mary, but the pain is explicit and graphic: "O lips full of

lust and laughter,/ Curled snakes that are fed from my breast,/ Bite hard."

Such descriptions, together with Swinburne's distinctive rhythms, struck the Victorian public as too outrageous to be taken seriously. Those amused by them, however, attempted parodies of Swinburne's verse. None of these parodies could improve on the poet's own self-parody in "Nephilidia": "From the depth of the dreamy decline of the dawn through a notable nimbus of nebulous noonshine." The extended line makes room for multiple adjectives and alliterations extended to sets of four words each so that music and description all but submerge meaning.

While Swinburne's self-mockery shows a momentary willingness to allow his music to dominate, his thought should never be submerged. Swinburne was not only widely read in both classical and modern literatures, he also drew on vast sources to create new literary composites. Nowhere is that more evident than in "Laus Veneris," another of his early *Poems and Ballads*, where he transports the classical Venus to a northern setting with the legend of Tannhäuser, the German lyric poet. The poem repeats the confrontation of Christian and pagan elements as the beauty of Venus serves to seduce a Christian knight away from his God.

The knight's story transcends his own case to echo that of humankind's seduction throughout history. Venus has already seduced "the knight Adonis" and "enticed/ All lips that now grow sad with kissing Christ." As he remains enthralled to her, the knight remembers both the pleasures of his fall ("Brief bitter bliss, one hath for a great sin") and his former status: "For I was of Christ's choosing, I God's knight,/ No blinkard heathen stumbling for scant light." While he regrets his loss of heaven, he finds with Venus another immortality because "Soul may divide from body, but not we/ One from another." Swinburne combines anew the elements of many legends to support his personal view of life just as he combined metrical devices in new ways to form his own poetic style.

## “AVE ATQUE VALE”

**First published:** 1868 (collected in *Victorian Prose and Poetry*, vol. 5 in *The Oxford Anthology of English Literature*, 1973)

**Type of work:** Poem

*Swinburne's elegy for Charles Baudelaire calls on the themes of Baudelaire's own work.*

Swinburne wrote a number of elegiac poems of varying quality, but with “Ave Atque Vale,” he produced one of the important elegies of English literature. Not only had Swinburne introduced Baudelaire’s poetry in England with his *The Spectator* review of 1862, he also recognized in the French poet a kindred spirit. The opening lines of his elegy, “Shall I strew on thee rose or rue or laurel,/ Brother, on this that was the veil of thee?” call to Charles Baudelaire as his brother in a deep, spiritual sense.

These lines already convey the basic technique of Swinburne’s poem by drawing upon the words evocative of Baudelaire himself. The allusions to flowers parallel the title of *Les Fleurs du mal* (1857, 1861, 1868; *Flowers of Evil*, 1931), and in calling Baudelaire “Brother,” Swinburne echoes “Au Lecteur,” Baudelaire’s opening poem, where the latter addresses his reader as “mon frère.” Swinburne echoes the regular rhythms of Baudelaire’s verse, abandoning in this elegy his frequent anapests for iambic rhythm, though he concludes each stanza with a three-foot line that has the effect of leaving something unfinished, a feeling that one has been deprived, as Swinburne was by Baudelaire’s death.

The fraternity between the two poets lay largely in their exploitation of the unconventional. Rather than fresh flowers, Swinburne suggests “Or wilt thou rather, as on earth before,/ Half-faded fiery blossoms, pale with heat/ And full of bitter summer?,” flowers like the “sickly flowers” Baudelaire had cited to describe his work. This kinship of negative preoccupations reinforces their poetic vocation. Swinburne echoes the Romantic concept of the poet as seer, seeing “Fierce loves, and lovely leafbuds poisonous,/ Bare to thy subtler eye,” just as Baudelaire had characterized the poet as visionary in his work.

Multiple allusions to Baudelaire’s poetry follow

as Swinburne speculates on what sort of existence he has found in the afterlife: “Hast thou found place at the great knees and feet/ Of some pale Titan-woman?” The image from Baudelaire’s “La Géante” posits his form of paradise, while Swinburne adopts Baudelaire’s vision of receding light from “Le Flambeau vivant” as an emblem of his own state: “Our dreams pursue our dead and do not find./ Still, and more swift than they, the thin flame flies.” As communion with Baudelaire has now been made impossible by his death, Swinburne finds consolation in the proximity of his poems: “These I salute, these touch, these clasp and fold/ As though a hand were in my hand to hold.” Yet still he remains on the “chill and solemn earth” that contrasts to the sunny, tropical land that had portrayed Baudelaire’s vision of an earthly paradise.

## “HYMN TO PROSERPINE”

**First published:** 1866 (collected in *Poems and Ballads*, 1866)

**Type of work:** Poem

*Swinburne's invocation of the pagan goddess posits a victory over Christianity.*

With “Hymn to Proserpine,” Swinburne gives positive expression to his rebellion against conventional Christianity. The dual subtitles, *After the proclamation in Rome of the Christian faith* and *Vicisti, Galilae*, define the historical setting. The poem represents

a monologue spoken by a pagan resisting the triumph of Christ. In his despair, he calls on the goddess of the underworld, “Goddess and maiden and queen, be near me now and befriend.”

The antique gods that Swinburne would resurrect have dual attributes: “Yea, is not even Apollo, with hair and harpstring of gold,/ A bitter god to

follow, a beautiful god to behold?” The combination of beauty with suffering coincides with Swin-

burne's recurring desire for punishment, but his protagonist desires neither pleasure nor pain but the sleep also associated with Proserpine. He is weary of the conflict that he sees around him because "Time and the gods are at strife." This last statement can also summarize Swinburne's feelings about his own century, a time when human progress, particularly in science, was questioning traditional religious views. Swinburne's response, conveyed through his Roman protagonist, combines a rejection of Christianity with an energetic vindication of his personal faith.

Regarding Christianity, his tone is adversarial: "Thou hast conquered, O pale Galilean; the world has grown gray from thy breath;/ We have drunken of things Lethean, and fed on the fullness of death." While Christ may have won humankind's heart for a time, the insistent theme of death undermines this triumph. Christianity depends on a belief in resurrection, but Swinburne insists that "no man under the sky lives twice, outliving his day." If death must come to all, Christ's promise will prove impossible: "Yet thy kingdom shall pass, Galilean, thy dead shall go down to thee dead."

Thus, Swinburne posits a time when people will be freed from Christianity: "I kneel not, neither adore you, but standing, look to the end." Yet in order to describe this future state, he must return to images of the past by resurrecting Proserpine as a

corresponding figure to Mary: "Of the maiden thy mother men sing as a goddess with grace clad around;/ Thou art throned where another was king; where another was queen she is crowned." Proserpine's allure derives from extreme female sensuality, "Clothed round with the world's desire as with raiment." Paradoxically, given that he has just rejected eternal life, Swinburne posits the reward of those faithful to the old gods as an eternity with Proserpine "In the night where thine eyes are as moons are in heaven." The paradox is resolved, however, when it is revealed that this night is death, the oblivion, or sleep, that will obliterate strife.

## SUMMARY

At odds with the dominant culture of his day, Algernon Charles Swinburne turned to the beliefs of pagan antiquity and to kindred poets such as Baudelaire to forge a personal philosophy compatible with his desires. He expressed his views in an equally personal style dominated by alliteration and eccentric rhythms and heavy with description that emphasized female beauty and the desire for pain. While Swinburne may have deliberately exaggerated the unusual elements of his expression, it reflected a sensitive poet ill at ease in his world.

## DISCUSSION TOPICS

- Algernon Charles Swinburne argued that poetry has nothing to do with morality. Is there any moral content in his poetry?
- What qualities that might be called Greek are found in Swinburne's *Atalanta in Calydon*?
- Examine the metrical variety of Swinburne's poems.
- Poems written for occasions often do not outlive the occasions. Why have some of Swinburne's occasional poems outlived their occasions?
- Does a reading of "Hymn to Proserpine" reveal the basis of Swinburne's opposition to conventional Christianity?
- Did Swinburne pursue outlandishness in his life? In his poetry?

## JOHN MILLINGTON SYNGE

**Born:** Rathfarnham, Ireland

April 16, 1871

**Died:** Dublin, Ireland

March 24, 1909

*One of the most prominent Irish dramatists, Synge was a contemporary of William Butler Yeats and one of the most controversial contributors to Dublin's Abbey Theatre.*

### BIOGRAPHY

Edmund John Millington Synge (sihng) was born outside Dublin, Ireland, in Rathfarnham on April 16, 1871, to John Hatch and Kathleen Traill Synge, the youngest of five children. Synge's father died within a year, and he lived most of his life with his mother, who exerted a great influence on him and is believed to have been one of the models for the strong women in his plays. Synge was ill throughout his childhood and was forced to live a reclusive life that resulted in a solitary, independent nature. At age fourteen, he read Charles Darwin's *On the Origin of Species by Means of Natural Selection* (1859), which transformed him into a confirmed naturalist who broke with his family's devout Protestantism for a private combination of aestheticism and mysticism, a quality that informs his best plays. As a boy, he had little formal schooling but later simultaneously attended Trinity College, Dublin, and the Royal Irish Academy of Music, which encouraged his decision to become a professional musician. In 1893, he left for Germany to continue his musical apprenticeship but returned to Ireland in 1894 to devote himself to a literary career, writing poetry (which he had begun composing in college) and a play in German.

In 1895, he moved to Paris and studied languages and literature at the Sorbonne. For the next seven winters, he would travel to Paris, seeking the

life of a Continental writer and critic. Although he had been studying Celtic civilization and Irish, his meeting William Butler Yeats in 1896 sparked an even deeper immersion in Irish life and culture. In 1898, at Yeats's suggestion, Synge traveled to the bleak landscape of the Aran Islands off Ireland's west coast, the first of five summer visits that would permanently change the course of his artistic development and ultimately establish his place in world literature. His experiences there are rendered in *The Aran Islands* (1907), a unique account that has been described as a collection of essays, a travel narrative, and a writer's notebook. Synge's intention was to record faithfully, yet objectively, the life that he discovered, which, despite its hard particularities, he saw as representative of the human condition. Synge then explored other remote areas of Mayo, Kerry, and the Blasket Islands, which led to a series of articles collected in *In Wicklow* (1910). A less unified volume than *The Aran Islands*, this work also reveals the writer's concern with the timeless patterns of life and nature and with the crippling poverty endured by many of his compatriots.

Between 1900 and 1901, he worked on *When the Moon Has Set* (wr. 1900-1901, pb. 1968), the first play that he submitted to Lady Augusta Gregory and Yeats for presentation at the Irish National Theatre but which they rejected for aesthetic and moral reasons. In 1902, he completed his two one-act plays, *Riders to the Sea* (pb. 1903, pr. 1904) and *In the Shadow of the Glen* (pr. 1903, pb. 1904); the latter set a precedent for the hostile reactions that greeted most of his plays. In 1905, he became a

member of the board of directors of the newly created Abbey Theatre and was deeply involved in the productions of his plays. In the same year, *The Well of the Saints* (pr., pb. 1905) was produced at the Abbey, and the next year he became engaged to the actor Molly Allgood, the inspiration for many of his poems and for the figure of Pegeen Mike in *The Playboy of the Western World* (pr., pb. 1907). He wrote to her nearly every day, and these letters provide revealing glimpses into his love, view of nature, and artistic ambitions.

In 1907, *The Playboy of the Western World* opened to riots in the Dublin streets, and Synge found himself the object of social hysteria, notoriety he neither sought nor enjoyed. In the next year, 1908, *The Tinker's Wedding* (wr. 1903, pb. 1908, pr. 1909) was published; his mother died, and Synge's own health was seriously declining from Hodgkin's disease. Now severely ill, he wrote, but never fully revised, his last play, *Deirdre of the Sorrows* (pr., pb. 1910), and was at work on the final version of *Poems and Translations* (1909) when he was admitted to a hospital. Synge died in Dublin on March 24, 1909, and was remembered by Yeats as a man "the more hated because he gave his country what it needed, an unmoved mind where there is a perpetual Last Day, a trumpeting and coming up to judgment."

## ANALYSIS

As a result of his own self-promotion, Yeats gave the impression that he molded and shaped Synge into the artist that Synge became, but as numerous scholars have pointed out, such was hardly the case. Synge came to the writing of plays and poetry with his own clearly defined set of interests and aesthetic imperatives, and while Yeats and Lady Gregory encouraged him and provided a forum in which to present his works, Synge was always an independent artist.

Synge's major concern, and the basis for his greatest literary successes, is the distinctive version of Irish-English that he developed. Like other writers in the twentieth century, he sought to demonstrate the possibilities of idiomatic language as a vehicle for expressing complex human interactions and for creating enduring aesthetic experiences. There is no question that his travels in western Ireland brought him in contact with a folk language that inspired that of his plays. His achievement, however, was not the mere incorporation of some-

thing that he found, but an artful manipulation of vocabulary, syntax, and rhythms of Irish-English.

These linguistic features are evident throughout Synge's career, with *Riders to the Sea* and *The Playboy of the Western World* representing, in different ways, the most masterful demonstrations of this style. In each of his plays, Synge depicts otherwise unprepossessing figures speaking in a rich, mesmerizing idiom that brings a sense of pageantry and splendor to the commonplace. What the plays assert as much as anything else is that language, the medium that expresses and surrounds all the characters, is perhaps their most valuable resource, without which life would be unendurable.

Closely aligned with his experiments in language is his consistent concern with the peasant class of Ireland. In many ways, such an interest would appear inconceivable for a member of the Protestant Ascendancy, yet Synge was undeniably proud of his Irish lineage, and in the peasants he saw what he regarded as the true Ireland, the last vestiges of a breed of people who had avoided the snares of civilized life and its restricting values. Synge was certainly not the first to depict the Irish peasantry in his plays. In the eighteenth century, in works written by English and Anglo-Irish playwrights, the Irish were depicted in less than flattering fashion. The term "stage Irishman" denoted a cultural stereotype, a figure full of blarney and alcohol given to hopeless malapropisms and clumsiness. Such a character came in two basic forms—a happy, besotted fool or a bumptious, irascible figure. Both versions of the stage Irishman were presented for comic effect and were broad caricatures of an imagined ethnic type.

The push for Irish independence in the nineteenth century under the nationalist leader Daniel O'Connell and the declarations of cultural independence of the Gaelic League and Irish Renaissance had elevated the peasant into a new cultural hero. As could be expected, these versions of the peasant were rife with sentimentality, and they, too, presented stereotypes.

Synge sought an alternative, and having lived among these people, he knew at first hand who they were and how complex their lives actually were. He approaches his peasants as a primitivist would, seeing in them the last remnants of a more authentic human order that the veneer of civilization has obscured. There is no question that he ide-

alizes these figures, depicting them as mystical, wise people, yet he also reveals the hard, brutal dimensions of their existence.

One of his most ambitious experiments came in rewriting Irish myth in *Deirdre of the Sorrows*, a tale that both Yeats and Æ (George Russell) had treated in dreamy, otherworldly fashion. When his friend Stephen MacKenna first suggested that Synge devise his own version, the playwright wrote, “No drama can grow out of anything other than the fundamental realities of life which are never fantastic, are neither modern nor unmodern and, as I see them, rarely spring-dayish, or breezy or Cuchulainoid [Cuchulainn, the hero of the Ulster cycle of Irish mythology].” The kings and queens in this play are not depicted as peasants, but neither are they elevated creatures. Synge humanizes them and, in so doing, reveals his interest in the peasant as a symbol of all that is undeniably human.

In the person of the tinker (itinerant Irish Traveller), Synge found another compelling symbol. As he and other writers of his generation saw them, tinkers could be equated with artists because of their solitariness and marginal position in society. Both figures were outsiders to middle-class life and therefore enjoyed a freedom from the tyrannies of social conformity. As Synge described this symbolic figure, “Man is intellectually a nomad, and all wanderers have finer intellectual and physical perceptions than men who are condemned to local habitations.”

They are, furthermore, people who possess an esoteric knowledge unavailable through mainstream experiences. As many critics have pointed out, the tinker is a premier motif in Synge’s work, appearing in four of his plays. Perhaps the most obvious depiction of the tinker as rogue hero appears in *In the Shadow of the Glen*, where an anonymous tinker appears and takes a dissatisfied woman away from the security of her marriage for an uncertain, but romantic, life on the road.

The theme of religious oppression is also strongly evident in Synge’s work. His youthful rejection of religion, his profound suspicion of the Catholic Church, which controlled the Irish people, and his own general irreligiosity surface in many plays. In *When the Moon Has Set*, a young member of the Ascendancy manages to woo his cousin away from her religious order. In *The Tinker’s Wedding*, a priest agrees to marry a pair of tinkers only

after driving a hard bargain and then reneges on his pledge. The Saint in *The Well of the Saints* cures two blind beggars who are undone by their ugliness and the nastiness of the world. Later, after blindness returns and the Saint offers another blessing, they reject him for a life removed from religion and the blandishments of society.

In these figures, Synge depicts religion as stifling and life-denying. In every case, religion represents inflexibility and the stifling of natural impulses. As Synge saw it, religion was invariably tyrannical and repressive, and his heroes reject or escape its restrictions. Conversely, those who are devout are intimidated weaklings who have lost their humanity.

## RIDERS TO THE SEA

**First produced:** 1904 (first published, 1903)

**Type of work:** Play

*Living in a small rural community in western Ireland, a mother and her two daughters are forced to confront the deaths of the last men in their family.*

The first of Synge’s two masterworks, *Riders to the Sea* did not encourage censure or controversy when first performed, but it stands as a perfect articulation of themes and ideas that appear in later plays. Events take place entirely in a single room as two sisters, Cathleen and Nora, hide from their mother, Maurya, the news that their brother Michael, a fisherman lost at sea, has washed ashore far north of their cottage. The remaining son, Bartley, sets off to sign on with another departing fishing vessel, after Maurya fails to persuade him to stay. No sooner is Michael’s death confirmed than Bartley is thrown from his horse into the sea, where he also drowns.

The complex appreciation that Synge held for nature is evident in the play; it is depicted as a grandly magisterial force that envelops and exceeds all life and human comprehensibility. It is seen as a cruel master, remorselessly taking life out of the world, leaving the destitute even more impoverished. As Maurya reveals, she has lost eight men in her life to the implacable forces of nature,

and the same universal patterns that Synge detected on the Aran Islands are at play here.

The setting and characters reveal Synge's interest in peasant life, and the play offers a clear glimpse into the realities of a rural family. Details of domestic economy, farm duties, livestock trading, and fishing are presented with delicate precision. These activities, however—specific as they are to these lives—are significant for revealing a broader human condition. All people must struggle against the contingencies of their lives, and death, nature's great inevitability, visits everyone. The impulse to depict these people as quaint or noble is suppressed; instead, the raw realities of their existence are placed squarely before the reader.

The harshest of these realities is the sense of doom and foreboding that hovers about the play. The sisters resist accepting Michael's death until they examine the paltry remnants recovered from the ocean. Both Maurya and the reader know that he is dead, and when confirmation arrives it comes as no surprise. Similarly, Maurya fears for Bartley, and when returning from seeing him off, she narrates a sinister vision. As Bartley rides off on a white mare, trailing a gray pony, Maurya spies Michael's ghost astride the second horse. She is convinced that it is an evil omen, and, indeed, shortly thereafter neighbors arrive with Bartley's body. She expresses her hopelessness in the play's last lines, "What more can we want than [a grave for the dead]? No man at all can be living for ever, and we must be satisfied."

Synge's wary view of religion is also subtly at play in *Riders to the Sea*. Nora tells Cathleen of the consolation that a young priest has offered, but in Synge's world God is either a phantom of the imagination or a force absent from the lives of humans. In spite of all Maurya's prayers, the well-meaning words of the priest, and the sprinkling of holy water, divinity does not prevail over the several inevitabilities of nature. Religion offers no hope and only cold comfort against the numbing pain of existence.

## THE PLAYBOY OF THE WESTERN WORLD

**First produced:** 1907 (first published, 1907)

**Type of work:** Play

*A young outsider, believing that he has murdered his father, visits a neighboring village, becomes a hero, and is rejected when his father unexpectedly appears.*

*The Playboy of the Western World* is Synge's masterpiece, capturing his major themes in their most complex form. It is difficult today to discern why the play was so controversial, but the playwright managed to offend not only the repressive sexual mores examined in other plays but also the image of the peasant as a rural saint.

Christy Mahon, a lad from Kerry, is taken into a pub in Mayo, where he tells and retells, each time embellishing more elaborately, the tale of killing his father. The publican's daughter, Pegeen Mike, quickly becomes enamored of Christy, and the two pledge love. When Mahon's father abruptly appears, Christy is discredited and the same people who earlier valorized him suddenly turn against and punish him. In one of the richer ironies, Christy departs in the company of his father, leaving Pegeen to wed Shawn Keogh, a timid boy in thrall to the Church. Christy is another of Synge's nomadic heroes, one who first takes to the road without a father or a place in the world; later, he is a man who still has no home but has arrived at a firm sense of identity. He ultimately opts for a life free of Church and society and seeks a natural freedom. Christy defines tyranny, and although yearning for Pegeen's love, he settles for isolation as an alternative to conformity.

The view of the peasantry is particularly complex; they are suspicious, narrow, bigoted people who, ironically, have a remarkable sensitivity to narrative extravagance and individuality. These are

not idealized figures but people in whom a passion for life is unquenchable. When Pegeen wails, “Oh my grief, I’ve lost him surely. I’ve lost the only Playboy of the Western World,” she expresses her sorrow over losing a lover and the anguish of realizing that she has betrayed her best instincts and the agent of personal freedom and liberation. In Pegeen, readers will find the same paradox that Synge creates in the peasants in general—people who often realize and desire more than they accept in their lives.

In Christy, Synge presents his most developed view of the artist. He quickly develops from a backward boy into a sophisticated poet who discovers a language he never knew he had in him, a language of the imagination, which sets him apart from quotidian existence. He accepts a life of the imagination, one of complete freedom, where sensibility is raised to its highest pitch. Although decidedly idiomatic, his speech is rich in figurative tropes and densely textured. Synge artfully re-created Irish-English habits of flexible word order, elaborate

turns of phrase, and rhetorical exaggeration as no other writer before him had.

### SUMMARY

While John Millington Synge has been celebrated for his voice, vision, and original contributions to the world stage, readers should keep in mind the literary task that he set for himself. Synge saw himself first and foremost as a realist, a writer rebelling against romantic conventions that he felt robbed literature of its immediacy and importance. In his preface to *The Playboy of the Western World*, he argues that “On stage one must have reality, and one must have joy; and that is why the intellectual modern drama has failed, and people have grown sick of the false joy of the musical comedy, that has been given them in place of the rich joy found only in what is superb and wild in reality.” He saw himself as rebelling against the dramatic conventions of his day, and he was steadfast in his determination that drama should mirror lives as they are lived.

### DISCUSSION TOPICS

- What did the poetry of John Millington Synge owe to William Butler Yeats?
- What does it mean to call Synge a primitivist?
- Is Synge a tragic or comic playwright, or does he write works that can properly be called tragicomedies?
- What does the title *The Playboy of the Western World* signify?
- Why did *The Playboy of the Western World* occasion so much more controversy than *Riders to the Sea*?
- Are the voices of Synge's peasants realistic, or are they primarily a translation of peasant dialect into Syngian?

## RABINDRANATH TAGORE

**Born:** Calcutta, Bengal, British India (now Kolkata, West Bengal, India)  
May 7, 1861

**Died:** Calcutta (now Kolkata), West Bengal, India  
August 7, 1941

*Though he had long been admired in his native India for his Bengali poems, plays, and fiction, Tagore attained recognition throughout the world only after his *Gitānjali* (Gitanjali Song Offerings) were published in English, winning him the 1913 Nobel Prize in Literature.*

### BIOGRAPHY

Rabindranath Tagore (tuh-GOR), whose name is sometimes transliterated as Ravindranatha Thakura, was born in Calcutta, India, on May 7, 1861, the fourteenth of fifteen children of Devendranath Tagore and Sarada Devi Tagore. His grandfather, Dwarkanath Tagore, was a Brahman, a landowner, and the wealthiest Indian merchant of his time, as well as a reformer strongly influenced by the European Enlightenment. Rabindranath's father, Devendranath, was also reform-minded. He became a leader of the Brahma Samaj, a sect founded by Dwarkanath's friend Raja Rammohan Roy, which scandalized traditional Hindus by rejecting polytheism, ritualistic worship, and the caste system. Devendranath's broad-mindedness in religious matters and his emphasis on the spiritual rather than the material is reflected in Rabindranath's thought and in his writings.

Rabindranath grew up in the mansion his grandfather had built in Jorasanko, north of Calcutta. The Jorasanko mansion was the most important cultural center in the area. The Tagores and their friends read and discussed the literature of various countries, speculated about ideas, and made plans for the social, educational, and economic reforms that India so clearly needed. Unlike many Indians of their time, the Tagores did not abandon their own traditions; instead, they sought

to achieve a synthesis between British culture and their own. It is hardly surprising, then, that while Rabindranath knew English well, throughout his life almost all of his creative works were written in Bengali, rather than in English.

Though Rabindranath attended several different schools, he was uninspired by his teachers and rebelled against the rigidity of the system. His learned far more from the discussions he heard at home, from talks with his tutors, and from reading whatever interested him. It soon became clear that he was meant to be a writer. His first poem was published when he was thirteen, and a collection of his poetry appeared four years later. In 1878, the family sent him to England to study law, but after two unproductive years there he returned to India, where Rabindranath and his brilliant older brother Jyotirindranath founded a literary journal and collaborated on an opera. Meanwhile, Rabindranath himself wrote songs, poems, plays, and essays.

In 1883, Rabindranath's father found him a wife, the ten-year-old daughter of an employee on one of the Tagore estates. The family changed her name, Bhabatarini, to the more euphonious Mrinalini. Since she was barely literate, arrangements were made for her to receive some education. The couple had three daughters and two sons. However, their family life was marked by tragedy. Tagore's wife died in 1902, their daughter Renuka in 1903, and their son Samindranath in

1907. In 1905, Tagore lost his father. His eldest daughter, Bela, would die in 1918.

After Tagore returned from a brief trip to England in 1890, his father had decided to give him some practical business experience by making him manager of the family estates in eastern Bengal. There Tagore became acutely aware of the plight of the rural poor. Not only did he make their hardships the subject matter of much of his short fiction, but he also took practical steps to alleviate their poverty by setting up a weaving school, an agricultural cooperative bank, and an agricultural institute. His long-standing dissatisfaction with traditional educational methods also inspired him to establish an experimental school at Santiniketan. Tagore himself conducted many of the classes there. In 1918, the school became an international university, Visva-Bharati.

In 1912, Tagore scheduled a trip to the United States in order to be present when his surviving son, Rathindranath, graduated from the University of Illinois in Urbana. En route, he spent some time in London, where he showed the painter William Rothenstein a collection of his poems, which he had translated into English prose. Rothenstein sent a copy of the manuscript to the famous Irish poet William Butler Yeats, and Tagore was soon the toast of the literary community. In November, 1912, the India Society of London brought out a limited edition of *Gitanjali* (1910; *Gitanjali Song Offerings*, 1912); after it sold out, Macmillan took over publication of the volume. On November 14, 1913, Tagore was informed that he had won the Nobel Prize in Literature, the first Asian to be so honored.

During his first visit to the United States, Tagore lectured in Urbana, in Chicago, and at Harvard University. Over the next two decades, he would travel throughout the world, giving readings or lectures, the proceeds of which went to his educational projects. Meanwhile, Tagore continued to turn out creative works. His poems, plays, and fiction were translated into English and then into numerous other languages. In the 1930's, Tagore took up painting and soon attained recognition as one of India's finest artists.

It is ironic that though Tagore had long been recognized in India as the preeminent Bengali man of letters, he did not attain an international reputation until he was in his early fifties, when his works appeared in English and he was awarded the

Nobel Prize. Thereafter, almost every year brought him a new honor. For example, in 1915, Tagore was knighted by the British government, though four years later he resigned his knighthood as a protest against the Amritsar Massacre. On his seventieth birthday in 1931, he was given *The Golden Book of Tagore*, a compilation of tributes from people throughout the world. In 1940, Oxford University awarded him a doctorate in literature, but ill health prevented him from receiving the degree in person. Tagore died on August 7, 1941.

### ANALYSIS

Tagore's works reflect both the pride his family felt in their Bengali culture and their belief in a deity who transcends the limits of time, place, and creed. Unlike other upper-class families who expected their children to receive the equivalent of a British education, the Tagores insisted that in addition to becoming fluent in English and familiar with European literature, their children know both Sanskrit and Bengali and read extensively in works written in those two languages. In the last quarter of the nineteenth century, the nationalist fervor sweeping across the subcontinent stimulated interest in native languages such as Bengali. The Tagores responded to this movement in 1877 by establishing *Bharati*, a monthly journal in Bengali.

It was there that Rabindranath Tagore's first poems appeared. Though they were highly praised, it soon became clear that this young man did not intend to hold to tradition. He rejected the formal tone of older Bengali poetry, he invented new poetic forms and tried out new meters, and most shocking of all, he wrote in the vernacular. Tagore was just as free-spirited when he set his poems to music, adapting classical forms at will. Since the short story was a relatively new form, Tagore could not so easily be criticized for his short fiction. However, some readers were surprised by his interest in the powerless and by his use of a simple, colloquial style. Tagore's importance as a Bengali writer cannot be overstated. He is credited with single-handedly transforming the Bengali language. Moreover, his experiments with form and content made it possible for his successors to move into the literary mainstream. For these reasons, Tagore is called the father of modern Bengali literature and a major influence on Indian writers.

Even in translation it is evident that Tagore is a

master of description, plot, and characterization. However, another reason for his lasting appeal to readers throughout the world is his spirituality. In *Gitanjali Song Offerings*, it is evident that Tagore regards his deity as an ever-present companion. In Tagore's fiction and his plays, it is equally clear that he sees life as a struggle between good and evil. Neither creed nor class can guarantee virtue; Tagore's noblest characters are often the most powerless, whether because, like Nikhil in *Ghare Baire* (1916; *The Home and the World*, 1919), they live by their principles or because, like the lowly title character in the short story "Kabuliwallah," they are capable of unconditional love. Tagore's sympathy for children, for women, and for the poor is evident throughout his works. His distrust of ritual is shown in the short story "Forbidden Entry," in which the guardian of a temple to Krishna has no compassion for human beings. By contrast, the way in which someone in power should behave is illustrated in his best-known play, *Dākghar* (pb. 1912; *The Post Office*, 1914), in which a king commands that a dying boy's fantasy be fulfilled.

Tagore's philosophy was also evident in the subject matter of his lectures, which were written in English and therefore could be published without having to be translated. One of his most popular volumes, *Sadhana: The Realisation of Life* (1913), deals with the problem of evil and the relationship between human beings and the divine. In *Nationalism* (1917), which was drawn from lectures presented in Japan and America, Tagore courageously criticized the nationalistic attitudes of modern nations and specifically of those two. Both that volume and *The Religion of Man* (1931) continued to be reprinted and reread long after Tagore's death.

In *The English Writings of Rabindranath Tagore* (1994-1996), edited by Sisir Kumar Das, which contains both works Tagore composed in English and Bengali works that he himself translated into English, it is evident that Tagore could handle the English language as skillfully as Bengali. Therefore scholars can no longer consider Tagore merely an important Indian writer. Though he did play a major role in the development of his native language and literature, he is also considered a predecessor of the many South Asians now writing in English.

## GITANJALI SONG OFFERINGS

**First published:** *Gitānjali*, 1910 (English translation, 1912)

**Type of work:** Poetry

*In a series of lyrical poems, the writer voices his yearning for union with the divine.*

*Gitanjali Song Offerings* is a collection of 103 prose poems, selected by Tagore from among his Bengali poems and translated by him into English. The collection brought Tagore international attention and won him the Nobel Prize in Literature. Although Tagore later published more than twenty additional volumes of his poetry in English translation, *Gitanjali Song Offerings* remained one of his most beloved works.

Western readers immediately noted similarities between *Gitanjali Song Offerings* and the biblical *Song of Songs*, which most theologians insist deals not with a human union but with Christ's love for his church. Though *Gitanjali Song Offerings* also is filled with sensual imagery, there is no doubt that Tagore's subject is the relationship between a human being and the divine. When Tagore mentioned his admiration for Vaishnava poetry in an essay published in 1912, undoubtedly he had in mind the *Gita Govinda*, a long poem written in the twelfth century by the Bengali poet Sri Jayadev, which Westerners have often

called the Indian *Song of Songs*. The *Gita Govinda* shows the god Vishnu, in his incarnation as Krishna, in passionate pursuit of the cowgirl Radha. Since Vaishnavism, or the worship of this very human god, was especially popular in Bengal, Bengali poets often wrote about Krishna's love for Radha. Though Tagore himself, reared a theist, did not adhere to Vaishnavism, he drew upon the Vaishnava tradition for his imagery because he saw the many similarities between the pursuit of a lover and a human being's pursuit of the divine or the reverse.

The Vaishnava tradition also accounts for variations in the poetic voice. Sometimes, as in numbers 49 and 52, the speaker seems to be a woman like Radha, a beggar maid waiting for her king; at other times, the poet is clearly a male, desirous of union with the divine.

Though *Gitanjali Song Offerings* is a collection, not a single narrative, it does have a certain unity. All of the poems are devotional in nature, and they all have the tender tone of conventional love poems. There are also several motifs or subordinate themes that are repeated and recombined throughout the collection. In the first three poems, for example, the writer emphasizes his smallness and his helplessness before his lord. Then the emphasis shifts to what is expected of the writer: He must live a life of truth, purity, and simplicity, thus reflecting the nature of the divinity he serves. However, in several poems, including number 73, the poet maintains that union with the divine does not mean renunciation of the senses but a fuller appreciation of what they reveal, notably the beauties of the natural world.

Though in number 35, the writer asks that his country be led toward reason and freedom, usually the prayers are personal. Naturally, the mood may shift: Though many are poems of praise and joy, some speak of the writer's desperate longing for the beloved, and others express feelings of abandonment. Toward the end of the volume, the writer turns to the subject of time, and finally, he anticipates his own death. *Gitanjali Song Offerings* ends on a note of triumph, with the poet finally united with his beloved God.

## THE HOME AND THE WORLD

**First published:** *Ghare baire*, 1916 (English translation, 1919)

**Type of work:** Novel

*An idealistic husband frees his wife from her traditional role in society, only to have her betray him with the ruthless leader of what proves to be a terrorist movement.*

*The Home and the World* is set during the height of the Swadeshi movement, a boycott of British

goods that was initiated in 1905 as a protest against Great Britain's arbitrary division of Bengal into two parts. At first, Tagore was one of the leaders of Swadeshi, but when protests evolved into violent conflicts between Muslims and Hindus, Tagore left the movement. In *The Home and the World*, he explained why he did not approve of what Swadeshi had become.

The novel consists of twenty-three chapters, each of them a first-person narrative by one of the three major characters. The first and the last chapters are both labeled "Bimala's Story," thus emphasizing the fact that the young wife Bimala is the pivotal character in what is superficially a love triangle but, more profoundly, is a conflict between two points of view, one good, the other evil. The other two narrators are Nikhil, Bimala's husband, a wealthy landowner with Enlightenment views and a benevolent nature, and Sandip, a charismatic but completely unscrupulous Swadeshi leader.

Although for some time her husband has urged Bimala to move out into the world, it is not until she meets the charismatic Sandip that she decides to take advantage of the freedom Nikhil has offered her. The first time Sandip comes to dinner, he urges her to remain with the men and take part in the discussion. Nikhil feels that he must invite Sandip to be his guest while he is in the area, but a few days stretch into weeks, and Sandip is still present. Although he admits to the reader that he believes strong men have the right to take whatever they want, he conceals his ruthlessness from Bimala. Instead, he flatters her, calling her the "mother" of the Swadeshi movement, or the "Queen Bee." Though Nikhil's old master, who is visiting, urges him to get rid of Sandip, Nikhil knows that Bimala would not permit him to evict the agitator. However, when he learns that the Muslims are planning to attack his home in order to kill Sandip, Nikhil informs his guest that he must leave.

Meanwhile, Bimala has given her jewels to Sandip, as well as a large sum of money, which she

stole from her husband with the aid of Sandip's young follower Amulya, whom she has taken under her wing. Just before fleeing from the Muslims, Sandip does return the money and the jewels, insisting that for once in his life he has felt pangs of conscience. However, Bimala has recovered from her infatuation with Sandip and his cause. She now realizes that Nikhil is not only good but also wise. Before she can ask his forgiveness, however, her chivalrous husband gallops off to protect some women he hears are being mistreated by Muslim looters. Several hours later, Nikhil is brought back, critically injured. Amulya is dead. Despite the fact that Tagore does not rule out the possibility that Nikhil will live and become reconciled with his repentant wife, *The Home and the World* is often described as Tagore's darkest novel. It is significant that when the noted director Satyajit Ray filmed *The Home and the World* in 1984, he changed the ending: In his version, Nikhil's body is brought back, and Bimala is left with nothing but regrets.

## SELECTED SHORT STORIES

**First published:** 1991

**Type of work:** Short stories

*Peasants and landowners alike choose between compassion and cruelty, virtue and vice.*

In his introduction to this volume, editor and translator William Radice explains his reasons for including only short stories that Tagore wrote during the 1890's, when he was in his thirties. At that time, Tagore was preoccupied with the narrative form, as is evident from the fact that fifty-nine of his lifetime's output of ninety short stories came out of that relatively brief period. Most of the thirty stories in this collection are set in the Padma River region of East Bengal and reflect both his new understanding of peasants like those around him and his appreciation of a particularly beautiful part of his native land.

Several of these stories are supernatural, such as "Skeleton," in which a female ghost appears to tell a story of love and death. Others resemble folktales; in "The Hungry Stones," a man in a railway waiting room describes events in a mysterious ac-

cursed palace, but before he can finish his narrative, a train arrives and he is shown to his compartment, leaving his audience in suspense. "Wishes Granted" is a moral tale like those found in every literary tradition. In it, a father and his son have their wishes granted by a passing divinity, only to find that they were better off before.

However, though Tagore himself suggested in a much later interview that most of the early stories were simple re-creations of village life, in fact they are complex descriptions of human behavior, with ironic or tragic endings. One of the best known, "The Postmaster," is typical. The title character is a well-educated young man from Calcutta, who has been sent to work in a remote village. Ratan, the orphan girl he hires to do his housework, becomes his only companion, and he finds himself very much attached to her. He even begins teaching her to read. When he becomes ill, she nurses him back to health. However, soon afterward he tells Ratan that he has resigned his position and will soon be leaving. To his amazement, she begs him to take her with him, but he refuses. He tries to make up for abandoning her by offering her money, but she will not take it. As his boat sails down the river, the young man consoles himself by musing on mutability, but Ratan is heartbroken. Though the author concludes by pointing out that people allow their hearts to deceive them, in fact, like many of the other stories in this collection, "The Postmaster" is really about the exploitation of the innocent and good by those who are financially better off, more powerful, or just more heartless.

## SUMMARY

Rabindranath Tagore's poetry, his plays, his fiction, and his prose are all infused with the writer's belief that the goal of human life is union with the divine, a being who is always accessible in prayer and in nature. An obsession with material goods, social status, or power shrinks the soul and harms both other individuals and society as a whole. So do rampant nationalism and narrow adherence to religious creeds. Even though Tagore recognizes the fact that in this world the righteous often suffer, he believes that only a soul that is unpolluted can know the joy of that mystic union.

His Bengali writings brought Tagore recognition as the father of modern Bengali literature. His English works and his translations made him fa-

mous throughout the world. However, it is not just his originality and his lyricism that account for the high regard in which he is still held. Above all, he is valued as a profound thinker and a deeply spiritual man.

## ALFRED, LORD TENNYSON

**Born:** Somersby, Lincolnshire, England  
August 6, 1809

**Died:** Aldworth, near Haslemere, Sussex, England  
October 6, 1892

*Tennyson achieved fame as the preeminent poet of the Victorian Age and is still considered one of the most melodious lyricists of English poetry.*

### BIOGRAPHY

Alfred Tennyson (TEHN-uh-suhn) was born on August 6, 1809, in Somersby, Lincolnshire, England, where his father, the Reverend George Tennyson, was serving as rector of a church. His mother's name was Elizabeth Fytche Tennyson. Early in life he exhibited intellectual brilliance that caught his father's attention. George Tennyson arranged for his son to attend Louth Grammar School from 1815 to 1820 and gave the precocious youth private lessons thereafter. Life at home was not all serene, however, as Tennyson's father suffered from a form of mental illness that led to a serious breakdown in 1824. In fact, George Tennyson's untimely death in 1831 caused the poet to leave Cambridge without a degree so that he could help settle family affairs.

From an early age, Alfred showed an intense interest in poetry, writing verses modeled on those of James Thomson and, later, Sir Walter Scott. In the same year that he entered Trinity College, Cambridge, 1827, he and his brother published a slim volume of poetry; it was not well received by the critics. At Cambridge, Tennyson was not a good student, but he made several friendships that would figure importantly in his life. The most significant was that with Arthur Henry Hallam, a brilliant young man who was influential in Tennyson's par-

ticipation in the Apostles, a famous Cambridge debating and social club. While at Cambridge, Tennyson published a second volume of poetry; it, too, was reviewed harshly.

After leaving Cambridge, Tennyson traveled with Hallam on the Continent in 1832 and published his third volume of poems. During the following year, however, Hallam, who was then engaged to Tennyson's sister, died suddenly while visiting Vienna. The death shattered Tennyson but stimulated his creative genius: During the next seventeen years, he composed more than a hundred lyrics loosely centered on his grief over the loss of Hallam; in 1850, he published these under the title *In Memoriam*.

By 1837, the Tennyson family had found that it could no longer remain at Somersby, and Alfred supervised the move of the clan to High Beech, Epping. He published nothing during the decade, but he worked at revising earlier poems and writing lyric and dramatic works that he would eventually publish during the latter half of the nineteenth century. In 1847, he published *The Princess*, a long narrative poem focusing on the question of women's rights and proper relations between the sexes.

Though he had fallen in love with Emily Sellwood in 1836, Tennyson was not able to marry her until 1850, the same year in which he published his elegy for Hallam. That year was a watershed in the poet's life. The poem celebrating Hallam's death became immensely popular, establishing Tennyson's reputation with the British reading public; late in that same year, upon the death of William Wordsworth, Tennyson was named poet laureate of England.

For the next four decades, Tennyson spent his professional life in service to the Crown and the British public, writing occasional poems and several major works that celebrated his country's heritage. In 1855, he published a long, complicated poem titled *Maud*, which combined his interest in the psychological dimensions of human character with his perennial desire to experiment with various forms of poetic meter. His Arthurian poem *Idylls of the King*, which appeared piecemeal between 1859 and 1885, won wide acclaim, as did collections of new lyrical and narrative verse. Profits from his work, coupled with his pension from the Crown, allowed him to provide comfortably for his family and establish himself as a respectable gentleman, though somewhat of a recluse.

In 1851, the Tennysons' first child was stillborn, but in the following year Emily gave birth to a son, whom the poet named Hallam. A second son, Lionel, was born two years later. In 1853, Tennyson moved his residence to Faringford, a country house on the Isle of Wight off the southern coast of England. In 1868, he established a second residence, Aldworth, in Haslemere. To these residences came politicians from England and abroad, writers, and tourists, paying court to the now-famous poet. He was awarded a barony by the monarchy shortly before his death.

During the 1870's and 1880's, Tennyson turned his hand to drama, completing a series of historical plays that received significant public approval. Tragedy struck the family in 1886, when his son Lionel, who had emigrated to India, died during a return voyage to his homeland. Late in 1888, Tennyson himself began to suffer from failing health. He died on October 6, 1892, in Aldworth, near Haslemere, Sussex—clutching a copy of works by William Shakespeare.

## ANALYSIS

An appreciation of Tennyson's achievement as an artist requires that one understand his idea of the role of the poet. For centuries, the Aristotelian idea of the poet as maker and upholder of society's best values had dominated Western thinking; but in the half century before Tennyson began writing, the notions of Romanticism, which celebrated art as self-expression and venerated the poet as rebel and social critic, had taken hold. Throughout his life, Tennyson was forced to choose between being

the public artist, bent on confirming that which was best in his society, and the private mystic, attempting to explore the psychological dimensions of the human character as he experienced the vicissitudes of his own storm-tossed life.

It is not surprising, then, that one of the major themes of Tennyson's poetry is the exploration of the proper role of the poet in society. In early works, such as "The Palace of Art" and "Supposed Confessions of a Second-Rate Sensitive Mind," the poet examines the alternatives that he sees for the poet: an active life struggling to right the many wrongs that he sees in the world, or a life of contemplation and the pursuit of art for art's sake, withdrawn from the fray of everyday affairs. Emblematically, in "The Lady of Shallott" he touches on the same theme. In that poem, the Lady, confined in her room, weaving her beautiful tapestry, sees the outside world only indirectly through images in her mirror; she comes to an untimely death when she abandons her safe tower to enter the world in search of the knight whose image she first discerns in her glass. Such may be the fate of the artist, the youthful Tennyson suggests. Later in his life, in poems such as "The Ancient Sage" and "Merlin and the Gleam," he adopts a more public stance, arguing that the poet is actually a prophet whose proper role is to discover truth and bring it to humankind.

As poet laureate for more than forty years, Tennyson was frequently asked by Queen Victoria and others to write celebratory verse, and some of his work is simply "occasional" writing: writing to commemorate events, such as the marriage of Queen Victoria's daughter to the czar of Russia. It would be wrong to dismiss all of his public writing as simply made-to-order work, however; "The Charge of the Light Brigade," prompted by gross errors of judgment in a bloody war of imperialism, aroused the indignation of the British public and helped lead to serious reforms in the military, and his "Ode on the Death of the Duke of Wellington" is one of the finest occasional pieces in the language.

Exceptionally well-read and always curious about discoveries in all fields of learning, Tennyson writes frequently of contemporary controversies. His works reflect the Victorians' ongoing struggle to reconcile the advances of science, especially those involving theories of evolution, with traditional religion. While his most significant artistic

work dealing with this subject is contained in the central lyrics of his great elegy *In Memoriam*, other works, especially the meditative monologue “Lucretius,” structure the debate between science and religion as a central theme.

A related issue concerning the advances of science is also central to Tennyson’s poetry: the value of material progress. Like many of his contemporaries, the poet was concerned with the effect of burgeoning industrialism on the quality of life for both the well-to-do and particularly the middle class and the poor. Many of his domestic idylls, narrative poems focusing on family life and often set in rural locales, explore the impact of scientific progress and advances in technology on the traditional lifestyles of farmers, laborers, and other rustics. The results are sometimes poems of exceptional pathos, such as “Dora,” “The Gardener’s Daughter,” or *Enoch Arden* (1864), though the latter poem deals more centrally with issues of love and faithfulness. On occasion, however, Tennyson employs bitter satire to evoke in his readers a sense of horror at the evils of creeping materialism: His scathing portrait of the petty master in “The Northern Farmer” poems, both written much later in his life, are good examples of this style.

In an age that still revered the formal qualities of poetry and gave great concern to consistency in meter, rhyme scheme, and adherence to supposed rules of composition, Tennyson stands as something of a rebel. He was a great experimenter in verse forms, often combining different rhyme schemes, line lengths, and styles within the same work. His early education had given him a sound foundation in the classics, and much of his poetry is filled with allusions to Greek and Latin literature. A strong admirer of Vergil, Tennyson often fills his work with the sense of melancholy characteristic of the great Latin poet’s work. Like his classical predecessors, Tennyson is a careful observer of nature, rendering it in meticulous descriptions that evoke the sensual qualities of the world that he sees. He is equally adept at portraying psychological states, however; poems such as *Maud* and “St. Simeon Stylites” rival the dramatic monologues of Robert Browning in their penetrating insight into the minds of characters whose psychological equilibrium is precariously balanced between sanity and madness.

A lifelong devotee of the Arthurian story, Tenny-

son uses the characters from this legend as subjects of numerous poems. From his early portrayals of idealists such as the maid Elaine (the heroine of his “The Lady of Shallott”) and the warrior Galahad (celebrated in “Sir Galahad”) to his full-length treatment of the legend in *Idylls of the King*, the poet explores the heroic qualities of knighthood. Tennyson reveals how the virtues espoused at Arthur’s medieval court are relevant to the complex society of the nineteenth century. The Arthurian poems also serve as a warning about what can happen when people abandon ideals for easy pleasures or material comforts—a problem that Tennyson saw all around him in his own society.

## IN MEMORIAM

**First published:** 1850

**Type of work:** Poem

*Tennyson explores his feeling of loss at the death of Arthur Henry Hallam and uses the occasion of Hallam’s death to explore other contemporary issues.*

*In Memoriam* is Tennyson’s elegiac tribute to his closest friend, Arthur Henry Hallam, who died suddenly in September, 1833. Hallam’s death dealt a particularly harsh blow to the poet. Almost immediately, Tennyson began attempting to capture his sense of loss and feelings of grief in brief lyrical sketches. He worked on these lyrics for seventeen years, revising and arranging them in a pattern that would give the disparate poems a central unity of purpose.

Tennyson’s work follows the traditional pattern of the elegy, first established by the Greeks and appropriated by English poets such as John Milton in “Lycidas” (1638) and Percy Bysshe Shelley in *Adonais: An Elegy on the Death of John Keats* (1821). There is a central figure who speaks in the first person to mourn the loss of a friend; feeling

that he has been left behind in a world that also is touched with this loss, the speaker examines his emotions and looks outside himself for solace. His examination of the world around him leads him to realize that, though gone, his friend is still with him in spirit; that realization gives the one who remains in the world some hope, usually for reunion in the afterlife.

Unusual among the great elegies in English, *In Memoriam* tells its story of loss and recovery through a series of interconnected lyrics, over 130 in all; each remains a self-contained unit, but the collection traces the feelings of a central character who experiences, in turn, grief, confusion, despair, personal resolution, and, finally, hope. Several critics have pointed out the similarities between Tennyson's elegy and William Shakespeare's sonnet sequence, which also carries forward a single story beneath the individual lyrics.

Though the poet employs a first-person voice in almost all the lyrics, the central speaker, or "I," of the poem should not automatically be identified with Tennyson himself. In various notes to his work, the poet cautions that he is sometimes using the speaker to represent all of humankind struggling to understand the sense of loss that has come upon it as a result of scientific discoveries that have shattered its faith in the afterlife. The speaker passes through several emotional stages: from grief and despair resulting from the immediacy and the immensity of his loss, through a period of doubt, to a state of hope based on his faith that there is a divine entity guiding humanity's destiny. The progress of the poet's feelings is marked by the three Christmas seasons celebrated in the work. During the first and second Christmases, the poet's feelings are scarred by his loss; during the third, however, he is able to rejoice in the realization that his friend, though vanished from the earth, awaits their reunion in heaven, where he has gone after fulfilling his role on earth. Hallam becomes for Tennyson a symbol of an idea that the poet and his contemporaries were slowly coming to accept and investigate: the idea of progress. By the end of his elegy, Tennyson is celebrating Hallam as the precursor of a new age that will be greater and more blessed for the world; Hallam, like Christ, is a harbinger of better times, and the poet is able to take solace in having been able to share his acquaintance and love.

The note of optimism in the final stanzas of the epilogue is reached only after the poet has agonized long over doubts about both his personal future and the future of the human race. A particularly poignant series of lyrics (ones often anthologized out of the context of the entire series) deals directly with the implications of new discoveries about evolution, and in them the speaker, comparing himself to "an infant, crying in the night," agonizes over the possibility that "nature, red in tooth and claw" is governed not by a beneficent deity but by senseless forces that serve no higher purpose.

The critic T. S. Eliot once observed that the greatness of *In Memoriam* lies not in its final message of hope, but in the quality of doubt that permeates the central lyrics. Nevertheless, the marriage that Tennyson describes in the epilogue is clearly intended to suggest the resiliency of humankind and the promise that life will continue, if not for individuals, then at least for the human race as a whole. Not only will life go on, Tennyson implies, but it will improve, and Hallam has been an early messenger of these better times. For this the poet is thankful, for he has been able to associate with one who symbolizes the great future that the world is to enjoy.

## IDYLLS OF THE KING

**First published:** 1859-1885

**Type of work:** Poem

*Tennyson recounts the rise and fall of the mythical King Arthur, showing how the ruler's high standards are embraced or rejected by his followers.*

*Idylls of the King* is the culmination of Tennyson's lifelong fascination with the Arthurian legend. At an early age, the poet became taken with the story of the king who had united his country and made a perfect society, only to see it fall into ruins because of the illicit affair between his queen and his greatest knight. In several poems written when he was young, Tennyson did what may be called character sketches of Arthurian figures: the Maid of Astolat, Galahad, Guinevere, and Lancelot. Shortly after the untimely death of his friend Arthur Hallam, he

composed a long narrative on the death of King Arthur; the poem was incorporated as the last of the twelve idylls that now constitute *Idylls of the King*.

*Idylls of the King* was published in parts between 1859 and 1885, so there has always been a question concerning the unity of the work: Should it be read as a consistent whole, considered a nineteenth century epic? Or is it a collection, in the vein of *In Memoriam*, in which individual poems suggest a thematic whole but are not intended to present a coherent story? Most critics have seen sufficient unity in the assemblage to judge that Tennyson intended his work to be taken as a single long poem, and that he consciously used various epic devices to suggest parallels with works such as Vergil's the *Aeneid* (c. 29-19 B.C.E., English translation, 1553). The blank verse line, the epic similes, and other devices of phrasing and description recall John Milton's *Paradise Lost* (1667, 1674), unquestionably the most ambitious epic in English.

From his own writings about the poem, as well as from internal evidence, it is clear that Tennyson intended *Idylls of the King* to be both a commentary on contemporary society and a kind of allegory about the human spirit warring against the fleshly side of humanity's nature. Arthur is described in the epilogue of the poem as a perfect Victorian gentleman—with clear parallels to Victoria's dead husband, Prince Albert, who is celebrated by name in the dedication to *Idylls of the King* added by Tennyson after the Albert's death in 1861. Throughout the Arthurian story, the poet celebrates Victorian virtues of fidelity to one's spouse—a concept not at all in keeping with the medieval concept of courtly love, wherein a knight might be in service to (and on occasion have an illicit affair with) a woman other than his wife. Further, *Idylls of the King* celebrates the importance of work over fame. In a revealing passage in the sixth idyll, "Merlin and Vivien," the aging magician, Merlin, tells the temptress that it is better to work than to seek glory, that one should revere those who perform the common duties of life. The theme is echoed by the king at

the end of the eighth idyll, "The Holy Grail." When only a few of his knights return from their quest for the cup that was supposedly used by Christ at the last supper, Arthur lectures them about the devastating impact that their vain pursuit has had on the kingdom. While they were away, many necessary chores were left unattended; the king excuses his own unwillingness to seek the Grail by noting that it has been his duty to remain at home governing the land, handling the everyday tasks that befit his position. Such an attitude would have been foreign to the medieval audiences that first heard tales of Arthur and his knights, but this sentiment would have struck a sympathetic chord with Victorian readers.

In the epilogue, Tennyson also describes his hero as "Ideal manhood closed in real man" and mentions that the poem is intended to show the struggle of "sense at war with soul." The highly allegorical nature of *Idylls of the King* may be best seen in the second section, "Gareth and Lynette," in which a young hero, imbued with the ideals that Arthur preaches, fights and defeats four challengers who represent (according to an explanation provided within the poem itself) the various stages of a person's life. The message is clear: Those who live by the high ideals that Arthur promotes will rise above even death itself. The fairy tale quality of "Gareth and Lynette" is not sustained, however, as one by one even the greatest knights and ladies fail to uphold these high standards. Some, such as the villainous Tristan, openly scoff at the King's naïveté; others, such as Lancelot and Guinevere, struggle to reconcile their commitment to those ideals with the very real, physical love that they feel for each other but that they know is wrong because it violates the moral code of the kingdom.

The central theme of the poem is that devotion to such high ideals is nearly impossible in a world beset with materialism. As critic James Kincaid notes in *Tennyson's Major Poems, the Comic and Ironic Patterns* (1975), no outside force causes the downfall of Arthur's perfect society; rather, it falls from within, collapsing because the knights and ladies of the realm are unable to abide by the king's ideals. Tennyson captures the tenuous nature of Arthur's experiment with utopian living in his image of the capital city of Camelot. Gareth, on his way to meet the king for the first time, meets Merlin outside the city and asks if the spires that he sees in the mist are those of

the king's capital. From them, he hears sweet music coming forth, and Merlin says that this is indeed Camelot, which is still being built: "the city is built/ To music," the seer remarks, "therefore never built at all,/ And therefore built for ever" ("Gareth and Lynette"). Like a musical composition, Arthur's kingdom relies on the harmony achieved when every player is working under the direction of a wise composer; when one chooses to play his or her own tune, the harmony is broken, and the music becomes discordant. That image, repeated throughout the remainder of the *Idylls of the King*, captures Tennyson's idea about society: Unless all work in concert with one another and follow high moral standards, civilization itself is doomed to fail.

## "ULYSSES"

**First published:** 1842 (collected in *Poems*, 1842)

**Type of work:** Poem

*The hero of Homer's the Odyssey, living the quiet life at home after his twenty-year sojourn away from Ithaca, vows to set out again to seek new adventures.*

"Ulysses" is ranked with several of Robert Browning's dramatic monologues as the best in the genre. Based on a passage in Dante's *La divina commedia* (c. 1320; *The Divine Comedy*, 1802), the poem depicts the hero of the Trojan Wars sometime after he has returned to his native land. Ironically, the man who had lived away from his beloved wife and son for ten years before the walls of Troy, and who had then wandered the Mediterranean for ten more as a result of a curse from the gods, is now displeased with the quiet life that he finds at home. The discomfort that Ulysses feels is emblematic of the dilemma that many of Tennyson's contemporaries faced: whether to live life quietly, fulfilling one's domestic duties, or to pursue some bold adventure. For Tennyson, the poem had personal significance as well: Written shortly after the death of his close friend Arthur Henry Hallam, it was the poet's attempt to answer the question of whether to try to make a new life or to continue to wallow in his sorrow.

If one reads the poem in light of Tennyson's personal comments, then the ending suggests a strong note of optimism. After convincing himself that he should not remain at home—his son, Telemachus, is more suited to rule a land where people have no aspirations for adventure—Ulysses summons a group of mariners to sail away with him to find new adventures. There is a recognized risk in such action: "It may be that the gulfs will wash us down," he warns them, but if he and his men are fortunate, they may "touch the Happy Isles,/ And see the great Achilles that we knew." Whatever they do, they will have the satisfaction of knowing that they have done their best in struggling against the elements (and old age) to make new reputations. The ringing final line, "To strive, to seek, to find, and not to yield," becomes a battle cry for all who need support in their endeavors to make a better life.

Unfortunately, such a glib reading is not fully supported by internal evidence. The mariners whom Ulysses summons are not the same ones that sailed with him before; those men were all lost before the king returned to Ithaca. Further, his call to sail toward the west, and his remark that they may be fortunate enough to land in the Happy Isles, both suggest that this is a voyage to death. Such a reading is supported by external evidence, namely the passage from Dante on which Tennyson bases his account. Like many narrators in dramatic monologues, Tennyson's Ulysses is not to be trusted fully. His is a seductive message, a call to adventure that simultaneously encourages a flight from responsibility. How one is to determine whether Ulysses is a hero or villain is never resolved, of course; this is attributable in part to the peculiar nature of the dramatic monologue form. Readers have no external reference point from which to judge the truthfulness or sincerity of Ulysses' statements. Only a careful analysis of the substance of his request—the message beneath the compelling rhetoric—suggests that he may be seeking to abandon his responsibilities and cloak his escape in the guise of seeking further glory. The enigma may well be intentional, considering Tennyson's lifelong preoccupation with characters who are psychologically complex. There are for Tennyson two sides to every issue, and commitment to one ideal may well result in abandonment of another, equally valid one. Such is the human condition as he sees it.

## “LOCKSLEY HALL”

**First published:** 1842 (collected in *Poems*, 1842)

**Type of work:** Poem

*A young man, rejected by his beloved for a more wealthy suitor, muses on the present state of society and has a vision of a different, better future.*

“Locksley Hall” is typical of Tennyson’s poetry, in that the pattern of the poem follows one characteristic of much of the poet’s work. A personal experience sparks Tennyson’s creative imagination, and he uses that incident as a springboard for investigating issues of greater social concern.

The biographical germ of the poem lies in Rosa Baring’s rejection of Tennyson as a suitor in 1837; the poet’s poor financial position made him unsuitable for her as a husband, and she rejected him in favor of a man of greater means. In “Locksley Hall,” Tennyson transforms his own disappointment and grief over this rejection into a bitter analysis of the society in which materialism takes precedence over love. The speaker of the poem, a young suitor whose beloved Amy leaves him to marry a boorish man of suitable financial means, rebukes both his beloved and her new husband. His maundering attack leads him to consider the world in which true love can be dismissed so lightly, and he eventually begins to daydream about a future in which people, driven by greed, will eventually clash in world war to satisfy their insatiable materialistic appetites. In passages that border on science fiction, Tennyson describes “airy navies” engaging in battle. There is a ray of hope, however; the speaker finally sees an end to nationalistic strife, and the formation of a “Parliament of man,” a worldwide federation that will eventually bring peace to warring nations. All of this is mere reverie, of course,

and in the final couplets the speaker turns away bitterly from Locksley Hall, the place where he wooed his Amy unsuccessfully, and goes off to wander the world in an attempt to suffuse his bitterness.

Written in trochaic couplets, “Locksley Hall” is an excellent example of Tennyson’s ability to sustain a complicated meter and rhyme scheme. Some critics have complained, however, that the jingling nature of the meter works against the serious message of the poem, the speaker’s indictment of modern society. Like the best of Tennyson’s poetry, “Locksley Hall” contains phrases of vivid description and lines that capture the mood of the speaker in such a way as to give his personal feelings a universal significance. The Byronic qualities of the hero of this poem, his brooding over his fate in life, and his somber portrait of the future (even when tempered by his final vision of a world at peace) suggest the darker side of Tennyson’s personality; the poet seems fascinated by characters whose life experiences drive them to the brink of madness as they face frustration and disappointment in a world where money has supplanted love as the highest of human aspirations.

### SUMMARY

Alfred, Lord Tennyson’s immense popularity among his contemporaries was a contributing cause to his decline in critical esteem during the first half of the twentieth century, when the reaction against Victorianism reached its height. Following the sympathetic judgment of mid-century critics, such as the poet’s grandson Sir Charles Tennyson and noted Victorianist Jerome H. Buckley, more recent scholars have rekindled interest in Tennyson’s works and have ranked his best poems—works such as “Ulysses,” “Tithonus,” *In Memoriam*, and *Idylls of the King*—among the finest in the language.

## WILLIAM MAKEPEACE THACKERAY

**Born:** Calcutta, India

July 18, 1811

**Died:** London, England

December 24, 1863

*More than any other writer of the nineteenth century, Thackeray presented a social history of Victorian England; *Vanity Fair* is considered to be the greatest English novel of that period.*

### BIOGRAPHY

William Makepeace Thackeray (THAK-uh-ree) was born in Calcutta, India, on July 18, 1811, the son of Richmond Makepeace Thackeray, a collector for the East India Company, and Anne Becher Thackeray, whose ancestry could be traced back to a sixteenth century sheriff of London. His pampered life changed drastically when, after his father's death, Thackeray was sent to live with relatives in England to attend schools in South Hampton and Chiswick. His mother remained in Calcutta, married again, and did not join her son in England for four more years. This period of separation deeply affected Thackeray throughout the rest of his life.

In 1822, Thackeray continued his education at Charterhouse, a London public school. He was unhappy there and made little progress, for Charterhouse also proved to be a brutal place for the nearsighted boy who was poor at games. Thus, Thackeray's hatred of public schools and his critical view of a classical education were formed; later in life, this hostility softened somewhat. Charterhouse is featured in his writings, most notably as Grey Friars in *The Newcomes: Memoirs of a Most Respectable Family* (1853-1855).

Thackeray entered Trinity College, Cambridge, in 1829, but left only one year later to visit France. From Paris, he traveled to Germany; his happy tour there is reflected in the Pumpnickel chapters of

*Vanity Fair: A Novel Without a Hero* (1847-1848). In Weimar, he met Germany's leading man of letters, Johann Wolfgang von Goethe.

Back in London, Thackeray's literary career began with his ownership of *The National Standard*, a weekly literary periodical. He was soon forced to abandon this project for financial reasons, partly because of poor investments and partly because of his compulsive gambling. He had, however, gained a modest entrance to London's literary world and had cultivated friendships with the poets Alfred, Lord Tennyson and Edward FitzGerald.

While at Charterhouse, Thackeray had become interested in what were to become lifelong passions—drawing and painting. With the failure of *The National Standard*, and with most of his inheritance gone, he decided to pursue these interests and went to Paris to study art. This venture proved to be unsuccessful, and to make ends meet, he became a Paris correspondent for *The Constitutional*. Thackeray met and married Isabella Shawe in 1836. The following year, when *The Constitutional* failed, the Thackerays returned to London, where three daughters, Anne, Jane (who died in infancy), and Harriet, were born.

Faced with the responsibility of providing for his family, Thackeray turned full time to professional journalism, contributing to *The Times*, *The Foreign Quarterly Review*, and *The Morning Chronicle*. His work went unsigned or was written under such pen names as Michael Angelo Titmarsh and George Fitz-Boodle.

The next few years proved to be important ones for Thackeray. In 1840, his wife went insane and required institutionalization. Parental responsibility for his daughters was assumed by Thackeray's parents, which enabled him to pursue his writing in earnest. His most significant writings at this time appeared in *Frazer's Magazine* and *Punch*. Thackeray first caught the public's eye as one of the "Fraserians" (critics of Victorian hypocrisy and pretension) with "The Yellowplush Papers," a review of a foolish book of etiquette. This Fraserian approach is also apparent in Thackeray's short novel *Catherine: A Story* (1839-1840). Set in the eighteenth century, this tale of a murderess is based upon an actual event. It is a satirical attack upon the Newgate School of novelists, who glorified the lives of criminals. *Catherine* is an important work in Thackeray's career, for it marks the beginning of his fascination with the artificial life of that period. His first full-length novel, *The Luck of Barry Lyndon: A Romance of the Last Century* (1844), also had a romanticized criminal as a hero.

Literary success came slowly to Thackeray. *The Irish Sketch Book* (1843), an entertaining personal record of a stay in Ireland, bears his signature for the first time. The "Snob Papers," issued in *Punch*, finally brought him fame. In January, 1844, *Vanity Fair*, with illustrations by the author, began to appear in monthly installments, and Thackeray had taken his place alongside other well-respected writers of the period.

Thackeray's greatest distinction was as a novelist, but he was also an essayist and lecturer. In 1851, he began lecturing on "The English Humourists," traveling the following year to the United States, where he was a great success. *The History of Henry Esmond, Esquire, a Colonel in the Service of Her Majesty Q. Anne* (hereinafter referred to as *Henry Esmond*), was published in three volumes in 1852 and revealed his style at its perfection—less powerful than *Vanity Fair*, but much more compassionate. In it, the author's long, platonic affair with Jane Brookfield is reproduced. *The Newcomes* was published in 1853-1855, and a second lecture tour of the United States soon followed. This time Thackeray spoke on the "Four Georges," an indictment of the House of Hanover.

After his second American tour, Thackeray published *The Virginians: A Tale of the Last Century* (1857-1859). He became the editor of *Cornhill Mag-*

*azine* in 1860 and served as such until poor health forced him to retire in 1862. His last novel, *Denis Duval*, though unfinished, appeared in *Cornhill Magazine* in 1864. Thackeray died on December 24, 1863, in London and is buried in Kensal Green Cemetery.

## ANALYSIS

Thackeray's literary significance lies in his contribution to the development of the novel. His reflections upon Victorian England through the use of an intrusive narrator became a new form of fiction, and his sprawling panoramas of eighteenth century England give the reader a psychological treatise of the times. The slow, satiric revelation of his characters and the realistic analysis of topics that other Victorian writers avoided, told in the form of a memoir by a witty, caustic observer, laid the groundwork for the psychological realism of Henry James; Thackeray's experiments with the generational form presaged the works of John Galsworthy.

Thackeray's writing can be divided into four distinct periods. The first, from 1837 to 1843, was a period in which he exercised an almost passionate vigor to point out where society had gone wrong. He places himself outside his writing through his superior attitude toward his characters, lower-class subjects whom he treats in the most disparaging manner conceivable. There is a glimmer of the Thackeray yet to come when he shifts his focus to the middle class, and when, in *The History of Samuel Titmarsh and the Great Hoggarty Diamond* (1841; later published as *The Great Hoggarty Diamond*, 1848), he presents the likable Sam Titmarsh. Thackeray cast himself as Titmarsh, thereby indicating his concern about class. This concern was to dominate his writing.

Thackeray was unsure about his own place in the rigid English social system. He thus adopted a jauntily unpretentious persona in his social fictions. He developed a talent for the burlesque and began to attack other writers, ridiculing military adventure novels, satirically attacking the Newgate School, and portraying his fascination with the Europe of that time.

The years 1843 to 1848 marked a significant change in Thackeray's development as a writer. His personal involvement in his works became more apparent, and his association with *Punch* height-

ened his understanding of society's injustices. During this period, Thackeray wrote a series of short stories, *Men's Wives* (1843), that illustrate his misgivings about women and marriage. Along these same lines, he wrote several other pieces. One of particular note, "Bluebeard's Ghost," is the tale of a young widow's devotion to her dead partner; in it, Thackeray's love for Jane Brookfield and his jealousy of her fidelity to her husband are clear. The opulence of the eighteenth century, the lives of rogues, the education of gentlemen, and the presence of doting mothers blend in his best work of these middle years, *The Luck of Barry Lyndon*. Although the theme of the novel is social pretension, it is also a deliberate spoof of popular historical, crime, and romantic novels. *The Snobs of England, by One of Themselves* (1846-1874; later published as *The Book of Snobs*, 1848, 1852) is Thackeray's classic assault on pretentiousness. His message is that the remedy for social ills is social equality.

Thackeray's first great novel, *Vanity Fair*, marks the beginning of his literary acclaim. The title, taken from John Bunyan's *The Pilgrim's Progress* (1678, 1684), and Thackeray's preface reveal the moral purpose behind his satire.

*The History of Pendennis: His Fortunes and Misfortunes, His Friends and His Greatest Enemy* (1848-1850) is an important book in any study of Thackeray's technique, as it presents the background for the persona who was to narrate *The Newcomes* and as it shows Thackeray's struggles with Victorian priggishness. In both *The History of Pendennis* and *The Newcomes*, Thackeray's satirical edge had disappeared. His retreat from satire was quite deliberate; he wanted to appeal instead to the hearts and souls of his reading public. In subject matter the two novels are similar: Each concerns the styles and conventions that separate people from one another. *The Newcomes*, however, illustrates better than *The History of Pendennis* the discursive style that Thackeray adopted in all of his novels—the roundabout manner of narration, the slipping back and forth in time, and the interpolations.

In 1852, Thackeray published what he considered to be his best piece of writing, *Henry Esmond*. The novel may be read on many levels—as a historical fiction, as a novel of manners, and as a romance. *The Virginians* continues the story with Henry Esmond's grandsons, who are born in America. Of all Thackeray's novels, it is the least successful. In it,

Thackeray's eighteenth century scenario has lost its appeal: The courtliness, brawling, drinking, and gambling are seen as tedious even by its chronicler. Thackeray was sick of writing novels, and he admits to this in book 1, chapter 18.

Thackeray's writings constitute a vast imaginative enterprise. For the first time, his panoramic realism gave readers of English literature a sense of living in a distinct yet diverse world. His works offer page after page of sometimes caustic, sometimes playful, sometimes serious, sometimes contemplative, and sometimes hasty observations, all written in his brilliant but seemingly discursive, careless manner, which has come to be known as Thackerayan.

## VANITY FAIR

**First published:** 1847-1848

**Type of work:** Novel

*Becky Sharp ambitiously climbs her way to wealth and social position.*

*Vanity Fair: A Novel Without a Hero* is Thackeray's best-known work, and it established his reputation as a master of social satire. The title is taken from Bunyan's *The Pilgrim's Progress*, and it is, as Thackeray reveals in the preface, in the same manner a frankly moralistic novel. Posing as the Manager of the Performance, he reminds his readers to avoid simply passing through the emblematic *Vanity Fair* and to experience it in a "contemplative, not uncharitable frame of mind," for everyone, including the author, is a part of the fair.

Thackeray's intrusive comments serve the purpose of distancing the reader from the characters, thereby forcing the reader to judge not only the "puppets" but also himself or herself. Thus, the reader cannot feel simple approval or disapproval for any of the main figures, least of all for Becky Sharp, the best character that Thackeray ever created. Indeed, Becky is clever, underprivileged, and courageous; she is also heartless, selfish, and amoral. She takes advantage of the gentle nature of her school friend Amelia Sedley and literally stalks Amelia's brother Jos as a husband who could give her wealth and social position. In characteristic Thackerayan style, Becky's plans are foiled through no fault of her own, and Jos returns to India still a

bachelor. Thus, the vicissitudes of life, over which Thackeray's characters have no control, sustain the story and propel Becky into one adventure after another.

Forced to earn an income, Becky takes a position as a governess for the household of Sir Pit Crawley. At Queen's Crawley, Thackeray begins to introduce the crowd of minor figures that populates the novel and whose purpose it is to authenticate the sprawling, wandering plot and emphasize the profuse and disorganized world in which both the characters and the readers live. The best example of these minor characters occurs in chapter 47 with the Gaunt family, which is given a history; Thackeray even describes Gaunt Square, with its statue of Lord Gaunt.

In Becky and her quest to gain entry into the rich and pretentious life of the upper class, Thackeray expresses his resentment against English society. Becky makes fools of the pretentiously proud Crawleys and triumphs over the aristocratic Bareacres. Her adulterous affair with Lord Steyne and her murder of Jos Sedley (if she is indeed guilty) are far less damning in the reader's eyes than her lack of motherly love. That same motherly love is Amelia Sedley's only virtue. Other than that, Amelia is absolutely vapid. Her self-indulgent devotion to her dead husband's (George Osbourne's)

memory and her unworthy attitude toward Captain William Dobbin are irritating. That Thackeray focuses upon Amelia's motherly love, however, suggests Thackeray's childhood and his separation from his mother at such an early age and reveals the systematic thought that underlies all of his works.

In the end, Becky is reunited with the unsuspecting Jos, and although

she cannot obtain a divorce from Rawdon Crawley, they live as man and wife. Upon Jos's suspicious death, Becky receives a considerable insurance payment and spends the rest of her life as a virtuous widow with a reputation for benevolence and generosity.

If, then, everyone is a part of the vanity fair, to condemn Becky or any of the other characters is to condemn oneself. As the puppets are put back in the box, Thackeray suggests that the best that can be expected is to possess charity toward others and to care for others as one cares for oneself. Otherwise, all is vanity.

## THE HISTORY OF HENRY ESMOND, ESQUIRE

**First published:** 1852

**Type of work:** Novel

*Amid historical events of the late seventeenth and early eighteenth centuries, a man struggles with his love of two women.*

*The History of Henry Esmond, Esquire, a Colonel in the Service of Her Majesty Q. Anne*, is the book that Thackeray considered to be his best piece of writing. Set in the late seventeenth and early eighteenth centuries, it presents history as Thackeray thought it should be presented. That Thackeray did not have a high opinion of the historians of his time precludes the blend of fact and fiction in this gentleman's memoir. Henry Esmond tells his own story, which is meant to be the hero's autobiography. Thackeray's blend of the relationships of private manners and historical events is characteristic of most of his other works, and the false pathos of the artificial, self-imagined hero collapses when everything is viewed from the porch of everyday life.

Henry Esmond grew up at Castlewood under the guardianship of Thomas Esmond, Viscount Castlewood. Henry was aware of some mystery concerning his birth, and he vaguely remembered living as a very young child with weavers who spoke a language other than English. When the viscount met his death at the battle of the Boyne, young Henry was cared for by his new guardians and distant cousins, Francis and Rachel Esmond, and their children, Beatrix and Frank. Thus begins the major thematic integration of the novel: Henry's love of two women, of Rachel, the loveliest woman he had ever seen, and of Beatrix, her daughter, for whom his courtship becomes almost tedious to the reader.

*Henry Esmond* reflects a very personal part of

Thackeray's own life. His wife, Isabella, was institutionalized for insanity in 1840, leaving him bereft of a family life, something that was very important to Thackeray. As a result of this, he became enamored of the already married Jane Brookfield, but this relationship became a drawn-out platonic affair. While he was writing *Henry Esmond*, Thackeray's love for her came to a sad crisis in September, 1851. His letters of the time indicate his painful feelings during this period,

which greatly affected the tone of this "grave and sad" book.

*Henry Esmond* introduces Thackeray's readers to yet another Victorian fantasy world, much as *Vanity Fair* had done. First, the sexual theme begins when Henry, twelve years old, sees Rachel for the first time. He loves her as a son would, and he identifies her as his surrogate mother. As time passes, the relative ages of son and mother are reversed, and Henry becomes her "tutor"; he appears to be "older" than her, and by book 3, chapter 4, he feels as if he is her "grandfather." Thus, when Henry's love for Beatrix, who is one of the most fascinating women in all of English literature, is dead at last, the reader should not be surprised when Henry at thirty-five, marries Rachel, who is forty-three and, the reader is assured, looks younger than her own daughter.

There is something obviously Oedipal in this relationship, and Thackeray's almost reverential worship of his mother comes to the surface in *Henry Esmond*. Critics and his reading public alike were

quick to sense something was amiss, and charges of incest were levied at the protagonist, Henry Esmond.

The second theme of the story is also a fantasy. When Henry discovers that he is the real Lord Castlewood, the legitimate son of the viscount, he, out of consideration for Rachel, conceals his identity so that she and her children will not be disinherited. When the truth is finally revealed, the aristocrats who have slighted him do him homage. Even Beatrix, previously scornful of the humble Esmond's courtship, repents and considers it an honor to know him.

*Henry Esmond* represents, then, the culmination of middle-class wish fulfillment. Its hero is nobler than the nobles, yet he of his own volition remains a commoner. At the end, Esmond immigrates to America, thus rejecting the institutions of the aristocracy.

## SUMMARY

Although William Makepeace Thackeray is sometimes overshadowed by his contemporaries Charles Dickens and George Eliot, his works are essential in the history of the English novel. He is the master of a slow, expository style that, for range of effect, has seldom been equaled in English. His development of the intrusive narrator and his caustic realism greatly influenced writers of later generations, especially the psychological realists.

Born between that period of notable change from the Regency to the Victorian era, Thackeray composed historical pictures that provide a social history of that time. *Vanity Fair* remains his best novel, but his collected works are necessary reading for anyone who wants to understand Victorian England.

Lela Phillips

## BIBLIOGRAPHY

### By the Author

#### LONG FICTION:

*Catherine: A Story, 1839-1840* (as Ikey Solomons, Jr.)

*The History of Samuel Titmarsh and the Great Hoggarty Diamond, 1841* (later as *The Great Hoggarty Diamond, 1848*)

*The Luck of Barry Lyndon: A Romance of the Last Century, 1844* (commonly known as *Barry Lyndon*)

*Vanity Fair: A Novel Without a Hero, 1847-1848*

*The History of Pendennis: His Fortunes and Misfortunes, His Friends and His Greatest Enemy, 1848-1850*

*The History of Henry Esmond, Esquire, a Colonel in the Service of Her Majesty Q. Anne*, 1852 (3 volumes)

*The Newcomes: Memoirs of a Most Respectable Family*, 1853-1855

*The Virginians: A Tale of the Last Century*, 1857-1859

*Lovel the Widower*, 1860

*The Adventures of Philip on His Way Through the World,  
Shewing Who Robbed Him, Who Helped Him, and  
Who Passed Him By*, 1861-1862

*Denis Duval*, 1864

*Rebecca and Rowena: A Romance upon Romance*, 1850  
(as M. A. Titmarsh)

SHORT FICTION:

*The Yellowplush Papers*, 1837-1838

*Some Passages in the Life of Major Gahagan*, 1838-1839

*Notes of a Journey from Cornhill to Grand Cairo, by Way of Lisbon, Athens, Constantinople and Jerusalem, Performed in  
the Steamers of the Penninsular and Oriental Company*, 1846

## DISCUSSION TOPICS

- William Makepeace Thackeray wrote much about snobbery. Was he a snob himself, particularly with reference to his early fiction?
- Two bildungsromans, Thackeray's *The History of Pendennis* and Charles Dickens's *David Copperfield* (1849-1850), appeared serially at the same time. In what ways does Thackeray's novel fall short of Dickens's?
- Was Thackeray more interested in the eighteenth century than in his own century?
- What did Thackeray mean by calling *Vanity Fair* "a novel without a hero"?
- Does *Vanity Fair* have two heroines, Amelia and Becky?
- Was Henry Esmond Thackeray's ideal gentleman?

## DYLAN THOMAS

**Born:** Swansea, Wales

October 27, 1914

**Died:** New York, New York

November 9, 1953

*Thomas is the supreme Romantic lyricist of the English language in the twentieth century, whose love of words and their musical strength gives his poetry a rhythmic power rarely equaled in the history of literature.*

### BIOGRAPHY

Dylan Marlais Thomas was born on October 27, 1914, in the small port city of Swansea, on the South Wales coast across the Bristol Channel from Devonshire. His father, David John Thomas, was a frustrated intellectual who resented the position that he held as a local schoolmaster, which he believed was incompatible with the life of a cultivated literary gentleman. His mother, Florence Williams Thomas, was a deacon's daughter. She had no interest in literature, but she was extremely devoted to her second child, Dylan. The family lived in a relatively genteel neighborhood when Thomas was born, near the hills and rolling farm country that he was to celebrate in poems such as "Fern Hill" and "Poem in October," and within sight of the horseshoe-shaped coastline that rimmed the sea below the house. Although Thomas often felt the lure of London while living in Wales, the cultural ethos of west Wales remained one of his most important points of reference and sources of inspiration. The lyrical flow of talk in the pubs, the singing in the streets and churches, the cadences of Bible-drawn sermons spoken by local ministers who were often relatives, the feel of the rainy weather, and the look of the land all contributed to his formation as a poet.

David Thomas was determinedly agnostic, but

he often recited the Bible to his son in infancy and read him to sleep with selections from the great tradition of English literature: William Shakespeare, the Romantic poets, as well as the contemporary controversial novelist D. H. Lawrence. From the start, Thomas was relatively indifferent to all forms of public education, preferring to browse in his father's extensive library, while behaving in a prankish, mischievous fashion in class. Already verbally precocious (he saw himself as a boy who "swallowed a dictionary"), he was sent to a private school and then to the local grammar school where his father was employed.

His first poems appeared in the grammar school magazine in 1925. By 1928, he was the editor of the magazine and had begun to compile a poetry notebook that would contain in completed or rough form more than two hundred poems by 1933. As he began to think of himself as a poet, his schoolwork deteriorated to the point that he totally failed all of his Central Welsh Board examinations and left school in 1931 to take a job with the *South Wales Daily Post* as a kind of roving reporter and general gadfly. He spent a considerable amount of time with older journalists in pubs and was introduced to the drink-drenched cultural milieu that formed the center of his social life for the remainder of his years. In 1932, he became involved with the Swansea Little Theatre as an actor and writer, and by 1933, when he left the newspaper, he was living in a style that he would essentially maintain for the rest of his life. He effectively removed any impediment to his writing, including any kind of commitment

to earning a living, putting himself in the position of supplicant, which he developed into a personal skill of considerable refinement.

Thomas's disinclination to adopt "regular" hours of steady employment was as much an attempt to reserve all of his energy for writing as it was an attempt to avoid the boredom of routine and responsibility. "And Death Shall Have No Dominion" was published in the *New English Weekly* in May, 1933, his first poem to appear outside Wales, and by August of that year, he had finished twelve of the ninety poems that would eventually appear in his *Collected Poems, 1934-1952* (1952). He moved into a flat in London in November, 1934, with two friends from Wales, and the next month his first book of poetry, *Eighteen Poems* (1934), was published jointly by the *Sunday Referee* magazine and the Parton Bookshop. It was followed by *Twenty-five Poems* in 1936, the year that he met Caitlin Macnamara, whom he married in July, 1937. Dylan and Caitlin lived with friends and relatives in England or Wales, or in their own apartment until funds ran out, their marriage turbulent and tempestuous from the start, their life together "raw, red bleeding meat," in Caitlin's words.

Thomas's second book had received favorable reviews, which helped to alleviate their financial difficulties. Thomas had also begun to deliver readings and broadcasts on the British Broadcasting Corporation (BBC), but no matter how much money was available from royalties, readings, or commissions, splurges, gifts to friends, and general carelessness placed Dylan and Caitlin in perpetual financial distress. Thomas spent most of the years during World War II traveling between London and Wales, writing scripts for the BBC and working on projects for Strand Films, eventually contributing to sixteen scripts. As the war drew to a close, Thomas and his family spent time in Blaen Cwm and New Quay, concentrating on his poetry. In a burst of poetic energy, Thomas completed "Poem in October," "Fern Hill," and "In My Craft or Sullen Art," among more than a dozen of his collected poems, his last period of relatively rapid production. Many of these appeared in *Deaths and Entrances* (1946), and James Laughlin's New Directions Press issued *Selected Writings of Dylan Thomas* (1946) in the United States later in the year.

Through the efforts of friends and patrons, Thomas was awarded a £150 traveling scholarship

from the Society of Authors, and he and his family spent some time in Italy, where he was limited in his socializing by the language barrier but succeeded in writing "In Country Sleep" in Florence. He completed three film scripts in 1948 and earned more than £2,400 that year, but he had never filed a tax return and found himself in a kind of perpetual debt to the Inland Revenue for the remainder of his life. Because he could count on greater earnings from his prose work, he tended to devote more time to it, and, consequently, his poetic production drastically slowed down. Since he had to spend a great deal of time on each work, he would produce only a few more poems, although these included "Poem on His Birthday" and "In the White Giant's Thigh," as well as his great villanelle "Do Not Go Gentle into That Good Night," written in 1951 in loving tribute to his dying father.

In the hope of overcoming his financial difficulties, Thomas made his first of four trips to America in 1950. His exhausting tour of the United States spawned the legend of the wild, bawdy, drunken, raving, romantic delinquent, which made him a celebrity and eventually resulted in what Donald Hall calls "public suicide." Between tours, he began *Under Milk Wood: A Play for Voices* (1953, public reading; 1954, radio play; 1956, stage play; pb. 1954), saw his *Collected Poems, 1934-1952* published to exceptional reviews, and continued his contentious relationship with Caitlin. In 1953, his body finally succumbed to years of abuse, and he died in a hospital in New York on November 9.

## ANALYSIS

In an unusually candid letter to a student who asked him how he was drawn to the "craft or sullen art" of poetry, Thomas emphasized the allure of words themselves—the "shape and shade and size and noise of words as they hummed, strummed, jiggled and galloped along." Hall has called him "the maddest of word-mad young poets" and describes Thomas beginning a poem from some general idea, sense of place, or pantheistic thought and then building the poem through the sounds of words gradually arranged in the manner that satisfied his ear, as well as some deeper instinct for melody and rhythm. Caitlin Thomas recalls him struggling with single lines in his bicycle shed/studio, "balancing words, line and phrases . . . and he always did this noisily and alone in his shed, chanting

and reciting, making each sound fit."

Because of his ability to write poetry that seemed drenched in word-drunk wonder, some critics have asserted that there is no substance behind the "great lyrical voice of his time." Charles Olson, whose own work depended on a tremendous concentration of mental force, commented, "He is all language, there is no man there." Olson's critique indicates the pitfalls of depending on a sensuous linguistic surface, but, although Thomas does not always succeed in going deeper, his methods of composition depended on more than the magic of words alone. In a letter that he wrote to Pamela Hansford Johnson when he was beginning to take command of the singular voice that he possessed, he suggested that a writer worked either "'out of words' or 'in the *direction* of them,'" as if the word was the source of the idea in the poem. In a review written in 1935, he insisted that "the word is the object," not a symbol or sign of it, and even if he complained that he was "chained by syllables," he believed that both meaning and sound are bound within language, and that it was through his uses of language that human experience could be brought into poetry. While he was not always successful in capturing the "singing light"—the song and insight interlinked—his best poems combine a mastery of sound with his meditations on the central concerns of his life.

One of the most striking features of Thomas's poetry is the absence of any indication that it was written (with the exception of a few topical references) in the twentieth century. Even as Thomas took the ultimate Romantic position that his subject was himself, demanding "Man be my metaphor" and always basing his sense of the human on the "small, bone-bound island" at the center of his own universe, his treatment of the main themes of his art reached back toward some almost prehistoric, semimythic sense of universal human experience. Consequently, when he wrote about his awestruck, ecstatic delight in the presence of the infinitely appealing natural world, his perspective was similar to the rhapsodic declarations of an explorer encountering a garden of paradise. The Edenic aspects of the Welsh landscape in "Fern Hill" and "Poem in October" attest to this. Similarly, when he wrote about death as an inevitable presence in the midst of even the most youthful, vital moments of a person's existence, his poetry was

less a function of a morbid preoccupation and more a reflection of the same ardor that activated his love for language, the natural world, and other things that he appreciated with passion. The poems "Do Not Go Gentle into That Good Night" and "And Death Shall Have No Dominion" are expressions of his inclination to sing "like the sea" even while enchained by the inexorable passage of Time; they indicate his desire to overcome what John Tytell calls "the anguish of mutability" brought on by an awareness of Time's constant measure, to which he referred as a "running grave" always with him. The tremendous energy in poems like these, or in "The Force That Through the Green Fuse Drives the Flower," is a product of both dynamic rhythmic arrangements and Thomas's feeling that life is yet more sacred because of the inevitability of death. This kind of poem seems to have originated from a perspective prior to or beyond the era of technology.

The extreme body-consciousness and sensuality of Thomas's poetry also attest to a primal condition of apprehension. In the taut lyric "Twenty-four Years," his language bristles with the imagery of the skin, his life described as a "sensual strut," his course illuminated by the "meat-eating sun," his entrance into the world depicted as from "the groin of the natural doorway." In a letter to Johnson, Thomas wrote that what she called ugly was "nothing but the strong stressing of the physical," and that his images were drawn from "my solid and fluid world of flesh and blood." He praises John Donne's description of man as "earth of the earth" and insists that "all thoughts and actions emanate from the body." His eventual disregard for the welfare of his own body may have been as much a rebellion against limits as it was an example of wanton desecration, with his frequent references to sexual matters another illustration of an interest in the fundamental facts of human biological imperatives.

The conjunction in Thomas's poetry of what Tytell calls "dense pockets of enigmatic surrealistic imagery" wrought from "a chaotic cauldron of language" with the great human themes of Time, Death, Nature, and the skin frequently resulted in some poetic confusion. Early reviewers complained about "chaotic rhetoric" and "remarkable ineptness of technique." While some poems undoubtedly suffer from what Cid Corman calls "rid-

dled meanings compiled in stubborn binding rhythms," it is important to recognize that the obscurity was not intentional or the product of carelessness or lack of craft. Many students have noted the evidence of the numerous work sheets that demonstrate Thomas's exhausting practice of writing a line again and again, revising and adjusting until he got what he wanted. Some poems took many months, gradually growing by a line or two added in a four-hour work session. In addition, Thomas was somewhat suspicious of what he thought of as free verse and employed both orthodox metrical patterns and a system based on syllabic count but independent of a regular stress pattern. No single system worked for him, and he eventually used what Daniel Jones calls "cadenced verse," which generally featured an alternation of weak and strong stresses, but which is much more elaborate in its juxtapositions of full rhymes, half rhymes, assonances, and alliterations.

While Thomas ultimately depended on the intricate, sensitive system of his own ear-mind-heart to create the singular, distinctive rhythmic arrangements of his best work, the various designs with which he experimented provided a point of departure, or a means of entrance, and they are a testament to his familiarity with, and dedication to, the complexity of measure in its largest sense. The strongest poems justify their form by their effectiveness and singularity; the less successful ones slide toward unintelligibility or call attention to their cleverness without transcending it. Nonetheless, in almost all of his work, Thomas's total commitment to poetry—his awareness of its possibilities, his passion for its substance—remains undeniable.

### **"THE FORCE THAT THROUGH THE GREEN FUSE DRIVES THE FLOWER"**

**First published:** 1933 (collected in *Eighteen Poems*, 1934)

**Type of work:** Poem

*The poet expresses his awe before the energizing forces of the cosmos and considers the interconnections between life and death.*

Although Thomas was not especially eager to look back on the poems of his youth, "The Force That Through the Green Fuse Drives the Flower" was one of which he remained reasonably fond in later years. It was written in a burst of creative energy when Thomas was nineteen, possibly precipitated by the knowledge that his father had cancer and might not survive. The intensity of his feelings are captured by the propulsive power of the first line, which establishes a link between the awesome natural forces of the universe and the poetic consciousness of the young man who felt that his creative instincts were fired by the wonders of the world around him. When he declares that "the force"—a mystic surge of energy that animates and destroys—is the source of both the "green age" in which his youth glows with promise and the "wintry fever" that bends the "crooked rose," he has drawn the terms of the paradox that was to haunt him throughout his life. Even in the presence of life at its most vibrant, Thomas detected the signs of death, and the language that he uses in the poem is both destructive (dried streams, rotted roots) and fructuous (a mouth sucking life, pulsing red blood), joining the joys of passion with an anticipation of its eventual dispersal. The poet recognizes the immediacy of a moment of excitement and the realization that everything is temporary as "time has ticked a heaven round the stars."

The poem is particularly effective because both the passionate excitement and the premonition of extinction are powerfully evoked. The overwhelming rhythmic figure of the first line, typical of Thomas's ability to fashion a striking start almost impossible to extend or expand, conveys the feeling of uncontrollable motion engulfing and overpowering resistance. The poet has no choice but to

submit and takes a fierce delight in his participation. Each stanza begins with a figure for this force, the third suggesting the “hand” of God, the fourth suggesting an incarnation of eternal progression. Then, the images of oblivion crowd the poet, undermining his exultation in the latent energy of the “green fuse,” Thomas’s symbol for the earth/womb at the heart of creation. Blood turns to wax, the wind stirs a shroud, the clay (body) of the poet anticipates its eventual decay. The result of the juxtaposition of the dynamic and the arresting leads to a confusion that Thomas describes as an inability to say or speak (“And I am dumb”), an additional aspect of the paradox since the protestation of dumbness occurs in the poem to declare its condition. In response to the poet’s proclamation of his difficulties in finding a language to describe the process of deterioration—an understandable situation since he directly experiences the life-giving component of the force but can only imagine its shattering side—a metaphysical tableau develops in the fourth stanza, which seems to suggest that some version of “Love” will ameliorate the effects of time’s passage.

Since the poem is an investigation of the poet’s involvement with the mysteries of existence, the language that engages these forces is more important than an explanation of their origins. The deft use of sound for emphasis, from the alliteration and repetition in the first line to the use of slant rhyme (sucks/wax/rocks; head/blood; sores/stars; womb/worm) to the rhythmic pulsation produced by the summary phrase, “And I,” is evidence of Thomas’s ability to make poetry that is intensely alive on the tongue and true to the emotional energy that drew it forth.

### “TWENTY-FOUR YEARS”

**First published:** 1938 (collected in *Selected Poems, 1934-1952*, 2003)

**Type of work:** Poem

*The poet contemplates the inevitability of death and sets against it the eternal power of art, which animates his existence.*

Because of his almost obsessive preoccupation with death, each birthday was a milestone that

called for a celebration, and on several occasions Thomas composed a poem that expresses his sense of where he stood as a man and an artist. “Twenty-four Years” is his earliest significant version of this celebratory mode, and it is full of both the exuberance of early manhood and his already familiar feeling that death was imminent. As Paul Ferris describes it, the poem is like an abrupt telegram in which a density of texture leads to a compactness that makes each line and image bristle with evocative power. The pattern of the poem is based on the oppositional tension that Thomas believed made a poem noteworthy, and the intermixture of life-enhancing and death-haunted declarations generates the tremendous energy that drives the poem (and the poet) on a journey toward “forever.”

The first two lines are self-enclosed assertions of the poet’s condition at the moment of creation. Thomas summarizes his life initially by epitomizing its somber qualities and stresses their importance by citing them as a constant source of sadness. Next, struggling to control his fears, he inserts as a chorus/comment the injunction to “bury the dead” so that their shade will not overwhelm everything else. There is a biblical echo in the second line as well, a suggestion that the prospect of death requires sympathy and compassion for a common human dread. Then, in a dynamic reversal of tone, Thomas matches the rhythms of the long second line with a sudden shift to the procreative, placing himself, in an echo of his birth, on the threshold of a poetic path or life journey. In a riveting image, he sees the young poet “crouched” in a posture of readiness, prepared to leap into the light (one of his figures for creative work) of a “meat-eating sun.” His location at the “groin of the natural doorway” fuses the sexual with the poetic; but the fecundity of this conception is immediately undermined by the comparison that the poet crouches “like a tailor/ sewing a shroud”—that is, already preparing, at least subconsciously, for his demise since the light cast by the “meat-eating sun” has the potential for destruction, as well as for creation.

There follows a slight pause, although the poem does not typographically indicate its necessity. The syntax, however, compels a degree of reflective hesitancy before the poet continues his portrait. Although he is “dressed to die,” his poetic life is almost arrogantly portrayed as a “sensual strut” in defiance of the aforementioned dead who “walk to

the grave in labour.” Thomas often uses the word “labor” to connote some kind of burden, and he is calling for a proud stride. The tone of confidence, even brashness, is continued by his claim that his “red veins” are “full of money.” The poet is mocking his recognition that he would never have enough money from his poetry to live as he wished. He is also asserting that, in some utopian situation, “the elementary town,” he could properly profit from his craft. The last lines of the poem extend this note of optimistic idealism. Calling his life/work an “advance,” he insists that its “final direction” or ultimate goal is the time-defying, death-delaying of “forever.” Whether this is a prediction, a plea, or just a series of bold words to combat his fear, the calm measure of certitude substantiates the artist’s claims to be moving in the direction of eternity.

### “POEM IN OCTOBER”

**First published:** 1945 (collected in *Selected Poems, 1934-1952*, 2003)

**Type of work:** Poem

*The poet seeks an appropriate arena in which to celebrate his birthday and recalls the delight that he took in the natural world as a boy.*

Thomas wrote very few poems between the taut lyric of “Twenty-four Years,” which marked “my birthday just arriving,” and his famous celebration of what he designated his “thirtieth year to heaven”—the “Poem in October.” In the intervening years of World War II, he was involved with film work in London, and he found that he was generally unable to compose poetry anywhere else but in the familiar home ground of his west Wales landscape. He began the poem in 1941, writing to his friend Vernon Watkins that the first line would be, “It was my twenty-seventh year to heaven” (using one syllable too many, as he must have sensed). He did not, however, complete it until he was again living in the cottage in Blaen Cwm, where he had written poetry since childhood.

During the summer of 1944, when he also wrote “Ceremony After a Fire Raid,” “New Quay,” and “Fern Hill,” Thomas had reached a kind of mid-

point in his life and realized that his tremendous excitement and feeling of wholeness in observation of the realm of nature might be receding beyond recollection. Both as a means of fixing this feeling permanently and as a strategy to remain in contact with one of the originating forces of his artistic passion, Thomas wrote what Donald Hall has called “a long and gorgeous rendition of weather and landscape, bird and water.” What makes the poem so successful is the fact that the familiar sentiments of a very common human emotion have been placed in a form that is uniquely Thomas’s, and that the rhapsodic language at which Thomas excelled has rarely been as well suited to a subject.

There are two specific features of Thomas’s style of composition notable in the poem. The first is his manner of constructing a frame in which details accumulate gradually while the narrative consciousness of the poet remains at a distance; then, when the full dimensions of the image have been developed, the poet’s perspective on the scene is introduced. In the first stanza, Thomas follows the opening declaration (“my thirtieth year”) with a series of sounds that are an invitation to the poet to join the waking world. Then, after the features of the harbor town have been recorded, Thomas gathers the poet, who has already expressed a proprietary interest by the use of the word “my” in the first and second line, into the scene in an immediate present narrative by summarizing “Myself to set foot/ that second” as he sets forth. This technique is used in many of the following stanzas, which are actually written as an extended, continuing line broken by divisions into separate subunits.

The second feature is Thomas’s use of a kind of compound adjective, as in the well-known description of the seacoast as the “heron priested shore” where the “net webbed wall” marks the boundary of land and water. In later stanzas, he continues this practice with such figures as the “rain wringing wind” and a “lark full cloud” or a “blue altered sky”—the latter figure including a double meaning recalling his lyric beginning in “Altarwise by Owl-Light.”

The long rhythms of each stanza contribute to a song effect in which the interplay of rhyme, alliteration, and assonance within the line help to maintain a high energy level; each linguistic device is like a chime in a series of sonic highlights. The frequency of these sound pulses parallels the surges

of excitement that the poet feels as he is overwhelmed by a display of nature's infinite variety, a phenomenon that he regards as a personal benediction, as if all he sees is a tribute to his being. "My birthday began," he starts the second stanza, as if the world is on show for him, and his description of an ascent from the harbor to the "hill's shoulder" is presented as a climb from birth through a life of "fond climates and sweet singers" toward a summit envisioned as a "wonder of summer."

The action of the poem in the first three stanzas proceeds upward beneath a "springful of larks in a rolling/ Cloud" in a journey that approximates Thomas's life before the intrusion of adult consciousness into the child's world of pure wonder. From the "parables/ Of sun light" through "twice told fields of infancy," Thomas's expressions of "the truth of his joy" as a youth are rendered with a purity of recall that places no distance between the sensation of the experience and its recreation in the poem. Then, in a pivotal middle (fourth) stanza, there is a sudden shift as "the weather turned around." From this point, the recall of the adult is more like a review, in which the experience is seen again through the double perspective of the adult reflecting on the child's experiences. The motion now is reversed, so that the child begins to recede into memory. The focus of the second part of the poem is less a descent (for a youth, in the "sun born over and over," as Thomas puts it in "Fern Hill," there is no summit, merely the possibility of going higher). It is more an awareness now of precipitous possibilities. The goal of the adult poet is to keep the summit in sight.

The turning of the weather parallels the change of seasons from summer to autumn, indicating the passage to the poet's maturity that has occurred in the span of poetic time. There is also an added ele-

ment of poignancy in the poet's recollections, because his awareness of death and time makes him even more sensitive to the temporary beauty of the natural world. The "twice told fields of infancy" relived in the double vision of the man in his thirtieth year permit the poet legitimately to claim of the boy that "his tears burned my cheeks and his heart moved in mine." The images of the poem wrought in Thomas's highly charged lyric language are a proof of this sentiment, a convincing demonstration through poetic art that "the mystery/ Sang alive/ Still." This peak of emotion is followed by a pause of reflection. The poet repeats that, amid his recapitulation of the marvelous, "the weather turned around," but that the poem itself has been the occasion for the "long dead child" to emerge and sing "burning in the sun" of a youth temporarily regained. As the poem concludes, Thomas fuses the two moments that he has celebrated, his "thirtieth year to heaven" and his "summer noon," by syntactically pulling the present and the past together. He revivifies the experience of the moment by describing the "town below . . . leaved with October blood"; the autumnal phase of the poet's life is still colored with the passion of creative action.

The final line is a universal prayer for favor and continuance from the forces of the universe. Yielding completely to the ultra-Romantic spirit of the poem, Thomas begins the last line (which is divided into a triad) with the unabashed "O" of countless effusions of feeling. His fervent wish is that his "heart's truth"—the sum of his desire as a man and a poet—will still be sufficient cause for him to "sing" (that is, to write poetry) from a position of strength and confidence ("on this high hill") when another year has passed. There is more than irony in this last wish, since Thomas often stated his fears that his days would be short. In accordance with the mood of the entire poem, he has let the "long dead child" speak at the close. Knowing quite well that he was enchained by circumstance and temperament, he could still choose, as he put it in his other great pastoral celebration of the same year, "Fern Hill," to "sing like the sea."

## **“IN MY CRAFT OR SULLEN ART”**

**First published:** 1945 (collected in *Selected Poems, 1934-1952*, 2003)

**Type of work:** Poem

*The poet explains the conditions of composition and for whom he writes.*

Along with the prologue that he wrote for the first edition of his *Collected Poems, 1934-1952* (1952), “In My Craft or Sullen Art” is a carefully designed declaration by Thomas of what he wanted the future to think of him as a poet. The conscious intent to shape his persona, however, does not betray his real convictions, though it tends to direct the reader toward certain areas of concern that he preferred to emphasize. The dual focus of the first line properly stresses the care for craft and the almost mystical connection to what Hall calls “a dark river flowing down there somewhere.” Yet the use of the word “sullen” is a typically inspired choice, revealing the frustrating and unsatisfying aspects of the gift that he carried. The poem continues with the conventional Romantic emblem of the artist at work by night, his passion an antisocial one (“only the moon rages”), his energy drawn from the love/grief of humanity. It then turns abruptly to the kind of booming declaration of power that both Thomas and his audience treasured: “I labour by singing light,” he proclaims. Then, in contradiction to most of the actions of his life and most of the more honest confessions of his poetry, he insists that it is not “the strut and trade of charms” that drives him, but the heart’s truth that he has often celebrated. The mastery of rhythm and the powerful emphasis of careful rhyme are so seductive that the appealing message becomes the reality, although it is important to note that Thomas is actually speaking for some idealized poet as much as for himself.

The second stanza, which, like the first, is as much one long flowing line as it is separated shorter ones, continues the theme of the artist as social exile, denying an interest in political power (“the proud man”) or posterity (“the towering dead”), while emphasizing again the call to poetic expression that originates in the heart’s core. Using the technique of opposing forces, which he found to be one of his most successful structural devices, Thomas sets the superficial reasons for artistic endeavor in sufficiently impressive terms (“towering dead”) that his ultimate commitment to “the lovers” becomes a heroic act of humanistic compassion channeled into poetic art. The relatively unselfish nature of this choice—the lovers “pay no praise or wages/ Nor heed my craft or art”—suggests the Romantic ideal of art for art’s sake, which Thomas implies actually serves the interests of humanity in its support of “the lovers” since his craft/art springs from and validates the human need for love. As in the first stanza, the carefully controlled pattern of rhythmic emphasis and the sure ear for rhyme that makes its appearance inevitable instead of obligatory contribute to the seductive power of the song.

### **SUMMARY**

Even those writers who have strongly supported Dylan Thomas’s work have had their reservations about his accomplishments. Yet the gradual recession of the legend of the wild bard into time and the postmodern regard for the possibilities of meaning in language beyond traditional conceptions of coherence have given Thomas’s work an enduring appeal beyond many original estimates. His great love of language and his ear for the musical, rhythmic power of words produced a body of work that has solidified his stature in the history of English literature.

## DISCUSSION TOPICS

- How does Dylan Thomas make “Poem in October” a birthday poem for himself yet avoid egoism?
- Examine the significance of the color green in “The Force That Through the Green Fuse Drives the Flower” and in “Fern Hill.”
- Study the relationship between the meter and the rhythm of Thomas’s poetry, especially in “Fern Hill.”
- What is a villanelle? How does this complicated poetic form contribute to “Do Not Go Gentle into That Good Night”?
- What does the subtitle signify in Thomas’s *Under Milk Wood: A Play for Voices*?
- Listen to recordings of Thomas reading his own poems and determine how much the experience expands an understanding of them.

## PRAMOEDYA ANANTA TOER

**Born:** Blora, East Java, Dutch East Indies (now Indonesia)

February 6, 1925

**Died:** Jakarta, Indonesia

April 30, 2006

*Pramoedya Ananta Toer, a political dissident who was imprisoned both by the Dutch and by the Indonesian government after independence, wrote novels and stories examining Indonesian history with a particular focus on the colonial experience under the Dutch.*

### BIOGRAPHY

At the time of Pramoedya (pra-MEW-dee-ya) Ananta Toer's birth, the nation now known as Indonesia was called the Dutch East Indies. The archipelago, or large clustering of islands, that made up the Dutch East Indies had fallen under the domination of the Netherlands in the early seventeenth century, when the Dutch East India Company had taken control of the valuable spice trade in the area. Over the course of a century and half, Dutch colonial institutions had grown, and in 1800, the islands were placed under the direct control of the government of the Netherlands.

Pramoedya, as he is called according to Indonesian style, was born on the island of Java, the most politically important part of the Indies. Pramoedya's father was director and headmaster of the Institut Boedi Oetomo (IBO), a nationalist school. Pramoedya completed his elementary education at the IBO, taking ten years to finish the seven-year course. Disagreement with his father over his education delayed him from continuing his studies, but with the help of his mother, a rice trader, he enrolled in the Radio Vocational School in Surabaya in 1940. After he finished his studies in 1941, he was drafted into the radiotelegraph division of the civil defense after the Netherlands and its colonies entered into World War II. Shortly after beginning

this work, however, the Japanese invaded Surabaya, and Pramoedya went back to Blora for a few months.

The Japanese invasion of Southeast Asia was a significant event for Pramoedya, as it was for many Asian nationalists, because a colonial power had been defeated and driven out by an Asian nation, albeit one that had its own imperialist designs. Pramoedya worked for the Japanese Domei news agency while continuing his studies.

After the defeat of Japan in 1945, the Indonesian leader Sukarno declared Indonesia's independence. The Dutch attempted to reestablish their rule, resulting in the Indonesian National Revolution, as nationalist forces under Sukarno and others fought the colonial power. Pramoedya took part in the struggle as a member of a nationalist paramilitary group, and he was therefore imprisoned by the Dutch from 1947 until independence in 1949.

During this imprisonment, he began his career as a novelist with his book *Perburuan* (1950; *The Fugitive*, 1975), which won a national literary award. During this first period of imprisonment, Pramoedya met Arfah Iljas, a young woman whom he married after his release. They had three children before their divorce in 1954. Pramoedya married again, in 1955, to Maimoenah Thamrin, and he had five more children with his second wife.

In independent Indonesia, Pramoedya joined the Marxist literary group Lekra and wrote for

newspapers and journals. He also gave lectures on literary history at the Res Publika University in Jakarta. Although Sukarno, as first president of Indonesia, generally tried to incorporate the left wing into his own political support groups, Pramoedya's criticisms of political corruption alienated Sukarno. Pramoedya was also sympathetic to the Chinese minority in Indonesia, and this gained him enemies among the military. He was briefly imprisoned for a second time, from 1960 to 1961, in Jakarta.

In 1965, the Indonesian military, led by Suharto, staged a coup, claiming that a Communist rebellion, led by elements sympathetic to China, was about to occur. Pramoedya was arrested and imprisoned from October, 1965, until December, 1979. For much of this time, he was held in the penal colony at Buru Island. There, he composed the four historical novels known as the Buru Quartet (1980-1988). He was held under town arrest following his release, and his novels continued to be banned in Indonesia even after Suharto's downfall in 1998. However, he became Indonesia's best-known writer, at home and abroad. In 2006, he died as a result of diabetes and heart disease.

### ANALYSIS

Much of Pramoedya's writing consists of the fictional investigation of Indonesian history, and it shows clear political goals. The writer was interested in teaching his readers about the history of their country and in teaching them in ways that would motivate them to act instead of simply considering historical events from a disinterested standpoint. Thus, Pramoedya's nationalist and leftist politics guided how he presented his characters and the situations that surrounded those characters. Within these political preoccupations, Pramoedya is concerned with questions about how individuals deal with competing claims on personal commitment and loyalty and about how individuals make decisions about where they should direct their loyalties.

Questions of political goals and personal commitments can be seen in Pramoedya's first major work, *The Fugitive*, written while imprisoned by the Dutch. The hero of this novel, Raden Hardo, is an Indonesian nationalist soldier who has worked with the Japanese in pushing the Dutch out of Indonesia. However, Hardo turns against the Japa-

nese and attempts to organize an anti-Japanese coup. One of his fellow conspirators betrays the plan and Hardo is forced to flee, disguised as a beggar. Returning to his home town, he finds that much has changed and that trust is difficult. He is surrounded by possible pitfalls as he attempts to hide his own identity, and those around him make their own decisions in a complex world.

Issues of goals and commitments within the larger setting of colonial history, social awareness, and political struggles shape Pramoedya's great four-book account of Indonesian history, the Buru Quartet. The first three books in this series, *Bumi manusia* (1980; *This Earth of Mankind*, 1982), *Anak semua bangsa* (1980; *Child of All Nations*, 1982), and *Jejak langkah* (1985; *Footsteps*, 1995), follow the protagonist as he gradually comes to understand the nature of colonial and political oppression and enters the struggle against these. The fourth book, *Rumah kaca* (1988; *House of Glass*, 1996), takes the perspective of a collaborator with the Dutch in order to look at colonialism from the inside. In all of these books, Pramoedya sees his own traditional, hierarchical society, with its glorified nobles and despised common people, as an internal evil that is perpetuated and made worse by foreign domination of the homeland. As the protagonist in the first three books gains his political awareness, the author intends to draw his readers along the same path and lead them to the same kind of political consciousness.

Pramoedya uses his writing as a tool for teaching about social and political issues. This has consequences for how he approaches his craft. Pramoedya wrote in Bahasa Indonesia, or Indonesian language, the dialect of Malay that is the official language of Indonesia. Bahasa Indonesia is not the first language of most people in Indonesia. The people of Java, for example, will most often speak Javanese in their homes, although Indonesian is the language they will generally hear in the media and the one they will use in speaking with people from other parts of the nation, in which more than three hundred first languages are spoken. Thus, the very language that Pramoedya chose to use was a statement and an act of nation-building.

The writing style in Pramoedya's work tends to be relatively simple and straightforward. The emphasis is not on elegance or on complexity of sentence structure but on the meaning and on the

stories. Although he was involved with literary organizations for much of his life, he did not write for other writers but for his readers. Given the fact that he wrote in the Indonesian language, which is popularly understood only in Indonesia and Malaysia, he was clearly not originally aiming at the worldwide readership he later reached but at people in his own part of the world.

The author's approach to fiction can be identified as realism or social realism. While he was concerned with the psychological dimension of life, his primary concern was with the portrayal of people in social situations and of the struggle among nations and among social classes. He sees a goal of a better society as a point toward which the struggle is moving and as the primary rationale for his own literary efforts.

Pramoedya is at his best in bringing Indonesian history to life and in dramatizing the evils of feudalism and colonialism. He is a skilled storyteller, and readers can easily imagine him recounting tales for his fellow prisoners during his years of imprisonment. Even in his best work, though, characterization is not one of his strong points, and the people in his novels sometimes seem to have no more depth than the puppets in an Indonesian *wayang* (shadow-puppet) play. At their strongest, his characters can dramatize the complex problems of people making decisions about difficult social and political issues. At their weakest, the characters may lapse into becoming mere symbols or mechanisms for teaching partisan history lessons.

## THIS EARTH OF MANKIND

**First published:** *Bumi manusia*, 1980  
(English translation, 1982)

**Type of work:** Novel

*The story of the political awakening of Minke, a young Javanese from the lower nobility, who attends a Dutch school and gradually becomes aware of the injustice of his own society, as well as the injustice of Dutch colonialism.*

*This Earth of Mankind* was the first novel in the Buru Quartet, a series of historical novels that Pramoedya composed while in the Buru penal col-

ony. It opens Pramoedya's fictionalized history of the end of Dutch rule in Indonesia. The hero of the novel, a youth named Minke, is from a minor aristocratic family of Java. Minke has aspirations to be a writer, and a number of his works have been published in Dutch-language periodicals. His talents and his somewhat privileged social position have enabled him to attend a high school where all of the other students are of at least partly European ancestry. The snobberies and rejections Minke experiences at the high school begin his movement toward an awareness of colonial inequality, and they also give Pramoedya a means of dramatizing this inequality for readers of the novel.

Minke becomes acquainted with an Indonesian woman named Nyai Ontosoroh. She occupies a position at the margins of both Indonesian and colonial Dutch society because she is the concubine of a Dutch man, Herman Mellema. The Indonesians look down on Nyai Ontosoroh as a concubine. For the Dutch, she can never be a wife or hold a recognized position in the household.

Nyai runs a dairy business and has two half-European children by Herman Mellema, a son, Robert, and a daughter, Annalies. Robert comes to hate Minke, but Minke falls in love with Annalies. He also forms a close bond with the mother, and Nyai urges Minke to follow his own ambitions and become a writer.

Minke and Annalies marry, but Herman Mellema decides to acknowledge his children. While this saves them from being condemned to be natives, it also means that Nyai loses all control over her own children. Annalies is taken away from Minke, their marriage not recognized by Dutch law, and she is sent to the Netherlands to live with her Dutch relatives. When Annalies dies, this is the great tragedy of Minke's life, but it is also a stage in his growing understanding of the world around him.

The two books that follow *This Earth of Mankind* in the Buru Quartet, *Child of All Nations* and *Footsteps*, continue the story of Minke. He begins to

write in Malay (Indonesian), rather than Dutch, and he learns about events in the wider world, particularly the emergence of Japan as a world power. He marries a second time, to a Chinese woman. He founds a native organization and a nationalist newspaper. In the final book of the quartet, *House of Glass*, Minke appears as an opposition leader, but the story is told from the point of view of Pangemanann, an Indonesian with a European education who is charged with destroying opposition movements.

## THE GIRL FROM THE COAST

**First published:** *Gadis Pantai*, 1987 (English translation, 1991)

**Type of work:** Novel

*The tragic story of a beautiful village girl who is forced to become the "practice wife" of a powerful aristocrat.*

The central character of *The Girl from the Coast* was based on Pramoedya's grandmother. This girl, never identified by name, lives with her parents in a fishing village on the coast of Java. When she is fourteen, word of her beauty reaches the local bendoro, a Javanese aristocrat in the service of the Dutch colonial overlords. The nobleman sends word to her family that she is to become his wife. Filled with hope for their daughter's future, her mother and father agree to have her married in a ceremony in which the groom is absent and is represented by a dagger.

The parents accompany their child to the great man's house in the city. There, they find a disturbing omen of their daughter's future. A servant is caring for a baby, the child of a previous wife who had been divorced and dismissed at the bendoro's whim.

The servant, Mbok, becomes the personal servant and caretaker of the girl. The girl grows to de-

pend on Mbok, who tells her stories and gives her advice on adjusting to the strange ways of the aristocracy. Among the stories is Mbok's own tale of how she and her husband were taken away from their village by the Dutch to work on a plantation. After the pregnant Mbok had been kicked in the stomach by a foreman, killing the unborn child, her husband ran amok and was killed by soldiers. Jailed and then let go to fend for herself, Mbok had eventually ended up in the service of the bendoro. Mbok is sympathetic to the girl, but also aware of her own complete dependence on her employer. Mbok's integrity, courage, and care for the girl lead to the servant's downfall.

After some of the male relatives of the bendoro, who live in the house, help the girl clean her room, the girl's wallet proves to be missing. She is distraught, since this wallet contained money for household expenses. When the relatives respond to Mbok's inquiry with contempt, Mbok brings the matter before the bendoro. The lord discovers the thief and orders him to leave the house, but Mbok is also dismissed. She had dared to accuse a superior and can no longer remain.

Without Mbok, the girl is alone. A new servant, Mardinah, arrives, but Mardinah is a sinister figure. A relative of the bendoro, Mardinah, who is the same age as the girl, has already been divorced. Unlike Mbok, Mardinah refuses to treat the girl as a superior and is often rude. The bendoro encourages the girl to return to her village to visit her parents. Although she does not want to bring Mardinah with her, she does so on the bendoro's insistence.

In the village, the girl finds that the other villagers and even her own parents keep their distance from her and treat her as a member of the nobility. In a bizarre sequence of events, the villagers discover that a woman who has been living in the village is actually a man. Further investigation reveals that the supposed woman is actually a man, who turns out to be the brother of Mardinah, stationed in the village as a spy. Mardinah's bodyguards are found to be planning to murder the girl on their return from the village. Mardinah herself had planned this improbable murder to help the regent in her town of Demak, who wanted to marry his daughter to the bendoro. After Mardinah's confession, she is married to Dul, the village good-for-nothing, storyteller, and tambourine player. The bodyguards are led out to sea, on the

pretense of saving them from attacking pirates, and drowned.

The girl returns to the house of the bendoro. She becomes pregnant and bears a daughter. The daughter, however, is the child of her noble father, and the new mother has no right to the baby. Having finally decided to take a real wife of his own social class, the bendoro orders his practice wife to leave. When she refuses to abandon her child, he beats her and has his servants force her out the gate. For a month afterward, a carriage passes by the gate and someone looks from behind the carriage curtain at the bendoro's mansion.

The Indonesian version of the novel ends with the figure in the carriage. For the English-language reader, however, Pramoedya added an epilogue to take the place of the two lost sequels and to give this surviving work a more satisfactory ending. In the epilogue to this English version, the daughter of the girl, named Sa'idah, grows up in the home of the bendoro and receives an education. At the age of eighteen, almost past marriageable age for an Indonesian woman of her era, Sa'idah becomes involved with an older schoolmaster by the name of Mas Toer, enabling readers to understand that this is a fictionalized version of Pramoedya's family history.

## THE MUTE'S SOLILOQUY

**First published:** *Nyanyi sunyi seorang bisu*, 1995-1997 (English translation, 1999)

**Type of work:** Memoir

*A collection of essays, letters, and notes written by Pramoedya during his imprisonment on Buru Island.*

During his years of imprisonment, Pramoedya kept a number of secret written documents. These

were written quickly and most of the letters he wrote were never sent, not even the letters to his own children, because he had to keep them hidden from the authorities. These documents, collected in *The Mute's Soliloquy*, are not polished pieces of writing, but they have an immediacy that comes from being jotted down as testaments to reflection under the most adverse conditions.

Pramoedya divided the collection into four parts, or chapters. The first, entitled "The Mystery of Exile," deals with the condition of exile in general and with Pramoedya's own imprisonment. The second, "Fragments of My Life," contains autobiographical jottings. One of the most interesting passages in this section, written as a letter, deals with the time he worked for the Japanese during World War II and how this work affected his thinking about Indonesian independence. The third, "Lessons for My Children," consists of letters and fragments of letters containing lessons he would like to have been able to teach to his own children. The final, "Deliverance," contains thoughts written while Pramoedya was waiting for release from prison and his memorial to the dead and the missing from the prison camps.

## SUMMARY

Pramoedya Ananta Toer's writing is social and historical in its orientation. He was concerned with questions of inequality and injustice resulting from colonialism and from the feudalism of traditional societies. Nearly all of Pramoedya's fiction and nonfiction dealt with Indonesian nationalism and with the struggle against foreign and native oppressors. Pramoedya was politically engaged for most of his own life and spent years in a prison camp, where he composed his best-known work, the *Buru Quartet*. His own life as a political writer and his family history furnished him with much of the material for his literature.

## DISCUSSION TOPICS

- Many of Pramoedya Ananta Toer's novels dealt with Dutch colonialism, but he spent much of his life imprisoned by the government of an independent Indonesia. What historical connections might he have made between colonialism and the Indonesian government that followed colonialism?
- Pramoedya's first novel, his well-known quartet of novels, and the papers collected in *The Mute's Soliloquy* were all written while imprisoned. How do you think imprisonment affected the writer's style and his choice of subjects?
- Does Pramoedya seem to be optimistic about the future of his own country and about the future of humanity, in spite of his sufferings? Why or why not?
- How do characters such as Nyai Ontoso-roh and the girl in *The Girl from the Coast* reject the traditional roles of women?
- How does Pramoedya use fictional characters to bring Indonesian history alive?

## J. R. R. TOLKIEN

**Born:** Bloemfontein, South Africa

January 3, 1892

**Died:** Bournemouth, England

September 2, 1973

*Although popularly known as a fantasy novelist, Tolkien was also an important scholar of medieval English literature.*

### BIOGRAPHY

John Ronald Reuel Tolkien (TAHL-keen) was born on January 3, 1892, in Bloemfontein, South Africa, to Arthur and Mabel Suffield Tolkien. His brother, Hilary, was born in 1894. Arthur Tolkien had immigrated to South Africa from England to head a bank and remained behind in 1895 when his family returned to England because of Ronald's health. Arthur's sudden death left the family near poverty. At first, Mabel Tolkien lived outside Birmingham in the country, which delighted both boys, and she educated the children at home. In 1900, against family tradition, she converted to Catholicism with her children. Most of Tolkien's school education was at his father's old preparatory school in Birmingham, where he excelled in languages.

In November, 1904, after a year of illness, Mabel Tolkien died from diabetes. A family friend, Father Francis Morgan, became the boys' guardian. Tolkien continued to develop an interest in languages and literature. He met with school friends regularly to discuss their reading, including the Norse sagas whose spirit lies behind his fiction. After initially failing a scholarship examination, perhaps because of his friendship with Edith Bratt, whom he later married, Tolkien won a scholarship to Exeter College, Oxford, which he entered in 1911.

Morgan forcibly ended the relationship, extracting a promise from Tolkien not to see Edith until he was twenty-one.

In his first undergraduate years, he neglected Latin and Greek to study other languages, and consequently, after unimpressive examinations, he transferred to English studies. In early 1913, he was reunited with Edith, and they became engaged; she converted to Roman Catholicism. Tolkien continued his studies as World War I began, but entered military training with the University Officers' Training Corps. About the same time, he also composed some of the poetry included in *The Silmarillion* (1977). He was graduated in 1915 with first class honors in English and a second lieutenancy. Before departing for military service in France in 1916, he married Edith. Although uninjured, by November Tolkien had returned to England with a persistent fever. He continued to build the mythology of Middle-earth and to invent its language while convalescing. In November, 1917, the Tolkiens had their first child.

After a brief episode in Oxford contributing to *A New English Dictionary on Historical Principles* (1884-1928), in 1920 Tolkien began teaching at the University of Leeds. He and his wife had two more children while there, and Tolkien and E. V. Gordon produced the first modern edition of *Sir Gawain and the Green Knight* (1925). Later that year, he was elected professor of Anglo-Saxon at Oxford.

Tolkien's life at Oxford was that of a typical don: tutorials, lectures, committee service, and writing. It was enlivened, in the 1920's, by another child and by his friendship with C. S. Lewis. By 1926, he had accumulated a circle of friends, The Inklings,

including Lewis, who read the Icelandic sagas together. He continued to compose stories of Middle-earth and engage in serious scholarship. He was professionally active, speaking at a number of meetings, and 1936 brought acclaim for a British Academy lecture on *Beowulf* (c. sixth century).

Tolkien, Lewis, and other colleagues met regularly from the early 1930's to listen to and discuss one another's work. In 1937, Tolkien's storytelling to his children and the encouragement of his friends in The Inklings resulted in publication of *The Hobbit*, begun in 1930. In 1938, as a follow-up to *The Hobbit*, Tolkien wrote *Farmer Giles of Ham*, but because of the war it remained unpublished until 1949. His publishers urged him to write another hobbit book, but the project slowly became enormous and complex, emerging as *The Lord of the Rings* (1955; includes *The Fellowship of the Ring*, 1954; *The Two Towers*, 1954; and *The Return of the King*, 1955).

The war years brought professional responsibilities that delayed Tolkien's writing. Delaying him, also, were painstaking habits of revision to produce a consistent text. As he labored over *The Lord of the Rings*, he also elaborated the "invented languages" created for *The Silmarillion* as he "discovered" new races in Middle-earth. A series of obstacles, including a family move to a new residence and election as the Merton Professor of English Language and Literature, slowed his work.

Although a draft of *The Lord of the Rings* was substantially complete by 1947, misunderstandings and the publisher's reluctance to accept such a large work delayed acceptance until 1952. Allen & Unwin offered Tolkien an unusual profit-sharing arrangement; he accepted, and the first volume appeared in 1954. Reviews were generally either enthusiastic or sharply critical; sales far exceeded expectations. To his surprise, Tolkien's profits from the book enabled him to retire from teaching in 1959. Over the next few years emerged *The Adventures of Tom Bombadil* (1962), *Tree and Leaf* (1964, revised 1988), and *Smith of Wootton Major* (1967).

After Tolkien and his wife had spent forty-two years in Oxford, Edith's arthritis led the couple to move to Bournemouth in 1968. Tolkien continued to work on *The Silmarillion* after his wife's death in 1971, when he moved back to Merton College, Oxford, as an honorary fellow. In 1972, Queen Elizabeth II named him a Commander of the Or-

der of the British Empire, and Oxford awarded him an honorary doctorate of letters. While visiting Bournemouth in 1973, he became ill from an unsuspected ulcer, developed an infection, and died in the hospital on September 2.

Tolkien's novels gained enormous popularity after his death, and he attained an international reputation as an innovator of fantasy fiction. *The Lord of the Rings* trilogy was adapted for the screen in three successful and critically acclaimed films released between 2001 and 2003; the final film, *The Lord of the Rings: The Return of the King*, swept the 2004 Academy Awards ceremony, winning eleven Oscars, including the award for Best Picture.

## ANALYSIS

Tolkien's interest in fantasy began with his childhood curiosity about languages. Later, his professional linguistic training enabled him to create a Middle-earth in which cultural differences are significant. In the essay "On Fairy-Stories," however, he suggests what underlay this curiosity. In the traditional tales of the past, readers could explore "Faërie: the Perilous Realm itself":

The magic of Faërie is not an end in itself, its virtue is in its operations: among these are the satisfaction of certain primordial human desires. One of these is to survey the depths of space and time. Another is . . . to hold communion with other living things. A story may thus deal with the satisfaction of these desires, with or without the operation of either machine or magic, and in proportion as it succeeds it will approach the quality and have the flavour of fairy-story.

Two key phrases, "survey the depths of space and time" and "hold communion with other living things," suggest the direction of his own fiction. He believed that imaginative participation in stories was possible only when an author invested his creation with a rich, overlaid texture of history, geography, and culture. *The Lord of the Rings* exemplifies Tolkien's intent, set as it is in a world embedded in millennia of history, enriched by an enormous variety of creatures. To borrow Tolkien's phrase, he engaged in "sub-creation":

What really happens is that the story-maker proves a successful "sub-creator." He makes a Secondary World which your mind can enter. Inside it, what

he relates is “true”: it accords with the laws of that world. You therefore believe it, while you are, as it were, inside.

The true extent of Tolkien’s vision lay undiscovered until the publication of *The Silmarillion*, followed by subsequent volumes of unfinished tales edited by his son Christopher. Readers glimpsed this faintly in the six appendices to *The Return of the King*, which trace events in Middle-earth back several millennia.

Tolkien discusses other “primordial desires” that fantasy may satisfy: recovery, escape, and consolation. Because fantasy allows readers to contemplate alternatives to the present, it may offer hope for change. Recovery, or “‘seeing things as we are (or were) meant to see them’—as things apart from ourselves”—means recapturing the sense of wonder, dulled by familiarity, inherent in everyday life. Escape refers to the human need to escape the threat to life and humane values. By “consolation,” Tolkien suggests that stories that nurture communicate the hope that human suffering will end, that happy endings come unexpectedly, a “eucatastrophe,” a “good disaster,” providentially delivered.

This emphasis on the affective purpose of fiction separated Tolkien from contemporary stylistic experimentalists and realists. His fiction looks to the past, as is implied in an audience’s “Recovery,” their regaining something lost. Recapturing a sense of wonder in the natural world, reaffirming the values of human life, occur in examining a simpler age. In *The Lord of the Rings*, “progress,” technology, machinery, and the destruction of nature are linked to evil. Tolkien’s protagonists from another age uphold values that appear outmoded yet impart a sense of dignity, purpose, and resolve. While some readers find the heroic language and formality of epic adventures foreign, these stylistic elements seem essential to Tolkien’s imaginative purposes.

Tolkien’s reliance on Norse and Old English mythology may account for the novels’ heroic atmosphere. The names of many locations and characters and the many “manufactured” words of his fiction are borrowed from the sagas. As an example, *The Song of the Seeress*, an anonymous tenth cen-

tury Icelandic poem, contains the names of fifteen of Tolkien’s characters, including Gandalf. This reliance on the Norse sagas may also explain the “unheroic” endings of the stories once victory is accomplished. In stories such as *Beowulf*, characters always seem aware of ultimate defeat in heroic conflict. Beowulf may kill Grendel, but the dragon will await him in old age.

*The Hobbit* and *The Lord of the Rings* are both very traditional “quest” adventures, in which an untried or uninitiated youth leaves a protected and secure environment to make a journey. The journey may lead to treasure (*The Hobbit*) or to knowledge and glory (*The Lord of the Rings*), but tests and trials await. Success depends on making correct choices and acquiring wisdom; it may lead to disillusionment, too, and reassessment of youthful ideals. The successful return home yields both honor and the need to change the society in which one grew up. Eden does not remain Eden. This mythic pattern, that of all stories from the heroic age, Tolkien makes new in his novels.

In Tolkien’s novels, readers identify with one very ordinary figure against the backdrop of heroic adventures. Tolkien’s “hobbits” fulfill this function. Hobbits are intruders into the heroic world, with “little or no magic about them,” cheerful, youthful, and unreflective, lacking a role in the heroic past. The victories of the heroes in the foreground, however, are impossible without the actions of the hobbits. Readers may admire the heroic Aragorn, but they identify with the struggles of Frodo. In *The Lord of the Rings*, this literally becomes two stories, as Tolkien alternates between Frodo’s struggle and Aragorn’s.

Tolkien’s stories are surprisingly complex morally. In an age of adventure fiction, where personal decisions seem to have no moral consequences, all of his characters confront serious moral issues. Hobbits, in particular, are shown making consciously moral choices. Bilbo’s decisions in *The Hobbit* lead him to reject his companions’ greed, even at the cost of their friendship. Frodo’s successful quest entails physical loss and ongoing pain and humility of personal failure. Good never triumphs without cost.

## THE HOBBIT

**First published:** 1937

**Type of work:** Novel

*A band of dwarfs, one hobbit, and one magician recover the dwarfs' treasure from a dragon.*

Tolkien's *The Hobbit*, a story that has appealed to adults as well as children, provides the background to his larger work, *The Lord of the Rings*. All of these works find their place in the even larger series of stories on which Tolkien had been working from the 1920's, and which were published posthumously by his son Christopher. Tolkien peopled his stories of Middle-earth with a number of traditional fictional races, including elves, dwarfs, and trolls, as well as "orcs," goblins created by sorcery. The hobbit of the title is Bilbo Baggins, representative of a quiet, unadventurous race living in the Shire, in the west of Middle-earth. Gandalf the magician lures Bilbo, who is more adventurous than he himself thinks, into joining a group of dwarfs. They are determined to return to their home, the Lonely Mountain, kill the dragon Smaug, and recover their lost treasure and homeland.

After a number of initial adventures in which Bilbo shows his resourcefulness, they are trapped in a cave by a storm in the Misty Mountains. Caught by orcs and goblins, only Gandalf's magic saves them. During their escape, Bilbo is separated from the group, knocked unconscious, and meets Gollum, a strange cave dweller. This juncture is the turning point of the story; without the help of others, Bilbo must defeat an opponent who will literally eat him if he loses. Providentially, Bilbo has found a ring that Gollum has lost, and after a riddle contest, which Bilbo wins, the hobbit can use the ring's powers of invisibility to make his escape. Eventually, Bilbo makes his way out and rejoins his companions; they continue to travel eastward. The ring proves its usefulness repeatedly on the way, as the supposedly experienced and mature dwarfs blunder into every danger they meet.

Although Tolkien plays with the elements of many serious traditional tales—magic rings, invisibility, and threatening opponents, including spiders—he creates an adventure that is generally cheerful and humorous. The ring eventually makes

the protagonists' success possible, but its use often occasions comedy. With it, Bilbo, though awestruck by events, can act decisively and courageously when necessary. One element appealing to most readers is this picture of Bilbo, neglected, disregarded, literally small, and symbolically unimaginative, triumphing over hostile elves, humans, dragons, and cranky dwarfs.

His integrity and honesty also lead to his role in mediating a serious crisis between the dwarfs and their human neighbors. In the climactic scenes in the novel, Bilbo must demonstrate a maturity unseen earlier. Smaug has left the mountain, seeking revenge for Bilbo's theft of a cup. The dragon attacks and destroys a human city, Lake-Town, and is killed. When the humans who remain seek some share in the wealth—they, after all, killed the dragon—the dwarfs' greed gets the better of them. They blockade the mountain against their former friends. It is left to Bilbo to find a means of mediating peace. Unknown to the dwarfs, he has found and kept a jewel, the Arkenstone, which they have sought. Bilbo's gift of it to Gandalf and the leaders of Lake-Town forces the dwarfs to concede. This development results in a union of the allies against a powerful force of wolves and orcs. Though he is not a typical warrior, Bilbo plays his role as discoverer and mediator very pragmatically, getting done what needs doing. At the novel's end, Bilbo, now wealthy, but, more significant, imaginative and self-confident, returns to the Shire.

*The Hobbit* has many of the elements of a children's story, as befits its origin: a narrative persona sounding much like an adult telling a story to children, some humorous comments along the way suggesting the follies of the dwarfs, and a proper seriousness about evil. The figure of Bilbo, invisible with his ring, lurking about various castles and wastelands, and eventually in Smaug's cave, is the mischief of the sort that children enjoy. At least one element of the children's story that is retained in *The Lord of the Rings*—though most others are not—

is the sense of a providential order that leads to the rescue of the companions. Twice in the novel, Gandalf and the dwarfs are in difficult straits and are rescued by giant eagles who are indebted to Gandalf. At one point, Gandalf returns opportunistically to delay three trolls long enough for them to be transformed into stone by the sunrise. Elsewhere, the ring itself seems a tool provided by providence to accomplish the necessary task. Until the story's end, none of the dwarfs, Bilbo, or Gandalf is even injured. Only the final battle insists that this is a more dangerous world than Bilbo has seen before.

## THE LORD OF THE RINGS

**First published:** *The Fellowship of the Ring*, 1954; *The Two Towers*, 1954; *The Return of the King*, 1955 (published collectively as *The Lord of the Rings*, 1955)

**Type of work:** Novels

*Long ago, men, elves, dwarfs, hobbits, and magicians battle to destroy a magic ring and end the power of its maker.*

Twenty years of continued subcreation mark the difference in tone and design of *The Hobbit* and *The Lord of the Rings*. *The Hobbit*'s paternal narrative voice is missing, so that almost from the opening of the trilogy the reader is aware that the issues of the novel are greater.

Tolkien's trilogy has spawned dozens of multi-volume quest fantasies using a medieval setting. They range from Ursula K. Le Guin's *Earthsea Trilogy* (1968-1973) to Stephen R. Donaldson's *The Chronicles of Thomas Covenant the Unbeliever* (1977) to Marion Zimmer Bradley's extended *Darkover* series (1972-1988). Each of these authors, including Tolkien, incorporates a theological element into the adventure story. Most appeal to the audience Tolkien awakened, and each has captured a share of a growing market for such fiction. Yet few succeed in the task of subcreation. Tolkien offers readers that possibility for "communion with other living things" that he claims all humans desire, in a world in which differing races have well-documented histories, languages capable of a

range of poetic expression, and differing cultural assumptions. To some extent, too, Tolkien succeeds because one can imagine life apart from adventure in Middle-earth.

*The Fellowship of the Ring*, like *The Hobbit*, begins in innocence. Although the Shire, Gandalf, and Bilbo reappear, almost immediately the story changes direction. Bilbo, sixty years older, surrenders the ring of invisibility to his nephew Frodo and rejoins the elves. After an interval of some years, which Tolkien compresses, Gandalf returns to announce that Frodo holds the One Ring, forged by the magician Sauron, which both empowers its wearer and tempts the wearer to exercise that power selfishly. No one can wear it safely.

Frodo, like Bilbo apparently undistinguished, unimaginative, decent, fair, and quietly stubborn, is the audience's vantage point for the story. Circumstances demand that he outgrow his hobbit isolationism, and indeed, offer himself without reserve or selfishness for a whole world that he does not know. His travels take him out of the Shire and into a land utterly threatening; he is betrayed by a companion, offers forgiveness and redemption to another who betrays him, and carries a burden no good person in the novel can endure. Throughout the novel, he battles the power of the ring itself, which tempts him to use it; he also carries the burden of knowing that his success will mean that the world will change, and some of its goodness, as well as much of its evil, will diminish. In Frodo, Tolkien explores the recurring theme of substitutionary love: Some must be willing to offer their lives that others might live. His quest reverses the movement of the earlier novel; the ring, once found, must now be destroyed in the place of its forging, deep within Sauron's kingdom, Mordor.

Accompanied by several hobbits, Frodo leaves the Shire for Rivendell, acquiring along the way a human companion, the ranger Aragorn, known as Strider. Pursued, Frodo is wounded in battle before they arrive safely at Rivendell. A council repre-

senting all civilization—elves, dwarfs, humans, and hobbits—eventually agrees that the One Ring must be destroyed. That can happen only if it is returned to the place of its making, deep within Mordor. Representatives of the four kindreds agree to accompany Frodo on the journey.

A contrasting quest emerges when one of Frodo's human companions, Aragorn, declares himself the heir of the throne of Minas Tirith, the city that has opposed Mordor for millennia. As Frodo is the naïve initiate, Aragorn is the experienced warrior assuming a heroic challenge of his own. In Aragorn, Tolkien awakens Frodo and the audience to that desire "to survey the depths of space and time," for Aragorn represents a tradition and race coming from a forgotten age of the world, from the land of Numenor.

Before the first volume ends, Tolkien has succeeded in opening to Frodo and his hobbit companions an awareness of a larger world, both older and more varied than they have known. He has also suggested the capacity for growth and heroism in the unheroic, as Frodo has been wounded and has accepted the possibility of death in his willingness to take the ring to Mordor.

*The Lord of the Rings* is most often remembered for its scenes of adventure, particularly the heroic language of warriors confronting their foes. From the first volume onward, however, Tolkien establishes a rhythm of adventure and reflection that serves several purposes. His characters are not always journeying. In *The Fellowship of the Ring*, for example, Frodo and his companions are entertained both at Rivendell and at the secret retreat of the elves in Lothlorien. The threat of evil to destroy such places is heightened by the enjoyment and tranquillity that these places provide to their inhabitants. Tolkien undoubtedly employed such settings for this purpose, but they serve another equally important role in the narrative, as some of the film and cartoon versions of these stories make evident. *The Lord of the Rings* is not only about adventure but about preserving a world, rescuing and maintaining what is good in that world. Rivendell, Lothlorien, and the Shire are the "real world," where people live, rather than the landscape of adventure through which they travel. Moments of heightened enjoyment simply in a good meal, a song, or companionship around the table or the fire exemplify what the heroes are called upon to preserve.

The magnitude of the opposing evil forces is demonstrated first in Gandalf's apparent death in the dwarf kingdom of Moria and second in the treachery of Boromir of Minas Tirith, who yields to the temptation of the ring and demands it from Frodo. Boromir's seduction by the desire for the power of the ring is also the first instance of an ongoing theme, which comes to dominate the action of the last half of the trilogy. Where evil does not blast goodness utterly, it may twist it or seduce it. The "fellowship" ends with Boromir's death at the hands of Sauron's orcs, who seize two of the hobbits. Frodo and his hobbit friend Sam Gamgee leave the others, attempting to make their way toward Mordor.

Tolkien himself dismissed the notion of the trilogy form, noting that readers must look to the six books of the story. Each volume contains two separate narratives, and in the two final volumes, Aragorn's story makes up books 3 and 5, while Frodo's story occupies books 4 and 6.

In *The Two Towers*, the second volume, Tolkien alternates between the two groups of now-divided companions: Aragorn, the elf Legolas, and Gimli the dwarf pursue the kidnappers of the two hobbits, while Frodo and Sam make their way toward Mordor. This journey allows Tolkien an opportunity to explore the geography of Middle-earth further and to introduce other inhabitants of Middle-earth. Other nonhuman races appear, such as the treelike Ents, who shepherd an entire forest. In *The Two Towers*, both characters confront evil from Sauron. Aragorn's confrontation with evil is conventional: He and his companions must defeat an army directed by the wizard Saruman, allied now with Sauron. The heroic battle at Helm's Deep, the stronghold of the forces of good, is one of the most successful battle narratives Tolkien created.

The conclusion of the book pits Gandalf, returned from death, against Saruman, as Saruman attempts to win over his opponents by his persuasive gifts. The power Saruman still holds, and the depth of his betrayal, contrast with Gandalf's insight and rejection of selfishness. In book 3, Tolkien has set up very obvious tensions. Against Aragorn and Gandalf's years of obscurity and service to others is set the treachery of the wizard Saruman, allied with Sauron to increase his own power. Paralleled as well are groups of lesser figures, such as the Rohirrim, a kingdom of horse-

men whose culture seems descended from stories like *Beowulf*. Having helped lead their defense, Aragorn wins the support of the Rohirrim as he moves toward Minas Tirith. By contrast, Saruman's allies, the morally and physically deformed orcs, serve him for treasure and because of fear. Their defeat and Saruman's downfall depend on the joint efforts of free humans, dwarfs, elves, magicians, and Ents.

On Frodo's journey, the power of evil is brought home repeatedly. Sauron has desolated the landscape around Mordor, and inside the "Land of Shadow" little grows but brambles. Frodo discovers the potential for evil within himself, as well, and its effects on those who serve it. One of these is Gollum, who lost the ring to Bilbo originally. In the process, Tolkien reveals that Gollum was once a hobbit, or close cousin, who through his centuries of possession of the ring has been warped and changed beyond recognition. He has shadowed Frodo since he left the Shire, seeking to reclaim the ring. Book 4 shows Frodo subduing and winning his allegiance and compassionately sparing him. Gollum guides Frodo to Mordor, though he leads Frodo into a trap as the book ends.

In *The Return of the King*, Tolkien continues his divided story, first tracing Gandalf's entrance to Minas Tirith (book 5) and the defense of that city against the enemy, then shifting to Aragorn's part in the action to relieve the city. Tolkien continues to add to his cast of characters with the defenders of Minas Tirith, among whom is Denethor, Boromir's father. He, too, has battled against Sauron, with one of the "seeing stones," the Palantir, which enable the user to become aware of actions at a distance. Sauron, however, as he has used one of the stones to seduce Saruman, so deceives Denethor that he despairs of victory. In the final battle, he commits suicide, another example of the ability of evil to spoil even those committed to good. After the victory, the heroic action draws to a climax with the anticipated final confrontation between Sauron's forces and the allies.

As the allies confront Sauron's forces for a decisive battle, Tolkien breaks off to begin book 6, tracing Frodo and Sam's journey to Mount Doom. Although brief by comparison with book 5—and necessarily brief, in that the reader is waiting for the resolution of the conflict—book 6 seems much longer. After rescuing Frodo from orcs in Mordor,

Sam accompanies his master across miles of wasteland in semidarkness to reach volcanic Mount Doom. They encounter orcs moving at Sauron's command and discover the truth of the biblical proverb, "A house divided against itself cannot stand." Within Mordor, Sauron's troops bicker, attack, and murder one another. A kingdom based upon selfishness must fall. Yet, after the journey, Frodo's courage fails him. Once at Mount Doom, he claims the ring for his own. The theme of the seductiveness of power is never more fully demonstrated than when the "ordinary" individual chooses power and self-fulfillment rather than the good of others. In an entirely satisfying moment, sudden and unexpected, Gollum reappears and battles Frodo, eventually biting off finger and ring together, only to perish in the volcano. The "happy ending" out of disaster, which Tolkien calls "eucatastrophe," is both carefully prepared for and felt as entirely providential. Victory both at Minas Tirith and in the final battle occurs because "unheroic," disregarded individuals rise to the heroic challenge.

Tolkien concludes with the elegiac tone of the last episode of *Beowulf*. Aragorn's triumph renews a tradition descended from the earliest ages of the world, but he will eventually die. Frodo's destruction of the ring has both ensured victory and weakened the power that sustains the elves, so that they must depart Middle-earth. Frodo's return home with his companions is also blighted by Saruman's oppression of the Shire; even the most peaceful land in Middle-earth has suffered.

## SUMMARY

The popularity of J. R. R. Tolkien's fantasies testifies to the frustrations felt by many of his readers. Modern technological life isolates humans from nature and from one another, and diminishes the "otherness," the sense of the world as marvelous. Tolkien's response was to present a world so compellingly envisioned that both perils and marvels, joys and sorrows seem understandable and real. In the stories, as in real life, ordinary characters must make significant moral choices. In the happy endings of his stories, Tolkien responds to another felt need, the sense that no ultimate purpose exists to make human suffering meaningful.

Richard J. Sherry

## BIBLIOGRAPHY

### By the Author

#### LONG FICTION:

*The Hobbit*, 1937

*The Fellowship of the Ring*, 1954

*The Two Towers*, 1954

*The Return of the King*, 1955

*The Lord of the Rings*, 1955 (collective title for 3 previous novels)

*The Silmarillion*, 1977

*The Children of Húrin*, 2007 (Christopher Tolkien, editor)

#### SHORT FICTION:

*Tree and Leaf*, 1964, revised 1988

*Unfinished Tales of Numenor and Middle-Earth*, 1980 (Christopher Tolkien, editor)

*The Book of Lost Tales*, 1983-1984

#### POETRY:

*Songs for the Philologists*, 1936 (with E. V. Gordon et al.)

*The Adventures of Tom Bombadil*, 1962

*The Road Goes Ever On: A Song Cycle*, 1967 (music by Donald Swann)

*Poems and Stories*, 1980

*The Lays of Beleriand*, 1985

#### DRAMA:

*The Homecoming of Beorhtnoth Beorhthelm's Son*, pb. 1953

#### NONFICTION:

*A Middle English Vocabulary*, 1922

*The Letters from J. R. R. Tolkien: Selection*, 1981 (Humphrey Carpenter, editor)

*The Monsters and the Critics, and Other Essays*, 1983

#### CHILDREN'S LITERATURE:

*Farmer Giles of Ham*, 1949

*Smith of Wootton Major*, 1967

*The Father Christmas Letters*, 1976

*Roverandom*, 1998

#### EDITED TEXTS:

*Sir Gawain and the Green Knight*, 1925 (with E. V. Gordon)

*Ancrene Wisse: The English Text of the Ancrene Riwe*, 1962

#### TRANSLATIONS:

"*Sir Gawain and the Green Knight*," "*Pearl*," and "*Sir Orfeo*," 1975

*The Old English Exodus*, 1981

*Finn and Hengest: The Fragment and the Episode*, 1982

## DISCUSSION TOPICS

- Why is *Beowulf* a good point of reference in a discussion of J. R. R. Tolkien's fiction?
- What word other than "escape" might more accurately signify the need to evade threats to life and human values?
- Compare Tolkien's subcreated world with C. S. Lewis's Narnia.
- What does Tolkien's characterization of Bilbo suggest about the author's estimation of the capacities of ordinary people?
- What is the significance of Tolkien's word-play in calling the resolution of *The Return of the King* "eucatastrophe"?

MISCELLANEOUS:

- The Tolkien Reader*, 1966  
*The Book of Lost Tales I*, 1983  
*The Book of Lost Tales II*, 1984

## LEO TOLSTOY

**Born:** Yasnaya Polyana, Russia  
September 9, 1828

**Died:** Astapovo, Russia  
November 20, 1910

*One of the greatest novelists of the nineteenth century, Tolstoy in later life became world-famous as a social and religious prophet.*

### BIOGRAPHY

Leo Tolstoy (TAWL-stoy), also known as Count Lev Nikolayevich Tolstoy, was born at his family estate, Yasnaya Polyana, about 130 miles southwest of Moscow, Russia, on September 9, 1828. His parents came from illustrious, aristocratic families accustomed to spending time at the court of the czar. His mother, Princess Marya Volkonsky, was the daughter of Prince Nikolay Volkonsky, a son of the Enlightenment, who had encouraged her to learn French and read French philosophers, particularly Jean-Jacques Rousseau. His father was Count Nikolay Tolstoy, who served in the Russian army when Napoleon I invaded Russia. Tolstoy lost both of his beloved parents by the time he was nine years old, thus ending his idyllic childhood at home. Until he was able to establish his own family at Yasnaya Polyana, Tolstoy dreamed of the lost days when his four brothers and sister lived in happiness, following the old Russian traditions. Throughout his life, his estate became an ideal in his mind.

After the death of his parents, Tolstoy lived with his aunt and attended school in Kazan. Aspiring to be a diplomat, he entered the department of Oriental languages at the University of Kazan; the following year, he changed his mind and entered law school. Diplomacy and law were not to be his future careers, however; instead, Tolstoy had begun writ-

ing a diary, an activity that he would continue until his death. Boris Eikhenbaum calls the diaries the laboratory in which Tolstoy perfected his writing craft and investigated moral concerns that troubled him. Tolstoy also began a rigorous reading program that included Russian classics, French novels, Charles Dickens, the New Testament, Voltaire, and his favorite, Rousseau.

Tolstoy's academic career was cut short at age nineteen, when he gained legal control of Yasnaya Polyana. Returning to the family estate, he tried to help the peasants by opening a school for children. His efforts failed because he was spending his time in debauchery. His brother, in an attempt to save him from ruin, convinced him to accompany him to the Caucasus. Tolstoy volunteered to serve in the Russian army and was stationed in a remote Cossack village. Far from his favorite distractions—wine, women, and gambling—he devoted himself to writing and composed his first work, *Detstvo* (1852; *Childhood*, 1862), whose publication attracted the attention of the famous Russian novelists Ivan Turgenev and Fyodor Dostoevski. When the Crimean War broke out, Tolstoy fought in the Fourth Bastion at Sevastopol in 1855. Out of his wartime experiences, he wrote *Sevastopolskiye rasskazy* (1855-1856; *Sevastopol*, 1887), which depicted war in such realistic, bloody detail that Czar Alexander II gave orders that Tolstoy's life be protected.

Returning home after the Crimean War, Tolstoy found himself a military and literary hero. At Yasnaya Polyana, he tried to resume his old way of life by improving the lot of his peasants and teaching their children. He also decided that he wanted to

marry and found a suitable candidate on a neighboring estate. Sophia Andreyevna Behrs (Sonya) was an eighteen-year-old girl, who, as a child, had memorized passages from Tolstoy's *Childhood* and *Otrochestvo* (1854; *Boyhood*, 1886). They married on September 23, 1862. In the early days of his marriage, Tolstoy wrote to his Aunt Alexandra, "I didn't think it was possible to be so much in love and so happy." After the honeymoon was over, however, the marriage, which lasted forty-eight years and produced thirteen children, nine of whom survived, was tumultuous.

Tolstoy's greatest literary works, *Voyna i mir* (1865-1869; *War and Peace*, 1886) and *Anna Karenina* (1875-1877; English translation, 1886), were written during the first decade and a half of the marriage. Sonya proved to be a valuable partner in this enterprise. Between childbirths, she not only copied *War and Peace* seven times but also functioned as a critically astute reader.

After laboring so long on *War and Peace*, Tolstoy was near collapse by the time its serial publication was completed in 1869. His state of mind was further worsened as he began working on his next novel, *Anna Karenina*. He was distressed by the theme of the novel, the dissolution of a family, and struggled to finish the work. When the book's final installment appeared, the work as a whole met with great critical and popular acclaim. Unfortunately, Tolstoy was unable to enjoy the book's success. During this period, his beloved surrogate mother, Aunt Toinette, and two of his children died. At the age of fifty, at the height of his powers, he entered the darkest period of his life, filled with religious doubts, the fear of death, and spiritual emptiness. Fearing that he might commit suicide, he avoided guns, ropes, and knives.

*Ispoved'* (1884; *A Confession*, 1885) documents his search through philosophy, religion, and the sciences for some answers to his spiritual malaise. He found some solace in the example of simple Russian peasants, who lived a rough, hardworking life close to nature. He also turned to Christianity and devised his own pragmatic five commandments: avoid anger, avoid lust, never take an oath, never resist evil, and love even your enemies.

In 1881, Tolstoy and his family moved to Moscow in order for his children to receive a formal education. Tolstoy was deeply moved by the poverty that he saw in the slums of Moscow and attempted

to ameliorate the conditions of the poor. When famine devastated Russia in 1891 and 1892, he organized relief efforts and established centers that fed sixteen thousand people daily. Beginning in 1880, Tolstoy devoted nearly all of his efforts to social, religious, and political causes outside literature. As he became world-famous for his moral stances, disciples were drawn to Yasnaya Polyana. Sonya deeply resented these intruders, whom she called "the dark people." Sonya's dissatisfaction with her husband's withdrawal from family life increased in 1883 when Tolstoy met Vladimir Chertkov, who shared many of his social beliefs and encouraged him in publishing ventures that included producing books cheaply so that the poor could afford to buy them. The publication of *Smert' Ivana Il'icha* (1886; *The Death of Ivan Ilyich*, 1887) briefly convinced Sonya that Tolstoy had not abandoned literature, thus assuring her that he would continue to provide for his family. Nevertheless, in 1891 Tolstoy renounced all the rights to his works published after 1881 and gave away all of his property to his wife and nine children. Sonya was still not satisfied and wanted more of the proceeds from his works.

Tolstoy was also contending with religious and political authorities. In *Voskreseniye* (1899; *Resurrection*, 1899), he attacked the Russian Orthodox Church and its leading official, who subsequently excommunicated Tolstoy. In a letter to Czar Nicholas II, titled "Dear Brother," Tolstoy urged reforms, warning that the Russian people were on the verge of rebellion. In "The Significance of the Russian Revolution," Tolstoy recommended that Prime Minister Pyotr Stolypin abolish the private ownership of property.

The end of Tolstoy's life was marred by the struggles of Sonya and Chertkov over his will and diaries. Wakened one night to hear his wife rifling through his papers in his study, Tolstoy decided to flee his home. He wrote his wife a letter thanking her for the forty-eight years of married life that they had shared and asking for mutual forgiveness. In his flight, pneumonia forced him to halt at the railroad station at Astapovo, Russia. He died in the stationmaster's house on November 20, 1910.

## ANALYSIS

Tolstoy displayed two distinctive attitudes toward art during his long career as a writer. During

his early years, he believed that contemporary events, such as the emancipation of women and political reforms, were not the proper subject for art. In a letter to Peter Boborykin in 1865, Tolstoy claimed that art's goals are "incommensurate with social goals." Art, instead, should "force people to love life in all its innumerable, inexhaustible manifestations." Tolstoy's descriptions of Natasha at her first grand ball or Nicholas Rostov on the wolf hunt in *War and Peace* illustrate how magnificently he achieved these artistic goals. His inspiration flowed whenever he was writing about his own past and that of his family. His parents were the models for Nicholas Rostov and Marya Bolkonsky; his wife's family was the prototype for the Rostovs; his wife's sister, Tanya, became Natasha Rostov; he put himself into the characters of Pierre Bezuhkov and Prince Andrew; and Yasnaya Polyana transformed itself into Bald Hills. The past provided a buffer zone in which distant memories could be transposed into art.

He lost his detachment when he began writing *Anna Karenina*, according to Tolstoy's biographer A. N. Wilson. No longer processing past memories, he had to draw on contemporary themes, especially on his own life experiences as he lived them. This mode of operation was extremely painful; he was writing about the dissolution of a marriage in *Anna Karenina*, just as he and his wife were engaging in bitter feuds. Tolstoy believed in general that adultery was a repugnant topic with no redeeming value. In a letter to Nicholas Strakhov in 1875, Tolstoy writes, "My God, if only someone would finish *Anna Karenina* for me! It's unbearably repulsive."

After *Anna Karenina* was completed, Tolstoy turned away from fiction; no great novels would ever again issue from his pen, though he subsequently wrote some good short stories and a novel, *Resurrection*. As a sign that his creative energy was gone, Tolstoy failed to continue his saga of the Decembrists that he had begun in *War and Peace* and eventually abandoned it forever.

By the time that Tolstoy published *Chto takoye iskusstvo?* (1898; *What Is Art?*, 1898), he had long entered his second period as a writer and abandoned his original conception that art should make people love life. He now believed that the artist should be socially responsible and write works that would inspire the people to live Christian lives.

In *What Is Art?*, Tolstoy cites as an example his experience at a rehearsal for an opera. Observing a harried stagehand, he reflects on the downtrodden masses who must labor behind the scenes for the pleasure of the decadent bourgeoisie. He concludes that high culture and its institutions are elitist, exploit the people, and offer nothing of value to them. In contrast, art "flowing from love of God" would nourish the souls of all people.

There is much to value in Tolstoy's views, but, unfortunately, his feelings toward art tend to be totalitarian. For example, he condemns artistic works that do not fit his criteria and authors, such as the Greek tragedians, William Shakespeare, John Milton, and Dante, of whom he does not approve. The publication of *What Is Art?* discomfited Tolstoy's European and American readers, who felt that he had become "a dragon" standing in the path of modern art.

Attempts to interpret Tolstoy's views often emphasize a perceived conflict in his nature. Edward Wasiolek in *Tolstoy's Major Fiction* (1978) argues that "Tolstoy's creative and ideational worlds are of one cloth." That is, Tolstoy in his greatest fictional works attempts to bridge the gap between the world of the flesh and the world of the spirit, not separate the two. He sought for a unifying principle that would incorporate both.

In fact, the search for a unifying principle was a common link among the great nineteenth century Russian novelists such as Dostoevski and Turgenev. Their preoccupation with the spiritual lives of their characters was attributable, in part, to their upbringing in the Orthodox Church. That they were neither Protestant nor Catholic produced in them a different conception of the novel's function. The Western churches developed under a tradition of the *disputatio*, based on the practice of medieval scholastics who debated one side of an issue and then the other. The Orthodox Church, on the other hand, urged its followers to practice the *kenotic* ideal and unquestioningly imitate the life of Christ. As a result, the forum for theological debate in Russia did not take place in its churches, where dissent was not allowed, but in the more intellectually open forum of the novel. Almost all the novels of Dostoevski and Tolstoy, for example, center on spiritual quests. While on these quests, the characters speculate on the existence of God, their place in the universe, and the right way to live. In this

context, Tolstoy's novels are, as he says in his defense, exactly "what the author wished and was able to express in the form in which it is expressed."

## WAR AND PEACE

**First published:** *Voyna i mir*, 1865-1869  
(English translation, 1886)

**Type of work:** Novel

*A young Russian nobleman searches for the meaning of life in the salons of high society and on the battlefield of Borodino during the Napoleonic wars.*

*War and Peace*, arguably the greatest novel ever written, chronicles the alternating periods of war and peace in Russia during the first two decades of the nineteenth century. Tolstoy intended to write the story of a man returning home from exile in Siberia in 1856. The man had been a Decembrist, a member of an enlightened revolutionary movement seeking constitutional reform in Russia before czarist forces suppressed the movement in December, 1825. In order to understand his hero, Tolstoy decided that he first had to write about the man's youth: thus, the story begins in July, 1805.

The reader first meets the unlikely hero, Pierre Bezukhov, at a soirée in St. Petersburg. He has just returned to live in Russia after studying abroad. Awkward, yet brash, his naïve idealism leads him into a political argument, during which he asserts his belief that Napoleon I is the "greatest man in the world." After the soirée, Pierre retreats to the home of his old friend, Prince Andrew Bolkonsky, and the conversation about Napoleon continues.

Meanwhile, war talk is also in the air nearby in the Rostov household. The young son of Count Rostov, Nicholas, has decided to join the hussars, thus increasing the adoration of his cousin Sonia, who is in love with him. After a spat over Nicholas's harmless flirtation with another girl, they kiss. Observing the scene is Nicholas's impish thirteen-year-old sister, Natasha.

These early scenes of social frivolity and domestic happiness led Tolstoy in the early stages of composition to title his book, "All's Well That Ends Well." Once he reached the sections of the novel

that deal with the ravages of the Napoleonic Wars, however, he became more philosophically introspective. Drawing on his own experiences during the Crimean War, Tolstoy shows how war in its wake sweeps aside individual aspirations, disturbs familial bonds, and changes the destiny of nations forever. No wonder, then, that an important theme of the novel is the search for meaning in lives whose order has been completely overturned because of war.

The novel centers on Pierre's search. He is a good man who is still basically unformed. The fact that he was illegitimate underscores his uncertain sense of identity. His strength as a character is that he searches for his identity down several varied paths.

At the beginning of the novel, he explores the life of dissipation by allowing himself to fall into debauchery with wild companions. Next, he lives the life of the flesh by marrying the cold, beautiful Helene Kuragin. When she can do nothing to assuage his inner emptiness, a chance encounter with a Freemason attracts Pierre to this movement. Freemasonry, a mystical brotherhood based on the ritual and structure of medieval trade guilds, was popular in Russia at the time and appealed to intelligent men such as Pierre, who were searching for the meaning of life. Pierre eventually becomes disillusioned with his fellow Freemasons' shallow altruism.

As a last resort, he stumbles onto the battlefield of Borodino to see what war is like. Deeply upset by the carnage that he sees around him, Pierre resolves to assassinate its perpetrator, Napoleon. Believing that their destinies are linked, Pierre, in search of Napoleon, wanders around in Moscow, which is burning after the Russian army has abandoned it. Pierre is captured as an incendiary by the French, who now occupy Moscow. Spared from execution at the last moment, Pierre meditates on his fate in the company of other prisoners of war. He is particularly struck by the peasant Platon Karatáev, who is "the personification of everything Russian."

Karatáev intuitively seems to know the right way to live, and Pierre wants to learn from his example.

When Karatáev dies, Pierre has a vision of a globe whose surface consists of drops of liquid:

God is in the midst, and each drop tries to expand so as to reflect Him to the greatest extent. And it grows, merges, disappears from the surface, sinks to the depths, and again emerges. There now, Karatáev has spread out and disappeared.

Pierre's epiphany teaches him not to fear death: death is merely a reabsorption into the flow of life. Prince Andrew, mortally wounded at the battle of Borodino, discovers this same truth, unfortunately, on his deathbed:

Everything is, everything exists, only because I love. Everything is united by it alone. Love is God, and to die means that I, a particle of love, shall return to the general and eternal source.

Besides their common philosophical beliefs, Pierre and Andrew are further linked by their relationship to Natasha, a character who intuitively experiences these notions of love. Both fall in love with her and propose marriage. Andrew and Natasha are ill suited to one another. Natasha, full of exuberant, youthful spontaneity, cannot endure the year's postponement of their marriage that Prince Andrew requests in deference to his father's wishes. They do reconcile briefly after Andrew is mortally wounded. Too late, Andrew learns to live by the heart rather than the head. His realization, "Death is an awakening," can only remain an abstract thought, because he cannot experience it.

Pierre's compassion saves Natasha from her grief following Prince Andrew's death. They are the two characters, in particular, who have an in-born generosity and kindness of spirit. They have the capacity to forget themselves when others are in distress. At some risk to himself, Pierre saves the lives of several people during the burning of Moscow. Natasha throws the family's possessions out of the moving carts in order to transport wounded soldiers to safety. Most important, though, Pierre and Natasha save each other by marrying. Natasha, whose emotional life has been undirected toward any goal, can now focus her energies on Pierre and their children. She devotes "her whole soul, her

whole being" to them. Pierre, too, finds in his home a setting in which he can live his vision of the cosmic globe.

Tolstoy ends *War and Peace* by rising above the Bezukhov's domestic scene and surveying the big picture. In the second epilogue, he asks such profound questions as the following: What does this all mean? Why did it happen? What force made people act so? He meditates on Napoleon's power and how easily his soldiers transferred their power to him. Yet, Tolstoy reminds his readers, "A tsar is the slave of history." What freedom therefore does any person possess in the face of such determinism? Tolstoy answers the question by saying that each person has two faculties: reason, which teaches humans the laws of inevitability, and consciousness, which makes them feel free. He goes on to say, "Only by uniting them do we get a clear conception of man's life." Natasha and Pierre both develop their sense of consciousness and, thus, experience freedom. The memorable moments in which they are the most free occur when they are the least aware of themselves. Their example, Tolstoy implies, demonstrates the right way to live.

## ANNA KARENINA

**First published:** 1875-1877 (English translation, 1886)

**Type of work:** Novel

*A married woman's love affair with another man throws her life into such disorder and despair that she kills herself.*

The source of Tolstoy's next great novel, *Anna Karenina*, lies in an idea that he conveyed to his wife in 1870. He wanted to write a story about a married woman who is disgraced by a sexual scandal. He would depict her "not as culpable, but as uniquely worthy of pity." This story he knew from his own family: his only sister, Marya, had recently left her husband for an adulterous liaison with a Swedish viscount. Two years later, he saw firsthand the potential disastrous results of such a passion. One of his neighbors cast off his mistress, Anna Stepanovna Pirogova, who then threw herself under a train. Tolstoy viewed her remains afterward.

Within the year, he began writing *Anna Karenina*. He was stimulated further by his reading of Alexander Pushkin's *Povesti Belkina* (1831; *Russian Romance*, 1875), which he admired. He was struck by the phrase, "The guests were arriving at the country house," and began to write his story around it.

*Anna Karenina* begins with the oft-quoted line, "Happy families are all alike; every unhappy family is unhappy in its own way." In this novel, Tolstoy portrays both a happy and an unhappy family. The happy Constantine Levin and his wife, Kitty, resemble Pierre and Natasha Bezukhov in *War and Peace* because of their positive attitudes in the face of adversity and their compassion toward other people. Levin and Kitty's rapport is such that Levin exclaims that he does "not know where she ended and he began."

The marriage of Alexey and Anna Karenin, on the other hand, is a loveless match held in place by the dictates of society. When Anna meets a dashing officer of the guards, Alexey Vronsky, she readily abandons her husband and son for the sake of illicit passion. Far from being an ennobling force, Anna and Vronsky's love leads to chaos, ruin, and, eventually, Anna's death under the wheels of an oncoming train.

Throughout the novel, the characters of Anna and Levin are compared and contrasted. Distantly related through marriage (Anna's brother is married to Kitty's sister), they make life choices that are diametrically opposed to each other. Anna is a young, beautiful, intelligent, vital woman who inexplicably and single-mindedly chooses to destroy herself. After discovering that Anna is in love with Vronsky, Anna's husband suggests a divorce. Yet Anna rejects his offer by saying that she does not want a divorce if it is the result of "his generosity." Vronsky, too, is willing to accommodate her by taking her away from Moscow and marrying her, yet she once again refuses to finalize the divorce. Instead, she torments him with her possessiveness and fits of jealousy. Her last words before she throws herself under the train reflect her vindictive frame of mind against Vronsky: "I will punish him and escape from everyone and from myself."

The origins of Anna's self-destructive nature are not clear—though, in truth, Anna has what is now called an addictive personality. She demands more and more of Vronsky's love because she can never believe that he truly cares for her. Even when he

abandons his career to spend more time with her, she still cries out for more attention. Anna accurately describes the state of their interaction by saying, "My love keeps growing more passionate and egoistic, while his is waning and waning." Their relationship cannot grow in this type of environment, nor does it nourish them at all as individuals. Some critics point out that it is Anna's unbridled sexuality that corrupts her. Edward Wasiolek in *Tol-*

*stoy's Major Fiction* claims that, in Tolstoy's view, sex is "a massive intrusion on a person's being and a ruthless obliteration of the sanctity of personhood." In other words, Anna and Vronsky's sexuality interferes with their spirituality.

Though Kitty and Levin deeply love one another—Levin, in fact, believes that marriage is "the chief affair of life"—the compulsive element that charac-

terizes Anna's sexual passion is missing in their relationship. Their love is grounded in the rural community in which they live; they work, play, love, and have babies in the midst of the active life that is occurring around them.

Levin, like Anna, experiences moments when he would like to escape from the conditions of his life. The period following the death of his brother is a particularly dark time for him. He must consciously avoid ropes and guns so that he will not be tempted to commit suicide. Tolstoy has written some of his own spiritual crisis into this description of Levin's situation. Levin achieves a measure of comfort and spiritual solace by simply experiencing life in the moment in which he is living it. The mowing scene shows him unconsciously living life to its fullest extent.

Later, he gains further insight from the peasant Fyodor, who advises him that a man must live "for his soul" and "not forget God." These wise words penetrate to the heart of Levin's spiritual crisis, and he resolves to transform himself. As Wasiolek points out, Tolstoy's characters, such as Pierre in *War and Peace*, come into touch with reality when they cease their efforts to "possess" it. In Tolstoy's

world, the ego must be subdued in order for people to love correctly and take their place in the flow of existence. Anna fails to adjust her personality to this truth; thus, she is left wondering, “Why not put out the light?”

## THE DEATH OF IVAN ILYICH

**First published:** *Smert' Ivana Il'icha*, 1886  
(English translation, 1887; collected in  
*Leo Tolstoy: The Death of Ivan Ilych, and  
Other Stories*, 2003)

**Type of work:** Novella

*In nineteenth century Russia, a judge  
accidentally falls and develops a fatal illness,  
which forces him to contemplate death and regret  
the life that he has lived.*

*The Death of Ivan Ilyich*, one of the greatest stories dealing with the subject of death, marked Tolstoy's return to fiction writing after his religious conversion. In 1881, his imagination was sparked when he heard the story of the death of Ivan Ilich Mechnikov, a judge of the Tula court, who expressed on his deathbed profound regret for the life that he had lived.

As in the real-life story, Tolstoy makes his Ivan Ilyich wake up to the hidden possibilities of life on his deathbed. Before then, Ilyich has lived his life thinking only of himself and his next round of pleasure. In the past, when unpleasant events occurred, such as the death of a few of his children and his wife's growing irritability, he turned away from these domestic concerns and spent time working at the office. His life continues for seventeen years in this manner, until the fateful day when he falls off a ladder while hanging drapes. He develops symptoms, a queer taste in the mouth and stomach discomfort, and, before he knows it, he is on his deathbed.

From a life built around the pursuit of pleasure and the avoidance of unpleasant reality, Ivan is suddenly catapulted into the world of sickness and death. He recalls, with irony, an old syllogism that he had learned: “Caius is a man, men are mortal, therefore Caius is mortal.” Never before had he seriously contemplated his own mortality. He tortures himself with the thought, “What if in reality,

all my life, my conscious life, has not been the right thing?”

The horrible truth that he indeed has failed to do the right thing transforms the remaining two hours of Ivan's life. The key to his transformation lies in his relationship to the peasant Gerasim, who does not shun the unpleasant aspects of his illness as does the rest of Ilyich's family and who treats his fatal condition matter-of-factly. Gerasim can “understand and pity him” in a compassionate and loving manner. In his final, agonizing moments, Ivan learns that he, too, can be compassionate and loving. He pities his son, who weepingly kisses his hand, and feels sorry for his despairing wife. He can die in peace, because “In the place of death there was light.”

Though Ilyich takes the last rites of the church in his final dying moments, the novella is not overtly a religious parable. The novella instead celebrates the virtues of pity and compassion that the simple Russian peasant knows and practices. Ilyich's fault was that, during his life, he had lived too much by his head (his surname, Golovin, suggests *golova*, the Russian word meaning “head”). The suffering that he feels in his dying moments awakens him to the suffering of the other people around him and, thus, to the brotherhood of all people. The awareness of death is what holds people together, in Tolstoy's view. Though Ilyich's new life lasts only a couple of hours, Tolstoy suggests that he is a lucky man.

## SUMMARY

Described by the Russian writer Maxim Gorky as “a whole world,” Leo Tolstoy incorporated his life, the past life of his family, and the destiny of the Russian people into his art. He tried to capture the varied facets of nineteenth century Russian reality, as well as discover a unifying truth that would explain the nature of humankind's spiritual existence. In the process, he created two of the world's greatest novels, *War and Peace* and *Anna Karenina*.

Not satisfied with this accomplishment, Tolstoy in midlife abandoned art and turned his prodigious energies to social reform. He contributed to the intellectual ferment that ultimately led to the Russian Revolution, which occurred seven years after his death.

## DISCUSSION TOPICS

- Leo Tolstoy's *War and Peace* reflects one of the author's views of appropriate subject matter for a novel, *Anna Karenina* another. Both were successful. Can there be such a thing as "inappropriate" subject matter?
- Would Tolstoy's *What Is Art?* be taken seriously if it had not been written by a man of his accomplishments?
- Do the spiritual dimensions of Tolstoy's fiction reflect positively or negatively on the practices of the Russian Orthodox Church?
- Pierre Bezukhov leads a blundering, haphazard life, but he prevails. What are the secrets of his endurance?
- Is the fact that the last section of *War and Peace*, "Part Two," is primarily a long essay evidence that Tolstoy concluded that the novel itself did not accomplish what he had intended?
- Does Tolstoy succeed in presenting Anna Karenina as pitiful rather than guilty?
- Is Levin in *Anna Karenina* a viewpoint character for Tolstoy?

## GIUSEPPE TOMASI DI LAMPEDUSA

**Born:** Palermo, Italy  
December 23, 1896

**Died:** Rome, Italy  
July 23, 1957

*In a handful of works published after his death, Lampedusa explored the complexities and contradictions of the human condition, most notably through the story of a Sicilian prince who realizes that his class's centuries-old way of life is doomed.*

### BIOGRAPHY

Giuseppe Tomasi di Lampedusa (toh-MAH-see dee lahm-puh-DEW-suh) was born on December 23, 1896, into an impoverished, aristocratic Sicilian family of ancient if generally undistinguished lineage. Lampedusa's great-grandfather, an amateur astronomer of some note, was an exception to this pattern. However, his failure to leave a will at the time of his death plunged his descendants into a ruinous cycle of legal claims and counterclaims that scattered what little remained of the family fortune. It is this intriguing figure, Prince Giulio Tomasi, who would serve Lampedusa as the model for Prince Fabrizio Corbera in his novel *Il gattopardo* (1958; *The Leopard*, 1960).

Lampedusa was a shy, unathletic child who preferred his own company to that of others. He spent most of his early years in the family palace in the Sicilian city of Palermo and retained vivid sensory memories of it and his family's properties in the countryside. According to Lampedusa's biographer David Gilmour, the major influence in his life seems to have been his mother, a talented, attractive woman who figured prominently in Palermo's smart society.

Lampedusa's father hoped that his son would become a diplomat. As a result, the young man attended school in Rome, but with Italy's entry into World War I in 1915, his university career was interrupted. Drafted for military service late that year, Lampedusa served in the artillery and saw active service in 1917 against Austria. He was wounded and captured shortly afterward, but managed to escape.

After the war Lampedusa suffered from a variety of illnesses, some apparently psychosomatic, and abandoned his law studies. He seems to have grown disillusioned with Sicily, and over the next few years he lived for the most part in northern Italy. Although he had given up a university career, he could read a number of languages and had transformed himself into an expert on British and European history and literature.

Lampedusa had met his uncle's married stepdaughter, the Freudian psychoanalyst Alessandra Wolff, in London in 1925, and later visited her family estate in Latvia. The two came to share an intense interest in intellectual matters, and after Alessandra obtained a divorce, she and Lampedusa married in 1932. Lampedusa's mother was anxious for the couple to live in the family's palazzo in Palermo, but the cool welcome that Alessandra received from her husband's mother and from Sicilian society in general led her to spend much of her time in Latvia with her patients. Lampedusa remained in Palermo, and upon the death of his father in 1934, became prince of Lampedusa.

With the approach of war, Lampedusa was called up briefly for active duty, and Alessandra was forced to leave her estate in Latvia. In 1943, the Palazzo Lampedusa was destroyed in an Allied raid, as was the house that Lampedusa and his mother had rented in a distant village in hopes of avoiding the bombing. After the Allied invasion, he was asked to serve as president of the Sicilian Red Cross, a position that he held for two increasingly frustrating years. Shortly after Lampedusa's resignation in 1947, his mother died.

Lampedusa was eventually able to buy a smaller palazzo in Palermo, the chief attraction of which seems to have been that it had once belonged to his great-grandfather, and in 1955 he sat down to write a novel. He had contemplated such a project for decades but seems to have been prompted by two immediate circumstances. His cousin Lucio Piccolo had published his first collection of poetry to wide acclaim the preceding year, and Lampedusa himself had begun offering lectures on literature that were attracting an appreciative audience.

Having finished several chapters of what would eventually be published as *The Leopard*, Lampedusa stopped to compose the opening pages of an autobiography—perhaps an act of psychological therapy undertaken at the suggestion of his wife. Subsequently he added several more chapters to his novel, but the publishers to whom he offered it turned it down. During this time he also wrote two short stories and the opening chapter of a second novel.

Lampedusa died of cancer on July 23, 1957, two days after receiving yet another rejection. It was only after his death that *The Leopard* was accepted for publication. It generated both controversy and acclaim upon its appearance in Italy in 1958 but went on to win the country's highest literary award, the Strega Prize.

## ANALYSIS

Lampedusa's literary reputation rests upon a very small number of works: a full-length novel, the opening chapter of a second novel, two stories, a fragment of autobiography, and a number of lectures on literature. None was published during his lifetime, and if it were not for the posthumous acclaim given the completed novel *The Leopard*, the other pieces would probably never have seen the light of day. However, all were written during the last two and a half years of his life, and as a result reflect the outlook of a mature, thoughtful, and widely read man.

The lucid quality of Lampedusa's writing reflects his regard for nineteenth century French author Stendhal, whose style, Lampedusa wrote, is one "which in its dryness may seem easy but which is in fact the fruit of . . . a continuous labour of elimination." Whether describing the dark ruminations of Prince Fabrizio in *The Leopard* or the amatory reveries of the characters in "La sirena" ("The

Professor and the Mermaid"), Lampedusa strove to eliminate the inessential, creating a prose style that is clear and concise.

Although critics have identified particular works of art that Lampedusa employed as touchstones, his most successful symbols and metaphors operate at an immediate, sensory level. In an early scene in *The Leopard*, Lampedusa uses flowers as emblems of the state of Sicilian psychology. Observing roses whose cuttings he had secured in Paris years earlier, the prince realizes that they "had degenerated; first stimulated and then enfeebled by the strong if languid pull of Sicilian earth, . . . they had changed into things like flesh-colored cabbages." Several scenes in "I gattini ciechi" ("The Blind Kittens") turn upon the quantity and crudely intense flavor of food served in the home of the grasping, upstart Ibba family. In "The Professor and the Mermaid," Lampedusa's irritable scholar registers his disgust toward the vacuous newspapers he is reading by spitting continuously.

In many cases Lampedusa juxtaposed sharply differing images and themes to advance his story. The contrast between the roses that bloomed so gracefully in Paris but so unwholesomely in Sicily is one example of this method. Another involves the prince's dog Bendicò, a great Dane whose wholehearted enthusiasm stands in sharp and repeated contrast to his master's obsessive need to analyze his every action and emotion.

Aside from his lectures on literature and the slightest of his stories, Lampedusa's works share not only a Sicilian setting but also several internal connections. *The Leopard* deals with the most illustrious of the Salinas, Don Fabrizio. "The Blind Kittens," which takes up the chronicle of Sicily approximately where *The Leopard* ends, includes a Salina as a character, while the journalist narrator of "The Professor and the Mermaid" identifies himself as the last of the Salinas, the sole surviving heir of *The Leopard*. "Ricordi d'infanzia" ("Places of My Infancy") deals factually with many of the settings and images that Lampedusa incorporated into his other works.

Lampedusa's feelings for Sicily were complex, and he explored them through his characters' attitudes and conversations. Prince Fabrizio speaks at length of Sicily's long history of subjugation and the sense of lethargy and fatality that it has engendered: "Sleep, sleep, . . . that is what Sicilians

want.” The professor of “The Professor and the Mermaid” speaks lyrically of the beauty of Sicily but adds that it is “inhabited by donkeys.”

Although Lampedusa was criticized after his death for what appeared to be his repeated attacks on his native land, his attitudes were not wholly consistent with Don Fabrizio’s. By dramatizing the prince’s fatalism so memorably in *The Leopard*, Lampedusa managed to reveal its shortcomings.

## THE LEOPARD

**First published:** *Il gattopardo*, 1958 (English translation, 1960)

**Type of work:** Novel

*Realizing that his way of life is coming to an end, a Sicilian prince chooses to cooperate with the forces dooming the aristocracy.*

*The Leopard* is set during the period of the Risorgimento, the popular nineteenth century movement to unite the various states of Italy into a single country. As the book opens, revolutionary leader Giuseppe Garibaldi is invading Sicily. After securing the island and the southern portion of the Italian peninsula (together the Kingdom of the Two Sicilies) from the Bourbon regime, he will offer the territory to another monarch, King Victor Emmanuel II of Savoy, who will then rule a united Italy.

*The Leopard* is a leisurely, episodic novel divided into eight chapters, each identified by month and year as well as by title. The first four take place in 1860, and the next two in 1861 and 1862, respectively. The seventh chapter takes place in 1888, and it and the eighth chapter, set in 1910, function almost as codas to the first six.

The book’s first chapter, “Introduction to the Prince,” takes place in May, 1860, and actually functions as an introduction to the entire book, ranging backward in time and involving most of the book’s characters and themes. The prince of the title is Don Fabrizio Corbera, the proud, sensual, intellectually skeptical prince of Salina. An amateur astronomer whose greatest satisfaction derives from studying the heavens, he has discovered and named two asteroids. Don Fabrizio is married to Princess Maria Stella, and their children include a

son, Paolo, and three daughters, Carolina, Concetta, and Caterina.

Although he loves his children, Don Fabrizio finds them conventional. He reserves his highest regard for his high-spirited nephew and ward, Tancredi, who has actually joined the forces of Garibaldi. As Tancredi explains, “If we want things to stay as they are, things will have to change.” In turn, the bemused Don Fabrizio, who sees a reflection of his younger self in Tancredi, gives him a roll of gold coins to help him in his effort.

Set in August of the same year, “Donnafugata” recounts the Salinas’ annual visit to a distant and peaceful estate, which Lampedusa based closely on his own family’s estate of Santa Margherita. They are accompanied by Tancredi, who has been given a month’s leave from Garibaldi’s victorious army. At Donnafugata the prince hears of the growing wealth and power of the town’s mayor, Don Calogero Sedàra. He also learns that his daughter Concetta has fallen in love with Tancredi but realizes sadly that Tancredi’s ambitions will require a wealthier and livelier wife. That evening Don Calogero’s beautiful, earthy daughter Angelica accompanies her father to dinner at the Salina palazzo, and Tancredi is clearly taken with her.

In “The Troubles of Don Fabrizio,” which takes place in October, 1860, Tancredi asks the prince to approach Angelica’s father to ask for her hand in marriage. The request dismays Princess Stella, but the prince understands the wisdom of Tancredi’s decision and approaches the mayor. Later that month the kingdom holds a plebiscite on the question of unification. Taking Tancredi’s words about change to heart, Don Fabrizio has urged those seeking his opinion to vote “yes,” but Sedàra takes no chances. Recognizing the course that events are taking, he falsifies the vote count to make it appear that, however unlikely, the citizens of Donnafugata have voted unanimously in favor of union.

“Love at Donnafugata” is set in November, 1860, and chronicles the wedding preparations of Tancredi and Angelica. At the same time, Don Fabrizio has been approached by a representative of the new government to serve as senator. Pondering his own life and the events of the past few months, the prince rejects the offer, pointing out that the new government’s dishonesty has nullified whatever promise it might have offered. He then goes on, however, to direct much of the blame at himself

and his fellow islanders: “In Sicily it doesn’t matter whether things are done well or done badly; the sin which we Sicilians never forgive is simply that of ‘doing’ at all.” In what is either an act of foresight or cynicism, or perhaps both, he proposes that Sedàra be appointed senator.

Set in February, 1861, “Father Pirrone Pays a Visit” interrupts the otherwise steady flow of the novel. Focusing on the Salina family chaplain, it draws an ironic comparison between the approaching wedding in Donnafugata and the machinations surrounding a much cruder peasant marriage. “A Ball,” set in November, 1862, describes the wedding ball in Donnafugata and highlights the prince’s increasing impatience with the futility of his own life. In “Death of a Prince,” set in July, 1888, Don Fabrizio recalls the few days and weeks in which

he was truly happy. He experiences death as a beautiful woman, a presence he had detected in the stars but never glimpsed face to face.

The book’s final chapter, “Relics,” is set much later, in 1910, and describes the three Salina daughters, spinsters all. Intensely devout, they have assembled a vast array of what turn out to be fraudulent holy relics that must

be destroyed by a church official. The same afternoon, Concetta finally disposes of the stuffed carcass of Don Fabrizio’s dog, Bendicò. Flung out a window, the animal briefly assumes the proud, upright carriage of the leopard of the family crest, but he then collapses in a heap of dust in the courtyard.

Lampedusa apparently did not know that he himself was dying when he started writing *The Leopard*, but the entire book is imbued with a sense of mortality—a factor that was to play a large part in its reception by publishers. The leading Italian literary figures of the period were concerned with contemporary life, formal experimentation, and social progress. In such an atmosphere, the book’s lugubrious tone, its readability, its focus on the past, and its pessimistic attitude toward change practically guaranteed its initial rejection.

## TWO STORIES AND A MEMORY

**First published:** *Racconti*, 1961 (English translation, 1962)

**Type of work:** Memoir, short story, and chapter of an unfinished novel

*An author recalls details of his idyllic childhood, an aging professor struggles with memories of an extraordinary love affair, and a clan of erstwhile peasants compound their holdings.*

*Two Stories and a Memory* is a nearly complete translation of the collection published in Italian in 1961 as *Racconti*. It includes the pages of “Places of My Infancy,” an autobiography that Lampedusa composed while writing *The Leopard*; “The Professor and the Mermaid,” a short story that develops some of the themes of *The Leopard* in sprightlier fashion; and the first chapter of *The Blind Kittens*, a novel that Lampedusa did not live to complete. It omits a slight and uncharacteristic story called “La gioia e la legge” (“Joy and the Law”) that did not appear in English until 1993.

According to Lampedusa’s widow, she suggested that her husband undertake “Places of My Infancy” as an act of therapy. Although he apparently intended to carry the narrative forward into his adult life, he never did so. As it stands, the autobiography consists of eight sections, each highlighting a particular aspect of his childhood world, including the shocked reactions of his mother and father to the assassination of King Umberto I in 1900, his enchantment with the Lampedusa palazzo in Palermo, and his family’s annual journeys to the Santa Margherita estate. Beyond its particular charms, the work reveals the factual basis for many of the events and locales described in *The Leopard*.

“The Professor and the Mermaid” is set in the mainland city of Turin but concerns an aging professor of Greek and a journalist who discover that they both are Sicilians. Immensely learned but gruff and seemingly uncultivated, the professor gradually reveals himself to be a dreamer who has never shaken off the formative event of his student days, an intensely physical affair with a siren named Lighea. Daughter of Calliope, the classical Greek muse of poetry, Lighea had promised the youth

that he could avoid the sorrows of old age by following her into the sea. Later the journalist learns that the professor has fallen overboard from a ship and disappeared.

"The Blind Kittens" is the opening chapter of a novel that would apparently have dealt with the upstart Ibba clan, members of a new, aggressive middle class that would wrest control of society from the nobility. In this fragment, Lampedusa displays the same narrative assurance that he displayed in *The Leopard*, but his obvious antipathy to both the Ibbas and the aristocrats docilely observing their rise suggests that the novel would have lacked the grandeur that distinguished the earlier work.

Although not in itself a major work, *Two Stories and a Memory* makes it clear that had he not died at the age of sixty, Lampedusa might well have gone on to produce a large body of significant work.

## SUMMARY

Although he and his wife adopted a son late in their lives, Giuseppe Tomasi di Lampedusa realized that he was essentially the final member of his line. He had grown up in an atmosphere of faded splendor and had lived to see the destruction of a way of life that generations had taken for granted. Although he never had to earn a living, he seems to have felt a need to sum up not only his personal and familial experience but also that of Sicily itself. *The Leopard* constitutes his most comprehensive literary statement, and although it engendered considerable controversy upon its publication, it has since been recognized as one of the greatest novels of the twentieth century.

## DISCUSSION TOPICS

- What is Giuseppe Tomasi di Lampedusa's attitude toward change?
- Discuss the ambivalence that Lampedusa felt toward his native Sicily.
- How did the work of Stendhal influence Lampedusa's writing?
- Discuss the relationship between *The Leopard* and Lampedusa's other works.
- Why was *The Leopard* rejected by some publishers and attacked by some critics?

Jacques Sassier/Editions Gallimard

## MICHEL TOURNIER

**Born:** Paris, France  
December 19, 1924

*One of the most important French writers of the second half of the twentieth century, Tournier has used traditional literary forms to investigate revolutionary ideas about the individual and society.*

### BIOGRAPHY

Michel Edouard Tournier (tur-NYAYR) was born in Paris, France, on December 19, 1924. He was a nervous, sickly child who was deeply affected by the pain and terror of having his tonsils removed when he was four years old. Tournier also was a poor student who eventually attended a dozen public and private schools.

Although Tournier's parents were French, both spoke German and were intensely interested in German culture. Tournier's mother returned every summer to the German boarding school she had once attended, taking Tournier and his siblings with her. Thus Tournier witnessed the rise of Nazism in Germany as a child and experienced that nation's occupation of France as a young man. A number of German soldiers were stationed in Tournier's parents' house during World War II, and he remembered the experience as chaotic but happy.

Despite his uneven school record, Tournier received a *baccalauréat* during World War II. He acquired additional degrees in philosophy and law, and after the war he spent four years in Germany studying philosophy at the University of Tübingen. When the time came to take his teaching examination, however, he failed.

Unable to pursue a career as a professor, Tournier worked as a journalist, editor, translator, and

radio and television producer. Among the writers he translated was Erich Maria Remarque, the German author of the antiwar novel *Im Westen nichts Neues* (1929, 1968; *All Quiet on the Western Front*, 1929, 1969). During this time Tournier wrote three novels of his own that he deemed unworthy and abandoned work on another. His first published work, an ironic revision of Daniel Defoe's novel *Robinson Crusoe* (1719) entitled *Vendredi: Ou, Les Limbes du Pacifique* (1967, revised 1978; *Friday: Or, The Other Island*, 1969), was an immediate success, winning the Grand Prix of the French Academy.

Tournier's next novel, *Le Roi des Aulnes* (1970; *The Ogre*, 1972; published in Great Britain as *The Erl-King*, 1972), won his country's most prestigious literary award, the Prix Goncourt, by unanimous vote. *The Ogre* sold well, was widely translated, and prompted many critics to declare Tournier France's best living novelist. A reviewer for *The New Yorker* magazine, Janet Flanner, called it "the most important book to come out in France since Proust." Other critics, however, charged that in writing a symbolic account of the rise of Nazism, Tournier had come uncomfortably close to identifying with his subject.

In any case, *The Ogre* was so successful that Tournier was able to devote himself to writing full time. He was also invited to join the Goncourt Academy and to help choose the recipients of its annual prizes.

Tournier next published *Vendredi: Ou, La Vie Sauvage* (1971; *Friday and Robinson: Life on the Esperanza Island*, 1972), a version of *Friday: Or, The Other Island* for younger readers, and a third major novel, *Les Météores* (1975; *Gemini*, 1981). Like *The*

*Ogre, Gemini* was attacked by many for its subject matter, which in this case involves an incestuous relationship between twin boys and the homosexual character of the twins' uncle. Tournier traveled to Canada, Japan, and India to research the novel's settings.

Tournier summed up his life to date and many of his ideas about literature in general and his own books in particular in *Le Vent paraclet* (1977; *The Wind Spirit: An Autobiography*, 1988). Similarly, the collection *Le Coq de bruyère* (1978; *The Fetishist, and Other Stories*, 1983) deals with many of the themes Tournier had previously developed in his novels.

Tournier next published an episodic novel, *Gaspard, Melchior, et Balthazar* (1980; *The Four Wise Men*, 1982), that reworks the story of the Magi and adds a fourth king, Taor, to the traditional three. As he had before, Tournier traveled to research his work, in this case visiting Israel and Africa. Some reviewers praised *The Four Wise Men* for its fablelike quality and its reverence, but others found it obvious and even predictable. Tournier followed this seemingly religious novel with an entirely different work, a short novel he had originally conceived as a television script. *Gilles et Jeanne* (1983; *Gilles and Jeanne*, 1987) analyzes the relationship between the martyr Joan of Arc and her compatriot Gilles de Rais, who was later executed as a mass murderer.

A fourth major novel, *La Goutte d'or* (1985; *The Golden Droplet*, 1987), draws on Tournier's long-standing interest in photography and follows the adventures of a North African shepherd as he travels to France to retrieve the part of his soul that a thoughtless tourist has "stolen" in a snapshot. Four years later Tournier published a second volume of short fiction, *Le Médiocre amoureux* (1989; *The Midnight Love Feast*, 1991). In this collection a couple on the verge of divorce invite their friends to a kind of celebration, but the stories the friends tell reunite the couple.

Tournier devoted the idiosyncratic essays in *Le Miroir des idées: Traité* (1994; *The Mirror of Ideas*, 1998) to familiar pairs of objects and ideas—body and soul, the sun and the moon, salt and sugar, and so on. He went on to draw an implicit comparison between two figures widely separated in time and space in *Eléazar: Ou, La Source et le buisson* (1996; *Eleazar, Exodus to the West*, 2002). In this short novel Tournier describes the experiences of a shepherd—Eleazar O'Braid—who leaves his native Ire-

land for the American West. Eleazar finds himself in the position of the Old Testament figure Moses, who struggled to serve both God and the exiled Hebrew peoples.

## ANALYSIS

Michel Tournier started writing at a time when the form of the New Novel held sway in French literary circles. The New Novel ignores traditional novelistic techniques and even questions the ability of language to convey meaning; its narration tends to be complex.

Tournier's works display the elements the New Novel lacks: plot, character, and suspense. Tournier has stated that he has no interest in revolutionizing the form of the novel, but this does not mean that he writes ordinary books. In *The Wind Spirit: An Autobiography* he states that:

My intention was to avoid formal innovation, to use only the most traditional, conservative, and reassuring of forms, but to fill them with a content having none of those qualities.

The result has been that French critics have sometimes been disappointed in Tournier's works and their lack of verbal experimentation. On the other hand, Tournier is popular with the reading public; each of his novels has been a best seller in France. These same readers, however, have often been upset at the content with which Tournier sometimes fills his conservative forms.

These forms are often versions of preexisting models. The most obvious examples are two pairs of works. One pair consists of *Friday: Or, The Other Island* and *Friday and Robinson: Life on the Esperanza Island*, the latter of which is intended for younger readers. *The Four Wise Men* and the tale *Barbedor* (1980), the latter of which was published separately for children before its inclusion in the adult work, form another such pair.

The first pair of these titles builds on one of the oldest and most famous novels in English, *Robinson Crusoe*, which is itself based on the true story of the shipwrecked sailor Alexander Selkirk. Tournier had been struck by the novel's ethnocentrism (that is, its acceptance of Crusoe's cultural values as being the only ones worth considering), and rewrote it from a viewpoint including modern psychology and anthropology. In Tournier's version, it is Fri-

day who chooses to leave aboard the British ship that has chanced upon the island; Crusoe, who has absorbed Friday's values and come to identify almost literally with the island, remains.

Tournier's two books about the Magi embellish the account in Matthew of the Wise Men who bring gifts to honor the newborn Christ. Tournier supplemented this account with legends that put the number of Wise Men at four and that make one of them black. Tournier also studied a short novel familiar to American readers, *The Story of the Other Wise Man* (1896) by Henry Van Dyke.

Tournier's version of the story has modern social and racial echoes. For example, Gaspar, King of Méroé, states that he is "black but beautiful," and he is delighted to see that Christ is also black. Tournier enlivens the story with various interpolations and introduces a fourth king, Taor, who achieves an unorthodox state of grace.

As its title in English suggests, the novella *Eleazar, Exodus to the West* reaches back to yet another Christian source, the book of Exodus, while utilizing a New World setting. Identifying with Moses and his quest for the Promised Land, Eleazar is searching for what the reader recognizes as its mythic nineteenth century equivalent—the American frontier.

Tournier's most important novel, *The Ogre*, is also based on an earlier literary model, but one less familiar to American readers. The French title of this work, *Le Roi des Aulnes*, which means the king of the alders, is a translation of the title of a famous poem by German author Johann Wolfgang von Goethe, "Erlkönig" (1782; "The Erlking," 1853). Goethe's poem is about an ogre (hence the translation of the title) who steals children's souls. Tournier also draws on the legend of Saint Christopher, whose practice was to carry travelers on his shoulders across dangerous streams. According to this legend, Christopher once carried Christ, who in gratitude caused Christopher's staff to bloom. Tournier's protagonist, Abel Tiffauges, finds himself torn between the seemingly opposite poles of good and evil that the ogre and the saint represent.

Tournier's short novel *Gilles and Jeanne* is based directly on historical models: Joan of Arc and her protector, Gilles de Rais. Tournier suggests that Gilles, having seen Joan burned at the stake for her supposed heresy, decides to follow her to Hell by sexually torturing and murdering children. In this case, however, Tournier's peremptory treatment of his subject renders his thesis unconvincing.

Tournier's most complex novel, *Gemini*, also draws on a number of sources, but less obviously than in some of his other works. Its treatment of the twins Jean and Paul (whom others refer to as a single unit, Jean-Paul) relies more on myth than upon literary or historical examples. Myths are ancient stories that seem to explain natural occurrences, or that reveal meaningful patterns behind apparently ordinary events. The Greek myth of the twins Castor and Pollux is highly important in *Gemini*, but myths of one kind or another are seldom absent from Tournier's work. After all, Robinson is as much master of a kingdom (to place him in his mythic dimension) as he is a shipwrecked sailor. Additionally, Abel Tiffauges is as much a savior, or a demon, as he is a mechanic caught up in a war.

Tournier's use of familiar forms and mythic patterns is no guarantee of literary success. His most successful book, *The Ogre*, is above all the story of a believable, if disturbing, character who undergoes a series of events that are by turns gripping, frightening, and puzzling. The novel's other elements, such as Tournier's research into the Nazi period, are subordinated to the story. However, when the ideas behind Tournier's books dictate their structure, as some readers found to be the case in *Gemini*, the result is less compelling.

Tournier himself seems to have sensed this problem with *Gemini*. The novel that followed, *The Four Wise Men*, is lighter in tone and far more focused. Much of Tournier's shorter fiction has also struck a light, even whimsical note. As Tournier himself realizes, he is most successful in conveying his unorthodox ideas when they are presented in entertaining and reassuring forms.

## FRIDAY: OR, THE OTHER ISLAND

**First published:** *Vendredi: Ou, Les Limbes du Pacifique*, 1967, revised 1978 (English translation, 1969)

**Type of work:** Novel

*A sailor shipwrecked on a tropical island comes to understand his true nature.*

*Friday: Or, The Other Island* was Tournier's first published novel and dramatizes the differences between Robinson's Eurocentric values and those of a native of the archipelago in which he is marooned. Tournier assumed that his readers would be familiar with Daniel Defoe's classic novel *Robinson Crusoe*, and he fashioned his work around it. He follows Defoe's book closely at first but slowly departs from its outline, eventually arriving at a strikingly different conclusion.

As *Friday* opens, Robinson is having his fortune told by his ship's captain. Robinson, the captain announces, is an organizer. Organizers are not skeptical and therefore do not realize that their attempts at creating order are illusory. The captain further predicts that after many travails Robinson will be saved by a child. As the captain enlarges upon these comments, their ship runs violently aground. When Robinson awakens, he finds himself alone on an island, and (it is clear to the reader) begins living out in detail the fortune the captain has told to him.

After a period of gloom in which he names his new home the Island of Desolation, Robinson manages to build a rational, even overorganized,

life for himself. He has periodic bouts of depression in which he immerses himself in a kind of bog, but he always manages to pull himself out, literally and figuratively. He rechristens the island Speranza (hope).

Perhaps most important, Robinson discovers a cave at the island's center. The cave serves not only as a storeroom for the food he grows and the explosives he salvages from the wreck of his ship, it also functions as a womblike retreat from the rigors of the orderly world he has created.

Robinson does not intend to rescue Friday. He first sets eyes on him as the young man is brought from a neighboring island by cannibals to be sacrificed. The captive escapes and is about to lead his captors to Robinson's hiding place when Robinson decides he must shoot him. The shot is deflected and hits one of the pursuers instead. The young man throws himself gratefully at Robinson's feet.

Friday submits indifferently to the rigidly ordered life Robinson offers him but proves nevertheless to be Robinson's rescuer in turn. Finding Robinson's store of tobacco in the cave, he secretly begins smoking it. One day, on the verge of discovery, he tosses his pipe into the cave, sets off the explosives, and destroys everything Robinson has created.

Robinson awakens to Friday's world. Relieved of everything connecting him to his previous life, Robinson embarks upon a new existence. He stops wearing clothes and discovers an entirely different island beneath the skin of the one he has created. He learns to play. He grows his hair long, shaves his beard, and develops a tan, all of which increase his resemblance to Friday. The two are no longer master and servant but companions.

Thus Robinson's world is threatened when a ship eventually arrives. Robinson is appalled, but Friday is fascinated by everything that the ship represents. When it departs, Friday is on board, but Robinson stays, consoled because the cabin boy has jumped ship and taken refuge on the island. Robinson decides to name him Thursday.

## THE OGRE

**First published:** *Le Roi des Aulnes*, 1970  
(English translation, 1972)

**Type of work:** Novel

*A French mechanic finds himself drawn into the morally ambiguous world of the Third Reich.*

*The Ogre* may be one of the most disturbing books ever written. It follows a simple-minded man into the heart of the Jewish Holocaust and dramatizes his confusion so thoroughly that the reader may find it impossible to escape. By the time Abel Tiffauges realizes the terrible extent of his predicament, he is lost—and the reader is lost with him. This accomplishment accounts for the book's reputation as Tournier's most powerful novel but also explains the dismay it has caused.

As a sickly child, Abel was placed by his parents in a foster home called St. Christopher's. By the time the reader meets him as an adult, he has developed into a strong but emotionally underdeveloped mechanic whose interests in children and photography are easily misinterpreted. When a young girl incorrectly identifies him as a molester, he is arrested, but he escapes prosecution because France is mobilizing for war. He eventually finds himself working with carrier pigeons in the French army but is captured by the Germans and assigned to a labor camp.

Abel comes to love wartime Germany, a nation whose many rules and regulations leave no room for the troubling ambiguity of civilian life in France. From ditch digger he is promoted to driver and eventually to gamekeeper on Field Marshal Hermann Göring's hunting preserve, Rominten. He discerns the elements of a grand plan in everything that has happened to him and is convinced that events, large and small, revolve around him. He sees the fall of France as retribution for the wrong done to him by the incorrect accusation,

and he interprets his rise to a position of some authority in Germany as tacit avowal of his central importance.

An odd event confirms Abel's sense of destiny. While he is delayed on a mission, an unidentified corpse is pulled from a bog, and at first Abel's superiors believe it may be him. On closer inspection the corpse turns out to be that of a man who died two thousand years ago and whose body was preserved in the peat. The scientist examining the body refers to Johann Wolfgang von Goethe's haunting and beloved ballad, "The Erlking" (handily neglecting to mention the poem's sinister subject), and suggests that the find be named in its honor. This Erl-King's resemblance to himself is not lost on Abel, and when a second, smaller body is found in the bog, it merely confirms him in his identification. His subsequent reassignment to the Kaltenborn Napola, a Nazi military training camp for boys in the eastern forests of Germany, convinces him that fate is preparing him for a special purpose.

Events develop rapidly. On a mission to gather "recruits" for the camp, Abel discovers a Jewish boy, Ephraim, who makes him realize the extent of the Nazi predations against the Jews. Abel's delusional world totters. Is he Saint Christopher, who carried travelers on his back? Is he the Erl-King, who carried away children's souls? Christ? Adolf Hitler? As Russian troops break through German lines to the east and Kaltenborn Napola is consumed in flames, Abel lifts Ephraim to his shoulders and tries to escape, but the two sink into a bog. The last thing Abel sees is the Jewish six-pointed star revolving in the sky.

## THE FOUR WISE MEN

**First published:** *Gaspard, Melchior, et Balthazar*, 1980 (English translation, 1982)

**Type of work:** Novel

*Four kings in search of enlightenment seek the newborn Christ.*

*The Four Wise Men* marked a turning point for Tournier. It appears to be one of the simplest of his

books and seems to mark a tacit acceptance of Christianity. It is certainly his most humorous work. Beneath its surface simplicity and charm, however, *The Four Wise Men* is a telling examination of the beliefs by which people live.

*The Four Wise Men* consists of seven main sections, a postscript in which Tournier summarizes his sources, and some brief notes. The first three sections consist of the stories of the three traditional Magi: Gaspar, Balthazar, and Melchior, all of whose names derive from nonbiblical sources. Gaspar is a black king of Méroé in southern Egypt who buys two blond slaves and who gradually grows ashamed of his color. His faith in himself is restored when he travels to Bethlehem and sees that the infant Christ is black. Balthazar is the king of Nippur, a region of Babylonia. His great museum has been destroyed by a priest who disapproves of graven images, but Balthazar learns in Bethlehem that art pays tribute to creation and is therefore not sacrilegious. Melchior is a prince of Palmyra, Syria, driven out of his country before he can become king. In Bethlehem he discovers that it is possible to rule without violence and political manipulation, and he decides to found a heavenly city on earth.

There follow three episodes that serve to place the stories of the Magi in perspective. “Barbedor” is an allegory of death and renewal, suggesting the replacement of Jehovah by Jesus. “Herod the Great” is a long and grimly realistic portrait of political life in Palestine. “The Ass and the Ox” accounts the birth of Jesus from humorously unusual perspectives.

Tournier’s account of the fourth Magus, Prince Taor of Mangalore in southwestern India, takes up nearly a third of the book and is obviously its most important section. Taor is so enamored of sweets that he sets off in search of a Divine Confectioner whose imminent appearance has been heralded by prophets. His way is long, his entourage huge, and his progress slow, so Taor misses the birth of Christ. He encounters the other three Magi and listens to their dissimilar stories of what they found in Bethlehem, but he is unable to reconcile their accounts with his expectations of the ultimate sweet he supposes the Confectioner will dispense.

Taor’s subsequent travels strip him of his possessions and his followers. Pursuing an obscure destiny, he ultimately trades away his own life by taking

the place of a debtor sentenced to work in the salt mines of Sodom and is released after thirty-three years. This period of time, of course, leads Taor and the reader to Christ’s last days and to the reader’s realization that Taor has achieved a Christ-like state without the necessity of Christ’s having died to expiate his sins.

Resuming the search he had begun years before, Taor arrives at the table of the Last Supper just after Christ and his disciples have departed. In sampling the remaining bread and wine, Taor becomes the first man after the disciples to receive the Christian sacrament of the Eucharist, and he is received into Heaven.

## THE WIND SPIRIT

**First published:** *Le Vent paraclet*, 1977

(English translation, 1988)

**Type of work:** Nonfiction

*Tournier recounts the key experiences of his life and identifies the insights that have shaped him as a writer.*

Despite its subtitle in English, *The Wind Spirit: An Autobiography* might be more accurately called a series of autobiographical essays. While Tournier certainly provides factual details about his life, most serve as springboards for more general comments. The book is studded with ideas, aphorisms, and philosophical observations—many of them highly provocative. Thus his account of his childhood in “Born Under a Lucky Star” includes attacks on the “mutilating, castrating culture” in which he grew up, the rigidly antisexual Christian religion to which he was exposed, and the city of Paris, which he found thoroughly hostile. By contrast, he remembers with delight his grandfather’s seemingly magical pharmacy and the fairy tales of Hans Christian Andersen.

Tournier stresses his family’s identification with Germany and German culture, and in the book’s second (and longest) chapter he traces the origin and gestation of his most highly regarded novel, *The Ogre*. In a particularly striking passage, he describes his adolescent delight in the chaos that followed France’s defeat by Germany in World War II.

He concludes with a moving lament for the culturally sophisticated Germany that Adolf Hitler destroyed. While a novel must be judged independently of its author's comments and opinions, readers of *The Ogre* will find that *The Wind Spirit* provides invaluable insights into the novel's symbolic structure and development.

In another chapter Tournier examines the relationship between the experiences of Alexander Selkirk and the book that those experiences inspired, Daniel Defoe's *Robinson Crusoe*. It is the latter that in turn inspired Tournier's first novel, *Friday: Or, The Other Island*, which reinterprets the role of the castaway's "savage" companion. Tournier admits that he considered dedicating the novel to his country's many Fridays, the Third World workers who make bourgeois life so comfortable—a comment that anticipates the subject matter of his fifth full-length novel, *The Golden Droplet*. A subsequent chapter analyzes the philosophical underpinnings of *Gemini*, his controversial fictional treatment of identical twin brothers.

In "The Mythic Dimension," Tournier describes the excitement of his university years and his bitter disappointment at failing the examination that would have allowed him to become a teacher—a failure that set him on the path to writing. He dis-

cusses contemporary literary and philosophical figures, such as Jean Cocteau and Jean-Paul Sartre, and recounts his adolescent naïveté in "improving" the words of German novelist Erich Maria Remarque, whose *All Quiet on the Western Front* he translated. Typically, Tournier moves from the specific to the general, in this case drawing together his memories and his thoughts to comment on the power of myth. In what might well be his credo as a novelist, he observes: "Man rises above animality only by grace of mythology."

## SUMMARY

In a period in which most French writers have been anxious to concentrate on stylistic experimentation to the exclusion of content, Michel Tournier is an anomaly. He has declared his allegiance to traditional forms, but he has used these forms to investigate the major historical, philosophical, and sociological issues of his time. Tournier's treatment of these issues has often been controversial, but such controversy is to a large extent a measure of his success. However, his subsequent work has not generated the critical excitement that attended the publication of his first three novels.

Grove Koger

## BIBLIOGRAPHY

### By the Author

#### LONG FICTION:

*Vendredi: Ou, Les Limbes du Pacifique*, 1967 (revised 1978; *Friday: Or, The Other Island*, 1969)

*Le Roi des Aulnes*, 1970 (*The Ogre*, 1972; also known as *The Erl-King*)

*Les Météores*, 1975 (*Gemini*, 1981)

*Gaspard, Melchior, et Balthazar*, 1980 (*The Four Wise Men*, 1982)

*Gilles et Jeanne*, 1983 (*Gilles and Jeanne*, 1987)

*La Goutte d'or*, 1985 (*The Golden Droplet*, 1987)

*Eléazar: Ou, La Source et le buisson*, 1996 (*Eleazar, Exodus to the West*, 2002)

*Le Bonheur en Allemagne*, 2004

#### SHORT FICTION:

*Le Coq de bruyère*, 1978 (*The Fetishist, and Other Stories*, 1983)

*Le Médianoche amoureux: Contes et nouvelles*, 1989 (*The Midnight Love Feast*, 1991)

#### DRAMA:

*Le Fétichiste*, pr. 1974 (*The Fetishist*, 1983)

NONFICTION:

*Le Vent paraclet*, 1977 (essays; *The Wind Spirit: An Autobiography*, 1988)  
*Canada: Journal de voyage*, 1977 (travel journal)  
*Des clefs et des serrures: Images et proses*, 1979  
*Le Vol du vampire: Notes de lecture*, 1981 (criticism)  
*Le Vagabond immobile*, 1984 (with Jean-Max Troubeau)  
*Le Tabor et le Sinai: Essais sur l'art contemporain*, 1988  
*Le Miroir des idées: Traité*, 1994 (*The Mirror of Ideas*, 1998)  
*Le Pied de la lettre: Trois cents mots propres*, 1994  
*Célébrations: Essais*, 1999  
*Journal extime*, 2002

CHILDREN'S LITERATURE:

*Vendredi: Ou, La Vie Sauvage*, 1971 (adaptation of his novel *Friday: Or, The Other Island*; *Friday and Robinson: Life on the Esperanza Island*, 1972)  
*Barbedor*, 1980  
*Les Rois mages*, 1983 (adaptation of his novel *The Four Wise Men*)

## ANTHONY TROLLOPE

**Born:** London, England  
April 24, 1815

**Died:** London, England  
December 6, 1882

*A popular, entertaining writer of the nineteenth century, Trollope established the novel-sequence in English fiction; his fame rests on his six Barchester novels.*

### BIOGRAPHY

Anthony Trollope (TRAHL-uhp) was born in London, England, on April 24, 1815. His father, Thomas Trollope, was a well-educated barrister, but he had a difficult disposition and gradually failed in that occupation. Throughout the first twenty years of Trollope's life, his father tried many and various ways of making money, all ill-planned and mismanaged. His mother, Frances, eventually became the one who held the family together financially.

Trollope began school at Harrow at the age of seven. In his *Autobiography* (1883), one of the most widely read of English autobiographies, he writes of his schooldays as being so horrible as to be indescribable. At twelve, he was moved to his father's former school, Winchester. There, the other boys knew of the unpaid bills due the school for his education and teased and tormented him about his poverty. Trollope was sent back to Harrow as a day boy. At this time, his mother was in America to follow up on one of his father's unsuccessful money-making schemes, and he lived with his unkempt and uncouth father in a decrepit farmhouse, from which he tramped each day to sit among his smartly dressed, well-do-do classmates.

When Trollope's father went bankrupt in 1834, the family moved to Belgium, where his father died. Frances Trollope had already begun to sup-

port her family as an author. She was in her fifties when her first book was published, and when she died at eighty-three, she had written forty-one books. She was a quick, copious writer, and her son undoubtedly was influenced by her style.

Out of necessity, Trollope became a junior clerk in the General Post Office in London in 1834, a job he hated but endured for seven years. He was transferred to Ireland in 1841, and this proved to be an important turning point in his life. He was no longer working in an office under superiors who did not particularly like him. He became good at his work, made many friends, and became fond of what were later to become lifelong hobbies, riding and hunting. While he was in Ireland, Trollope married Rose Heseltine in 1844, was promoted, and soon began to write his first novel. He set for himself the quota of completing forty pages a week, or about ten thousand words.

Trollope's literary career began with *The Macdermots of Ballycloran* (1847), but it was not until *The Warden* (1855), the first novel in the Barchester series, that he began to establish the style by which he is known. Next came *Barchester Towers* (1857), *Doctor Thorne* (1858), *Framley Parsonage* (1860-1861), *The Small House at Allington* (1862-1864), and *The Last Chronicle of Barset* (1867). He considered the last to be his best work.

His next series is known as the Political, or Palliser, novels, after Plantagenet Palliser, who is in all of them. This series starts with *Can You Forgive Her?* (1864-1865) and continues with *Phineas Finn, the Irish Member* (1867-1869), *The Eustace Diamonds* (1871-1873), *Phineas Redux* (1873-1874), *The Prime*

*Minister* (1875-1876), and *The Duke's Children* (1879-1880). The two series taken together span more than twenty years of Trollope's writing.

Trollope took pride in his diligent attitude toward his writing. He attributed the quantity of his work (numerous novels, several travel books, biographies, and collections of short stories and sketches) to conscientious work, usually done early in the morning before he went to work at the post office. As soon as he finished one piece of writing, he began another, and he wrote even when he traveled.

In achieving such a number of works, Trollope was more concerned with quantity than with the pursuit of stylistic perfection. Thus, his adverse critics often accused him of simply meeting the popular demands of the literary market with his descriptions of the inner life of young women. Essentially, his stories are a pleasant visit to a world that is disturbed only slightly by small problems and minor disappointments.

Apart from the series of books already mentioned, the following are also important: *The Claverings* (1866-1867), *The Belton Estate* (1865-1866), *Orley Farm* (1861-1862), and *Mr. Scarborough's Family* (1882-1883). Modern critics consider Trollope's finest piece of writing to be *The Way We Live Now* (1874-1875); it is a bitter satire on the power of speculative finance in English life. In it, Trollope anticipates England's submission to American and other foreign speculators.

In middle life, Trollope obtained all that he had yearned for as a child. He became a popular figure in London and in literary society. He was on good terms with the major writers of his time and was a particularly close friend of George Eliot. He traveled, hunted, and rode zealously, dined with his friends at his club, and enjoyed life enormously. In addition, Trollope enjoyed a happy and secure family life and was reading aloud with his family after dinner one evening when he suffered a stroke, from which he did not recover. He died a month later, on December 6, 1882, in London.

## ANALYSIS

The Barsetshire novels are regarded as Trollope's major, if not his only, significant contribution to literature. Interestingly, this viewpoint is shared by critics, literary historians, and the reading public. There are, however, many solid quali-

ties to be found not only in this popular series but also in most of his other works.

In all of his novels, there is a vast array of characters, usually set in motion by Trollope's theme, which in each novel is simply a variation: the finely drawn English opposition of love versus property. This pleasantly complex situational novel makes for interesting reading. No problems of social significance are given serious treatment, for the chief purpose is entertainment. When Trollope did turn to more serious and often satirical fiction in later life, he focused upon English political life. Even though the Political novels are concerned with political maneuvering in upper-middle-class society and in Parliament, the focus is still on the conflicts between love and property. (Probably because of his own failure to gain a parliamentary seat in the elections of 1868, in his political novels Trollope both exaggerates and denigrates the importance of serving as a member of Parliament.)

A typical Trollope novel contains several easily identified common characteristics, and these can be readily found in the two central series he wrote, the Barsetshire novels and the Political novels. He had, first, an imaginative yet genuine concern with moral existence. This concern was his primary means of insight into his characters. Therefore, while the physical characteristics of his characters are rarely made clear, these characters are conscientiously described regarding their moral sensitivities. Trollope presents them through what they say and what they do, and also by directly commenting upon them himself.

Second, the pattern of his novels stays fairly true to form. There is no villain, and most characters are morally average, neither particularly good nor bad, not particularly exciting but not dull. Thus, readers recognize much of themselves in his books.

Third, one recognizes in Trollope's works a disregard for plot. His characters, in keeping with their average morality, lead ordinary, average lives. There are no sensational or complicated situations, no great surprises or shocking situations. Instead, his characters deal with everyday issues that test their moral sensibilities, such as the problems of poor but well-bred young women seeking a suitable husband or the proper use of church endowments.

Last, the repetition of a short phrase at brief intervals and with great exaggeration is a quality that

is often seen in Trollope's works. The repetition is used most often to portray the truth of his characters' actions and to show the truth of their moral sensibilities.

Although it is easy to view Trollope's writings in a superficial manner, doing so creates a misconception of literary worth in the reader's mind. Rather, Trollope's passionate and real interest with moral existence provides for the variety and photographic accuracy of his pictures of the social life of the middle- and upper-middle classes of England in the nineteenth century. In Trollope's novels, the real and the ideal meet; despite the futility of human strivings, his satire provokes laughter; and the irony of the gap between what his characters really are and what they believe themselves to be pricks the moral consciousness of his readers. His influence upon modern writers regarding the development of the novel-sequence and the use of reappearing characters cannot be overestimated.

Trollope's contradiction, then, is a simple one and can be traced back to his deprivation in childhood. He was attempting to gain literary esteem by writing novels in a world where novel writing was not held in high regard. His *Autobiography*, published posthumously, created a furor at its publication. In it, he revealed himself as a writer to whom writing was a methodical, clerical process, much as letter writing had been for him during his early days as a postal clerk. It is, ironically, even today one of the most widely read English autobiographies.

## THE BARSETSHIRE NOVELS

**First published:** *The Warden*, 1855; *Barchester Towers*, 1857; *Doctor Thorne*, 1858; *Framley Parsonage*, 1860-1861; *The Small House at Allington*, 1862-1864; *The Last Chronicle of Barset*, 1867

**Type of work:** Novels

*Set in the rural south of England, these six novels center on the activities of the "squirearchy" and the clergy.*

Trollope's popular fame rests on his six Barchester novels. Taken as a whole, they are interconnected by characters who appear in more than one

of them, a technique that Trollope was to use again in his second series, known as the Political novels. The Barchester series established the novel-sequence in English fiction.

The most famous of the Barchester series is *Barchester Towers*. It is typical, however, of the entire chronicle, with its fine ironic tone and pleasantly complicated situations. Though the type of plot is social satire, no problems of social significance are given serious consideration, as its chief purpose is entertainment.

The series was conceived one summer evening in Salisbury, but the settings are, for the most part, in the imaginary west-country county of Barset and its chief town, Barchester. Barchester is a compila-

tion of the many counties Trollope visited in his position as a civil servant. Barchester's railroads and roads, its great lords and their fine castles, its squires and their parks, its towns, its parishes, and its rectors and their churches are all totally fictitious. From his careful observations and memories of his travels throughout England, however, Trollope pieced together a detailed

map of Barchester. Thus, it has a totally convincing reality, based not particularly upon the geographical but rather upon Trollope's sharp insight into the moral physiognomies of his characters.

The first book of the series, *The Warden*, sets a pattern to which Trollope adhered in the later books. In *The Warden*, the focus is upon a problem concerning the proper use of church endowments. Using his vivid imagination, Trollope set in motion the issues and conflicts that surrounded the problem and how it was approached by the various people involved, people with various modes and degrees of moral sensibility.

When Trollope returned to the milieu of *The Warden* in *Barchester Towers*, he introduced a number of subplots, all related to the ecclesiastical power struggle between the new bishop of Barchester (Bishop Proudie) and the former bishop's son (Archdeacon Grantly). The main conflict of the novel involves both parties' intentions to pre-

serve the integrity of the church. In typical Trollope fashion, the irony comes forth in how the two men view themselves versus how they really are—the two clergymen are, in their own minds, fighting for the spiritual power of the church, but they are actually fighting for power over the building, furnishings, and their clerical positions; in other words, they are fighting for the worldly things of the church, not the spiritual.

Many other novels were written in the period during which Trollope was engaged in writing the Barsetshire series. Archdeacon Grantly and his father-in-law, however, continued to live in Trollope's imagination. He created the most solid of his male characters by blending his own personality with theirs, and in his *Autobiography* he explained the novelist's need to "live" with his characters and stressed the importance of recording change and the effects of time on them. Therefore, in *The Last Chronicle of Barset* (the book that Trollope considered his best work), the two have grown older, just as Trollope himself was growing older. The Archdeacon is the character most often described as being akin to Trollope: quick to anger but quick to forgive, generous, warmhearted, worldly. His father-in-law, who had been Warden in the first book, is portrayed at the upper limits of Trollope's moral range. He is virtuous and good, and he grows old among his family and friends. When the older man dies, it is through the mouth of the Archdeacon that Trollope expresses his estimate of both of them.

Regarding the women that he created, Trollope always referred to them as girls. He held the same notions concerning vicarious relationships with his female characters as with his male ones. For the girls whom he created, love never ran smoothly, a plot that endeared him to his readers. The confu-

sion ensued when he brought the demands of property and social status into conflict with the power of love. The problems created by this situation involved the lovers, their families, their friends, and even their circle of acquaintances, just as it would in real life. Trollope used this plot early in the Barsetshire series and continued to use it throughout his career.

It must be noted, however, that not all Trollope's characters are likable or admirable. He was critical of himself, and through his characters one sees this personal criticism. For example, the Archdeacon's worst enemy is Mrs. Proudie, wife of the Bishop. She is one of the best-known bad-tempered women in English fiction. Even after she died (Trollope referred to her death as his having killed her), he indicated that she would still exist for him, even if as a ghost.

Barsetshire, Trollope's fictional country where the Barsetshire series is set, is as impressive as William Faulkner's Yoknapatawpha or Thomas Hardy's Wessex. The novels provide a slice of nineteenth century life, meticulously observed and entertainingly told.

## SUMMARY

Anthony Trollope attributed his success to his imagination, from which he developed an intimate knowledge of his lifelike characters. One of the most prolific of the Victorian writers and one of the most popular, he was in his own day admired as a realist; modern readers, however, tend to view his works in a more comic light, with his characters under the firm control of the writer's irony rather than simply people leading their daily lives. Regardless of how Trollope's works are viewed, they endure as classics of Victorian literature.

*Clergymen of the Church of England*, 1865-1866  
*Australia and New Zealand*, 1873  
*South Africa*, 1878  
*Thackeray*, 1879  
*Lord Palmerston*, 1882  
*Autobiography*, 1883  
*The Letters of Anthony Trollope*, 1951 (Bradford A. Booth, editor)

## DISCUSSION TOPICS

- If Anthony Trollope's books are pleasant visits to a world of small problems and minor disappointments, why does he enjoy a wide and varied readership more than a century after his death?
- Is the predictability of Trollope's characters and plots a strength or a weakness?
- Trollope begins the Barchester novels by introducing a relatively minor clerical figure, Mr. Harding, who dies at the end of *The Last Chronicle of Barset*. How does his presence give shape to this sequence of novels?
- Examine the first chapter of *Barchester Towers*, "Who Will Be the New Bishop?", and observe how Trollope establishes character, tone, conflict, and other features of the novel.
- In not seriously challenging the routine and aspirations of Victorian society, does Trollope present that society more thoroughly than could a severe critic?
- Examine Trollope's writing career as an instance of disciplined work habits.

## IVAN TURGENEV

**Born:** Orel, Russia  
November 9, 1818

**Died:** Bougival, France  
September 3, 1883

*Among major Russian writers in the nineteenth century, Turgenev was the one most assimilated into the culture of Western Europe, where he was admired and widely read.*

### BIOGRAPHY

Ivan Sergeyevich Turgenev (toor-GAYN-yuhf) was born in Orel, Russia, on November 9, 1818. His mother, Varvara Petrovna Lutovinov, was a cruel and malicious woman of great wealth. His father, Sergey Turgenev, six years younger than his mother, was a handsome and charming cavalry officer who was descended from an old and distinguished but relatively impoverished family. Turgenev's parents became acquainted when his father visited Spasskoye, Varvara's estate, looking to buy horses for military use. Sergey Turgenev married Varvara Petrovna Lutovinov to save his family from financial ruin. Until he died in 1834, he was regularly unfaithful to his cruel but adoring wife.

In fairness to Turgenev's mother, it must be noted that she had an unhappy childhood. She was all but ignored by her own mother, then abused by her drunken stepfather, then sequestered by the uncle with whom she sought refuge. On the other hand, there is evidence that brutality was hereditary with the Lutovinovs. They seem to have acquired their great wealth by heavy-handed methods. None of this cruelty toward people passed to Turgenev, who grew up to be an excitable but gentle and compassionate man.

In spite of her character, or perhaps because of it, Varvara Petrovna exerted a strong influence on

her son. She encouraged Turgenev's education with a view toward seeing him become an important state official. Turgenev studied first at the University of Moscow, then at St. Petersburg, and then in 1838 he left for Berlin to complete his training. This westerly movement during the course of his education may be seen as a metaphor for Turgenev's thinking, which inclined steadily in the direction of European liberalism and away from the formula of "autocracy, orthodoxy, and nationalism" which expressed the regime of Czar Nicholas I.

Two things happened in 1843 that were important to Turgenev for the rest of his life. He published, at his own expense, a narrative poem, *Parasha* (1843), and in doing so more or less recognized (much to his mother's displeasure) that literature was to be his vocation. Then, in autumn of that year, he met the famous singer Pauline Garcia Viardot and fell in love with her almost immediately. Viardot was married to a theater manager twenty years her senior. Her husband tolerated her admirers, whom she attracted by her beautiful voice and strong character. She was not especially pretty and might be thought of as a benign version of Turgenev's mother. In any case, Turgenev formed an attachment to her that lasted until his death forty years later. The exact nature of the relationship is not clear. Though Turgenev and Viardot may briefly have been lovers, they seem for the most part to have shared romantic friendship, and Turgenev eventually came to be recognized as a curious appendage to the Viardot family, close to wife, husband, and children alike. (The Viardots also reared Turgenev's illegitimate daughter,

Paulinette, born to him and one of his mother's serfs.)

Turgenev's literary fame may be dated from *Zapiski okhotnika* (1852; *Russian Life in the Interior*, 1855; better known as *A Sportsman's Sketches*, 1932), a collection of short pieces that express a highly sympathetic but unsentimental view of the Russian peasantry, who until emancipation in 1861 were largely serfs. Turgenev hated the institution of serfdom (he freed his own serfs when he inherited property upon his mother's death in 1850), and his book is thought to have had something to do with ending that wretched system. *A Sportsman's Sketches* appeared in the same year as Turgenev's laudatory article on Nikolai Gogol, who had recently died in disgrace (from the government's point of view) for writing satiric portraits of Russian life. Turgenev was arrested, briefly imprisoned, and then exiled to Spasskoye for his praise of Gogol; the authorities regarded him with suspicion until things eased at the beginning of the reign of Czar Alexander II. It was during this exile that Turgenev wrote "Mumu," one of his most famous stories. Based on an incident involving Turgenev's mother and one of her serfs, it tells the story of a deaf-mute servant who is forced by his mistress to destroy his beloved pet dog.

*Mesyats v derevne* (wr. 1850, pb. 1855, pr. 1872; *A Month in the Country*, 1924), Turgenev's play suggesting illicit love relations, was finally licensed for publication in 1855. Then, in 1856, Turgenev published *Rudin* (*Dmitri Roudine*, 1873; better known as *Rudin*, 1947), and he might now be considered as entering the major phase of his literary career. *Dvoryanskoye gnezdo* (1859; *Liza*, 1869; better known as *A House of Gentlefolk*, 1894), appeared in 1859. *Pervaya lyubov* (1860; *First Love*, 1884), a novella in which a boy falls in love with his father's mistress, appeared a year later. Turgenev acknowledged that this story was close to his own experience and that the picture given of the father strongly resembled his own father. These works were followed by *Nakanune* (1860; *On the Eve*, 1871), *Ottsy i deti* (1862; *Fathers and Sons*, 1867), *Dym* (1867; *Smoke*, 1868), "Stepnoi korol Lir," (1870; "A Lear of the Steppes," 1872), *Veshniye vody* (1872; *Spring Floods*, 1874; better known as *The Torrents of Spring*, 1897), and *Nov* (1877; *Virgin Soil*, 1877). Most of these short novels present the reader with members of the Russian gentry who are somewhat likable but also inef-

fectual. More often than not, love relationships are frustrated or futile or both. There are elements of humor, but as with Anton Chekhov, the famous Russian writer in the generation after Turgenev, the humor is touched with sadness.

Turgenev settled with the Viardots at Baden-Baden, Germany, in 1863. In 1875, he bought jointly with the Viardots an estate at Bougival, near Paris. He enjoyed a wide literary acquaintance and considerable fame. His health began to fail in 1882. Cancer of the spine caused him great pain before he died on September 3, 1883, in Bougival, attended in his last illness by Pauline Viardot.

### ANALYSIS

Nineteenth century Russia was divided by a cultural debate between Slavophiles and Westerners. Slavophiles were conservatives who tended to regret the effort of Peter the Great to impose the culture and technology of Western Europe on his people. They believed that Russia was different from the West and superior in that difference. Westerners were liberals who were deeply troubled, if not simply contemptuous, of autocratic repression, which they saw most obviously displayed by the serf system, which effectively made chattels of the peasant class. They favored a reordering of Russian society that would liberate the serfs and establish a constitutional monarchy, if not a people's democracy. In this debate, Turgenev sided with the Westerners.

His position and how he expressed it in his art were not readily apparent except for his obvious dislike of serfdom. Turgenev's inclination to a moderate view may be related to the paradoxes in his character. He was a tall, well-made, handsome man who was generally harmless in his relations with women; he seems not to have had much passion in his life despite his attachment to Pauline Viardot. He was a very gentle person who loved shooting game birds. He lived in Western Europe much of the time but almost always wrote of his homeland and native people. Because he saw many sides to life, he could not create stories that would satisfy zealots. He could not divide the world into bad people and good people, but this did not keep him from believing that Russia would be made better by liberal reform.

In January, 1860, Turgenev published the essay "Gamlet i Don Kikhot" ("Hamlet and Don Quixote," 1930) in the *Contemporary Review*. He ex-

presses the thought that the world comprises passive, introspective, ineffectual Hamlets and active, energetic, outward-looking Don Quixotes. He suggested that the Russian problem was too many Hamlets and not enough Don Quixotes, that something in the national character kept Russia from realizing its potential, but it is tempting to see these observations as Turgenev's unwitting revelation of himself. Whether he was consciously dominated by strong women throughout most of his life is a question to be debated but never finally answered. That he wrote fictions that included irresolute men who are perhaps not strong enough for the women whom they desire seems obvious.

In fact, most of Turgenev's novel-length works are studies in character, which tends to encourage a psychoanalytical approach in reading them critically. It does well to remember that Turgenev also wrote plays, for his stories contain more drama than adventure. People gather in a parlor or garden and talk to one another. Characters enter and exit the scene. Then some of the characters move to another location where the same pattern is repeated, with new characters added to replace those who have been left behind. This pattern repeats until the reader reaches the end of things, which is usually a failed love relationship (*A House of Gentlefolk*, *The Torrents of Spring*) or a death (*On the Eve*, "A Lear of the Steppes") or both (*Fathers and Sons*).

What gives Turgenev's stories their interest is the clarity with which he presents his characters and the subtlety of detail by which he makes them individuals. When Turgenev began a novel, he constructed biographies of his characters and became intimately familiar with them. By this method, he was able to create convincing portraits of that part of Russian society in which he lived, particularly the Russian gentry who, it seemed to him, were becoming increasingly irrelevant as the world changed. His novels make clear that he was aware of the larger world and that he had opinions about it, but the people who drew his attention were those who did not quite fit, who were superfluous. The thought that members of Russia's leisured class were largely superfluous had been around since the time of Alexander Pushkin's verse novel *Evgeny Onegin* (1825-1832, 1833; *Eugene Onegin*, 1881).

Except for *A Sportsman's Sketches* and "First Love," most of Turgenev's fiction employs a third-person

narrative voice, which takes the reader into thoughts and feelings of a multiplicity of characters. This technique also promotes impressionistic description of the external world, the look of characters and the Russian landscape that they inhabit. For that matter, Turgenev's first-person narratives are effectively descriptive, but when the story is told by a person within the action itself, nothing more comprehensive than the awareness of that single figure may be included. The author is bound by the narrative vehicle and denied the power of selection that sometimes makes great art.

The point to be made is that Turgenev was an artist. His novels and short stories are frequently cited as examples of the "art" of fiction. Seeing as he did the complexities of life, Turgenev did not incline to a single vision of the human condition that would have given him status as a thinker, but he ranks high among writers of his time for the artistry with which he created his fiction.

## A SPORTSMAN'S SKETCHES

**First published:** *Zapiski okhotnika*, 1852  
(English translation, 1855)

**Type of work:** Short stories

*Hunting for game birds in the Russian countryside, a member of the gentry has repeated encounters with the humble, frequently mistreated peasant class.*

*A Sportsman's Sketches* effectively describes the stories that constitute the collection. They do not always express the concentration of elements toward the resolution of a clearly defined plot that readers associate with modern short stories. In one of the most famous pieces, "Bezhin lug" ("Bezhin Meadow"), the sportsman-narrator loses his way while hunting. At dusk, he stumbles into a camp of peasant boys who have brought horses out to graze in the cool night air. He sits among them, listens to their ghost stories, and leaves them at dawn with a sharpened sense of them as individuals rather than faceless members of the peasant class.

In "Ermolaj i melnichikha" ("Yermolai and the Miller's Wife"), the sportsman-narrator hunts with a serf named Yermolai, who seems to have a clan-

destine relationship with Arina, the miller's wife. Only toward the end of this sketch does Anna's story materialize. She was taken to St. Petersburg to be maid to her master's wife. When she fell in love with Petrushka, the footman, and asked for permission to marry him, she angered her mistress (who would not tolerate the inconvenience that a married servant might entail) and was banished to the countryside, where she now lives in a loveless marriage, dependent on Yermolai for the little happiness that she has.

For all of his sympathy with the peasants, Turgenev is faithful to the realities of the world that he depicts. In "Pevtsy" ("The Singers"), the sportsman wanders into a desolate village where two peasants are about to engage in a singing contest at the local tavern. When the singing begins, the contestants prove by their efforts that beauty can be found even in the voice of a simple peasant, but when the sportsman passes the tavern again at evening, everyone is drunk. In "Biryuk," the forester Biryuk is harsh with the luckless peasant that he has caught cutting a tree before he finally lets him off, but Biryuk, a handsome, vigorous man, has had his own bad luck, for his wife ran away with a traveling peddler. One of Turgenev's finest stories, "Zhiyye moschi" ("Living Relics"), was not added to *A Sportsman's Sketches* until 1874. Seeking shelter from a rainstorm, the sportsman enters a rude hut where he encounters Lukerya, once the most beautiful servant on his family's estate. Yet shortly before she was to be married, Lukerya injured herself in a fall, and for seven years she has wasted away toward death, patiently and devoutly submitting to her bitter fate.

When *A Sportsman's Sketches* appeared in 1852, Nicholas I was still czar of Russia, and direct criticism of his regime was not permitted. Turgenev's "sketches" were perhaps as effective as anything in their time in bringing the plight of Russia's underclass to the attention of a literate public.

## FATHERS AND SONS

**First published:** *Ottsy i deti*, 1862 (English translation, 1867)

**Type of work:** Novel

*Evgeny Bazarov, a nihilistic disciple of scientific materialism, dies after cutting himself at a carelessly performed autopsy.*

*Fathers and Sons* is probably Turgenev's most famous work. It addresses ideas of the period more directly than most of his other works and creates debate over these ideas as a conflict of generations. The novel's story is simple enough. Arkady brings his friend Evgeny Bazarov home with him at the end of his university studies. Home is a country estate occupied by Arkady's father, Nikolai Petrovich (who is a widower), his uncle Pavel Petrovich, Fenichka (a young woman living under Nikolai's protection), and Mitya, the son whom Fenichka has borne to Nikolai. Nikolai considers himself a progressive; Pavel cultivates the manner of an English aristocrat. Conflict develops when these middle-aged men enter into discussion with Bazarov, who rejects all authority but the evidence of scientific materialism and regards art with amused contempt.

Presently, Arkady and Bazarov pay a visit to town. They meet Sitnikov and Kukshin, a foolish young man and woman who pose as radical intellectuals. Then, at a governor's ball, they meet a young widow, Anna Sergeyevna Odintsov, and her younger sister Katya. Arkady and Bazarov are both smitten by Madame Odintsov and visit her at her country estate. When Bazarov declares his passion to Madame Odintsov, he is rejected. He then takes Arkady to visit his parents, traditionalists who belong to the modest gentry. Bazarov is an only child, deeply loved by his gentle, countrified parents.

After a time, Bazarov and Arkady revisit the Kirsanov estate, where Bazarov and Pavel Petrovich

fight a nonfatal duel over a misunderstanding about Fenichka. Bazarov and Arkady visit Odintsov again, and now it is clear that Arkady is attracted not by Anna Sergeyevna but by her sister, Katya, a pretty but conventional (and marriageable) young woman.

Bazarov returns to his parents. He assists his father, a retired army doctor, in medical proceedings. One day, he participates in an autopsy on a man who has died of typhus. He cuts his finger, neglects to disinfect the cut, and dies of typhus. As the novel concludes, Arkady and his father unite with Katya and Fenichka in a double wedding.

*Fathers and Sons* caused controversy in Russia at the time of its appearance. Conservatives thought Turgenev was too sympathetic toward Bazarov. Radicals thought that he was not sympathetic enough and resented Bazarov's dying while his friend Arkady settled into the conventional happiness of marriage and life on his father's estate. Turgenev claimed sympathy with his ill-fated hero, declaring that he agreed with Bazarov on everything but his view of art. Yet it is difficult not to see

that Bazarov is a half-willing suicide, and this leads the reader to question whether Bazarov himself does not recognize that, without love, which is hardly an element of scientific materialism, life is a dreary business.

## SUMMARY

Ivan Turgenev demonstrated that Russian literature could be written and judged by the standards that obtained in Western Europe. If he was not as profound a thinker as his contemporaries Fyodor Dostoevski and Leo Tolstoy, he was as great an artist and, in his own way, as perceptive concerning the difficulties of the human condition. His novels and stories are not ponderous things to read. He moved easily in literary circles in France and England and even attracted attention from the American novelist Henry James, who wrote an essay expressing admiration for Turgenev's craftsmanship. Turgenev is still read more than one hundred years after his death.

John Higby

## DISCUSSION TOPICS

- Where did Ivan Turgenev stand in the struggle of Russian intellectuals between Slavophiles and Westerners?
- What influences on Turgenev's life led him to his concern for Russian serfs?
- How did Turgenev contribute to the understanding and betterment of serfs?
- Does Bazarov in *Fathers and Sons* foretell the materialism that would infect Russian society in the following century?
- Did Russian critics' difficulty in judging Bazarov arise from a weakness in Turgenev's characterization or from concerns that they brought to the novel?

## SIGRID UNDSET

**Born:** Kalundborg, Denmark  
May 20, 1882

**Died:** Lillehammer, Norway  
June 10, 1949

*Undset's novels about medieval Norway gained worldwide popularity for their historical accuracy and examination of the inner lives of memorable characters. She received the Nobel Prize in Literature in 1928 and Norway's highest award, the Grand Cross of the Order of St. Olav, in 1947.*

### BIOGRAPHY

Sigrid Undset (UHN-seht) was born in 1882 to Ingvald Undset, a Norwegian archaeologist and college professor, and Charlotte Gyth, Danish daughter of the mayor of Kalundborg, Denmark, where Sigrid was born. The family lived there only two years before moving to Norway, where Ingvald Undset could be near museums and universities. Sigrid was a precocious child who readily gained appreciation for history through her father's studies and her exposure to archaeological objects in the home. She was familiar with the Icelandic sagas, as well as classic writers such as Geoffrey Chaucer and William Shakespeare. Sigrid was eleven when her father died, causing Sigrid, her mother, and her two sisters to adjust to reduced economic circumstances. Unable to afford a college education, she took a one-year secretarial course. Starting at age sixteen, she worked for ten years for an electrical engineering firm in Christiania (renamed Oslo in 1925). During those years of employment, she began writing for publication.

Undset met a Norwegian painter, Anders Castus Svarstad, in Rome. He was a married man with three children at the time. They had a three-year affair before he obtained a divorce. They married in 1912 and had three children of their own. Undset supervised a large household, which included her

three stepchildren, as well as her children with Svarstad. It was not an easy time, as mental disability affected one of the stepchildren, as well as her middle child, a daughter. Her husband was not helpful in supporting or managing the family, and the couple separated in 1919. Then pregnant with her third child, Undset took her family to live at a farm outside Lillehammer. The marriage to Svarstad ended. There are many parallels between Undset's married home life and that of her best-known fictional character, Kristin Lavransdatter. Two of Undset's children predeceased her. Her mentally disabled daughter died just before World War II, and her eldest son was killed resisting the Nazi occupation of Norway in April, 1940. Norway's postage stamp honoring Sigrid Undset features a portrait of her painted by Anders Svarstad.

Undset developed increasingly strong religious beliefs, culminating in her conversion to Roman Catholicism in 1924. Once nominally Lutheran, she became convinced that absolute religious truth was revealed through Catholicism, whereas other religious beliefs were the imaginings of human beings. This was an unpopular and unusual move in Norway, with its strong Lutheran leaning. Following Catholicism's view of divorce, she arranged to have her marriage to Svarstad annulled because of his previous divorce. Undset's writings reflect her increasingly fervent religious beliefs, especially after her conversion.

Undset had been openly critical of the rise of Nazism, and her books were burned in Nazi Ger-

many. With Germany's occupation of Norway in 1940, she and her remaining son went into exile. They went first to Sweden and then to the United States. She lived in Brooklyn, New York, then an enclave of many Norwegian Americans. She wrote and gave radio addresses about the horrors of Nazi occupation. Undset returned to Norway after the war and became quite reclusive. She died of a stroke in 1949.

Undset had a prodigious literary output, writing stories which showed many influences from events in her own life. Her novels often took place in the regions with which she was very familiar, such as Trøndelag and Oslo. Her repeated literary themes of sin and redemption mirrored her own changes in religious belief. Many of her contemporary novels depicted the drab lives of working women in Norwegian cities, a plight known to Undset from her own experience.

During her writing career, Undset vacillated between historical and contemporary settings. Her first book was set in medieval times, but it was rejected by publishers. Soon her creative imagination led to publishable stories. Undset's historical novels reflected her familiarity with medieval texts and archaeological objects, as well as her knowledge of Nordic folklore. Her first published book was *Fru Marta Oulie* (1907). This and other early contemporary novels, such as *Jenny* (1911; English translation, 1921), were popular and enabled Undset to become self-supporting. In 1920, she published *Kransen* (*The Bridal Wreath*, 1923; also as *The Wreath*, 1997), the first book of the medieval *Kristin Lavransdatter* trilogy, which was her most famous literary accomplishment. This was followed by *Husfrue* (1921; *The Mistress of Husaby*, 1925; also as *The Wife*, 1999) and *Korset* (1922; *The Cross*, 1927, 2000). The trilogy was popular in Norway, and translation into other languages soon led to international popularity for *Kristin Lavransdatter*. Charles Archer's English translations of the three books appeared from 1923 to 1927. Tiina Nunnally's English translations, published from 1997 to 2000, are superior because she included scenes deleted by Archer and abandoned Archer's archaic wording, such as "methinks" and "mayhap."

From 1925 to 1927, Undset published another long, somber novel set in the Middle Ages. *Olav Audunssøn i Hestviken* and *Olav Audunssøn og hans børn* (1925-1927; *The Master of Hestviken*, 1928-1930,

1934), which consists of four books: *The Axe* (1928), *The Snake Pit* (1929), *In the Wilderness* (1929), and *The Son Avenger* (1930). Some critics, including the storyteller herself, considered the *Master of Hestviken* tetralogy to be superior to the better known *Kristin Lavransdatter* trilogy. In 1928, Undset was awarded the Nobel Prize in Literature for her depiction of Scandinavia during the Middle Ages. Only twice before had women received this international honor.

In addition to writing numerous novels, Undset also wrote children's books, essays, and short stories. Her autobiography in the form of a novel, *Elleve år* (1934; *The Longest Years*, 1935), was published in 1934. It described her childhood. *Tillbake til fremtiden* (1942; *Return to the Future*, 1942), published in 1942, was also autobiographical, detailing her flight from Nazi-occupied Norway. With worldwide fame, her writings are increasingly available in English and other languages.

## ANALYSIS

The flesh and blood events of *Kristin Lavransdatter* would suit a soap opera. Here are adultery, inebriation, murder, rape, and treason. Here likewise are strong emotions: revenge, jealousy, sexual obsession, shame, and despair. Even though the novel's characters lived more than six centuries ago, Undset represented them as having the same gripping inner struggles that people experience today.

Undset has been compared to other realistic writers, like Émile Zola. Suitable to this content, her writing flows easily. She does not use stylistic tricks or artificial phrasing. Her writing is straightforward and matter-of-fact. The telling is very rich in detail, including textures, sounds, and smells. The tempo is unhurried, permitting full development of the major characters.

Other authors before Undset had written less effective fiction set in the Middle Ages. Some, like Sir Walter Scott, presented flowery, idealized romances. Gothic novels gushed with sentimental themes. Undset improved upon these depictions with her vast historical knowledge and her unsentimental approach. Her historic fiction excelled at describing accurately the daily life of Norway in the Middle Ages, both among the rich and among the poor. In this stratified feudal system, the two lifestyles were very different. She studied medieval

churches and other ruins in order to correctly paint her landscapes and dwellings. She used her expertise to accurately describe clothing and tools. She detailed the way people ate, slept, raised their children, and worshipped. The historical details are intermixed with the story without calling attention to them. Likewise, the natural background is not emphasized or separated from the human action. The reader visualizes the landscape in passing, but is not distracted by it.

Undset was very religious and her works carry strong spiritual themes. She disliked secular trends in society and felt people should seek to be less worldly, more intent on cooperating with God's will rather than seeking their personal wants. Undset condemned materialism. Kristin Lavransdatter's life was an object lesson about the heavy price which sinners must inevitably pay. Kristin broke church rules against sexual license and disobedience toward one's parents. She consequently lost her reputation, physical health, and emotional health. Kristin learned that it is not a small thing to violate God's rules. Furthermore, people can sin not only in their actions but also in their attitudes. Kristin did not learn to control her attitudes until late in her life. Before that, she was proud, self-absorbed, and lacked humility. Undset once stated that Kristin's greatest sin was pride. These religious themes are very strong in the trilogy, but they do not get in the way of the storytelling. However, some critics feel that in much of her later writing, Undset let her religious themes get in the way of the narrative flow.

Undset used the events in *Kristin Lavransdatter* to show the genuine worth and validity of Christianity over the old, heretical Viking religion. The novel was set during the medieval period, when Norway's people had recently converted to Christianity from pantheism. It was a time when the old pagan ways were still known and secretly practiced. On two occasions in the novel, characters try to exact cures through witchcraft, but these attempts fail.

Undset urged obedience to societal rules, not just church rules. For example, a common theme in *Kristin Lavransdatter* is the importance of honor. Many times in the novel, characters resort to physical violence when they feel a threat to their reputation or that of a loved one. Such a focus on honor was prevalent in the old Norse myths. Undset's

message was that people should rely instead on the peaceful legal system to settle disputes.

Commonly, the characters in Undset's stories undergo a long, trying struggle, followed by resolution. The author directed her attention particularly to the difficult plight of women, showing that they can expect harsh punishment if they act on their sexual feelings. Her female characters obsessively brood over their secret sins. Undset urges them to focus instead on their chief God-given role, which is as nurturing mothers.

*Kristin Lavransdatter* was immediately popular in Norway. In part this was because the country had gained independence in 1905; Norwegians were eager to read depictions of their country's past. With translation, the book later gained worldwide popularity.

## KRISTIN LAVRANSDATTER

**First published:** *Kransen*, 1920 (*The Bridal Wreath*, 1923; also as *The Wreath*, 1997); *Husfrue*, 1921 (*The Mistress of Husaby*, 1925; also as *The Wife*, 1999); *Korset*, 1922 (*The Cross*, 1927; 2000)

**Type of work:** Novels

*Kristin Lavransdatter broke church and societal rules in her youth, paid for her sins through much unhappiness in adulthood, and finally reached contentment through heartfelt acceptance of God's will.*

In *Kristin Lavransdatter*, Undset told the entire life story of the eponymous character in chronological order in three books. A supporting cast of characters grows old with Kristin over the time period 1320-1350 C.E. The author vividly describes the setting in medieval rural Norway. It is a brutal world with much violence and many pagan superstitions. The Viking era had ended when King Olaf Haraldson converted his kingdom to Christianity. However, many of the Viking behaviors continued, such as drunkenness, brutal talk, and vicious fights begun with little provocation. Just as Norway is undergoing a conflict between pagan and Christian ways, the book's characters struggle between spirit and flesh.

The first book, *The Bridal Wreath* (also known as

*The Wreath*), depicts Kristin's idyllic childhood. She grows up secure and well loved on her father's prosperous feudal estate. She is especially close to Lavrans, her father. He is an admirable figure, respected and honorable. Her protected, happy life is interrupted only by an accident that seriously injures her little sister, Ulvhild.

With puberty, Kristin's rebellious nature surfaces. Her childhood friend Arne, a peasant, dies in a fight defending her honor. Her parents arrange her marriage to Simon, a good and wise man of her landowner station in life. Kristin, however, does not love Simon, and to delay marriage she spends a year in a nunnery. The trilogy does not contain much humor, but the nunnery section introduces Kristin's roommate, Ingebjørg, who provides amusement with her vanity and vacuous comments. While staying at the nunnery, Kristin meets the love of her life, Erlend, a worldly knight. Erlend is handsome and charming, but he is also immature and careless. His mistress, Eline, has already borne him two children. Kristin inadvertently contributes to the death of Eline in a confrontation.

Erlend seduces Kristin, who becomes his willing intimate partner because of her sexual attraction to him. Going against the wishes of her parents, the headstrong Kristin marries Erlend as *The Bridal Wreath* concludes. Pregnant and nauseated at her wedding feast, Kristin experiences doubts and regrets. The wedding crown, or wreath, is a great weight upon her head.

In the second book, *The Mistress of Husaby* (also known as *The Wife*), Kristin pays a heavy price for her earlier sins. The book focuses on Kristin's tribulations in playing her traditional female roles as mother and spouse. She gives birth to seven sons who survive infancy. Many of the pregnancies are difficult and in total they wear her out; they prevent her from being emotionally close to her husband. This story line accurately depicted medieval times, when continual pregnancies were common, along with their physical and emotional toll. Kristin finds raising her sons difficult. She is alternately cold and warm toward them. She obsesses about their failings.

Kristin is a complaining, shrewish wife to a husband who does not meet her standards, either as a father or as an estate manager. As a knight, Erlend is often away on military ventures. He allows his feudal manor, Husaby, to fall into decay. These de-

tails of an unhappy home life mirrored many features of Undset's own marriage. Erlend is slow to connect emotionally with his sons, and when he later bonds with them, Kristin is jealous and resentful. In addition to his contentious home life, Erlend has problems with the government. He is tried for treason against the unpopular King Magnus VII. He narrowly escapes conviction, in large part due to the intervention of Simon, the man Kristin's parents had originally chosen for her to marry. Simon has married Kristin's sister, Ramborg, but he continues to love Kristin. He assists Kristin and Erlend on several occasions, causing tensions in both marriages. Erlend loses his feudal estate, and the family must move back to Kristin's ancestral home.

The sad details of Kristin's tribulations in *The Mistress of Husaby* do not end here. She endures the heart-wrenching death of her father. She becomes closer to her mother following his death, but her mother dies soon afterward. Her parents have secrets about their own sexual love, resolved just before their deaths.

Kristin feels remorseful about her sins and makes a painful pilgrimage to the St. Olav shrine. However, in performing this and other rituals meant to achieve repentance, she lacks sincerity, not truly giving herself over to God's will.

The third book, *The Cross*, begins with Kristin's continued misery but ends with her unhappiness resolved through religious faith. Kristin is dissatisfied with her sons, her husband, and her place in the community. She considers many of her sons to be shiftless and fears that they will lose their station in life. She blames Erlend for her troubles, telling him on one notable occasion that he is far below her father in his worth. This insult causes Erlend to move to a mountain

hut where he lives in squalor for several years. Kristin wants him to return but is too proud to admit it. She is mortified to realize that the surrounding neighbors look down upon her and her family. This low community esteem comes to light in a mis-

understanding concerning Kristin's pregnancy during the period when Erlend lives at the mountain hut. Neighbors accuse Kristin of infidelity with the estate overseer, not realizing that she and Erlend had briefly been together. The insult leads to a fight in which Erlend is wounded. He dies of an infected wound.

All this misery eventually is put to rest as Kristin turns to intense religiosity. She realizes that earthly toils are unimportant, and she stops obsessing over her past sins. She finds peace, becoming content with her life. She becomes a lay nun caring for victims of the Black Death. This plotline is realistic because the pandemic arrived in Norway on a ship in Bergen harbor in 1349 and is estimated to have killed half of Norway's population. Kristin succumbs to the plague in a dying scene in which she gives her wedding ring to the church.

## SUMMARY

Sigrid Undset's stories have worldwide admiration because she wrote with such an engaging, straightforward style about the inner life of people. She was particularly adept at describing issues troubling women; this was true whether her stories depicted contemporary or medieval times. Her special gift was bringing her prodigious knowledge of history and her descriptive skills to her stories without losing track of the gripping story line.

Undset's personal life held much difficulty as she dealt with economic woes, a troubled marriage, and the Nazi occupation of her beloved country. Her own acquisition of fervent religious beliefs both aided her own adjustment and shaped her stories.

Nancy Conn Terjesen

## DISCUSSION TOPICS

- Many people who read *Kristin Lavransdatter* in the past like and remember the first book but have little memory of the other two. Why do you think this is?
- How did Sigrid Undset's own life experiences as wife and mother influence her depiction of Kristin in these roles?
- Kristin was extremely close to several priests during her life. Describe two of those relationships.
- How did Undset's own childhood affect her writing?
- How would Undset view current trends in marriage and family?
- Contrast Kristin's feelings toward her father with her feelings toward her husband.
- Given Undset's own religious views, what would she recommend that Kristin do, following her marriage to Erlend?

## PAUL VALÉRY

**Born:** Sète, France  
October 30, 1871

**Died:** Paris, France  
July 20, 1945

*Valéry, remembered most often for his poetry, also made significant literary contributions as an essayist, playwright, and author of philosophical writings.*

### BIOGRAPHY

Paul Valéry (va-luh-REE) was born on the western coast of France in Sète on October 30, 1871, to a Corsican father and an Italian mother. After two years at the Dominican convent, at age five he entered the Collège de Sète (now Collège Paul-Valéry) which sat on cliffs overlooking the Mediterranean Sea. Memories of the view of the sea from these years strongly influenced his writing. In 1884, the family moved to Montpellier, where Paul attended the lycée. School bored Valéry, causing him to appear disinterested in his work. He began instead to read about architecture, poetry, and mathematics. He created mind games, cultivating an inner world he sensed was unique. At age thirteen, his first attempt at poetry was a satirical parody of Victor Hugo's "Napoléon II." Despite disillusionment with school, he finished his *baccalauréate* in 1888 at the university in Montpellier. Young Valéry continued to write poetry. The principal source of the earliest poems (1887-1890) comes from correspondence with his friend, Gustave Fourment, in which he often included copies of sonnets.

In 1890, several significant literary friendships began. Valéry met Pierre Louÿs, only a year older but far more knowledgeable about literature and acquainted with people in literary circles of Paris. Through Louÿs, Valéry met André Gide, who remained his lifelong friend and correspondent.

Valéry became fascinated with the poetry of Stéphane Mallarmé while reading Joris-Karl Huysmans's novel *A rebours* (1884; *Against the Grain*, 1922). Louÿs encouraged Valéry to seek advice from Mallarmé. Mallarmé gave Valéry the encouragement he sought, and Valéry's motivation to write poetry increased. A few poems were accepted for publication in 1890, but in 1891, more than a dozen poems were published. In 1891, during his first trip to Paris, Valéry not only met Huysmans but also attended a regular Tuesday evening literary gathering at Mallarmé's with Louÿs. This personal meeting deepened Valéry's admiration for Mallarmé.

In 1892, Valéry finished military service and received his law degree. Following graduation and an unhappy love affair, he went to visit his aunt in Genoa. On the night of October 4, during a frightening storm, Valéry suffered an intellectual crisis and entered upon the twenty years of his life known as the "Great Silence." He decided to turn away from poetry writing to a period of philosophical questioning and contemplation dedicated to the formation of his mind. The silence was not complete, but after having written more than three hundred sonnets from 1890 to 1892, the contrast in output was striking. In 1894, he moved to Paris and became a member of Mallarmé's Tuesday circle. He also began writing daily for hours into what resulted in more than 250 notebooks. These notebooks have been preserved on film.

To earn a steady living, Valéry took a job in the war office in 1897. Mallarmé's death in 1898 had a profound effect on Valéry. The same year, he met

Jeannie Gobillard, a friend of Mallarmé's, and they married two years later. He accepted a job as private secretary to Edouard Lebey, director of the French press service, giving himself time to follow his intellectual pursuits.

In 1912, Gide convinced Valéry to allow him and the publisher Gallimard to publish a volume of his early poetry and prose. He began revising the works and also began *La Jeune Parque* (1917; *The Youngest of the Fates*, 1947; also translated as *The Young Fate* and *The Eternal Virgin*), an obscure poem inspired by the operatic recitatives of the German composer Christoph Gluck. When the poem was published, Valéry was widely recognized as a great poet.

In 1920, his famous poem, "Le Cimetière marin," and the volume of revised early poems in the *Album de vers anciens* (1920; *Album of Early Verse*, 1971) were published. A second volume, *Charmes: Ou, Poèmes* (1922; *Charms*, 1971), contained poetry from 1917 to 1921. Two important dialogues were also published: *Eupalinos: Ou, L'Architecte* (1921; *Eupalinos: Or, The Architect*, 1932) and *L'Âme et la danse* (1925; *Dance and the Soul*, 1951), illustrating his fascination with the beauty and symmetry of architectural and musical forms. After the death of Lebey in 1922, Valéry capitalized on his literary reputation. He published poetry, bits of his notebooks, essays, and prefaces to books, and he lectured all over Europe. The first of five volumes of essays was published in 1924, and he was named coeditor of the literary review *Commerce*. In 1925, he was elected to the Académie Française. Valéry wrote two melodramas, *Amphion* (pr., pb. 1931; English translation, 1960) and *Sémiramis* (pr., pb. 1934; English translation, 1960), with music by Arthur Honneger, which were produced by the Paris Opera. In 1933, Valéry was appointed administrator of the new Centre Universitaire Méditerranéen at Nice. In 1937, a chair of poetics was created for him at the Collège de France, where he taught until shortly before he died.

In 1940, during the German Occupation, Valéry moved to Dinard and began *Mon Faust* (pb. 1946; *My Faust*, 1960), which was published in 1946. His last important lecture was delivered in December, 1944, at the Sorbonne. Upon his death on July 20, 1945, he received national honors. He was buried in the Cimetière Marin of Sète, the subject of his best-known poem.

## ANALYSIS

To study the writing of Paul Valéry is to explore the world of a man who saw irony and paradox in life itself. This is reflected even in his having been sometimes called the "greatest living poet of France" when, in fact, his poems were less important to him than the process by which they were created. Not only a poet, Valéry wrote in almost every medium except the novel, admitting that he saw no purpose in anecdotal fiction.

Valéry's literary career and style follow an unorthodox path of development. Generally thought of first as a great poet, he began writing poetry at about age thirteen. The bulk of his poetic output came early in his life, between the years 1917 and 1922. As a young writer, Valéry rejected the existing Romanticism and adopted a somewhat cynical stance. Often identified with the Symbolist school, which was active in Paris in the early 1900's, he later departed from many of its principles to follow his own course. The man whose work he most admired was Stéphane Mallarmé, a leader of the Symbolists. His early association with writers such as Mallarmé and Paul Verlaine in Tuesday night gatherings at Mallarmé's had a profound effect upon Valéry's own work. The Symbolist ideals of purity, precision, and conscious direction in writing were guideposts in his writing. He detested vagueness and saw in the structure of language an algebraic type of formula which was exhibited in the inherent rhythm of words.

The turning point in Valéry's literary career was the experience called his "Genoa night" in 1892. After a disturbing nightmare, he turned away from writing poetry, which had begun to seem like a false and confining manner of expression, and turned his attention to the cultivation of his mind. The twenty years hence are referred to as the "Great Silence," although he was still producing prose works and making valuable contributions to his notebooks. He studied the works of great artists before him who had looked for new means of self-expression. For example, he analyzed the composition of Richard Wagner's musical dramas with their employment of innovative combinations of literary and musical devices. He was fascinated by the notebooks of the artist Leonardo da Vinci not so much for the sketches of the inventions, but for the process by which the genius arrived at his conclusions. Edgar Allan Poe's ability to manipulate the emo-

tional responses of his readers by word choices and poetic structures made him seem, at one point in Valéry's life, the perfect poet.

Valéry read the works of major philosophers and contemplated the eternal mysteries of life, recording his thoughts daily in notebooks. To him, the mark of genius was the ability to bring apparently unrelated things into one connected system. After years of philosophical and intellectual delvings and the mature realization that absolute knowledge is unattainable, Valéry turned back to poetry. He had begun to see verse not as the limiting form he once had, but as possibly the only form that might allow him the ideal means of expression.

An interest in mathematical and architectural concepts had been part of Valéry's study since college days. The mathematical aspects involved in the meter and forms of poetry and the challenge of relating ideas within the framework of a poem was the impetus he needed. His understanding of the aesthetic experience made revision an important part of Valéry's writing. It was not the actual poem that resulted from his work that he felt was important. He admittedly wrote poetry for himself, to develop his own mind, and it was the act of writing that, for him, was the meaningful experience. Whatever was published he considered simply the state of the poem at that particular moment. It was this attitude wherein the poem itself had no set significance that allowed him to react casually to his critics, feeling it their right to interpret as they saw fit. His poetry represented a systematic study of his own thoughts and the way in which his mind worked. The relationships of the ideas within a poem to each other and to the structure of the whole poem were intricate and delicately balanced. His use of devices such as rhythm, sound, metaphor, and imagery were intended to develop the mind's subconscious involvement with the work. Valéry considered poetry a means of evoking excitement and an awareness of the deeper meanings of life, not only for the poet, but also for the reader. He assumed that for a poem to have true aesthetic value, it should present some of the same struggle for the reader as it had for himself. This is illustrated in some of his most famous poems, which are obscure and difficult to analyze in terms of their symbolism and structure.

Prose, on the other hand, was to Valéry a medium for transmitting information, not emotion. Much of his later writing is prose in the form of essays, dialogues, and jottings from his notebooks on various subjects, containing insights from his intellectual quests. Psychology and psychiatry were of great interest to him and he studied writings from the emerging new fields to help him better understand his own motivations. He considered intellect the sole power by which humanity had transcendent understanding of the different psychological aspects of the mind. The characters in his prose reflected his discoveries and probings. His preparation for the essay on the life of Leonardo da Vinci provided ample opportunity to study the processes of genius. He also created Monsieur Teste, a fictional character on an intellectual and philosophical journey whose story was representative of Valéry's own.

### **"THE CEMETERY BY THE SEA"**

**First published:** "Le Cimetière marin," 1920  
(collected in *An Anthology of French Poetry from Nerval to Valéry in English Translation with French Originals*, 1958)

**Type of work:** Poem

*In an imaginary return to his hometown cemetery, the poet attempts to understand one's relationship to the eternal and decide his life's future course.*

"The Cemetery by the Sea" is Paul Valéry's most famous poem, first published in Jacques Rivière's literary journal *Nouvelle revue française* and in 1922 in the collection *Charmes: Ou, Poèmes*. The title has also been translated as "The Graveyard by the Sea." The poet imagines a visit to the graveyard in Sète that overlooks the Mediterranean. He has come as the noon sun, in perfect position, shines down on the white tombstones, reflecting on the sea and the white sails as doves fly overhead. The complicated poem is filled with religious images and language (temple, idols, doves) and deals with one's struggle with life and death, being and nonbeing, and humanity's need to decide its course. Paradox was a constant theme in Valéry's life and writing, and this

poem, with its difficult metaphors and themes, exemplifies the poet's often felt dilemma.

The poem's twenty-four stanzas are each six lines long. The metrical structure is decasyllabic, departing from the more easily flowing twelve-syllable Alexandrine verse of the period. The rhyme scheme is *aabccb*. The form was a welcome challenge to the poet. Some analysts have compared the structure of the poem to that of a clock—a twenty-four-hour day, with sixty minutes to an hour—symbolizing the actual passing of time. Valéry thought that poetry could not be summarized effectively in prose without losing its true meaning, which lay within the structure of the lines themselves. Much of the musical and rhythmical quality of the poem is lost in translation. Many experts have attempted to analyze and to explain Valéry's poetry, especially "The Cemetery by the Sea." In a lecture about the poem, Valéry stated his intentions to write a monologue that was personal but universal, containing the most recurrent themes of his emotional and intellectual life.

Many possible thematic and symbolic interpretations may be made of the poem, but there are some points upon which almost all agree. There are three basic symbols with which the speaker is involved—the cemetery, the sea, and the sun. Each symbol has two sides. The sea is calm on the surface, yet full of turbulence underneath. The sun at noon is bright and changeless, yet casts a dark shadow. The cemetery's tombstones represent immobility, yet beneath them are the souls of the departed. The personal problem being confronted is how the poet will spend the rest of his life. Having just spent nineteen years in silence with respect to his poetic gift, he is at a crossroads in his literary life. The supreme paradox is that even if the poet tries to choose nothingness, he cannot, because he is unable consciously to experience nothingness. He leaves the cemetery with a triumphant conviction to return to poetry.

## THE YOUNG FATE

**First published:** *La Jeune Parque*, 1917  
(English translation, 1947)

**Type of work:** Poem

*The young Fate, representing humankind's inner voice, struggles to choose either love and life or death and immortality.*

*The Young Fate*, also translated as *The Youngest of the Fates* and *The Eternal Virgin*, is the work that catapulted Valéry to the forefront of the French literary scene. Dedicated to André Gide, the person to whom Valéry credits his renewed motivation to write poetry, the poem was written over the period from 1912 to 1917. During the struggle with the composition of *The Young Fate*, Valéry wrote approximately thirty other short works published in the collection *Charmes: Ou, Poèmes* in 1922.

The poet himself agreed that *The Young Fate* was his most obscure poem. The two main reasons that he undertook the poem were to continue the quest for identity already begun in his notebooks during these years and to indulge his preoccupation with form. He desired to create a literary means to show the kind of evolution from form to content that he termed "modulation" in music. He studied the operatic recitatives of Christoph Gluck's *Alceste* (1767), whose purpose was to merge the poetry and the music into a dramatic whole. Valéry observed that the structure of the language and musical form in the speechlike passages functioned to immerse and carry the listener along in the intended mood of the work, unifying structure and feeling.

The poem is composed of 512 lines of Alexandrine verse. Keeping within strict twelve-syllable form, Valéry uses alliteration and inner assonance to give lines a musical quality exhibiting the balanced effects of rhythm and rhyme. This way of handling language not only sets him apart from the emerging Surrealist movement, in which writers attempted to reveal the subconscious mind, but also distances him from the Symbolist poets, whose work had once served as his model.

Some analysts have separated the poem into sixteen sections, making up two acts with introductory and transitional material. The sections repre-

sent evolutions in psychological thought that are represented in the experiences of the poem's main character.

The subject matter is decidedly abstract—thought conscious of itself. Valéry attempts to depict the changes of consciousness or psychological stages as they evolve over the passage of a night. The poem emerged in fragments too abstract to be understood alone, causing Valéry to introduce a secondary subject, providing a more concrete framework for the abstract ideas. The secondary subject is the story of a young woman, Fate, faced with the problems of love and death. The inner voice of the young Fate is the inner voice to whom Valéry felt all people listen. The poem begins with the troubled cries of an awakening young woman who, having been bitten by the Serpent (symbolizing sexual desire), is in a state of confusion between a desire for love and a desire for death. The story has been compared to the classic legend of Cupid and Psyche in which the pull of life's sensuality triumphs; as the sun rises, the young Fate accepts life.

### “AN EVENING WITH MR. TESTE”

**First published:** “La Soirée avec Monsieur Teste,” 1896 (collected in *The Collected Works of Paul Valéry*, volume 6, 1956)

**Type of work:** Short story

*Valéry creates a character who embodies his ideas of pure intellect and creative genius.*

Valéry's philosophical tale first appeared in the literary review *Le Centaure*, published in Paris by Valéry and several friends, including André Gide and Pierre Louÿs. It was not widely read at first; eventually, however, its significant impact dictated several more editions and its translation into at least six languages.

The tale is the story of the narrator's meeting with a strange individual, Edmond Teste, a pure intellectual. Monsieur Teste's motto is: “*Que peut un homme?*,” meaning “Of what is man capable?” Teste has suppressed all unnecessary gestures involved in human relations, such as shaking hands, and has

devoted years of study to discovering the laws of the workings of the human mind. Monsieur Teste is Valéry himself. Valéry's notebooks are filled with notations quoting “opinions of Monsieur Teste.” It was through the figure of Teste that Valéry was able to impart to the world his ideas of creative genius and intellect in their purest states. Many of his abstract reflections on mathematics, philosophy, and language are presented via the character of Teste. Valéry explored, with Teste, the conflict between emotion and intellect and being and nonbeing.

Valéry's fascination with the creative process was first truly awakened in his study of the notebooks of Leonardo da Vinci, which culminated in a commissioned essay about Leonardo in the *Nouvelle revue française* in 1895. The exploration of the same theme continued with Monsieur Teste and is apparent in Valéry's notebook entries generally. His writing on poetic theory, arguing that the process of creation is more important than the eventual product, also revolved around the same ideas. His preoccupation with the workings of his own mind and with the eternal problems of life's choices are central to all his writing.

After publishing the original Monsieur Teste essay, Valéry continued to be fascinated with the character of the superhuman intellectual. Three more Teste essays appeared in 1920. In 1946, five more previously unpublished fragments were added in a posthumous volume. The development of the Teste character throughout all of Valéry's works parallels the development of intellectual theories in the mind of the poet himself. The importance of the essays, therefore, lies mainly in the fact that they afford a glimpse into the workings of Valéry's mind.

### SUMMARY

The writing of Paul Valéry is musical and delicately balanced, yet often obscure. Writing was an exercise by which he clarified his own mind and analyzed the creative process itself, pursuing the

highest intellectual ideals. Although remembered as a poet, his philosophical probing in prose led to the development of aesthetic and poetic theories that had an enormous effect upon later writers and philosophers. The difficulty and intricacy of Valéry's work made it a model for others. His influence is seen in the work of writers such as T. S. Eliot, Rainer Maria Rilke, and Jean-Paul Sartre. Decorated before and after death with national honors, Valéry is one of the most prominent figures in French literature of the twentieth century.

Sandra C. McClain

# CÉSAR VALLEJO

**Born:** Santiago de Chuco, Peru

March 16, 1892

**Died:** Paris, France

April 15, 1938

*One of the world's preeminent twentieth century poets, Vallejo writes poetry with a striking fusion of emotional immediacy, ontological selflessness, and formal ingenuity. His poetry transforms his personal agonies and reflections into universal anthems of suffering, eroticism, and wonder.*

## BIOGRAPHY

The youngest of eleven children, César Abraham Vallejo (vuh-LAY-oh) was born on March 16, 1892, in Santiago de Chuco, a provincial town located high in the northern Andean Sierra of Peru. From that relatively isolated starting point, he grew into one of the most influential and revered poets in the Spanish-speaking world. Moreover, through the diligent work of translators, Vallejo's influence now reaches poets, critics, and readers working in English, Italian, French, German, Russian, Japanese, Quechua, and many other languages.

To contextualize Vallejo's poetry, one might look to the pattern of suffering that emerges from his biography. More specifically, that suffering ranged from the personal to the political, and it extended seemingly from his first breath to his last. In fact, his birth itself embodies the matrix of cultural, religious, political, and psychosocial tensions that would fuel his agonized writing and life, as he was born the grandson of two indigenous Chimu grandmothers and two Spanish grandfathers, both of whom were Catholic priests. At the other end of his life, on his deathbed, he was said to have lamented the failing Republican war effort in Spain.

Early in life, Vallejo also suffered a steady stream of failed love affairs, with one such failure even driving him to attempt suicide. Fortunately his amorous turbulence subsided in January, 1929, with his commitment to live with his future wife, Georgette Phillipart, whom he would marry in 1934. Nevertheless, his life was one of nearly continuous suffering. Complicating that, he felt conflicted over feelings of private despair, which he consid-

ered self-indulgent in relation to the massive, overwhelming sadness and suffering of the universe. Thus, whether gazing upon a star at night or into the eyes of a shackled prisoner, Vallejo continuously sensed a totalizing, universal agony permeating existence and thereby reinforcing his personal ontological insignificance.

One of the early benchmarks of Vallejo's suffering came in 1909, after he had finished his primary education in Santiago de Chuco and his secondary education in nearby Huamachuco. He began a job in the mines at Tamboras, and that exposure to the archetypal agony and exploitation of laborers would mark Vallejo permanently and deeply. In particular, he was pained by the laborers' seemingly unjust and agonizing working conditions, about which he would write in all of his full-length books of poetry, as well as his novel *El tungsteno* (1931; *Tungsten*, 1988), about life at a tungsten mine.

In 1911, Vallejo left the mine and moved to Lima to become a physician, but he dropped out of school within the year. He then moved to Huánaco, where he began to teach for the first time, which is biographically significant for two reasons. First, teaching would prove one of Vallejo's sporadic sources of income throughout his life. Second, in this instance, he was tutoring the children of an affluent mine owner and therefore was exposed again to painful discrepancies in class, wealth, and power.

Vallejo's sensitivity to political inequality was intensified in 1912, when he began to work as an assistant cashier on a sugar plantation. Again he

found the laborers' working conditions to be inhumane, and he found his Catholic upbringing of little help in understanding such agony. This, then, is pivotal as an emergent moment of Vallejo's feelings of the inadequacy of religion to redeem the suffering of human beings, which in turn might be seen as engendering Vallejo's forthcoming passion for politics. A decade later, he would encounter Marxism and seize upon it as a more immediate and plausible solution to suffering than religion.

In the meantime, Vallejo enrolled in La Libertad University in Trujillo in 1913 to study liberal arts. That same year he also published his poetry for the first time. Those early poems, considered his juvenilia, are quite crude in relation to his debut collection, *Los heraldos negros* (1918; *The Black Heralds*, 1990), but they nevertheless demonstrate sparks of his poetic ingenuity. Moreover, one should note that for three years Vallejo was both writing and studying poetry vigorously, earning his B.A. in philosophy and letters in 1915 by writing a thesis on the importance of Romanticism to Spanish poetry.

Quite significantly, Vallejo's endorsement of Romanticism was unusual for the times, as the dominant aesthetic movement of modernism was denigrating such modes of writing as unpoetic. However, demonstrating his fierce intelligence, confidence, and independence, Vallejo refused the faddish ascriptions of certain modes of writing as unpoetic. Of note, his unconventional use of both Romanticism and modernism exemplifies yet another of Vallejo's quintessential traits as a poet: He is many. Vallejo's poetic persona is a multitude of contradictory personae, which is a very modernist notion; yet he also honors poetic tradition, which is antimodernist.

While finishing his bachelor's degree, Vallejo also began to study for a law degree in 1915. However, by 1917 his poetry was displacing his other interests. He was busily publishing individual poems to be included in his debut collection, and his thesis on Romanticism was gaining positive critical attention. Consequently, with his literary reputation burgeoning, he decided to leave law school without a degree and relocate to Lima in 1918. There he met the renowned Peruvian poet Abraham Valdelomar, who embraced Vallejo for his poetic talent. Valdelomar even planned to write the introduction to *The Black Heralds*, though that introduc-

tion never materialized. Meanwhile, to earn an income, Vallejo taught at a primary school in Colegio Barrós, where he would remain until the crucial year of 1920.

Prior to 1920, however, several crucial occurrences in Vallejo's life took place in 1918. In addition to publishing his first book of poetry that year, on June 22, 1918, Vallejo helped to launch the literary review *Nuestra Epoca*, a short-lived but significant addition to the Peruvian literary community. Furthermore, on August 8, 1918, Vallejo's mother died at the age of sixty-eight. Vallejo never recovered from that blow. Initially he was so overcome by grief that he became physically ill, and, after recovering physically, he wrote often of her death, transforming it into one of his poetry's major themes.

The next pivotal year in Vallejo's biography is 1920, when he participated in the events leading to his self-imposed exile from Peru. More specifically, in July, 1920, he traveled to Santiago de Chuco for the annual celebration of the town's patron saint, during which a violent disturbance erupted. It resulted in an act of arson razing a town building, a citizen dying at the hands of the police, and two policemen then being killed by the angry crowd in retaliation. Vallejo was implicated in the mayhem and even identified as inciting the crowd. Consequently he was arrested on November 9, 1920, and spent 112 days in jail in Trujillo.

While incarcerated, Vallejo was exposed yet again to extreme suffering, this time in the form of jailors physically and psychologically tormenting their prisoners. From that experience, Vallejo lost faith in humankind's ability to redeem itself from its suffering, especially due to the human penchant for interpersonal violence and humiliation. This is thematicized throughout his second book of poetry, *Trilce* (1922; English translation, 1973). In June, 1923, to avoid further prosecution for his alleged involvement in the disturbance, he fled Peru forever.

Vallejo resettled in Paris, France, which is significant to his biography for many reasons. First, it rendered Vallejo a lifelong exile, fueling a new sense of suffering and loss in him. Second, while in Paris he met and married Georgette Phillipart, bringing an end to his turbulent string of failed love affairs. Third, Vallejo discovered Marxism in Paris, sparking his political commitments that led to his posthumous collection, *Poemas humanos* (1939; *Human*

*Poems*, 1968), which includes the acclaimed fifteen-poem sequence *España, aparta de mí este cáliz* (*Spain, Take This Cup from Me*, 1974), about the Spanish Civil War, and an earlier sequence of prose poems titled *Poemas en prosa* (*Prose Poems*, 1978).

Marxism also led Vallejo to his outspoken defense of the Spanish Republic during the Spanish Civil War, as well as his commitment to the Peruvian Communist Party. Moreover, his political activism included repeated travel to Spain, across continental Europe, and into the Soviet Union, where in Moscow in 1928 he saw the Soviet system as a promising means of alleviating humankind's perennial, pandemic suffering. Thus *Human Poems* is decidedly more political than his earlier work, and he was reportedly so engaged politically that he even grieved the Spanish Civil War from his deathbed.

Vallejo died in Paris on Good Friday, April 15, 1938, of intestinal infection at the age of forty-six, and he was buried at the Cimetière du Montparnasse.

## ANALYSIS

Vallejo ranks among the most important writers of Latin America and certainly among the world's major twentieth century poets. Remarkably, he published only two full-length collections of poetry during his lifetime, his debut collection, *The Black Heralds*, and *Trilce*. Vallejo's third major collection of poetry, *Human Poems*, appeared posthumously in 1939, and it is generally considered his most important book of poetry.

Vallejo also wrote prose prolifically, though much of it went unpublished during his lifetime. Those works include his 1915 thesis, *El romanticismo en la poesía castellana* (1954); a collection of short stories, *Escalas melografiadas* (1923); a Social Realist novel, *Tungsten*; a travelogue, *Rusia en 1931: Reflexiones al pie del Kremlin* (1931); a follow-up to that travelogue, *Rusia ante el segundo plan quinquenal* (1965); five plays; many freelance newspaper articles and essays; and copious letters to friends.

One of the dominant motifs of Vallejo's poetry is absence, rendering him a poet of suffering. This emanates from his focus upon despair, loss, and rupture in both the human condition, in particular, and the universe in general. Paradoxically, then, absence produces Vallejo's distinctly present, iconoclastic voice, which derives from a unique fusion of Catholic rhetoric, personal strife, ontologi-

cal wonder, cultural comparison, and intricate wordplay. That admixture structures and sustains Vallejo's oeuvre throughout its radical formal and political transformations, thereby connecting his life in provincial Peru to that in cosmopolitan Paris.

Moreover, throughout Vallejo's poetry his deepest private struggles and changes transcend their personal concerns, erupting into a new matrix of expression of universal themes of the human condition. In other words, despite the subjective anxieties and details of his poems, they are neither narcissistic nor insular. Instead, they surpass the personal and become pluralistic, if not universal. Thus, when Vallejo grieves in a poem, he is grieving for the entirety of humankind, and even all of existence. As a result his poetry strikingly elucidates the private lives of his readers, thereby earning him a substantial, international readership, despite the specificity of time, place, and language in Vallejo's poetry, not to mention its relative difficulty.

Despite the difficulty of Vallejo's most complex poetry, careful readers will note its purposefulness. For even in the most seemingly hermetic moments, Vallejo's poetry is rife with signification and resonance. More specifically, while Vallejo's most difficult poetry might initially seem incomprehensible, the reader can gain insights into it through assiduous reading and rereading. In essence, that reading will lead to a growing, cumulative awareness of the importance of disjunction to the poetry. That disjunction produces Vallejo's unique, inexplicable, and profound forms of nonlinear and nonlogical communication, as well as his diverse voices, perspectives, and aesthetic concerns. Moreover, disjunction most profoundly manifests itself through Vallejo's intricate explorations of language itself. Consequently, Vallejo can be considered a torchbearer of such fundamental modernist motifs as the protean and/or masked self, the flawed referentiality of language to reality, and the heterogeneity of voices composing the self.

Heterogeneity is particularly important to understanding Vallejo's avant-garde status in the Americas and beyond, for he masterfully uses diverse registers of voice, often within the same poem, and even within the same line of a poem. In doing so, he is struggling painfully to locate and define the meaning of his personal ontological suffering, which paradoxically materializes through his

poetic oeuvre as a multifaceted, protean, and vigorous language seeking always to confront the “Other” in an effort to minimize isolation and suffering. Consequently, he writes in a richly layered language, blending colloquial, religious, medical, economic, linguistic, and/or cultural valences.

Significantly, heterogeneity is also evident in the diversity of poetry influencing Vallejo’s verse. In particular, one can note the prominent importance to Vallejo of *Modernismo*, French Surrealism, the Spanish Golden Age, and *Romanticismo*, among others. Through those antecedent poetics, Vallejo stretches Spanish, both syntactically and verbally by creating powerful transhistorical and transcultural neologisms and phrases, which always serve to augment the consciousness of his poetry and never to celebrate any sort of personal verbal cleverness.

True to Vallejo’s motif of suffering, the neologisms also help him to reckon the ontological significance and insignificance of human suffering in previously unimaginable ways. Consequently, Vallejo’s impact upon his readers is tremendous. His disjunctive voices illuminate fractures in culture, time, place, and language, thereby leading to new, more problematic but also generative means of thinking about existence and the human condition. In other words, Vallejo yet again proves himself to be a torchbearer of modernist concerns.

In short, Vallejo is a bundle of contradictions. They chafe within and between themselves, producing the friction to spark the avant-garde fires of his poetic oeuvre. Poem by poem, one witnesses Vallejo grappling to reconcile the irreconcilable, whether struggling to conflate his Roman Catholic genealogy with his indigenous spirituality, his personal politics with public policy, his infatuation with language with his resentment of its failures, his eroticism with social mores, and so much more. Thus he is always writing from a schism between such incommensurable forces, and that generates a poetry that remains both radically new aesthetically and desperately conservative personally.

## THE BLACK HERALDS

**First published:** *Los heraldos negros*, 1918  
(English translation, 1990)

**Type of work:** Poetry

*With this collection, Vallejo announced himself as a poet of intense emotional immediacy and iconoclastic metaphysical vision.*

The release of *The Black Heralds* earned Vallejo a good deal of positive critical attention, much more so than his second book, *Trilce*, would initially garner with its 1922 release. Much of the critical interest in *The Black Heralds* derives from the book’s fervent, unique exploration of the intersections of Catholic rhetoric, indigenous Peruvian culture, personal loss, and Vallejo’s perceptions of the world as brimming with erotic energy and an absurd excess of existential agony. This is exemplified by poems such as “El pan nuestro” (“Our Daily Bread”), “Oración del camino” (“Prayer of the Road”), and “Espergesia” (“Epexegetis”), which transform Catholic motifs and icons into metaphors for the framing of intimate, pained questions about an individual human being’s ontological insignificance. Similarly, the book’s title poem, “Los heraldos negros” (“The Black Heralds”), is a furious defi-

ance of God in His most violent moments, which render one speechless yet vigorously innervated in that silence. “The Black Heralds” is one of the most renowned individual poems in the Spanish-speaking world.

After “The Black Heralds,” the introductory poem in the collection, the book comprises six sections. Most of those sections include at least a

few sentimental and/or melodramatic lyrical poems, which is typical of many young poets. After all, Vallejo had written most of these poems in his early to mid-twenties. However, throughout the book readers can spot the emergence of Vallejo’s voice, which sounds itself most audibly in poems like “La

araña" ("The Spider") and "Los dados eternos" ("The Eternal Dice"). There he works with a swift pace, both intellectually and rhythmically, building a narrative sequence disjointed by iconoclastic juxtapositions of Catholic liturgy, natural metaphor, and a perspective on the cosmos as indifferent to individual suffering on Earth.

The book's fourth section, "Nostalgias imperiales" ("Imperial Nostalgias"), intensifies that mix by adding Vallejo's impassioned, political interest in exploited laborers, cultures, and resources, particularly in relation to the colonial sacking of Peruvian Incan land for its minerals and precious metals. Tangentially, one also should note the book's consistent theme of longing for family, which manifests itself, for example, through the poem "Enereida," honoring his father's dissolution through the aging process, and the poem "A mi hermano Miguel" ("To My Brother Miguel"), eulogizing César's deceased older brother, who died in 1915.

## TRILCE

**First published:** 1922 (English translation, 1973)

**Type of work:** Poetry

*With this collection, Vallejo offered the world what some consider to be the definitive avant-garde work of Latin American poetry in the twentieth century.*

With its intricate neological wordplay, radically juxtaposed images, and fluttering emotional registers, *Trilce* might initially appear a daunting, if not impenetrable, book to read. Nevertheless, through patient attention, readers can begin to witness the text cohering its disparities and disjunctions into a comprehensible verbal mosaic of new, nonlogical but purposeful relationships between language and lived experience. In fact, it is precisely in such moments that *Trilce* begins to reveal its majesty, which arises from Vallejo's complex and innovative network of verbal, ideological, cultural, and imagistic considerations. For example, the poem "LXV" tenderly eulogizes Vallejo's mother by transforming his agony over her death into a calm tone of seemingly unflappable compassion. Simultaneously, the poem also fetishizes architectural lan-

guage invoking incestuous echoes, and it inverts the mother-son relationship until the son serves as the mother's nurturer.

Certainly the poetry in *Trilce* is Vallejo's most dense and disjunctive writing, and it defies easy intellectual interpretation. However, the poems are also tightly crafted, and patient readers will recognize that *Trilce's* poems are as emotionally layered and aesthetically purposeful as they are metaphorically, tonally, and culturally unpredictable and unstable.

Consequently, if one refrains from initially reading the book for linear, word-by-word transparency and comprehension, then one can learn to absorb the book's unprecedented poetic communication, however challengingly schismatic and multivalent it may be at times.

## HUMAN POEMS

**First published:** *Poemas humanos*, 1939  
(English translation, 1968)

**Type of work:** Poetry

*This collection enjoys critical praise as Vallejo's greatest contribution to global letters.*

Including a series of prose poems elsewhere titled *Poemas en prosa* (*Prose Poems*) and a riveting fifteen-poem sequence about the Spanish Civil War titled *España, aparta de mí este cáliz* (*Spain, Take This Cup from Me*), the poetry in *Human Poems* is more overtly political than in either of Vallejo's previous collections. Consequently, *Human Poems* offers a new and significant form of political poetry. More specifically, this is achieved through his intimate fusion of private hope, fear, and apprehension with a flurry of feverish public ideology, large-scale death by warfare, and the biopoliticization of the body. Furthermore, *Human Poems* starkly and meticulously explores the perils of capitalistic cosmopolitanism, and this situates Vallejo thematically amid

many contemporaneous modernist artists regardless of genre.

Thus *Human Poems* simultaneously individuates Vallejo for his poetic ingenuity while conjoining him to his contemporaries in the arts and politics. As a result, the book paradoxically positions Vallejo as both a timeless iconoclast and a representative of his times; he is a pioneering explorer of Otherness as both a specific historical contingency and an a priori ontological condition. In other words, while his poetry most often pivots emotionally upon notions of suffering, it derives from the incommensurate divide between self and Other, both in time and place and metaphysically. Moreover, throughout *Human Poems* Vallejo agonizes over this divide, which repeatedly illustrates in various manifestations his despair at his inability to integrate himself into the Other and the Other into himself. An example of this is the sonnet “Piedra negra sobre una

piedra blanca” (“Black Stone on a White Stone”), which is among his most famous poems. Interestingly, that poem also seems to foreshadow Vallejo’s death with prophetic vision.

### SUMMARY

Throughout his life, César Vallejo sought redemption from human suffering. However, he never found it. Instead he expressed his tribulations with uncertainty, caution, force, and ingenuity, thereby creating poetry capable of encouraging humankind to more clearly focus its attention to suffering in order to reduce its exacerbation. For his verbal, formal, and ontological iconoclasm, his efforts earned him a reputation as one of the finest poets of the twentieth century, though that legacy by no means redeems his life and oeuvre of continuous suffering.

Seth Michelson

## MARIO VARGAS LLOSA

**Born:** Arequipa, Peru  
March 28, 1936

*Vargas Llosa is extensively recognized for his prose fiction; his plays and critical essays are also noteworthy.*

### BIOGRAPHY

Jorge Mario Pedro Vargas Llosa (VAHR-guhs YOH-sah) was born in Arequipa, Peru, on March 28, 1936, the son of Ernesto Vargas Maldonado and Dora Llosa Ureta. His parents, who separated before he was born, divorced shortly after, and his mother took him to Cochabamba, Bolivia, where he lived until the age of ten, attending Colegio La Salle. In 1946, his parents sent him to a parochial school, the life of which he portrayed in *Los cachorros* (1967; *The Cubs*, in *The Cubs, and Other Stories*, 1979), a novella. His father, alarmed at Mario's desire to become a writer, decided to enroll him in the Leoncio Prado, a Peruvian government military boarding school, which he attended from 1950 to 1952. At this institution, he was exposed to a brutal reality that marked him to the core. Vargas Llosa transposed his experiences in the Leoncio Prado in his novel *La ciudad y los perros* (1962; *The Time of the Hero*, 1966), the publication of which provoked a serious official reaction in Peru. After his two years in the Leoncio Prado, Vargas Llosa completed high school in Piura, where he instigated student unrest and a strike that later served as the basis for his short story "Los jefes" ("The Leaders"). This short narrative won him the Leopoldo Alas Prize in Spain.

In 1953, Vargas Llosa enrolled in the School of

Law at San Marcos University in Lima. He became an advocate of socialist causes while studying at San Marcos, although communist ideology turned out to be disappointing to him. In 1955, when he was nineteen years old, he married Julia Urquidi, one of his uncle's sisters-in-law. The economic pressures brought about by his marriage were magnificently re-created in his novel *La tía Julia y el escribidor* (1977; *Aunt Julia and the Scriptwriter*, 1982).

By 1957, Vargas Llosa's short stories were appearing in journals and newspapers, and he was the editor of several literary journals. In 1958, his short narrative "El desafío" (the challenge) won first place in a competition sponsored by the French journal *La Revue française*, and he traveled to Paris. At this time, he also traveled through the Peruvian Amazon jungle along the upper Marañón River, which gave him culture shock but also gave him insight into the lives of the inhabitants of that remote area. His second novel, *La casa verde* (1965; *The Green House*, 1968), and *El hablador* (1987; *The Storyteller*, 1989) reflect the observations made during this and another expedition to the jungle in 1964.

In 1958, he obtained a scholarship to the University of Madrid, Spain. Eventually, he completed a doctoral dissertation on Gabriel García Márquez, an outstanding Latin American writer of his generation, who would win the Nobel Prize in Literature in 1982; the dissertation was completed in 1971. After finishing his studies in Madrid, Vargas Llosa moved to Paris and requested another scholarship from the Peruvian state educational system, which was denied. Nevertheless, he began to work for the French radio-television network, which allowed him the opportunity to come in contact with other prominent Latin American authors, such as Julio

Cortázar and Jorge Luis Borges from Argentina, Alejo Carpentier from Cuba, Miguel Angel Asturias, a Nobel laureate from Guatemala, and Carlos Fuentes from Mexico. At this time in his life, he began a self-imposed exile from Peru that would last until 1974.

In 1963, Vargas Llosa married his cousin Patricia Llosa. That same year, he won the prestigious El Premio Biblioteca Breve for *The Time of the Hero*. Winning this well-known Spanish prize raised Vargas Llosa's profile in Europe, where he lived for the next few years, as well as initiating his longtime relationship with the Barcelona publishing house of Seix Barral. In 1965, he was invited to Cuba to judge the literary competition sponsored by the journal *Casa de las Américas* and became a member of the editorial board. After the birth of his first son, Alvaro, in 1966, he and his family moved from Paris to London, where he taught literature at Queen Mary College. In 1967, he traveled to Caracas, Venezuela, to receive the Rómulo Gallegos Award for his novel *The Green House*. As his reputation grew, he traveled worldwide and began to participate in the International PEN Club (the Association of Poets, Playwrights, Editors, Essayists, and Novelists), of which he became president in 1976. His second son, Gonzalo, was born in 1967, a year that he spent lecturing in Western Europe, the Soviet Union, and the United States. That year he was also writer-in-residence at Washington State University, where he began to review his voluminous novel *Conversación en la catedral* (1969; *Conversation in the Cathedral*, 1975). In 1969, he taught at the University of Puerto Rico at Rio Piedras, and in 1970 he established a residence in Barcelona, Spain.

The decade of the 1970's was a prolific one for Vargas Llosa. In 1971, he published his critical essays *Gabriel García Márquez: Historia de un deicidio* and *La historia secreta de una novela*. In addition, his novel *Pantaleón y las visitadoras* (1973; *Captain Pantoja and the Special Service*, 1978), was published in a first edition of one hundred thousand copies and was successfully adapted for a film. *Aunt Julia and the Scriptwriter* was also adapted to the cinema. In 1975, he produced another acclaimed volume of critical essays, *La orgía perpetua: Flaubert y "Madame Bovary"* (*The Perpetual Orgy: Flaubert and "Madame Bovary,"* 1986). In the late 1970's, several journals dedicated issues to the study of his works, and in 1977 the University of Oklahoma dedicated its

Sixth Oklahoma Conference on Writers of the Hispanic World to Vargas Llosa.

His novel *La guerra del fin del mundo* (*The War of the End of the World*, 1984) appeared in 1981. Vargas Llosa also sustained a keen interest in the theater. His two-act play *La señorita de Tacna* (*The Young Lady from Tacna*, 1990), which opened in Buenos Aires and in Lima in 1981, was awarded the Annual Argentine Prize of Literary Criticism. In 1983, his play *Kathie y el hipopótamo* (*Kathie and the Hippopotamus*, 1990) was equally successful. In 1988, his book *Elogio de la madrastra* (*In Praise of the Stepmother*, 1990) was enthusiastically received. He sought the presidency of Peru in 1989, but he was defeated by Alberto Fujimori.

Since then, Vargas Llosa has not embarked on another campaign for political office, but he has continued to make his views known on Peruvian and international sociopolitical issues. He was a fierce opponent of the Fujimori administration of the 1990's and generally aligned himself with right-of-center political forces. However, in 2008 he surprised observers by endorsing the current administration of President Alan García Pérez; Vargas Llosa had sought to succeed García Pérez, who had been president from 1985 until 1990 before he was reelected in 2006. In 2005, Vargas Llosa received the Irving Kristol Award from the American Enterprise Institute, a Washington, D.C.-based conservative think tank. Vargas Llosa praised the institute for seeing him as "a unified being," considering both his fiction and his role as a public intellectual.

## ANALYSIS

Vargas Llosa was considered a prodigy among the Latin American authors who emerged during the so-called literary boom of the early 1960's. His love affair with literature and writing began very early. He recalls the pleasure that he found in reading Mark Twain's *The Adventures of Tom Sawyer* (1876), the tales of Sinbad the Sailor from *One Thousand and One Nights*, and other stories. During his adolescence, he immersed himself in the French novel. He learned through his readings the characteristics of modern fiction and began to assess the effects of narrative techniques. In addition, his readings introduced him to the works of Henry Miller, James Joyce, Ernest Hemingway, Marcel Proust, André Malraux, Jorge Luis Borges, and William Faulkner.

An overview of Vargas Llosa's works provides an insight into his narrative techniques and themes. In his first novel, *The Time of the Hero*, which is the story of a young cadet, Vargas Llosa's cinematographic techniques, multiple character point of view, disturbed chronology, and incorporation of taboo language effectively portray the marginalized sectors of society. The military academy Leoncio Prado, where the novel takes place, becomes a fictional microcosm of Peruvian society and its ills.

By the time this book was published in 1962, Vargas Llosa had become concerned with the role of the writer in society. This preoccupation became evident in a speech, "Social Commitment and the Latin American Writer," that he delivered at the conference held in his honor at the University of Oklahoma in 1977. In this speech, he stated the difference between Latin American writers and writers from Western Europe and the United States. In order to fulfill their mission, the former must rigorously uphold their artistic values and their originality to enrich the language and the culture of their countries. On the other hand, Latin American writers must also assume a social responsibility.

His social preoccupations, along with his craftsmanship, were also evident in his second novel, *The Green House*. It is a complex novel developed through five different plotlines that take place simultaneously in two Peruvian locales. Although *The Green House* seems to be a structural puzzle that the reader must solve, the themes of frustration and victimization are evident. Individuals are abused for economic gain or for religious reasons.

The victimization of an entire generation through political oppression is the main theme of his next novel, *Conversation in the Cathedral*. This work provides a panoramic view of Peruvian society during the dictatorship of General Manuel Odria from 1948 until 1956. The reader becomes aware that the brutality of this regime spread through all of Peru. Technically speaking, this novel presents on a larger scale some of the stylistic and structural characteristics of Vargas Llosa's previous novels. The plot development appears fragmented and the characters' relationships become at times extremely complex. Yet the theme that emerges constitutes an indictment against political regimes that bring about social depravity.

Vargas Llosa demonstrates new thematic and

stylistic trends with the publication of *Captain Pantoja and the Special Service* and *Aunt Julia and the Scriptwriter*. These works exhibit a simpler plot development than prior works. In *Captain Pantoja and the Special Service*, Vargas Llosa satirizes the Peruvian army and ridicules the members of a religious cult. Pantoja, a man endowed with maniacal organizational skills, is charged with the secret task of creating a squad of prostitutes to visit the military posts located in the jungle. He carries out his job with such dedication that he becomes entangled in a web of absurd adventures that produce hilarious results. Although this novel is a light, comic narrative, it contains a serious theme—the social evils of any sort of fanaticism.

*The War of the End of the World* is a historical novel that narrates an upheaval in the backlands of Brazil in the late nineteenth century. As in other works by Vargas Llosa, the reader finds two main settings in this novel: Bahia, a coastal city, and Canudos, a religious community. An argument arises among the conservative (yet also revolutionary) peasant masses, Bahia's urban politicians, and the new Brazilian republican central government. This dispute rapidly acquires the proportions of a civil war of catastrophic consequences. Using cinematographic techniques such as close-ups (Vargas Llosa's first involvement with the Canudos material was when the Brazilian filmmaker Rui Guerra asked him to write a script for a film based on it), Vargas Llosa makes the reader aware of the horrors of war. Moreover, the writer emphasizes the lethal consequences of all ideological fanaticism. The work was inspired by the Brazilian writer Euclides da Cunha's great nonfiction account of the Canudos revolt, *Os Sertões* (1902; *Rebellion in the Backlands*, 1944).

In some of Vargas Llosa's later works there appears yet another preoccupation—an insistent inquiring into the nature of writing. The author investigates the process of writing, the creation of fiction, and the difference between a real writer and a scribbler. Some works included in this category are *Aunt Julia and the Scriptwriter*, *Quién mató a Palomino Molero?* (1986; *Who Killed Palomino Molero?*, 1987), *Historia de Mayta* (1984; *The Real Life of Alejandro Mayta*, 1986), and even *The Storyteller*. In *The Real Life of Alejandro Mayta*, there is the presence of a writer-narrator who announces that he is going to reconstruct the unknown or ignored story

of the Peruvian leftist revolutionary Alejandro Mayta. He states that it will be a fictional story, but one that will carry the truth of fiction. Moreover, as the writer begins to produce Mayta's story, he reflects on the question of bringing about changes in Peruvian society through revolutionary means. It turns out that Mayta is an insignificant individual who never was able to launch his revolution. At the end of the novel, the apparent underlying theme is intimately related to the production of fiction and the nature of fiction itself.

A new theme appears in Vargas Llosa's novel *In Praise of the Stepmother*, for in it the reader is confronted with the presence of evil in innocence and the difficulties of utopias. It narrates the story of a man who thinks that he has a perfect grip on life until his wicked child seduces his stepmother. This book has some of the characteristics of *Aunt Julia and the Scriptwriter* and *The Storyteller*, for it presents two clearly noticeable textual divisions.

In sum, the novels of Vargas Llosa move gradually from extremely complex structures to simpler works with substantial themes that are more appealing to the general public. Some critics asserted that there was a correlation between this development and his rightward move politically; as he wrote in more traditional forms, his politics moved more toward the mainstream.

## AUNT JULIA AND THE SCRIPTWRITER

**First published:** *La tía Julia y el escribidor*, 1977 (English translation, 1982)

**Type of work:** Novel

*An eighteen-year-old boy struggling to become a writer marries his uncle's sister-in-law, who is twelve years his senior.*

*Aunt Julia and the Scriptwriter* has become one of Vargas Llosa's most popular novels and has been freely adapted for film under the title *Tune in Tomorrow* (1990); the film was in English and its setting moved to 1950's New Orleans. Like other novels by this author, this narrative presents two definite textual portions telling two different types of stories. The first story depicts the autobiographi-

cal account of the narrator's love affair with his aunt by marriage, Julia. This relationship causes an uproar in the narrator's family, for Julia is not only a distant relative but also a divorcé from Bolivia who is twelve years older than the narrator. Hence, the lovers must elope.

The second textual track contains segments of soap operas composed supposedly by Pedro Camacho, the scriptwriter who figures in the title of the novel. Camacho, a machinelike writer of radio soap operas, eventually overloads his memory and has a nervous breakdown, bringing catastrophic consequences to his works. His characters become entangled in different stories, and situations become chaotic, culminating in apocalyptic tragedies in which the characters expire en masse.

Vargas Llosa's skillfulness becomes evident when he occasionally brings together those two different tracks. These points of contact occur when the narrator's personal affairs begin to acquire the characteristics of Camacho's melodramatic sagas and also when people around the narrator bring up the occurrences in Camacho's stories. The two evident tracks touch each other in this manner. Nevertheless, in between those two plotlines there lies the story of the narrator, who is desperately struggling to become a successful writer. He is searching for ways to achieve realism in fiction. When he urgently needs funds to sustain his relationship with Julia, he engages in a frantic writing activity that his friend Javier calls prostituting one's pen. Javier means that the narrator is producing book reviews and articles for mere profit. The narrator finds this type of writing disgusting, too. On the other hand, when he writes a short narrative, he eagerly shares it with Javier and Julia. Unfortunately, they consistently find his stories unrealistic.

Although Camacho is very successful, the narrator dislikes his style. The scriptwriter's work is a type of wholesale writing to be sent over the air waves for the masses to enjoy. The narrator, however, cannot help but admire Camacho's tenacity

and his fanatical dedication to his work. In the final chapter of the novel, the reader knows that the narrator has finally found the kind of writing for which he longs. Nevertheless, one sees Camacho reduced to a disgraceful state. He has turned into a simple gofer for a sensationalist newspaper. Thus, the roles of the narrator and of Camacho are reversed in terms of success and productivity. *Aunt Julia and the Scriptwriter* constitutes an artistic and humorous novel. In it, Vargas Llosa disguises one of his major themes: the inner workings of creative writing.

## THE STORYTELLER

**First published:** *El hablador*, 1987 (English translation, 1989)

**Type of work:** Novel

*An autobiographical narrator tells the story of a Jewish friend who becomes a storyteller among the Machiguenga Indians of the Peruvian jungle.*

Vargas Llosa initiates *The Storyteller* with the presence of an author-narrator who, while strolling the streets of Florence, sees an exhibit of photographs depicting Peruvian Indians. He notices that one of the photographs shows what he believes to be a Machiguenga storyteller surrounded by his listeners. This encounter prompts him to recall a journey to the upper Marañón River in the Peruvian jungle and his keen interest in the Machiguenga Indians. At the same time, the photographs unleash memories of his Jewish friend Saúl Zurata at San Marcos University, who was well versed in the ways of the Machiguenga.

In the second chapter, the story leaps to the past; the reader becomes acquainted with Zurata, who, from the beginning, appears to be a specially marked individual. He bears an enormous wine-colored birthmark that covers the entire right side of his face and that earns him the nickname Mascarita (Little Mask). Although he is apparently not bothered by unkind comments on his external appearance, and although he seems open and uncomplicated, the reader suspects that he secretly harbors feelings of alienation. One comes to this

conclusion when the narrator points out Zurata's singular affinity for Franz Kafka's writings, especially *Die Verwandlung* (1915; *The Metamorphosis*, 1936), which he knows by heart. This short story by Kafka centers on Gregor Samsa, a character who is so alienated from his world that one morning he wakes up and discovers that he has turned into an enormous, repugnant insect.

After the presentation of Zurata, the novel presents two well-defined textural divisions. Chapters that present the narrator's relationship with Zurata alternate with chapters in which a Machiguenga storyteller is the sole narrative voice.

The storyteller's discourse depicts the way of life of the Machiguenga, including their rituals, cosmogony, and system of beliefs. One of the most noteworthy accomplishments of Vargas Llosa in these portions of the novel is the creation of Machiguenga speech. It is a mythic narrative style of soothing simplicity that seems to flow forever, joining one story to the next without noticeable pauses. The reader sees the Machiguenga always walking, always moving toward a more secure spot near a river. The author-narrator, who derives great pleasure from probing his Jewish friend about his knowledge of ethnology, is deeply disappointed when, on accepting a scholarship to Spain, he loses contact with Zurata, who seems to disappear into thin air. A missionary mentions having heard the

unending discourse of a Machiguenga storyteller, which prompts the author-narrator to want to know more about this person. This storyteller is an albino with an immense wine-colored birthmark on the right side of his face, which reveals to the reader that the Machiguenga storyteller is Zurata. In addition, the reader finds the storyteller identifying himself as Gregor Tasurinchi

and narrating a horrifying experience; he dreams that he has turned into an enormous, repugnant insect.

## THE FEAST OF THE GOAT

**First published:** *La fiesta del Chivo*, 2000  
(English translation, 2001)

**Type of work:** Novel

*This historical novel centers around the dictatorship of Rafael Trujillo—the “goat” of the title—in the Dominican Republic.*

*The Feast of the Goat* has two narrative strands: one set during the time leading up to Trujillo’s assassination and the other set more than thirty years later and focusing on Urania Cabral, a middle-aged businesswoman who remembers her youth under the Trujillo regime. Now living in the United States, Urania returns to Santo Domingo, the capital city that during Trujillo’s administration was renamed Ciudad Trujillo after the dictator. Urania’s trip leads her into reveries and evocations of the traumatic political past of her youth. Her father had been a confidante of Trujillo’s, and his collusion with the dictator led to Urania’s sexual abuse.

As an adult, Urania is celibate and lonely, despite being professionally accomplished. This sexlessness contrasts with the fervid sexual power of many of Vargas Llosa’s other heroines, such as Jurema in *The War of the End of the World* or the title character in *Travesuras de la niña mala* (2006; *The Bad Girl*, 2007), as well as the more creative ebullience of Flora Tristan in *El paraíso en la otra esquina* (2003; *The Way to Paradise*, 2003). Vargas Llosa has often linked the sexuality in his work to the twentieth-century French thinker Georges Bataille’s ideas of excess and expenditure; in contrast, Urania’s asexuality indicates a certain vacancy in her consciousness that still enables it to operate in a keen, observant fashion.

Urania is the muse of astronomy; Urania Cabral’s lack of physical connection with her own sexuality and with the Dominican Republic from which she has long been exiled give her a valuable perspective upon the legacy of dictatorship. What Urania looks back upon are the feverish last days leading up to Trujillo’s assassination on May 30, 1961, which results in the end of an era of dic-

tatorship and its prolongation in a far less exhibitionistic form. Joaquín Balaguer, Trujillo’s long-standing right-hand man, outfoxed Trujillo’s son to gain control of the country. The inconspicuous Balaguer becomes an unlikely but ruthlessly effective successor to Trujillo; confirmed by ostensibly democratic elections he nearly always managed to win, he ended up ruling the country for a longer period of time than the more charismatic Trujillo.

Yet it is Trujillo who is the novel’s dominant character, and a good portion of the book is told from within his consciousness. Trujillo is politically masterful yet sexually frustrated, supreme over his own country yet subservient to the United States, which ultimately keeps him in power.

Vargas Llosa, who is often criticized for being too pro-American and too enthusiastic a proponent of free-market economic policies, here tacitly but decisively differentiates his own brand of democratic neoliberalism, which embraces transparency and multiculturalism, from the authoritarian and racist Trujillo. Vargas Llosa interweaves strands of fiction and history with an extraordinary discursive nimbleness, revealing at once the public aspects of Urania’s private trajectory and the deeply pathological inner correlates of Trujillo’s lust for power. Thoroughly based on history, Vargas Llosa’s novel nonetheless crackles with the inventiveness of the alertly observed.

The novel was adapted into a Spanish-language feature film, *La fiesta del chivo*, released in 2005 with Isabella Rossellini in the role of Urania Cabral.

### SUMMARY

Mario Vargas Llosa is one of the most prominent and prolific writers of the literary “boom” in Latin America. His works demonstrate that he has successfully developed a great variety of themes. Social injustice, political oppression that brings about societal decadence, the abuse of human beings, the creative act of writing, the dangers of fanaticism and of utopias, and the intrinsic value found in primitive cultures are some of his major preoccupations. He sees the mission of the Latin American writer as one of a spiritual nature, through which life may become better for all.

## LOPE DE VEGA CARPIO

**Born:** Madrid, Spain  
November 25, 1562

**Died:** Madrid, Spain  
August 27, 1635

*Vega Carpio is recognized as both the most prodigious writer of Spanish letters and the creator of the Spanish national theater.*

### BIOGRAPHY

Lope Félix de Vega Carpio (VAY-guh KAHR-pyoh) was born in Madrid, Spain, on November 25, 1562, the son of Félix de Vega Carpio and Francisca Fernández Flores. By the age of five, and before he could write, Vega Carpio was already bargaining with schoolmates to copy his verses for him; at thirteen, he wrote his first *comedia* (comic play), *El verdadero amante* (wr. before 1596, pb. 1620; the true lover). At the universities of Alcalá and Salamanca, Vega Carpio began translating Latin poetry and concentrating on his own literary endeavors. Both parents died when he was a young man. Yet he maintained his parents' passion for living, particularly his father's inclination toward amorous adventures, which structured his lifestyle and career.

In the early 1580's, Vega Carpio, now strongly attracted to the world of the theater, met the daughter of a well-known theater figure, Elena Osorio, with whom he established a love relationship that lasted many years. Osorio's father, however, eventually opposed the relationship and forbade his daughter from seeing the young, aspiring dramatist. Consequently, Vega Carpio wrote several vicious attacks on the Osorio family and was brought to court for his defamations. Only twenty-six years old, he was sentenced to exile from the court for eight years and from the kingdom for two years.

During Vega Carpio's years in exile, he married by proxy Isabel de Urbina and immediately went to fight for the invincible Spanish Armada. During this time, he wrote the twenty-canto poem *La hermosa de Angélica* (1602; the beauty of Angélica). After Spain's defeat against England, Vega Carpio returned to Valencia in eastern Spain, where a popular dramatic school was flourishing. Between 1588 and 1591, he wrote many *romances* (octosyllabic, assonant verse) and *comedias*, which he sent to Gaspar de Porres, his agent in Madrid. It is during these years that he acquired national fame and earned the nickname "fénix de los ingenios" ("phoenix of the witty"). In 1590, his exile completed, he returned to Toledo, a city fifty miles south of Madrid, and was employed as secretary to the duke of Alba. He maintained this position for five years, during which time he wrote *La Arcadia* (1598), a pastoral novel that deals with the theme of love. In 1594, his first wife died in childbirth. Four years later, he married Juana de Guardo, with whom he had three children. Shortly after this marriage, he returned to Madrid to be closer to the theater. There, he met another important female figure, Micaela de Luján. Although still married to Juana, Vega Carpio lived with Micaela and with her had seven children. She is present in many of his poems under the pseudonym Camila Lucinda. Around 1608, however, her name disappeared from his work.

In 1605, Vega Carpio began his employment with the duke of Sessa, for whom he was secretary for twenty-six years. He established an intimate correspondence with the duke, twenty years his junior. Throughout their exchange of letters, Vega Carpio

revealed many intimate details about his life and relationships. A few years later, he wrote his serious study on dramatic principles, *El arte nuevo de hacer comedias en este tiempo* (1609; *The New Art of Writing Plays*, 1914), which shaped the characteristics of seventeenth century Spanish drama.

The years between 1610 and 1613 are considered to be the happiest of Vega Carpio's life. *Fuenteovejuna* (wr. 1611-1618, pb. 1619; *The Sheep-Well*, 1936), *El acero de Madrid* (wr. 1606-1612, pb. 1618; *Madrid Steel*, 1935), and *El perro del hortelano* (wr. 1613-1615, pb. 1618; *The Gardener's Dog*, 1903) are all proof of his superior dramatic creations of this time period. His wife Juana died in childbirth in 1614, however, and he fell into an intense depression that led him to take up monastic orders. Shortly after turning to the priesthood, he met Marta de Nevares Santoyo, a married woman with whom he became passionately involved. Her presence is apparent in many of his poems. He wrote about her in his poetry as Amarilis. They were happy together for more than ten years, but in 1632, Marta, blind and insane, died at the age of forty. It was at this time of his life that Vega Carpio produced his famous tragedy, *El castigo sin venganza* (pb. 1635; *Justice Without Revenge*, 1936). He also published *La Dorotea* (1632), a largely autobiographical work written in both prose and verse.

In the last year of his life, Vega Carpio regularly repented for his errors. The last work that he ever created, *Égloga a Claudio* (1637; eclogue to Claudio), focused on a self-critical yet nostalgic reflection on his life. He recorded that he had written more than one hundred plays, each within a twenty-four-hour period, and that the total number ascended to fifteen hundred. After a life overflowing with adventure and emotional trauma, Vega Carpio died on August 27, 1635, in Madrid.

## ANALYSIS

While Vega Carpio's genius extends to all literary genres, he is most recognized as a dramatist. One of his main achievements was to bring all the diverse elements of preceding Spanish theater together and unify them under a few basic guidelines. Although he had been writing plays since the 1570's, it was not until 1609 that he published his poem of practical guidelines for dramatists, *The New Art of Writing Plays*. In this work, he stresses unity of action in a three-act play written in poly-

metric verse. Whether a comedy, tragedy, or tragic-comedy, the drama should have one *gracioso*, a witty servant, either male or female, who parodies the actions and lines of the main characters and who delights the audience with puns and anecdotes. He also states that language should be appropriate to the individual characters and that verse should be appropriate to the scene that it describes. Suspense, however, is important; the audience should not know the ending until the ending. Vega Carpio's major theme, honor, is usually revealed through a conflict between the court and the town, between new Christians and old Christians, or within love triangles. For him, the most important part of the play was the audience's enjoyment, but, at the same time, he never disregarded the didactic importance of his plays. These specifications remained the defining elements of Spanish theater well into the eighteenth century.

After Vega Carpio's death, his protégé, Juan Pérez de Montalbán, attributed 1,800 *comedias* and more than 400 *autos sacramentales*, one-act plays with a religious theme, to his master. Since the 1960's, however, most critics accept that there are 314 plays that are definitely by him and some 187 that may be his.

Vega Carpio's dramatic works can be divided into various categories: plays of *capa y espada* (cloak and sword), which deal with an intriguing love affair usually ending in marriage; religious and mythological plays; and those based on another literary work or a historical event. The cloak-and-sword plays are characterized by a plot that includes jealous lovers, a woman who is covered up or disguised in some way, and some sort of duel. Some examples of this type of drama are *La dama boba* (pb. 1617; *The Lady Nit-Wit*, 1958), *Madrid Steel*, and *Las bazarrias de Belisa* (pb. 1637).

The most celebrated of this group of plays, however, is *The Gardener's Dog*. In this play, he deals with the conflict between honor and love. Doña Diana, the countess of Belflor, falls in love with her secretary, the commoner Teodoro, who does not know his heritage. Her dilemma is a real, modern-day one because the code of honor does not allow the different economic classes to intermarry. She is, like the dog in the proverb that forms the play's title, "the gardener's dog who neither eats nor stops eating." Teodoro's servant, Tristán, convinces everyone but Diana that his master is a real count. Yet

Teodoro, disgraced by the lie, insists that he must leave Diana. She immediately responds that his sense of honor proves his nobility, and, thus, they can marry, and he can become a real count. With spectacular characterization and intrigue, Vega Carpio addresses the conventions of modern-day honor. He insinuates that because honor, in the sense of public reputation, is satisfied by the lies of Teodoro, then the whole concept of honor is a sham.

Vega Carpio's religious plays were important in teaching Christian principles to seventeenth century Spain. Besides the church and public storytellers, plays were the only way for the commoners, almost all of them illiterate, to learn about the Bible. He created many plays that dramatized incidents from the Old Testament. His interpretation of the Book of Esther, *La hermosa Ester* (wr. 1610, pb. 1621; beautiful Esther), is perhaps his most beautiful biblical drama. Stories from the New Testament were strictly supervised by the church and limited to those dealing with Christ as an infant; it was considered indecent to portray Christ's adult life in the playhouses. Vega Carpio wrote numerous biblical comedias, as well as comedias de santos, dramas that interpreted the life of a saint. The mythological plays, written for the court, included spectacular visual effects that the regular playhouses could never have afforded.

Vega Carpio also enjoyed basing his plays on historical events. In this way, history itself would serve a didactic end in the theater. One of his earlier dark tragedies, *El duque de Visco* (wr. 1604-1610, pb. 1615; the duke of Visco) is based on Portuguese history and deals with the difficulty of administering justice. *The Sheep-Well* is based on an actual fifteenth century uprising. A villainous commander abuses his villagers to such an extent that they finally revolt and kill him. When the monarch tries to extort evidence of the guilty party, the village unites, and the whole community takes the blame. Finally, they are pardoned by the king. Vega Carpio brings to the stage the themes of justice, loyalty, and harmony within the state.

## PERIBÁÑEZ

**First published:** *Peribáñez y el comendador de Ocaña*, 1614 (English translation, 1936)

**Type of work:** Play

*In a farming town, a newly wed couple represents the ideals of love and honor by overcoming the obstacles that the lustful commander presents to them.*

*Peribáñez* typifies Vega Carpio's ideas of the necessary ingredients for a successful drama and is truly one of Spain's greatest plays. In this three-act *comedia*, *Peribáñez*, a young farmer, and his bride, Casilda, confront the local commander of Ocaña, their town, in his attacks against their love and honor. The play opens with the wedding scene of the young couple and includes some beautiful verse between the newlyweds proclaiming their love for each other and their individual expectations of their marriage. The day is cursed, however, when the young and noble commander of Ocaña suffers a terrible fall from his horse. *Peribáñez* and Casilda offer their home to the commander so that he may recover from his accident. When he finally

regains consciousness, he sets his eyes on the beautiful bride and immediately falls in love with her. The commander decides that he will stop at nothing to fulfill his desires for Casilda. He plots to bribe the couple with gifts of mules and earrings in the hope of winning their trust and taking advantage of Casilda.

The rest of the first act deals with the young lovers' trip to Toledo, where the king of Spain is celebrating the summer festival, and how the commander follows them there and secretly hires an artist to paint a portrait of the woman whom he so strongly desires. In these descriptions of the wedding and the festivals, Vega Carpio vividly describes the houses and the dresses that the women wear and, in this way, offers the

reader a rich description of the local colors and customs.

In the second act, the overlord, with the help of his two servants, gains entrance to Casilda's house when Peribáñez is away on business. Casilda, however, rejects his propositions using lines from a famous ballad: "far more do I care for Peribáñez in that brown cape of his than for the Commander in his embroidered one." For Casilda, love outweighs wealth and riches. Yet the commander does not take lightly to her scorn. He swears that he will, in the end, have her: "Well, even though you cost me my property, my honor, my blood and my life, I am going to overcome your disdain, I intend to conquer your resistance." As with most cape-and-sword dramas, the hero discovers the stain of his dishonor and tries to recuperate his loss. Peribáñez is in Toledo when he discovers the portrait of his wife in the house of a local artist and deduces the commander's real motives. He quickly returns to Ocaña, fully trusting his wife but unsure of how to deal with the commander. In this act, the conflict is fully revealed, and, as the curtain falls, the audience postulates the outcome of the play.

At the beginning of the last act, the commander decides to knight Peribáñez and put him in command of a squadron of soldiers fighting the Moors. His reasons, of course, are selfish. As the army leaves, Peribáñez and one of the soldiers, Belardo, reflect on life. It has been suggested that Belardo represents Vega Carpio himself as he discusses life, gardening, and the sacristy. In this last act, Vega Carpio integrates historical figures and events into the drama that connect the themes of honor, love, and justice portrayed on the stage to the audience's real world.

That night, Peribáñez secretly returns and awaits the uninvited guest in the bedroom. When the commander enters, Peribáñez runs his sword through him and then kills two others for being traitors to his household. King Henry III hears the story of a commoner slaying a nobleman and immediately offers a reward to bring the guilty man to court for execution. Peribáñez turns himself in and begs that the king listen to his story. The just king grants him the favor, Peribáñez explains, and the king both pardons and praises him for upholding his honor. The curtain closes as the king and queen reward the loving couple for upholding love and honor in the face of conflict.

## JUSTICE WITHOUT REVENGE

**First published:** *El castigo sin venganza*, 1635  
(English translation, 1936)

**Type of work:** Play

*In this tragedy, Vega Carpio exposes the moral hypocrisies underlying the lifestyle of the nobles and shows how "honor" can cruelly govern and instigate unjust paradoxes.*

*Justice Without Revenge*, one of Vega Carpio's last works, is an ironic tragedy based on a short novel written about a historical fact. In this drama, there are three protagonists: the womanizing duke of Ferrara, his illegitimate son, Count Federico, and the young noblewoman, Casandra, whom the duke marries for legal reasons. In the beginning of the play, Vega Carpio develops the relationship between the characters. In contrast to *Peribáñez*, in which the charming heroes win the approval of a just monarch, the protagonists of this drama do not represent upstanding citizens. Yet in spite of their antiheroics, the audience does, to some extent, sympathize with their decisions and actions. The duke regularly frequents the local whorehouses but knows that he has to marry and beget a legitimate heir for his estate. He has little interest, however, in remaining faithful to his young, attractive bride. Federico, his illegitimate son, whom the duke sincerely loves, is selfishly concerned about his hereditary position and has little patience for his father's amorous adventures. Upon seeing his future stepmother, whom he rescues in a stagecoach accident, he falls instantly in love with her. Casandra reciprocates these feelings, although at the same time she accepts her commitment to her future husband, and the two lovers suffer the anguish of not being able to express their love openly.

In act 2, Vega Carpio develops the moral positions of each of the characters. The two young lovers resist their feelings even though the duke continues his nightly adventures with the local prostitutes. Unexpectedly, the duke is called to fight in the religious wars. Federico and Casandra are left alone, and in beautiful and powerful verses they openly admit the intense love that they feel toward one another. This explosive scene is the

climax of the love that Federico and Casandra feel for one another. The audience is torn between sympathizing with the two victims or rejecting them because they do not maintain their family honor.

In act 3, the duke returns from the wars a reformed man, vowing to be faithful to his wife. At this point, Vega Carpio aggrandizes the duke and tries to make him a worthy central figure. Upon his arrival, the duke receives an anonymous letter explaining the truth, technically incest, between his wife and his son. He suddenly realizes his own guilt for what has happened and decides to act, not as vengeful father or husband, but as supreme justice. He punishes his son and wife, although violently, without revenge. First, the duke tricks his son into killing Casandra, who is bound and gagged in a sack. Then, he accuses Federico of killing the duchess for fear of losing his inheritance and sentences him to death. The duke is condemned to live his life knowing that he has killed

the one whom he loves most, his son. In this tragedy, Vega Carpio presents a somber conflict between love and honor, the hypocrisy that surrounds them both, and the pain that is suffered from their clashing.

## SUMMARY

Ezra Pound said that Lope de Vega Carpio was like ten brilliant minds inhabiting one body, and that any attempts to enclose him into any formula would be like trying to make one pair of boots fit a centipede. He lived an adventurous, amorous life, reflected in his prose and poetry. His fame within the Spanish theater is unprecedented. His diversity of themes, spontaneity and naturalness of dramatic characters, concern for the audience's enjoyment, and innovations of seventeenth century theater define him as one of the greatest dramatists of the Western world.

## DISCUSSION TOPICS

- Lope de Vega Carpio was a contemporary of William Shakespeare. How does his place in Spanish literature compare to Shakespeare's in English literature?
- To what sort of Shakespearean character would one compare the *gracioso* of Vega Carpio?
- Honor is an important virtue for Spaniards. How does Peribáñez achieve honor in the play named for him?
- Revenge was often a motive in Renaissance theater. What is the significance of Vega Carpio's title *Justice Without Revenge*?
- Was dealing with governmental authority a larger problem for Vega Carpio than it was for English writers of the same period?

## VERGIL

**Born:** Andes, Cisalpine Gaul, near Mantua (now in Italy)

October 15, 70 B.C.E.

**Died:** Brundisium, Cisalpine Gaul (now Brindisi, Italy)

September 21, 19 B.C.E.

*Vergil, through the pastorals of his youth and the epic of his maturity, created verse which, while Greek in its inspiration, specifically reflects the sophistication of Augustan Rome.*

### BIOGRAPHY

As is the case with many ancient writers who achieved wide popularity in their lifetimes, much of the vast amount of biographical material written about Publius Vergilius Maro during or immediately after his lifetime is unreliable. From the outset of his career, the Roman poet whom readers popularly identify as Vergil (VUR-juhl) was the poet most associated with the patriotism of the Pax Romana (the worldwide Roman Peace) of the emperor Augustus. Furthermore, Vergil's poems went almost immediately into the school curriculum; they became the means by which generations of children learned literary Latin, and the Italy that these works portray became an idealized rendering of the Roman Empire under Augustus. Their creator quickly assumed the stature of patriot-poet, and his poems acquired mystical interpretations tied to Rome's destiny.

Vergil was born on October 15, 70 B.C.E., in Andes, a countrified region near the town of Mantua, in Cisalpine Gaul (now Italy). His background appears fixed in the respectable but not particularly wealthy middle class. That is clear from the solid education that he received at Cremona and Rome. Particularly useful in establishing his family's relatively modest circumstances is the fact that Vergil's education lacked the philosophical component of study at Athens. By contrast, Vergil's

poet-contemporary Horace (65-8 B.C.E.) had enjoyed this advantage. It is also certain that the region of Vergil's birth underwent a dramatic shift in its political allegiance during the first century B.C.E. Though part of Cisalpine Gaul was Romanized, it was not until 49 B.C.E. that the residents of Mantua received the rights of Roman citizenship. Thus, it was not until he had reached the age of twenty-one that Vergil could properly consider himself a fully enfranchised Roman.

Previously, instability and violence had filled Italy. Lucius Sergius Catilina (Catiline), the insurrectionist exposed in Cicero's Catilinarian orations, died fighting against Roman legions; Vergil would have been seven years old at the time. The civil war between Julius Caesar and Gnaeus Pompeius (Pompey), riots in Rome, Caesar's assassination on the Ides of March (44 B.C.E.), and the civil war between Caesar's heir Octavian (who assumed the title "Augustus" in 27 B.C.E.) and Marcus Antonius meant that war filled twenty-nine of Vergil's fifty-one years. All of these factors plus Augustus's professed determination to create an environment congenial for artists and the flowering of Roman culture could only have led the young Vergil to recognize the special ties that he had with Augustus's vision of Rome and, at least initially, to work toward its realization.

It appears that Vergil's father had been a potter or perhaps a day laborer. Ancient sources testify that Vergil's mother, Maggia Pollia, was of the lower landed gentry and that her family in some way employed the man whom she would marry, but this is

essentially speculation. Similarly, the name of Vergil's mother appears in medieval testimonies as support for belief in the magical powers of Vergil's work, the poet's own name etymologized as from *virga* ("wand"). That accounts for the corruption "Virgil," familiar as the spelling one finds in many modern texts.

Vergil pursued his higher studies in forensics, though he was without gifts in oratory, and tradition has it that he argued only one case at the bar. Convinced that a future in the courts was impossible for him, Vergil began higher studies in Greek literature with Epidius and in Epicurean philosophy, the vogue at the time because of Lucretius. Around this time, 41 B.C.E., former soldiers of Marcus Antonius armed with senatorial approval claimed a number of farms in Cisalpine Gaul, Vergil's among them. The commissioners Gallus, Varus, and Pollio recommended that Vergil petition the young Octavius, and this action saved the family farm. Vergil immortalizes this kindness in *Eclogue* 1 of the *Eclogues* (43-37 B.C.E.; English translation, 1575; also known as the *Bucolics*).

Still, it appears that the emperor's intervention did not reduce the threat to Vergil's life or that of his father. Roving bands of former soldiers, frustrated at not having obtained the lands promised them, ranged the countryside in search of the peasants who rightly held these lands, and this threat caused Vergil and his father to flee south. For a time, father and son resided with Vergil's tutor Siro, then in a villa near Nola and at Naples. It was there that Vergil composed his four-book poem on farming known as the *Georgics* (c. 37-29 B.C.E.; English translation, 1589).

Vergil's pastorals brought him to the attention of Augustus, as Octavius now styled himself. Augustus had a definite vision of Rome as a sophisticated, urbanized empire that derived its strength from its ancient origins and sturdy peasantry. The *Eclogues* and *Georgics* made Vergil the poet most qualified, in the emperor's view, to treat the legend of Aeneas's search for "New Troy" in Italy after the Trojan War. Clearly, Augustus hoped for an epic poem in Latin hexameters corresponding to the *Iliad* (c. 750 B.C.E.; English translation, 1611) and *Odyssey* (c. 725 B.C.E.; English translation, 1614) of Homer; it was, of course, the magnificent *Aeneid* (c. 29-19 B.C.E.; English translation, 1553) that he ultimately received.

Augustus almost did not receive the *Aeneid*. Vergil repeatedly delayed in complying when the emperor requested to hear sections of the work in progress. To what degree it was complete when Vergil had returned ill from his tour of Asia Minor is a moot question. He had, it is certain, asked that the unrevised manuscript of the *Aeneid* be burned should he be unable to complete its revision. Just as certain is it that Vergil, whose health had always been delicate, contracted fever at Megara (capital of Megaris, a district of Greece on the isthmus of Corinth), and that his health deteriorated rapidly upon reaching Brundisium (now Brindisi, Italy). On his deathbed at Brundisium, Vergil again requested that his poem be destroyed, since he remained dissatisfied with its degree of revision. Vergil died on September 21, 19 B.C.E. Tradition has it that Augustus's intervention alone saved the *Aeneid* and that the emperor commissioned Varius and Tucca with its final editing. This process took approximately two years, and thus it was that in 17 B.C.E. Latin literature produced the most eloquent tribute to Roman glory ever written.

## ANALYSIS

Vergil's deathbed request that the unfinished *Aeneid* be destroyed is an example of one characteristic of his style: insistence upon perfection. He considered this essential to achieve the civilized, cosmopolitan elegance that characterizes all of his verse. Such urbanity appears even in Vergil's pastorals. The four books of the *Georgics*, for example, took seven years for him to complete. Based on the total number of 2,188 lines, this would mean an average of about one verse per day. Indeed, Aulus Gellius, the second century commentator on assorted literary matters, reproduces a remark attributed to Vergil that he licked his verses into shape the way a mother bear does her cubs.

This slowness toward final form springs partly from Vergil's perfectionism, but even more from the poet's need to reflect a Romanized version of Greek forms. It was Vergil's fate to work in poetic forms in which Greek poets cast an overwhelming shadow, even in the genres of Latin literature: Theocritus and Hesiod in pastoral, and, of course, Homer in epic. To avoid being called a mere Roman imitator of these Greek masters and to push the Latin language to its limits in order to accommodate the style that he felt appropriate to Augustan Rome, Vergil had to proceed slowly.

Some, even among contemporary critics, are content to describe Vergilian poetry as a Latin imitation of Greek models, but that is a convenient dismissal of the specifically Italian character that all Vergil's poetry attains. The shepherds of his *Eclogues* have Greek names; their love affairs and concerns resemble those of the characters in the *Idyls* (c. 270 B.C.E.; English translation, 1684) of Theocritus, but the countryside that they describe is indisputably that of Tuscany and the Campagna. The ten poems that comprise the *Eclogues* are clearly the collection upon which Vergil worked to hone his specifically Roman style. To be overly concerned with their order of composition overlooks the fact that Vergil valued the unity of larger finished products over any single constituent. Thus, although four eclogues (2, 3, 7, 8) reflect the Theocritean debt that Vergil obviously felt he owed, two others (5, 10) describe a specifically Roman and notably Augustan world. The remainder (1, 4, 6, 9) are the least Theocritean of all and are arguably the finest of the entire collection. In their final arrangement, they form a reciprocal pattern. Briefly stated, this pattern yields the themes of recovered land, lost love, and Augustan greatness. The collection evokes the Caesar element in eclogue 5, foreshadowed in the climax of eclogue 1 (the imperial generosity that restores rightful ownership) and 4, which predicts a second golden age heralded by young Augustus. Topical references sprinkled throughout the work (Asinius Pollio and Vergil's rival poets Bavius and Maevius) extend the contemporary Augustan tone Vergil sought.

Escaping the poetic tastes of the poetic generation that preceded his own was another task that Vergil faced. These extended in two directions: the erotic verse of Caius Valerius Catullus and, to some extent, the philosophic poetry of Titus Lucretius Carus. One difficulty simply lay in creating a taste for the specifically Roman poetry that Vergil wrote. Augustus's political program assisted that to some degree, as did imperial subventions to the circle of poets in which Vergil functioned. The enormous financial resources of Gaius Cilnius Maecenas added to Vergil's financial security, for Vergil was primary among a group of poets supported by this wealthy Roman. Developing a literature that simultaneously glorified Roman origins yet looked toward greatness as the empire's destiny became paramount for the Maecenas group, and no poet, not

even Quintus Horatius Flaccus (Horace) or Publius Ovidius Naso (Ovid), both of whom also received such subventions, could satisfy these goals as completely as Vergil.

Specifically, Roman concerns emerge even more boldly in the *Georgics*, a four-book didactic poem on agriculture. This work follows the *Eclogues* by eight years and reflects Vergil's maturity as a poet. It owes a nominal debt to Hesiod's *Erga kai emera* (c. 700 B.C.E.; *Works and Days*, 1618) or to Nicander's *Georgika* (c. 100 B.C.E.), but it is not in any sense Hellenic. Vergil's *Georgics* is not an exercise in virtuosic treatment of prosaic subject matter, nor is Vergil (like Lucretius) trying to make difficult subject matter easy, nor does Vergil expect Roman farmers to use the advice that it gives as a practical guide to farming. The *Georgics*, like the *Eclogues*, rather represents concerns central to human life in Augustan Rome. It provides a clear set of moral values, which extend to respect for tools and the work itself; a religious justification for the work of farming; a calendar that specifically relates to the growing seasons of Italy and the varied forms of agriculture one finds there; and a substantial final section on beekeeping. As with the *Eclogues*, there is a clear Augustan message. Hard work and diligent application wrings fertility from infertility, life from death. This remains the work of all farmers at all times, but the *Georgics* casts it in terms of a theodicy for the Golden Age of Augustus. A clear cosmic sympathy watches over Italy under Augustus; given the application of its people, labor yields justice and prosperity.

It is precisely this destiny that favored creation of Augustan Rome, and Vergil develops the theme even further in his *Aeneid*. *Fatum* (fate) through *labor* (work) tempered by *dolor* (sorrow and grief) and *pietas* (piety and humility) led Aeneas to lay aside personal desires for the sake of establishing a "New Troy" at Lavinium in Italy. It would take nearly half a millennium, but the race formed from an amalgam of Trojan and native Italic elements would give rise to that of Romulus. From Romulus and the Roman kings would spring the Roman republic and, ultimately, the empire established by Augustus.

As with both the *Eclogues* and *Georgics*, there is also a debt to Greek poetry; obviously, the *Aeneid* owes its inspiration to Homer's *Iliad* and *Odyssey*. Characteristically, however, the similarity is struc-

tural rather than aesthetic. The *Aeneid* is less than half the length of either of Homer's poems. Vergil has arranged its books to recall first the wanderings of Odysseus (*Aeneid* 1-6), then a new war at Lavinium (*Aeneid* 7-12), which corresponds to the Trojan War as described in the *Iliad*. Thus, rather than concealing the literary past upon which the *Aeneid* depends, Vergil effectively flaunts it, making it underscore the thesis of the poem itself: that the past and its difficulties are essential to build the new order of his own present, that of Augustan Rome.

Vergilian epic, despite these similarities, thus differs markedly from that of Homer. Vergil's is an urban, national epic. Critics unfavorably inclined sometimes call it Augustan propaganda, but even if this is so it is also great art and Roman poetry at its highest level of development. One measure of its greatness is the fact that, like Homeric poetry, its style was imitated in a series of works attributed to Vergil. These poems, collectively called the *Appendix Vergiliana* (c.E. first century) but actually the work of an inferior subsequent imitator, reveal not only the profound effect that Vergil had on Roman poetry but also, by contrast, the superiority of the master.

## ECLOGUES

**First published:** 43-37 B.C.E. (English translation, 1575)

**Type of work:** Pastoral poetry

*The ten pastorals of this collection successfully translate the settings, characters, and thoughts of their Greek counterparts to a frame of reference specifically that of Augustan Rome.*

The *Eclogues* is a remarkable achievement of Vergil's late twenties and shows that the poet, even at this early age, intended to develop a style distinct from those of his Greek and Roman predecessors. The ten-poem collection falls into three major categories. *Eclogues* 2, 3, 7, and 8 are the most Theocritean; the rustic characters that they present have Greek names (Corydon, Amoebaeus, Damon, Alphesiboeus), and the situations that the poems describe find their counterparts in the works of Theocritus. *Eclogues* 1, 4, 6, and 9 are specifically

non-Theocritean; these poems deal with matters particularly significant to life in Augustan Rome (exile revoked, respect for right of ownership, arrival of a new Golden Age, warnings of the passing of this Golden Age, and doubts for the future). The collection turns on *Eclogues* 5 and 10, the two Daphnis poems; Daphnis represents Caesar in the first of these, and the poet Gallus becomes Daphnis in the second. The clear result of this arrangement is to introduce Augustan reference into what had been the timeless environment of pastoral. The characters thus acquire a tendency toward introspection and a degree of psychological development unmatched by Theocritus.

Augustan time is always present in Vergil's pastoral world, yet it remains unobtrusive primarily because of the reciprocal pattern of arrangement that Vergil follows. *Eclogue* 1, for example, finds its parallel poem in *Eclogue* 9. In *Eclogue* 1, the content Tityrus explains his happy state of mind to Meliboeus by noting that a god restored his farm. While never leaving the bucolic environment, one imagines the change of scene that takes Tityrus to Rome and an encounter with the young emperor. Vergil never uses the names Octavian, Caesar, or Augustus, yet the automatically generous response of an emperor concerned for his subjects makes the identity of the *iuvenis* (young man) whom Tityrus sees at Rome unmistakable. *Eclogue* 9 answers *Eclogue* 1; both poems refer obliquely to the land seizures of 41 B.C.E., though the ninth pastoral creates a somewhat discordant note. There, a distraught Moeris tells Lycidas that he is about to undertake a similar journey to petition for restoration of his land. This poem specifically recalls the Tityrus poem and implies that Octavian's ascension to the throne has not automatically eliminated treachery. It is impossible to say what intervened in Vergil's life to produce this changed mood, but the realism that this poem introduces adds an element that had never appeared in pre-Vergilian pastoral.

Such reciprocity allows grouping of the collection into two major categories. *Eclogues* 1 to 5 present essentially conciliatory Augustan situations; *Eclogues* 6 to 10 qualify comparable situations. Thus, while *Eclogue* 2 asserts the triumph of reason over essentially unworthy love, *Eclogue* 8 answers by presenting Daphnis bound in the spell of an unworthy love whose consequence is death. *Eclogue* 3

describes a crude and abusive singing contest that ends in peaceful nondecision; its answer, in *Eclogue* 7, presents a similar contest in which the mild Corydon defeats the harsh Thyrsis. *Eclogue* 4, interpreted during the Middle Ages as the “Messianic Eclogue,” predicts the coming of a new golden age under Octavian (again without use of the emperor’s name); *Eclogue* 4 notes the passing of these hopes into a series of unnatural loves and changes in form. Like *Eclogue* 9, it implies the transitory nature of happiness and contentment as part of the human condition. Even Octavian cannot alter this essential fact of life. *Eclogue* 5 presents the death and transfiguration of Daphnis, a poetic masque for Octavian; its answer is *Eclogue* 10. There, Gallus wastes away for unrequited love of Lycoris, who has run off with an unnamed soldier. The final effect of these poetic answers is to connect the historical to the timeless situation and the realistic outcome to the ideal.

## GEORGICS

**First published:** c. 37-29 B.C.E. (English translation, 1589)

**Type of work:** Didactic poetry

*The Georgics represent both a continuation of Vergil’s Augustan program and a departure from pastoral verse in favor of didactic verse.*

The *Georgics* is didactic verse, purportedly instructing readers on matters relating to agriculture. As such, it nominally springs from the tradition established by Hesiod in the seventh century B.C.E. Though its subject provides a rural setting, the *Georgics* is assuredly not pastoral poetry. Similarly, though its structure is more complex than that of the *Eclogues*, there is no exalted theme, nor indeed is there any sustained narrative at all. What the *Georgics* essentially represents is evidence of a mature creative mind, one capable of writing about humble subjects in an elegant way that particularly reflects Augustan Rome.

Though not a narrative, the *Georgics* is a coherent work, one essentially independent of literary predecessors. On one level, the poem is Vergil’s response to his patron Maecenas’s request for a work that heralds the dignity of Roman agriculture. On

another level, however, the *Georgics* reflects Vergil’s own wish for the rehabilitation of rural Italy from the anarchy, decay, and neglect that followed the civil wars. Obviously, it is only superficially a guide to farming; there is little in it that a farmer would not have already learned from experience, and it is difficult to imagine even the most cosmopolitan Augustan farmer consulting it as a manual.

Essentially, the *Georgics* is a virtuosic work of art arranged in four books of verse. Like the *Eclogues*, it follows a pattern of reciprocal contrasts; these are four in number, between books 1 and 2, 3 and 4, 1 and 3, and 2 and 4. Book 1 outlines the farmer’s continual struggle with inanimate nature. The farmer cares for tools as a warrior does weapons, enters the field to do battle with nature, works by the calendar as does a soldier on expedition, and contends with nature’s extremes as with an enemy. Moreover, Jupiter has deliberately made life hard so that humanity might discover civilization. Book 2 answers 1 in the sense that it enumerates the rewards of nature once ordered. Trees and vines yield their fruit in due course and in appropriate varieties. Sound produce yields healthy livestock, and the varied landscapes of Italy, exemplified by Tuscany, Mantua, and Capua, contribute to this harmony.

Book 3 continues the theme through a discussion of the relationship of love and death. Large and small animals mate, and this fertility contrasts with the pestilence represented by weeds, thieves, snakes, diseases, and plague. This book suddenly shifts the emphasis to animate nature, and while never quite personifying the animals that it presents, nevertheless allows understanding of the love-death process in human terms. It finds its reciprocal in book 4, the major section on beekeeping with which the *Georgics* concludes. In one sense, the fourth book mirrors the entire structure of the poem (and the cycle of farming) since it moves from location of the hive to encouraging the swarming needed for reproduction, to harvesting, to regeneration (resurrection) of the bee.

Vergil’s *Georgics* maintains the indefinite outcome that characterizes the *Eclogues*. Essentially, the farmer fights a continuing battle against the deteriorating nature of things. Though the farmer may do all that is possible to ensure a favorable outcome to his work, nature remains a variable that can destroy all efforts. Augustan Rome provides

the best hope for success, but it requires the efforts of all concerned and does not in itself provide automatic solutions.

## AENEID

**First published:** c. 29-19 B.C.E. (English translation, 1553)

**Type of work:** Epic poem

*The Aeneid shows the full development of its author's talent, brilliantly extending the range of Latin literature and providing noble ancient origins for Augustan Rome.*

It is impossible to gauge the seriousness of the dying Vergil's request that his *Aeneid* be burned upon his death. Despite the dramatic command of Augustus to spare it from the flames, it is difficult to imagine that any of Vergil's contemporaries would have taken it upon themselves to destroy what promised to be the most extraordinary poem ever written in Latin, and that is precisely what those who knew the work in progress realized it to be. It is more likely that Vergil's request stemmed from the almost manic pessimism that one notes as counterpoint in both the *Eclogues* and *Georgics*. Such resolution through a minor key produces great art, however, and Vergil knew that no poetic form yields more easily to an indeterminate conclusion than epic. The *Aeneid*, despite the difficulties inherent in its composition, thus offered Vergil the surest possibility for ultimate development of his talent.

In one sense, the *Aeneid* obviously depends upon Homer's *Iliad* and *Odyssey* for its very creation. Echoes and lines parallel to those of Homer abound within it. Nevertheless, Vergil's purpose and the nature of the verse itself are altogether different, for Vergil's is urban poetry reflecting the Trojan War myths from a Trojan (and consequently Roman, rather than Greek) point of view. Rather than conceal his use of Homer, Vergil's use of the Homeric legacy supports a major part of his thesis: that the present draws from the past and that the quality of what was determines the worth of what is.

Typical Vergilian reciprocity appears in the structure of the *Aeneid*. Its first six books are effectively an Odyssean series of adventures that take

Aeneas and the Trojans from their destroyed city to Dido's North African city of Carthage and ultimately to the Underworld's Italian entrance at Cumae, near Naples. *Aeneid* 1 to 6 are Odyssean only in the sense that the adventures externally parallel those of Odysseus. Aeneas, unlike Odysseus, has responsibility for the collective destiny of his nation, and Vergil consistently distinguishes between his hero's personal preference and what *fatum* (fate) requires him to do. Hence, Aeneas must flee Troy, though he would have preferred to die there. Fate, through the instrumentality of the storm conjured by joint request of Juno (to delay *fatum*) and Aeneas's mother, Venus (to provide rest for her son), casts Aeneas upon Dido's shore. Venus mercilessly causes the flame of passion to grow in Dido, using the young queen as an instrument to ensure that Aeneas may pursue his destiny to found an Italian Troy. The flames that destroyed Troy thus resolve themselves into the flames of passion that ultimately cause Dido's suicide and find final expression in the flames of her funeral pyre. Again, Aeneas must lay aside his obligations toward Dido for the larger obligation that he owes the Trojan people.

*Fatum* thus governs all: the *furor* (anger) that Aeneas must direct at those who would impede founding of a new Troy at Lavinium in Italy; *labor* (work), the struggle to escape and reach the site of the new city; *dolor* (grief), the suffering that requires decisions for the collective well-being; and *pietas* (piety), the humility needed to accept what fate decrees. All of these elements bring Aeneas to his Underworld meeting with the shade of his father Anchises in *Aeneid* 6. It is there that Aeneas beholds a procession of as yet unborn heroes important to the destiny of a city to rise in the remote future. Aeneas knows nothing of Rome and no more of the heroes important to its history, yet he knows that what he witnesses is in some way important. Augustus himself appears among these unborn heroes, and his connection with Aeneas (if ever doubted) becomes explicit in this scene.

*Aeneid* 7 to 12 looks toward Trojan establishment of Lavinium, the city that must rise if Rome itself is ever to rise. These are the Iliadic books, since they describe a second Trojan War with the Trojans cast as invaders of the Italian city on the site fated for Trojan habitation. Lavinia, daughter of King Latinus, thus has a role that corresponds to that of Helen in the Trojan War. Aeneas is destined to marry Lavinia to begin amalgamation of the Trojan and native Italic peoples, but Lavinia is already promised to the Rutulian warrior Turnus. Since Turnus is hardly committed to this marriage agreement, war might have been avoided had it not been for Juno's long-standing anger against the Trojans. The fury that she causes provokes violence that spreads across the countryside, and the Trojan War in Italy begins in earnest.

Preparations for the war allow Vergil to establish the antiquity of the peoples of Italy. Aeneas, for example, journeys north on the Tiber to the Etruscan city then known as Pallanteum, but which is located at the site of what would one day be Rome, the city of Romulus. *Aeneid* 8 takes the reader through Pallanteum, which even then has landmarks familiar to an imperial Roman. Evander, king of Pallanteum, concludes an alliance with Aeneas and gives him men, as well as his own son Pallas, a protégé whose counterpart in the *Iliad* is Patroclus.

Back at Lavinium, Ascanius (the young son of Aeneas, now called Iulus to establish his identification with the Julio-Claudian emperors) distinguishes himself in the fight against the Latins and their allies. A renegade Etruscan king named Mezentius has allied himself and his son Lausus with the Latins. Cast out by his own city of Caere, Mezentius has found refuge with King Latinus and now fights against his own people. This villain paradoxically acquires the reader's sympathy upon the death of Lausus, killed when he interposes himself between his father and the advancing Aeneas. Despite Mezentius's contemptible deeds as king of Caere, and though he hates the gods, Mezentius is still a father, and Lausus has shown him due filial *pietas*. When Mezentius dies immediately thereafter, also at Aeneas's hands, his death assumes a tragic aspect; such is Vergil's skill for the dramatic that he can make pitiable even the death of a villain.

The death of Pallas at Turnus's hands clearly

corresponds to Aeneas's killing of Lausus, and Vergil presents both deaths sympathetically. Obviously, Vergil avoids setting what would have been a more logical contest between young warriors, that of Iulus and Lausus. That is clearly because Iulus, called Ascanius in *Aeneid* 1 to 6, represents the link between Troy past and the new incarnation of that city in Italy. When Iulus distinguishes himself on the battlefield, he does so against uniformly undeveloped personalities in order to allow him alone to hold the central position in the narrative. Accordingly, Iulus remains unscarred by his battlefield contests, almost but not quite succeeding in encountering Turnus.

Meeting Turnus on the battlefield is Aeneas's fate, and Aeneas enters the fray in much the same state of mind as had Achilles in the *Iliad* following the death of Patroclus. The final question that faces Aeneas once he has the Rutulian Turnus at bay is whether to administer the death stroke. He decides to do so as soon as he sees that Turnus wears the belt that he had stripped from young Pallas upon killing him. Thus, the *Aeneid* ends in the middle of events, as is characteristic of epic poetry, but also with the element of qualification that characterizes all Vergil's works.

## SUMMARY

It has become fashionable to declare that Vergil is less of an Augustan patriot-poet than generations have believed. Clearly, there is a dark side to the Italian pastoral landscape of the *Eclogues*, a sense that the struggle against nature is essentially a holding action in the *Georgics*, and a feeling that Aeneas is capable of acting less than nobly in the *Aeneid*. None of this, however, detracts from Vergil as an urbane, sophisticated poet, very much a man of his own times and a poet capable of far greater intricacy of thought and poetic figure than even the Greek masters who inspired him. Indeed, Vergil's greatest gift is his ability to echo Homer, Hesiod, and Theocritus (and, among the Roman poets, Quintus Ennius and Titus Lucretius Carus) without in any sense imitating them. Vergil's skill in doing so through settings in which his own Augustan Rome serves as counterpoint is a measure of his greatness.

## PAUL VERLAINE

**Born:** Metz, France  
March 30, 1844

**Died:** Paris, France  
January 8, 1896

*Verlaine's greatest works are brief lyrics that speak with unparalleled metrical and rhetorical elegance of delicate longings and tender-hued nature.*

### BIOGRAPHY

Paul Marie Verlaine (vehr-LAYN) was born in Metz, France, on March 30, 1844. His father, Captain Nicolas-Auguste Verlaine, was a gruff, brusque, career military man. His mother, Elisa, had been longing for a child. She had three miscarriages before Paul, her only child, was born. She lavished affection on him, and, in consequence, he became strongly attached to her. His early lack of independence is indicated by the fact that when he was sent to school at age nine, he ran back home on the first day and had to be coaxed to return with sweets and sweet words. Eventually he adjusted to the school regime, going first to the Institution Landry (in Paris, to which the family had moved) and then graduating to the Lycée Bonaparte in 1855. While still in school, he acquired the adult vices of drinking and visiting prostitutes.

At this point, his indulgences did not deflect his life from a straight course. After graduating, he obtained a civil service job in Paris and began getting involved with the group of Parnassian poets. This group, while continuing the themes of Romanticism, advocated greater refinements in poetic technique. Two years after entering the work world, Verlaine published his first book, *Poèmes saturniens* (1866), in which he hewed closely to the Parnassian style. His life continued on its uneven keel; he maintained his government job and his attendance

at artistic salons, while also continuing his nights of drink and debauchery that now often involved him in drunken violence. In three more years, he produced *Fêtes galantes* (1869; *Gallant Parties*, 1912). In this book of poems, he avoided the touches of derivativeness visible in his previous work and, drawing on eighteenth century painting, created a luminescent fantasy world of delicate emotion and discourse.

Perhaps attempting to arrest the course of his dissipation, Verlaine now became engaged to a young girl, Mathilde Mauté, who came from a good family. Thinking of their coming union, Verlaine composed a set of lovely pictures of connubial bliss in verse, published as *La Bonne chanson* (1870). These poems delightfully anticipated their marriage, but, once they were married, in August, 1870, he stopped writing.

His ardor, accustomed to feeding on dreams, cooled quickly after the nuptials, while the marriage was little helped by the dislocations attendant on France's explosive political situation. The country had entered an ill-considered war with Prussia, and, after humiliating defeat in the field, the starved and oppressed people in Paris overthrew the city government and established the revolutionary Paris Commune. Verlaine took a post in the commune and then, when it was overthrown with fire and sword in June, 1871, fled with his wife to his mother's relatives in the country. Verlaine and his wife returned to Paris after the summer, where their marriage met its final blow, the entrance of the sixteen-year-old Arthur Rimbaud, the young prodigy who revolutionized French poetry while

still in his teens. Rimbaud, who had read Verlaine's books, wrote to introduce himself and to ask for money to come to Paris from the provinces. As a calling card, he included a sheaf of astonishing poems. Verlaine forwarded him the necessary funds and Rimbaud came to town, where he quickly proceeded to estrange Verlaine from his friends by his bad manners and obnoxious behavior and to wreck Verlaine's marriage by leading the older poet into a maze of alcohol and homosexual dalliance. Verlaine's homosexual leanings had never emerged openly until this time.

Verlaine's distraught wife, now with an infant son, George, born on October 30, 1871, demanded that her husband choose between her and Rimbaud. Though there was a brief reconciliation in the family, eventually Verlaine chose the young genius. The pair decamped for a vagabond tour of Belgium and England. During this period, Verlaine composed his most celebrated book, *Romances sans paroles* (1874; *Romances Without Words*, 1921). Rimbaud was no charmer as a companion, having about the same regard for love and friendship as he did for poetic tradition. He grew tired of the older man and told him that he was leaving him. Having sacrificed his wife and reputation for Rimbaud, Verlaine lost his temper and tried to kill Rimbaud. He shot and wounded the young poet, resulting in Verlaine's arrest and imprisonment for almost a year and a half. In prison, he worked on his last major work, the book of poems *Sagesse* (1881). In it, he recorded a sincere religious awakening in movingly simple Christian verse.

Unfortunately, his newfound virtue would not long outlast the enforced celibacy and sobriety of prison. He emerged from penal servitude in January, 1875, to find that he was no longer welcome in Paris. His work was rejected, by those who had once welcomed it, as that of a reprobate. For the next five years, he worked as a teacher in the French provinces and in England. He befriended a student, Lucien Létynois, with whom he maintained a cautiously platonic alliance. In 1880, the two took over a French farm, but years later their venture went bankrupt, and the pair returned to Paris.

There, surprisingly, the tide had turned. A new generation of poets, less squeamish about his scandalous behavior, had come to admire the technical precision and delicate moodiness of his poetry. The acclaim at first meant little to him, for his

friend Létynois had died of typhoid in 1883. Verlaine would live for quite a few more years, now lionized and writing a considerable amount, while he continued his drinking and other bad habits, but the spark of inspiration only occasionally flickered. He died in Paris on January 8, 1896, in a ménage with an aging prostitute.

## ANALYSIS

Verlaine's reputation is not as high as it once was, and this is largely because his poetry lacks the depth of that of his greatest contemporaries. Poets such as Charles Baudelaire and Stéphane Mallarmé were nearly as technically proficient as Verlaine, but they had thought deeply about life and the relation of poetry to life in a way that Verlaine had not. Rimbaud, contrastingly, was less technically skilled than Verlaine, but Rimbaud's lack of emphasis on poetic form followed from a principled and logically consistent rejection of much of tradition, also indicative of serious thought.

Yet there was a disarming feature of Verlaine. He both acknowledged his shallowness and defended himself by arguing that a kind of mistiness in thought was necessary to convey the type of limpidity for which he strove in his writing. In "L'Art poétique," published in the volume *Jadis et naguère* (1884), he wrote, "De la musique avant toute chose" ("Music before all things"), and stated that it is best to accomplish that by creating verse "où l'Indécis au Précis se joint" ("where the undefined and precise join"). In other words, to capture an ineffable mood it is necessary to have an underlying structure of thought that is itself rather vague and incomplete. It is hard to argue with his advice, especially since his work is preeminent in French literature in being able to convey delicate, illusive feelings.

It is important to be aware of how he speaks of a combination of the precise and imprecise, for it is not merely by the use of vague words that he creates his moods—his effects cannot be achieved so easily. He combines vagueness and concreteness in precisely the right measure. In "Il faut, voyez-vous, nous pardonner les choses" ("You see, we have to learn to pardon all"), his method of combination can be seen. (This poem, like many of his poems, takes its title from its first line.) The speaker is asking for forgiveness, and he wishes that he and the listener could return to their childish innocence.

Exactly what is to be forgiven is left tremulously vague; yet, at the right moment, a concrete image is introduced, a description of frightened little girls who feel enormously guilty for a minor lapse. This image gives the speaker's suit a poignance based in reality, though still a reality only analogically related to his continually unclear original sins.

Three other traits help Verlaine in his quest for distinct indistinctness: musicality, conversational tone, and natural imagery. The verbal music, which he put before all things, was that of an easy lilt and a graceful chiming of vowels and consonants that gave his verse a prettiness that few other poets have matched. In poems such as "Chanson d'automne" ("Song of Autumn") and "Il pleure dans mon cœur" ("It Is Crying in My Heart"), the easy grace of the lines creates a melody that connects sympathetically to the tremulous passages of a weary sadness.

At the same time, adding to the poetry's weight and thus balancing its tendency toward evanescence, is a conversational tone that conceals the artistry of the work by creating the sense of listening to a relaxed monologue. Thus, Verlaine may open a poem with an unaffected statement such as "Tournez, tournez, bons chevaux de bois" ("Turn, turn wooden horses"—carousel horses), or with a casual request, as in "Écoutez la chanson bien douce" ("Listen to the sweet song"). In order to embody this tone, Verlaine made a number of innovations and reemphases in the rather strict conventions of French verse. For one, against the more strident practices of Romanticism, he preferred weak rhymes, ones that called less attention to themselves. He broke with the tradition of having a caesura, a brief pause of sense and sound at the middle of the typical twelve-syllable line. Moreover, he worked less with the preferred twelve-count line than with shorter measures and particularly, unusually, ones of odd-numbered syllables, from five to thirteen. He also practiced enjambment (*rejet* in French), that is, the method of not ending a clause and sense unit at the line's end but carrying it over to the following line. None of these alterations in standard procedures was made as a technical experiment, but each was done to de-

emphasize the rigidity and formality of verse (factors that proclaimed, "this is a poem") in favor of naturalness.

This naturalness, too, helped create the necessary vagueness, which would have been harder to reach within the tougher shell of stricter methods. Verlaine also conveyed this prized quality by choosing to portray nature in its filmy moods. He begins his celebrated "En sourdine" ("Muted") by describing a wooded glade, "Calmes dans le demi-jour/ Que les branches hautes font" ("Calmly in the twilight/ Created by the upper boughs"). "L'Heure du berger" ("Dusk") begins "La lune est rouge au brumeux horizon;/ Dans un brouillard qui danse" ("The moon is red along the smoking horizon;/ In a shifting mist"). In each case, a shuttered half-light and the incompletely discerned shapes of foliage or of the sun draw the reader into a web of a twilight world in which formless emotions appear.

More specifically, what were the emotions of which the poet sang? It might be said that Verlaine's feelings are not those of the will, such as hatred and passionate desire, but those of passivity, such as nostalgia, regret, and unrequited longing. Thus, in "Mon rêve familier" ("My Familiar Dream"), he dreams, literally, of a nameless woman who understands him, saying of her, "Est-elle brune, blond, ou rousse—Je l'ignore" ("Is she brunette, blond, or redheaded?—I do not know"). Perhaps even more representative is a passage in "It Is Crying in My Heart." There, the speaker experiences a piercing yet unaccountable ache in his heart. He concludes, not by diagnosing the feeling's cause, but by finding, "C'est bien la pire peine/ De ne savoir pourquoi . . . Mon cœur a tant de peine" ("It is by far the worst pain/ Not knowing why . . . My heart has such pain"). These lines evoke the immediacy of Verlaine's verse, his ability to make the reader feel the keenness of an emotion whose exact dimensions, such as the dream-woman's hair color, are withheld.

It is paradoxical, in the end, that a man whose emotional life was filled with above-average turmoil and turbulence should be found to have his chief excellence as a poet in the portrayal of moods that lack contour and are nearly indecipherable.

## “GREEN”

**First published:** “Green,” 1874 (collected in *One Hundred and One Poems*, 1999)

**Type of work:** Poem

*The speaker presents a beautiful woman with gifts, his relation to her growing gradually more intimate and more mysterious.*

“Green,” written in the period of Verlaine’s escapades with Rimbaud, can be read as the recording of an impulse toward reconciliation with his wife. It is a complex piece of three four-line stanzas, in which each phrase both fills in more details of the speaker’s immediate relation to the woman being addressed and, simultaneously, shrouds further in mystery the couple’s ultimate connection.

The poem can also be read, in terms of literary history, as an interesting play with the tradition of the harsh mistress. The male Romantic poets, following a convention dating to the Middle Ages, often portrayed unnaturally cruel lovers, who remorselessly broke the hearts of the tortured but loyal lyricists. Verlaine unveils two variations on this motif. First, while the traditional poet’s torments as he described them were undeserved, the speaker in “Green” seems to have some unspecified trespass on his conscience and, so, cannot avoid his sense that rejection by the addressed woman would be richly merited. Second, there is no evidence in the poem, as there would be in the typical Romantic lament, that the addressee is actually disdainful. It is only that the poet, possibly misled by guilt, anticipates that she will be. Thus, in the poem’s opening, the speaker offers her a beautiful plait of flowers, fruits, and sprays (including, as an afterthought, his heart); he then pleads that she not break the offering and cast it aside: “Ne le déchirez pas avec vos deux mains blanches” (“Do not break it with your two white hands”). Such cruelty, however, seems more in the poet’s mind than in reality, since, as it happens, she does not spurn the peace offering and will allow even greater liberties later.

In the first stanza, all that is clear is that the speaker has come in from the garden. The second quatrain suggests that the speaker has been on a long journey, which, complexly, can be seen as endearing him to the woman, as he is weary and pitifully cold with the morning dew; but it may also estrange him somewhat from the listening woman, whom he may have deserted in some sense. Whatever the mix of these elements, he has advanced enough in her estimation—each stanza notes the speaker’s greater physical proximity to the woman—to request that he might lay himself at her feet.

In the last stanza, their bodies move still closer. Verlaine confesses to the reader that she has kissed him, as if in her joy at his recovery from absence, and then, trading on this intimacy, begs that he might lay his head on her breast.

Two interesting points about relationships appear at the end. The speaker remains a pleader. No matter what ground he has crossed in reviving their old feelings, he is still as unsure and abject as he had been at the outset. Verlaine’s view of the game of love seems to be that every conquest of a degree of intimacy leads the conqueror merely to another field with a new series of hurdles blocking communion. The second point is that the ending reveals that the speaker’s desired haven is rest on a maternal bosom. The loved woman, who is young, merges back toward the mother and does so very naturally since the connection suggested up until the end has been loving but not erotic. Without negating the originally portrayed situation between adult man and woman, this return delicately indicates how such scenes, whether of reconciliation or tidy closeness, may be lit from within by evergreen reminiscences of childhood passions.

## “MY GOD SAID TO ME”

**First published:** “Mon Dieu m’a dit,” 1881  
(collected in *Selected Poems*, 1948)

**Type of work:** Poem

*Jesus asks for the addressee’s love, citing His sufferings on Golgotha as reasons to embrace His cause.*

“My God Said to Me” (also translated as “Son, Thou Must Love Me See’—My Saviour Said”) shows interesting variations on earlier Verlaine themes. Many poems in *Romances Without Words* are in the form of a plea, the speaker begging an imagined listener for some favor, some tenderness. In Verlaine’s sequence of ten religious sonnets, of which “My God Said to Me” is the first, appearing in *Sagesse* (1881; the volume following *Romances Without Words*), it is God who is doing the praying. Jesus Christ is begging the listener, who is presumably Verlaine, since he claimed that these poems marked his religious conversion, to love Him.

Another daring departure from Verlaine’s customary style found in this poem is that the emotion felt is presented in a blunt, raw way, which contrasts markedly with the ineffability of emotion that reigns in most of his pieces. It is as if, where Verlaine finds humans to be inexhaustibly vague in their moods, he is compelled to portray God as knowing His own mind. Thus, in the first line, Jesus states forthrightly, “Il faut m’aimer” (“It is necessary to love Me”—addressing the listener).

In keeping with Verlaine’s emphasis on sensation over thought, what God brings forth to motivate the listener to become a Christian are not reasons but wounds. Jesus stands, as it were, in front of the poet as He did before Doubting Thomas and has him examine His pierced side and torn heart.

There is, however, more than show-and-tell to this poem. It is a sonnet, a fourteen-line poem with five rhythmic units per line. Sonnets have been

known for compressed arguments that lead to something of a twist in the concluding thought. Verlaine accepts this tradition, though the argument that he presents is rather startling. He has Jesus pass beyond listing His afflictions to state that the world is primarily a place of the flesh and that, therefore, suffering is what counts above all things. It is the type of argument that would certainly strike a sensualist such as Verlaine. The poem’s ending twist is that, to drive the argument’s point home, Jesus says that His own sufferings are very much like Verlaine’s own. He tells the poet, “N’ai-je pas sangloté ton angoisse suprême?” (“Have not I sobbed in your supreme anguish?”) The line can be taken to indicate either that Jesus’ tortures have been as bad as the poet’s or that Jesus has somehow been suffering Verlaine’s troubles in His own flesh.

Certainly, in one sense the ending smacks of the writer’s self-importance, as if God had to prove that He had suffered as much as Verlaine. Yet in the context of the whole poem, that is only one example of the poem’s most remarkable feature: the intimacy of the appeal from Jesus to a sinner. The Son of God frames His pleas to the bent of the listener and loses no dignity in so doing.

## SUMMARY

If the world had nothing but major poets, there would be a surfeit of grand statements on such themes as love and death, but important lesser matters would be forgotten. A minor poet, such as Paul Verlaine, is not a bad poet. A bad poet is hackneyed or overtaxed by projects beyond his or her capacity. A minor poet has accurately gauged his or her own skills and creates estimable work of less than earth-shaking proportion. Verlaine described a world of reflected light, halfhearted moods, and undrawn connections. With all the craft at his command, he built a diaphanous, yet richly inscribed, tissue of verse.

## JULES VERNE

**Born:** Nantes, France  
February 8, 1828

**Died:** Amiens, France  
March 24, 1905

*Admired as a writer for young people, Verne created adventure stories that form a part of contemporary myth.*

### BIOGRAPHY

Jules Gabriel Verne was born on February 8, 1828, the eldest son of a lawyer, in the provincial port of Nantes, France. His education was typical of that of a middle-class nineteenth century family, since his parents intended for him to take over his father's legal office. According to family legend, Verne was a good student, but he entertained daydreams of adventure, leading to an attempt at the age of eleven to run away to sea. As the eldest son, Verne consented to attend law school despite a lack of interest in the subject, while his younger brother Paul was allowed to follow the more exciting career of captain in the merchant marine.

Family legend also attributes to Verne a childhood love for a cousin. In order to get Verne out of the way during her engagement, he was sent to Paris to continue his studies. While in the capital, Verne became close to the popular novelist Alexandre Dumas, *père* and frequented literary and theatrical groups. He was soon trying his hand at vaudeville as well as tragedy.

Although he had successfully completed his law degree in 1848, Verne refused to return to Nantes. He began to publish in the journal *Musée des familles*. In Parisian salons, he met explorers and scientists and began to use what he could learn from them for his stories.

In 1856, Verne met Honorine de Viane, a young

widow with two daughters. Her brother was a financial agent, and Verne decided that that line of work would be the ideal way for him to earn a living while writing. Verne married Honorine in 1857; his only child, a son, Michel, was born in 1861. The following year, Verne met the publisher P. J. Hetzel, who was especially interested in books for youngsters. In 1863, Hetzel published Verne's first novel, *Cinq Semaines en ballon* (1863; *Five Weeks in a Balloon*, 1876). The success of the book owed something to the exploit of the balloonist Nadar the same year. Verne continued to publish serially in the *Musée des familles* and in volume form and published *Voyage au centre de la terre* (1864; *A Journey to the Center of the Earth*, 1872). The following year, he signed a contract with Hetzel, according to which he agreed to furnish three volumes a year for three thousand francs each. This arrangement gradually allowed him to abandon all other work and devote himself to writing.

In 1867, Verne went to New York aboard the steamer *Great Eastern*. This trip furnished the material for *Une Ville flottante* (1871; *A Floating City*, 1876). He was working at the same time on what was to become *Vingt mille lieues sous les mers* (1869-1870; *Twenty Thousand Leagues Under the Sea*, 1873), as well as *Autour de la lune* (1870; *From the Earth to the Moon . . . and a Trip Around It*, 1873). Throughout his life, Verne would be correcting the proofs of one book while composing another and often taking notes for a third. His fertile imagination presented him with more ideas than he had time to commit to paper. The following year, he bought his first sailboat, the *St. Michel*, and signed a more favorable contract with Hetzel.

In 1870, Verne received the cross of the Légion d'Honneur. Honorine and her children found refuge in Amiens during the Franco-Prussian War. Verne was horrified by the rebel-backed Paris Commune. His political opinions would always be moderate. After the war, he decided to move to Amiens, but the Parisian social scene did not agree with him. *Le Tour du monde en quatre-vingts jours* (1873; *Around the World in Eighty Days*, 1873), published serially, was a huge success, and the volume that appeared in 1872 sold 108,000 copies. It was to be Verne's best-selling work.

Verne's son, Michel, was a source of considerable worry as the author continued to produce book after book. Because some of Verne's books were being translated into Russian, they had to be read by diplomats before publication in an effort to avoid any misunderstanding. The sales of his books permitted him to buy a yacht and to sail around the Mediterranean, but his son's conduct continued to worry him. Michel's debts were significant and, at the age of eighteen, he demanded his independence in order to marry an actress. This marriage did not last long, and soon Michel eloped with a pianist who was also a minor. Verne would be obliged to support his son and his family for a long time.

Verne lived in a very comfortable, upper-middle-class manner in the provincial town of Amiens. In 1866, however, he was obliged to sell his yacht, the upkeep of which had become too expensive. In the same year, he had an unfortunate accident. His nephew Gaston, the son of his brother Paul, shot him in the foot during a fit of temporary insanity. Verne would never recover completely from the wound. Shortly after this accident, his publisher, Hetzel, died, and, although Verne continued working for the same house under the direction of Hetzel's son, his relationship with the successor was not what he had known with the father.

In spite of increasing health problems and lesser financial success, Verne continued to produce book after book. In 1905, acute diabetes was discovered, and Verne died soon after, on March 24, in Amiens, surrounded by his family. His productivity was such that posthumous novels would appear until 1914.

## ANALYSIS

Verne was drawn to the sea and the life of adventure from an early age, yet his biography is remark-

ably prosaic. Aside from a trip to Scandinavia and one to the United States, he spent most of his life in the provincial French town of Amiens. It is true that he owned a sailboat as soon as he could afford to buy one, exchanged it for a larger one, and finally purchased a yacht, but his travels were limited to the Mediterranean coastline. Verne was an adventurer of the mind.

In 1863, when *Five Weeks in a Balloon* first appeared, Verne was an immediate success and was especially recognized as the creator of a radically new type of novel. Under the name of science fiction, works resembling those of Verne would continue to fascinate readers of all ages. His fertile imagination continued to furnish more ideas for novels than he could complete. His success, however, was not entirely attributable to the novelty of the genre. Verne's ideas correspond to the ideology of the second half of the twentieth century. Since antiquity, literature had exploited the voyage as a theme, but Verne's concern for scientific knowledge made his voyages educational as well as exciting. The curiosity that led to exploration and invention during Verne's lifetime also provided an enthusiastic reading public.

The continuing popularity of the stories and their successful adaptation in motion pictures demonstrate that, beyond the scientific apparatus, which now appears dated, Verne's novels appeal through their mythological structures. The epic struggle against evil, the voyage as initiation, and the unfathomable mystery of Captain Nemo still fascinate readers.

## A JOURNEY TO THE CENTER OF THE EARTH

**First published:** *Voyage au centre de la terre*, 1864 (English translation, 1872)

**Type of work:** Novel

*Upon discovering a coded parchment, Harry, his uncle Professor Hardwigg, and their Icelandic guide, Hans, find a volcanic crater that leads them into the bowels of the earth.*

Like the greater number of Verne's works, *A Journey to the Center of the Earth* is a novelistic descrip-

tion of scientific phenomena. This third of Verne's works is geological and paleontological. The different geological strata of the earth, its minerals, the

formation of the planet, and the different hypotheses concerning its core are reviewed. At the same time, the structure of the work calls upon the archetypal descent of the hero into the underworld.

Verne's characters are conscious that their scientific goals echo those of humanity. Mister Fridriksson, their Icelandic host, who converses with the hero Harry in Latin,

bids them farewell with "this verse that Virgil seems to have written for us: 'Et quacumque viam dederit fortuna, sequamur'" ("And whichever way thou goest, may fortune follow"). Verne knew that others had written of the descent into the underworld, usually as a pretext to criticize society on the surface of the planet, without any scientific pretensions. His motivation is otherwise: to explore scientific data and imagine an adventure story.

The story is told by one of its protagonists, the student Harry, a lover of geology. Verne seems to voice his opinion when the narrator proclaims the scientific validity of the expedition:

No mineralogists had ever found themselves placed in such a marvelous position to study nature in all her real and naked beauty. The sounding rod, a mere machine, could not bring to the surface of the earth the objects of value for the study of its internal structure, which we were about to see with our own eyes, to touch with our own hands.

The characters of the novel are limited to the three of the expedition. Harry's cousin and fiancé, Gretchen, is reduced to the figure of the knight's lady who sends him off on his mission and welcomes him home, a hero, at the conclusion of the adventure. Harry's youthful imagination, his concern with practical details such as eating and sleeping, contrast sharply with the stereotype of the universal scientist represented by his fanatical uncle,

who is unable to imagine danger and is motivated only by scientific curiosity. The third member of the crew, the Icelandic guide Hans, never speaks. He represents instinct, has no interest in the discoveries and, apparently, no fear in the face of dangers. He finds water, constructs a raft, and repeatedly saves the scientists' lives, all for three dollars a week.

A precise date is given at the beginning of the work situating the story in the reader's near past, and at one point the use of the journal or log kept by Harry during the crossing of an interior sea allows the story to be told in the present tense. All of this contributes to the realism of the narration. The cause of realism is served by the didactic side of the work as well: Lists of equipment and scientific instruments for the venture are given; the trip is a lesson in geology and paleontology. Once the expedition reaches the interior sea, however, geological references become rare. Now the voyage seems to allow the explorers to discover humanity's past. Verne's heroes are fascinated by the mystery of humanity's origins. The eternal question of the source of life was accentuated in the nineteenth century by the controversy that followed publication of the theories of naturalists Charles Darwin and Jean-Baptiste Lamarck.

Once on the interior sea, Harry's scientific hypotheses blend with symbolism. The fantastic appeal of electricity at the time explains Verne's use of it to illumine the Central Sea:

The illuminating power in this subterraneous region, from its trembling and flickering character, its clear dry whiteness, the very slight elevation of its temperature, its great superiority to that of the moon, was evidently electric; something in the nature of the aurora borealis, only that its phenomena were constant, and able to light up the whole of the ocean cavern.

More and more, Harry reveals his impressions of being "imprisoned," of the "awful grandeur" of the scene: "Imagination, not description, can give an idea of the splendor and vastness of the cave." The discovery, first of fossils, then of bones, then of living prehistoric creatures, and finally of a humanoid giant allow for many narrow escapes: "The fact was that my journey into the interior of the earth was rapidly changing all preconceived notions, and day by day preparing me for the marvelous."

When at last their way seems blocked, the travelers do not hesitate to open the earth with explosives. In doing so, they provoke a volcanic eruption that rather miraculously restores them to the surface of the earth, not in Iceland, whence they began their journey, but in an island of the Mediterranean.

## TWENTY THOUSAND LEAGUES UNDER THE SEA

**First published:** *Vingt mille lieues sous les mers*, 1869-1870 (English translation, 1873)

**Type of work:** Novel

*Shipwrecked, Professor Aronnax, his servant Consul, and a sailor, Ned Land, are taken aboard the submarine of the mysterious Captain Nemo.*

In *Twenty Thousand Leagues Under the Sea*, Verne created a character, Captain Nemo, who would continue to haunt the imagination of generations to come in the manner of Homer's hero, from whom Nemo took his name. In the *Odyssey* (c. 725 B.C.E.; English translation, 1614), Ulysses calls himself Nemo, or "No one," in order to hide his identity from the Cyclops. Verne's unknown renegade, making war on injustice, has likewise become a myth.

The best known of Verne's works was also the one that took the longest to find its way into print. It is certain that the author was working on a story tentatively titled "Voyage Under the Waters" in 1865. After his exploration of the air in *Five Weeks in a Balloon* and his *A Journey to the Center of the Earth*, it was logical that Verne would pursue his pedagogical mission by exploring the bottom of the sea.

This novel, though, was to be different from the others. Verne was very excited about the creation of a hero entirely cut off from the earth and humanity. His publisher, Hetzel, on the other hand, was very uneasy about Nemo. Verne refused to explain who his captain was and what his past had been. Letters show that the author would have liked to have made Nemo a Pole, oppressed by Russia. For commercial reasons, this was impossible, as Verne's books were translated into Russian. The violence of Nemo's hatred of his enemies, and his

cruel sinking of ships, given with many hair-raising details, worried Hetzel, but Verne was adamant in preserving the hero driven by hatred.

As is usual with Verne, the motivation in the novel is a double one: scientific, with the description of the submarine vessel and the underwater world that the submarine allows the heroes to explore, and entertaining, with an unprecedented series of adventures to be encountered. Professor Aronnax is fascinated by the marvels of submarine geology and biology, which he can study in his fantastic underwater laboratory, the *Nautilus*. Ned Land, on the other hand, is a simple sailor, a natural man; his name, Land, makes him incapable of remaining at sea. He remains indifferent to everything except the loss of liberty that Nemo has inflicted upon his "guests."

The story is told by Aronnax, who is capable of understanding both points of view. He comes to admire and pity the genius Captain Nemo, while agreeing with Land that it is impossible to remain with him for the rest of his natural life.

The narrator, Aronnax, is often conscious that his story is an incredible one. In the space of ten months aboard the submarine, he travels twenty thousand leagues—that is, a trip around the world, under the seas. The journal form, which allows the tale to be told in the present tense and makes for considerable suspense as well as an illusion of reality, is used throughout. Many details contribute to the realism of the story: dates, the names of ships encountered, and maps on which the itinerary of the *Nautilus* is traced. Historical references to the American Civil War and the revolt of Crete add to the impression of reality. Probably the most impressive aspect of the narration is the quantity of scientific data given. Interminable lists of submarine plants, shells, and animals serve to present a scientific alibi for the adventure story.

When the story opens, the *Nautilus* has seldom been sighted but has given rise to a legend that there is a new sort of sea monster in the oceans.

When Professor Aronnax agrees to leave his museum and set sail, it is to hunt the monster. Verne has thus given his novel the appearance of an epic adventure. When the narrator discovers the mechanical nature of the submarine, the mythic side of the story does not come to an end. The *Nautilus* is powered by electricity, a phenomenon that remained mysterious enough at the time to allow Verne to play on the fantastic possibilities that it might offer.

Nemo's courage, his intelligence, and his determination excite the admiration of the narrator. Yet when Nemo dreams while improvising on his pipe organ, Aronnax admits that the captain remains essentially a mystery to him. It is the figure of Nemo, at his organ, towering over humanity after having declared war on it, understood by no one, which continues to fascinate generations of readers.

## SUMMARY

Science-fiction writer Ray Bradbury once declared himself "a son of Jules Verne." If the nineteenth century French writer of educational works for young people can be considered a founder of the science-fiction novel, it is not attributable simply to his interest in the techniques and discoveries being made in his own time. There is something timeless about Verne's novels. Like the best science-fiction works, they call upon mythological structures. The voyage, whether it be around the world, to the moon, to the center of the earth, or under the sea, is first of all a quest for the self. All Verne's journeys are initiations, which permit his hero to come to a greater self-awareness.

Nancy Blake

## BIBLIOGRAPHY

### By the Author

#### LONG FICTION:

*Cinq Semaines en ballon*, 1863 (*Five Weeks in a Balloon*, 1876)

*Voyage au centre de la terre*, 1864 (*A Journey to the Center of the Earth*, 1872)

*Voyages et aventures du capitaine Hatteras*, 1864-1866 (2 volumes; includes *Les Anglais au pôle nord*, 1864 [*English at the North Pole*, 1874], and *Le Désert de glace*, 1866 [*Field of Ice*, 1876]; also as *Adventures of Captain Hatteras*, 1875)

*De la terre à la lune*, 1865 (*From the Earth to the Moon*, 1873)

*Les Enfants du capitaine Grant*, 1867-1868 (3 volumes; *Voyage Round the World*, 1876-1877; also as *Captain Grant's Children*, includes *The Mysterious Document*, *Among the Cannibals*, and *On the Track*)

*Vingt mille lieues sous les mers*, 1869-1870 (*Twenty Thousand Leagues Under the Sea*, 1873)

*Autour de la lune*, 1870 (*From the Earth to the Moon . . . and a Trip Around It*, 1873)

*Une Ville flottante*, 1871 (*A Floating City*, 1876)

*Aventures de trois russes et de trois anglais*, 1872 (*Meridiana: The Adventures of Three Englishmen and Three Russians in South Africa*, 1873)

*Le Tour du monde en quatre-vingts jours*, 1873 (*Around the World in Eighty Days*, 1873)

*L'Île mystérieuse*, 1874-1875 (3 volumes; includes *Les Naufrages de l'air*, *L'Abandonné*, and *Le Secret de l'île*; *The Mysterious Island*, 1875)

*Le Chancellor*, 1875 (*Survivors of the Chancellor*, 1875)

*Michel Strogoff*, 1876 (*Michael Strogoff*, 1876-1877)

*Hector Servadac*, 1877 (English translation, 1878)

*Les Cinq Cents Millions de la Béguin*, 1878 (*The Begum's Fortune*, 1880)

*La Maison à vapeur*, 1880 (*The Steam House*, 1881; includes *The Demon of Cawnpore* and *Tigers and Traitors*)

*La Jangada*, 1881 (2 volumes; *The Giant Raft*, 1881; includes *Down the Amazon* and *The Cryptogram*)

*Mathias Sandorf*, 1885 (English translation, 1886)

*Robur le conquérant*, 1886 (*The Clipper of the Clouds*, 1887)

*Sans dessus dessous*, 1889 (*The Purchase of the North Pole*, 1891)

*Le Château des Carpathes*, 1892 (*The Castle of the Carpathians*, 1893)

#### DISCUSSION TOPICS

- What is innovative in Jules Verne's *A Journey to the Center of the Earth*?
- How do you account for Captain Nemo's enduring appeal to readers?
- What were Verne's sources in his life and reading that enabled him to be the inventor of science fiction?
- Science and the aspirations of science are always advancing. What keeps the science or pseudoscience of Verne's works from becoming uncommonly boring to modern readers?
- What modern artistic works blend an appreciation of scientific possibilities and mythological structures as did Verne's works?

Lyubov Fyodorova Makowska

## VLADIMIR VOINOVICH

**Born:** Stalinbad, Tadjhikistan, Soviet Union (now Dushanbe, Tajikistan)  
September 26, 1932

*Among dissident writers, Voinovich has been amusingly effective in his satiric assaults on power structures.*

### BIOGRAPHY

Vladimir Nikolaevich Voinovich (voy-NOH-vihch) was born in Dushanbe, Tadjhikistan, in Central Asia, which was a Soviet republic at the time of his birth on September 26, 1932. His father was a journalist, a Russian of Serbian descent. His mother, a mathematics teacher, was Jewish, which Voinovich believes is why he was unable to qualify for flight training when he served in the Soviet military. As a small boy, Voinovich was taken by his family to nearby Khodzhent, renamed Leninabad, where he remembers camels, donkeys, a blind man, a leper wearing a bell, men in quilted robes, and women in veils. He remembers that from time to time harmless stray dogs in the city would be rounded up, slain, and boiled for soap. During this time Voinovich's father disappeared from his home for a period of years, disciplined for an ideological indiscretion in the time of Stalin's purges.

When Voinovich's father was able to return to his family, they all moved to Zaporozhe, in Ukraine. At the outbreak of World War II Voinovich's father enlisted in the army. Zaporozhe soon came under attack from German bombers, and Voinovich went to live with his family on a collective farm. He remained in this environment for the rest of the war. As a boy, Voinovich had discovered reading and books, particularly Leo Tolstoy's *Voyna i mir*, 1865-

1869 (*War and Peace*, 1886). Despite his intellectual promise, he was given limited academic training and enrolled by the state in a trade school, where he learned to be a joiner. He served in the army for four years, from 1951 to 1955. By that time Voinovich felt himself strongly interested in literature and, upon completion of military service, applied for admission to the Gorky Literary Institute, which turned him down.

Settling in Moscow, Voinovich worked at various jobs to earn a living while teaching himself the writer's craft. Even as he felt himself drawn to the art of fiction, he attempted poetry and kept company with other young people of similar interests, thereby attracting some attention from the KGB. Voinovich has admitted that by 1960 he regarded himself as a true Soviet but was nevertheless scornful of Marxist-Leninist Communism. He was received into the Soviet Writers' Union in 1962 as a young man of great promise. It was in this same period that Nikita Khrushchev, standing at Vladimir Ilich Lenin's tomb, recited a bit of Voinovich's poetry in praise of Soviet space ventures.

By the end of the 1960's Voinovich's satiric bent had become evident. He was no longer a favored author of the Communist Party. His position deteriorated until he was expelled from the Writers' Union in 1974 and put under KGB supervision. No longer able to publish in the Soviet Union, Voinovich had his novels and other satiric productions printed in the West, where they were quickly translated into English. *Ivan'kiada, ili rasskaz o vselenii pisatelya Voinovicha v novuyu kvartiru* (1976; *The Ivankiad: Or, The Tale of the Writer Voinovich's Installation in His New Apartment*, 1977), which makes sport of bureaucratic wrangling necessary to se-

cure a better apartment, was soon followed by Voinovich's best-known work, *Zhizn' i neobychnyye priklyucheniya soldata Ivana Chonkina* (1975; *The Life and Extraordinary Adventures of Private Ivan Chonkin*, 1977). Merciless in its satire of Red Army incompetence, this novel, written in the 1960's, helps to explain Voinovich's unpopularity with officials at home. A collection of short stories and letters, *Putem vzaimnoy perepiski* (1979; *In Plain Russian: Stories*, 1979) appeared next.

The year after, Voinovich was stripped of his citizenship and expelled from the Soviet Union. He moved to West Germany and continued to write. A sequel to Private Chonkin's adventures, *Pretendent na prestol: Novye priklyucheniya soldata Ivana Chonkina* (1979; *Pretender to the Throne: The Further Adventures of Private Ivan Chonkin*, 1981), followed. More satire continued to flow from the exile's pen. *Antisovetskiy Sovetskiy Soyuz* (1985; *The Anti-Soviet Soviet Union*, 1986) was followed by *Moscorep* (1986; *Moscow 2042*, 1987). In the latter work one object of satire is Alexandr Solzhenitsyn, who has had himself frozen and then revived in the twenty-first century to lead a conservative reaction as bizarre as anything to be found in the Soviet era. *Moscow 2042* is a clear demonstration that Voinovich's satire is neither politically nor ideologically specific, that he recognizes and is willing to attack one form of tyranny and pretense as quickly as another. *Shapka* (1988; *The Fur Hat*, 1989) appeared next.

In 1990, Russian citizenship was restored to Voinovich and he was offered an apartment if he wished to live in Russia. He eventually divided his time between Munich and Moscow, and he resumed participation in Russian literary life. In 2000, he published his first novel in more than a decade, *Monumentalnaia propaganda* (*Monumental Propaganda*, 2003), in which he satirizes the changing political landscape in the Soviet Union from the mid-1950's through the postglasnost years in the New Russia.

## ANALYSIS

Understanding Voinovich's place in Russian literature might well begin with understanding the historical and cultural circumstances that have surrounded writers in the Soviet period. Many of these writers, Voinovich included, are regarded as belonging to one of three waves of émigrés, artists, and thinkers who fled or were forced to leave Rus-

sia in consequence of the establishment of the Soviet state. The first wave left during or immediately following the civil war of the early 1920's. The second wave left following World War II, and the third wave (including Solzhenitsyn and Voinovich) left in the 1970's and early 1980's. The political regime responsible for these departures also led to an ordering of literary works by three categories: "gosizdat," or state-sponsored publications; "samizdat," or self-published works that do not have official sanction; and "tamizdat," or works published outside Soviet Russia. Voinovich, who during the Soviet regime was forced to publish in the West, belonged to the body of writers and writing categorized as tamizdat.

That Russian writers have had to live as émigrés is at least partly a result of the decision made by Communist officials as early as the 1930's that the proper function of literature was to promote socialist realism. Proletarians and their achievements were to be presented in flattering terms, while people representing bourgeois culture or attitudes were to be drawn as class enemies. What imaginative writers often found was that the reality they undertook to imitate did not always conform to the political or social ideology which they were expected to advance. Socialist realism, or any other "realism" that is required to conform to a political ideology, is a contradiction in terms. Most writers who attempt to represent the real world do not permit themselves the emotional luxury of the politically assured by thinking that human rectitude is specific to a single ideology and its partisans. This was Voinovich's problem as a writer in the Soviet Union.

Voinovich seems to have been able to turn his problem into an artistic advantage. He was obliged to become aware of the eternal and universal nature of human stupidity. His work from before the time of his expulsion from the Writers' Union is openly satiric. His satire has developed considerably from his recognition of disparities between the ideal and the actual in the period of Soviet rule. His most famous work, *The Life and Extraordinary Adventures of Private Ivan Chonkin*, is not so much a satire on the Red Army, however, as on the inevitable follies of any self-important bureaucracy. Human pretense and ineptitude are conditions of the species. The business of the satirist, a business that will never end as long as people remain people, is

to expose pretense by playing it off against an implied standard of conduct that, if not without blemish, is at least more desirable. The collapse of the Soviet Union does not mean that Voinovich's work is done, only that it is altered in the details.

Critics of Voinovich's work have noted on more than one occasion the absurd character of the world he depicts. This may result from his deflation of the socialist ideal, which has appealed to many in the twentieth century, or it may result from his willingness to attack institutions and attitudes of more than one kind, as if competence and reason are nowhere to be found. Like all good satirists, however, Voinovich does not seem to create a world absurd to the point of hopelessness. The absurdity in his novels results more often than not from a failure in people who ought to be able to do better. From characters who seem entirely fictional to those who bear clear resemblance to prominent figures of the Soviet era, satire seems to be directed at this conditional failure. After all, if the world were absolutely absurd, if there were no scheme of values nor humane goals, satire could not function.

Voinovich is not entirely satiric, moreover. Criticism has also noted him as a writer of comic fiction. The difference seems to be that where Voinovich is comic, the people he represents are benign. Private Ivan Chonkin is somewhat bumptious, harmlessly naïve, and simply funny in his resentment of the pig Borka. Failures of abstinence with sex or alcohol in various fictions are treated as lapses in human conduct that cannot be eliminated and thus must be tolerated. The difference between comic figures and satiric figures is that comic figures cause little suffering. The same cannot be said for the latter. Voinovich is occasionally ironic, implying by circumstance or tone in his writing that human failing can be both harmful and irremediable. More often, though, the manner is satiric, making the point (directly at the end of *Moscow 2042*) that life ought to be easier for people, and that perhaps the goal of the imaginative writer is to achieve that end by attacking things that can be changed.

Most of Voinovich's work is readily accessible and grasped without difficulty. He frequently attacks foibles that seem peculiar to Russian life in the Soviet era, so a certain number of his points are lost on readers not familiar with that time. *The Ivankiad*, for example, might strike some people as a dull book if they are not aware of the hous-

ing shortage that plagued Russia for many years and that led to elaborate ploys for getting something from a bureaucracy not noted for efficiency. Of Voinovich's completed work, *The Life and Extraordinary Adventures of Private Ivan Chonkin* appears to have a secure place in modern Russian fiction. Though other books may come to the same status, it seems unlikely that anything will move ahead of it.

### THE LIFE AND EXTRAORDINARY ADVENTURES OF PRIVATE IVAN CHONKIN

**First published:** *Zhizn' i neobychnyye prikluycheniya soldata Ivana Chonkina*, 1975 (English translation, 1977)

**Type of work:** Novel

*A Red Army private, detached from his unit to guard a disabled airplane, is later viewed as a deserter and then a German enemy through military bumbling.*

*The Life and Extraordinary Adventures of Private Ivan Chonkin* is a comedy of innocence and a satire of incompetence. The hero, Private Chonkin, is often comic in his innocent but never contemptible behavior. His opponents, functionaries in the Stalinist Soviet Union, are only somewhat funny in their self-approving incompetence. Frequently they are transparent fools.

Just before the beginning of World War II, a Red Army airplane is forced to land on a collective farm in the Soviet Union. Private Chonkin, a humble soldier and object of petty harassment by the military, is sent to stand guard over the downed aircraft. Within a few days Chonkin has settled in nicely, taking up with Nyura Belyashova, the lonely postmistress, and making the acquaintance of Golubev, chairman of the kolkhoz (collective farm), and Gladishev, a warehouseman with scientific pretensions. Members of the farm, which has been named Krasnoye (Red) in honor of the Russian Revolution, are silly in their patriotism and mechanical in their zeal. For example, Delhi cigarettes are suspected of being subversive because

"Delhi" possibly stands for "Down with the Entire Leninist Humanist International." Gladishev, who lives with an unlovely wife named Aphrodite and an infant son named Hercules, spouts Darwinism and aspires to revolutionize agricultural production by developing a hybrid plant that will bear potatoes and tomatoes at the same time. In support of his efforts, he fills his house with pots of fertilizer which give off an overpowering stench of dung. Chonkin manages to accommodate himself to the world he now inhabits and has no problems larger than an irrational jealousy of Nyura's pet hog, Borka. Matters become more difficult with the outbreak of World War II.

The arrival of war leads to chaotic meetings and general hoarding by members of the kolkhoz. One evening Chonkin fails to watch Beauty, Nyura's cow, as she is returning home from the fields, and the cow gets into Gladishev's garden, trampling everything and eating his prized hybrid plant. Gladishev takes revenge by reporting Chonkin to the military as a drunken deserter who questions both Marxism-Leninism and Charles Darwin. The army responds by dispatching soldiers to capture Chonkin. Incompetence and cowardice pervade their efforts. The first detachment, who appear to threaten the airplane Chonkin is guarding, is taken prisoner and put to work as forced labor on the farm. Further bumbling leads to a moment of mutual deception between two groups opposing Chonkin, who has been transmuted into a German fascist. Both sides believe they are talking to Germans, and the confusion costs one man his life. After holding off battalions of soldiers, Chonkin is finally subdued by a large shell which stuns but does not kill him. As the novel concludes, Private Ivan Chonkin, a politically innocent but loyal soldier, is taken into custody.

## "A CIRCLE OF FRIENDS"

**First published:** "V krugu družei," 1979  
(collected in *In Plain Russian: Stories*, 1979)

**Type of work:** Short story

*Comrade Koba (Joseph Stalin), surrounded by terrified sycophants, does a crossword puzzle on the night before Adolf Hitler's forces invade the Soviet Union.*

"A Circle of Friends," a story in the collection *In Plain Russian: Stories*, is set in the Kremlin on the night of June 21, 1941, a few hours before Germany invaded Russia. Joseph Stalin has cultivated an image as a tireless servant of his people, but actually his silhouette before a lighted office window is a foam-rubber dummy. His moustache and pipe are props intended to make him look avuncular. Stalin actually lives in a doorless, windowless room reached by crawling through a safe with a door at both ends. His need for the companionship of a woman is satisfied by periodic sexual encounters with a cleaning lady whose identity is not known and does not matter.

Entertaining a belief in the emotional health of gathering with a few close friends, Comrade Koba receives a group who, like Koba himself, are easily identified with officials of the Soviet Union in the early 1940's. For example, Koba's Ukrainian peasant friend is someone called Nikola Borshchhev, that is, Nikita Khrushchev. The circle of friends undertakes to entertain Comrade Koba while controlling their fear that they will somehow displease him, Koba's displeasure being irrational, unpredictable, and very dangerous.

Early in the evening, strain results from the absence of Comrade Zhdanov, whose wife is dying in a hospital. When Koba has mastered his anger, he turns to a crossword puzzle. Unable to come up with the name of a huge prehistoric animal, Koba telephones an important scientist who will know the necessary word, but he pretends he wants the word because he believes the reintroduction of the animal will lead to increased production of milk and meat for the Soviet people. Pleshivenko, the scientist, furnishes the word while falling all over himself in admiration of Koba's genius in conceiving such an idea.

Further events in the evening follow the same pattern. When Koba utters high praise of Comrade Molokov, Molokov is terrified lest the praise somehow conceal irrational displeasure that will end in brutal vengeance. When Koba desires musical entertainment, Borshchev is made to dance to the piano accompaniment of Zhbanov, who has arrived, presumably from the hospital, and continues his music after being informed of his wife's death. The evening grows late as people turn to card-playing and heavy drinking. Koba falls asleep. Word comes that Hitler, called "Dolph," has invaded the country. At first no one dares wake him. When Koba is awakened and refuses to believe war has arrived, no one dares challenge him. Very late, Koba's companions depart, after which he crawls through the safe with two doors to isolation. In his private room he confronts an ugly, true image of himself in a mirror. This he destroys with a pistol shot. The story soon concludes in an ironic disclaimer that the characters and incidents bear any relation to the actual.

## Moscow 2042

**First published:** *Moscorep*, 1986 (English translation, 1987)

**Type of work:** Novel

*A Russian émigré writer engages in time travel, which takes him forward to the dystopian world of Moscow in the middle of the twenty-first century.*

*Moscow 2042* begins in a Munich beer garden in 1982. The central character is a Russian émigré writer, Vitaly Nikitich Kartsev, who bears a strong resemblance to Voinovich himself. In conversation with a German acquaintance, Rudi Mittelbrechenmacher, Kartsev is faulted for his indifference to science fiction and his unwillingness to accept the possibility of time travel, which his friend Rudi assures him is a reality. Kartsev responds by going to a travel agency to seek passage to Moscow in the twenty-first century. His success in making the necessary arrangements means that Kartsev will have direct experience from which science fiction may be written.

When Kartsev's projected travel becomes known,

he is approached by various people who have an interest in future Moscow. John, an operative from the Central Intelligence Agency, poses as a *New Times* magazine representative and offers to pay the cost of Kartsev's expensive trip in exchange for the story he will bring back. Wealthy representatives of a Middle Eastern government abduct Kartsev and offer him money if he will return with plans for a nuclear bomb. Then, before his departure in time, Kartsev is persuaded to fly to Toronto to meet another émigré writer, Sim Simych Karnavalov (Alexandr Solzhenitsyn). Karnavalov wants Kartsev to carry into the future a floppy disk containing the completed "slabs" of a very large work, here called *The Greater Zone*. Kartsev is also given a letter to present to the future leaders of the Soviet Union, which he discards while taking the floppy disk along with him.

Upon his return to Germany, Kartsev boards a time-travel craft and flies forward to 2042. He arrives in Moscow to discover that he has been rehabilitated, is now regarded as a classic writer, and is about to be honored by a jubilee in celebration of his one-hundredth birthday. As Kartsev becomes acquainted with Moscow-in-the-future, Voinovich's novel turns into a dystopian speculation on Soviet communism after another sixty years of refinement.

Moscow is now a fully realized communist center, surrounded by three Rings of Hostility, the most hostile being the most remote, the capitalist enemy. Within Moscow, life is utterly regimented and largely absurd. Recycling has been perfected so far that to secure food (primary matter), residents must turn in secondary matter (human feces). *Pravda* is printed on toilet paper. The Christian church, reformed to eliminate God, has been integrated into the Communist Party structure and worships the Genialissimo, the isolated leader of the state. The chief threat to this system comes from Simites, twenty-first century followers of Sim Simych Karnavalov. Kartsev displeases the Communist Party when he refuses to delete Sim from *Mos-*

cow 2042 after he has returned to 1982, but the moment for eliminating Sim has already passed. Sim Karnavalov had himself frozen and deposited in a Swiss bank in the twentieth century. Toward the novel's end he is revived and enters the future, which leads to a Simite uprising, the collapse of communist Moscow, and the establishment of a militantly reactionary czarist autocracy under the direction of Karnavalov, who believes he has Romanov blood in his veins. Kartsev is allowed to return to 1982, where he hopes, as author of *Moscow 2042*, to encourage reforms that make life "a little easier on people."

- Maloe sobranie sochinenii: v 5 tomakh*, 1993

## SUMMARY

The satiric fictions of Vladimir Voinovich, though considerably effective, are topical, bound up with a Soviet Union that no longer exists. Whether Voinovich's work will carry into the future remains to be seen. It is difficult to predict what later writers will find relevant and amusing, and what will seem irrelevant and confusing. Voinovich will remain notable as a Russian novelist whose satiric art became an expression of dissent.

John Higby

## DISCUSSION TOPICS

- How does Vladimir Voinovich blend comedy and satire in *The Life and Extraordinary Adventures of Private Ivan Chonkin*?
- Did Aleksandr Solzhenitsyn enjoy a literary, if not personal, advantage over Voinovich in being imprisoned instead of being simply evicted from the Soviet Union?
- What motivates the circle of friends in the story so titled?
- Did the revolution that swept away Soviet communism a few years after the publication of Voinovich's *Moscow 2042* render the novel irrelevant thereafter?
- What do you presume will be the future reputation of Voinovich in Russia?

## VOLTAIRE

**Born:** Paris, France  
November 21, 1694

**Died:** Paris, France  
May 30, 1778

*Voltaire is one of the principal literary and intellectual figures of eighteenth century Europe; few writers have played such an important social role in their century.*

### BIOGRAPHY

Although he was born a fragile child on November 21, 1694, in Paris, the capital of France, François-Marie Arouet, better known as Voltaire (vohl-TAHR), was destined to have a long and tumultuous literary life. So great was his influence during the eighteenth century that historians speak of the Century of Voltaire. Few deny that he possessed a brilliant mind that both understood and moved the literary and political events of the time.

The young Arouet received little formal education before the age of nine, when he was sent to the Jesuit College of Louis-le-Grand. He had, however, been taken under the wing of his deist godfather, the Abbé de Châteauneuf, who was the chief cause—much to his father's chagrin—of Arouet's early introduction into the freethinking Society of the Temple. In this circle, ideas were debated, libertine literature read, and religious dogma examined. He remained under the official care of the Jesuits until, at the age of seventeen, he came home to his father (his mother had died when he was seven), who insisted that his son study law.

After some futile attempts to follow his father's wishes, Arouet began the dangerous activity of writing libelous verse. Composing lampoons against the current French government eventually cost him eleven months in the infamous prison of the

old regime, the Bastille. Never one to idle away his time, he began while imprisoned his epic poem *La Henriade* (1728; *Henriade*, 1732) and revised his play *Œdipe* (pr. 1718, pb. 1719; *Oedipus*, 1761). Released from the Bastille on April 11, 1718, he exited with a new name that he had completely invented, Voltaire. During the ensuing years, the young Voltaire remained ever restless, accepting secret diplomatic missions, courting noble ladies, and always writing with intensity. In December, 1721, his father died, leaving him a considerable inheritance. It was soon augmented with a pension by a forgiving regent. His plays appeared on the stage; his tragedy *Mariamne* (pr. 1724, pb. 1725; English translation, 1761) was particularly successful.

Though an earlier bout with smallpox caused him to be seriously ill, an event soon took place that marked him more deeply. At the end of 1725, while attending a social gathering in Paris, Voltaire believed that he had been insulted by a nobleman, the chevalier de Rohan. Not able to hold his sharp tongue, Voltaire challenged the chevalier to a duel; Rohan declined. Eighteenth century French justice, weighted entirely on the side of privilege and nobility, did not wince when the bourgeois Voltaire was later soundly beaten by Rohan's lackeys.

It was Voltaire who remained confined to the Bastille for two weeks. Upon his release, and at his own request, he departed immediately for England for three years. Voltaire had received a political lesson that he would not soon forget. The old regime could not, however, have chosen a more energetic, intelligent, and prolific enemy with which to cross sword with pen.

In 1726, Voltaire left France known as a gifted poet and playwright. Three years later he returned, one of the foremost writers and thinkers of his time. Literature and patronage had brought him wealth and many friends in England—the Walpoles, First Viscount Bolingbroke, Sarah Marlborough, and Alexander Pope. Voltaire had also come into contact with English institutions, Parliament, commerce, religion, science, and literature (notably William Shakespeare). All of this was to have a profound influence in forming the philosopher who would champion the cause of moderation and tolerance to the rest of the world. Voltaire's *Letters Concerning the English Nation* (1733; *Lettres philosophiques*, 1734) captures the atmosphere of these years and the opinion of the English about their own customs and institutions. While in England, he had also worked on his play *Brutus* (pr. 1730, pb. 1731; English translation, 1761) and on *Histoire de Charles XII* (1731; *The History of Charles XII*, 1732).

Voltaire returned to France with an even deeper conviction and clearer vision of his own intellectual place among those who would question religious authority and social injustice. His plays *Ériphyle* (pr. 1732, pb. 1779) and *Zaïre* (pr. 1732, pb. 1733; English translation, 1736) were acted on the stage, the latter with much success. In *Le Temple du goût* (1733; *The Temple of Taste*, 1734) Voltaire praised progress and wrote a biting satire of his literary contemporary, Jean-Jacques Rousseau.

The following year, *Letters Concerning the English Nation* was condemned by the French censor; all copies were seized, and a warrant was issued against the author. Voltaire took refuge in the independent duchy of Lorraine with Mme Émilie du Châtelet (well known in the eighteenth century for her scientific ability) in her famous château of Cirey. There, Voltaire and Mme du Châtelet lived a somewhat idyllic existence, often receiving important guests and conducting their own scientific experiments in Mme du Châtelet's well-equipped laboratory. Voltaire gave his time to the writing of social history, composing much of his great study of universal history, *Essai sur les mœurs et l'esprit des nations* (1756, 1763; *The General History and State of Europe*, 1754, 1759), and *Le Siècle de Louis XIV* (1751; *The Age of Louis XIV*, 1752).

During his long sojourn at Cirey, two important plays were completed, *Mahomet* (pr., pb. 1742; *Ma-*

*homet the Prophet*, 1744) and *Mérope* (pr. 1743, pb. 1744; English translation, 1744, 1749), along with his philosophical tale *Zadig: Ou, La Destinée, Histoire orientale* (1748; originally as *Memnon: Histoire orientale*, 1747; *Zadig: Or, The Book of Fate*, 1749). Voltaire and Mme du Châtelet took full advantage of the sizable fortune that the former had accumulated (through both shrewd investments and literary publications) by holding private performances in their own theater and enjoying all the other luxuries that the eighteenth century had to offer.

With the sudden death of Mme du Châtelet in September, 1749, a grief-stricken Voltaire accepted an invitation by Frederick the Great of Prussia to visit Berlin even though the relationship between the two men had become strained. For some time before Mme du Châtelet's death, Voltaire had regained favor with the French government, becoming historian to Louis XV in 1745, and had again attempted to reside in Paris. He simply, however, could not be comfortable in a city where he still felt threatened by those who reigned. Thus, on June 15, 1751, he left Paris for Berlin and the princely court of Frederick.

Frederick had wooed Voltaire to his palace in hopes of presiding over lofty and philosophical discussions on political and social theories. For a time, both great men, if not always in agreement, seemed to have tolerated one another. As always, Voltaire's pen moved lightly across blank pages, finishing such well-known works as his tale *Le Micromégas* (1752; *Micromegas*, 1753). Yet, in spite of Frederick's generosity toward Voltaire and the latter's privileged place at the monarch's table, it was quite impossible for the two temperamental men to get along. The break between them was bitter, and again Voltaire was forced to depart hastily.

His first residence was near Geneva, Switzerland, in a country house he named Les Délices. His *Poème sur le désastre de Lisbonne* (1756; *Poem on the Lisbon Earthquake*, 1764) was published during this period. Though having a comfortable home, Voltaire sought to acquire something even more grand; he did this by his purchase of the nearby château Ferney. Henceforth, he became known as the patriarch of Ferney. It was there that the "enlightened lord," surrounded by his niece (Mlle Denis), friends, and villagers, would pass the last years of his life. Voltaire, now driven more than ever by an intense will to create and participate in

every aspect of daily life surrounding the château of Ferney, wrote his philosophical tales *Candide: Ou, L'Optimisme* (1759; *Candide: Or, All for the Best*, 1759; also as *Candide: Or, The Optimist*, 1762, and *Candide: Or, Optimism*, 1947) and *L'Ingénu* (1767; *The Pupil of Nature*, 1771; also as *Ingenious*, 1961), his philosophical pieces *Traité sur la tolérance* (1763; *A Treatise on Religious Toleration*, 1764) and *Dictionnaire philosophique portatif* (1764; *A Philosophical Dictionary for the Pocket*, 1765; also as *Philosophical Dictionary*, 1945). While engaging in correspondence with almost all the principal literary and political figures of his day, he found time to build a watch factory, a stocking factory, and a tannery. Nor did he hesitate to come to the defense of citizens whose rights had not been respected.

Voltaire's final triumph came, ironically, in Paris—the city that had so often rejected him. In Paris, the French Academy and all Parisian society received him with much fanfare and rejoicing. He attended several Academy meetings (on one occasion embracing Benjamin Franklin), went to the premiere of his play *Irène* (pr. 1778, pb. 1779) on March 16, 1778, and then, exhausted by fatigue, emotion, and stimulation, died in Paris at the age of eighty-three on May 30, 1778. He had returned to the city to receive his laurels and, eventually, to be buried among other French heroes in the Panthéon.

## ANALYSIS

Very early in his life, Voltaire gained a reputation as the outstanding poet and playwright of his time. Yet although his poetry and plays earned for him fame and considerable sums of money, most are now seldom read or performed. *Henriade*, his one serious epic poem, is considered heavy reading. Some of Voltaire's poetry, however—especially pieces such as *Le Mondain* (1736; *The Man of the World*, 1764) and *Poem on the Lisbon Earthquake*—has survived the test of time. His best poetry presents his philosophical ideas in the critical, often satirical, and epigrammatic style that is so characteristic of almost all of his writing. *The Man of the World* and *Poem on the Lisbon Earthquake* were vehicles for Voltaire's ideas—ideas that summarized the principal intellectual currents of the eighteenth century, the age of the Enlightenment.

Voltaire held firmly to the idea that reason, human intelligence, was the cure for all ills. He em-

ployed reason as a weapon in his attack against the social and political abuses of the old regime, as well as its religious intolerance. In *The Man of the World*, he stressed the importance of economic progress and the right of individuals to enjoy the luxuries and pleasures that modern society had begun to produce. In *Poem on the Lisbon Earthquake*, written just after the terrible earthquake (1755) in Lisbon, Portugal, which killed some thirty thousand people, Voltaire questioned the philosophical optimism of the famous German thinker Gottfried Wilhelm Leibniz and the English poet and essayist Alexander Pope. He soundly rejected the notion that “all is well” here on earth and that one should accept Divine benevolence as an explanation for all that befalls humans.

Voltaire's concern for the individual's place on earth, the role that humans play in making their own history, was also apparent in the approach that he took in writing *The Age of Louis XIV* and *The General History and State of Europe*. In both these works, Voltaire broke new ground in the serious writing of social history. He very carefully documented his many volumes, often using unedited texts or securing eyewitness accounts. Even today, his *The Age of Louis XIV* is considered an interesting history of the French king.

From one of Voltaire's earlier works, *Letters Concerning the English Nation*, to one of his later works, the *Philosophical Dictionary*, he continued to define and spread far and wide his ideas on liberty, politics, religion, and literature. His *Letters Concerning the English Nation*, the principal literary result of Voltaire's three-year stay in England, had a profound influence when first published on the Continent. “The first bomb launched against the old regime” is the way the well-known French literary historian Gustave Lanson summarized the impact that piece had on France. In much the same style as that of a modern journalist, Voltaire presented ideas and information on English society in clear, direct, and often cutting prose. Readers of his day had little difficulty in understanding that Voltaire was drawing direct comparisons—always to the detriment of the old regime—between the societies of England and France.

While living in England, he wrote especially on the religious and political liberties enjoyed by English citizens. In short “letters,” published in his book *Letters Concerning the English Nation*, he de-

scribed the many religious sects (Quakers, Anglicans, Presbyterians, and Unitarians, for example) that tolerated one another and avoided religious persecution. In another letter, this one on the English Parliament, Voltaire underscored the limitations that English government placed on its monarchy; the same restrictions on kings did not exist on the Continent, and Voltaire made a point to highlight the differences in the two political systems. The last letter of the volume, and also the most controversial of its time, was an attack on the religious pessimism of the Jansenist writer Blaise Pascal. Voltaire, concerned with worldly pleasures, refused to accept Pascal's position that humans were fundamentally mean and condemned to be unhappy while on earth.

These themes are continued and elaborated upon in the *Philosophical Dictionary*. Short, caustic, satirical entries titled "tolerance," "torture," and "tyranny" in the *Philosophical Dictionary* are typical in style and content of so much of Voltaire's writings. In these pieces, Voltaire denounces the folly of humanity's intolerance, the despotism of unlimited political powers, and the excesses of religious fervor. The image that finally emerges in these works is that of a mature and measured writer, a writer who has completely mastered his craft. Also appearing in these works is the definition most widely applied to the term "humanist." Voltaire, perhaps more than any other modern Western writer, defined and summarized European humanism and human emergence from the age of despotic religious and political authority. His impious expression *Écraser l'infâme* (to crush the infamous) became one of the slogans of the eighteenth century. It was not so much directed against religion or even the Church of Rome as against those people (enemies of Voltaire) who used religion to justify literary censorship and their own misuse of authority.

The themes of social justice, religious tolerance, and the acceptance of the relative nature of an imperfect world were the central subjects of Voltaire's philosophical tales. Even though he expressed disdain for novels or short stories as a genre, it is these works that are most often read today. Beginning with *Zadig*, he finished some twenty-five philosophical tales. As with all of his tales, *Zadig* was meant to be entertaining without any regard for verisimilitude or the likelihood that so many adventures, or

misadventures, could really befall his heroes and heroines. Voltaire never missed the chance to impart a message or to use literary entertainment as a means of propaganda. *Zadig*, the hero of the tale, tries in vain to understand rationally why some humans are happy and others are not. In the end, having become ruler of oriental Babylon, he opts to reign wisely in his own kingdom in order to establish peace for his subjects. *Zadig* (unlike the French monarchy) became the enlightened sovereign, giving his people abundance and glory.

The tale *Micromegas* was written while Voltaire was at the château of Cirey with Mme du Châtelet, and her scientific influence on Voltaire was evident. *Micromegas*, an intergalactic traveler, has more than one brush with the principal scientific theories of the age. Voltaire took the opportunity to ridicule the prestigious French Academy of Sciences for still adhering to Cartesian astronomy (named after René Descartes, the French philosopher and mathematician) and ignoring the explanations posited by Sir Isaac Newton (the English scientist, mathematician, and philosopher). Ridicule and exaggeration were at once part of Voltaire's style and philosophical message. Exaggeration in *Micromegas* took the form of actual physical size: While visiting different planets of the universe, *Micromegas* is alternately viewed as a giant and a lilliputian. Voltaire meant to underscore the importance of maintaining an open mind and of avoiding a slavish devotion to one's own perspective.

*Candide*, the most widely known of all Voltaire's works, is the philosophical tale of young *Candide*'s fall from paradise (the château Thunder-ten-tronckh) and of his sojourns from Europe to Latin America and finally to Constantinople. Voltaire had recently arrived at his last home, the château of Ferney, and he was still shocked by the number of lives that had been lost in the huge 1755 earthquake in Lisbon. *Candide* became his angriest cry against those who would explain away both natural and human-made disasters by appealing to Providence. Voltaire's prose was never more sarcastic and ironic in its condemnation of war, dogmatism, and intolerance than in this tale, which takes its readers from the torture chambers of the Portuguese inquisition to the golden streets of Eldorado and, finally, to the simple garden cultivated by *Candide* and his beloved Cunegonde.

## ZADIG

**First published:** *Zadig: Ou, La Destinée, Histoire orientale*, 1748 (originally published as *Memnon: Historie orientale*, 1747; English translation, 1749)

**Type of work:** Philosophical tale

*Zadig, a wise and just man, seeks the definition of happiness in a chaotic and capricious world.*

*Zadig: Or, The Book of Fate*, Voltaire's first published philosophical tale, was written at a time when the author was finally receiving official recognition for his many literary accomplishments. In 1745, Monsieur Arouet de Voltaire received a court appointment from the king of France, Louis XV. As royal historiographer and later ordinary gentleman of the king's bedchamber, Voltaire moved easily through the long galleries of the royal palace of Versailles. A close look at courtly pettiness, intrigues, and plotting served only to reinforce Voltaire's already low estimation of palace royalty and bootlicking government officials. This time was also the period when Voltaire's long love affair with Mme de Châtelet was ending. She had chosen a younger man over him, and for a time Voltaire was in a jealous rage.

*Zadig*, a tale set in eighteenth century Persia, reflects both the personal circumstances of Voltaire and the more profound philosophical questions concerning the nature of free will and happiness. Voltaire asks the same question on almost every page of the story: Can an honest and wise person lead a happy life in a world filled with liars, scoundrels, and cheats? In a story with a very thin plot, the reader follows the intelligent and kind *Zadig* through his travels among dishonest, deceitful, and cruel people who attempt to do him harm at every turn. First married to one of the most noble, desirable, and beautiful women of all Babylon, *Zadig*, to his great dismay, learns that his wife is unfaithful. Having been disappointed by an aristocratic woman, a woman from the court, he next turns to a woman chosen among the people. Again he has no luck: She also proves to be lacking in true love for *Zadig*.

Though a person of bourgeois origin, *Zadig* so

distinguishes himself for his intelligence among the citizens of Babylon that he comes to the notice of the king and queen. *Zadig's* name is mentioned as one of the persons deserving of a prize that King Moabdar intends to give to his subject who has performed the most generous action during the year. With no attempt at disguising his ironic allusion to life in the French royal court of the eighteenth century, Voltaire has King Moabdar grant the most wonderful prize in all Asia (a golden goblet studded with precious stones) to *Zadig*, because he is the only one who has not spoken ill of a disgraced government minister who had incurred the king's wrath.

*Zadig*, in complete favor with King Moabdar and Queen Astarte, assumes the heavy responsibilities of prime minister. His every act at court demonstrates the subtlety of his genius and the goodness of his soul. Ogled by women and praised by all in the kingdom for his fairness in settling long-standing disputes, *Zadig* appears to enjoy all the good fortune that fate could possibly bestow on him. He even succeeds in arranging a truce between two religious sects that have quarreled for fifteen hundred years over which foot—left or right—one should first use to enter the holy temples.

In spite of all the rewards and praise *Zadig* receives as prime minister, he continues to reflect upon the precariousness of his own good fortune and the tricks that life has played on him in the past. As prime minister, *Zadig* believes the laws of Persia must be applied evenly to protect the innocent. Still, these laws are not able to quell the fanaticism and ridiculous quarrels that seem to presage the fall of Babylon. As if to underscore the validity of *Zadig's* personal and political fears, Voltaire has *Zadig* fall hopelessly in love with the wife of the jealous king, the beautiful and sensuous Queen Astarte. Then, because of war and competing factions within the country, all Persia is thrown into social and economic chaos. The reader of Voltaire's tale cannot miss the striking similarities, first between Voltaire's own romantic adventures and those of *Zadig*, and then between France's dismal political condition and that of Persia. Voltaire, of course, makes little attempt at accurately describing the Middle East; his purpose instead is to explore the human condition, the questions of human freedom and determination, and to attack the

political stupidities and excesses of his own country, France.

The wise and just Zadig is forced to flee for his life from Babylon. He seeks asylum in Egypt. During his flight, he reflects upon humankind: "He pictured men as they really are, insects devouring each other on a little patch of mud." Though he remains a champion of light and reason, he encounters only brutality and prospering scoundrels on his voyage. After rescuing a woman from a savage beating by her husband, he is condemned to be sold as a slave. On another occasion, he persuades the women of Arabia that there is no reason to practice the custom of burning themselves on their husbands' funeral pyres; for this, he incurs the enduring wrath of the priests, who collect the women's jewelry from the ashes. Wherever he travels—from Egypt to Arabia to the Isle of Serendib and back to Persia—Zadig gives wise and excellent counsel and saves women, men, and even kingdoms from disaster. He, however, can neither find personal happiness (he still yearns for the beautiful Astarte) nor understand why dishonest and corrupt people appear to prosper. The ways of Providence remain a deep and disheartening mystery to him.

While spending time with a prosperous brigand chief, Zadig learns that King Moabdar has been killed and that confusion reigns in Babylon. Arbogad, the brigand, repeats to Zadig that he (Arbogad) is the happiest of men, and he exhorts Zadig to follow his example. Zadig declines the offer to associate himself with one of the richest thieves of the East. He leaves the robber's castle, plunged more deeply than ever in his mournful reflections about the sadness of life. He is grief-stricken to think that Astarte may have perished in the riots of Babylon.

On the road back to Babylon, Zadig sees a lady on the bank of a little stream. As he approaches, he notices that she is tracing, with a small stick, a name in the fine sand. To his astonishment, the name he reads is his own: Zadig. The lady is Astarte herself, the woman whom he adores and for whom he has returned to Babylon. Zadig, filled with joy, throws

himself at her feet asking, "Can it be true? Immortal powers that preside over the destinies of frail mortals, do you give me back Astarte?" Chance has reunited the two lovers. Both recount their misadventures, and Zadig tells Astarte by what accident he happened to be walking along the banks of the little stream.

Although together again, Zadig and Astarte must yet undergo a number of trials and adventures before finally becoming the monarchs of Babylon. Zadig is obliged to participate in a medieval joust and to solve a number of riddles proposed by the Magi of the city. Before taking part in the knightly tournament, however, Zadig happens upon a hermit who speaks to him of fate, justice, and ethics and then proceeds to burn a home and murder a young man. The hermit fantastically transforms himself into the angel Jesrad and tells an astonished and angered Zadig that all on earth is meant to be and that events transpire as they must; what appears to be chance is not, and Zadig should go on his way to Babylon.

Voltaire ends his tale in both an ambiguous and a positive fashion: Zadig, as a mere human, cannot hope to understand why Providence acts in certain ways. Zadig could not know that a treasure is buried under the burned home or that the young man, if allowed to live, would kill his aunt in a year's time and Zadig in two. In his story, Voltaire leaves unanswered the recurrent metaphysical questions asked by Zadig, questions about the nature of free will and the existence of evil in a universe created by a supreme Being. In an obvious optimistic conclusion to his tale, however, Voltaire describes the just Zadig and the intelligent and beautiful Astarte presiding over the peaceful and bountiful kingdom of Persia. In his philosophical tale *Candide* (1759), written some twelve years later, both Voltaire's narrative tone (in *Zadig* only mildly satirical for Voltaire) and his views on metaphysical optimism and Providence would change dramatically. From an enlightened kingdom in Persia to the small garden plot of *Candide*, the journey is long and discouraging.

## CANDIDE

**First published:** *Candide: Ou, L'Optimisme*, 1759 (English translation, 1759)

**Type of work:** Philosophical tale

*Through a long series of misadventures and catastrophes, Candide searches for his beloved Cunegonde.*

*Candide: Or, All for the Best* is Voltaire's most widely known work and one of the most widely read pieces of literature written in the French language. Voltaire invented the philosophical tale as a means to convey his own ideas and, at the same time, entertain his readers with satirical wit and ironic innuendo. Candide (the name refers to purity and frankness) is the tale's main character. He embodies the philosophical idea of optimism that Voltaire intends to oppose.

As the story begins, Candide is forced to leave Wespshalia because he has been caught kissing the baron's daughter, the beautiful Cunegonde. Candide is driven from the splendid castle of the Baron Thunder-ten-tronckh, where Doctor Pangloss has been Candide's tutor and has taught him that all is well in this "best of all possible worlds." Little time passes before the naïve Candide finds himself conscripted into the Bulgarian army. As a soldier, he witnesses firsthand the terrible atrocities of war. Escaping to Holland, he miraculously encounters Pangloss, who is himself in a pitiful physical state. From the ever-optimistic philosopher, Candide learns that his former home in Germany has been burned to the ground and that all of those inside have been massacred by the advancing Bulgarian army.

Voltaire continues to narrate his story with a cascade of adventures. He nonetheless keeps close to the principal reason for telling his tale: discrediting the metaphysical idea that all that happens on earth has been determined by Providence and therefore must be judged as being for the good of humankind. Pangloss, who has lost part of his nose and one eye to syphilis, continues to insist that all is going well in spite of overwhelming adversity. Candide and Pangloss travel to Lisbon, where they arrive just in time to experience the famous earthquake of 1755. Not only are they caught in Portugal

during this natural disaster, but they also become embroiled in the Inquisition. Only by the reappearance and intervention of Cunegonde is Candide saved (Pangloss is a presumed victim of the Inquisition). In rescuing Cunegonde, however, Candide must kill an Israelite and the Grand Inquisitor.

Candide, Cunegonde, and an old woman (the daughter of Pope Urban X) flee to South America. Even there, they are tracked by the agents of the Inquisition; Candide and Cunegonde must separate or risk being burned at the stake. Candide takes refuge in Paraguay, the kingdom of the Jesuits, where "Los Padres have everything and the people have nothing." Candide comes upon Cunegonde's brother among the Jesuit leaders. They quarrel because Candide, in spite of his humble origins, insists on marrying the young baron's sister. Candide wounds him, apparently mortally, and again takes flight with his valet and companion Cacambo.

Throughout all the journeys of Candide, who next discovers Eldorado (the city of gold and precious jewels), Voltaire delights in attacking the excesses of humankind—from the brutality of wars to the ignoble institution of the Inquisition. In order to emphasize tolerance and moderation, Voltaire presents characters that are immediately identified as representing extreme philosophical positions: Pangloss (who reappears at the end of the story in Constantinople) holds tenaciously to an absurd optimism, and Martin (Candide's companion on his trip back to Europe and on to Constantinople) affirms with equal stubbornness that there is little virtue and happiness in a world filled with evil.

While in Venice, Candide learns that his once-beautiful Cunegonde is now washing dishes on a riverbank for a prince in Turkey. From Cacambo, he hears that Cunegonde has even grown ugly and ill-tempered. Still, being an honorable man, Candide intends to marry Mlle Cunegonde, and he sets off immediately for the Turkish city. While en route, he finds Pangloss and Cunegonde's brother (resuscitated) among the galley slaves on the Turk-

ish boat. Candide still possesses some of the diamonds that he carried away from Eldorado and is able to buy his friends' freedom. As chance would have it, all the characters of this tale end up living together on a small vegetable farm somewhere on the outskirts of Constantinople. Candide's money is exhausted, Cunegonde grows more unendurable, Cacambo curses his fate as a vegetable seller, Pangloss despairs because he is not teaching in a good German university, and Martin persists in seeing humankind caught in either the throes of distress or the doldrums of lethargy. Candide does not agree, but he no longer asserts anything. Instead of arguing metaphysical and moral questions, he heeds the advice of an old man who tells him, "work keeps at bay three great evils: boredom, vice and need." From this lesson, Candide concludes "that we should cultivate our gardens." In the end, the little farm yields well, and all eat candied citrons and pistachios. Voltaire ends the tale, on a

note of neither pessimism nor optimism, with his characters working and living in peace together.

## SUMMARY

The philosophical tales of Voltaire stand as a tribute to both Voltaire's ability as a writer and storyteller and his genius in summarizing the principal philosophical and political questions of the eighteenth century. After more than two hundred years, *Zadig* and *Candide* remain entertaining pieces of reading because of their author's sardonic intelligence and crystalline prose. In many respects, Voltaire remains today what he was for his own century: a popularizer and disseminator of ideas. The Voltairean spirit, with its quick and bright outbursts of wit, continues to attack the modern scourges of intolerance, fanaticism, and injustice.

James Gaasch

## BIBLIOGRAPHY

### By the Author

#### LONG FICTION:

*Zadig: Ou, La Destinée, Histoire orientale*, 1748 (originally as *Memnon: Histoire orientale*, 1747; *Zadig: Or, The Book of Fate*, 1749)

*Les Guèbres: Ou, La Tolérance*, pb. 1769

*Sophonisbe*, pb. 1770, pr. 1774 (revision of Jean Mairet's play)

## DISCUSSION TOPICS

- What were the most important things that Voltaire learned in England?
- Is the happy ending of *Zadig*, based on intellectual sluggishness—the failure to pursue answers to metaphysical questions—an ironical one?
- What was Voltaire's purpose in writing *The Age of Louis XIV*?
- How does Voltaire account for Candide's optimism? Was it primarily a matter of the education he received?
- What does Voltaire signify by Candide's conclusion "that we should cultivate our gardens"?
- Why was Voltaire's thought attacked by followers of Jean-Jacques Rousseau?

## DEREK WALCOTT

**Born:** Castries, St. Lucia, West Indies  
January 23, 1930

*Walcott is widely regarded as not only the finest Caribbean poet but also one of the finest English-language poets of his generation.*

### BIOGRAPHY

On January 23, 1930, Derek Alton Walcott and his twin brother, Roderick Alton Walcott, were born to Warwick and Alix Walcott on the Caribbean island of St. Lucia, in the West Indies. In addition to his twin brother, he had an older sister, Pamela. Walcott was born into a Methodist family while most of his neighbors were Catholic, the legacy of long French colonial rule. In April, 1931, Walcott's father, clerk of the First District Court, died, leaving Alix Walcott, the headmistress of the Methodist Infant Day School, to rear the children. With two white grandfathers and his family's economic and religious status, Walcott was caught between races and classes.

Four influences shaped his aesthetic growth: his formal English education, his talent as a painter, the life of the island itself, and his religious background. His colonial education was thorough, including Greek and Latin and the essential European masterpieces. Following his father's talents, Walcott was as interested in painting as in literature. His mentor, the local painter Harry Simmons, recognized that Walcott's talents as a writer surpassed his talents as a painter and guided him through the transition from painting to poetry. His poems are replete with the language and actions of fishers and peasants, as well as the acute observations of the natural world. His religious back-

ground also served to train him for the craft of poetry, and, as he asserts in an interview in *Paris Review*, "I have never separated the writing of poetry from prayer. I have grown up believing it is a vocation, a religious vocation."

When Walcott was fourteen, his first poem was published in a newspaper. Four years later, in 1948, he sold his privately printed *Twenty-five Poems* (1948) on the streets to repay his mother, who had provided for printing costs. In 1950, his first significant play, *Henri Christophe: A Chronicle* (pr., pb. 1950), was produced by the St. Lucia Arts Guild. The play's subject was Henri Christophe, who, with Toussaint-Louverture and Jean-Jacques Dessalines, led the only successful slave revolt in the Caribbean, resulting in the creation of the nation of Haiti. Also in 1950, Walcott, on a British Colonial Development Scholarship, left for the University of the West Indies in Jamaica. In 1951, his collection *Poems* was published. After receiving his B.A. in 1953, he moved to Trinidad, where he worked as a book reviewer, journalist, and art critic while continuing his work as a playwright and poet. In 1954, Walcott's play *The Sea at Dauphin* (pr., pb. 1954) was produced. Also that year, he married Faye Althea Moston; the couple divorced in 1959. In 1957, he received a Rockefeller Fellowship, which took him in 1958 to New York City, where *Drums and Colours* (pr. 1958, pb. 1961) was performed for the First Parliament of the West Indies.

In 1959, Walcott founded the Trinidad Theatre Workshop, and his play *Malcochon: Or, Six in the Rain* (pr. 1959, pb. 1970) was produced. The year after receiving the Guinness Award for Poetry in 1961, Walcott's collection *In a Green Night: Poems, 1948-1960* (1962) was published, bringing him in-

ternational attention. In 1962, he married Margaret Maillard. The 1960's saw the publication of *Selected Poems* (1964), *The Castaway, and Other Poems* (1965), and *The Gulf, and Other Poems* (1969). In each of these volumes, Walcott's poetry continues to move from the more stilted and conventional language of *In a Green Night* to such distinct lyrics as "Coral," "The Swamp," "The Gulf," and "Crusoe's Journal." These poems show Walcott not controlled by technique but controlling technique to fully express his vision.

By the mid-1960's, Walcott had become a frequent traveler to North America to oversee the production of his plays and to teach. His most important play, *Dream on Monkey Mountain* (pr. 1967, pb. 1970), premiered in Toronto in 1967; it was awarded an Obie in 1971. Its central character, Makak, is a figure who not only is repressed by a slave society but who also expresses the primal connections between the peasant or folk culture and the landscape.

Walcott's book-length autobiographical poem, *Another Life* (1973, expanded, 2004), demonstrates how he connects his life, his art, and the ocean. Divided into twenty-three chapters, the poem is a retrospective view of his process of becoming an artist, his growing political awareness and disenchantment, the loss of innocence, and the ever presence of the sea. In 1976, *Sea Grapes* was published, followed three years later by *The Star-Apple Kingdom* (1979). In these volumes of poetry, his understanding of the Caribbean is the most lyrical. With his 1981 collection of poems, *The Fortunate Traveller*, his sense of the division between North America and the Caribbean, of being displaced and unempowered because of his rootlessness, creates an ironic cast to his identity as a "fortunate traveller."

Walcott's training as a painter merges with his 1984 collection of poems, *Midsummer*. In this fifty-four poem sequence, Walcott traces a year from summer to summer. His *Collected Poems, 1948-1984* appeared in 1986, followed in the next year by *The Arkansas Testament* (1987). This collection, like *The Fortunate Traveller*, is divided between the Caribbean and elsewhere; as in that earlier volume, Walcott explores his identity as an outsider, as well as the conditions of a collapsing empire. Walcott's second book-length poem, *Omeros*, was published in 1990. The title, the Greek name for Homer, invokes the web of connections with which Walcott

has worked throughout his career. It overlays a variety of personas and histories, most centrally Achilles, a fisherman who sets out on a quest for self-identity. Through Achilles, various layers of history are enfolded, including classical, Caribbean, and literary; in him also exists the history of the exile, the one who must test boundaries in order to establish identity. Achilles is prefigured in Walcott's earlier work, particularly in the persona of Shabine in "The Schooner *Flight*" (from *The Star-Apple Kingdom*) and the autobiographical voice in *Another Life*.

The death of his twin brother in 2000 caused Walcott to muse on his mortality and specifically his literary legacy in the collection *The Prodigal* (2004). Much like *Midsummer* and *The Fortunate Traveller*, *The Prodigal* records a physical journey across Europe and America colored by the knowledge of these place's history and literature. Walcott insists that it is the poet's task and his privilege to give place to history but remains fearful of that burden.

Some of Walcott's other plays include *The Charlatan* (pr. 1974), *O Babylon!* (pr. 1976, pb. 1978), *Remembrance* (pr. 1977, pb. 1980), *The Isle Is Full of Noises* (pr. 1982), and *Beef, No Chicken* (pr. 1981, pb. 1986). His interest in drama informs his poetry. Many of his poems are constructed in the form of a dramatic monologue, where the poem's voice is a fully conceived dramatic persona. In 1981, Walcott received the prestigious MacArthur Fellowship and in 1988, the Queen's Medal for Poetry. In 1992, he was awarded the Nobel Prize for Literature for "a poetic oeuvre of great luminosity, sustained by a historical vision, the outcome of a multi-cultural commitment." In 2008, he continued to divide his time between Boston, teaching at Boston University, St. Lucia, and Trinidad.

## ANALYSIS

The Russian-born poet Joseph Brodsky has written, in regard to Walcott's work, that "Poets' real biographies are like those of birds, almost identical—their real data are in the way they sound. A poet's biography is in his vowels and sibilants, in his meters, rhymes and metaphors." If this is true, then Walcott's biography is indeed a rich and varied one, for he is a master of metaphor, image, meter, and rhyme. Walcott's technical abilities are not the source of his power as a poet; rather, his power lies

in the full realization of language in its historic, cathartic, and revelatory condition. Walcott's major themes are time, ocean, and language. Each of these is linked to the others in inextricable ways. Time implies not only history but also the measured beat of poetry. That leads to language, which of course is history, memory, poetry, and creation. The ocean throughout Walcott's work provides life and sustenance; the ocean is also history, for that is what both Shabine of "The Schooner *Flight*" and Achille of *Omeros* discover in their oceanic quests. The ocean holds memory and life; as such, it is also language.

All of these concerns hinge on identity. In "Names," from his collection *Sea Grapes*, Walcott opens with, "My race began as the sea began,/ with no nouns and with no horizon." Walcott consistently investigates his status as not only a colonial but also a colonial of African descent. His race—that hybrid that Shabine defines as, "I have Dutch, nigger, and English in me,/ and either I'm nobody, or I'm a nation"—is new, and thus the poet occupies the position of Adam or Orpheus. The poet's excitement at this "edenic" possibility, what he often calls the "elemental" or the "numinous" power of naming, is tempered by the psychological reverberations certain to afflict humans struggling to establish an identity.

Also in "Names," Walcott alludes to the Middle Passage, that nightmarish journey across the Atlantic Ocean and the culminating dispersal of the slave auctions. This history informs "Names" and much of Walcott's work. One's name and one's family were discarded and new names were imposed. Walcott finds in his contemporary subjects a deep historical sense of exile, where one is driven into the solitariness of the self.

In his early poem "A Far Cry from Africa," Walcott poses the question of how to choose between his African heritage and the language of his poetry, colonial history, and tradition. Furthermore, he asks how he could live if he did turn his back on Africa. These questions reveal the difficult balance that he faces as a poet, who, by circumstance, belongs to differing and exclusive traditions. If the poem "Names" poses the question of self-identity, "A Far Cry from Africa" questions the identity of the historical self. To live in the world, Walcott argues, a poet must address the conditions of his or her history. This mandate is especially true

for the colonial who is defined by so many disparate histories.

Walcott continually attempts this process through his use of metaphors and images of the natural world. This persistent necessity to name and to provide metaphors for phenomena, and therefore extend the process of naming by drawing similarity out of difference, is found throughout Walcott's work. Metaphor attempts to uncover and generate the truth or essence about phenomena. Metaphor works against the force of oblivion. The terms that colonial powers use to describe the people and ecology of their colonies—marginal, unimportant, provisional—indicate the force of oblivion against which Walcott struggles. By persistently drawing his Antillean archipelago into a metaphoric relationship with the Greek archipelago and all the implied foundations of Western culture, Walcott is able to provide a history and importance to the Antillean world. He is, however, distrustful of the postcolonial movement and especially the term *diaspora* often used to describe similar literary efforts. He prefers the more local metaphors specific to the Caribbean.

Walcott's poetry reflects the lushness of his childhood landscapes, as in these lines from *Another Life*, "growths hidden in green darkness, forests/ of history thickening with amnesia." Yet what his profoundly painterly eye realizes is the misunderstanding of this tropic lushness. The northern, metropolitan vision is portrayed by him as creating stereotypes of the Caribbean world and its people: The Caribbean becomes a tourist's Eden, a place filled with joy, where tragedy seems impossible, stereotypes that deny identity to the transplanted natives. Walcott's poetry reflects the cycle that he believes exists between landscape, language, and history. Cultures arise from their settings. As they become civilized, they require priests and poets to name those settings and transform them into religious or metaphorical cultural values. However, a mature civilization, whether for better or worse, will transcend both the setting and the metaphor. Walcott transforms his European tradition and education into that of the reality of his geography, as in the poem's concluding lines, "Then, in the door light: not Nike loosening her sandal,/ but a girl slapping sand from her foot, one hand on the frame." In this Caribbean world of sea and light and extraordinary lushness counterbalanced by

centuries of poverty, Walcott recognizes the potential—or rather, the beginnings—of a new world, aware that his words might one day become obsolete to the people and the land he loves.

### “CODICIL”

**First published:** 1965 (collected in *The Castaway, and Other Poems*, 1965)

**Type of work:** Poem

*Walcott argues that language and life are inextricable; to change one, the other must change.*

“Codicil,” which appeared in his 1965 collection *The Castaway, and Other Poems*, is an autobiographical poem of thirty lines composed in varied stanzaic forms. The poem is a meditation on identity. Its title, referring to an addendum to a will, implies an awareness of mortality; thus, the poet takes account of himself. The poem’s tone is both angry, reflecting some of his earlier work, such as “A Far Cry from Africa,” and exhausted or dispirited, forecasting the mood of many of his poems in *The Fortunate Traveller* and *The Arkansas Testament*. Walcott was a journalist during the early 1960’s, and this poem reflects the sense of frustration that most writers feel when faced with dividing their language into two styles, “one a hack’s hired prose, I earn/ my exile.” The poet’s exile is his exile from poetry. Later, this exile will become a self-imposed exile from the Caribbean.

The poet is weary, exhausted by the world’s cares and demands, as well as his past failures. The poet states in the seventh line that, “To change your language you must change your life.” The most significant line of the poem, this line serves to challenge his position and to reveal the direct relationship between one’s language and the quality of one’s life. The growth of a poet’s voice demands a continual change and self-examination of one’s language and life. The line implies that one constitutes his or her world through language: Language defines reality.

The poem continues with images of inescapability—“Waves tire of horizon and return”—and physical decay. On this moonlit beach in Tobago,

the poet considers that once he thought love for the country was enough. The country is both nation and poetry; in each case, the poet sees nepotism and corruption. Walcott argues that writers, like colonial clerks, “root like dogs/ for scraps of favor” from the masters, particularly the European hierarchy.

The poem shifts from this outwardly directed anger and social critique to a self-critique. Middle-aged and self-critical, the poet literally enacts “Peer Gynt’s riddle,” where, in Henrik Ibsen’s play *Peer Gynt* (pb. 1867, pr. 1876; English translation, 1892), Gynt likens the layers of an onion to his own character and finds nothing at the core. The poet scornfully admits that the “hack’s hired prose” has dulled him and that “At heart there’s nothing.” The world’s familiarity has inured the poet to violence. Although the flesh or the body is on fire with anger, the poet no longer fears “that furnace mouth of earth” or “that kiln or ashpit of the sun” or the passage of time, “clouding, unclouding sickle moon.” Although consumed by rage, directed both inwardly and toward the political world, this rage is expressed by indifference. The final line, “All its indifference is a different rage,” suggests nihilism. The only other line that is set apart like this final line, however, formulates the means of change: “To change your language you must change your life.”

### “THE SCHOONER FLIGHT”

**First published:** 1979 (collected in *The Star-Apple Kingdom*, 1979)

**Type of work:** Poem

*In this long dramatic monologue, Shabine tells of his voyage across the Caribbean and into history, dream, and myth.*

“The Schooner *Flight*” appears in Walcott’s *The Star-Apple Kingdom* (1979). The poem is perhaps his most celebrated persona poem, as well as one of his most accomplished longer poems. Nearly five hundred lines long, the poem is divided into eleven sections of varying length. The poem’s main speaker and central figure is Shabine, who describes himself in the first section as “just a red nigger who love

the sea, . . . I have Dutch, nigger, and English in me,/ and either I'm nobody, or I'm a nation." This description fits Walcott, who, although of African descent, is also of English and Dutch ancestry. What Shabine underscores is the complex mix that defines an individual in a colonial society and defines the society itself. Nicknamed by his society, Shabine becomes an Everyman.

In this persona poem, Walcott creates a figure who is compelled to tell his story. In many ways, *The Rime of the Ancient Mariner* (1798) by the English Romantic poet Samuel Taylor Coleridge is a precedent for Walcott's poem. Both are dramatic monologues narrated by one who has ventured into the ocean and has undergone a transforming experience. Coleridge's poem, however, explores the mariner's transgressions against nature, whereas Walcott's Shabine confronts history. Shabine is also an Odysseus. Like the *Odyssey* (c. 725 B.C.E.; English translation, 1614), the poem traces Shabine's journey from island to island in the Caribbean Sea.

The first section, "Adios, Carenage," is rich in image and detail of the island that Shabine leaves. Disgusted with the corrupt postcolonial politics, Shabine leaves on what is a quest of purification. The second section, "Raptures of the Deep," describes Shabine's past as a smuggler double-crossed by his employer, a corrupt official. Shabine then describes in phantasmagorical detail his work as a salvage diver. In the rapturous descriptions of the sea, Shabine reveals the enchantment that the sea has cast over him.

In both sections, Shabine is torn between the sea and his lover, Maria Concepcion. To stay with his lover is to remain confined to the island and not explore the ocean, which is the realm of potentiality and poetic imagination. At the end of the second section, in the throes of the rapture of the deep, Shabine sees God in the form of a harpooned grouper and hears a voice telling him to leave Maria. In the third section, "Shabine Leaves the Republic," Shabine's disgust with the politics of the Caribbean deepens, as does his despair over Maria.

The fourth section, "The *Flight*, Passing Blanchisseuse," is a short but lyrical section describing a beach, "bare of all but light," seen from the schooner; as night approaches, "dark hands start pulling in the seine/ of the dark sea, deep, deep inland." This passage is typical of Walcott's ability to create

metaphors that work on a variety of levels: visual imagery, rhythmic melody, and juxtaposition of disparate phenomena. The image of the night being compared to the work of fishermen pulling in the seine net, itself a metaphor for the sea, creates a brief narrative or myth.

The fifth section, "Shabine Encounters the Middle Passage," describes a hallucinatory vision of "a rustling forest of ships/ with sails dry like paper." On the decks of these ghostly ships, he sees all the great admirals and hears the orders shouted to his ghostly counterparts. At the end of this section, he passes the slave ships from a variety of nations and knows that sequestered below their decks are his forebears, who cannot hear his shouts.

The sixth section, "The Sailor Sings Back to the Casuarinas," is an orphic moment in the poem, where Shabine questions the nature of names. That, of course, is a central theme in the poem, beginning with the history of Shabine's own name, the pun on Maria Concepcion's name, and Shabine's rhetorical question upon seeing the slave ships in the fifth section, "Who knows/ who his grandfather is, much less his name?" Looking at the graceful, wind-bent gray pines known variously as cedars, cypresses, and casuarinas, Shabine reflects that "we live like our names and you would have/ to be colonial to know the difference,/ to know the pain of history words contain." Shabine reveals the full irony of such a homily when he quotes, "'if we live like the names our masters please,/ by careful mimicry might become men.'"

"The *Flight* Anchors in Castries Harbor," the seventh section, introduces Shabine as poet. The next section, "Fight with the Crew," depicts the crew mocking Shabine's poetry and his fight to regain possession of his poetry notebook. Again, it is another manifestation of Shabine's struggle to define himself. The ninth section, "Maria Concepcion and the Book of Dreams," continues Shabine's quest; this leg of his journey takes him from St. Lucia to Dominica. The section begins by describing the illusion of progress, which prompts Shabine's historical memories and imagination to fuse in a vision of an escaping Carib running through the tropical forest. The section then turns to a vision of Maria Concepcion's "Book of Dreams," which prophesies an apocalyptic storm. This vision empowers Shabine, who states with almost biblical force, "I shall scatter your lives like a handful of

sand,/ I who have no weapon but poetry and/ the lances of palms and the sea's shining shield!"

The prophesied storm arrives in the tenth section, "Out of the Depths." With the passage of the storm and the ensuing calm comes dispensation. In the eleventh and final section, "After the Storm," Shabine has a vision of Maria marrying the ocean and drifting away. She has been figuratively swept away by the storm. Shabine transforms this loss into a form of spiritual compensation. After that moment, Shabine wants nothing, as he has attained a sense of wholeness or union with nature. The poem asserts a lyrical unity, where voice and creation are one: "Shabine sang to you from the depths of the sea."

### "THE FORTUNATE TRAVELLER"

**First published:** 1981 (collected in *The Fortunate Traveller*, 1981)

**Type of work:** Poem

*The poem is a meditation on the twentieth century's cataclysmic history.*

"The Fortunate Traveller," the title poem of a volume of Walcott's poetry, is divided into 4 sections and is 208 lines long. Dedicated to the American writer and philosopher Susan Sontag, best known for her analyses of culture, as in *Illness as Metaphor* (1978), the poem is in many ways a catalog of the failures of civilization to be humane. The narrator of the poem is indeed the ironic "fortunate traveller," a play on the English satirist Thomas Nashe's picaresque tale, *The Unfortunate Traveller: Or, The Life of Jack Wilton* (1594). Walcott's traveler, like Nashe's, is an emissary between powers. Furthermore, Walcott has created in this persona someone of ambivalence and moral relativity; while able to recognize the horrors of the Nazi concentration camps, the narrator is indifferent to the poverty of the Third World. In his indifference, he becomes an immoral fortune seeker and an emissary of famine.

The opening lines of the poem immediately convey the physical and spiritual decay of Europe, which describes Walcott's ambivalence with the industrialized West. The first section describes the

narrator's double-crossing of two officials from an impoverished country. The narrator becomes an incarnation of famine. He carries a briefcase that is likened to "a small coffin." Throughout this section of the poem, images of despoliation occur: A jet is likened to a weevil in a "cloud of flour," and governmental bureaucrats are "roaches/ riddling the state cabinets, entering the dark holes/ of power, carapaced in topcoats." The narrator has no mercy; he goes to Bristol to be paid "Iscariot's salary, patron saint of spies./ I thought, who cares how many million starve?" In the concluding stanza of this section, the narrator sees in the genuflecting officials with whom he has dealt the repetition of previous corrupt orders stretching back historically to the conquest of Florida by Juan Ponce de León and apocalyptically to the locust plagues in the Bible.

In the second section of the poem, the narrator confronts the poverty of a church service in St. Lucia conducted by a frail and disreputable priest. Walcott juxtaposes this image to that of Albert Schweitzer, the medical missionary in Africa, at his harmonium. Walcott then allows the music, beginning with the choristers in St. Lucia and continuing with Schweitzer, to carry "to the pluming chimneys" of the Nazi death camps. The allusion to "lebensraum," or space required for life, refers to the geopolitical theory used by the Nazis to justify their territorial expansion, which implicitly applies to the European and North American control of the Third World. The poem then argues that "the heart of darkness is not Africa" but "the white center of the holocaust." The second section concludes with the argument that, if God is so indifferent to His creation, then one should now write "After Dachau," not *anno Domini*.

The third section continues to develop this morally terrifying character, who argues for keeping the hungry ignorant and deceived by the false promises of religion, so that like lice they will "swarm to the tree of life." The argument concludes that "we cared less for one human face/ than for the scrolls in Alexandria's ashes." That is the "ordinary secret" of inhumanity that the narrator reveals. The narrator sees in European civilization a failure of compassion; he is able to recognize it because of his own moral indifference.

In the final section, the narrator's double-crossing is discovered. The final two stanzas be-

come prophetic and serve to reinforce the poem's epigram from Revelation. The hypocrisy of the industrialized, postcolonial world is inscribed in this prophecy: "the weevil will make a sahara of Kansas,/ the ant shall devour Russia." This poem is one of Walcott's strongest condemnations of the industrialized world powers.

**"I ONCE GAVE MY  
DAUGHTERS, SEPARATELY,  
TWO CONCH SHELLS . . ."**

**First published:** 1984 (collected in  
*Midsummer*; 1984)

**Type of work:** Poem

*This is a lyric meditation on writing,  
continuity, memory, and love.*

This untitled poem is the fiftieth poem in a sequence of fifty-four poems that constitute the midsummer to midsummer movement in the collection *Midsummer* (1984). It invokes Walcott's central themes of language, exile, and art. Yet to these the theme of love must be added. In this poem, as in so many of his other poems, the image of the ocean is primary. In the poem's twenty-three lines, Walcott moves from a memory of two conch shells that he gave to his daughters to the poetry that he wrote when he was the age of his daughter Elizabeth to his mature poetry. The poem then shifts to a memory of his father and the irony of his name. The poem concludes with a layering of movements, each reflecting the others.

As with all the poems in this collection, the poem's lines are long, often containing more than fourteen syllables. Such long lines allow for rumination, the overall tone or mood of this poem. The poet speaks directly to the reader, offering both confession and a sense of thinking aloud. The long lines also suggest an inclusiveness that may approximate prose. Most central, however, is their mnemonic quality.

The poem begins with conch shells "dived from the reef, or sold on the beach": gifts from the sea. In their "wet/ pink palates are the soundless singing of angels." The term "palates" is a homophone

for the painter's palette; thus, Walcott has combined the angelic sound of the sea, part of the mouth that allows for speech and poetry, and painting. He recommences the poem, linking himself with his daughter, not through a gift but through remembering what he did at her age. This memory forces a realization of his distance from youth.

He reflects on his poetry, stating that his poems "aren't linked to any tradition/ like a mossed cairn," but that each poem belongs to the collective memory and unconscious, as well as to the world's collective history. His poems belong to the sea insofar as they are also natural processes. He relinquishes his poems to the sea or the collective memory. Walcott asks of the poems to let him enter them as his "father, who did watercolors,/ entered his work," becoming "one of his shadows,/ wavering and faint in the midsummer sunlight." Walcott asks that his works contain a shadow of his presence, thereby providing a stay against oblivion. He sees his grandfather, who named Walcott's father Warwick, after Warwickshire, inscribing the continuity of the memory of one's origins in a name.

"Ironies are moving," Walcott writes, and then immediately translates that emotion into physical action:

Now, when I rewrite a line,  
or sketch on the fast-drying paper the coconut  
fronds  
that he did so faintly, my daughters' hands move  
in mine.  
Conches move over the sea-floor. I used to move  
my father's grave from the blackened Anglican  
headstones  
in Castries to where I could love both at once—  
the sea and his absence. Youth is stronger than  
fiction.

In these final lines of the poem, Walcott draws together all the strands of the poem's images. Though the poem strikes an elegiac tone, it also seeks an affirmation in the very act of writing. Although the final sentence of the poem suggests *carpe diem*, it should be understood ironically for both youth and youth's sense of immortality passing.

## OMEROS

**First published:** 1990

**Type of work:** Poem

*Through this epic, the poet hopes to heal the wound of history absent a natural remedy for humanity's ambition.*

Walcott's epic poem *Omeros* explores humanity's relationship to history and nature. Both have been corrupted by man's ambition, leaving humanity deeply wounded. The affliction is physical for the St. Lucia fisherman Philoctete, whose ankle has been crippled by a rusty anchor. This is both an allusion to Philoctetes, the title character of Sophocles' play *Philoctētēs* (409 B.C.E.; *Philoctetes*, 1729), and to the shackles worn by African slaves. The wound leaves Philoctete unable to make boats, go fishing, or even cultivate his garden, and so he seeks solace in the white rum of forgetfulness at Ma Kilman's No Pain Café.

The proprietress is described as an African sibyl; that is, a native, tribal medicine woman, as well as the priestess of Apollo who guides Aeneas through the underworld in Vergil's epic poem the *Aeneid* (c. 29-19 B.C.E.; English translation, 1553). It is her ability to restore tribal rituals that finally affords Philoctete some relief. That remedy is not available to the British officer Major Plunkett, who retired to the tropical island with his Irish wife Maud. He, too, carries a wound, sustained in the skull during General Bernard Law Montgomery's campaign in Northern Africa, symbolic of his love for the exotic and complicated by imperial guilt and his fear of dying without a legacy. These conflicting emotions lead him to research the island's history rather than celebrate its nature, and so, as his wife dies from cancer, he buries himself in his work.

It is the fate of a blind cripple that the poet fears for the entire modern world. The poet consists of an amalgamation of voices: the blind island native,

Seven Seas; the historical bard Omeros, or Homer; a series of sounds emerging from nature herself; and Derek Walcott. The poet's travels—literary, imagined, and real—to Europe, Africa, and America have left him scarred with the pain of humanity's brutality, a problem he allegorizes in the main plot, which alludes to Homer's epic poem the *Iliad* (c. 750 B.C.E.; English translation, 1611). Achille and Hector, former fishermen and partners, are driven mad by their love for the beautiful Helen and their inability to make a decent living at their trade. While Achille dives illegally among the coral reefs, Hector drives a van, work that will prove far more dangerous than the sea. Achille's lingering connection with the ocean permits him to take an imaginary voyage to Africa, much like Dante's sortie through the Inferno in *La divina commedia* (c. 1320; *The Divine Comedy*, 1802). Achille's new-found tribal identity allows him to mourn Hector's passing, reunite with Helen, and raise the baby that may or may not be his.

The complex numerological divisions of books, chapters, parts, and stanzas allude no less densely to European literary history than the poem's characters, settings, and action, but like the island natives and the passions that drive them, the lush descriptions of flora and fauna and the long, graceful poetic lines are inspired purely by the tropical beauty of St. Lucia and the rhythm of the ocean that cradles her. Thus does Walcott aspire to effect the same healing powers invoked by the natives for a much more diverse but still deeply wounded modern, industrialized, and global audience.

### SUMMARY

Who inherits language and what powers come from that language and the circumstances of its inheritance? Derek Walcott's poetry and drama consistently address and explore this question. His use of image, metaphor, persona, rhyme, and meter are all marked by technical distinction. While the effects may falter in individual poems—metaphors that finally overreach, for example—the demands made upon language to sing are fully present. His themes of exile, language, art, memory, and love necessitate his rigorous brilliance. Finally, his sense of landscape, particularly of the Caribbean and the sea, informs his language.

## DISCUSSION TOPICS

- Derek Walcott often uses the image of a fruit, cut in half, and seamed by its own juices to describe the experience of identity undergone by a Caribbean islander. What elements of this metaphor are so fitting to Caribbean identity? What other metaphors does he employ to a similar effect?
- In what ways does Walcott's poetry seem to be a kind of prayer, as he himself described it?
- What specific images employed by Walcott seem to you to be influenced by his talent as a painter? Which ones seem affected by his playwriting?
- Although Walcott has traveled extensively and lived for long periods of time outside of the Caribbean, he still considers himself a Caribbean poet capable of commenting on the plight of poor Caribbean islanders. Using evidence from his own poetry, decide whether you agree with or oppose his position.
- In what ways do place and identity overlap for specific characters in *Omeros*? In what ways does identity transcend place?
- The fisherman is a common character in Walcott's verse. In what ways is the writing of poetry like the act of fishing? How are they different?

## EVELYN WAUGH

**Born:** London, England  
October 28, 1903

**Died:** Combe Florey, near Taunton, Somerset, England  
April 10, 1966

*Waugh, associated early in his career with the “bright young people” of the 1920’s and 1930’s, became the foremost satirist of his day and a principal critic of secular twentieth century society.*

### BIOGRAPHY

Evelyn Arthur St. John Waugh (waw) was born in London, England, on October 28, 1903, the second son of Arthur Waugh, author and managing director of the publishing firm of Chapman and Hall, and Catherine Charlotte Raban. Evelyn Waugh was five years younger than his brother, Alec Raban Waugh, who would also become a professional writer. The boys grew up in the London suburb of Hampstead, with Evelyn feeling very much overshadowed by his gregarious, good-natured, athletic brother. Evelyn’s writings, his correspondence, and anecdotal evidence clearly document a sibling rivalry that existed, on his part, for the rest of his life, while the elder brother appears to have harbored no such feelings whatsoever. After having been acknowledged for many years as a more eminent writer than his brother, Evelyn still bristled when an article suggested that Alec had sold more books than he.

Evelyn’s father and brother had attended Sherborne School, but Alec had been dismissed following a sexual misadventure. He then made matters worse, from the Sherborne point of view, by publishing *The Loom of Youth* (1917), a sensational exposé of public school life. Interestingly, Alec Waugh would go on to write more than forty books but would not duplicate the success of this first novel until the publication of *Island in the Sun*

(1956). At any rate, his explosion onto the literary scene made it impossible for his younger brother to attend Sherborne. Evelyn Waugh attended Lancing College, one of the less fashionable public schools, before going up to the University of Oxford, where he had gained a scholarship to Hertford College.

At Oxford, Waugh became a member of a set of intellectual and aesthetic dandies, several of whom would also have noteworthy literary careers. He dined and drank and enjoyed Oxford society enormously, while reading history in a desultory fashion. As a result, he left the university in 1924 with a modest third-class degree. Waugh tried several vocations before finally turning to the profession of his father and brother. He studied art, to which he was strongly attracted, and cabinetmaking—he would later say that he considered himself a craftsman who made books as another person might make furniture. He taught briefly at two obscure public schools and was profoundly unhappy as a schoolmaster—so unhappy, in fact, that he attempted to drown himself in the ocean. His suicide attempt, however, ended as ludicrously as a scene from one of his novels when he was stung by a jellyfish and forced to return, smarting, to the shore. His ineffective schoolteaching, though, did give him material for his first novel.

In the autumn of 1927, Waugh met and began to court Evelyn Gardner. The two were soon married on the strength of Waugh’s literary prospects. His first two books appeared in 1928. The first, *Rossetti: His Life and Works*, a study of the Pre-Raphaelite poet-painter and his circle, was a commercial fail-

ure. The second, *Decline and Fall*, was a madcap novel in the spirit of Voltaire's *Candide: Ou, L'Optimisme* (1759; *Candide: Or, All for the Best*, 1759). It spoofed Oxford, the public schools, and the penal system, which the novel's hero likens to an English public school. The novel pleased both the critics and the public, and Waugh's literary career was launched. His personal life, on the other hand, was in ruins.

After only two years of marriage, She-Evelyn, as his wife was called, left Waugh for another man. *Vile Bodies* (1930), Waugh's second novel, satirized the "bright young things" of London society. He and his wife had been very much a part of that frenetic, irresponsible way of life, and the novel was an ironic commentary on his own psychological devastation. Thereafter, the majority of his novels prominently featured unfaithful wives, indicating that he never really recovered from She-Evelyn's desertion. Waugh's two wildly comic novels had contained little-noticed religious themes, and in September, 1930, he was received into the Roman Catholic Church.

For the next seven years, Waugh traveled compulsively and had no fixed residence. He visited the Mediterranean, Africa, and South America. These wanderings did not grant him peace of mind, but they did give him material for three travel books, *Labels: A Mediterranean Journal* (1930), *Remote People* (1931), and *Ninety-Two Days* (1934), and for his next two novels, *Black Mischief* (1932) and *A Handful of Dust* (1934). In 1935, he returned to Africa as a war correspondent, subsequently publishing *Waugh in Abyssinia* (1936), whose punning title he neither chose nor liked. Out of that experience grew another comic novel, *Scoop* (1938).

In 1937, however, Waugh's personal life had taken a turn for the better. After a long and anxious wait for a papal annulment of his first marriage, he was finally free to marry Laura Herbert. She was Catholic, shy, much younger than Waugh; their marriage of almost thirty years produced six children. Still, within a few years, Waugh was off again, this time as a result of World War II. After much difficulty because of his age, he wangled a commission and served in combat on Crete and later as liaison to communist partisans in Yugoslavia. During the war, he published two novels, *Put Out More Flags* (1942) and *Brideshead Revisited* (1945, 1959). The latter has a romantic and nostalgic quality not

found in the earlier novels; it quickly became Waugh's most popular book, especially in the United States. His collection *Work Suspended, and Other Stories Written Before the Second World War* was published after the war in 1948.

Waugh believed that in entering the alliance with the Soviet Union his country had sold her honor to win the war. He found the postwar period just as disillusioning; the ascendancy of the Labour Party, with what he perceived as its pandering to class grievances, convinced him that Britain had become just another crude, secular modern state. His novels from the decade following the war reflect a deep pessimism: *Scott-King's Modern Europe* (1947), *The Loved One* (1948), *Helena* (1950), and *Love Among the Ruins: A Romance of the Near Future* (1953). *The Loved One* is ironically enlivened by a grotesque but hilarious representation of the California funeral industry. *Helena* is of some interest as his only historical novel.

Waugh set himself up as a country squire, first at Piers Court, Stinchcombe, in Gloucestershire, and later at Combe Florey in Somerset. *The Ordeal of Gilbert Pinfold: A Conversation Piece* (1957) is an autobiographical novel based upon a psychotic episode he experienced during this period. In 1959, he published *The Life of the Right Reverend Ronald Knox*, his second biography of a Catholic subject; the first had been the prizewinning *Edmund Campion: Jesuit and Martyr* (1935). His career as a novelist concluded with his war trilogy, *Men at Arms* (1952), *Officers and Gentlemen* (1955), and *The End of the Battle* (1961; also known as *Unconditional Surrender*). *Basil Seal Rides Again: Or, The Rake's Regress* (1963) is a slight novella, of interest primarily as Waugh's last work of fiction.

The aging Waugh had become profoundly depressed over the changes in the Roman Catholic Church coming from Vatican Council II. His death at Combe Florey from a massive heart attack occurred on April 10, 1966. Appropriately, he died on Easter Sunday, shortly after returning home from a traditional Latin mass.

## ANALYSIS

From the 1940's until his death, Evelyn Waugh infuriated left-wing critics on both sides of the Atlantic and seemed to delight in doing so. These critics found his religious views superstitious, his social views obsolete, his political views reactionary, and his views on black-white relations racist.

Waugh's early novels were almost universally praised, while critical opinion on the novels of his maturity has been seriously divided. Although much of the adverse criticism since the hostile reception accorded *Black Mischief* was clearly unwarranted, it could not be attributed entirely to a left-wing animus. A number of influential critics, foremost among them Edmund Wilson, lauded the early novels but condemned the later ones as betraying the promise first shown. So great is the division among Waugh's critics that what some describe as growth in the later novels, others call decay. Wilson and others were quite distressed by the contrast between the elegantly witty prose of the early novels and the progressive Catholicism, medievalism, and romanticism of the later works. Waugh's style did change over time, although he showed that he could, at will, recapture the manner of his first novels whenever he chose.

That Waugh's literary reputation has endured is remarkable, considering how greatly at odds he was with most of his fellow writers, leading literary critics, and influential academics. He certainly put an immense strain upon the objectivity of the socially conscious critic when he stated during the Spanish Civil War that if he were a Spaniard, he would be fighting for General Franco; when he expressed an open admiration for the Italian dictator Benito Mussolini; when he made no attempt to disguise his distaste for the working class; when, in one of his novels, he pictured African soldiers eating their new boots and otherwise behaving in a primitive manner, at a time when many felt all humane Britons ought to be asking forgiveness for their colonial behavior; and when he launched Swiftian attacks upon anything that smacked of socialism or progressivism. Some critics (most notably Edmund Wilson and J. B. Priestley) responded by writing, in effect, that no one with such absurd notions could possibly author good books. Wilson had praised the early novels, even to the point of judging Waugh to be the greatest comic writer in the English language since George Bernard Shaw. *Brideshead Revisited*, however, the first of the Catholic novels, dismayed him. The pervasive Roman Catholicism of the novel apparently bothered many other critics of secular persuasion.

Waugh's well-documented snobbery and tendency toward disagreeable behavior must also have taxed the fair-mindedness of his contemporaries.

His diaries, which began appearing in expurgated installments in 1973, give ample evidence of the unattractive, even ugly, aspects of his personality. America and Americans were generally dealt with contemptuously in his work. Waugh's best-known novella, *The Loved One*, is a savage satire on those aspects of Southern California society he found most false, tawdry, and dehumanizing. Little wonder that the arrogant, peremptory, and generally nasty protagonist of Kingsley Amis's *One Fat Englishman* (1963)—a British novelist on an American lecture tour—was immediately labeled a portrait of Evelyn Waugh.

An ambitious effort to denote the characteristic features of Waugh's art and to trace their evolution through the body of his fiction is that of William J. Cook, Jr. Cook attempts to account for Waugh's change in technique by carefully examining the persona of the protagonist in each novel. These altered personas, he argues, are the key to the difference between the "early" and "late" novels. *Decline and Fall* and *Vile Bodies* employ the objective point of view. In *A Handful of Dust*, the narrator-persona and the protagonist-persona become more closely identified. Waugh's experimentation with first-person narrative in *Brideshead Revisited* is, therefore, extremely important. Finally, the identification between the narrator-persona and the protagonist-persona is complete in *The Ordeal of Gilbert Pinfold* and the war trilogy *Sword of Honour* (1965; includes *Men at Arms*, *Officers and Gentlemen*, and *The End of the Battle*).

Waugh was a writer obsessed with technique. Virtually everyone with whom he discussed his work, in interviews and in correspondence, has testified to the meticulousness with which he chose both the language and the incidents of his books. For such a writer, the movement of the narrative point of view, over a period of some thirty years, from the objective, through the first person, to the limited third person, reveals much about Waugh's development as an artist and about the degree of his engagement with the world he described in his fiction.

Many writers pass through phases or periods of change. Yet few literary careers have a division as pronounced as Waugh's. Was it the Catholicism, medievalism, and romanticism of the postwar novels, or was it the altered personas, the new techniques, and stylistic tendencies that led Edmund

Wilson to believe Waugh had strayed over a precipice? A contrary view is put forward by the perceptive critic James E. Carens, who believes that the “second stage” of Waugh’s career, ushered in by *Brideshead Revisited* and leading inevitably to the war trilogy, produced his most satisfying satire. In the novels dating from 1945 to 1961, he successfully exposes folly while introducing positive values absent from the early books. Are the novels of Waugh’s middle years the blighting of early promise, or are they his crowning achievement? The question poses extreme alternatives, but they are appropriately extreme. Waugh consistently evoked extreme responses, both as an artist and as a man.

## VILE BODIES

**First published;** 1930

**Type of work:** Novel

*The “bright young people” of the postwar generation lead frenetic, chaotic, and absurd lives.*

Adam Fenwick-Symes, the protagonist of *Vile Bodies*, is, in a sense, a man of the world: a novelist, recently returned from Paris, and one of the “bright young people.” Yet he is passive, an anti-hero like so many other Waugh protagonists. Things simply happen to him as he drifts through the novel.

When the young novelist disembarks following a perfectly awful Channel crossing, an overzealous British customs officer leafs through the just-completed manuscript of his autobiography, determines it is too lubricious for native consumption, and seizes it on the spot. His action causes Adam to breach his contract with his publisher. Adam is then forced to sign a new one that commits him to virtual bondage. Because he has no money, he is unable to marry his fiancé, Nina Blount. The remainder of the novel is highly episodic; what plot movement there is emanates from two rather mild conflicts: establishment disapproval of the younger generation and Adam’s desultory quest for the means to marry Nina.

In *Vile Bodies* the narrator frequently becomes a sort of camera’s eye that cuts from scene to scene, revealing dialogue and external behavior only.

Since the narrator, during these montage passages, does not go inside the minds of any of the characters, he appears more distant than does the narrator of Waugh’s first novel, *Decline and Fall*. Two themes that appeared in the first novel—and which would be addressed with increasing seriousness in the novels to follow—are treated in a broadly comic fashion. These are the modern perversion of Christianity and the destruction of the stately homes of England.

The action of the novel occurs largely during the Christmas season (November 10 to Christmas Day) in the “near future,” as the author points out in his foreword. The first cleric to appear is Father Rothschild, S.J. This ubiquitous Jesuit possesses in profusion those qualities that most excite British prejudice: He is a plotter in international affairs; he knows everything about everybody, even the location of the prime minister’s love nest in Shepherd’s Hotel; and he is a member of a wealthy banking family, thus exuding the double menace of wily Jesuit and crafty Jewish financier. Another ecclesiastic, a rector, plays a small comic role as Colonel Blount’s neighbor and reluctant chauffeur. The novel also features the making of a bogus film of the life of John Wesley at Doubting Hall, known to the locals as “Doubting All.”

The embodiment of “modern” religion in the novel is the rum-drinking revivalist, Mrs. Melrose Ape. She is clearly a caricature of Aimee Semple McPherson and is one of the few characters in the novel whose models can be definitely identified.

The lesbian Mrs. Ape is accompanied by a band of angels, who carry their wings in violin cases and sing her famous hymn, “There ain’t no flies on the Lamb of God.” During the revival in Britain, two of her angels, Chastity and Divine Discontent, are ironically proselytized away from the proselytizer by the Latin American Entertainment Company, a white-slavery ring.

A Mr. Isaacs of the Wonderfilm Company of Great Britain demeans Doubting Hall at the behest of the dotty Colonel Blount. In the film made

there, John Wesley is wounded in a duel, is nursed back to health by his lover, Selina, countess of Huntingdon, and later, in America, is rescued from Red Indians by the same Lady Huntingdon disguised as a cowboy.

The degradation of religion and the great house, bulwarks of a once-healthy England, is portrayed against a background of neurotic merry-making. The escapades of the “bright young people” often end in disaster, several times in death. These deaths elicit no sympathy from the reader, not because the reader (or Waugh) is a monster, but because these characters are. They are grotesqueries, to whom cruel and terrible things indeed happen. Yet they are like circus performers called out by the ringmaster, Evelyn Waugh, to run through their paces. Their various acts may contain a latent tragedy, but it is well disguised behind the gaudy costumes and painted faces.

## A HANDFUL OF DUST

**First published:** 1934

**Type of work:** Novel

*A cuckolded husband leaves England to recover his ideal world but meets a terrible fate in the South American jungle.*

Waugh’s “new” style, which is so closely associated with *Brideshead Revisited* (1945), was actually introduced in *A Handful of Dust*. This novel contains familiar elements, the most obvious of these being the victim as hero. The reader’s perception of the tone, or spirit, of the earlier novels is largely determined by a lack of identification with their protagonists. Adam Fenwick-Symes, for example, is a cardboard figure whose passivity is thoroughly appropriate to the world of *Vile Bodies*, a world in which there is a crazy inconsequence to everything, including infidelity, financial ruin, and even violent death. The things that happen to Tony Last in *A Handful of Dust* will not be unfamiliar to the reader of the earlier novels. Yet whereas Adam is a farcical figure, Tony is a tragic one.

Tony Last loves his ancestral home, Hetton. Each bedroom at Hetton features a brass bedstead and a frieze of Gothic text; each is named from Sir Thomas Malory’s *Le Morte d’Arthur* (1485). Tony

has slept in Morgan le Fay since leaving the night nursery and his wife, Brenda, sleeps in Guinevere (a fitting bedchamber for the adulteress she is to become). Tony eventually loses Brenda to John Beaver, a despicable nonentity from London. His loss of Brenda is not amusing, as is Adam’s loss of Nina, but poignant. In *A Handful of Dust*, identification exists between the narrator-persona and the protagonist-persona. Thus, Tony engages the reader in a way that Adam never does.

Tony loves churchgoing. Every Sunday he sits in the family pew, and he reads the lessons on Christmas Day and Harvest Thanksgiving. Yet his religious practice, though not a sham, is merely a part of the venerable Hetton tradition, a refuge-within-a-refuge from the modern world. He is humane, but not Christian. Tony is secular man at his best: kindly, loving, selfless. Yet when his wife abandons him and his son, John Andrew, is kicked to death by a horse, Tony’s fine qualities cannot save him (in fact, they make him an easier prey for the predators surrounding him). He has, moreover, no faith by which to save himself.

An amusing representative of this empty Anglicanism is the Reverend Tendril, who adds his own touch of fantasy to divine services. He composed his sermons during his many years in India. They were addressed to the congregation at the garrison chapel, and he has made no attempt to accommodate them to his altered circumstances. They are, therefore, studded with references to the Queen Empress and to home and loved ones far away. These sermons in no way trouble his parishioners, who do not expect the things said in church to have any application to their own lives.

In his misery, Tony is led by the strange Dr. Messinger on a search for a lost city in the Brazilian jungle. The expedition ends disastrously. Dr. Messinger is drowned, and Tony, ravaged by malaria, falls into the hands of Mr. Todd, a mad half-breed. As Tony daily reads Charles Dickens to his illiterate host, he comes to realize with increasing horror that he is a prisoner. Mr. Todd will never let him go. He must spend the rest of his life reading Dickens to a madman in the middle of the jungle.

Now the scene switches to England again, and the narrative is quickly concluded. Tony is declared dead. Brenda, whom Beaver has long since abandoned, marries Jock, Tony’s old friend. Tony’s poor relations inherit Hetton and turn it into a fox

farm. All that remains of Tony Last is his monument, bearing the simple (and ironic) epithet “Explorer” for this least adventurous of Englishmen.

## BRIDESHEAD REVISITED

**First published:** 1945

**Type of work:** Novel

*A young painter falls under the spell of glamorous aristocratic family members and becomes enmeshed in their tragedy.*

*Brideshead Revisited* first appeared in a limited edition in December, 1944 (Waugh often published small, sometimes specially engraved and illustrated limited editions for his friends). The regular edition followed in May of the next year. For fifteen years, Waugh had been acquiring a faithful but not a huge audience. *Brideshead Revisited* made him a best-selling author for the first time. It also alienated a number of critics.

To some, like Edmund Wilson, the richness of the language is the novel’s chief sin, causing it to tend throughout toward romanticism and sentimentalism. For others, the structure of the novel is at fault. James F. Carens argues that too much of the novel is devoted to the Oxford period and too little to Charles Ryder’s love affair with Julia Flyte. For still others, the protagonist himself is the chief problem. Ryder is a snob who seems clearly lacking in generosity of spirit. Moreover, Waugh, so these critics argue, compounds his difficulties by choosing Ryder as his narrator. So strong is the suggestion, even if it be erroneous, that the first-person narrator is a mouthpiece for the author, that for the first time Waugh was personally identified with his unsympathetic hero.

The novel is a framed story. It begins with a prologue and ends with an epilogue, both set in wartime England. The flashback, which is the bulk of the novel, constitutes *The Sacred and Profane Memories of Captain Charles Ryder* (the subtitle). This flashback is divided into two books: “Et in Arcadia Ego,” which deals largely with Ryder’s Oxford years, and “A Twitch upon the Thread,” which chronicles the working of the divine will upon the Marchmain family and, through them, upon Ryder.

As the novel begins, Ryder, a thirty-nine-year-old

captain of infantry, is transferred, along with his battalion, to a new camp. The troops arrive in the middle of the night, and Ryder does not realize until the next morning that he has returned to Brideshead, once the elegant country home of the Marchmains. As he looks out over the familiar vista, the nostalgic memories that make up the novel proper are triggered.

In book 1, set in the Oxford of the 1920’s, Ryder meets and becomes infatuated with charming, irresponsible Sebastian Flyte, second son of Lord and Lady Marchmain. Lord Marchmain has been separated from his wife for many years and lives with his mistress in Venice. Sebastian takes Ryder to Brideshead to meet the rest of his family: Lady Marchmain, beautiful and enigmatic; Brideshead (Bridey), heir to his father’s title, as stolid as Sebastian is animated; Julia, with whom Ryder will eventually fall in love; and Cordelia, the youngest child, devout in a natural, unaffected way. The Marchmains are a Catholic family, and *Brideshead Revisited* is often called a Catholic novel. Sebastian is attempting to escape the demands of his religion through drink and is rapidly becoming a hopeless alcoholic. Julia is rebelling by marrying

Rex Mottram, a Canadian adventurer and wheeler-dealer. This far-from-ideal family is a curious device if, as some have charged, Waugh’s novel is a Catholic apology.

In book 2, Ryder becomes an architectural artist; he paints the great houses of England, often just ahead of their dismemberment or destruction. Thus, two of Waugh’s recurring motifs, the artist-as-hero and the great

house, come together in the character of the protagonist. Ryder marries Celia Mulcaster, whom very quickly he cannot abide. He is glad to learn that she is unfaithful, for he is then free to dislike her. Ryder and Julia encounter each other on an Atlantic voyage and become lovers. Lady Marchmain has died, and Lord Marchmain returns to Brideshead to die. His deathbed conversion (in a scene roundly condemned by some critics) pro-

foundly affects Julia. The smoldering coals of her Catholicism are fanned into a raging blaze. She breaks off her affair with Ryder and declares that she will remain married to the loathsome Rex.

In the epilogue, Ryder never states but strongly implies that he has become a Catholic. He enters Brideshead's art-nouveau chapel to find a lamp burning before the altar there. Although he has lost most of what he desired in life, for the convert Ryder, the faith, to him both ancient and new, lives on.

## SWORD OF HONOUR

**First published:** 1965; includes *Men at Arms*, 1952; *Officers and Gentlemen*, 1955; *The End of the Battle*, 1961 (also known as *Unconditional Surrender*)

**Type of work:** Novels

*This trilogy recounts the wartime experiences of Guy Crouchback, another of Waugh's maimed romantics.*

*Sword of Honour* is both a general title for Waugh's World War II trilogy and the specific name of a streamlined, one-volume collection of the novels appearing toward the end of the author's career. Waugh did some cutting here and there and eliminated a few minor characters, but none of the three novels are substantially altered in the *Sword of Honour* edition.

The trilogy may or may not be Waugh's best work; certainly it is his most ambitious. His heavily plotted story charts the moral deterioration of the West and the spiritual growth of his hero, ironically concurrent developments. He deftly "modulates" (a favorite term among critics of the trilogy) the tones of irony, satire, farce, and tragedy against a naturalistic background. Furthermore, most of *Sword of Honour* was written during Waugh's fifties when, according to his biographers, his health was failing and he was becoming progressively more disheartened, depressed, and lethargic. To him, Nazi Germany had been defeated at the cost of British honor; his country was rapidly becoming a thoroughly agnostic, materialistic, socialistic state; and, most horrifying of all, the Holy Mother Church that he had embraced in 1930 was, only

twenty-five years later, admitting liberalizations (to Waugh, corruptions) and accommodating itself to the society that it ought to be resisting with all its might.

*Men at Arms* introduces the protagonist, Guy Crouchback, a familiar Waugh character type. Following his divorce, Guy has spent eight empty years at Castello Crouchback in Santa Dulcina, Italy. His wife, Virginia (like so many of her fictional predecessors), is a shallow, amoral woman who left her husband for another man. After the Russian-German alliance, Guy returns to England seeking a commission. In opposing the hateful combination of Nazism and Communism, he feels he is taking up arms against the Modern Age. Before leaving Italy, Guy visits the tomb of Sir Roger of Waybroke, an English knight who was shipwrecked near Santa Dulcina while on his way to the Second Crusade. Guy runs his finger along the sword atop the knight's effigy and swears to take up Sir Roger's unfulfilled quest. Sir Roger's is the first "Sword of Honour." Waugh will introduce, with bitter irony, a second sword in the final novel. Because of his age, thirty-six, Guy experiences difficulty in gaining his commission, but he finally finds a place with the Royal Corps of Halberdiers. Guy loves the army and this venerable unit. His first real shock is the discovery that the British military would welcome the breakup of the Russian-German alliance, thinking only of the diminished odds against them, not of Guy's romantic crusade.

Guy soon meets the two major comic characters of the book. Apthorpe is a slightly absurd junior officer of Guy's age. Brigadier Ben Ritchie-Hook is a war lover who has lost one eye and most of his right hand during a lifetime of "biffing" whatever enemies he could find. *Men at Arms* is the most comic of the three novels largely because of a protracted conflict over Apthorpe's thunderbox, his personal chemical toilet, acquired during his African days. Ritchie-Hook discovers its existence, covets it, and launches a wildly funny guerrilla campaign designed to secure it for himself. Apthorpe's ludicrous death at the end of *Men at Arms* is reminiscent of several deaths from the early novels. After Apthorpe suffers a recurrence of jungle fever, Guy smuggles a bottle of whisky into his hospital room. Apthorpe later consumes the entire bottle, suffers a violent reaction, and dies.

The tone of *Officers and Gentlemen* darkens mark-

edly, especially in the disastrous battle for Crete (in which Waugh himself fought with distinction). Two more crucial characters are featured: Trimmer, a lazy, incompetent probationary officer, who appears briefly in *Men at Arms*, and Corporal-Major Ludovic, an effete man with disconcerting pink eyes and no documented past.

Trimmer is a man of many names. He was Gustave during his career as a hairdresser on ocean liners. He is the fabricated hero of an inconsequential and totally mismanaged operation called Popgun. As such, he is sent on a morale-boosting tour of Britain in the guise of Captain Alistair McTavish; he occasionally promotes himself to Major McTavish. In Glasgow, he meets Virginia, whose hair he once did on the *Aquitania*. They have a brief affair, and he leaves her carrying his child. The Ministry of Information finally determines there are too many Scots heroes. McTavish becomes Trimmer once more and is returned to active service. He promptly deserts and is never heard from again.

Ludovic has been likened to one of Henry James's evil-minded servants. Beneath his inscrutable facade, he is a hard and crafty man. When, on Crete, the Brigade Major breaks down under fire and becomes a liability to the men of his command, Ludovic kills him. He is the embodiment of the British army's ignoble retreat to the sea, a rout in which the men are killing their officers and taking their uniforms and vehicles. Later, Ludovic murders a sapper captain in order to claim his place in the getaway boat. He mistakenly believes that Guy has knowledge of these murders and, during the balance of the trilogy, he grows increasingly paranoid from fear that Guy will one day expose him.

*Unconditional Surrender* was published under the title *The End of the Battle* in the United States. It covers the last years of the war and the period immediately following. Disillusionment is piled upon disillusionment. Guy, now an intelligence officer, is posted to Yugoslavia, where he recognizes Premier Tito's war effort as primarily a means to defeat the royalists and his other rivals and communize the country. The British blithely hand their former Serbian allies over to the Communists to be shot. Ritchie-Hook turns up in Yugoslavia as an observer but throws his life away in a bogus partisan attack. The happy warrior's death is appropriate since the modern world has no use for those of his ilk.

In London, Sir Ralph Brompton, a sinister politician and Ludovic's former homosexual lover, is loading the British military mission to Yugoslavia with Communists. In terrible contrast to Sir Roger's sword, the Sword of Stalingrad, the loathsome symbol of Britain's alliance with atheism and totalitarianism, is displayed in splendor in Westminster Abbey. In Guy's private life, interesting developments have preceded his departure for Yugoslavia. Virginia, after failing to find a suitable abortionist in war-torn London, decides to have Trimmer's child. Guy, who as a Catholic believes that his marriage to Virginia—now divorced from her most recent husband—has never truly ended, feels obligated to marry her again. She has the baby, legally Guy's, and leaves it in the country. She is later killed by a "doodle" bomb in the final days of the war.

After the war, the tortured and reclusive Ludovic moves to Italy, even masochistically purchasing the Castello Crouchback. He becomes the best-selling author of *The Death Wish*, an extravagantly romantic novel that most critics take to be a satiric version of Waugh's own *Brideshead Revisited*. Guy returns to Broome, his country home, and marries Domenica, the tomboy daughter of friends. Virginia's son is christened Gervase, the noblest name in the Crouchback line, and Guy unselfishly wills the family name and all that goes with it to the son of Trimmer.

Of the two titles, *Unconditional Surrender* and *The End of the Battle*, the first is clearly the more successful artistically. As well as referring to the surrender of the Axis Powers, it hints at Britain's surrender to expediency in order to win the war. Finally, it suggests that Guy's final, selfless act in the trilogy is a surrender to the Divine Will.

## SUMMARY

Evelyn Waugh's earliest novels were received, and praised, as farces and amusing romps. His essential seriousness of purpose was ignored or misunderstood. He was long viewed as a talented entertainer whose language and syntax were flawless and whose plots were delightfully inventive. As the body of his work grew and as he reiterated his theme of the spiritual emptiness of modern life, however, critics were forced to take note. Eventually, to those who shared his view of humanity's fallen nature, who shared his passions and his fears,

he became much more than an entertainer. He became a kind of witty Jeremiah, prophesying the end of grace, both divine and earthly, from behind a mask of scornful laughter.

Patrick Adcock

## BIBLIOGRAPHY

### By the Author

#### LONG FICTION:

*Decline and Fall*, 1928

*Vile Bodies*, 1930

*Black Mischief*, 1932

*A Handful of Dust*, 1934

*Scoop*, 1938

*Put Out More Flags*, 1942

*The Diaries of Evelyn Waugh*, 1976 (Christopher Sykes, editor)

*A Little Order: A Selection from His Journalism*, 1977 (pb. in U.S. 1980)

## DISCUSSION TOPICS

- Evelyn Waugh seems to have taken his title, *A Handful of Dust*, from T. S. Eliot's *The Waste Land* (1922): "I will show you fear in a handful of dust." Is Tony Last a victim of fear?
- What causes Tony Last to succumb to such a ridiculous figure as Dr. Messinger?
- Is the judgment of some critics that *Brideshead Revisited* is a "Catholic novel" accurate or meaningful?
- Did the prevalence of Waugh's religious convictions detract from his later fiction?
- Is there any reason for believing that the narrators of Waugh's later novels are presenting his own views?

## H. G. WELLS

**Born:** Bromley, Kent, England  
September 21, 1866

**Died:** London, England  
August 13, 1946

*Still read for his lively, provocative scientific romances, Wells is also recognized for the strength of his best realistic fiction and for a temperament that helped shape and predict modern life.*

### BIOGRAPHY

Herbert George Wells was born in Bromley, Kent, England, on September 21, 1866, the third son of Joseph and Sarah Neal Wells. In rather mean surroundings (Wells later called it “a suburb of the damnedest”), Sarah struggled to rear her son, returning to her employment as a lady’s maid after her unreliable husband (who was first a gardener and then a professional club cricketer) abandoned the family. Giving Wells the rudiments of an education—teaching him the alphabet and borrowing books from the public library—Sarah took employment with the Fetherstonhaugh family at Up Park, Sussex. These circumstances—growing up poor among the wealthy, observing at close hand the disparity between social classes, and striving to acquire independence by dint of his formidable intellect and energy—were to mark Wells for the rest of his life, informing all of his writing and accounting for his drive to dominate the age in which he lived.

At fourteen, Wells was apprenticed to a draper at Windsor, a humiliating, menial occupation for a young man whose imagination had been stimulated by reading works such as Nathaniel Hawthorne’s *The House of the Seven Gables* (1851), Eugène Sue’s *Les Mystères de Paris* (1842-1843; *The Mysteries of Paris*, 1843-1846), and Jonathan Swift’s *Gulliver’s Travels* (1726). At a very early age, Wells had developed a mind that transcended his imme-

diate reality and conceived of other worlds on a scale much grander than his position in life permitted.

Soon discharged from the draper’s shop as unfit, Wells became a teacher; he returned to his mother at Up Park, then became a chemist’s (pharmacist’s) assistant before submitting once more to an apprenticeship in a draper’s shop. At seventeen, he broke once and for all with the world of commerce, becoming a teacher at Midhurst, studying Plato, geology, physiology, chemistry, and mathematics, attending London Normal School of Science, and coming under the influence of T. H. Huxley, one of the great champions of Charles Darwin and nineteenth century science.

A desultory student, Wells began writing the sketches that would become his first science-fiction stories and fell in love with his cousin, Isabel, marrying her in 1891. After a brief bout with tuberculosis and the writing of two scientific textbooks, Wells left his first wife for Amy Catherine Robbins (“Jane”), whom he would later marry even while initiating a lifelong series of romantic relationships with women who would figure (slightly disguised) in several of his novels.

Wells’s first major success, *The Time Machine: An Invention* (1895), showed that his forte was fantasy: an adventure story that appealed to the late Victorian interest in scientific experiment and in the isolated, lonely heroes of science who challenged their contemporaries’ stodgy ideas about the nature of society and of the universe. Quickly becoming a best-selling author of such works as *The Invisible Man: A Grotesque Romance* (1897) and *The War of*

*the Worlds* (1898), Wells transformed himself into a public figure, taking an interest in radical politics and joining the Fabian socialists for a brief period. He embarked on a series of what he called “discussion novels”—*Marriage* (1912), *The Passionate Friends* (1913), and *The Wife of Sir Isaac Harman* (1914)—designed to raise the issue of relations between men and women in the light of feminism and the scientific advancements of his age. Wells pursued and attracted powerful and intelligent women—first Amber Reeves, the young daughter of prominent Fabian socialists, and then Rebecca West, the newest and freshest personality among the suffragists.

At the same time, in *Mankind in the Making* (1903), *A Modern Utopia* (1905), and later books and articles, Wells pursued a career as journalist, historian, and philosopher, arguing for a form of international government and recognition of human rights that would transcend the aggressive relationships of nation states. Many of his speculations about world wars, atomic theory, and other developments in the future proved prophetic.

Wells continued to write novels to the end of his career, producing in 1916 perhaps his last great novel, *Mr. Britling Sees It Through*, a sensitive, moving account of World War I and its aftermath in England. Wells became less interested in fiction, and he increasingly turned his attention to world history, producing *The Outline of History: Being a Plain History of Life and Mankind* (1920), and to propagandistic works. Wells’s wife died in 1928, and his later years were beset by an increasing frustration with his flagging physical and imaginative powers. He died on August 13, 1946, in London.

Wells produced more than one hundred volumes in his lifetime. Only a handful of novels are still read today, with his scientific romances winning new generations of readers. Much of his other work is still of interest to social and literary historians, who must take him into account in their appraisals of the late Victorian and Edwardian periods.

## ANALYSIS

In all of his work, Wells prided himself on his opposition to the status quo. He became attracted to people of science because they proved to be the most capable of thinking beyond their times, of imagining other ages and forms of society. He de-

lighted in twitting the stolid attitudes of the late Victorians and Edwardians, showing a London laid waste by a Martian invasion, a populace agog at the machinations of an invisible man, and a community outraged by the heroine’s seduction of an older man in *Ann Veronica: A Modern Love Story* (1909), a book that hardly concealed the fact that it was based on his scandalous liaison with Amber Reeves.

Powerfully influenced by the ideas of Darwin—as they had been interpreted and disseminated by Wells’s teacher, T. H. Huxley—Wells sought to show the direction in which history was headed. He clearly foresaw that feminism would triumph, in the sense that women would eventually enjoy an equal relationship with men. He anticipated the world of atomic weapons and the mass destruction of cities, of total war that would respect no enclaves of humanity. He was, in many respects, a pessimist, and yet he continued to hope that somehow humanity would see its folly before it was too late.

Through his imagination and reason, Wells indefatigably created fiction and philosophical treatises aimed at stimulating and teaching the world to think ahead. The planet itself, he believed, was threatened—perhaps by invasions of aliens, perhaps by its own blindness to its self-destructive potential.

The Darwinian idea of evolution, however, suggested to Wells that human beings could, in fact, trace the outline of history and encompass it so that something approaching a world government might be possible. His task was to unite the individual with the cosmic, to imbue the culture with a universal consciousness commensurate with the immensity of the world’s maturation.

Thus, the scientific romances and the realistic novels are but different sides of Wells’s comprehensive attack on provinciality and his plea for an enlarged human understanding that would overthrow the conventions of polite society. He found that England wanted to be jarred; it needed to perceive itself as under threat from above and outside itself. In *The Days of the Comet* (1906), for example, he described a Europe very much on the eve of the destruction that it visited upon itself in 1914, the start of World War I. In *The World Set Free: A Story of Mankind* (1914), he prophesied an atomic war in 1958. In *The Shape of Things to Come: The Ultimate Resolution* (1933), he accurately described an air attack on London in 1940.

In *Tono-Bungay* (1908), Wells drew upon his own childhood at Up Park to show how the class structure and capitalistic growth actually abetted each other and produced a world that demeaned individuals even while promising them great wealth and prestige. In *Marriage*, Geoffrey Trafford, a promising scientist, finds himself trapped in his marriage to the forceful Majorie Pope, who gradually draws him into the petty, materialistic middle-class life that derails his once bright career. In *The Passionate Friends*, Lady Mary, the daughter of an earl, forsakes her true love, Stephen Stratton (a commoner), for an arranged marriage that brings her into the world of politics, wealth, and power, only to realize, too late, that she has made a tragedy of their lives.

Wells did not believe, however, that either literature or science provided a panacea. Wells's scientists are often arrogant and authoritarian, so sure of their superiority and of the rightness of their inventions and insights that they run roughshod over humanity, literally mowing down people in the street (as the invisible man does) or sadly recognizing (too late) the limitations of their innovations (as the inventor of the time machine does). By the same token, Wells had little patience with progenitors of literary modernism—novelists such as Henry James, who made of literature a precious institution dangerously separated from the masses. Wells detested the introverted, self-absorbed quality of James's fiction, preferring a view of the world of letters far more extroverted and in closer touch with the reading public.

If Wells opted to appeal to the largest possible audience, in both his fiction and nonfiction, it was because he forthrightly wanted to shape minds, to call attention to evil, and to suggest possible solutions, warning people as a modern prophet who saw no necessary contradiction between art and education and between literature and entertainment. He scorned all forms of snobbery in society and in the literary circles of his time. What he did not realize, however, was that his strenuous efforts to win and influence minds would take a terrible toll on his own prose, so that he gradually settled for quantity over quality, producing masses of words that might overwhelm but not necessarily persuade his readers. He became accustomed to looking for immediate results; consequently, one Wells volume had to be quickly succeeded by another

to sustain the public clamor. In such a torrent of words, faith in the power of the word diminished, the right word, the appropriate word, that Wells ultimately could not find once he had determined to overthrow the fastidious, finicky approach to language favored by James and his modernist successors.

## THE TIME MACHINE

**First published:** 1895

**Type of work:** Novel

*A time traveler gives his account of his visit to the year 802,701 C.E. and then mysteriously disappears on other travels.*

*The Time Machine* begins with a dinner party, in which the inventor of a time machine explains to his disbelieving guests the principles on which his invention is based. This scene is a quintessential one in stories by Wells, in which an original mind finds itself checked by an audience that is taken aback by daring and ingenuity. The time traveler persists, however, gradually making his auditors reconsider their basic premises, even if they do not concede that it is possible to travel through time.

Although Wells rarely bothered to construct elaborate scientific justifications for his romances, the inventor's speech can still seem convincing to the nonmathematician.

Much of the book is cast in the inventor's first-person narration, in which he recounts to his friends the results of his journey through time.

In the far distant future, the time traveler (he is never given a name) lands among a small, delicate, and timid people, the Eloi, who live on fruit. Their environment seems benign, yet they are afraid of the dark, huddling against the appearance of another people, the Morlocks, who the time traveler gradually discovers are the subterranean masters of this future

world. The Morlocks are the meat eaters, feeding on the Eloi but otherwise staying below ground in deep shafts, which the time traveler must explore in pursuit of his time machine, the Morlocks having carried it away.

Much of the novel concerns the time traveler's horrifying discovery of this divided world. It gradually becomes apparent that the novel is more than an adventure story, more than a book about the wonders of scientific speculation; it is also a parable about the oppressed, about the ultimate kind of society stratified by class, by those who have and those who do not. Quite explicitly, near the end of the novel, the time traveler speculates that this is where history is headed: toward this bifurcation of humanity, this division of the powerful and the powerless, in which humanity will literally construct a society that feeds upon itself.

After effecting a narrow escape (the time traveler locates his machine and beats off the Morlocks), he travels to a more distant future, a land where all trace of humanity has disappeared and where the earth is inhabited by large monsters and plants. As in his earlier adventure, the confident scientist is confronted with a future that belies contemporary faith in perfectibility, in the power of science to give humanity control over its environment. He returns to the present a chastened, exhausted man.

The time traveler's tale is greeted with enormous skepticism, except for one of his friends, who conveys the time traveler's story and who witnesses the time traveler's departure for an unknown destination. The novel ends with no sign of the time traveler, no assurance that he will return, and with the cautionary word that human beings must act as if they can still positively affect the future. It is an extraordinarily grim forecast, a foreboding glimpse of both the power and the limitations of science and of Wells's own doubts over whether the new discoveries of science would, in the long run, prove beneficial. Much of the novel's drama comes from the first-person, eyewitness account and from the time traveler's total immersion in another world, making the assumptions of his own present terrifyingly inadequate.

## THE INVISIBLE MAN

**First published:** 1897

**Type of work:** Novel

*An isolated researcher discovers how to make himself invisible and determines to dominate the world, becoming a menace to society who must be destroyed.*

*The Invisible Man* is about a lone researcher, Griffin, whose discovery of invisibility alienates him from other people. At first, Griffin merely wants to be left alone, taking a room in a boardinghouse and secluding himself with his apparatus. In the midst of ignorant, prying people, he is a figure of some sympathy and mystery. As his means of support diminishes, however, he feels no compunction about stealing from others, viewing his crimes as a necessary way of continuing his research for a way of reversing his invisibility.

Growing more and more irritable because of the curious who try to discover the purpose of this strange man swathed in bandages, Griffin arrogantly throws people out of his room, and finally he is forced to leave his room, setting off on a cross-country rampage that leads to injury or death for those who get in his way.

Griffin eventually takes refuge in the home of an acquaintance, Dr. Kemp, and confides to Kemp his plans to establish a reign of terror based on his discovery of invisibility. Having lost all sense of humanity, Griffin does not see the impact of his words on Kemp, who promises not to betray Griffin but who almost immediately decides that he cannot allow Griffin to carry out his plans. Summoning the police, Kemp puts his own life in jeopardy, but he survives and an exhausted, irrational Griffin is eventually subdued and killed.

Obviously a portrait of the amoral scientist, *The Invisible Man* demonstrates Wells's affection for the common individual and his criticism of modern scientists who forget the purpose of their discoveries and believe that they can legislate the quality of existence for others. The early part of the novel, when Griffin's motivations and his invisibility are not yet discovered, is the best, for there is much humor and tension built up around the subsidiary characters who come into contact with him.

Wells is less successful in providing Griffin with a

convincing account of his discovery of invisibility, and it is somewhat improbable that a man of Griffin's intellect should completely ignore the practical consequences of traveling around England in January in the nude—the only way to preserve his invisibility. On the other hand, the invention of invisibility is a powerful metaphor standing for precisely that aspect of science—its inaccessibility to the populace—that makes modern science seem at once so impressive and so potentially malign.

Perhaps only a man as antisocial as Griffin could conceive of a scheme that would put him so at odds with his fellow human beings and present him with the opportunity of totally dominating them. Wells rightly foresees in this novel and in others the way in which science sometimes proves to be the perfect instrument of the totalitarian mind.

## THE WAR OF THE WORLDS

**First published:** 1898

**Type of work:** Novel

*The Martians invade England, immobilizing the society but then succumbing to the bacteria that have long since vanished from their own planet.*

In *The War of the Worlds*, the Martians invade England, landing in ten cylinders at twenty-four-hour intervals, terrorizing the countryside and devastating the heart of London. It is perhaps the most plausible of Wells's romances, for at the time it was thought that Mars might be inhabitable and that it was far older than the earth. It could well serve, then, as the site of beings who antedate humanity.

The Martians are much more highly developed than humans, but as the narrator discovers, they have landed on Earth to use it as a feeding ground. The Martians are wormlike creatures with bulging eyes and sixteen long, sensitive tentacles projecting from their mouths. They suck living blood. They arrive in huge, spiderlike engines, smothering cities with black smoke and defeating the opposition with heat rays not unlike lasers that can disintegrate artillery.

The Martians succeed where the invisible man failed in establishing a reign of terror, and much of the novel concerns their relentless, apparently in-

vincible progress across the country. There is much less characterization in *The War of the Worlds* than in Wells's other science fiction. Rather, the novel is intent on describing the mass hysteria such an invasion would stimulate and on showing how unprepared civilization is for the onslaught of forces from another world.

Wells is particularly hard on a vicar who takes refuge with the unnamed narrator, as if to suggest the usual comforts of religion, especially organized religion, are to little avail in a truly otherworldly event. The vicar is reduced to a state of abject terror, mouthing Christian pieties and proclaiming the day of judgment. In a half-starved, delirious state, he ventures toward the Martians before the narrator can stop him and is killed.

The concrete descriptions of London and of the damage wreaked upon it by the Martians enhance the verisimilitude of the narrative as the narrator struggles to survive and retain his presence of mind. Although he comes across another character who vows to carry on the fight, human expressions of defiance seem more pathetic than encouraging. It is astonishing how quickly civilization seems morally and physically bankrupted by the invasion.

There is little comfort in the denouement of the novel. The Martians succumb to the environment, having no antibodies to cope with bacteria that attack and destroy their nervous systems. Otherwise, they might very well have succeeded in destroying civilization. The narrator gradually comes to realize that the Martians are dying when he hears their awful, moaning shrieks.

Reviews of *The War of the Worlds* noted that the novel had the gripping quality of a firsthand newspaper dispatch, a dramatic presentation of bulletins as the Martians conduct their relentless advance, instilling terror, physically and mentally immobilizing the population. Part of the excitement stems from closely following the narrator's narrow escapes and his piecing together of what has happened in the city.

The Martian invasion provides Wells with a scenario for commenting on the organization of modern life. The mass of humanity is treated as just that: a mass, a mob of largely undifferentiated human beings who trample upon each other and cannot organize a common defense. They are as weak as the Elois who are dominated by the Morlocks, as unconscious of worlds larger than themselves as are the Sussex inhabitants who peer curiously at the invisible man.

The Martians, the time traveler, the invisible man—for all their differences—function as devices for upsetting human complacency. Wells deeply distrusted human self-satisfaction and what he regarded as a typically English contentment with life as it is—as though life had always been that way and would continue to be so. Wells believed the contrary, that modern life would be a series of disruptions and that the twentieth century would see apocalyptic changes, perhaps initiated by science, but probably exacerbated by human ignorance, greed, and smugness. Humanity might, as in *The War of the Worlds*, be able to escape the worst fate Wells could imagine for it, but it could not count on such a conclusion.

## TONO-BUNGAY

**First published:** 1908

**Type of work:** Novel

*Tono-Bungay is one of Wells's most realistic novels, and his use of a first-person narrator and his criticism of contemporary British society align this work with his romances and his journalism.*

In *Tono-Bungay*, George Ponderovo has decided to tell his life history in the form of a novel. He has grown up in Bladesover, a great country estate, which he describes as a metaphor for the state of English society. As a boy, George sees the world of the wealthy through the eyes of the servants, a comic collection of men and women whose stultifying conversation mirrors the rigidity and unimaginativeness of their plight. Drawing on his memories of Up Park, Wells portrays these lower-class characters with affection, although he shows that the clichés they find so comforting are precisely

what prevent them from appreciating life to the fullest.

George's own feelings, as those of a servant's boy, are kept on a tight rein, but he is liberated from the life below the stairs by Beatrice Normandy, a beautiful young lady of the house who demands that George be allowed to play with her. Exhilarated by her attention, George is gradually able to express himself and to develop a strong sense of his own worth, but then he is banished from Bladesover when he gets into a fight with her half brother.

After a series of misadventures resembling Wells's own youth, George finds refuge with his Uncle Edward Ponderovo, an ebullient country chemist who dreams of huge commercial success. Unfortunately, Uncle Edward's first foray in the stock market is a dismal failure, and George discovers that his mother's small but essential fund of savings has also been depleted by his uncle's speculations.

Nursing a grudge against his uncle, George turns to science, studying for a university degree and falling in love with a young woman, Marion, who refuses to marry him until he has a steady, adequate yearly income. Suddenly, George is summoned by his uncle, who has made a smashing success with Tono-Bungay, a patent medicine that promises rejuvenation. At first, George balks at his uncle's plea that he needs George to run the new company, for George knows that the product is bogus, kept afloat by aggressive advertising and not by an inherent positive property. He is troubled by what he sees as modern life's tendency to market goods of no intrinsic value, products that contribute nothing substantial to the economy or to the health of the country. He is smitten with Marion, however, and sees that, by the management of his uncle's affairs, he will have the income that will convince her to marry him.

Accepting his uncle's offer, George turns his mind to business, fashioning a company that becomes one of the leading enterprises of the time, expanding into lines of new products and remedies (extolling the magical properties of various brands of soaps, for example). George marries but is dissatisfied, realizing that his wife is dull and conventional and does not share his romantic, sexual drives. Disgusted with both his marriage and his business, George turns to affairs with other women and to scientific experiments, concentrating on efforts to develop an airplane.

What troubles George is the growing commercialism of society—not only his uncle's blindness to the sham involved in marketing his products but also his wife's mercantile mentality. She wants the comforts of life, but she has no passion. George concludes that he has bought himself a wife, one who would not consent to marriage until he raised his offer, telling her that he would be earning five hundred pounds a year, a two-hundred-pound increase over the amount she said would be necessary for their married life.

At this point, Beatrice Normandy reenters George's life. They have not seen each other since George's banishment from Bladesover. Both of them realize that they have always loved each other, although Beatrice is engaged to an older, wealthy upper-class man. Although they become lovers, Beatrice refuses to marry George (now divorced from his wife), and he supposes it is because of his class origins and his business. He eventually learns to accept the fact that she is (by her own account) a selfish woman whom he would not be able to please in marriage. She has grown accustomed to her imperious, privileged life, and George, who has lost most of his fortune in his uncle's sudden crash, would never be able to satisfy her.

*Tono-Bungay* is one of Wells's finest novels because it contains such rich characters and astute social analysis. George's desire to be distinguished, his craving for money, and his yearning for a place in society epitomize the development of modern life. By writing his autobiography, he is simultaneously showing how the modern self develops, encounters the categories of class and capitalism, and thrives or fails by the canons of a society based on the exploitation of human desire. The products that his Uncle Ponderovo markets as a way to renew the self are simply the material manifestation of George's aspirations. George knows that these as-

pirations are romantic, that they are not rooted in reality, and yet he can fool himself as easily as his uncle fools his customers.

At the same time, there is a reckoning for Tono-Bungay and for Edward and George Ponderovo. A society cannot stand only on self-promotion, Wells implies. Edward never faces this fact. He is always the genial uncle, the innocent who is so at one with the principle of self-aggrandizement that he never suffers George's self-critical doubts. Consequently, he becomes a victim of his own enterprise. On the other hand, George's yearning to fly expresses his realization that society, the status quo, cannot gratify his highest aspirations. He must find a way to transcend his time. As such, he is the archetypal Wells character, attempting to fulfill himself by going beyond himself, traveling through time and space to a greater world that will yield a greater self, an identity that has truly shed the limitations of class and culture.

## SUMMARY

In his fiction and nonfiction, H. G. Wells dreamed of a future that would fundamentally change the conditions of the present. He was fascinated by the scientific and technological developments of his time; he explored politics and business, looking for the roots of self and society. He used his formidable intellect and imagination to lay bare the faults of his age, and he created characters who strove against but often succumbed to the temptations of the emerging capitalist and corporate culture. He often despaired that humanity would find a way to express its highest potential, yet his own prodigious output argued for the value of an inquiring mind, unfazed by obstacles and resolved on accomplishing a revolution in the consciousness of one's contemporaries.

Carl Rollyson

## BIBLIOGRAPHY

### By the Author

#### LONG FICTION:

*The Time Machine: An Invention*, 1895

*The Wonderful Visit*, 1895

*The Island of Dr. Moreau*, 1896

*The Wheels of Chance: A Holiday Adventure*, 1896

H. G. Wells

*The Invisible Man: A Grotesque Romance*, 1897

*The War of the Worlds*, 1898

*When the Sleeper Wakes: A Story of the Years to Come*, 1899

*Love and Mr. Lewisham*, 1900

*The First Men in the Moon*, 1901

*The Sea Lady*, 1902

*The Food of the Gods, and How It Came to Earth*, 1904

*Kipps: The Story of a Simple Soul*, 1905

*In the Days of the Comet*, 1906

*Tono-Bungay*, 1908

*The War in the Air, and Particularly How Mr. Bert Smallways Fared While It Lasted*, 1908

*Ann Veronica: A Modern Love Story*, 1909

*The New Machiavelli*, 1910

*The History of Mr. Polly*, 1910

*Marriage*, 1912

*The Passionate Friends*, 1913

*The Wife of Sir Isaac Harman*, 1914

*The World Set Free: A Story of Mankind*, 1914

*Bealby: A Holiday*, 1915

*The Research Magnificent*, 1915

*Mr. Britling Sees It Through*, 1916

*The Soul of a Bishop: A Novel—with Just a Little Love in It—About Conscience and Religion and the Real Troubles of Life*, 1917

*Joan and Peter: The Story of an Education*, 1918

*The Undying Fire: A Contemporary Novel*, 1919

*The Secret Places of the Heart*, 1922

*Men Like Gods*, 1923

*The Dream*, 1924

*Christina Alberta's Father*, 1925

*The World of William Clissold: A Novel at a New Age*, 1926 (3 volumes)

*Meanwhile: The Picture of a Lady*, 1927

*Mr. Blettsworthy on Rampole Island*, 1928

*The King Who Was a King: The Book of a Film*, 1929

*You Can't Be Too Careful: A Sample of Life, 1901-1951*, 1941

## DISCUSSION TOPICS

- To what extent were the early novels of H. G. Wells aimed at undermining the utopian works of such writers as Edward Bellamy and William Morris?
- Does Wells make clear the distinction between the profession of science, which he admired, and its practitioners?
- Is the social analysis in *Tono-Bungay* still effective a century after it was written?
- Is the tone in Wells's novels often unnecessarily pedagogical?
- Wells once wrote that he would rather be considered a journalist than an artist. What aspects of Wells's work seem more journalistic than artistic?

SHORT FICTION:

*The Stolen Bacillus, and Other Incidents*, 1895  
*The Plattner Story, and Others*, 1897  
*Thirty Strange Stories*, 1897  
*Tales of Space and Time*, 1899  
*The Vacant Country*, 1899  
*Twelve Stories and a Dream*, 1903  
*The Country of the Blind, and Other Stories*, 1911  
*A Door in the Wall, and Other Stories*, 1911  
*The Short Stories of H. G. Wells*, 1927 (also known as *The Complete Stories of H. G. Wells*, 1966)  
*The Favorite Short Stories of H. G. Wells*, 1937 (also known as *The Famous Short Stories of H. G. Wells*, 1937)

## IRVINE WELSH

**Born:** Edinburgh, Scotland  
September 27, 1958

*Welsh is both famous and infamous for his unflinching portrayal of the violence-laden drug culture dominant in late twentieth century Edinburgh and Glasgow. He is further renowned for his creation of a realistic modern day Scots dialect, which he conveys phonetically in his novels, and for his pervasive dark humor.*

### BIOGRAPHY

Irvine Welsh was born in Edinburgh, Scotland, in 1958, and spent his childhood in blue-collar Muirhouse, an economically depressed Edinburgh neighborhood. His father was a dockworker and his mother a waitress; finances were tight for the family. At the age of eight, Welsh faced his first arrest for shoplifting. In adolescence he experimented with drugs, which led him to addictive behaviors in his early adulthood.

In 1974, at the age of sixteen, Welsh dropped out of Ainslee Park Secondary School with few skills and little ambition beyond seeking pleasure. He undertook a series of odd jobs to support himself and his drug habit. Dividing his time between Edinburgh and London, he worked variously as a dishwasher and a repairman. By 1978, he was employed as a punk-rock guitarist in London, performing with Stairway 13 and The Public Lice and enjoying the accompanying party scene. As a sideline, Welsh committed burglaries with his friends, spending his ill-gained profits on marijuana, speed, and heroin. Seeing the physical and mental consequences that such a lifestyle wreaked upon his mates, and perhaps tiring of a similar personal toll, Welsh distanced himself from the drug scene and by the mid-1980's was free of his addiction. Later he would draw upon his memories of those experiences when he wrote his debut novel, *Trainspotting* (1993).

Welsh enhanced his educational qualifications by completing a city and guilds certificate in electrical engineering. For the remainder of the 1980's, he renovated houses in a north London neighborhood and then sold them for profit. Ironically, Welsh, often perceived as a radical,

benefited from the conservative leadership of Margaret Thatcher, then prime minister of Great Britain, whose economic policies accounted in large part for the housing boom. In 1984, Welsh married Anne Ansty, a union that lasted twenty years before ending in divorce. Around 1990, the couple returned to Edinburgh, where Welsh took a civil service job in the city's housing department and eventually earned an M.B.A. from Heriot-Watt University. His thesis focused on equal opportunities for women in business.

Established once more on familiar turf, Welsh found himself reunited with former school friends, in whose company he soon enjoyed Edinburgh's rave scene. Spurred by nostalgia and an urge to commemorate his past through writing, Welsh revisited his diaries from earlier, more reckless years and began a draft of what would become *Trainspotting*, published by Secker and Warburg in 1993. Prior to its publication as a novel, sections of the work appeared in the literary magazine *Rebel Inc.* The critical response to the novel was mixed; it drew both praise and derision, but garnered Welsh recognition as a nominee for the Man Booker Prize. Because several judges expressed concerns that the novel was misogynistic in its portrayal of the treatment of women, *Trainspotting* failed to make the short-list for the award. However, the controversy surrounding its withdrawal from consideration gained Welsh and the novel as much, if not more, attention than the year's actual award recipient. The novel was nominated and received the Scottish Arts Council Book Award in 1994.

Welsh continued his career as a writer, expanding his oeuvre to include short fiction, plays, and film scripts. Though critical and commercial suc-

cess ensued, none of his later work received the acclaim and notoriety of his first novel. *Trainspotting* is considered Welsh's masterpiece and the standard against which all his subsequent work is judged, including the well-regarded stories of male bonding, *Glue* (2001) and *Porno* (2002), the sequel to *Trainspotting*.

Welsh reignited much of the controversy surrounding *Trainspotting* with the publication of his second novel, *Marabou Stork Nightmares* (1995), which included graphic scenes of violence against women and minorities even as the novel questioned the very legitimacy of male dominance via its connection to those same acts. *The Bedroom Secrets of the Master Chefs* (2006) is a less controversial novel, featuring the unlikely office pairing of a standard Welshian bad boy, marked by his fascination with sex and drugs and a lackadaisical work ethic, with a proverbial boy scout, a character type unfamiliar to Welsh's oeuvre.

In 1996, *Trainspotting* was adapted into a popular film by director Danny Boyle, renewing interest in the novel and increasing its international sales. Other commercial successes by Welsh include *Ecstasy: Three Tales of Chemical Romance* (1996), an exploration of the rave culture of the 1980's, and *Filth* (1998), a detective novel in which the inspector prefers indulging in sex and drugs to actual crime solving. Both paperback editions became number-one best sellers in the United Kingdom. Perhaps because of the success of the film *Trainspotting*, Welsh has increased his connections to that medium. He is a partner in two production companies, Jawbone Films and Fourway Films. As a playwright, Welsh has enjoyed mixed success. Though one of his plays closed after a two-week run, more successful productions include *Headstate* (pr. 1994), *You'll Have Had Your Hole* (pr., pb. 1998), and the musical *Blackpool* (pr. 2002).

In July 2005, Welsh married Beth Quinn, an American student twenty years his junior, whom he met while teaching a creative writing course in Chicago.

## ANALYSIS

Scottish author Irvine Welsh's stark, unsparing depictions of Edinburgh and Glasgow at the end of the twentieth century resemble in certain respects Irish writer James Joyce's presentation of "dear dirty Dublin" in his novels set at the beginning of

the same century, with one notable exception. Irvine Welsh leaves out the "dear." His nihilistic view of modern life for working-class Scots is brutal. The dark humor that characterizes his works offers little comic relief; instead, it serves to magnify the brutality and desolation.

Much of Welsh's fiction is composed of a series of broken first-person passages strung along a framework that frequently shifts between locations, times, and tellers. The structure frequently mimics the split-screen and multiple-level narratives of video and computer games, media formats with which the author and many of his readers are familiar. Welsh also pays homage to film techniques in his use of cutaways, fade outs, and montage. Alternate voices in Welsh's fiction offer competing perspectives on events, as is the case in *Trainspotting*. The multiple narrators, some heavily drugged, others coming down from a high, still others desperate for their next hit, appear unreliable. However, even in their altered states, most of the characters readily admit to their lies and become, in a sense, inverted truth-tellers.

In *Glue*, a further dimension is added—time. The characters narrate life episodes at ten-year intervals, revealing individual personalities, as well as change, if not growth, over the decades. Welsh's use of the Scottish vernacular, in particular his inventive phonetic spellings, is either loved or loathed by critics and occasionally challenges readers, but it captures the authentic street speech of the drug addicts, drop outs, and criminally inclined he depicts in his novels. This combination of inventive structure and original voice are trademarks of an Irvine Welsh novel.

A political conundrum dominates Welsh's works. Ostensibly his plots and themes reveal a rejection of Thatcherism, the conservative social and economic politics associated with Margaret Thatcher, prime Minister of Great Britain from 1979 to 1990. During her tenure, Thatcher argued against devolution, or home rule, for Scotland, fearing the country would be inundated with foreign immigrants and unable to function independently of Great Britain. Portrayals of epidemic drug addiction and rampant human immunodeficiency virus (HIV) infection among the disaffected youth of Edinburgh in *Trainspotting* and other novels appear an indictment of Thatcher's failed social policies. Ironically, economic progress enabled the

same conservative government to better provide for disenfranchised citizens in the form of social welfare programs and treatment centers. Both services are readily taken advantage of by the characters in Welsh's first novel. Thus, the author presents Britain and its government as enablers, allowing Scotland and its citizens to continue their addictions, both to dependence upon British rule and to drugs. Through their use of aliases and bogus addresses, characters procure additional government aid with no remorse; they relish duping their perceived oppressor in this manner. In contrast, Mark Renton in *Trainspotting* differs from his mates. Though he lives on the dole and barter clinic-issued opium on the street for his drug of choice, heroin, he is more attuned to the irony of his situation, observing that it does little good to blame the British.

Welsh's narratives are marked by intense depictions of aimless lives in bleak circumstances. Characters function (or more appropriately, malfunction) in a social network that revolves around abuse in its myriad forms. Illegal drug use, animal torture, and physical violence against women and men, including mates, abound in his novels. Most stories focus on the lives of men and fall into the category of masculinist fiction. The lives of young male drug addicts in *Trainspotting* are marked by a fascination with drugs, violence, football (soccer), and music. When excessive drug use has not rendered them disinterested in sex or completely impotent, they also obsess about, or engage in, sexual activities with young women, whom they frequently refer to in crude terms. Likewise *Glue*, the chronicle of four lifelong friends, focuses almost exclusively on male behaviors. In such works, Welsh posits the nature versus nurture question. Are the aggressive and violent behaviors of men biologically determined? Can society ever vanquish them? Welsh appears to answer in the affirmative to the first question and leave the second for readers to resolve.

In interviews, Welsh candidly discusses his former heroin addiction, reveals his postnationalist political views, and admits that his fiction portrays contemporary Scottish life as desolate and hopeless for many of its citizens. Responding to accusations from a handful of critics that his works promote a misogynist, racist, violent worldview, Welsh reminds readers not to confuse the author with his

characters. The two characters most frequently cited by critics for their inhumanity are Begbie, who features in *Trainspotting* and *Porno*, and Detective Bruce Robertson of *Filth*. Their vile behaviors, including torture and rape, warrant such derision, but certainly they are the monstrous creations, not the mind-set, of their creator.

## TRAINSPOTTING

**First published:** 1993

**Type of work:** Novel

*Welsh's first novel follows the lives of five loosely associated acquaintances as they navigate the dangerous, but seductive, counterculture of drugs and sex in Edinburgh, Scotland, in the 1980's.*

*Trainspotting* depicts the adventures of five young men in Edinburgh's violent, drug-infested, and depressed neighborhoods, an image at odds with the city's global reputation as a cultural center. Welsh's Edinburgh does not resemble the tourist destination, with its famed arts festivals, because he scrapes away the romantic veneer to reveal the city's underclass realities: addiction, acquired immunodeficiency syndrome (AIDS), and unemployment. When members of the gang journey to other locales, such as London, the scenery does not improve. The novel's tour guides go by the nicknames Rents, Sick Boy, Spud, Begbie, and Tommy. The majority of the stories are told by Rents, with his mates supplying the remainder in hodgepodge fashion. It is mainly an account of their parties and crimes. Their illegal activities include, among others, heists both major and minor and drug transactions and usage. Clearly the more shocking behaviors recounted in the novel fall under the category of people's inhumanity and their indifference to the suffering of others: a baby's crib death that does not stop a party, but merely relocates it; the arro-

gance of an HIV-positive man who engages in unprotected sex as a form of serial murder; and the premeditated killing of a dog executed as a practical joke.

The novel's title is a reference to the pastime of marking the arrival and departure times of trains in stations. It is also a metaphor for drug usage, a way to pass the hours when there is nothing better to do or hope for. Though dark humor, gritty realism, and cold pessimism prevail in Welsh's *Trainspotting*, the novel does provide a glimmer of hope for the future of its lead character. Though Mark Renton (or Rents) is a drug addict who endures numerous indignities to obtain his fixes, including rescuing opium suppositories from a befouled toilet, he neither glamorizes nor endorses his lifestyle. Throughout the novel, in actions and words, he expresses fatigue with his life's predictability and hopelessness. When finally he flees his mates and Scotland after a double-cross at the novel's end, it is with the intention of using his ill-gained money to go clean in Amsterdam, unlikely, since that city is another drug capital. Though Renton practices a skewed ethics—stealing from his partners in crime in order to save himself—he nonetheless breaks with the moral indifference of his comrades.

Characters in *Trainspotting* appear in other novels by Welsh, either in cameo roles, as in *Marabou Stork Nightmares*, or in larger roles, as in *Glue*. The novel *Porno* offers a reunion of sorts for the commiserating gang; the plot picks up where *Trainspotting* leaves off, following Rents's flight.

## GLUE

**First published:** 2001

**Type of work:** Novel

*A multivoiced chronicle of male bonding that follows four friends across three decades, beginning in early childhood and ending at middle age with the suicide of one.*

*Glue* is a novel that tracks male relationships and the maintenance of a group friendship over a thirty-year span of time, beginning in the 1970's and ending early in the twenty-first century. At ten-year intervals, Carl, Gally, Billy, and Terry report on their lives and reveal their changing perceptions of

self, each other, and the world. An atypical and postmodern bildungsroman (novel of development), Welsh's work multiplies both the focus and the time frame of that traditional form. Though his characters share similar childhood hardships and adolescent misbehaviors, the adult men they become are quite disparate. Two become career men: Billy, an aspiring boxer entangled in organized crime, and Carl, a disc jockey at a nightclub. Two remain intoxicated free spirits: Terry frequents pubs and pursues women; Gally frequents jail cells and pursues drugs.

In the first segment, moral codes are bequeathed to the four from the previous generation of men, their fathers: Never hit a woman, stand by your friends, and never snitch. These simple directives initially offer the boys a guide for life, but they fail them in the end, when one adult character's self-interest overrides his concern for the good of the group. Unlike *Trainspotting*, where a character's break from the pack was a necessary and even brave act, *Glue* suggests the opposite.

In terms of its style Welsh's fourth novel is reminiscent of *Trainspotting* and its cacophony of narrators, but *Glue* introduces a third-person narrative into the mix of character voices. Though suggestive of inhalant drug usage, the title of the novel actually refers metaphorically to the experiences that cement friendships, the adhesives that bond people for life.

## SUMMARY

Critics rank Irvine Welsh chief among a group of writers known as the Scottish Renaissance, the moniker an acknowledgment of the burgeoning literary scene in Scotland that began in the 1990's and continues into the twenty-first century. The impact of Welsh's fiction upon Scottish literature has been profound. Some critics claim his works have introduced a new structure for the novel itself, one incorporating modes adapted from video game, computer, and film formats. Whether his style has

truly revolutionized the novel, offering an authentic post-postmodern vehicle for storytelling, remains to be seen. Certainly Welsh's presentations of urban Scottish life at the turn of the twenty-first century offer a reactionary response to both Thatcherism and Scottish nationalism.

Dorothy Dodge Robbins

## DISCUSSION TOPICS

- What positive and negative attributes of male-dominant culture are revealed in Irvine Welsh's fiction?
- Examine how Welsh's *Trainspotting* dispels romanticized images of Scotland, its heritage, and its history.
- Explore how Welsh's dark humor both relieves and reinforces the despair and hopelessness of his characters' lives.
- In the aptly named *Glue*, how do sex, drugs, and rock and roll serve to bond Terry, Billy, Carl, and Gally? What other factors cement their friendship?
- The four mates in *Glue* inherit moral codes from their fathers. How do these codes help direct their behaviors, and under what circumstances do they fail to serve them?
- What is Welsh's attitude toward Scottish nationalism and independence?
- How do Welsh's plot devices, including his use of montage and competing narrators, reflect the disjunction of his characters' circumstances?

## PATRICK WHITE

**Born:** London, England  
May 28, 1912

**Died:** Sydney, New South Wales, Australia  
September 30, 1990

*Australia's most famous writer, White produced some of the most lasting works of modern literature.*

### BIOGRAPHY

Patrick White was born in London in 1912. He was the son of Victor White, a wealthy Australian farmer, and Ruth Withycombe, whose family had arrived in Australia from England some years before their marriage. White enjoyed a privileged childhood in rural Australia and then spent his adolescent years in boarding school in England. At seventeen, he returned to Australia and worked for some time in his family's sheep-farming business. During the 1930's, he traveled widely in Europe as his literary career began. It was during these years that his distinct personal and artistic identity took shape.

White served in World War II as a member of the Royal Air Force's intelligence division. He was stationed in Egypt and Greece as part of the Near Eastern campaign, in which Australians were extensively involved. During his time in Greece, he made the acquaintance of Manoly Lascaris, who was to become his companion for life. White and Lascaris returned to Australia after the war's conclusion, where they took up residence in the suburbs of Sydney.

As White's fiction became more acclaimed, he reaped the rewards and the burdens of celebrity, becoming the lightning rod of both praise and criticism from an Australian public hungry for a countryman to find a prominent place on the literary

map. White attempted to live a sedate life, surrounded by a close circle of friends. The spotlight of celebrity continued to intrude, however, culminating in 1973 when White won the Nobel Prize in Literature, the citation of which praised him for "bringing a new continent into literature." White, again refraining from excessive publicity, refused to go to Stockholm to claim the prize. (The prize was accepted for him by his close friend, the artist Sidney Nolan.) He did lend his prominence to several social causes as he became more politically active in the later years of his life. White opposed the spread of nuclear weapons, was in favor of land rights for Australian Aborigines, and was a staunch supporter of a controversial prime minister, Gough Whitlam. These interests, and his continued literary production, took up his time until his death on September 30, 1990.

### ANALYSIS

Like most writers, White began his career with what he came to regard as a literary apprenticeship. His first two novels, *Happy Valley* (1939) and *The Living and the Dead* (1941), were intensely disliked by their author, who discouraged publishers from reprinting them. Even after White's death, these novels have been very difficult for literary scholars, much less the general public, to lay their hands upon. White considered his literary career to have fully commenced with *The Aunt's Story* (1948), a judgment in which most of his critics concur. This novel began the series of artistically ambitious works that made White a major name in modern literature. *The Tree of Man* (1955) is a pastoral tale of frontier settlement, characterized by un-

sparing though affectionate portraits of the protagonists. This was followed by *Voss* (1957), generally considered to be White's major work, and then by *Riders in the Chariot* (1961), which is taken up largely with the idea of a few good individuals redeeming the immorality and pointlessness of their fellows. *The Solid Mandala* (1966) is a fascinating tale of twins. It began a more artistically experimental phase, exemplified by *The Vivisector* (1970), and *The Eye of the Storm* (1973). White's interests became more historical in *A Fringe of Leaves* (1976), which returned to the era of the European colonization of Australia, and *The Twyborn Affair* (1979), which is set amid the tumultuous changes of the early twentieth century. In the 1980's, White produced both a straightforward autobiography, *Flaws in the Glass: A Self-Portrait* (1981), and a fictional distortion of one, *Memoirs of Many in One* (1986). *Memoirs of Many in One* explores his homosexuality more openly than do previous books.

No one has ever accused White of lacking ambition. He excited much critical controversy during his lifetime. White's novels are massive not only in size but also in emotional and artistic scope. Each of his books seems to be trying to make a conclusive statement, in artistic form, about the nature of human experience. In this regard, White emulated such great international modernist writers as James Joyce and Thomas Mann. White's books use setting as the backdrop for the enactment of primal spiritual quests by characters who, though sometimes trapped by the mediocrities of everyday life, are always trying to assert themselves in some sort of higher dimension. This hardly means, though, that White does not delight in sketching individual traits for each of his characters, who are some of the most memorable personages in modern fiction.

Although White was the crucial force in the emergence of modern Australian literature, he never saw himself as an Australian nationalist or as someone whose first aim as a writer was to dedicate himself to recording the full variety of Australian life and society. Opposing the narrowness and anti-intellectualism that he saw as typical of much of the Australian society, White was often at odds with the fundamental values of other Australians. White's novels resonate, however, with the natural beauty and dynamic breadth of the Australian continent.

White was a writer of high seriousness who, al-

though hardly lacking humor, had a very earnest sense of artistic mission. His works possess deep spiritual energy and are open to a tremendous depth of interpretation. By the end of the twentieth century, this very serious attitude toward fiction was somewhat out of style. More ironic attitudes toward art had more currency. Thus White's reputation suffered in the years after his death. Yet it may be argued that White's sense that art mattered, that it could make a difference, is what will endear him most to readers of future generations.

## THE AUNT'S STORY

**First published:** 1948

**Type of work:** Novel

*Theodora Goodman, as her name suggests, is a good person in search of acceptance.*

*The Aunt's Story* tells the tale of Theodora Goodman, an eccentric. One of White's aims in the book is to upend conventional notions of what is and is not normal. Although Theodora is different from most other people, the reader is led to conclude that this difference makes her, if anything, superior to the majority of other human beings, who lack her sensitivity, creativity, and depth. Theodora epitomizes these qualities, which belong to everyone, although the demands of everyday society may often require that they lay dormant.

*The Aunt's Story* is an autobiographical work. In the manner of such classics as George Eliot's *The Mill on the Floss* (1860) and Marcel Proust's *À la recherche du temps perdu* (1913-1927; *Remembrance of Things Past*, 1922-1931), the novel attempts to chart the growth and development of a soul. There is a difference, however, in White's novel. The other authors portray their souls as representative, as typical human selves in whose experience the reader can participate with ease. White, on the other hand, focuses deliberately on an eccentric and wayward soul, in order to show the value of personal qualities that are often despised or repressed by society. The tension between the individuality and universality of Theodora's predicament is displayed in her name. Theodora means gift of God in Greek, and her surname clearly alludes to the goodness present in the individual.

Theodora is one of two daughters born to George Goodman, an irresponsible landowner who is an irresistible force in the life of his two daughters. The Goodmans live in a house named Meroë, after an ancient Ethiopian kingdom. As a girl, Theodora lives under the illusion that Meroë contains the entire world. Meroë, to the young Theodora, is a self-sufficient universe where she can withdraw into her own private daydream world, secure in the knowledge that Meroë and her father will protect her from any outside harm. Of the two sisters, Theodora is imaginative, creative, and artistic. Fanny is practical, conventional, and worldly. George Goodman is simultaneously dominating and incompetent. Theodora's childhood takes place under his shadow.

The Goodmans move, under financial pressure, to the urban center of Sydney as Theodora approaches adulthood. This move away from Meroë has the air of an expulsion from Eden to it. Theodora is ejected from the protective cocoon of her childhood and is confronted with the great outside world. Theodora finds that her relationships as an adult are colored by her regret at losing her childhood world of innocence. This affects her romantic relationship with Huntly Clarkson, a young gentleman who is attractive in the eyes of Sydney society. Clarkson is likable and easy mannered, but Theodora nevertheless rejects him because he is too materialistic and too much at home in the world, insufficiently in touch with the unusual states of consciousness that have come to dominate Theodora's psyche. Theodora has a brief relationship with a man who is more artistic, a cello player named Moraitis, but they are unable to build anything permanent.

In the second part of the novel, Theodora goes to Europe. It is the era between the two world wars, a time of brilliance and decadence. Theodora stays at the Hôtel du Midi, which is a microcosm of European culture and society. Among the representative personages Theodora encounters are General Sokolnikov, a garrulous Russian émigré, Mrs. Rapallo, an allegorical figure who assists Theodora in coming to terms with the unresolved legacy of her fantasies, and Katina Pavlou, a young woman who serves as an object of fantasy for Theodora, who attempts to save Katina from the perils of the adult world to which Theodora believes Katina has fallen prey.

These relationships, though, are transient, not providing Theodora with any stabilizing anchor. This transience leads to the pathos of the third part of the novel. Theodora finds herself in the United States. She has an encounter with a man named Holstius, which, though brief, provides her with more of a soul mate than she has ever possessed. After leaving Holstius, Theodora roams aimlessly across the country. She finally reaches her end in the home of a Midwestern farm family, the Johnsons, who, though not understanding her creativity, treat her with the compassion and humanity she has long deserved. They enable Theodora to die with dignity and honor.

## Voss

**First published:** 1957

**Type of work:** Novel

*A major novel, occupying a central position in Australian literature, Voss tells of epic discovery and epic defeat.*

*Voss* is not only considered Patrick White's greatest novel, but is most probably the greatest single work of Australian literature. *Voss* is a story of a German explorer of the Australian outback in the nineteenth century. The title character is often compared to a historical figure, the German-born Australian explorer Ludwig Leichhardt, but the inspiration behind White's character is symbolic, not historical. Johann Ulrich Voss is not pictured simply as an explorer, whose primary aim is the opening up of new geographic territory. He is, equally, an investigator into undiscovered realms of the human spirit, symbolized but not fully expressed by the wild and desolate beauty of remote Australia.

When *Voss* comes to Australia, he is a confident, even arrogant specimen of European masculinity. His mission of exploration is an assertion of mastery, of certainty that Voss has the power to penetrate the unknown and gain the upper hand over whatever secrets that the unknown may possess. When Voss arrives in Australia, he makes the rounds of Sydney's high society, seeking to raise money to finance his expedition. During the course of these fund-raising efforts, Voss encounters Laura Trevelyan, a young, beautiful Sydney so-

cialite. Voss and Laura are immediately attracted to each other, but their attraction is not ever fully realized. Voss and Laura are, superficially, very different. Voss is brawny and action-oriented, and Laura has spent her life amid upper-class frivolity, although she is far less corrupted by her milieu than her cousin, Belle Bonner. Laura achieves a more authentic emotional insight into Voss's mission than do the explorer's other financial backers who are more overtly encouraging.

Voss leaves Sydney and embarks on his great quest. Accompanying him on his expedition are a number of men, most prominent among them the poet Frank Le Mesurier. Le Mesurier represents intellect as compared to the strength of Voss, the internal world as opposed to the external. Le Mesurier also symbolizes aspects of Voss's own character.

The expedition, after journeying to Newcastle by sea, goes through the Hunter Valley to the small town of Rhine Towers, which is depicted as bucolic and idyllic. Then the group goes through the hilly New England region and across the Queensland border to the hamlet of Yildra, which is the last beacon of civilization before their plunge into the outback.

White derived his picture of the outback not as much from literal experience as from the landscape paintings of his friend Sidney Nolan. The final portion of the novel, accordingly, becomes less realistic and narrative and takes on poetic and symbolic overtones. As the heroism of the expedition becomes more impressive and praiseworthy, the sense of its inevitable doom becomes all the more resonant. These men not only fail, but die. Le Mesurier's death begins the expedition's sense of its own failure. His death also foreshadows the death of the protagonist. By the time Voss meets his end, he has lost his confident arrogance and has been made wise by suffering. His material defeat is his spiritual victory.

As Voss is dying, he has a final vision—of Laura Trevelyan, long since left behind. Laura experi-

ences a vision of Voss at the same time, thousands of miles away in her secure Sydney residence. This spiritual communion underscores the main point of the novel: What occurs within the human soul, not within the easily categorized achievements of the outer world, is what is truly significant.

## THE VIVISECTOR

**First published:** 1970

**Type of work:** Novel

*Hurtle Duffield, a painter of humble origins, struggles with his divided, conflicting nature.*

*The Vivisector* is White's most concentrated study of the nature of artistic genius. Like *The Aunt's Story*, it is about an individual marked off from his peers at an early age by an unusual creativity. Unlike Theodora Goodman, however, the protagonist of *The Vivisector*, Hurtle Duffield, is not merely an eccentric victim of society's prejudice. Duffield harnesses his creativity into the production of paintings, channeling his talent into a concrete and socially recognized outlet. His art nevertheless stands as a testimony to his unique, sensitive, and tough-minded soul. In telling the story of the life and fortunes of an artist, White places his novel in the European tradition known as the *Künstlerroman*, or "novel of the artist." Such a novel not only conveys the biography of an artist, it also serves to reflect upon the nature of art and the role of art in life. *The Vivisector* is no exception to this tradition.

Young Hurtle Duffield is early recognized for his artistic potential. Hurtle loves his parents and is appreciated by them, but the Duffield family is mired in poverty and knows Hurtle is fundamentally different. Seeing this situation, Mrs. Courtney, a wealthy patron of the arts who has noticed Hurtle's talent, offers to pay the Duffield family a sum of £500 in order to gain the right to bring him up herself. Even at the age of eight, Hurtle, through his separation from his family, comes to understand that artistic achievement may necessitate sacrifice.

The Courtneys provide Hurtle with comfortable surroundings, but they are shallow and bourgeois, failing to understand his creative temperament. It

is only in adulthood that he is fully free to create for himself. A symbol of this independence is his first romantic relationship, with a woman named Nance Lightfoot. Hurtle's relationship with Nance, however, is not a whole one. He is so preoccupied with his art that the only women with whom he can be involved are those who will not demand the entirety of his soul. Nance, for example, understands none of his paintings.

Hurtle achieves some success as an artist and travels to Europe. In Greece, he encounters another woman, Hero Pavloussis, with whom he has a romantic rendezvous in the island of Perialos. Less stable than Nance, Hero's experiences glide more seamlessly into Hurtle's art. The two lovers, nevertheless, do not achieve a permanent relationship, and Hurtle has a vision of the artist as a great vivisector always cutting open other people's experiences, hurting and damaging in order to create. Far from any conventional view of the artist as celebrant of optimistic creativity, Hurtle's witheringly honest reconciliation with his own artistic conscience epitomizes the dilemmas of an artist in the modern era.

Hurtle returns to Australia and old age. In his last years, he encounters two more women who, in the manner of Nance and Hero, function as gauges of his own personal and artistic development. Hurtle's relationships with these women, however, are not of a sexual nature. Rhoda Courtney is the

daughter of Hurtle's former patron and foster mother. Rhoda is physically and mentally disabled. Far from receiving the special treatment accorded to Hurtle by the admiring Courtneys, Rhoda is abandoned and neglected. Hurtle, though, comes to treasure Rhoda as a friend and companion. Kathy Volkov is a young girl who becomes an artistic protégé of Hurtle. Hurtle sees something of himself in Kathy. He is hopeful that Kathy possesses talent such as his without the psychological burdens Hurtle has had to bear. Perhaps Kathy will be able to create without becoming a vivisector.

Hurtle is feverishly working on a painting when he feels death approaching. Slipping across the border of life, he sees flash before his eyes an ideal of spiritual and artistic wholeness he has failed to achieve in life. This ideal is an indigo-colored vision, verging upon divinity.

## SUMMARY

Patrick White's massive and complex novels stand as monuments to the artistic ambitions of the modern age. With a strangeness and an expansiveness as outsized as the Australian continent from which they emanated, they enact fundamental oppositions of the human spirit. It is hard to decide which is the most impressive facet of White's talent—his artistry or his daring. White's works will be read as long as the craft of fiction is cherished.

**DISCUSSION TOPICS**

- What advantages did Patrick White enjoy in having early familiarity with both European and Australian life?
- Does the protagonist of Patrick White's *The Aunt's Story* find success in the United States primarily because of the virtues of the country or because her previous experiences have made her wiser?
- What is the significance of Voss, in the novel named for him, being a German?
- Is Hurtle Duffield's search for the artistic life crowned by success?
- Might White's theory of fiction and his accomplishments in it suggest the likelihood of a rise in his reputation among critics as the twenty-first century progresses?

## RUDY WIEBE

**Born:** Fairholme, Saskatchewan, Canada  
October 4, 1934

*Wiebe has raised the history of the people of the Canadian prairie to the level of modern epic and moral parable.*

### BIOGRAPHY

Rudy Henry Wiebe (WEE-bee) was born in a one-room log cabin near Fairholme, Saskatchewan, Canada, on October 4, 1934, the youngest son of Abram and Tena Knelsen Wiebe, devout Mennonites who had fled Russia in 1930. They had settled as hardy pioneers in the tiny community of Speedwell-Jackpine, a hundred miles northwest of Saskatoon, in the bush and prairie country of northern Saskatchewan.

On many a long winter night, Rudy would listen, entranced, to Mennonite stories of a Russia where czars and Bolsheviks had terrorized villages, wars and religious disputes had torn communities asunder, and much hardship and sometimes starvation had afflicted many. Those stories, told in a Frisian dialect of Low German, made a deep impression on the child. The bleak, empty but forceful presence of the environment outside the home also did. Both would affect his stories that were to come.

When he started school in a one-room schoolhouse, Rudy had to learn English, but he proved an eager student. By the time he was in the fourth grade, he had consumed all the books in the one-shelf library. In 1947, the family moved to Coaldale, Alberta, where Rudy enrolled at the Alberta Mennonite High School, whose warm harmonious spirit affirmed the young adolescent's faith and impressed on him the importance of a community that not only preaches but also practices the good moral life.

Entering the University of Alberta in Edmonton in 1953, Wiebe soon discovered his love for language and literature. Encouraged by his teachers, Wiebe at age twenty-one entered a short story contest and won first prize. A year later he became a published writer when his short story "The Power"

was chosen to appear in *New Voices: Canadian University Writing of 1956*.

After he graduated with a B.A. in 1956, Wiebe put his skills to work as a research writer, but his real ambitions lay in academia. Various fellowships enabled him to study for a year at the University of Tübingen in Germany and then to continue his graduate studies at the University of Alberta. In 1958, he married Tena F. Isaak, with whom he would have two sons and a daughter. Wiebe earned an M.A. in creative writing, added a bachelor's of theology from the Mennonite Bible College in Winnipeg in 1961, taught high school English for a year in Selkirk, Manitoba, and then accepted an appointment as editor of *The Mennonite Brethren Herald* in Winnipeg.

It was a short-lived position, for in that same year, 1962, his first novel, written as his master's thesis, was published. The title, *Peace Shall Destroy Many*, proved ironically prophetic. The Mennonite community felt attacked by the book, which takes a critical look at religious inconsistency and hypocrisy, and in the waves of controversy that ensued, Wiebe resigned his editorial post and soon joined the English department of Goshen College in Indiana, where he taught from 1963 to 1967.

The stinging rebuke of many of his own people did not silence the author. He continued to pursue his literary ambitions by studying creative writing at the University of Iowa in 1964 and by publishing his second novel, *First and Vital Candle*, in 1966. This novel, a fervent critique of what constitutes a genuine Christianity, was adapted for radio in 1967. Wiebe's alma mater, the University of Alberta in Edmonton, offered him a teaching position in creative writing. For the next twenty-four years, he combined teaching at that university and writing, honing his craft toward the level of major art.

The decade of the 1970's was a highly productive one. *The Blue Mountains of China* was published in 1970, followed by *The Temptations of Big Bear* in 1973, which received the distinguished Governor-General's Literary Award. Encouraged, and with his critical reputation well established, Wiebe went on to publish two volumes of short stories, another novel, and a play within the decade. Other novels and a short story volume followed in the 1980's. In addition to writing and teaching, Wiebe maintained a busy lecture schedule that took him to five continents, while also putting in a two-year stint as chair of the Writers Union of Canada.

After his retirement from the University of Alberta in 1991, Wiebe turned to full-time writing. In 1992, he published *Chinook Christmas*, a children's book illustrated by David More, and in 1994, another major novel appeared, *A Discovery of Strangers*. Wiebe received his second Governor General's Award in 1994 for *A Discovery of Strangers*. He also was awarded the Lorne Pierce Gold Medal of the Society of Canada for his contributions to Canadian literature.

## ANALYSIS

Much of Rudy Wiebe's writing is profoundly informed by his Mennonite background and his moral convictions of how the human community ought to conduct its life. An inherent danger for any author who writes out of a strong ideology is to lapse into didacticism or moralism. Wiebe does not entirely escape that trap, especially in his early novels. Such lapses are usually brief, and in his later fiction the message increasingly is within the art rather than being superimposed upon it.

Basic to Wiebe's moral framework is the belief that the essence of being human is spiritual. When the human link to God is broken or subverted, the consequence is invariably internal and external dissonance. Abe Ross in Wiebe's second novel, *First and Vital Candle*, is one among many of Wiebe's characters who represents that dissonance. Alienated from the faith of his childhood, he feels empty and lost. He searches for meaning in other faiths as a trading company agent among the Ojibway Indians in northern Ontario. When he meets the demoniac Bjornesen, who, without a conscience, exploits and corrupts the Indians, Ross is ready to kill him. The example and words of missionary Josh Bishop persuade Ross, however, of the Christian

truth that evil can only be overcome with good. Sally Howell, teacher of Indian children, breaks down his agnosticism with her love and spirituality. When she dies, Ross is alone but ready to embrace the faith he had lost.

A second basic tenet of Wiebe's religious view is that God means for people's lives to be lived in harmony with and service to others. People are expected to look out for others rather than for themselves. When the link to God is intact and forged by a right understanding, it must follow that the link to one's neighbor is also. When the first link is broken or weakened by misconceptions, the relationship to one's neighbor is necessarily affected. This theme dominates Wiebe's fiction. Wiebe's first novel, *Peace Shall Destroy Many*, in particular, dramatically—and sometimes dogmatically—drives home the message that any community (such as the Mennonite town of Wapiti) that lives only to preserve its own peace and well-being, with callous disregard for others, becomes self-destructive. Though Wiebe in his first novels too often manipulates plot and character and allows message to substitute for art, many scenes are rendered with power and promise of greater things to come.

In *The Blue Mountains of China*, that promise is amply fulfilled. Boldly experimental, Wiebe skillfully handles multiple settings, narrators, and points of view as he chronicles almost a century of Mennonite history. For all its complexity and variety, the message is still the same: The human community will succumb to greed, pride, and self-interest if it is not firmly guided by a moral vision of responsibility, integrity, and self-sacrifice.

Wiebe's next novel drew considerable critical attention. In *The Temptations of Big Bear*, Wiebe shifts the focus away from his own ethnic and religious roots, though not from northern Saskatchewan. Wiebe had discovered that Big Bear, the powerful chief of the Plains Cree, had once lived where he did, and the idea intrigued him profoundly and led him to a third thematic interest: the connection between self and the land. In his first novel, Wiebe alludes to the great-granddaughter of Big Bear.

Hearing her tell of Big Bear, Louis Riel, Wandering Spirit, Thom glimpsed the vast past of Canada regarding which he was ignorant as if it had never been: of people that had lived and acted as nobly as they knew and died without fear.

Wiebe wrote *The Temptations of Big Bear* to rectify that ignorance. In *Big Bear* and through Louis Riel, the leader of the Métis in *The Scorched-Wood People* (1977), he re-creates historical characters who tried to change the course of history, endowing them with heroic and tragic stature. Both men refused to accept the white man's terms that would take away their land, their way of life, their culture, and their identity. Wiebe's most inspired writing occurs in the voice of Big Bear, a voice whose poignant beauty and poetic eloquence reduce many of the white man's speeches to mere chatter. Big Bear and Riel represent the author's ideal. They are men of great spiritual depth and power, of peace and wisdom, of nobility and vision who suffer on behalf of their people, men who inspire awe and profound respect.

Wiebe's fiction does not make for easy reading. Highly experimental, he often employs a variety of narrative techniques, multiple voices, and radical shifts in point of view and time. The serious reader nearly always is amply rewarded.

*A Discovery of Strangers* reminds readers of the power of Wiebe's art. He deals with the land and the epic events that played themselves out on that land. It is the story of John Franklin's first expedition to the Arctic in 1820. All the characters are based with realistic accuracy on real people, and all the events in the novel actually happened. The beauty of Wiebe's prose and his narrative skill transmute history into a compelling meditation on the human condition.

In all of his fiction, Wiebe celebrates the heroic, both physical and moral. Clearly committed to a moral and spiritual view of the human community, he shows the reader what people can be and what people ought to be, in contrast to what people all too often are. Wiebe has said that his fiction intends "to make us better."

## PEACE SHALL DESTROY MANY

**First published:** 1962

**Type of work:** Novel

*A young man must choose between the peace of an isolated and insulated Mennonite community and the cause of peace in a war-torn world.*

*Peace Shall Destroy Many*, Wiebe's first novel, is about the moral failures and triumphs that define the life of the human community, in this case the small Mennonite community of Wapiti in northern Saskatchewan.

The backdrop for the story is World War II. Military planes fly training missions above the town, disturbing the peace of the community, causing stillbirths among the cattle. Young Thom Wiens, plowing the fields under those planes, resents their intrusion and the violence with which he knows they are connected. The novel traces Thom's growing awareness that pacifism may be self-serving, that the apparent peace of a community may be artificial and mask the violence lurking beneath, and that peace and violence are often inextricably entangled.

Thom's mentor in his moral and intellectual awakening is Joseph Dueck, a teacher, whose penetrating questions and progressive views disturb the community's peace as much as do the planes overhead. Representing the orthodoxy of the community is Deacon Peter Block, the founder of Wapiti, an authoritarian moral watchman, and a forceful preserver of tradition. Thom discovers that this tradition includes a smug superiority that allows the Mennonites to think of and treat the Métis and Indians among them as subhuman. The tradition does not allow for active participation in war but feels free to profit from that war by selling the community's produce to the soldiers. The tradition wields authority but lacks the warmth of a compassionate heart. The tradition has bred hypocrisy, greed, hate, and bigotry.

Thom's education comes to dramatic completion in the last chapter. During the traditional Christmas pageant, he tries to clarify to himself where the star of Bethlehem that the wise men followed had led them: to the war in Europe or to the peace of Wapiti. He discovers the answer when, in a nearby barn, violence explodes, triggered by sex-

ual passion. The appearances of a town and a people, so carefully guarded, are pierced, exposing the failures underneath. Wapiti too has been at war. It too is in need of peace, real peace—the peace of God.

Wiebe found his thematic center in this first novel, but he was still struggling to develop a craft that would make his narrative aesthetically pleasing and a consistent joy to read. Some skills are already well applied in the first novel. The four-season structure of the narrative effectively supports the plot. The characters too are clearly defined and developed. The dialogue is often forced and flat, however, and the preachiness weakens the message. This first novel, a young man's novel, is impressive in its moral seriousness and shows much potential for further artistic growth.

## THE BLUE MOUNTAINS OF CHINA

**First published:** 1970

**Type of work:** Novel

*In their historical struggle to find a homeland, the Mennonites face a choice between isolation or assimilation.*

In *The Blue Mountains of China*, Wiebe offers a sweeping, panoramic view of Mennonites as they moved from Russia to Paraguay to China to Canada between the 1920's and the 1960's. A deliberately disjointed narrative tells the story of families who face the terrors of persecution and death, who exhibit acts of cowardice and courage, who confront the temptations of success and unbelief.

Central to this saga is the voice of Frieda Friesen, who at age eighty-four tells of the past. The past includes the hardships of poverty, marriage, the birth and death of many children, migration from Canada to Paraguay, plagues, epidemics, and wars. It is the quiet voice of faith, rock-steady even through intense turmoil and severe trials. Frieda's voice is interspersed with other voices. (In fact, a different point of view informs each chapter, a considerable challenge even to the serious reader.) The voices

include that of Jakob Friesen, a cousin of Frieda who speaks not of faith but of unbelief. Jakob Friesen, who tried to live for self, betrayed his son, was sentenced to ten years in Siberia, and when he was released found he had lost his family as well as his faith in the goodness of God.

There is also the story of David Epp, who, inspired by the moral courage and rectitude of his parents, leads a group of Mennonites to safety across the border to China. Then he returns to their Russian village to take the punishment upon himself. This spiritual legacy is passed on to his son, whom he never sees, but who later becomes a missionary among the Indians in a remote part of Paraguay. The spiritual force of David Epp's example also generates the story of Sam Reimer, who hears God calling him to proclaim for peace in Vietnam. When Sam dies, the inspiration to serve God that passed from father to son passes from Sam to his brother John. John Reimer literally takes up his cross and walks across Canada, a living example that the promised land for Mennonites or any human community will not be found in withdrawal or material success and security. It lies rather in a state of inward peace that comes from doing justice, from showing mercy, and from walking humbly with God.

Wiebe blends many voices in the last chapter, including the lapsed Mennonites who because of materialism, intellectual doubt, or emotional trauma have abandoned the faith, and John Reimer, the man of faith. Their community is splintered, with too many severed from the most vital connections. There is little hope that it will ever be whole again. Though Wiebe's message is similar in his first three novels, his increasing artistic finesse and control are evident in this novel. Stylistic variety and structural inventiveness provide an impressive display of the author's maturing skill.

## “THE NAMING OF ALBERT JOHNSON”

**First published:** 1974 (collected in *Where Is the Voice Coming From?*, 1974)

**Type of work:** Short story

*A fugitive from justice eludes the Mounties for fifty winter days across hundreds of miles of frozen tundra north of the Arctic Circle.*

“The Naming of Albert Johnson” is based on a mysterious, silent, and real person known to millions in the early 1930’s as the Mad Trapper of Rat River. (Wiebe published a novel in 1980, *The Mad Trapper*, that amplifies this story.) After he shoots a member of the Royal Canadian Mounted Police, the trapper becomes the object of a relentless chase. He becomes the first man in history to cross the forbidding Richardson Mountains in the dead of winter. No one ever discovered his real name, but he came to be known as Albert Johnson. Johnson is a self-exiled, wordless, solitary figure who shuns any human contact. He survives by his skills as a trapper in the Northwest Territories. When a Mountie, who is investigating thefts from Indian traplines, approaches him, the trapper shoots without hesitation. The pursuit is on.

Wiebe tells this first-rate adventure story from Johnson’s point of view, a clever strategy, for it increases the likelihood of reader sympathy with the lone villain, who might otherwise be without dimension as character. The villain turns out to be no ordinary mortal. Words do not define him, but an indomitable will and force do. He pits himself against a large posse of Mounties with more than forty dogs. They dynamite his cabin, but he escapes.

With superhuman courage and strength he outruns them through mountain passes where no human has ever ventured in winter. With animal cunning he outsmarts the dog teams, the radiomen,

and even the tracking plane overhead. He keeps going with little sleep and food in spite of frozen toes and cheeks. His tenacity and brooding rage are wordless. Those who venture too close he picks off with his unerring rifle. For fifty days he makes fools of the well-fed, well-equipped group of Mounties, with the frozen landscape a mute witness to this unequal chase. A river looping back on itself betrays him. Suddenly the dogs and the men are upon him. Finally there remains only a small crumpled body on a bedroll, a bullet in its spine, and a face frozen into a permanent snarl. All around, there is the immensity of the blasted Yukon, an appropriate symbol for the lonely anonymity of the Mad Trapper.

The story itself does not follow chronological order. Wiebe begins with the end of the hunt, and then unwinds time in reverse. The effect is that the story does not move toward climax, but toward a growing sense of wonder about the antihero, this exile from the human community and from communication. The reader cannot help but feel admiration for the extraordinary survival skills of the nameless man. More importantly, Wiebe elicits the reader’s sympathy for the human condition that can produce an Albert Johnson, disconnected from all sense of human belonging, whose blighted sense of significance can only assert itself destructively.

### SUMMARY

Like Leo Tolstoy, whom he admired, Rudy Wiebe intended for his fiction to make a difference. Though his early fiction suffered from too much moral freight, Wiebe evolved from a regional Mennonite writer to a literary artist of international acclaim and significance. His unconventional technique often puts a strain on readers, but they are engaged by his passionate, eloquent voice, by his vision that exposes threats to the moral fabric of the human community, and by his insistence that history can teach and inspire.

Dueck, Allan. "Rudy Wiebe's Approach to Historical Fiction." In *Canadian Novel*. Vol. 1 in *Here and Now*, edited by John Moss. Toronto: NC Press, 1978.

## DISCUSSION TOPICS

- What are the advantages and disadvantages for a writer of being reared as a Mennonite, as was Rudy Wiebe?
- What was Wiebe's agenda in *Peace Shall Destroy Many* beyond his mastery in a first novel?
- What aspects of Wiebe's background made him a likely writer to deal effectively with a subject like the John Franklin expedition?
- Why was *The Blue Mountains of China* "deliberately distorted narrative"?
- Why, in Wiebe's opinion, do isolated communities fail to achieve peace?

## ELIE WIESEL

**Born:** Sighet, Transylvania, Romania  
September 30, 1928

*A Jewish survivor of Auschwitz and the recipient of the Nobel Peace Prize in 1986, Wiesel has authored more than forty books—including *Night*, his classic memoir—and is widely acknowledged as one of the most important writers to emerge from the Holocaust.*

### BIOGRAPHY

The journey that took Elie Wiesel (vee-ZEHL) through the Holocaust, the systematic destruction of nearly six million Jews by Nazi Germany during World War II, began in his native Romania, in Sighet, where he was born on September 30, 1928. Reared in a religious home, Wiesel was the third child and only son born to his parents, Shlomo and Sarah Feig Wiesel. Sighet, his hometown, was in the northern area of a region known as Transylvania. Sighet's residents at that time included some ten thousand Jews, about 40 percent of the population, and most of them were religiously Orthodox.

Sighet's Jews were subjected to Hungary's anti-Jewish policies, which included socioeconomic discrimination and deprivation of basic civil rights. Wiesel's father, a shopkeeper in Sighet, was jailed for a time because he helped rescue Polish Jews who had found their way to Hungary. Nevertheless, the young Wiesel's worlds of study, faith, and Jewish tradition remained relatively undisturbed until the Germans occupied the territory of their faltering Hungarian allies in March, 1944. Within a few weeks, the Jews of Sighet were ghettoized and then deported to Auschwitz in four transports between May 16 and May 22. Wiesel survived the shattering experiences of that German death camp and went on to write about them in his classic memoir *Un di Velt hot geshvign* (1956; *Night*, 1960). His older sis-

ters, Hilda and Beatrice, also escaped death during the Holocaust, but Wiesel's mother, father, and little sister, Tzipora, did not.

Liberated from Buchenwald on April 11, 1945, Wiesel was assisted by French relief agencies and eventually established residence in Paris. With French as his adopted language, he plunged into literature and philosophy at the Sorbonne from 1948 to 1951. Unable to complete all of his university study because he had to support himself, Wiesel found employment as a journalist. Writing for Israeli, French, and American newspapers, he took assignments that sent him to Israel and then to New York in 1956 to cover the United Nations. He became a citizen of the United States in 1963.

During the first postwar decade, writing of more than a scholarly or journalistic kind had been on Wiesel's mind. Yet he had vowed to be silent about his Holocaust experiences for ten years, and thus it was only in 1956 that he published his first book. Written in Yiddish, *Un di Velt hot geshvign* was an eight-hundred-page account of his life in Auschwitz. Two years later, he pared the manuscript to little more than one hundred pages, translated the book into French, and published it as *La Nuit* (1958; *Night*, 1960). This memoir is the best-known work of his many writings and certainly the place to begin for any reader unacquainted with them.

More than forty of Wiesel's books have been published since *Night* appeared. None of the others focuses so explicitly on the Holocaust, but that event shadows every word that he writes, and thus all of his subsequent books are built around *Night*'s testimony. Wiesel followed *Night* with two short

novels, *L'Aube* (1960; *Dawn*, 1961) and *Le Jour* (1961; *The Accident*, 1962). His fiction became longer and more complex with *La Ville de la chance* (1962; *The Town Beyond the Wall*, 1964) and *Les Portes de la forêt* (1964; *The Gates of the Forest*, 1966). By 1965, he was winning book awards such as the French Prix Rivarol and the National Jewish Book Council Literary Award.

In the year after he published *Le Mendiant de Jérusalem* (1968; *A Beggar in Jerusalem*, 1970), one of his most brilliant novels, Wiesel married Marion Rose, a native of Vienna and also a survivor of the Holocaust. She began doing the English translations of Wiesel's writing, which were originally written in French. In 1972, Wiesel was appointed distinguished professor in the department of Jewish studies at City College of the City University of New York, a position he held until 1976, when he became Andrew W. Mellon Professor in the Humanities at Boston University.

Also in 1972, Wiesel published one of his best-loved books, *Celebration hassidique* (1972-1981; translated as *Souls on Fire*, 1972, and *Somewhere a Master: Further Hasidic Portraits and Legends*, 1982). In this book and several others that he has written subsequently, Wiesel uses his post-Holocaust perspective to retell the stories of teachers who led a pre-Holocaust tradition of Jewish spirituality known as Hasidism. Especially strong in Eastern Europe, Hasidism influenced Wiesel's town and family. Many followers of this tradition perished in the Holocaust. Wiesel strives to keep the memory of them and their Hasidic tradition alive.

Awarded honorary degrees by Wesleyan University (1979), Brandeis University (1980), and Yale University (1981), to name only a few, plus literary prizes such as France's 1980 Prix Livre-Inter (for *Le Testament d'un poète juif assassiné*, 1980; *The Testament*, 1981), Wiesel accepted new responsibilities when President Jimmy Carter appointed him to chair the United States Holocaust Memorial Council, which is charged to honor the dead, remember the past, and educate for the future. He served in this position from 1980 to 1986. During this period, his prolific writing continued, as did his long-standing commitment to humanitarian causes.

Wiesel's writings are repeated protests against injustice. Buttressing his words with deeds, Wiesel has spent much of his life protesting on behalf of oppressed people and interceding with world lead-

ers to help those in need. His words and deeds alike were distinctively recognized in ceremonies held in Oslo, Norway, in December, 1986, when he received the Nobel Peace Prize. He used his Nobel Prize to establish The Elie Wiesel Foundation for Humanity, which supports educational efforts aimed at reducing hatred and the destructive conflict that it produces. Such themes continue to be dominant in books such as his novels *Le Crépuscule, au loin* (1987; *Twilight*, 1988) and *Les Temps des déracinés* (2003; *The Time of the Uprooted*, 2005), as well in *Sages and Dreamers: Biblical, Talmudic, and Hasidic Portraits and Legends* (1991), which is based on lectures that Wiesel has given for many years in New York, and *Wise Men and Their Tales: Portraits of Biblical, Talmudic, and Hasidic Masters* (2003). Important insights about Wiesel and his authorship will also be found in his two-volume autobiography, *Tous les fleuves vont à la mer* (1994; *All Rivers Run to the Sea*, 1995) and *Et la mer n'est pas remplie* (1996; *And the Sea Is Never Full: Memoirs*, 1999).

## ANALYSIS

"I never intended to be a philosopher," insists Wiesel. "The only role I sought was that of witness. I believed that, having survived by chance, I was duty-bound to give meaning to my survival, to justify each moment of my life." Many optimistic assumptions about the innate goodness of human nature, humanity's moral progress, and even love itself were incinerated at Auschwitz. Yet Wiesel, the survivor, testifies that despair is not the answer. His writings sustain the plea that death deserves no more victories and that evil should never have the last word.

"The Holocaust," writes Wiesel, "demands interrogation and calls everything into question. Traditional ideas and acquired values, philosophical systems and social theories—all must be revised in the shadow of Birkenau." Birkenau was the killing center at Auschwitz, and Wiesel finds its shadow putting everything to the test. Whatever the traditional ideas and acquired values that have existed, whatever the philosophical systems and social theories that human minds have produced, they were too late or too inadequate to prevent Auschwitz, or, worse, they helped pave the way to that place. The Holocaust, insists Wiesel, shows that people's thoughts and actions must be revised in the face of those facts, unless one wishes to continue the same

blindness that produced the darkness of *Night*. The needed revisions, of course, do not guarantee a better outcome. Yet failure to use the Holocaust to call all of humankind into question diminishes chances to mend the world.

“The questions,” contends Wiesel, “remain questions.” He does not place his greatest confidence in answers. Answers—especially when they take the form of philosophical or theological systems—make him suspicious. No matter how hard people try to resolve the most important issues, questions remain, and rightly so. Typically, however, the human propensity may be to quest for certainty. Wiesel’s urging is to resist that temptation, especially when it aims to settle things that ought to remain unsettled and unsettling. If answers aim to settle things, their ironic, even tragic, outcome is that they often produce disagreement, division, and death. Hence, Wiesel wants questions to be forever fundamental.

Wiesel’s point is not that responses to questions are simply wrong; they have their place and can be essential. Nevertheless, questions deserve lasting priority because they invite continuing inquiry, further dialogue, shared wonder, and openness. Resisting final solutions, these ingredients can create friendship in ways that answers never can.

“And yet—and yet.” This,” says Wiesel, “is the key expression in my work.” Always suspicious of answers but never failing for questions, Wiesel structures problems not simply for their own sake but to inquire, “What is the next step?” Reaching an apparent conclusion, he moves forward. Such forms of thought reject easy paths in favor of hard ones.

Wiesel’s “and yet—and yet” affirms that it is more important to seek than to find, more important to question than to answer, more important to travel than to arrive. The point is that it can be dangerous to believe what one wants to believe, deceptive to find things too clear, just as it is dishonest not to strive to bring them into focus. Even the endings to Wiesel’s stories resist leaving his readers with fixed conclusions. Instead, he wants his readers to feel his “and yet—and yet,” which provides hope that people may keep moving to choose life and not to end it. In short, Wiesel seeks the understanding that lives in friendship—understanding that includes tentativeness and fallibility, comprehension that looks for error and revises judgment when er-

ror is found, and recognition that knowing is not a matter of final conviction but of continuing dialogue.

Wiesel urges his readers not to draw hasty or final conclusions; rather his emphasis is on exploration and inquiry. It might be objected that such an outlook tends to encourage indecision and even indifference. One of Wiesel’s most significant contributions, however, runs in precisely the opposite direction. His perspective on understanding and on morality is of one piece. Thus, his writings emphasize that dialogue leads not to indecision but to an informed decisiveness. Tentativeness becomes protest when unjustified conviction asserts itself. Openness results not in indifference but in the loyalty of which friendship is made and on which it depends.

“[P]assivity and indifference and neutrality,” adds Wiesel, “always favor the killer, not the victim.” He will never fully understand the world’s killers. To do so would be to legitimize them by showing that they were part of a perfectly rational scheme. Although for very different reasons, he will not fully understand their victims, either; the victims’ silent screams call into question every account of their dying that presents itself as a final solution. Yet Wiesel insists that understanding should be no less elusive where indifference prevails. Too often, indifference exists among those who could make a difference, as it can characterize those who stand between killers and victims but aid the former against the latter by doing too little, too late.

## NIGHT

**First published:** *Un di Velt hot geshvign*, 1956;  
*La Nuit*, 1958 (English translation, 1960)

**Type of work:** Memoir

*Wiesel describes his teenage experiences in Auschwitz and Buchenwald, where he endured the Holocaust in 1944 and 1945.*

At the beginning of *Night*, Wiesel introduces someone he met toward the end of 1941. His name was Moshe, and he became one of the boy’s teachers. They discussed religious topics, and one day they talked about prayer. Wiesel asked Moshe why

he prayed, and his teacher replied that he prayed for strength to ask God the right questions. Later, the Hungarian police deported Moshe from Sighet, Wiesel's hometown, because he was a foreigner. His destination was Poland and death at the hands of the Germans, but somehow Moshe escaped and found his way back to Sighet. The Jews of Sighet did not believe his tale of destruction.

Although the Holocaust was raging all around them, the Hungarian Jews were not decimated until 1944. Their lives began to change drastically, however, once the Germans occupied Hungary that March. In a matter of days, Sighet's Jews had to deal with quarantines, expropriations of their property, and the yellow stars that targeted them. Then they were ghettoized and deported. Jammed into train cars, destination unknown, the Jews of Sighet—Elie Wiesel, his little sister, Tzipora, and their parents among them—eventually crossed the Polish frontier and arrived at Auschwitz-Birkenau.

Emerging from their train-car prisons into midnight air fouled by burning flesh, the Jews of Sighet were separated by the secret police: men to the left, women to the right. Wiesel lost sight of his mother and little sister, not fully aware that the parting was forever. Father and son stuck together. Spared the fate of Wiesel's mother and sister, they were not “selected” for the gas chambers but for slave labor instead. From late May, 1944, until mid-January, 1945, Wiesel and his father endured Auschwitz's brutal regimen. As the Red Army approached the camp,

the two were evacuated to Germany. Severely weakened by the death march to Buchenwald, Wiesel's father perished there, but the son was liberated on April 11, 1945.

*Night* covers in detail these events, but it is much more than a chronological narrative. The power of this memoir emerges especially from the anguished questions that Wiesel's Holocaust experiences will not put to

rest. Before he entered Auschwitz, Wiesel “believed profoundly.” Yet on that fateful night, and in the days that followed, his world changed forever. Opti-

mism about humankind, trust in the world, confidence in God—Auschwitz radically threatened, if it did not destroy, so many reasons for hope.

This point is illustrated especially well by one of the book's most unforgettable moments. Wiesel describes the hanging of three Auschwitz prisoners—one of them a child. As the prisoners watched the child die, Wiesel heard a man asking: “For God's sake, where is God?” Wiesel writes that “from within me. I heard a voice answer: ‘Where He is? This is where—hanging here from this gallows.’”

Death's reign in the Kingdom of Night was so pervasive that Wiesel ends *Night* by reporting that a corpse stared back at him when he saw his own reflection in a mirror for the first time after liberation. Yet *Night* does not give death—God's or humanity's—the last word. By breaking silence, by telling a story that is full of reasons for despair, Wiesel protests against the wasting of life and testifies for the mending of the world by humankind and God alike.

## THE ACCIDENT

**First published:** *Le Jour*, 1961 (English translation, 1962)

**Type of work:** Novel

*Eliezer, a young Holocaust survivor, wrestles with his past in a struggle to decide whether life is worth living.*

*The Accident* is the third part of a trilogy that begins with *Night*. Originally titled *Le Jour* (the day), it comes after *L'Aube* (1960; *Dawn*, 1961), a novel in which Wiesel explores the ambiguous legacy of *Night* by describing how Elisha, another young Holocaust survivor, confronts the uneasy responsibility of killing to help establish a post-Holocaust homeland for Jews in Israel. The setting for *The Accident* is very different, but this novel also probes Holocaust survival and finds its meaning unsettled and unsettling. Both *Night* and *Dawn* reveal that the swords of politics and history cut many ways. Once one has experienced that kind of destruction, *The Accident* asks whether life is worth living at all.

His present and future overwhelmed by what he has witnessed in the past, Eliezer doubts that he can endure his Holocaust survival. The world will not be changed, it seems, and the dead cannot be brought back to life. Nevertheless, they haunt the living too much, creating feelings of guilt, frustration, anger, and rebellion that make joy and happiness all but impossible. In spite of the fact that he has friends and even a woman who loves him, the young man's life is "the tragic fate of those who came back, left over, living-dead." Thus, not only because he feels that "I am my past," but also because he knows that his inability to move beyond makes others suffer, Eliezer senses that life will force him to lie in ways that he has neither the desire nor the strength to sustain.

Not feeling well, exhausted by the heat and a reporting job that seems of no consequence, Eliezer still manages to keep his date with Kathleen. They decide on a film, *The Brothers Karamazov*. Then, crossing a busy New York street, the young man is struck and dragged by a car: *Le Jour*, rendered in English, becomes *The Accident*. "On the fifth day I at last regained consciousness," Eliezer reports. "I felt alone, abandoned. . . . That I was still alive had left me indifferent, or nearly so."

Hope dawns in the "nearly so." Undeniably, the discovery that he can still speak sparks a choice for life, however faint, that cannot be hidden. Then, nurtured by friends, continuing under the care of a doctor who takes death as his personal enemy, life returns to be chosen again, although not without memory of the Holocaust's ashes. Eliezer is alive in the hospital at the end of *The Accident*, and the reader does not know entirely what will become of him. This much, however, is clear: He has decided to tell his story, to share it with others, and in that action a rejection of death and an affirmation of life can be found.

In a 1985 preface to this novel, Wiesel acknowledged that *The Accident's* protagonist "has lived through some of my experiences, but I have not lived through his." To that remark Wiesel added a suggestion: "[I]n the end, all works of literature, even despairing ones, constitute an appeal to life." Thus, it is also noteworthy that this novel is dedicated to Paul Braunstein, the skilled physician who restored Wiesel's health after the accident that nearly took the life that Wiesel finds so important.

## A BEGGAR IN JERUSALEM

**First published:** *Le Mendiant de Jérusalem*, 1968 (English translation, 1970)

**Type of work:** Novel

*This novel, one of Wiesel's most penetrating, philosophical, and mystical, intermingles the joy of victory with the anguish of Holocaust-related recollection and protest about the injustice of the past, which lingers on.*

The year is 1967. The Six-Day War has Israel under threat, but the Jews win. The ancient western temple wall in Jerusalem is recovered. As David, the novel's narrator, tells the story of this struggle, the Jewish triumph reverberates with recollections and questions whose Holocaust-related themes shadow the victory.

A beggar has been in the struggle. He has seen Jerusalem secured by Israeli troops, but the result does not add up to satisfaction, for the beggar cannot forget the prices paid—particularly the loss of his friend, Katriel, and the repeated "destructions of Jerusalem elsewhere than in Jerusalem." In joy and sadness, the beggar finds companionship with kindred spirits who gather at the Wall. They are waiting—some for understanding, some for lost friends, and all in their own ways for God. They also swap stories.

The beggar remembers, for example, Jews being marched into a forest. It is hot. Most of the men, women, and children are permitted to sit on the grass while a few dig pits. The job completed, an officer drives up and finds everything in order. He proposes that the action be carried out in family units and lets the people talk things over. Some of the young try to resist, but they are no match for their German guards. The killing is delayed only for a moment. It goes on for hours, interrupted twice. Tevye the Tailor has ten children. It takes time to line them up along the grave. There is also a young man who sings. Apparently the shooting cannot silence him, even though he has no wish to be a lone survivor, a madman whose tale neither can be fully told nor fully heard and believed.

Is this story literally true? Yes and no. Such scenes were not uncommon during the Holocaust,

when shooting squadrons murdered hundreds of thousands of Jews. Yet Wiesel's primary concern is to recover the speech and silence that such episodes are likely to have contained; it is in this domain that the power of his characters and authorship resides. Thus, as the killers do their work, the novel allows its reader to hear a Jewish teacher talking to his disciples. For reasons that this man does not know, God, he says, "demands our lives in sacrifice." Very well, they shall accept the inevitable in strength, without asking for mercy that will not be. However, the teacher adds, "Know too that the God of Israel is today violating the Law of Israel. The Torah prohibits killing the cow and her calf on the same day; yet this law, which we have faithfully observed, does not apply to us. See that what is granted to animals is refused to the children of Israel."

Another scene: Katriel is married to Malka, an orphan who wants no children for fear of nourishing death. Malka, however, is persuaded by Katriel's father, and Sasha is born. The boy is a delight, but "then came the day when the parents returned home alone and defeated." Katriel and Malka endured, although at times memory could not be tamed. Once while studying Talmud with his father, Katriel had enough: "We love You, God, we fear You, we crown You, we cling to You in spite of You, yet forgive me if I tell you my innermost thoughts, forgive me for telling You that You are cheating! . . . You bless us, and You take back Your blessing. Why are You doing all this, to prove what?" Not long after, Katriel kissed Malka goodbye, and went off to fight for Israel. Malka became an orphan again.

*A Beggar in Jerusalem* ends with David, the narrator, "still here on this haunted square, in this city where nothing is lost and nothing dispersed." However, he knows that he will be moving on, homeward with Malka. There is victory in this novel, a small measure of victory. Its staggering cost, however, is likely to leave Wiesel's readers where they usually find themselves: with more questions than answers and yet more determined to make life as good as it can be.

## THE OATH

**First published:** *Le Serment de Kolvillåg*, 1973  
(English translation, 1973)

**Type of work:** Novel

*Azriel, yet another of Wiesel's lone survivors of catastrophe, is past-bound in this novel.*

In *The Oath*, Azriel's home has been destroyed in a pre-Holocaust pogrom produced by an anti-Semitic rumor: It claims that the Jews of Kolvillåg have killed a Christian boy in an act of ritual murder. Moshe, eccentric saint of the Jewish community, offers himself as guilty of the nonexistent crime. However, hate will not be satisfied so easily, and the Jews prepare. Abandoned by their Gentile friends, a few arm themselves. Some celebrate life in the darkness. Most follow age-old wisdom: They rally strength quietly to wait and endure.

The captive Moshe is allowed to speak to his people. By neither word nor deed has Jewish example through the centuries been sufficient to alter inhumanity, nor to persuade God to intervene against senseless killing. So Moshe persuades his people to try a different strategy, to accept an oath of silence. No survivor will reveal anything of what is about to befall Kolvillåg. Only the young Azriel survives. He becomes a wanderer, torn between speech and silence, true to his promise.

Years later, Azriel meets a young man who wishes he were dead. This young person is driven to despair because he is the child of Holocaust survivors. He has no past to match that of his parents, and that of his parents is beyond him. They cannot see him for what he is because they see others—now lost—in him. He cannot locate himself within his family or within the tradition of his people. Azriel decides to intervene, but how to make the young man choose life is the question. Azriel answers by breaking his oath. He tells his tale—that cannot be

told, hoping to instill rebellion, responsibility in the place of emptiness, life to counter death.

"Could I have been spared in Kolvilläg so I could help a stranger?" Azriel's question remains without closure, at least without closure that is simply satisfying. The answer of friendship remains as well: "By allowing me to enter his life," the young man says of Azriel, "he gave meaning to mine." Again and again in Wiesel's writings, the importance of friendship shines through. It does not put Azriel's questions to rest entirely, but friendship, as *The Oath* testifies, may make life very much worth living.

### SUMMARY

"It is given to man to transform divine injustice into human justice and compassion," Elie Wiesel says in *Celebration biblique* (1975; *Messengers of God: Biblical Portraits and Legends*, 1976), his recounting of Bible stories about Abraham, Isaac, Jacob, and many more. Like Wiesel himself, these biblical messengers understood that thought and action

have abused the freedom to choose that makes life human. They also wrestled with the fact that human existence neither accounts for, nor completely sustains, itself. Their dearly earned reckoning with that reality led them to a profound restiveness. It revealed, in turn, the awesome injunction that God intends for humankind to endure hard, even impossible, moral work until and through death.

One may not see life the way Wiesel's biblical messengers saw it. Whatever one's choices in that regard, it is nevertheless as hard as it is inhuman to deny that injustice too often reigns and that moral work is indeed given to humanity. Wiesel presumes neither to identify that work in detail for everyone nor to insist, in particular, where or how one should do it. Those questions, however, remain the right ones to ask. All of Wiesel's writings urge people to explore them, in friendship, with the care that they deserve.

John K. Roth

## BIBLIOGRAPHY

### By the Author

#### LONG FICTION:

- L'Aube*, 1960 (*Dawn*, 1961)
- Le Jour*, 1961 (*The Accident*, 1962)
- La Ville de la chance*, 1962 (*The Town Beyond the Wall*, 1964)
- Les Portes de la forêt*, 1964 (*The Gates of the Forest*, 1966)
- Le Mendiant de Jérusalem*, 1968 (*A Beggar in Jerusalem*, 1970)
- Le Serment de Kolvilläg*, 1973 (*The Oath*, 1973)
- Le Testament d'un poète juif assassiné*, 1980 (*The Testament*, 1981)
- Le Cinquième Fils*, 1983 (*The Fifth Son*, 1985)
- Le Crépuscule, au loin*, 1987 (*Twilight*, 1988)
- L'Oublié*, 1989 (*The Forgotten*, 1992)
- Les Juges*, 1999 (*The Judges*, 2002)
- Le Temps des déracinés*, 2003 (*The Time of the Uprooted*, 2005)

#### SHORT FICTION:

- Le Chant des morts*, 1966 (essays and short stories; *Legends of Our Time*, 1968)
- Entre deux soleils*, 1970 (essays and short stories; *One Generation After*, 1970)
- Un Juif aujourd'hui*, 1977 (essays and short stories; *A Jew Today*, 1978)

#### DRAMA:

- Zalmen: Ou, La Folie de Dieu*, pb. 1968 (*Zalmen: Or, The Madness of God*, 1974)
- Le Procès de Shamgorod tel qu'il se déroula le 25 février 1649*, pb. 1979 (*The Trial of God: As It Was Held on February 25, 1649, in Shamgorod*, 1979)

NONFICTION:

- Un di Velt hot geshvign*, 1956 (in Yiddish; 1958, in French as *La Nuit*; *Night*, 1960)  
*Les Juifs du silence*, 1966 (travel sketch; *The Jews of Silence*, 1966)  
*Discours d'Oslo*, 1987

## DISCUSSION TOPICS

- How has the Holocaust affected Elie Wiesel's life and his writing?
- Why does Wiesel value friendship so much?
- How would you describe Wiesel's views about and relationship to God?
- Why does Wiesel think questions are so important? Which questions seem most important to him, and why might that be the case?
- Wiesel has been an important defender of human rights. Which rights do you think are most important to him?
- Wiesel is opposed to indifference and neutrality. Why do you think he holds those positions?
- Why does Wiesel think that the words "and yet . . . and yet" are among the most important in his vocabulary?

## OSCAR WILDE

**Born:** Dublin, Ireland  
October 15, 1854

**Died:** Paris, France  
November 30, 1900

*A brilliant epigrammist and sparkling social satirist, Wilde was an innovator in art, particularly drama. His single-minded devotion to aestheticism set him apart.*

### BIOGRAPHY

Born in Dublin, Ireland, on October 16, 1854, into a respected family, Oscar Fingal O'Flahertie Wills Wilde was the second son of Sir William Robert Wills Wilde and his wife, Lady Jane Francesca Elgee Wilde. His father, a noted ear and eye surgeon, wrote some twenty books in his lifetime, including *Practical Observations on Aural Surgery, and the Nature and Treatment of Diseases of the Ear* (1853), a standard textbook. Lady Wilde, under the pseudonym "Speranza," wrote inflammatory articles about Irish nationalism and women's rights. She gained celebrity in 1848 when she admitted writing an article in *Nation* that caused the head of the Young Ireland Party to be tried for high treason. She told the court that she alone was the culprit, thereby becoming the heroine of the movement. She published poems, essays, stories, and folklore.

Wilde was a bright youngster who took prizes in religious and classical studies at Portora Royal School, which he and his older brother Willie (born in 1852) attended. In 1871, Oscar entered Trinity College, Dublin, and gained sufficient recognition in classical studies that, in 1874, he won the Classical Demyship to Magdalen College, Oxford. John Mahaffy, who taught ancient history at Trinity College, greatly influenced Wilde. He supported him for the Oxford scholarship. Wilde spent the summer of 1874 helping Mahaffy, a

uniquely skilled conversationalist, revise his *Social Life in Greece from Homer to Menander* (1874). He spent two summers traveling with Mahaffy and others through Italy and Greece.

Wilde blossomed at Oxford, where his witty conversation made him popular. His long poem, *Ravenna* (1878), won him the Newdigate Prize, which included the publication of the poem as a pamphlet. He received his bachelor's degree from Oxford in 1878, but his demyship was extended, enabling him to study further. He was particularly affected by Walter Pater, a fellow at Brasenose College, and John Ruskin, Slade Professor of Art, both of whom promoted aestheticism. Ruskin differed from Pater in believing that art should have a high moral purpose. Pater promoted art for art's sake, a doctrine that became Wilde's credo.

Wilde, sharing rooms in London with Frank Miles in 1879, created an aesthetic environment built around white lilies, objets d'art, and peacock feathers—many peacock feathers. At their digs gathered artists, aesthetes, and people in theater, including Lillie Langtry, who was fast becoming famous through Miles's drawings of her. Wilde and Miles were magnets that attracted the beautiful people with whom they preferred to surround themselves.

By 1880, Wilde's mother came to London and established herself in Chelsea, where she lived with her son, Willie. Lady Wilde entertained some of the most interesting people in London, and Wilde attended her salons, exposing himself further to the people of privilege about whom he was eventually to write. Renowned for his outlandish dress

and for the green carnation or sunflower that he perpetually wore in his lapel, Wilde was best known for his outrageous banter.

The British musical theater team of W. S. Gilbert and Arthur Sullivan made Wilde a character, Reginald Bunthorne, in *Patience: Or, Bunthorne's Bride* (1881), their opera about the aesthetic movement. When the opera completed its successful London run and was scheduled for a September, 1882, opening in New York, followed by an American tour, its promoters decided that Wilde could do an effective job promoting it. In January, 1882, they sent him to the United States for a lecture tour on aestheticism and other topics. He spent a year abroad, giving some 125 lectures throughout the United States and Canada. Wilde's outrageous dress, quick wit, and quotable epigrams attracted large audiences.

Meanwhile, Wilde had published at his own expense a collection, *Poems* (1881), which, despite the refusal of London publishers to accept his manuscript, sold out five editions by 1883. He was also working on a play, *Vera: Or, The Nihilists* (pb. 1880, pr. 1883), taking it abroad with him and hoping to interest someone in an American production. When he returned to England, Wilde went to France for three months; he then returned and began to establish himself as a man of some importance in London. He became engaged to Constance Lloyd, whom he married in 1883. They had two sons, Cyril, born in 1885, and Vyvyan, born in 1886.

By 1887, Wilde was editor of *The Woman's World*, but he became bored and left the magazine in 1889. Needing money for his growing family, Wilde lectured and wrote reviews. He began to publish prolifically after he left *The Woman's World*, producing *The Happy Prince, and Other Tales* (1888), *The Picture of Dorian Gray* (1890, serial; 1891, expanded), *Lord Arthur Savile's Crime, and Other Stories* (1891), *A House of Pomegranates* (1891), and *Intentions* (1891). The range of this writing, which included a novel, critical essays, short stories, and children's stories, was impressive, but brought little money.

His fiction, however, established him as a serious writer. When he turned to drama, which remunerated him generously, he was already well known and respected. In three years, he wrote four popular plays—*Lady Windermere's Fan* (pr. 1892, pb. 1893), *A Woman of No Importance* (pr. 1893, pb.

1894), *An Ideal Husband* (pr. 1895, pb. 1899), and *The Importance of Being Earnest: A Trivial Comedy for Serious People* (pr. 1895, pb. 1899)—that spread his fame and made him affluent. Wilde then went to France to write *Salomé* (pb. 1893 in French, pb. 1894 in English, pr. 1896 in English) in French. Sarah Bernhardt agreed to play the lead. Those plans, however, were scuttled by the Office of the Lord Chamberlain, which banned the play. In 1896, *Salomé* was finally produced in Paris. By this time, however, Wilde was in prison.

In 1895, the Marquis of Queensberry left a card at Wilde's club accusing him of sodomy. Wilde had maintained a homosexual relationship with Lord Alfred Douglas, son of the marquis. Wilde sued the marquis for libel but ultimately was countersued for his homosexual activities and, after two trials, found guilty and sentenced to two years in prison, where he wrote *De Profundis* (1905), one of his most moving works. Released from prison, ruined financially, socially, and personally, he returned to France, never to see England again. He lived on what his writing now brought him, on a small allowance from Constance, who died in 1898, and on handouts from friends. He died in Paris on November 30, 1900, as a result of syphilitic encephalitis triggered by an ear infection.

## ANALYSIS

It is perhaps ironic that Wilde is best remembered as a dramatist, and particularly that the plays for which he is remembered are those that he called potboilers, *Lady Windermere's Fan*, *A Woman of No Importance*, and *An Ideal Husband*. Only *The Importance of Being Earnest* really delighted him.

Wilde wrote a total of seven plays and clearly considered *Salomé*, which served as the basis for several operas, including the famous one by Richard Strauss, his best. The play had been in rehearsal in London for two weeks with Sarah Bernhardt as *Salomé* when the licenser of plays banned it, citing a law on the books since the Reformation that prohibited from the British stage plays with biblical characters in them. The reason for this prohibition originally was to prevent Catholic mystery plays from being staged, but the law was the law, and *Salomé* was not performed.

Wilde's nondramatic writing, his critical essays, his children's stories, his short stories, and his novel, *The Picture of Dorian Gray*, were, in their au-

thor's eyes, much better works than his social dramas. His poetry, particularly *The Ballad of Reading Gaol* (1898), was important but is ignored by most of Wilde's modern readers. *De Profundis*, written while Wilde was in prison, is perhaps his most personal statement. Its posthumous publication in 1905 enhanced Wilde's tarnished reputation considerably.

Wilde liked his less familiar plays better than those that brought him fame and a fleeting period of economic security. *Vera*, written when he was twenty-five, is a flawed play about revolutionary politics in Russia. It is psychologically unconvincing and painfully melodramatic. It had opened in New York in August, 1883, but closed after seven performances that evoked scathing reviews. *The Duchess of Padua* (pb. 1883, pr. 1891), a verse drama, is imitative and tedious. Despite some appealing lines—found to some degree in everything that Wilde wrote—the play is overblown, more suited to the seventeenth century than the nineteenth century stage.

*Salomé*, however, is an artistic triumph. Wilde's dramatization of the well-known biblical story is serious drama well executed. The directions for the staging capitalize on every dramatic possibility. The notable personality differences between Herod and Herodias are extremely well presented by deft use of dialogue. Both are evil, but they are evil in markedly different ways, and Wilde projects both convincingly within their individual spheres of evil. In this play, Wilde is at the height of his remarkable ability to reveal his characters through conversation without letting the dialogue degenerate into tedium. Although Herod is *Salomé*'s main character, Wilde's psychological penetration of *Salomé*'s personality was good enough to make Bernhardt consent to play her.

In his more popular plays, Wilde borrows heavily from the melodrama of his day, but he does so without descending into melodramatic presentation. Rather, his social dramas reflect an art-for-art's-sake attitude. He permits contradictions in his characters' lines and lives because art can accommodate contradictions. Drama is not supposed to be truth in a narrow sense, but, inevitably, like all the other arts, represents Truth in a broader, philosophical sense.

Perhaps to understand some of what Wilde is attempting in his social dramas, one has to consider

what the French Impressionist artists painting around the same time were trying to achieve. In eschewing photographic realism, they invented a new, profound, and honest, if somewhat stylized, realism. One must remember that Wilde, unlike the French Impressionists, was producing satire within the staid confines of Victorian England.

The staging of Wilde's plays, considered quite difficult by modern standards, reflects the busyness and crowdedness of Victorian decoration. The pink shades that Wilde loves obscured nature's cruelties, its harsh realities. The verbal superficialities in plays such as *Lady Windermere's Fan* and *The Importance of Being Earnest* became the satirical weapons that Wilde used against the falseness and hypocrisy rampant in fin de siècle England.

It was Wilde's whimsical contention, quite in keeping with Walter Pater's aestheticism, of which he had imbibed so heavily at Oxford, that nature imitates art rather than the reverse. In his collection of critical essays, *Intentions*—particularly in its two most important essays, "The Critic as Artist" and "The Decay of Lying"—Wilde made the case for criticism as an art form and for nature's imitating art.

Wilde's novel, *The Picture of Dorian Gray*, first printed in abbreviated form in the June issue of *Lippincott's Magazine* in 1890, came out in expanded form the following year. In many ways a classic gothic novel, it was regarded by many as the quintessence of Decadence, an effect that Wilde strove strenuously to achieve. In this novel, Wilde distorts the conventional doppelgänger motif in an outrageously bizarre and Faustian way.

Dorian Gray, having had his portrait painted by Basil Hallward, expresses his wish that the portrait age while he remain as he is. Gray gets his wish. The portrait not only ages but also shows the effect of an existence that becomes increasingly depraved and reckless. Gray, no longer able to display the painting, locks it away in the attic, where it gradually turns into a frightening picture of a depraved man made increasingly hideous by the secret activities in his life. Every flaw of Gray's personality is reflected in the picture. Its subject eventually shows the portrait to Basil Hallward, its creator, but then must kill him to protect his dark secret. The portrait evolves into that of a murderer.

In this book, Wilde stands conventional morality on its head, as he often did in his writing

and living. If contemporary critics called *The Picture of Dorian Gray* immoral, as many did, Wilde could respond with impunity that a book is neither moral or immoral; it is merely well written or badly written. Few could deny that this novel is well written.

## LADY WINDERMERE'S FAN

**First produced:** 1892 (first published, 1893)

**Type of work:** Play

*Lady Windermere is forced to reconsider her harsh judgments of Mrs. Erlynne (unbeknownst to her, her own mother) when the latter saves Lady Windermere from disgrace.*

*Lady Windermere's Fan*, the first of Wilde's social comedies, opened on February 20, 1892, in London to lukewarm reviews. A four-act play that employs what are often regarded in drama as cheap tricks—mistaken identity, the lost child restored to the rightful parent, the conversation overheard while hidden, and the romantic triangle—this play ultimately succeeds because it twists the clichés with which it is working. The mistaken identity remains mistaken, the lost child (Lady Windermere) never knows that Mrs. Erlynne is her true mother, and the romantic triangle is really not a romantic triangle, but only appears to be.

The play revolves around Lady Windermere's twenty-first birthday. Her husband is giving a ball in honor of the occasion. Lady Windermere, trusting and innocent, receives information that "poor, dear Windermere" has been seeing another woman and has apparently set her up in style. At first, Lady Windermere does not believe the reports, but the seed of suspicion has been sown.

Hoping to prove her husband innocent, she goes to his desk and looks into his checkbook, finding nothing untoward. Her mind is relieved, but then she notices a second checkbook, this one locked. She breaks the lock, opens the checkbook, and, to her horror, finds that Windermere has written large and regular checks to Mrs. Erlynne, a woman with a past.

When she confronts her husband with this information, he is horrified that she has broken into

his checkbook and defends Mrs. Erlynne, who is, as only Windermere knows, Lady Windermere's real mother. Not only does he defend this fallen woman, but he insists that Lady Windermere invite her to the birthday ball to give her a chance to regain some of her squandered social stature. When Lady Windermere refuses, Windermere himself delivers an invitation to Mrs. Erlynne. Lady Windermere threatens to strike Mrs. Erlynne with her fan, a birthday gift from Windermere, if she comes to the ball.

In the next scene, the ball is under way. The butler announces the guests as they enter. He recites a string of names, at the end of which is Mrs. Erlynne's, her isolation heightened by the fact that all the names that he recites are those of pairs of titled people, but Mrs. Erlynne is unaccompanied and untitled. Confronted by this scarlet woman, Lady Windermere drops her fan and bows mechanically. When she overhears Mrs. Erlynne asking Windermere for a large sum of money, she flees from the room.

She writes a letter to her husband announcing that she is going to run away with Lord Darlington, a Beau Brummel type who has rooms nearby. Mrs. Erlynne finds the letter and reads it. She rushes to Lord Darlington's rooms to try to convince her daughter to reconsider, attempting to prevent her from making the sort of mistake that she herself made some years before.

As they talk, they hear voices in the hall, those of Windermere and Lord Darlington. Lady Windermere panics, but the resolute Mrs. Erlynne stashes her behind a curtain so that she will not be discovered. In her haste to hide, Lady Windermere leaves her fan behind. Her husband spots it and demands to know of Darlington what his wife's fan is doing in Darlington's quarters.

Mrs. Erlynne makes her self-sacrifice at this point, coming into the room and saying casually that she took the wrong fan at the party. Lady Windermere's reputation is saved, but at great cost to Mrs. Erlynne. Now it is Lord Windermere's turn to reject Mrs. Erlynne, whom he presumes has left her fan in Darlington's drawing room because they are having a liaison.

The next day, it is Lady Windermere who is charitable toward Mrs. Erlynne; Lord Windermere is condemnatory. Yet the day is saved when Mrs. Erlynne comes by to announce that she is leaving

London, and that she is going to marry an elderly, titled admirer.

This play is clearly about appearances and about the kinds of moral judgments that Victorian standards encouraged. Its epigrams are spirited, memorable, and profuse. Lady Windermere, who has been accepting of these standards, is now forced to reconsider her stand. Mrs. Erlynne makes her realize that one cannot divide humanity into those who are good and those who are bad.

In this play, Wilde pits his art against the philistinism of the materialistic Victorian age, and he does so with sufficient wit that he avoids the pitfall of lapsing into moral diatribe. He makes a great deal in one bit of dialogue of the word “trivial.” Lord Darlington considers it trivial to talk seriously about anything. He contends that to be understood is to be found out.

Obviously, this emphasis is an example of how Wilde frequently sets conventional morality on its head and causes people to rethink their bland acceptance of the status quo. By never revealing to Lady Windermere that Mrs. Erlynne is her mother, Wilde rises above the major cliché that he uses in the play.

## THE IMPORTANCE OF BEING EARNEST

**First produced:** 1895 (first published, 1899)

**Type of work:** Play

*Jack Worthing discovers that his real name is Ernest, making him acceptable to Gwendolen, his lady love, who cannot love anyone who is not named Ernest.*

In the entire Wilde canon, no play better exemplifies the author’s art-for-art’s-sake stand than *The Importance of Being Earnest: A Trivial Comedy for Serious People*. The play is completely trivial, revolving around the fact that Jack Worthing, who loves Gwendolen Fairfax, cannot marry her, initially because Algernon Moncrieff, her cousin, refuses to sanction the marriage until Worthing resolves the mystery of Cecily, about whom Algernon knows because of an inscription on Worthing’s cigarette case.

Worthing reveals that Mr. Cardew, who adopted him after he had been found in a handbag in the parcel room at Victoria Station, appointed him guardian of Cardew’s granddaughter, Cecily Cardew, who always knew him as Uncle Jack. For Cecily’s benefit, Jack has maintained an air of moral restraint in her presence. To escape from this atmosphere, he has assumed, during his frequent visits to London, the name and generally reprobate behavior of an imaginary brother named Ernest. Worthing’s love for Gwendolen is complicated by the fact that Gwendolen cannot love any man who is not named Ernest.

In an often bewildering plot, in which identities are often difficult to follow, Lady Bracknell refuses to acknowledge Jack’s engagement to Gwendolen because she learns that Jack was found as an infant in a handbag in Victoria Station. Meanwhile,

both Jack and Algernon are individually consorting with Dr. Chasuble to have their names changed to “Ernest.” Algernon, too, is in love—with Cecily, who has also revealed a desire to love someone named Ernest.

In the course of the play, the name of Cecily’s tutor, Miss Prism, is introduced. Lady Bracknell knows the name and insists that Miss Prism be brought to her. It is revealed that, years before, Miss Prism had been nurse to a family to which Lady Bracknell was connected. One day, Miss Prism, in a state of confusion, thoughtlessly placed the manuscript of a book that she had written in the bassinet of the baby in her care and absent-mindedly placed the baby in the handbag that should have held the manuscript.

She deposited the handbag in the parcel room of Victoria Station, and the baby was never restored to its rightful family. Jack, now thinking that Miss Prism is his mother, embraces her, but Lady Bracknell reveals that Jack’s mother was really her sister, Algernon’s mother, Mrs. Moncrieff. Algernon and Jack are brothers, but better still, Jack’s real name is Ernest. The play ends with Alger-

non and Cecily and Jack/Ernest and Gwendolen poised on the brink of happy lives together, in what is really a mock-Dickensian ending.

The play, which opened in London on St. Valentine's Day, 1895, evoked incessant laughter from the first-night audience and lavish reviews from most critics. A few, such as George Bernard Shaw, found it wanting in meaning and castigated Wilde for the play's triviality. Yet triviality of the sort that Wilde discussed in "Criticism as Art" was precisely what he sought to achieve in this production.

*The Importance of Being Earnest* succeeded, not in spite of its unbelievable characters, its improbable situations, its stilted dialogue, and its trivial ideas, but because of them. In this play, Wilde accomplished par excellence what he interpreted as Walter Pater's credo, denying at the same time that part of John Ruskin's credo that placed upon art a moral responsibility.

This play has been the most enduring of Wilde's dramas, still delighting audiences with the sort of childlike unreality found in the stories that constitute *The Happy Prince, and Other Tales* (1888). There is a real kinship between the two works despite their obvious differences and the differences of their intended audiences.

## THE PICTURE OF DORIAN GRAY

**First published:** 1890, serial; 1891, expanded

**Type of work:** Novel

*Dorian Gray, wishing never to age, wants his portrait to age for him and gets his wish.*

Dorian Gray, the title character of *The Picture of Dorian Gray*, is a decadent dandy of the Victorian era. Concerned with little but appearances, he lives a reckless, nonproductive existence. A crucial event in his life comes when Dorian meets Lord Henry Wotton in the studio of Basil Hallward, an artist, who has painted a portrait of the breathtakingly beautiful Dorian, now in his early twenties. Lord Wotton intrigues Dorian with his talk of the New Hedonism, which is reflected in the novel by Lord Henry's giving Dorian a copy of Joris-Karl

Huysmans's *À rebours* (1884; *Against the Grain*, 1922), a novel that articulates this philosophy, the basis of which is the achievement of a complete realization of one's nature.

Dorian now utters a Faust-like proposition. He expresses a willingness to surrender his soul if he can maintain his youth and physical beauty and have his portrait age in his place. Dorian hardly expects to have his wish granted and thinks little more of it. He is busy courting Sybil Vane, a talented young actress, who falls in love with him.

Ironically, Sybil's being in love with Dorian robs her of her ability to act. In time, the very ability that first drew Dorian to Sybil has disappeared, and he rejects her unfeelingly. Having lost Dorian and her acting ability simultaneously, Sybil kills herself. Lord Henry, Dorian's Mephistopheles, convinces Dorian that, in line with the New Hedonism, Sybil's suicide is an experience that will help him to feel life more intensely and that it can be viewed as nothing but a source of personal growth.

When all of this happens, Dorian notices subtle changes in the portrait, which is still on display in his residence. A hint of cruelty, a line near the mouth, forms, but Dorian thinks little of it. Meanwhile, Lord Henry leads Dorian into all kinds of arcane activities that, in the tradition of the gothic novel, are suggested but never revealed explicitly, making them seem, perhaps, more horrible than they actually are.

By the time Dorian is thirty-eight years old—still looking twenty—the portrait has changed so drastically that it must be hidden under lock and key. Basil, the artist, alarmed at Dorian's dissolute ways, urges him to change, to reform. Dorian shows Basil the portrait, now hideous, reflecting all the corruption of Dorian's past years. Then he turns on Basil and stabs him. To conceal the crime, Dorian forces a chemist whom he has ruined to use his knowledge of chemistry to destroy the body. Finally, weeks later, shaken by what he has become, Dorian tells Lord Henry that he is going to reform. On re-

turning home, he looks at the portrait and, seeing further deterioration in the visage before him, grabs the knife that he has plunged into Basil and sinks it into the grotesque portrait. A cry and a crash are heard. Servants rush to the locked room, forcing open the door. Inside, they find a portrait of an exquisite youth, and on the floor beside it, the body of a hideous, loathsome old man in evening dress, a knife through his heart.

Wilde's novel provoked considerable outrage when it was published. The tenets of the New Hedonism expressed in the book flew in the face of conventional morality to the point that readers were profoundly shocked. Despite these objections, the novel succeeded artistically and attracted many readers.

The book presents Lord Henry's credo within its first few pages, and the rest of the narrative is devoted to Dorian's acting out of that credo. In a sense, Dorian Gray was born with the creation of Basil Hallward's portrait. Readers are not introduced to Dorian Gray, the child. The Dorian that Wilde springs on his readers does not exist until the portrait exists.

According to a letter that Wilde wrote in 1894, he said that he saw in this novel three sides of himself. In Basil Hallward, he creates what he believes is a true perception of himself. In Lord Henry, he projects the person whom the world believes him to be. In Dorian, he presents the self whom he would like to be in some other age. How seriously one can take this assessment remains a matter of scholarly speculation.

The Lord Henry that Wilde projects is, in accordance with Wilde's expressed philosophy, the ultimate artist. He molds raw material (Dorian), shaping it with sure hands into what he wills it to be. In this sense, he is a Pygmalion as much as he is a Mephistopheles.

## THE BALLAD OF READING GAOL

**First published:** 1898

**Type of work:** Poem

*This long poem is about the imprisonment and hanging of a young trooper in the Royal Horse Guards who murdered his wife in a fit of jealousy.*

*The Ballad of Reading Gaol* is the only major work that Wilde produced after his release from prison on May 19, 1897. By mid-October, he had finished this poem, consisting of 654 lines, 109 six-line verses. It was first published the following February. Wilde's name did not appear on the title page. Rather, the number of his prison cell at Reading Gaol—C.3.3.—was the designation by which the book was identified. By writing in six-line stanzas rather than the four-line stanzas typically found in ballads, Wilde was able to add reflective statements to each verse. Using the term that Ezra Pound later made famous, Wilde divided his poem into six "cantos."

*The Ballad of Reading Gaol* is unique among Wilde's work because it deals with the harsh realities of prison and with the even harsher reality of an execution, the taking of a human life, through legal means, by fellow humans. The world depicted in this poem is light-years away from the affluent drawing rooms in which his social comedies are set. It is equally distant from the fantasy worlds of his other poetry and his fairy tales.

The poem's first canto provides the introduction of the murderer into the prison community and the speculation of the other prisoners about him. The canto reflects a softening as it considers the crimes that all individuals commit, commenting on how all people at times kill with a "bitter look" or in some other covert but socially acceptable way. Finally, the prisoners realize that they all have a connection with the condemned man, that, in their own ways, they are all guilty with him. He becomes a sort of Christ figure expiating the universal sins of humankind.

The second canto relates the condemned man's final moments, but it also emphasizes the identification that the other prisoners feel with him as he faces execution. Canto 3 reflects on the days before

the execution and on how the prisoners develop a kinship with the unfortunate prisoner. The next canto presents the psychological impact of the execution on the other prisoners.

Structurally, the poem ends with the fourth canto. Wilde chose to continue it beyond that because he wanted to propagandize for prison reform, and it is in this forum that he can best do that. He castigates the legal and prison systems of his time, pointing out that all that is good in humans withers in prison. Despite his recent bitter experience with the legal and prison systems, Wilde remains remarkably detached and objective in his presentation.

This poem is not Victorian. It represents a new direction for Wilde, but one that he did not have the vitality to pursue further after the publication of this poem. *The Ballad of Reading Gaol* is a poem more in the tradition of A. E. Housman's *A Shropshire Lad* (1896), which Wilde had read, than of the Victorian poets, whose work is more like Wilde's earlier poetry.

## SUMMARY

Oscar Wilde's life was an outrageously interesting one that grew wholly sensational toward its close. Wilde lived a philosophy that perhaps was not meant for living, but he appears to have believed in it and to have accepted it fully. Art for art's sake remained his credo even after his imprisonment, although it is not reflected in *The Ballad of Reading Gaol*, which is his maverick work. *De profundis*, written in prison, leaves little doubt about what Wilde really accepted philosophically.

Although the comparisons of Wilde to William Shakespeare abroad when his plays were running in the West End are gross exaggerations, one cannot deny that Wilde was a remarkably able playwright who, by defying social and dramatic conventions simultaneously, created plays that articulated well the aestheticism espoused by Walter Pater. Wilde's often neglected essays on criticism are also significant and deserve further study and consideration. In these essays are articulated the maxims by which Wilde tried to live and write.

## DISCUSSION TOPICS

- What was Decadence in late nineteenth century art, and why did Oscar Wilde seek to express it?
- How is Wilde's love of paradox displayed in *Lady Windermere's Fan*?
- Does *The Importance of Being Earnest* deserve the enormous popularity it continues to have?
- Frame an argument to show that *The Picture of Dorian Gray* is morally unobjectionable—or that it is objectionable.
- Should *The Ballad of Reading Gaol* be recognized as Wilde's most profound literary composition?
- With the assistance of *De Profundis*, not available to readers in Wilde's lifetime, and the contributions of literary critics, what evaluation of Wilde's work is appropriate today?

## P. G. WODEHOUSE

**Born:** Guildford, Surrey, England  
October 15, 1881

**Died:** Southampton, Long Island, New York  
February 14, 1975

*Regarded as one of the premier humorists in English literature, Wodehouse was a distinctively original comic stylist.*

### BIOGRAPHY

Pelham Grenville Wodehouse (WOOD-hows) was born October 15, 1881, in Guildford, Surrey, England, the third of four sons of Henry Ernest and Eleanor Deane Wodehouse. His father spent his career in the Hong Kong civil service, rising to a judgeship. Wodehouse lived only one year in Hong Kong, spending the remainder of his childhood in England with friends and relatives, when not in school. This upbringing accounts for the inordinately large number of aunts and uncles in his fiction.

Wodehouse, known lifelong to his friends as “Plum,” followed his brother Armine to school at Dulwich and distinguished himself in Latin and Greek composition, football, and cricket and by writing comic verses for the school magazine, of which he was editor. Wodehouse’s school days were perhaps his happiest, the camaraderie of school being celebrated often in his fiction, where “old boys” never let each other down. Seven of his first dozen books are school novels inspired by his Dulwich experiences, most notably *Mike: A Public School Story* (1909; also known as *Enter Psmith*, *Mike at Wrykyn*, and *Mike and Psmith*), which examines the disadvantages of joining an older brother at school. More important, at Dulwich Wodehouse discovered writers, such as Charles Dickens, W. S. Gilbert, Rudyard Kipling, and Sir Arthur Conan

Doyle, who profoundly influenced his development as a literary artist.

Wodehouse had planned to continue his education at Oxford, but his father’s financial setbacks forced him to join the London office of the Hong Kong and Shanghai Bank. In several Wodehouse novels, the possibility of having to work in a bank seems grim to the protagonists, and the author himself hated the routine of his job and was determined to leave the bank before being sent to a position in the Far East. After two years as a bank clerk, he was hired by the *Globe*, a London newspaper, through a former master at Dulwich, and he soon inherited the master’s column. During this period, he began publishing school novels as serials in boys’ magazines and more sophisticated stories in such magazines as *Strand*. The school serials were also published as books, beginning with *The Pothunters* (1902).

On a trip to the United States in 1909, Wodehouse sold stories to *Cosmopolitan* and *Collier’s* magazines for much more money than he had received in England. He resigned from the *Globe*, settled in Greenwich Village in New York City, and tested the American market further, writing detective stories for pulp magazines and serving as drama critic for *Vanity Fair*. In 1914, the *Saturday Evening Post* bought *Something Fresh* (1915; also known as *Something New*), the first of the series of novels set at Blandings Castle, and went on to publish twenty-one of his novels as serials. Also in 1914, he married Ethel Newton Rowley, a widow. Wodehouse later adopted Ethel’s daughter, Leonora.

Unable to serve in the British army during World War I because of bad eyesight, Wodehouse

spent the war in America and began working in musical comedy in 1915 by collaborating, as lyricist, with composer Jerome Kern and playwright Guy Bolton. At one point, they had five shows running on Broadway and another twelve productions on the road. Wodehouse also wrote lyrics for such composers as George Gershwin, Cole Porter, Victor Herbert, and Sigmund Romberg. His best-known song is "Bill," with music by Kern, originally written for *Oh, Lady! Lady!* (1918) and incorporated into *Show Boat* in 1927. Wodehouse also wrote plays with Bolton, adapted foreign plays, and dramatized his novels. His stories and novels, such as *A Damsel in Distress* (1919), often draw upon his theatrical experiences.

The Wodehouses and their numerous pets spent the 1920's traveling between the United States, England, and France. Because of British and American income taxes and British quarantine laws that prevented them from taking their dogs in and out of England, the Wodehouses decided to settle in France. In 1934, they bought a country house in Le Touquet, where they entertained aristocrats, national leaders, and writers such as Arnold Bennett and H. G. Wells. Wodehouse himself made little impression on these dignitaries. Winston Churchill met him six or seven times and always forgot who he was. Evelyn Waugh, an intense admirer of Wodehouse's fiction, described him as the dullest man he had ever met. Wodehouse apparently lived entirely for his work and was comfortable discussing nothing else. He also struck some as eccentric for leaving his own parties to walk his dogs.

Like most popular writers of his time, Wodehouse was called to Hollywood. He spent 1930 and 1931 at Metro-Goldwyn-Mayer, which used nothing that he wrote. He returned with better results in 1937, adapting *A Damsel in Distress* into a George and Ira Gershwin musical starring Fred Astaire. Wodehouse did not enjoy writing screenplays, however, because he had too many novels that he was eager to create. The quality and popularity of his fiction resulted in his being awarded, in 1939, a doctorate of letters by the University of Oxford.

Wodehouse's life was relatively uneventful until World War II. The Wodehouses stayed in France despite the threat of German occupation, and the author was arrested in June, 1940, and eventually interned at a camp at Tost in Upper Silesia. The fol-

lowing June, he was transferred to a hotel in Berlin and gave five broadcasts over German radio. British politicians and newspapers branded him a traitor; some British libraries withdrew his books, and, worst of all, his beloved Dulwich removed his name from its rolls. Wodehouse's most damaging comment during these broadcasts was that he did not mind being a prisoner as long as he was given materials with which to write. A minority praised Wodehouse's courage for candidly discussing the way Germany treated its prisoners. With "In Defense of P. G. Wodehouse," George Orwell painted the writer as being merely politically naïve in not recognizing the implications of broadcasting over enemy radio.

Wodehouse returned to France in 1943, only to be arrested by the French shortly before Paris was liberated and charged with collaboration and treason. After questioning by British officials, he was released. The Wodehouses continued living in France until 1947, when they moved permanently to the United States. (Wodehouse never returned to England after 1939.) As the passions of the war dissipated, Wodehouse's critics were felt to have overreacted. Dulwich restored his name to its rolls in 1946, and in 1961 the British Broadcasting Corporation broadcast an apology to Wodehouse, "An Act of Homage and Reparation," by Evelyn Waugh.

The Wodehouses spent their last years in Remsenburg, Long Island, New York, and became American citizens in 1955. Wodehouse continued writing until the end of his long life, devoting little time to anything other than his dogs and cats. He was knighted in January, 1975, but could not go to London for the ceremony because of declining health. He died shortly afterward on Valentine's Day in 1975, in Southampton, Long Island. Lady Wodehouse lived on at Remsenburg until her death in 1984 at ninety-nine.

## ANALYSIS

Between 1902 and 1974, Wodehouse published more than ninety books—novels, collections of stories, and memoirs. His fiction, set mostly in London and the country houses of England with frequent excursions to the United States, bears little resemblance to real life in any place or time. Wodehouse creates a unique comic universe crammed with aristocrats, servants, secretaries, clerks, clergy,

poets, police officers, judges, thieves, and, significantly, musical comedy performers.

With the emphasis on plot and two-dimensional characters, Wodehouse's fiction resembles nothing so much, as the writer himself observed, as musical comedy without the music. The stories and novels concern chiefly romantic and financial difficulties, with all problems resolved by the conclusion.

The only occurrence of anything resembling political commentary is the portrait of Roderick Spode as the founder of a fascist organization ludicrously known as the Black Shorts in *The Code of the Woosters* (1938). Wodehouse ridicules Spode further by making him a secret designer of ladies' underwear. Such episodes seem to place Wodehouse's fiction in a particular time, since foreign and domestic fascism was a threat to Great Britain in the 1930's, but most of Wodehouse's characters and events seem drawn from an England that has changed little since the start of the twentieth century. His characters are slightly modified Edwardians. Anachronisms abound in the later novels and are fitting since they add to the comic absurdity.

More than half of Wodehouse's fiction deals with continuing characters: Uncle Fred, Mr. Mulliner, Ukridge, Psmith, Lord Emsworth, Jeeves, and Bertie Wooster. The most significant of these are the last four. Psmith becomes Wodehouse's first notable adult character. He is rich in *Psmith in the City: A Sequel to "Mike"* (1910) and *Psmith Journalist* (1915), poor in *Leave It to Psmith* (1923), but regardless of his economic circumstances, he is bored by ordinary life and longs to take risks. These chances, from operating a New York newspaper and running into gangsters to posing as a Canadian poet, lead to typically complicated Wodehouse plots. Psmith is a smarter version of Bertie Wooster, a fast-thinking swindler who talks himself both into and out of trouble. Throwing himself rashly into situations with little regard for the consequences, his sole purpose seems to be to start something.

Ronald Eustace Psmith prefigures later characters in frequently quoting poetry and in speaking in characteristic metaphors. Tea is never simply tea but "a cup of the steaming." Rather than resort to a cliché like "in the soup" to indicate trouble, Psmith uses phrases such as "consommé splashing about

the ankles" or "knee-deep in the bouillon." Such verbal silliness is indicative of P. G. Wodehouse's style at its best.

Wodehouse writes about Lord Emsworth and the goings-on at Blandings Castle in ten novels from *Something Fresh* (1915) to *A Pelican at Blandings* (1969; also known as *No Nudes Is Good Nudes*). These farces feature dotty Lord Emsworth devoting as much time as possible to his flowers or pigs, his sister Lady Constance trying to run his life for him, and assorted ninnies such as his brother Galahad Threeepwood. Everything at Blandings Castle appears to be in flux, with numerous characters running down corridors or across terraces in pursuit of or in flight from mischief. Lord Emsworth keeps firing his secretary Rupert Baxter, and Lady Constance constantly rehires him. Baxter longs to impose order on the chaos of Blandings.

Wodehouse's greatest triumph is Jeeves and Bertie Wooster, who appear in eleven novels and more than fifty stories published between 1917 and 1974. The basic plot involves Bertie getting into trouble, making matters worse by trying to extricate himself, and finally relying upon his valet Jeeves to resolve the situation. The problems are often created by Bertie's stern Aunt Agatha or his blustery Aunt Dahlia, by such friends as Bingo Little or Tuppy Glossop, or by someone to whom Bertie is engaged and who is determined to reform him. Through all of these misadventures, Bertie remains cheerfully optimistic.

Having Bertie narrate the stories and novels is a stroke of genius by Wodehouse. Bertie is an ironic narrator who never realizes the ramifications of the events that he is describing. Unusual for a first-person narrator, Bertie is not merely an observer but the central participant, since he influences almost all that happens. Jeeves narrates one Bertie story and one non-Bertie novel, and the effect is not the same. One of the virtues of Bertie as narrator is his use—or misuse—of the language. Combining jargon, slang, clichés, and mangled quotations from literary giants with his absentminded eccentricity, Bertie speaks in a style all his own:

It is pretty generally recognized in the circles in which he moves that Bertram Wooster is not a man who lightly throws in the towel and admits defeat. Beneath the thingummies of what-d'you-call-it, his head, wind and weather permitting, is as a rule

bloody but unbowed, and if the slings and arrows of outrageous fortune want to crush his proud spirit, they have to pull their socks up and make a special effort.

Bertie is Dr. Watson to Jeeves's Sherlock Holmes, for the only rival of this gentleman's gentleman for intellect in fiction is Sir Arthur Conan Doyle's detective. Bertie explains his admiration for Jeeves: "The man's a genius. From the collar upward he stands alone. I gave up trying to run my own affairs within a week of his coming to me." Jeeves is the godlike force who miraculously engineers the denouements of the Bertie stories and novels. Because Bertie has to have a problem to be solved and then compounds matters by attempting to deal with it himself, Jeeves's powers of ingenuity are supremely tested in the best of the fiction, such as the novels *Thank You, Jeeves* (1934), *Right Ho, Jeeves* (1934; also known as *Brinkley Manor: A Novel About Jeeves*), *The Code of the Woosters*, and *Joy in the Morning* (1946), and such stories as "The Rummy Affair of Old Biffy," "Jeeves and the Impending Doom," "Jeeves and the Song of Songs," and "Indian Summer of an Uncle." Because numerous obstacles must be placed in Jeeves's way, Wodehouse also tests himself by making the plots as convoluted as possible. The pieces often fit together with almost mathematical precision.

## THE INIMITABLE JEEVES

**First published:** 1923

**Type of work:** Novel

*Bertie Wooster and Jeeves attempt to assist in the love life of Bingo Little with comic consequences.*

Four Bertie and Jeeves stories are included in *My Man Jeeves* (1919), but *The Inimitable Jeeves* is the first book completely about these characters as Wodehouse weaves eleven previously published stories together to create a mostly unified narrative. The first true novel in the series is *Thank You, Jeeves* (1934).

Many of the loose strands of *The Inimitable Jeeves* are held together by the romantic travails of

Bertie's friend Bingo Little. Bingo is forever falling in love, and Bertie, with Jeeves's assistance, either promotes the romance or attempts to prevent it, depending on the suitability of the young woman. At the beginning of the book, Bingo is infatuated with a waitress and wants Bertie to make his uncle, Lord Bittlesham, the source of Bingo's income, receptive to Bingo's marrying someone from the working class. Jeeves suggests having Bingo read the uncle such Rosie M. Banks novels as "Only a Factory Girl," in which marriage to someone of lesser social status is advocated. As a result, Lord Bittlesham marries his cook.

Bingo next falls for Honoria Glossop, but Bertie's domineering Aunt Agatha wants her nephew to marry Honoria. Attempting to resolve the problem without Jeeves's help, Bertie pushes Honoria's young brother into a pond so that Bingo can save the boy and appear heroic, but on his way to the

pond, fickle Bingo discovers someone else. Bertie becomes engaged to Honoria, who says he must get rid of Jeeves. The valet saves his master by creating an elaborate plot to convince Honoria's father, Sir Roderick, a prominent psychiatrist, that Bertie is crazy.

After Jeeves saves Bertie's friend from two more ill-considered ro-

mances, Bingo falls in love with another waitress, who forces him to marry her without his uncle's consent. When presented to Lord Bittlesham, she reveals herself to be Rosie M. Banks, having been working as a waitress to research her next book.

In addition to his superior intelligence, Jeeves must be privy to sources of information denied the other characters, adding ironic distance to Bertie's perception of reality. Jeeves is the all-knowing force manipulating the others as if they were chess pieces. Jeeves even resorts to lying and bribery to achieve his ends. He is everything the naïve Bertie is not.

Though mentally inferior to his servant, Bertie is intelligent enough to rely on Jeeves's judgment in most matters. Bertie also possesses enough self-awareness to recognize his limitations. He is truly

an admirable character whose behavior derives from a strict code of conduct. While this code is that of the privileged late Victorian schoolboy, it allows Bertie to be modest, gracious, and magnanimous. He is always willing to devote time and money to assist his friends. When he hesitates over helping Bingo out of a scrape, all his friend need do is remind him that they were at school together.

*The Inimitable Jeeves* is significant in the Wodehouse canon for introducing numerous stock Bertie/Jeeves elements. These include the pattern of Bertie getting into trouble, Jeeves getting him out, and the young master having to sacrifice an article of clothing that the valet finds offensive: purple socks, loud cummerbund, spats in Old Etonian colors. Others are Aunt Agatha's efforts to have Bertie wed, only for him to escape narrowly, and Sir Roderick Glossop's conviction that Bertie is mad. *The Inimitable Jeeves* also displays Wodehouse's comic style at its best.

## LEAVE IT TO PSMITH

**First published:** 1923

**Type of work:** Novel

*Psmith poses as a Canadian poet to be near the woman he loves and to help steal a diamond necklace in a good cause.*

*Leave It to Psmith* is both a Psmith novel and a Lord Emsworth/Blandings Castle tale. It opens with Rupert Baxter, the overly efficient secretary, completely in charge of Blandings because of Lord Emsworth's obsession with his garden. Lord Emsworth also dares not diminish Baxter's power for fear of annoying Lady Constance, the sister who dominates him. Joseph Keeble, Lady Constance's husband, is also intimidated by her, even allowing her complete control of his money. His beloved stepdaughter Phyllis has recently married the poor Mike Jackson, and he longs to help them get started. Freddie Threepwood, Lord Emsworth's flighty son, suggests that they steal Lady Constance's diamond necklace, give Phyllis the money she needs from what his wife gives Joe to buy a new necklace, and replace it with a reset version of itself.

Ronald Eustace Psmith, broke since the death of

his father, has placed an advertisement claiming he will perform any task, legal or illegal, for a fee. Freddie goes to London to attempt to hire Psmith, who is not interested until he discovers that the lovely Eve Halliday is going to Blandings to catalog the library. When Lord Emsworth mistakes Psmith for the Canadian poet Ralston McTodd, whom Lady Constance has invited to Blandings, Psmith is given the means to be near Eve.

Psmith knows nothing about poetry and is not even remotely artistic but is such a charmingly convincing liar that he fools everyone—with the notable exception of the always-suspicious Baxter—at Blandings, even Miss Peavey, another poet. The already complicated plot becomes even more so because Freddie is in love with Eve, because Eve cannot return Psmith/McTodd's affection since the real McTodd is separated from one of her best friends, because Miss Peavey is also a thief after the necklace, and because Eddie Cootes, Miss Peavey's gun-toting former colleague in confidence games, shows up unexpectedly knowing that Psmith is not McTodd. A typically Wodehousian farcical scene results when Baxter, wearing only pajamas, is locked out in the middle of the night and hysterically resorts to throwing flowerpots through Lord Emsworth's bedroom window.

Psmith's prediction to Freddie midway in the novel eventually comes true: "All will doubtless come right in the future." Since Eve agrees to marry Psmith, he becomes, as a married man, disqualified from being a Wodehouse hero and never appears again except in revised versions of earlier novels.

*Leave It to Psmith* is a typical Blandings Castle novel full of the usual eccentric characters one finds in musical comedies, but it is even more typically a tale dominated by Psmith, whose verbal skills are seen at their best as he double-talks his way through discussions of poetry. Psmith's appeal as a fictional character is illustrated by his willingness to let events take their course. He allows Lord Ems-

worth to think that he is the Canadian poet even before he knows of the connection to Eve or the necklace because of “some innate defect in his character. He was essentially a young man who took life as it came, and the more inconsequently it came the better he liked it.” Psmith’s delight in the confusion he creates is infectious.

### SUMMARY

While the books that P. G. Wodehouse produced over his last decade do not match the earlier ones in vitality, his fiction was amazingly consistent in quality over much of his uniquely long career. Working so many variations on the same types of characters and situations is truly a remarkable achievement. Even if such an England as he presents never existed, Wodehouse convinces his readers that it should have. His is the sublimest of escapist literature.

Michael Adams

### DISCUSSION TOPICS

- Why was the essentially English P. G. Wodehouse better appreciated in the United States than in his native country?
- Was the British forgiveness of Wodehouse after World War II justified?
- What does the phrase “musical comedy without the music” mean?
- Characterize Wodehouse’s unusual metaphors.
- How was Wodehouse influenced by Sir Arthur Conan Doyle?
- Did elements of early Hollywood films also influence Wodehouse?

# CHRISTA WOLF

**Born:** Landsberg an der Warthe, Germany (now Gorzów Wielkopolski, Poland)  
March 18, 1929

*Among the leading writers of the German Democratic Republic (East Germany), Wolf became a dominant voice in German literature after World War II. As a novelist, she had a strong influence on political, feminist, and aesthetic issues.*

## BIOGRAPHY

Christa Wolf (vawlf) was born on March 18, 1929, in Landsberg on the Warthe (now the Polish town of Gorzów Wielkopolski), the daughter of Hertha Jaekel Ihlenfeld and grocer Otto Ihlenfeld. Wolf and her family fled the approaching Russian troops in 1945 and migrated west to Mecklenburg. After World War II, Wolf was among the first to write about her personal involvement in the war without creating false, antifascist heroes.

She studied German literature in Jena and Leipzig from 1949 to 1953. Wolf later worked as a reader and editor for journals and publishing houses and served on the executive committee of the Writers' Union of the German Democratic Republic (GDR). She married writer, scholar, and publisher Gerhard Wolf in 1951, and the couple's daughters, Annette and Katrin, were born in 1952 and 1956, respectively.

Wolf worked for a time in a factory as a means of involving workers in literary activity, and she also was a member of a working writers' group. She participated in several International Writers' Conferences on Peace in the 1980's, traveled extensively, served as a writer-in-residence at several American universities, and was a fellow at the Getty Institute in Los Angeles.

A dedicated socialist active in both the political and literary world of the GDR, Wolf protested the ills of East Germany while maintaining a firm belief in socialism itself. When East Germany's political system was disintegrating in 1989, she appealed to her fellow citizens to build a new socialist East Germany rather than succumb to the economic allure of the West. Although unheeded, her appeal verifies her commitment to humanistic ideals in a so-

cialist setting. As a feminist, antiwar writer, and independent thinker, Wolf criticizes the patriarchal and military complexes of both East and West.

Wolf became the center of controversy in 1990, after the publication of her novella, *Was Bleibt: Erzählung* (1990; *What Remains*, 1993). Written in the late 1970's, the book records the experiences of a young woman writer placed under surveillance by East Germany's secret police. Critics accused Wolf of being an opportunist who was willing to publish such a piece only when it had become both safe and fashionable to do so. This attack sparked a debate as to whether she and other GDR writers had been collaborators with or true voices of protest against a repressive regime. In a talk in Los Angeles in 1993, Wolf discussed the accusations that she had been an informant for the secret police; she pointed out that while she was accused of providing only a few pages of information to the police, the same police force had gathered several volumes of material about her while she was under surveillance. Many scholars, particularly those in the United States, defended Wolf. They viewed the attack as an attempt to create a scapegoat and to discredit what remained of socialist commitment in Eastern Europe. The best evidence of Wolf's dedication to a humane system of political and economic equality rests in the many works she produced that criticize the dehumanizing tendencies of both the capitalist West and a corrupted Communist East.

Wolf's early works, *Moskauer Novelle*, (1961; Moscow novella) and *Der geteilte Himmel; Erzählung*, (1963; *Divided Heaven: A Novel of Germany Today*, 1965), could be described as socialist realism as it was prescribed by the aesthetic committees of the

GDR. In a later novel, *Nachdenken über Christa T.* (1968; *The Quest for Christa T.*, 1970), Wolf created her own version of realism, which acknowledged the individual's need to develop a stable self even within a socialist society. This text brought her into conflict with GDR cultural functionaries. In *Kindheitsmuster* (1976; *A Model Childhood*, 1980; retitled *Patterns of Childhood*, 1984), Wolf explored the Nazi era and the childhood of those who grew up under Adolf Hitler. In *Kein Ort: Nirgends* (1979; *No Place on Earth*, 1982), Wolf examined the lives of two figures from the German Romantic period; *Kassandra: Erzählung* (1983; *Cassandra: A Novel and Four Essays*, 1984) rewrites the life of the famous prophet of Troy. In *Störfall: Nachrichten eines Tages* (1987; *Accident: A Day's News*, 1989), Wolf analyzes the repercussions of the accident at the Chernobyl nuclear power plant.

Always a voice of social conscience, Wolf also became a strong advocate of women's rights. In 1996, she published *Medea: Stimmen* (*Medea: A Modern Retelling*, 1998), in which she reconsiders the classical story of Medea and the murder of her children.

Two collections of Wolf's essays and short stories appeared in the 1990's: *Auf dem Weg nach Tabou: Texte, 1990-1994* (1994; *Parting from Phantoms: Selected Writings, 1990-1994*, 1997) and *Hierzulande andernorts: Erzählungen und andere Texte, 1994-1998* (1999), which look back on the fate of Germany since the fall of the Berlin Wall. Her novel *Leibhaftig* (2002; *In the Flesh*, 2005) recounts, through fevered dreams, a serious personal illness that parallels the deterioration of the East German state. *Ein Tag im Jahr: 1960-2000* (2003; *One Day a Year: 1960-2000*, 2007) is a nonfiction work that documents Wolf's daily life, as well as the political events of four decades in East and West Germany. Originally sparked by a literary contest in the Soviet newspaper *Izvestia*, challenging readers to write on the topic "your day of September 27, 1960," the autobiographical book records Wolf's reflections on the events of September 27 in each year from 1960 to 2000. The volume is the culmination of Wolf's developing technique of intertwining the biographical and the historical-political in her work. *Mit anderem Blick* (2005) is a collection of stories and diary entries written between 1992 and 2003; this book displays a lighter, more personal touch than many of Wolf's earlier works.

Wolf has won numerous literary prizes, among

them the Heinrich Mann Prize of the Academy of Arts of the German Democratic Republic (1963), the Georg Büchner Prize of the German Academy of Language and Poetry (1980), and the Austrian Prize for European Literature (1985). In 1991, she was named an honorary member of the American Academy of Arts and Letters. In 1999 Wolf received both the Elisebeth Langgässer Literature Prize and the Nelly Sachs Prize. In 2002, she was awarded the Deutscher Bücherpreis from the German publishing industry for her lifetime achievements, and in 2005 she received the Hermann Sinsheimer Prize.

## ANALYSIS

Christa Wolf has always resisted labels. When asked in an interview if she was a feminist, she responded that she was not any "ist." She has remained true to her own ideals and social vision despite drastic and traumatic changes in the political structures around her. This attempt to find a self and remain true to it despite social pressures forms a central theme in her novels.

In *The Quest for Christa T.*, Wolf focuses on the difficulty of achieving an individual identity, what she calls "the difficulty of saying 'I'." Christa T. grows up during World War II and later in a developing German Democratic Republic (GDR) that stressed conformity. Christa T., however, is an idealist who does not fit into the highly regimented society. The book's first-person narrator thinks her way back in time to recover an image of her friend Christa T.; in so doing, she is challenged to not falsify the person she is re-creating. In this novel, Wolf values both the individual struggling to realize herself and the idea that people must create a society that cares for all of its members. She realizes the shortcomings of the communist GDR as it developed in the 1950's and 1960's, but she believes in the possibility of a socialist society that cherishes both the group and the individual.

An attempt to create a coherent self and to remain faithful to it despite social pressures is also evident in *No Place on Earth*, in which two poets from the German Romantic movement—one female, Karoline von Günderrode, the other male, Heinrich von Kleist—struggle to realize their poetic genius in a society that rejects them. In *Cassandra: A Novel and Four Essays* the Trojan princess and priestess wages a comparable battle to give voice to a vision that society does not want to see. Locating a

stable individual self in a society that demands conformity remains an important topic throughout Wolf's work. For Wolf, this individualism must always be balanced by a concern for the society as a whole.

Another important issue for Wolf is *Vergangenheitsbewältigung*, or coming to grips with the past. In post-World War II Germany, writers were forced to consider the nation's role in the war and the Holocaust. Wolf examines this issue with characteristic honesty and forthrightness. Her most direct examination of the past comes in *Patterns of Childhood*, in which the narrator reexamines her past during the Nazi era and afterward. In this fictional autobiography, she takes an honest and painful look at what war does to a young woman growing up under its propagandistic spell. As Wolf analyzes the ways in which war has deformed her youth into a perverse "model childhood," the narrator in *Patterns of Childhood* also examines her own current historical context of the 1970's.

Wolf's novels up to *Cassandra: A Novel and Four Essays* form a reverse chronological progression. In her early works, *Moskauer Novelle* and *Divided Heaven: A Novel of Germany Today*, Wolf deals with her contemporary environment. In *The Quest for Christa T.*, she traces the past life of a deceased friend. In *Patterns of Childhood*, she examines childhood during World War II; and in *No Place on Earth*, she takes another step back to analyze the lives of two figures of German Romanticism. Her next leap took her back to ancient Troy and the prophet Cassandra. In each of these situations, Wolf searches the historical records to determine why and how humanity has arrived where it was in the late twentieth century. In so doing, she hopes to gain knowledge in order to improve the world. Her explorations of earlier periods and stories also provide a new insight into the issues and problems that occupy Wolf's own time. This impulse in her work is continued in her novel *Medea*.

Wolf's writing is also marked by a strongly anti-war sensibility that is most strongly articulated in *Cassandra: A Novel and Four Essays*. As a woman whose warnings about military destruction went unheeded, Wolf was drawn to her ancient counterpart, Cassandra. Her fears are echoed in the threat

of nuclear annihilation contemplated in *Accident: A Day's News*, in which Wolf muses on the ways in which the nuclear cloud of Chernobyl changes the very language people use, as well as the air they fear to breathe.

Finally, Wolf's works are characterized by an ongoing concern for the position of women in society. The historical scope of her investigations allows her to move from a Trojan culture poised between a matriarchy and patriarchy to gender roles prescribed by Nazi propaganda to the communist and socialist determination of women's roles and finally to the place of women in contemporary culture. While Wolf may not want to limit herself by labels such as "feminist," her works clearly describe the constraints women face in a society dominated by men, and often by men at war.

Wolf's novels present a challenging literary style in which chronological order is often disrupted by characters thinking backward or forward in time, thus breaking the linear flow of the narrative. Simple causality is hard to find in Wolf's texts; complex interweavings of forces from different moments in time force character, narrator, and reader to reassess their understanding of the world. Wolf also uses first-, second-, and third-person narration in order to reveal the struggles one experiences in defining an individual self. She sometimes has character and narrator merge in consciousness (at the opening of *Cassandra: A Novel and Four Essays*, for example, or at various moments in *The Quest for Christa T.* or *Patterns of Childhood*) to create a communal consciousness that connects the individual to larger historical or interpersonal forces. Wolf does not hesitate to use personal forms, such as diaries, travel journals, letters, or reminiscences, as materials for her novels. This practice creates a strongly autobiographical underpinning in her works.

Beginning in the late 1980's and particularly after the fall of the Berlin Wall, Wolf more closely examines autobiographical situations, as evident in *In the Flesh*, *One Day a Year*, and her novel *Sommertück* (1989). She questions whether her faith in a viable and just social system can be attained and whether, as a writer, she can help contribute to that goal.

## THE QUEST FOR CHRISTA T.

**First published:** *Nachdenken über Christa T.*, 1968 (English translation, 1970)

**Type of work:** Novel

*A woman writer in the 1960's attempts to reconstruct the life of a dead friend.*

*The Quest for Christa T.* was Wolf's breakthrough as a major writer. In the novel, a first-person female narrator attempts to reconstruct the life of a friend who has recently died in her thirties of leukemia and of an inability to fit into her society. In the process the narrator reflects on her own time and society. She ponders the process of writing and its ability to save or to falsify people by seeing them through biased memories. The book investigates the struggle to define an individual identity in a developing communist society (East Germany) that sees conformity as necessary to its survival.

In a 1968 essay entitled "Selbstinterview" (self-interview), Wolf indicates that she wrote *The Quest for Christa T.* from a subjective impulse because someone very close to her had died, and she could not accept this death. Writing about it was a means of protecting herself. Wolf delves into the early life of her friend and uses documentary material, such as diaries, letters, and sketches of Christa T. Moreover, Wolf discovered that in the process of writing about Christa T., she was forced to confront herself and the relationship between the first-person narrator and Christa T.

The constant interplay between reality and fiction, between self and narrator, breaks down the boundaries between the two. Just as the narrator of *The Quest for Christa T.* is forced to invent certain scenes in order to produce a "true" text, Wolf mixes fiction and reality to produce a realism of "subjective authenticity." By "subjective authenticity" Wolf means writing in which the author is intimately in-

volved with her material, in which she comes to terms with the reality around her, and in which that very process is reflected. This method respects no traditional literary boundaries and does not separate reality and fiction.

*The Quest for Christa T.* challenges a number of tenets of East German society in the 1960's. It values individual difference and creativity over conformity. Wolf acknowledges that the ideal utopian society she and her contemporaries foresaw in the 1950's has not materialized in Eastern Europe. The crushing of the Hungarian revolt by Russian troops in 1956 and the disillusionment it caused is recorded in her text. She depicts the failure of East German society to absorb its most idealistic individuals, to give someone like Christa T. a productive role. This alienation and lack of productive belonging contributes to Christa T.'s death. Wolf is equally critical, however, of West Germany's emphasis on money and the possession of luxury objects. This balanced critique of the abuses of both the communist and the capitalist systems marks all of Wolf's work.

## PATTERNS OF CHILDHOOD

**First published:** *Kindheitsmuster*, 1976  
(English translation, *A Model Childhood*, 1980; retitled 1984)

**Type of work:** Novel

*A female writer in the 1970's looks back at her childhood during the Nazi era and reflects on her current historical situation in the light of that past.*

*Patterns of Childhood* is a fictional autobiography. When the narrator of *Patterns of Childhood* relates her childhood in the third person rather than the traditional first-person voice of an autobiography, she reproduces Wolf's own gesture of displacing her childhood memories into fiction. The novel therefore reflects not only Wolf's life but also the process of her writing.

The narrator has difficulty confronting her childhood participation in the Nazi era. She was not directly involved in military combat or in operating the death camps; however, she led a typically ill-informed, middle-class life in which she believed

in her country and tried to fit into Nazi society. She understands the speed with which East Germany forgot World War II after it was over since, according to East German propaganda, the war was the fault of the capitalist, imperialist West. The narrator knows that the mentality that produced the Holocaust is not limited to West Germany or to the period of World War II. Her reflections recall the past of an entire generation of Germans, East and West, who grew up during the war years. Not old enough to be directly responsible for the war, those born in the mid-to-late 1920's nevertheless shoulder the burden of memory and self-examination after Adolf Hitler's fall.

One of the first writers from the GDR to confront personal involvement in World War II, Wolf breaks the taboo against acknowledging the widespread

fascist sentiment among many of her peers and elders. She undermines the image of socialist heroes bravely resisting the Nazis and depicts many who supported Nazi rule, were indifferent to it, or were cowed into conformity.

The trauma associated with growing up during the Hitler era makes it impossible for the narrator to connect her current self, living in the GDR

of the early 1970's, with the child that was molded during the Nazi period. The narrated self thus becomes the third-person voice of Nelly Jordan, while the narrator meditates on current events in the second person. The rupture of consciousness implicit in this splitting of the self into the second and third person forms the underlying tension of the text. The plot of *Patterns of Childhood* is the reintegration of the narrator's self. The narrator realizes that her story will come to a successful end only when she can unify the community of selves she has created in writing the text, only when she can reconstruct herself as a whole being. This unification is symbolized by the convergence of the third-person passages about the young Nelly and the second-person passages of the narrator's self-address into the unified first-person voice of the final page of the book.

Wolf's closing page is characteristically multi-valent. She does, finally, succeed in using the first-person voice in her text, but it is a first person who must admit uncertainty. The admission of ambivalence from a reintegrated community of selves signals a positive redefinition of the concept of the female subject (rather than object) and the way in which she defines herself.

## NO PLACE ON EARTH

**First published:** *Kein Ort: Nirgends*, 1979  
(English translation, 1982)

**Type of work:** Novel

*Two poets from the German Romantic period meet at a social gathering for literati and discover in their intensifying conversation that they share a feeling of alienation and personal frustration that will lead each to commit suicide within a few short years.*

*No Place on Earth* presents the fictitious gathering of several of Germany's leading Romantic writers and intellectuals at a country estate in June, 1804. Employing a technique of shifting narrative voices, the novel focuses on two writers from the Romantic period, Karoline von Günderrode and Heinrich von Kleist. While Kleist's work would later become famous, Günderrode's poetry would remain largely neglected until Christa Wolf published a collection of Günderrode's writing, *Die Schatten eines Traumes* (1979), with an introductory essay that sheds light on both Günderrode's and Wolf's work. Wolf was working on the collection while writing this novel.

Both Kleist and Günderrode felt their talents went unrecognized and unappreciated in their own times, and both committed suicide shortly after this fictional meeting (Günderrode in 1806, Kleist in 1811). Wolf's novel was also shaped by her frustration at the exile of dissident writer and singer Wolf Biermann from the GDR in 1976 and by her attraction to early German Romantic literature, despite the official GDR condemnation of it as dangerously subjective and irrational. All these factors coalesced in Wolf's depiction of two early Romantic writers whose sensitive and intense

emotions and idealistic beliefs put them at odds with their increasingly rational and materialist surroundings.

In their interior monologues and eventually their intense dialogue, Günderrode and Kleist reveal the conflicts engendered in individuals whose views do not match the culture and politics of the society in which they live. Their suicides are at least partly an indictment of a society which cannot usefully incorporate its own most creative and sensitive individuals. The parallels between this situation and Wolf's own in East Germany in the late 1970's are intensely evident.

The title *No Place on Earth* plays on the Greek word *utopia*, which literally translates to the words "no place." Wolf's "No place, no where" echoes the idea that a utopia is an idealized construction of what life might or should be, which exists in no place in the current world. The idea of utopia runs through many of Wolf's works in which characters seek more just societies that respect individuals.

In this novel, both the male writer Kleist and the female poet Günderrode conceptualize such a utopia in which feeling would be valued as much as reason, and science would not be perverted into arid rationalizing and cold measurements, numbers, and dollars. The two characters can only fantasize about a society in which their value as creative individuals would be accepted and celebrated. The reality, however, is that both are alienated, misunderstood, and brutalized to such an extent that each commits suicide. "Utopia" thus remains literally "no place" for these two characters; they cannot find a society in which they can live.

The novel combines several of Wolf's major themes, including the inability of society to productively incorporate some of its most creative individuals; societal repression, particularly of women; the overvaluing of that which can be measured and counted; and the inability of humankind to unify idealism and reality into a viable social order.

## CASSANDRA: A NOVEL AND FOUR ESSAYS

**First published:** *Kassandra: Erzählung*, 1983  
(English translation, 1984)

**Type of work:** Novel and essays

*Cassandra, princess and prophet of Troy, analyzes the effects of political corruption and war on the Trojans.*

The novel *Cassandra* began when Wolf delivered a series of lectures on poetics at Frankfurt University in 1982. She did not present the expected scholarly analysis of poetics, but instead she delivered a series of four talks, including two "Travel Reports," "A Work Diary," and a "Letter." These lectures explained how Wolf became interested in the figure of Cassandra. Her fifth lecture was the narrative of *Cassandra* itself. Wolf often refused to play by academic rules.

Like Euripides' *Tröiades* (415 B.C.E.; *The Trojan Women*, 1782), *Cassandra* is told from the perspective of the vanquished survivors of the Trojan War, with Wolf describing the obliteration of the people and culture of Troy in 1200 B.C.E. Cassandra's interior monologue as she awaits her death at the gates of Agamemnon's fortress takes her back in memory to Troy. She remembers peaceful scenes of a society balanced between matriarchy and patriarchy, a balance represented by the closeness and mutual counsel of her mother, Hecuba, and her father, Priam. Cassandra recalls how the war destroyed that delicate balance; matriarchal vision and patriarchal political power vied with one another and the patriarchy eventually won.

Wolf's antiwar message is evident in her portrayal of the real reasons for war. Rejecting the Trojan War as a battle caused by the beauty of Helen of Troy, Wolf depicts the war's economic underpinning. The Trojans fight not for Helen, who is not in Troy, but for a bald-faced lie that they sustain. Male egotism and not female beauty breeds the conflict. The epic "heroic tradition" rapidly degenerates into bestial cruelty as Wolf indicts the major heroes of the Trojan War. She reduces the archetypal military hero, Achilles, to "Achilles the beast," a sadistic coward. Cassandra goes to her death partly as a refusal to participate any longer in such a degraded,

“heroic” world. The four essays in the book reinforce Wolf’s antiwar message by discussing twentieth century wars in Vietnam and Latin America, as well as the threat of nuclear annihilation in Europe, while her novel investigates the obliteration of the people and culture of Troy in 1200 B.C.E.

Cassandra also recollects, however, an alternative society of mutually supportive outcasts, composed largely of women, that cuts across class and national boundaries. Aeneas takes this society with him when he flees Troy. Occupying a brief utopian moment in the text, Aeneas’s little band will be entrapped in the bellicose currents of history in the Roman Empire they are about to found.

Wolf’s novel makes use of earlier epics and dramas. She gives voice to the different reality experienced by women. Her novel creates a second narrative tradition, a female one that runs in opposition to the male, “heroic” narrative tradition of the

epic. Wolf is too much a realist to imply that this utopian society will be easily achieved. Such a society can, however, be envisioned by a woman who is willing to question the patriarchal tradition.

#### SUMMARY

Christa Wolf has always been willing to criticize political and social corruption in the capitalist West and the communist East. A supporter of the rights of the individual in a socialist context, she also champions the needs of society as a whole (and particularly its most vulnerable members) in a capitalist context. Her stylistic complexity and her political courage and conviction make her work a compelling record of the shifting historical currents of the second half of the twentieth century and the beginning of the twenty-first.

Kathleen L. Komar

## BIBLIOGRAPHY

### By the Author

#### LONG FICTION:

*Der geteilte Himmel: Erzählung*, 1963 (*Divided Heaven: A Novel of Germany Today*, 1965)

*Nachdenken über Christa T.*, 1968 (*The Quest for Christa T.*, 1970)

*Kindheitsmuster*, 1976 (*A Model Childhood*, 1980; also as *Patterns of Childhood*, 1984)

*Kein Ort: Nirgends*, 1979 (*No Place on Earth*, 1982)

*Kassandra: Erzählung*, 1983 (*Cassandra: A Novel and Four Essays*, 1984)

*Störfall: Nachrichten eines Tages*, 1987 (*Accident: A Day’s News*, 1989)

*Sommerstück*, 1989

*Was Bleibt: Erzählung*, 1990 (novella; *What Remains*, 1993)

*Medea: Stimmen*, 1996 (*Medea: A Modern Retelling*, 1998)

*Leibhaftig*, 2002 (*In the Flesh*, 2005)

#### SHORT FICTION:

*Moskauer Novelle*, 1961

*Unter den Linden: Drei unwahrscheinliche Geschichten*, 1974

*Gesammelte Erzählungen*, 1980 (*What Remains, and Other Stories*, 1993)

*Hierzulande andernorts: Erzählungen und andere Texte, 1994-1998*, 1999

*Mit anderem Blick*, 2005

#### SCREENPLAYS:

*Der geteilte Himmel*, 1964 (adaptation of her novel; with Gerhard Wolf)

*Fräulein Schmetterling*, 1966 (with Wolf)

*Till Eulenspiegel*, 1972 (with Wolf)

NONFICTION:

*Lesen und Schreiben: Aufsätze und Betrachtungen*, 1971  
(*The Reader and the Writer: Essays, Sketches, Memories*, 1977)

*Fortgesetzter Versuch: Aufsätze, Gespräche, Essays*, 1979

*Lesen und Schreiben: Neue Sammlung*, 1980

*Die Dimension des Autors: Essays und Aufsätze, Reden, und Gespräche, 1959-1985*, 1987 (partial translations as *The Fourth Dimension: Interviews with Christa Wolf*, 1988, and *The Author's Dimension: Selected Essays*, 1993)

*Ansprachen*, 1988

## DISCUSSION TOPICS

- What problems does Christa Wolf depict in the relationship of sensitive or creative individuals to their society?
- How does Wolf use earlier myths and historical time periods to investigate issues in her own society?
- In what ways do individuals, particularly women, in Wolf's work have difficulty in finding a stable self, or in coming to say "I"?
- What is Wolf's attitude toward utopias? What utopias are suggested in her writings?
- How does Wolf view the possibility of a socialist society after the fall of the Berlin Wall and the end of the German Democratic Republic?

## VIRGINIA WOOLF

**Born:** London, England

January 25, 1882

**Died:** The River Ouse, near Rodmell, Sussex, England

March 28, 1941

*Internationally acclaimed as a major novelist of the twentieth century, Woolf extensively advanced the conception and development of experimental forms in fiction.*

### BIOGRAPHY

Born into a family in which literary concerns and artistic pursuits were enthusiastically encouraged, Virginia Woolf was predisposed as a child for a writing career. She was born in London, England, on January 25, 1882. Her father, Sir Leslie Stephen, achieved academic fame as the editor of the *Dictionary of National Biography* between 1882 and his retirement in 1891. Her mother, Julia Duckworth, who died when Virginia was thirteen, came from a family with aristocratic connections and artistic sensibilities that sometimes inclined toward the frivolous. Woolf's parents brought to their union (March 26, 1878) children from previous marriages, besides producing four of their own, of whom Virginia was the third. Vanessa, the eldest, who was later to become an important artist, was extremely close to her younger sister; two boys, Thoby and Adrian, completed this tight-knit family group.

Virginia Woolf matured in an intellectual and artistic milieu stimulating to the spirit. Although she envied her brothers' going away to school and resented the exclusion of women from the then-male province of education to the end of her life, she received instruction hardly to be bettered, studying mathematics, literature, history, and foreign languages (both Latin and Greek) privately with her parents or with selected tutors. By age fif-

teen she enjoyed free access to her father's library and directed her own reading program with a voracious appetite, discussing many works she read with her father.

Her writing career began at the age of nine when she created almost single-handedly a weekly family newspaper, which she continued to produce for more than four years, publishing in this way her own earliest stories. At fifteen she began keeping a diary. Her first professional publication was an unsigned review in *The Guardian* in 1904. *The Voyage Out*, her first novel, begun in 1907 but not completed until 1913 because of illness, was published in 1915. After that, books flowed regularly from her pen in a constant stream, interrupted only by periods of poor health or mental instability. She wrote novels, stories, literary criticism, biographies, and occasional pieces for various periodicals. More than 3,800 of her letters have been preserved and printed, and the five published volumes of her diary (1915-1941) shed much light not only upon her private life and her circle of friends but also upon the troubled years in which she lived.

Virginia and Vanessa became friends with students whom Thoby met at Cambridge—Lyton Strachey, Saxon Sydney-Turner, Leonard Woolf, and Clive Bell; they remained lifelong friends, with the latter two eventually marrying Virginia and Vanessa, respectively. Shortly after their father's death, showing an independence rare in 1905, the children gave up the large family home to establish a more modest household of their own, where there was generally much talk of intellectual matters. Virginia's marriage to Leonard Woolf proved

salutary for her; he provided a firm base of emotional stability upon which she could rely and provided a free intellectual atmosphere that fostered the growth of her aesthetic ideas. Through their joint direction of the Hogarth Press, which they founded in 1917, they came into contact with men and women of letters who often became their close personal friends. Vanessa's career as an artist and her marriage to Clive Bell, who was soon to become an important art critic, brought the Woolfs into frequent friendly relations with such artists as Duncan Grant and Roger Fry. These companions, as well as the novelist E. M. Forster and the economist John Maynard Keynes, are often referred to as the Bloomsbury Group since most of them lived near each other in the Bloomsbury neighborhood of London.

Virginia Woolf was an interesting photographic subject; among the photographs of her that are often printed in biographies, there are three that reveal contrasting aspects of her character. The first, taken by Marianne Beck for *Vogue* in 1926, shows her seated at a table, her hands resting together, gazing pleasantly to the side. She is wearing a dress of her mother's, with puffed sleeves and lace cuffs. She radiates the tranquil loveliness of a young and innocent Victorian woman looking wistfully toward adulthood, but she was actually forty-four years old and had already survived the horrors of World War I and several serious mental breakdowns.

Another photograph, taken about a year later by Man Ray, reflects a quite different person. Seated again at a table, wearing a simple dark jacket with a scarf, her hair austere pulled back, she looks into the lens of the camera in an honest and friendly way, inviting sincere and open communication. One wishes to speak to her. Gisèle Freund's 1939 photograph reveals still another facet of her being. Seated before a modern painting, a book in one hand and a cigarette in the other, she gazes, troubled perhaps by thoughts of madness, death, and disaster, into a distant void beyond her. Physical and mental illnesses dogged her steps and another war seemed imminent, but in spite of internal and external threats, she directed her being toward the perfection of her art.

These three different images reveal the complexity that constitutes the totality of Woolf as woman and as artist: the joyful, sweet loveliness

masking anxiety and awful dread; the simple, candid honesty and sincerity with which she faced the world; and the distressed resignation with which she accepted the inevitable arrival of the destruction of all that mattered to her. Overwhelmed by the horrors of war and fearing the onset of yet another serious mental breakdown from which she might not recover, she took her own life on March 28, 1941, in Rodmell, Sussex, England.

## ANALYSIS

Anyone unfamiliar with the work of Woolf will doubtless be perplexed and confused by the apparent incoherence of her novels. She provides little background for the narrative situation, major characters are often difficult to distinguish from minor ones, and there is usually no important romantic interest. Instead of a story with a beginning, middle, and end consisting of events arranged in chronological order with occasional flashbacks and leading to a satisfying climax, Woolf presents instead an exploration of minds that perceive subtle variations among almost insignificant details (which themselves seem to flow at random), occasionally interrupted by essaylike commentaries. Her nine novels include *Jacob's Room* (1922), *Mrs. Dalloway* (1925), *To the Lighthouse* (1927), *The Waves* (1931), and *The Years* (1937). Many of her excellent essays are to be found in *The Common Reader: First Series* (1925), *The Common Reader: Second Series* (1932), and *The Death of the Moth, and Other Essays* (1942).

Though her aesthetic roots are firmly established in the European literary tradition, her genius lies in exploring the inner world of her characters, leading her to elaborate a psychological complexity without parallel in the literature of the past. She invents new methods that permit her to explore this inner world of her characters by allowing them to express their abstract thoughts and feelings in mental monologues that externalize the hidden and secret by means of metaphors, poetic images, and symbols. Thus her novels fall into the realm of psychological studies rather than the adventure stories written by authors she referred to as "materialist writers." She deals primarily with the spiritual side of humanity, not its activities and adventures, by presenting a synthesis of an individual's total response to life and reality, for these responses, colored by the emotions of the character, are never static. The inner world of her characters

is constantly shifting and changing, for them as well as for the reader, since their inner life approximates the reader's. Moreover, an individual is not the same from one moment to the next—his or her identity is unstable and changes as his or her perceptions change. Reality becomes a series of momentary fragments that ebb and flow; the reader must mentally arrange them into a story. A reader is not a passive spectator of events in Woolf's novels but must become actively involved emotionally in the character's thoughts, feelings, and senses.

Woolf's preoccupation with the representation of this reality made up of fleeting moments (the "incessant shower of innumerable atoms," as she put it) leads her to deal extensively with the passing of time and the changes that measure it, whether that duration is only one day or many years. Since the mind is capable of mingling past, present, and future simultaneously, a few seconds of present experience can include variable patterns of memories and fantasies. For example, a woman simply walking down the street may be thinking primarily about her destination, but thousands of other conflicting and divergent thoughts and sensations may flash through her mind in only a few seconds. This stream of thoughts, sometimes tranquil and sometimes troubled, constitutes the true subject matter of all Woolf's novels.

If thoughts tumble so helter-skelter through the mind, reflecting different atoms of reality moment by moment, then often they will be incomplete, interrupted by others before they can be finished. These fragments of thoughts and feelings are certainly related to one another—one thought or sensation has suggested or inspired another—but the connections are not particularly logical. Or rather, the logic is one of suggestion, or of association of ideas, perceptions, feelings, or emotions. Woolf enters into this process and reveals these fragmentary, interrupted thoughts while they are occurring by developing a kind of "mental speech" with which to express them. Her characters talk to themselves, explain to themselves, question themselves; this technique is generally called interior monologue or stream of consciousness. It requires some effort on the part of the reader to determine what kind of pattern makes a particular sequence logical, what sort of logic it possesses, and the direction of the flow of the stream.

If this complexity of consciousness were ren-

dered literally, Woolf's novels would be extremely difficult to read, but her style is simple and direct, clear and lucid, making few syntactic demands on the reader, who is guided through a story that demands absolute attention and concentration. The vocabulary is simple and words are generally used with their primary meanings. Sentences tend to be rather short and concise, never overwhelming in their volume. The sentence structure is masterly and clear, seldom demanding that the reader ponder the essential meaning. There is nothing flashy or tricky about her writing; the content is highlighted by her invisible style.

To understand and appreciate a novel by Woolf fully, one should be willing to read it several times, first determining the overall design, then later connecting details and linking images into patterns that gradually become clearer and acquire deeper meanings. A reader discovers the world expressed in a novel by Woolf in a way that is similar to comprehending a great symphonic work through repeated hearings: One is always attentive to slight variations in the melodies, changes in harmony and rhythm, contrasts of key and tempo, and instrumental coloring. Like a great composer, Woolf plots the design of her fictional compositions, orchestrating them with words that form complex patterns and images and creating intricate designs. Her works, accessible to the average reader, nonetheless demand attentiveness and patience. The rewards to be gathered enrich a spirit seeking truth.

## MRS. DALLOWAY

**First published:** 1925

**Type of work:** Novel

*A fashionable, middle-aged woman gives an elegant party for a number of social and professional acquaintances.*

*Mrs. Dalloway*, Virginia Woolf's fourth novel, is the first in which she attained the design she would characteristically impose upon her works of fiction. Rejecting an organization centered on conventional story lines, she focuses upon Clarissa Dalloway, a lady of London high society who is planning a party for her husband's acquaintances. The action takes place on a Wednesday in June, 1923, be-

tween 10:00 A.M. and approximately 3:00 A.M. the next day. In the morning, Clarissa goes out to buy flowers and gives final instructions to her staff. In the afternoon, she receives an unexpected visit from a former suitor named Peter Walsh, talks with her husband, who has brought her flowers, and then takes a nap. In the evening, she entertains her guests as a perfect hostess should. The activities and thoughts of Clarissa during the day provide the core of unity in the book. Other characters and their situations appear when they touch or reflect, ever so slightly or symbolically, Clarissa's life and its meaning. The reader observes the behavior of her husband Richard at lunch, watches her teenage daughter Elizabeth with her history tutor Miss Kilman (whom Mrs. Dalloway hates), and accompanies Clarissa on a bus ride through London. The reader catches glimpses of unknown strangers who cross Clarissa's path during the day, among whom figures Septimus Warren Smith, a shell-shocked war veteran who is suffering an episode of insanity.

Clarissa Dalloway represents a rational attitude toward life: She functions well on a day-to-day basis, tends to that which requires attention, and meets the demands made upon her in her situation. She regrets somewhat her marriage to Richard (Peter Walsh seemed to suggest a less predictable and more exciting life) and now realizes that she has lost the sense of individuality she possessed as a young woman, for her identity has been absorbed by her husband's. Clarissa is also distressed because Elizabeth seems to be too strongly influenced by Miss Kilman, an unattractive but educated woman who has recently converted to religion and seeks a recruit in Elizabeth. The book contains a scathing denunciation of those who, intolerant of diversity, seek to destroy the intellectual liberty of others. Though saddened by life, Clarissa seeks to maintain an inner core of joyfulness while fulfilling her various obligations. An unhappy person deep within, Clarissa is nonetheless filled with a great love for life, a zest for living, and a capacity for temporary but intense joy in her daily experiences.

Beginning work on *Mrs. Dalloway*, Woolf noted in her diary (October 14, 1922) that she wanted to show the world as seen by the sane and the insane side by side. If Clarissa reflects the sanity of adjust-

ments to reality, Septimus Smith reflects the rejection of rational compromise with life. Though he married a gentle Italian woman (Lucrezia, or Rezia) immediately after the war, their relationship has done little to rescue him from the abyss of terror that madness creates within him. At noon he consults Sir William Bradshaw, a noted medical authority who believes that mental illness is caused by a lack of a "sense of proportion" that can be restored by solitude, rest, and silence. The fate of Septimus now seems sealed: Diagnosed immedi-

ately as an advanced case of total breakdown, he is to be committed to an institution later that same day. Septimus, however, prefers death to life on someone else's terms and kills himself by jumping from a window. Learning during the party of this stranger's death, Clarissa withdraws to meditate alone. Feeling a kinship with the dead man, she acknowledges that she

herself lives close to death, often feeling the terror, an awful fear of being, and draws courage to continue from the simple presence of her husband. She is recalled from reverie by her social obligations and, putting aside these painful thoughts, returns to her guests.

The conviction that a happy life cannot be lived on another's terms is an important theme of the book. Clarissa lost an important part of herself by marrying Richard and allowing his life to control hers. Peter came to nothing through his failure to choose for himself, longing instead for domination by Clarissa. Mrs. Bradshaw gave her will over in submission to her husband, as did the majority of the doctor's patients who acquiesced to his judgments concerning "proper proportions" in life. Clarissa fears that her daughter will dedicate her will to God through religious conversion promoted by Miss Kilman, who has already abandoned her own will to a force outside herself that she imagines to be superior.

## TO THE LIGHTHOUSE

**First published:** 1927

**Type of work:** Novel

*A vacationing family cancels its projected excursion to a nearby lighthouse because of bad weather. Ten years later, some family members finally visit it together.*

Most critics regard *To the Lighthouse* as Woolf's finest achievement, and she herself shared this view. Woolf perfected her method in this book, developing a highly individual technique in which structure, form, content, and meaning are extremely complex as they are used to develop individual characters, their relationships to one another, to life itself, and to the most profound problems of human existence, love, art, and death. Her method consists in elaborating a multiple point of view presenting both past and present through her characters' eyes as well as through those of an omniscient writer. She thus reveals to the reader in manifold perspective the extraordinary range of emotional and mental processes that make up human experience for her characters.

The structure of the novel resembles that of a two-act play with an interlude between the acts. In the first and by far the longest part, "The Window," Mr. and Mrs. Ramsay (unmistakably based on her own parents) with their eight children are vacationing at their summer home on an island off the coast of Scotland; some friends are spending a weekend with them. Their six-year-old son James wants to visit the nearby lighthouse the next day; his mother agrees, but his father is certain that the weather will not be fine. The guests intermingle; the artist Lily Briscoe works on a painting. In the evening they all enjoy a meal of *boeuf en daube* and experience a sense of unity and happiness in the perfection of this moment that, like an artist, Mrs. Ramsay has created by controlling the elements that united to produce it. Most of these events are narrated through interior monologues with numerous flashbacks and shifting points of view.

In a second, very brief part, "Time Passes," the events of the next decade are poetically related by the omniscient writer or by the house itself. The

house has stood unused for many years and has deteriorated outside and inside; weeds proliferate, and ghostly airs inhabit the empty shell. The reader discovers the destinies of the house and its former residents. Mrs. Ramsay soon died; her oldest son Andrew was killed in the war; her daughter Prue expired during childbirth; a would-be poet became famous. After ten years, two cleaning ladies arrive to restore and prepare the place to receive guests once again. This section of the book constitutes a beautiful prose poem on the devastation time brings to human matters and must be ranked high among the finest pages Woolf ever wrote.

In the third part, "The Lighthouse," Mr. Ramsay returns with his two youngest children, James (age sixteen) and Cam (age fifteen), to make—after ten years and the intrusions of time, change, and death—the promised excursion to the lighthouse. They are joined by several others, including Lily Briscoe, who hopes to complete the painting begun years earlier. The hostility of the children to their father, obvious all along, is transformed into compassion when, upon reaching the lighthouse, Mr. Ramsay praises his son for steering the boat skillfully. The young people, alienated from their father since childhood because of his dominating and repressive ways, suddenly see him as a suffering human being, lost without his wife, seeking love and understanding in his awkward and insensitive way. Meanwhile, Lily Briscoe, back on shore, has discovered the stroke necessary to complete her painting perfectly. She says, laying down her brush in extreme fatigue, "I have had my vision." It is an ordered vision of successful artistic creation, which Woolf has also fulfilled in this book.

Interpretations of this novel are as numerous as its commentators. Some admire the representation of ideal Victorian family life just before its demise, while others criticize a male-dominated marriage. Mrs. Ramsay may be an all-embracing principle of universal love in her role as wife and mother. The lighthouse can represent masculine power and supremacy, or the conjunction of the lighthouse with the sea (a female symbol) may symbolize ideal marriage, a mutual cooperation between inseparable partners. Mrs. Ramsay had found the light it projects to be a source of serenity and strength. The child James saw it colored by secret joy, but the maturing James sees it merely as a

stark tower on a bare rock. Whatever meaning readers may find, the lighthouse stands as a permanent source of order and light, cutting through the darkness.

## THE WAVES

**First published:** 1931

**Type of work:** Novel

*Six lifelong friends (three men and three women) speak in soliloquies of their childhood, education, and adult experiences of life as they mature and age together.*

After the relaxation of a satiric romp through English literary history in the novel *Orlando: A Biography* (1928), Woolf began the composition of the most intricate and complex of all her fictional constructions, *The Waves*. It could be called an “abstract novel” for, like many modern paintings, it is virtually nonrepresentational. Its mirror does not reflect easily recognizable objects or provide familiar images. Dispensing with conventional story line and fully drawn characters, the novel distills human reality and experience. Its six characters are essences without form. The reader has no idea what they look like, how they dress or move or smile. All that is known are their consciousnesses as they contemplate their passage through various stages of life from youth to old age, experiencing various changes as they grow older.

The six characters, who are about the same age and are given no surnames, have grown up together and have continued to keep track of one another as their lives took them in very different directions. Jinny and Susan balance each other as opposites, for Jinny is an urban woman, proud of her body, sensual and passionate with men, while Susan is from the country, where she eventually returns to marry a farmer and rear a family. Neville and Louis also balance as opposites, for Neville is intellectual, homosexual, and assured in the academic world, while Louis, ashamed of his Australian origin, counteracts feelings of inferiority by forcing his way to success in the business world. Rhoda is always a misfit; feeling ugly and alone, she never belongs anywhere and alienation finally drives her to commit suicide. The others continue

to exhibit the basic personality traits they acquired as young children and never change internally in any significant way. The child of six remains intact in the adult of sixty. Only Bernard, who loves words and longs to be a writer, shows signs of spiritual growth near the end of the book, but this suggestion of change (he eventually abandons his notebook) seems open to question.

The novel is divided into nine unnumbered and untitled sections composed of fragmented interior monologues that cut back and forth between different speakers. The six rarely meet or engage in conversation. Instead, their isolated voices speak (“said” is the only verb of speech or thought used in the entire book) into an empty void to no imagined companion or listener in the universe. The language (vocabulary, syntax, sentence length) does not particularize any individual. They all speak with the same voice as if they were one person—as indeed they may be, for they can be understood as six facets of the same personality.

The nine sections of the book reveal the six as children in nursing school, secondary school, and college (the men) or entering social life (the women). They join together for dinner to send their friend Percival, whom they all admire and love, off to India. They later mourn his accidental death as they continue to pursue their separate lives. As each acknowledges the approach of age, they meet once again for dinner to reaffirm their sense of unity. Bernard summarizes the essence of their lives in a long, final speech, attempting to discover what it has all meant, but he sees only inscrutable shadows in a room flooded with light. Truth and meaning seem ultimately to be unknowable.

Each section of the narrative is introduced by an italicized passage tracing the movement of the sun across the sky from dawn to dark, the first describing the sunrise, the last the sunset. The course of the sun’s journey parallels the maturation of the six characters. Woolf draws attention to the passage of time with descriptions of the changing patterns of light on the surface of the sea as the waves break on the shore, as well as to the effects of light and shadow on the sand and grass, the behavior of the birds, and the appearance of flowers. In creating verbal landscapes not unlike those of the great Impressionist and Postimpressionist painters, Woolf achieves an extraordinarily high level of “word painting.” The language used for the images in-

volving light and water is more intense than that used in the soliloquies, more condensed, compact, and complex. This language of nature seems somehow alien to humankind, however—lofty and remote, inhuman and insensitive to pain, coldly indifferent to human fate.

## A ROOM OF ONE'S OWN

**First published:** 1929

**Type of work:** Essay

*The right to earn an adequate living and to enjoy personal privacy is considered essential to the development of the independence of women.*

Woolf's concern about the difficulties women face in a male-dominated world is expressed with force and vigor in her extended essay *A Room of One's Own*. Elaborating on her talks on "Women in Fiction," which she had given at two British women's colleges in 1928, she seeks to present certain facts about the treatment of women through the centuries and to show how patterns established long ago still prevail in modern times. Children, housework, and family obligations have deprived women of privacy and prevented them from earning a living, while social attitudes have approved their continued dependence on men for material necessities and their acceptance of roles as household servants. Though freedom and equality for women have increased considerably since 1929 in both England and America, the ideas Woolf promotes here, fundamental to modern feminist thinking, were radical—even shocking to some—at the time the book was written.

Retaining the tone and style of a casual lecturer, Woolf intends neither to preach nor to scold but to discuss some of her observations, exploring their implications at length. Her position can be stated quite briefly: In order to achieve an adequate sense of personal identity and the fulfillment of her intellectual potential with dignity and joy, a woman must command sufficient financial resources (money) to support herself and adequate privacy (a room with a lock on the door) to permit and promote mental activity. These two keys to spiritual freedom—material security and personal privacy—have been regularly denied to women

through the ages. In the first chapter of the essay, Woolf imagines the rude treatment a woman receives if she (in contrast to a man) dares to walk on the grass or use the library of a men's college. She contrasts a luncheon served to college men (five elaborate dishes, with elegant dessert and wine) with a dinner in the women's dining hall (simple fare with prunes and custard, water liberally replacing wine). These examples forcefully illustrate how women are regarded as inferior and how they are expected to welcome their lot without protest.

After a bold and humorous elaboration of the implications of this twofold statement, Woolf goes on in the following five chapters to examine the position of women historically and to focus attention upon several writers who struggled, without total success, against their oppressed condition. Though she surveys only authors, her observations relate also to those women seeking any sort of professional career, for the obstacles blocking advancement in one field also obstruct the way in others. To illustrate her point historically, Woolf invents Judith Shakespeare, younger sister to William, a

woman as brilliant and talented as her brother, and speculates about her destiny. The little fiction ends, after episodes of humiliation and failure brought upon Judith by male attitudes and responses, with the young woman's suicide.

Woolf finds the eighteenth century somewhat kinder to women like Jane Austen, willing to stay in her traditional place, writing

casually as a pastime. Nineteenth century writers like the Brontë sisters suffered from a lack of exposure to the world, writing within the confines of a limited perspective on life. Charlotte Brontë, frustrated and angered by restrictions, sometimes turned away from her artistic purpose to vent her bitterness. Woolf believes that artistic creativity cannot be attained when thought is deformed and twisted by anger and frustration; she invokes William Shakespeare as one who, entirely purged of resentments, achieved a state of mental brilliance she calls "incandescence." Artists must rise above

anger to create works unflawed by personal hostilities. Women, she believes, are learning to do this, but many decades will pass before bitterness is replaced by comprehension.

### SUMMARY

Respecting the literary tradition that she inherited, Virginia Woolf nevertheless felt compelled to forsake its influence by inventing fictional techniques to explore even more deeply the minds and hearts of people. Like many modern painters and musicians who were her contemporaries, she sought new ways to render the realities of thought and feeling in her novels. By holding up her mirror of fiction at a different angle, she attempted to help readers see themselves in a more revealing light. Readers, troubled by the reflected images, feel moved to contemplate the meaning of their lives.

### DISCUSSION TOPICS

- What contributions to Virginia Woolf's literary success were made by her husband?
- Woolf was not enthusiastic about James Joyce's works, but there are patterns of resemblance in her novel *Mrs. Dalloway* and Joyce's *Ulysses* (1922). How are the two authors' depictions of one day in the life of the protagonist similar and in what major ways do they differ?
- Does the children's reconciliation with their father in *To the Lighthouse* reflect the course of Woolf's relationship with her own father?
- What is the essence of Mrs. Ramsay's character?
- Does Woolf push her idea of the structure of a novel to its ultimate limit in *The Waves*?
- Did Woolf abandon the notion of plot or merely subordinate it to characterization?
- Why did *A Room of One's Own* have to wait until the 1960's to receive full recognition?

## WILLIAM WORDSWORTH

**Born:** Cockermouth, Cumberland, England  
April 7, 1770

**Died:** Rydal Mount, Westmorland, England  
April 23, 1850

*Wordsworth was a revolutionary poet celebrating nature in experimental verse forms. With his theory of lyrical ballads and his social/psychological themes of humble life, he was a founder of the Romantic literary tradition.*

### BIOGRAPHY

William Wordsworth was born at Cockermouth, in Cumberland, England, on April 7, 1770, the son of John and Ann Wordsworth. He had an elder brother, Richard, a younger sister, Dorothy, and two younger brothers, John and Christopher. His mother died when William was eight, and he and his brothers were separated from their sister to be reared by grandparents. William's father died when William was thirteen. William first began writing poetry soon after.

When he was seventeen, Wordsworth entered Cambridge and was graduated in 1791. While at the university, he went with a friend on a walking tour of France during the beginnings of its revolution. After leaving the university, he returned to France, where he found himself in the midst of bloody violence in 1792. He met and planned to marry Annette Vallon, but he was forced to return to England and could not marry her, although the relationship produced a daughter.

Uncertain of his future, distraught over events in France, and heartsick about his separation from Annette, he went on a walking tour of Wales in 1793 and then joyfully reunited with his sister, Dorothy, and made plans to settle with her until he could marry Annette. Meanwhile, he met the poet Samuel Taylor Coleridge in 1797 in Dorset. By now, Wordsworth believed that his destiny was to be-

come a poet, and he was encouraged by Dorothy and Coleridge. To finance a trip to Germany, Wordsworth and Coleridge wrote their famous collection of poems, *Lyrical Ballads*, in 1798. One of the poems, "Lines Composed a Few Miles Above Tintern Abbey," was composed after a walking trip that Wordsworth took with Dorothy to visit the ruins of a famous abbey on the Welsh border.

In 1798 and 1799, the two poets and Dorothy went to Germany, but Wordsworth and his sister returned shortly afterward to England, leaving Coleridge behind. Wordsworth wrote more poems, which would be included in the second edition of *Lyrical Ballads* in 1800, and he composed his prose essay on his theory of poetry as a preface for the collection. He also began to write long sections in blank verse of his autobiographical poem, to be called *The Prelude: Or, The Growth of a Poet's Mind* (1850), which he had probably begun in Germany. When Coleridge returned to England, he often visited William and Dorothy and soon moved to live near them in the Lake District of north England, where Wordsworth was born.

By this time, Wordsworth and Annette were no longer interested in marrying, and he married Mary Hutchinson in 1802. The famous "Ode: Intimations of Immortality from Recollections of Early Childhood" has its origins partly in Wordsworth's feelings immediately before he got married; the poem is also a reaction to Coleridge's "Dejection: An Ode," lamenting Coleridge's loss of imagination. Wordsworth, however, was increasing his own powers as a poet, and he began to compose many

great sonnets at this time, especially some in response to the Napoleonic wars in Europe. He was also working hard at his long autobiographical poem, completing the first version in 1805.

By then, he had suffered another painful loss in his family because his favorite brother, John, had died in a shipwreck at sea. His beloved daughter, Dora, was born in 1804, however, and he gave increasing attention to his growing family. His relationship with Coleridge began to weaken after Coleridge left to take a diplomatic post in Malta in 1804. One of Wordsworth's most important collections of poetry was published in 1807 as *Poems in Two Volumes*. It contains, among other great poems, the "Ode to Duty," the "Elegiac Stanzas Suggested by a Picture of Peele Castle," and "Ode: Intimations of Immortality from Recollections of Early Childhood."

Some believe that Wordsworth's poetry began to decline in quality from about this time, but he continued to write much. Some of this work was very important, such as his revisions and additions to the autobiographical poem, which he did not want to publish yet. Wordsworth believed that he had to complete the poem on his life as a preface for a grand philosophical poem to be called "The Recluse" (published in 1888 as *The Recluse*). This ambitious project was never completed, but one of its parts, *The Excursion*, was published in 1814. It is, like *The Prelude*, a long poem in blank verse, but it is organized in nine books around the dramatic monologues of several characters, including the main ones of a Peddler, a Poet, a Solitary, and a Pastor. While this poem is not, at present, highly praised, it was very much noticed by readers of the time, including John Keats, who thought that it was one of the greatest things ever written in modern poetry.

As Wordsworth's family grew, and as he helped to care for Coleridge's family and other friends, he needed more financial resources than his poetry sales could provide. He was appointed by the government to be a collector of taxes from postage rates, a position that caused some critics, such as young Percy Bysshe Shelley, to attack him as a traitor to libertarian causes. His poetry began to show some of his increasingly conservative themes, such as in the *Ecclesiastical Sketches* published in 1822 to describe the history of the Christian church in England. It was not as religious a poem as the subject

and title suggest, and Wordsworth did not entirely abandon his poetry that celebrated nature. His *The River Duddon* in 1820 expresses his mature reflections on childhood scenes of nature, and in many of the poems that he composed during tours of Europe, from 1820 to 1837, he occasionally recovers his enthusiasm for paganlike feelings of nature.

When his friend and neighbor, the poet Robert Southey, died in 1843, Wordsworth succeeded him and became the poet laureate of Great Britain. He had not published *The Prelude*, but he had made many changes and additions to it since starting it years before. In fact, he had produced at least three versions of that great poem. It was never published during his lifetime. He died on April 23, 1850, in Rydal Mount, England, leaving the manuscript of the poem as a part of his estate for his family. It was published in July, 1850, a posthumous memorial to Wordsworth's lifetime of achievements as one of the greatest of English poets.

## ANALYSIS

The styles of Wordsworth's poetry are many, although his most famous experiment in style was to compose "lyrical ballads" in simple language and simple meter to express the universal experience of common people in rural settings. These poems treat common incidents as if they are extraordinary; in other words, the lyrical quality of feeling gives importance to the traditional ballad tale. Sometimes these lyrical ballads are spoken by the poet, as in "Lines Written in Early Spring." At other times, they are spoken by characters of Wordsworth's imagination, as in "The Thorn." Although the emotions of these people are common and universal, the incidents of their experiences are unusual and abnormal or undesirable. Thus, the poems are often treatments of outcasts from society, as in "The Female Vagrant," or psychologically abnormal people, as in "The Idiot Boy."

The first edition of the *Lyrical Ballads* contains poems of family affection and warm cordiality, as in "We Are Seven" and "The Last of the Flock." It also contains humorous poems, including "Expostulation and Reply" and its companion, "The Tables Turned." These poems consistently develop a special theme of Wordsworth's enduring interest, that a special bonding occurs in the close relationship of a child reared close to nature. While the bond must be broken when the child has matured, it

should neither be prematurely broken nor denied or repressed by too much emphasis on reason and social formulas. The therapy of recalling childhood's passions in association with familiar landscapes is developed in "Lines Composed a Few Miles Above Tintern Abbey," which is included in the *Lyrical Ballads* of 1798. This poem should be recalled as an exception to the rule of those poems, since it is a blank-verse monologue, not a rhyming, narrative "lyrical ballad."

The same notice should be given to the inclusion of the blank-verse narrative of "Michael: A Pastoral Poem" in the second edition of *Lyrical Ballads*. This poem exemplifies a favorite stylistic approach that Wordsworth held throughout his life: to tell a story of rural people, sometimes shepherds, in strong, unrhymed iambic pentameter. It is the style of "Nutting," "The Brothers," and, later, many of the parts of *The Excursion*, the only section of *The Recluse* that Wordsworth finished to his satisfaction. The second edition of *Lyrical Ballads* also contains some poems that are truly lyrical ballads but differ from the tone and subjects of those in the first edition: These are the poems known as the "Lucy" poems, and a group that could be called the "Matthew" poems. The striking feature common to these two groups is a deepening interest in the experience of death, of grieving the deaths of loved ones who can never be replaced in one's affections.

A similar feature appears to mark many of Wordsworth's new poems included in his two volumes published in 1807. The great "Ode: Intimations of Immortality from Recollections of Early Childhood" is a major achievement of style in the treatment of a profoundly important theme, whether it is seen as one of growing old, maturity of vision, psychological development, or philosophical transition. Wordsworth made a permanently admirable use of the irregular ode, and he continued to have interest in the ode form, though without such success. He also sustained an interest in the sonnet, mainly in the English or Miltonic version; throughout his career, Wordsworth wrote sonnets and sometimes put them into sequences, as in *The River Duddon*. While his later poems fail to acquire the force of his earlier ones, Wordsworth's continuing style is to balance simplicity of natural themes with the discipline of sophisticated art.

## "LINES COMPOSED A FEW MILES ABOVE TINTERN ABBEY"

**First published:** 1798 (collected in *Lyrical Ballads*, 1798)

**Type of work:** Poem

*A speaker revisits a scene first observed five years earlier; differences arise from changes in the speaker's own mind more than from the landscape.*

"Lines Composed a Few Miles Above Tintern Abbey" is a shortened version of the poem's full title, "Lines Composed a Few Miles Above Tintern Abbey, on Revisiting the Banks of the Wye During a Tour, July 13, 1798." This full title more accurately locates the situation of the poem and anchors the experience of the poem in a particular place and time. In 160 lines of blank verse, the poet describes what he hears and sees again five years after he last visited this scene along the Wye River in Wales, near the ruins of an ancient abbey.

The poet first notices cliffs, trees, hedges, and farmhouses. Then, he imagines that someone might be camping amid the woods. What he cannot see becomes important, and he lets his imagination go. Then, he recalls how he has recently left a city, where he lived during some of the time since visiting the Wye River. He believes that his spirit was sustained by his memories of this natural scenery through a time of difficulty while in the city. The feelings attached to remembered scenes of nature became sources of imaginative power when detached from actual observation of those scenes.

The poet recalls his attention to the immediate scene before him again, and he compares his present feelings with those that he had when first visiting this spot. At that time, he was young and thoughtless, unaware of his differences from other animal life; now, however, he feels more burdened by the responsibilities of being human, of having a heart that sympathizes with the sufferings of other human beings. The feelings of youth have been revived by this revisit, and those feelings have energized his moral imagination to universal proportions.

Suddenly, the poet addresses his sister. She seems to be standing beside him, observing this same scene with him. This visit, however, is her first, and he imagines the future, when her memories of this scene will work for her as his do for him at this time. He utters a prayer that nature will supply his sister with the same restorative power of feeling in the future. In this way, each will be a “worshipper of Nature.”

## PREFACE TO *LYRICAL BALLADS*

**First published:** 1800 (published in *Lyrical Ballads, with Other Poems*, 1800)

**Type of work:** Essay

*Lyrical Ballads experimented in expressing common emotions through the simple language of “humble and rustic” people to please readers of popular ballads.*

The preface to *Lyrical Ballads* was written to explain the theory of poetry guiding Wordsworth’s composition of the poems. Wordsworth defends the unusual style and subjects of the poems (some of which are actually composed by Samuel Taylor Coleridge) as experiments to see how far popular poetry could be used to convey profound feeling.

There are three general reasons guiding the composition of the lyrical ballads. The first is in the choice of subject matter, which is limited to experiences of common life in the country. There, people use a simple language and directly express deep feeling. Their habit of speaking comes from associating feelings with the permanent forms of nature, such as mountains, rivers, and clouds. The challenge for the poet is to make these ordinary experiences interesting to readers; in other words, the poems attempt to take ordinary subjects and treat them in extraordinary ways. Doing so would cause readers to recognize fundamental truths of universal human experience.

The second reason guiding his poems is Wordsworth’s goal of emphasizing the purpose of poetry as art. This purpose is not a moralistic one; indeed, poetry comes from a “spontaneous overflow of powerful feelings,” but it is disciplined by remembering those feelings in moods of peaceful meditation. The combination of feeling and meditation produces artful poetry with purpose. Specifically, the lyrical ballads have the purposes of enlightening readers’ understanding of basic human feeling, enhancing readers’ emotions, and helping readers to enjoy the common things of life. That is important, Wordsworth believes, because too many people seem to have a difficult time enjoying life. They need to search for the unusual, the strange, and the fantastic; they are missing the beauty of the world around them. People need to have more faith in their own imagination to provide the beauty and emotion that they are overlooking in the environment.

Moreover, Wordsworth believes that the style of the poems is important to capture and keep readers’ attention, or the other two reasons will fail. Wordsworth thought tricks of personification and artistic diction had dulled people’s feelings, and so he wanted to refresh poetry by eliminating ornamentation to return to basics. The strengths of good prose should also be the strengths of good poetry, he writes, and so poetry should be written as the language of a person who speaks directly to other people with the same basic feelings and experiences of all human beings. To this, meter can be added in order to control emotional excitement, as reflection can restrain spontaneous emotion.

Readers are urged to be thoughtful in judging the poems. They should judge with genuine feelings that have been educated by thought and long habits of reading from many good pieces of literature. Wordsworth ends by expressing his faith that such readers will recognize the success of his experiments in the poems that he calls lyrical ballads: poems that express a domination of feeling (lyrical) over form (ballads).

## “ODE: INTIMATIONS OF IMMORTALITY”

**First published:** 1807 (collected in *Poems in Two Volumes*, 1807)

**Type of work:** Poem

*Something is missing from adulthood that once was present in childhood's vision of life and nature, but there are compensations of wisdom and moral sensitivity.*

“Ode: Intimations of Immortality from Recollections of Early Childhood” is a personal poem in a traditionally impersonal, formal verse form of eleven stanzas that vary in length and metrical design. Wordsworth uses the ancient Greek Pindaric ode, which had celebrated the virtues of athletic heroes, to examine the strangely compelling process of growing up from childhood to adult maturity. The hero is a child, but the victory is won by the adult who reflects upon childhood's losses.

The epigraph of the poem states the paradox that childhood experiences provide the background and source of the adult's identity, as if a child could be the parent of the adult who develops from childhood. The poet, recognizing that this is so, wishes therefore to be naturally faithful to his past, to build his maturity upon a continuous line of connections with his youth.

The first four stanzas express the poet's strange experience of feeling wonderful on a lovely spring morning in May, when all nature celebrates a rebirth of vegetable and animal life. The poet sees and hears the signs of this rebirth, and he can even feel a stirring of sympathetic identification with the vitality all around him. Yet he also feels a disturbing emotion that shadows the bright landscape. He feels that there is something missing in his own being, that the natural scene does not have the same glorious promise that it had when he looked at it as a child. The rest of the poem is an attempt to identify what is missing and to recover it if possible.

Stanzas 5 through 8 recall childhood as if it were like the dawn of a new day, when the sun peers upon the earth through glowing clouds. The meaning behind the comparison is that a child comes from darkness and awakens to life with a vision still colored by its origins in eternity. Like the

sun, a child moves from an exciting, hopeful dawn of life, rises toward the common light of midday's adulthood, and casts shadows that, like a prison, seem to surround a person and block the vision of glorious origins. Human life is also compared to a foster child who is under the care of Mother Nature until it is time for the child to leave home and be independent of the fostering environment. Real parents teach their children games of role-playing, which prepare them for adult responsibilities, but those same games (which later concern marrying, working, and dying) drive children further away from their infant experience of immortality and omnipotence. Finally, the process of growing up is compared to putting layer after layer of ice over a glowing, energetic fire.

The last section of the poem, stanzas 9 through 11, turns from the desolation that ends stanza 8, where the poet sinks beneath the frigid thought of a buried vitality. Suddenly, he realizes that there is something still burning beneath the ice of experience and mortality; he feels an ember of energy remaining from childhood's vitality. Ironically, the feeling of something missing from his joy at the opening of the poem has become a feeling of something present beneath his dejection in the middle of the poem. The question that he poses for himself is to wonder what this is that still lives deep inside him, what this is that refuses to die. There is the reason for the title of the poem: a hint of immortality remaining in the adult from his memory of childhood's experiences.

Stanza 9 recalls the things of childhood that cannot be the source of this feeling of immortality. It is not the animal delight or the irresponsibility of childhood; it is not the unreflecting optimism, either. Instead, it is something more alien to ordinary adult experience: The reason to celebrate what remains from childhood is that childhood was a time when the mind refused to accept natural limitations, when the human creature did not yet feel that it was only a natural being. Babies and children have enormous egos, not yet shaped by an environment that makes them retreat from questioning all sensation and asserting subjective idealism as more real than objective nature. Such a defiant subjectivity and faith in oneself is more real than the world into which the child is born. That buried feeling is what rescues the adult from the dejection of maturity into a posture of power over nature.

Maturity is a position from which the adult can look back and recover childhood faith, like a traveler who can look back from an inland mountain to see children playing by the sea and recall that as the place from where he also came.

Thus, the poet celebrates in the last two stanzas his recovery of imaginative power because he pays tribute to the ember of childhood idealism still glowing beneath his mortality. The loveliness of natural life is paradoxically more lovely now because the poet's experience of mortality has taught him the lesson of loss, and that makes nature more precious to the mind of a person who knows that spiritual immortality will survive the natural beauty that fosters human growth.

## THE PRELUDE

**First published:** 1850

**Type of work:** Poem

*The hero of a modern epic explores his memory of events, propelling him to undertake the great mission that nature has assigned to him.*

*The Prelude* is a long, blank-verse poem with a complicated history. It was begun as early as 1798–1799. Then it may have been conceived as a short autobiographical poem, before it was expanded to thirteen books by 1805. The poem was never published during Wordsworth's life, but when it was, soon after his death in 1850, *The Prelude: Or, The Growth of a Poet's Mind* had been revised extensively and expanded to fourteen books. There are significant differences among the three versions of the poem. For convenience, the poem published in 1850 may be assumed for discussion.

The subject of the poem is a review by the poet of his life to explain the growth of his mind as a poet; it examines his past for evidence to account for the growth of his imagination and to justify his calling as a poet. Because Samuel Taylor Coleridge strongly urged Wordsworth to believe in himself as a poet and to use his talent to compose a modern epic poem, Coleridge is given credit for causing Wordsworth to write *The Prelude*. What Coleridge wanted from Wordsworth was not a poem about his own life, however, but rather a poem about the modern state of philosophy and science, as in the

*Aeneid* (c. 29–19 B.C.E.; English translation, 1553), *La divina commedia* (c. 1320; *The Divine Comedy*, 1802), and *Paradise Lost* (1667, 1674). Wordsworth planned to write such an epic, but he could not make progress on it until after he wrote a poem in which he justified his decision to be a poet of any kind. This self-justification would be a prefatory explanation, appearing as the “prelude” for the main movement that would be called *The Recluse*.

The prefatory poem, however, became so important that it became the main poem itself, and Wordsworth worked at it for most of his long life. *The Prelude* is more important, and nearer to completion, than *The Recluse* (1888), for which it was intended as an introduction. There are many epic features, nevertheless, in the style and structure of *The Prelude* itself. Epic similes appear in various places, allusions to epic stories recur, and the structure of the poem is loosely modeled upon the classical epic design that begins in medias res (in the middle of things).

The first book of *The Prelude* opens with a celebration of freedom, as the poet decides to visit his childhood and leave behind a city and a life of frustration and uncertainty. He composes aloud some verses of happiness as he strides confidently into the countryside, but suddenly he is unable to compose and begins to doubt his ability to continue.

He believes that he is intended by nature to be a poet, but he is beginning to doubt himself and his judgment because he is experiencing “writer’s block.”

In this state of mind, he begins to review his life to see if he has correctly interpreted his vocation. The poem is a search of the poet’s past for evidence that the man is intended by nature to be a poet at all. The remainder

of the first book is a short summary of the poet’s earliest years of boyhood, when he grew up in the Lake District of northern England. In four seasonal episodes, Wordsworth’s poem recalls experiences of seedlike origins for his growth of imagination.

The first is an autumn scene of taking woodcocks from other people's traps and then feeling that the hills pursued him to punish him. The second is a springtime experience of robbing birds' nests and then feeling that the wind accused him of being a violator. The third episode is a summer one of borrowing a boat without permission, rowing out onto a lake alone, and then feeling that the mountains rose in condemnation. The final scene is one of winter ice-skating at night on frozen lakes; he had stayed out later than he ought, and in a guilty state of mind he would skate alone, feeling nature alive with motion.

Such memories are exercises that raise the poet's imaginative energies to feel regeneration and renewed confidence in himself. Book 2 contains memories of his mother's death and his way of dealing with the threat of alienation it caused in his life; he substituted nature for his lost mother, and he nourished his imagination with lonely wanderings through the hills and among the lakes. That continued until he was old enough to be sent to the university in Cambridge, far from home and as threatening as had been the death of his mother.

Book 3 describes how Cambridge was a vast confusion at first, with its swirl of events and temptations. Gradually, it also nourished Wordsworth's active imagination, both with learning and with urban scenery. Book 4 describes the joyful summer vacations when he revisited youthful scenes and revived his depressed spirits. He renewed social contacts and danced until dawn, when nature summoned him home with morning glory of bright sunrise. The next two books describe how the young undergraduate left England for a walking tour of France and the Alps, where he realized again that his imagination is more important than the natural scenery that nourishes it. Book 7 is a return to England, where the poet finished his education at Cambridge and moved to London.

The books on Wordsworth's residence in France describe his introduction to the French patriot Michel Beaupuy in book 9 and the influence that Beaupuy had on the poet's increasing sympathy for the revolutionaries. Book 10, however, narrates the intensifying pressure on Wordsworth to leave

France for safety back in London, where the poet despaired at prospects for a peaceful recovery of freedom in France. Book 11 analyzes the spiritual depression that Wordsworth experienced over his loss of faith that the French Revolution could be conducted in a civilized way, combined with his disgust that Britain should have united to oppose Frenchmen fighting for freedom.

By the end of book 12, Wordsworth is back where the poem began, when he decided to leave London and return to his home in the Lake District. There, he revisited scenes of his childhood and youth, recovered his emotional energies, and realized that his imagination needed to be revived by recovering forgotten experiences. These are the "spots of time" that Wordsworth uses to illustrate his recovery of imaginative power. Book 12 ends with descriptions of two of these spots of time.

The final books are celebrations of restored imagination. Book 13 praises the gifts of nature and childhood for emotion and calm. Book 14 is dominated by a long description of the poet's ascent of Mount Snowdon. On that occasion, the poet realized that his imagination is like the moonlight penetrating the mist that surrounded the mountaintop. The last book then ends with expressions of gratitude to Wordsworth's sister, Dorothy, and to Coleridge's friendship. They have inspired the poem by supporting the poet's faith in himself.

## **SUMMARY**

From ballad experiments to innovations of epic, William Wordsworth maintained a total commitment to poetry. He turned his personal experience into public statement, and he modified public genres of writing with personal testimony. He departed from classic ideals of regularity and abstract diction, and he established the Romantic taste for the irregular experience rendered in concrete language.

Life in the solitude of the Lake District provided him with subjects of rustic living, but his education in sophisticated cities added richness of self-reflection and self-discipline. His writing drew from all dimensions of his experience.

*Richard D. McGhee*

## BIBLIOGRAPHY

### By the Author

#### POETRY:

- An Evening Walk*, 1793

## DISCUSSION TOPICS

- Explain the effects of William Wordsworth's blend of first-person singular and first-person plural pronouns in "Lines Composed a Few Miles Above Tintern Abbey."
- What poetry, or what type of poetry, was Wordsworth rejecting in his preface to *Lyrical Ballads*?
- Is Wordsworth's phrase "intimations of immortality" part of a philosophical statement about childhood?
- What are the structural features of the Pindaric ode as exemplified by "Ode: Intimations of Immortality"?
- Did Wordsworth's difficulties with *The Prelude* reflect the differences between his conception of poetry and that of Samuel Taylor Coleridge, who advised him in this effort?
- *The Prelude* has been called a great religious poem. In what sense is it religious? Would "spiritual" be a better adjective to describe it?

## WILLIAM BUTLER YEATS

**Born:** Sandymount, near Dublin, Ireland  
June 13, 1865

**Died:** Roquebrune-Cap-Martin, France  
January 28, 1939

*Yeats is widely regarded as the most important and influential poet writing in English during the twentieth century.*

### BIOGRAPHY

William Butler Pollexfen Yeats (yayts) was born on June 13, 1865, in Sandymount, a middle-class suburb of Dublin, Ireland, the son of the painter and philosopher John Butler Yeats and Susan Pollexfan Yeats. Both parents were members of the Anglo-Irish minority, an important detail of Yeats's later life. The Yeats family settled in Ireland during the seventeenth century. Yeats's mother and her family were from County Sligo, in the western part of Ireland. Yeats's parents had four surviving children, of whom William was the eldest. John Butler Yeats studied law but decided to pursue his natural talent for drawing and painting. This decision led to a great deal of financial hardship for the family.

Because of difficult family circumstances, young William spent extended periods with his mother's family in Sligo. These stays away from the family home, which was by this time in London, were a formative influence. While in Ireland, Yeats derived his interest in Irish folklore, the phenomenon of racial memory, and the love of nature, all of which are to be found in his poetry.

Although Yeats was for the most part unhappy in London, the city had an influence upon him. Through his father, he became acquainted with many of the leading cultural figures of the day, including William Morris and Oscar Wilde. Yeats's

dual allegiance to Ireland and London became one of the many sources of the creative tension that animates his mature poetry. It was in Ireland, however, that Yeats made his initial mark as a writer. The family returned to Dublin in 1880, where the poet's lackluster efforts at school continued. After an abortive attempt to study art, and unable to meet university entrance requirements, Yeats abandoned formal education in 1886 to devote himself to writing.

Two of Yeats's early interests manifested themselves in his work. One was his attachment to the cause of Irish nationality, which enabled him to establish a distinctive cultural identity. The other was the development of his interest in Theosophy and spiritualism, which contributed to the growth of the poet's spiritual self. Both these orientations were idealist and symbolic in character, and they form the aesthetic and metaphysical foundation for Yeats's poetry. Yeats's early verse adapts his cultural and spiritual interests to the main poetic current of the time. This current owed much to French poetry, which relied on mood and color rather than on narrative and event. In 1891, Yeats formed the Rhymers Club with some English practitioners of this style.

In 1893, Yeats produced a volume of Irish folklore called *The Celtic Twilight*. His interest in the Celtic past, combined with his fresh perception of the possibilities of lyric poetry, led to his use of pre-Christian Celtic material as distinctive poetic subject matter. Indeed, Yeats's work at this time led to the formation of a school of Irish literature known as the Celtic Twilight. This movement, with its emphasis on Irish history and identity, contributed

greatly to the growth of Irish literature in subsequent years.

A number of other events took place early in Yeats's career that had lasting effects on his life. One was his meeting Maud Gonne in 1889. He fell in love with Gonne, who steadfastly refused his proposals of marriage. Nonetheless, Yeats drew on Gonne and her beauty and physical energy as subject matter for his poetry. In 1896, Yeats first met Lady Augusta Gregory. She provided his art with financial and moral support and introduced him to the Anglo-Irish aristocratic life. This way of life was to be a major source of Yeats's vision of cultural unity.

Through Lady Gregory, Yeats became committed to the establishment of an Irish national theater, a commitment that culminated in the founding of the Abbey Theatre in Dublin in 1904. As a result of his involvement with the theater, Yeats not only developed into a powerful playwright but also enhanced the strong dramatic undertones of his verse. The success of the Abbey and the growing maturity of his own poetry gave Yeats an increasingly prominent profile in the English-speaking world. To some extent, however, events in Ireland made him a marginal figure in his own country. The rebellion of Easter, 1916, which Yeats memorably commemorated in a poem, inspired a more populist conception of Irish destiny than Yeats's art envisaged. The Irish war of independence (1919 to 1921), and the civil war that almost immediately followed it, also gave rise to some of Yeats's greatest verse. At the same time, however, the poet withdrew from public life, establishing residence in Thoor Ballylee, a tower dating from Norman times, in the west of Ireland.

In 1917, Yeats married Georgie Hyde-Lees, and the couple soon became parents. In 1923, he won the Nobel Prize in Literature, thereby securing his international reputation. Other honors followed, notably a doctorate in letters from the University of Oxford in 1931. In 1922, he was nominated to the senate of the Irish Free State, a symbolic political honor, though his record as a senator is one of valuable activity and outspokenness.

In his later years, Yeats's thoughts evolved from a concern with Irish matters to concern with cosmic themes. These themes address the possibility of unity, which had long been one of the poet's ideals. Yet historical developments not merely in Ireland

but also in the West generally seemed determined to frustrate this ideal. Pursuit of his vision of unity led the poet to envision in a mythological light the significant attainments of his generation and to support some of the international political strongmen of the 1930's. He developed a theory of apocalyptic history that posited a long period of unity followed by a long period of fragmentation, a cycle of winding and unwinding that continued infinitely.

Poor health necessitated long periods away from Ireland after the conclusion of his senate term in 1928. He continued to produce poetry of great vitality and deep thought until his death in Roquebrune-Cap-Martin, in the south of France, on January 28, 1939. Because of World War II, Yeats's remains were not removed to Ireland until 1948, when he was buried in Drumcliff, in County Sligo.

## ANALYSIS

The major preoccupation of Yeats's imagination was expressed in a statement he made at the beginning of his career: "Hammer your thoughts into unity." These words suggest the various ways in which Yeats perceived the raw materials of his poetry; they also point to the sense of totality that he wished to derive from those materials. Yeats's raw materials include personal history, family history, cultural history, ancient and modern Irish history, friendship, mysticism, and personal and academic philosophy. There is no denying the complexity of some of Yeats's poetry. Some of his poems challenge readers to become better acquainted with Irish history and culture. To a large extent, however, the difficulty of Yeats's poetry resembles the poetry of William Blake, whose work requires readers to hold paradoxical notions of the universe in their minds at the same time. Throughout his work, Yeats struggled with the tensions between the concrete and the abstract, between Irish identity and human commonalities, between things falling apart and things coming together.

The range of Yeats's poetic resources is also comprehensive; his work covers the gamut of possibilities provided by lyric poetry. Beginning with ballads and songs that are almost naïve in their expression of simplicity, Yeats's poetry quickly evolves into nuanced, layered works. The allusive symbolism of his collection, *The Wind Among the Reeds* (1899), for example, has by the time of *The Green*

*Helmet, and Other Poems* (1910) given way to a more explicit, personal tone, drawing on more obviously autobiographical material. This tone, in turn, becomes more assertive and public in the first collection of major importance, *Responsibilities* (1914). The increasingly distinctive character of Yeats's verse also can be seen in his poetry's progressively more flexible use of verse structure, rhyme, and, particularly, rhythm.

In addition, Yeats's development is also noteworthy for its reinvigorating effect on certain poetic forms. These forms, particularly the elegy and the dramatic lyric, had received extensive attention from both Romantic and Victorian poets. The elegy was a form renewed particularly by Percy Bysshe Shelley, who was an important influence on the youthful Yeats, as was Blake, whose reformulation of lyric in terms of spirit and dream made a deep impression on Yeats's early efforts to establish a poetic identity. Yeats's dramatic lyrics intensify that particular form's possibilities in a manner not envisaged by its chief exponent, Robert Browning. Again from a formal standpoint, Yeats's attempts to reproduce in somewhat condensed form the epic ambitions of Alfred, Lord Tennyson, and William Morris reveal his often overlooked interest in form. His use of Irish materials in the elegy and the dramatic lyric is an important example of continuity and change in literary history.

Although Yeats significantly renewed some of the forms of nineteenth century English verse, it would be misleading to consider him an experimental poet. His traditional qualities can be illustrated through a comparison of his work with that of his two most important modernist contemporaries, T. S. Eliot and Ezra Pound. Yeats's use of form expresses a sense of radical continuity. This concept reveals the poet's understanding of tradition, an understanding that is a major source of duality in Yeats's thinking. In poetry, however, duality can be hammered into unity by reconciling content to form. In addition, emphasizing the formal aspect of his work draws attention not only to the forms themselves but also to the restlessness that their re-

newal contains. It is this restlessness, this excitation of psychic energy, that is the driving force of Yeats's verse.

This sense of restlessness, of ardor, intensity, longing, and continuity comes to the poet from an awareness of loss. Many of Yeats's most significant experiences are associated with loss. He grew up in a period when loss of faith in organized religion was widespread. The political and economic rule of the landowning class with which Yeats identified was dismantled in the course of his lifetime. As his career evolved, he lost his original audience and adopted a critical posture toward the Ireland that his verse had, in part, inspired. His experience of love is also rendered in verse as one of loss. Moreover, many of his most important poems are elegies. Yet while duly admitting the pain of loss and frequently expressing its effects in terms of violence and apocalypse, Yeats attempts to compensate for its impact. It is from this commitment that his imaginative rage for unity derives.

Yeats usually presents his readers with a creative tension between dual elements. These elements occur in various guises. Vagaries of personality find compensation in the stability of masks. The destructive work of time is offset by the constructive work of art. The force of an individual personality can overcome the energies of the general public. The peasant can be reconciled to the aristocrat. The sting of defeat is healed by contemplating the commitment of the hero. Out of such conflicts, Yeats produces what is essentially a poetry of possibility. This poetry expresses both a desire for unity and peace together with an acknowledgment of the remoteness of those goals. Such a realization is sounded in the note of "tragic joy" for which Yeats's verse is celebrated. Aware of the fragmentary nature of modern experience, conscious of the mortal nature of the human condition, suspicious of his age's increasingly democratic trends, Yeats's poetry attempts to stare down such facts of life, achieving greatness through commitment rather than by argument.

## “ADAM’S CURSE”

**First published:** 1902 (collected in *The Collected Poems of W. B. Yeats*, 1996)

**Type of work:** Poem

*This poem is an important early example of Yeats’s use of autobiographical materials for poetic ends.*

“Adam’s Curse” was first published in the *Monthly Review* of December, 1902, and first collected in *In the Seven Woods* (1903). The poem is an important example of Yeats’s mature style in the making. The subject matter of Yeats’s early poetry tended to deal with abstractions, such as love, truth, and beauty. Missing from these early poems is a sense of the poet dealing with actual experiences of the actual world. Even the early verse’s conception of Ireland is extremely romantic.

While in “Adam’s Curse” Yeats continues to acknowledge the power of romance, his attitude toward that power is now considerably changed. First, the poem draws on Yeats’s own direct experience. The three people mentioned in the poem are real. The basis for the poem is a conversation that Yeats had with “that beautiful mild woman” and is addressed to a third person who was also present at the time. This third person, the “you” of the poem, is Maud Gonne; the “mild woman” is her sister, Mrs. Kathleen Pilcher. While “Adam’s Curse” draws on elements of Yeats’s life, the poet had not lost interest in the Irish mythological figures that featured so prominently in his early work; Yeats never abandoned this interest. At the same time, however, the presence of intimate acquaintances in a private setting and the reconstruction of their after-dinner conversation represents a breakthrough in candor and immediacy for Yeats.

Second, “Adam’s Curse” is significant because of the manner in which the poet uses his new materials. His altered attitude to romance is expressed in his critical treatment of the subject. This criticism forms the closing lines of the poem. Yet these lines do not have a dramatic or climactic effect. On the contrary, they reveal the poet’s weariness of romantic love, leaving the reader with a sense of his isolation and lack of fulfillment. This strong suggestion of personal loss comes from the realization

that love will not conquer all. Love, too, is subject to change, and so are lovers. This thought brings the poet depressingly down to earth.

In addition, Yeats’s technique is more sophisticated in “Adam’s Curse” than it is in many of his earlier poems. The decision to open the poem with what appear to be direct quotes from the remembered conversation greatly adds to the reader’s sense of the immediacy, directness, spontaneity, and candor of actual experience. The informal character of conversation is conveyed by letting the lines run into each other. The first part of the poem reads as though it is written in sentences rather than in poetic lines. The poet draws attention to this effect by the poem’s form, which consists of one long stanza and two shorter ones. Because of this arrangement, the poem can be described as having, in effect, two parts, even though Yeats does not number or identify those parts.

There is a deliberate sense of disproportion between the parts, which is intended to suggest the problem of duality, which is the poem’s theme. Seeing the poem in two parts also draws attention to how Yeats has separated speech from silence, exposition from reflection, and the conversational interlude from the larger emotional context. This strategy of separation underlines the variety of ways in which “Adam’s Curse” concentrates on the dual character of human experience. The overall effect of the verbal and technical accomplishments of “Adam’s Curse” is to make the poet’s concerns more accessible. The poem’s theme is still basically abstract, but its abstract nature is brought closer to the reader.

The theme, broadly speaking, addresses the discrepancy between appearance and reality. The poet, says Yeats in the first conversational extract, can slave to perfect a line of poetry yet be considered an idler by the world at large. Similarly, says Mrs. Pilcher, to appear beautiful is the result of hard work. These facts of life are, to the poet, a version of Adam’s curse, a reference to the fact that Adam was not only expelled from the ideal existence of paradise but also condemned to earn his bread by the sweat of his brow. Even love requires deliberate effort. Yet that thought reminds the poet that, try as he might, he has failed to perfect his love for Maud Gonne. The reality of life lies in commitment rather than in achievement, though such a realization dampens the spirit of idealism.

## “EASTER 1916”

**First published:** 1920 (collected in *The Collected Poems of W. B. Yeats*, 1996)

**Type of work:** Poem

*A commemoration in verse of the Easter, 1916, Irish rebellion against English rule.*

Although written within a few months of the event that it commemorates, and privately printed later in the year of its composition, “Easter 1916” did not receive general publication until 1920. It was first collected in the volume *Michael Robartes and the Dancer* (1920). It is Yeats’s best-known poem. Its title refers to the Irish rebellion of Easter, 1916, when a small group of rebels in Dublin unexpectedly proclaimed the establishment of an Irish Republic. The rebellion was in defiance of the British rule under which Ireland was then governed.

The refrain of “Easter 1916” has frequently been thought to refer to the new political arrangements initiated by the rebels. Yet such a reading is not necessarily what Yeats had in mind, as awareness of the poem’s publication history will confirm. “Easter 1916” is not a political poem in the sense that it takes one side or the other in the rebellion. Nevertheless, the poem’s renown is, to some extent, the result of a narrow, one-sided interpretation of the line “A terrible beauty is born.” It is important to note, however, that Yeats carefully refrains from providing a facile understanding of the momentous event in Irish history that has taken place. On the contrary, the poem is notable for the questioning manner in which it expresses awe and bewilderment at the rebels. The difficulty in reaching an immediate understanding of what “A terrible beauty is born” means crystallizes the poet’s own stunned reaction to the rebellion. Therefore, the most striking feature of “Easter 1916” is its honesty.

The basis for the poet’s reaction is contained in the poem’s opening stanza. The reader is informed that, although the poet and his cronies were aware that republican militants existed, nobody took them seriously. They were unassuming, had little social status, and provided occasions of trivial conversation. In addition, the anonymous “them,” which the poet later names, were considered laughingstocks by their social superiors. The poet

includes himself among those superiors, members of the “club.” Yet social superiority in itself is said to count for nothing, since both the ridiculers and the ridiculed live in a land fit for clowns (“motley” being a reference to the traditional dress of the jester). The suggestion is that the rebel’s subsequent heroism and self-sacrifice were unimaginable.

The second stanza presents some of the rebels in a different light. All but the first of those mentioned were executed for their part in the rebellion. Two of those mentioned were well known to the poet. “That woman” is Constance Markievicz, born Constance Gore-Booth, an Anglo-Irish aristocrat whose involvement with the rebels Yeats views as a fall from grace. The other person with whom Yeats was acquainted is Major John MacBride, “A drunken, vainglorious lout” and the estranged husband of Maud Gonne. Yet even MacBride can no longer be considered simply a clown. Mention of these two personal associations, neither of them particularly attractive, provides a frame within which Yeats portrays two of the rebel leaders. “This man” is Patrick Pearse, a poet and teacher who led the rebellion. “This other” is Thomas MacDonough, poet and academic. Although Yeats was not very well acquainted with either of them, he presents them in a favorable light, which adjusts the force of “motley” in the opening stanza.

The first two stanzas’ emphasis on personality and society is replaced in the third stanza. There, a more fundamental conception of life, the natural order, is considered. According to this conception, life may be compared to a stream: Living things continually change as they grow and mature. The rebels differ from this order in the way that a stone is the opposite of a stream. Not only is a stone the stream’s opposite; it also deflects or “troubles” the stream’s free and direct flow. Similarly, there seems to be something unnatural about those who do not participate spontaneously and naturally in life. Yet by the opening of the fourth

stanza, this view of the rebels is itself challenged, just as the original view of them as clowns was both acknowledged and corrected in the opening two stanzas.

It is impossible, the poem argues, to know how much must be given in the name of a cause. One's human nature, "the heart," may turn to stone, but only a higher power, "Heaven's part," can determine how great a sacrifice is necessary in order to redeem a given situation, in this case the Irish nation. Meanwhile, all that can be done is to ensure that the magnitude of the sacrifice is recognized for what it is. Yeats conveys this sentiment through an appeal to language. Poetic fancy, such as the metaphor of mother and child, is inadequate to register what has taken place, as the stark, "No, no, not night but death" makes clear. Even the fact that "England may keep faith" does not diminish the rebels' impact.

England is mentioned because a version of Irish independence had been passed into law in 1914. Its application was suspended, however, until the end of World War I. According to Yeats, however, one must bear in mind that not only did the rebels take action, but their activism also cost them their lives. This inescapable and shocking fact is the poem's inspiration and the birth of what it calls "a terrible beauty." The rebels' sacrifice is that terrible beauty, an act as awe-inspiring and overwhelming as the greatest art.

## "THE SECOND COMING"

**First published:** 1920 (collected in *The Collected Poems of W. B. Yeats*, 1996)

**Type of work:** Poem

*This work is Yeats's fullest artistic statement of his apocalyptic theory of history.*

The continual broadening of Yeats's scope as a poet and thinker is demonstrated by "The Second Coming." This poem was first published in what was one of the most important literary magazines of the day, *The Dial*, in November, 1920, and first appeared in book form the same year in *Michael Robartes and the Dancer*.

Some technical knowledge is required in order

to understand the opening line of the poem. The "widening gyre" (pronounced with a hard "g") describes not only the circular, ever-widening course of the falcon's flight. It also refers to an important aspect of Yeats's theory of history. Influenced by Giambattista Vico and Friedrich Nietzsche's philosophies of eternal recurrence, Yeats sees history as a cycle of declines and regenerations. Each historical era is replaced by its opposite. Gyres describe the interacting and conflicting eras.

In "The Second Coming," the end of the Christian era is thought to be at hand. The poem's title is intended, first, to bring to mind the Second Coming of Christ. Yet this association, with its promises of salvation, gives way to the monstrous image of the "rough beast," suggesting barbarism. In the New Testament, the Second Coming rescues the faithful from the dreadful conditions that accompany the end of the world. In the poem, the second coming means being condemned to those dreadful conditions. The fact that the "rough beast" is to be born in Bethlehem underlines the enormous changes that the poet believes to be on the way.

Yeats was not the only early twentieth century poet who believed that the historical events of his day suggested profound and disturbing change. The impact of World War I was still being felt in every aspect of public and cultural life at the time "The Second Coming" was written. In addition, conditions in Ireland were deteriorating at a rapid rate. Old political and social forces in the country were giving way to the will of the people. In addition, the victory of the Bolsheviks in Russia came as a shocking reminder of the vulnerability of certain social classes in the rest of Europe. Although none of these conditions is mentioned by name in "The Second Coming," the poem's themes of violence and disruption are reinforced by its historical context.

The opening two lines of the poem provide an image of cultural breakdown. The falcon represents those forces that function productively only when disciplined. By as early as the fourth line of the poem, the consequences of this breakdown are being described in violent terms. The word "mere" in this line is not used in its familiar sense and should be understood in its original meaning of "nothing but." Everything that makes life valuable is being drenched in blood. "The ceremony of innocence" refers not to one particular ceremony

but is intended to suggest the grace and order of civilized society. Moreover, there is nobody to fight “the blood-dimmed tide.”

Such conditions can only mean that the end of the world is imminent. In keeping with the violent imagery of the first stanza, a nightmarish embodiment of what is occurring reveals itself to the poet. The image comes from “Spiritus Mundi.” This phrase refers to a belief that individual minds are connected to a collective mind, and that the images that occur in one’s imagination are reflections of that greater consciousness. One effect of this reference is to show that the poet himself is vulnerable. The admission of this vulnerability gives “The Second Coming” an urgent, dramatic force, which is most clearly felt in the last line. By concluding with a question, Yeats not only crystallizes the sense of doubt and dread that fills “The Second Coming.” He also draws attention to the dangerous and unresolved contemporary historical conditions. Yeats makes a powerful case for the relevance of poetry as a means of addressing pressing public issues and of preserving historical awareness.

### “SAILING TO BYZANTIUM”

**First published:** 1928 (collected in *The Collected Poems of W. B. Yeats*, 1996)

**Type of work:** Poem

*Yeats opposes youth and age, body and spirit, and art and artifice in this important poem.*

“Sailing to Byzantium” was first published in Yeats’s 1928 collection, *The Tower*. Critics generally acknowledge that Yeats produced some of his best work after he received the Nobel Prize in Literature in 1923; certainly, “Sailing to Byzantium” demonstrates the power of that later work.

The poem is comprised of four stanzas of eight lines each. Both rhyme and meter are regular, following an *abababcc* rhyme scheme and an iambic pentameter metric pattern throughout. In the first stanza, Yeats speaks of a place that is “no country for old men.” In this country, the young, along with “fish, flesh, or fowl” engage in the procreative, generative energy of summer. Caught up in “sensual music,” the inhabitants of this country do not con-

sider intellectual or spiritual concerns. Rather, they are caught up in life itself, not considering that which is eternal. Yeats reminds readers, however, that whatever is “begotten” and “born” ultimately dies. This is the country of fleshly incarnation, the country of life, but also a place where the joy of life opposes the certainty of death. A country such as this is no place for an old man moving inexorably toward death.

Yeats continues his exploration of old age in the second stanza, presenting an image of an old man as a scarecrow, “a tattered coat upon a stick.” This empty vessel is no more than a “paltry thing” without the singing of his soul. Through the soul’s singing, Yeats believes, he can create art, something that will survive physical death. He says, therefore, that he has sailed to Byzantium, a place where he will be able to learn the art of singing. Byzantium, now known as Istanbul, serves an important symbolic function in this poem and in some of Yeats’s other works.

In the third stanza, Yeats requests the “sages” of Byzantium to come and teach his soul to sing. He uses the phrase, “perne in a gyre” to describe the way the sages will come from the “holy fire.” Yeats uses the word “perne,” literally a spool, as a verb here; gyre means a circular course. The sages thus spin in a spiral of holy fire, a fire that will burn away the poet’s heart, allowing Yeats to enter the “artifice of eternity.” The transformation from fleshly incarnation (the “dying animal”) to the eternity of art becomes a kind of eternal life for the poet.

In the final stanza, Yeats asserts that once he escapes nature (the natural world of fleshly creation), he will never again be incarnated into the world of nature. Rather, he will assume an artificial form, that of a golden bird. For Yeats, “artificial” does not carry a negative connotation; rather, he connects the artificial with art and with artifice as an improvement on the natural. With this image, Yeats alludes to both “The Nightingale” (1844) by Hans Christian Andersen, as well as to John Keats’s “Ode to a Nightingale” (1819). Unlike these writers, Yeats finds the artificial bird to be superior in that it offers the singer a form of immortality. The bird can sing of “what is past, or passing, or to come.” For Yeats, the transformation from natural, mortal human being into artificial, immortal singer is a fate to be highly desired.

## “UNDER BEN BULBEN”

**First published:** 1939 (collected in *The Collected Poems of W. B. Yeats*, 1996)

**Type of work:** Poem

*Yeats surveys his artistic origins and influences and makes his poetic last will and testament.*

“Under Ben Bulben” was first published in three of Ireland’s national daily newspapers within a week of Yeats’s death and first appeared in book form in *Last Poems and Two Plays* (1939). Its newspaper publication was a mark of respect to the dead poet and a call for public recognition of his contribution to Irish life and literature. A similar, less self-centered call is what “Under Ben Bulben” itself communicates. As a result, the poem was long considered to be Yeats’s last will and poetic testament.

The poem’s title refers to the table mountain that overlooks the town of Sligo. If “Under Ben Bulben” may be read as the poet’s will, part of his bequest is that he be interred in the landscape of his childhood. Doing so would achieve a long-sought unity, not only with his ancestors but also with much that inspired his poetry. The location and character of the poet’s final resting place are given a privileged position at the end of the poem. Here, Yeats argues for the significance of being at one with the enduring presences of place and family. It is by its concluding lines, therefore, that “Under Ben Bulben” most resembles a will, since these arrange the terms and conditions of both the poet’s death and his legacy.

Yet these lines constitute a relatively small part of what Yeats wants to hand down. The emphasis on landscape and lineage must be seen as the end product of the poem’s various other significant emphases. “Under Ben Bulben” ranges far and wide over a large number of Yeats’s interests. The poem amounts to a condensed version of the poet’s intellectual autobiography. Yet rather than view the poem as a series of six interlinked episodes, it is more appropriate to note how different the parts are from one another and then to notice what they have in common.

The poem opens, as Yeats’s poetic career began, with allusions to pre-Christian deities and forces

and then interprets what these forces represent. The Witch of Atlas, renowned in mythology for her beauty, and “That pale, long visaged company” of Irish gods and heroes have been identified as agents of vision and passion. These two qualities Yeats then claims as constants that make both individual existence and the history of Western civilization valuable. The connection between intensity of feeling, even violence, and liberating insight is asserted in the third part of the poem. The link between artistic accomplishment and passionate involvement is made in part 4, though Yeats regrets that this connection has not endured since the middle of the nineteenth century, when the last-mentioned artist, Samuel Palmer, lived. Yeats’s message to the Irish poets who follow him is, likewise, a wish that they combine spiritedness and a sense of form. Again, as throughout all of “Under Ben Bulben,” the persistent thought is of the unification of different and opposed elements. As part 5 affirms, “Porter-drinkers’ randy laughter” is as important as “the holiness of monks.”

In form, meter, and language, “Under Ben Bulben” has the flexibility, directness, and verve of Yeats at his best. At the same time, the poem’s range of allusions and complexity of thought also make it typical of Yeats’s intellectual ambition. Yet it is this combination of complex thought and simple method that gives the reader a direct experience of the poet’s struggle for unity. The combination also confirms what the poet himself realized: that art, not life, is the means of attaining this unity.

## “THE CIRCUS ANIMALS’ DESERTION”

**First published:** 1939 (collected in *The Collected Poems of W. B. Yeats*, 1996)

**Type of work:** Poem

*In this retrospective poem, Yeats reflects on his career as a writer.*

Yeats wrote “The Circus Animals’ Desertion” in 1939, shortly before the end of his life. The poem was published first in Dublin and then included in the collection *Last Poems and Two Plays* (1939). This poem has grown in reputation and interest within

Yeats's studies, surpassing "Under Ben Bulbin" as the poet's final statement about his artistic life.

The poem has five stanzas of eight lines each. In addition, Yeats divides the poem into three parts: part one comprises stanza one; part two comprises stanzas two through four; and part three comprises the last stanza. Like "Sailing to Byzantium," the poem follows a regular rhyme scheme of *abababcc* and is entirely composed in iambic pentameter.

In this poem, Yeats laments that he has lost his gift for poetry, although, paradoxically, this might be one his finest poems. In the first stanza, he tells the reader that he has unsuccessfully "sought a theme" daily for about six weeks. He calls himself a "broken man" who must be "satisfied with [his] heart." He next refers to his "circus animals," a metaphor for the stylistic tricks and techniques of his early poetry. In other words, Yeats suggests that his earlier work was for show, and that the images, metaphors, and symbols that impress his readers are no more than animals trained to do tricks for people. Now, however, as an old man, all he has left is his heart, without pretense and without masks.

In the next three stanzas, Yeats elaborates on earlier periods of his literary career. Because he has been unable to identify a new theme for himself, he must "enumerate old themes." He first mentions "that sea rider Oisín." The title poem of one of Yeats's earliest collections, published in 1889, was "The Wanderings of Oisín," which recounted the adventures of the mythic and historic Irish hero, Oisín. "The Wanderings of Oisín" can be identified with Yeats's Celtic Twilight period, when he mined pre-Christian Celtic folklore for subject matter.

In stanza three, Yeats turns to his play *The Countess Cathleen* (pb. 1892, pr. 1899). Yeats dedicated this play to Maud Gonne, who also acted in it. His love for her and for her political activism became the "dream" Yeats writes of in the final line of the stanza. Tellingly, Yeats writes that the "dream itself had all my thought and love," implying that it was the dream, rather than reality, that occupied his mind and heart.

Likewise, in stanza four, Yeats refers to his play *On Baile's Strand* (pr. 1904, pb. 1905). He writes in the final two lines of the stanza, "Players and painted stage took all my love,/ and not those things that they were emblem of." Yeats here comes to the realization that figurative language, images, wordplay, and all of the trappings of poetry and literature are what he has loved and created. He has not, however, loved what such language stands in for.

In the final stanza, Yeats reveals himself in the months before his death to be deeply concerned with the concrete reality of life. As he nears death, he understands that all of the "masterful images" have their origins in the sometimes ugly real world. The heart does not exist in isolation from physical reality, nor does poetry spring from abstraction. Rather, the heart exists in the "foul rag-and-bone shop," a metaphor for the fleshly body.

## SUMMARY

There are a number of reasons for considering William Butler Yeats a major poet, if not *the* major poet of the twentieth century. One is his comprehensive growth. Each of his books of poetry represents a development and refinement of his thought. Taken as a whole, therefore, the body of his work not only offers commentary on the culture and history of his time but also traces the course of a poet coming of age.

Yeats's career offers an exceptional glimpse of the transition from Romanticism to modernism. In addition, Yeats's desire to create meaningful relationships between such different phenomena as love and art, history and poetry, Christianity and apocalypse, and passion and vision remains a striking example of his mind's range. As in the poetry of William Blake, Yeats simultaneously provides readers with competing and contradictory visions of reality.

## YEVGENY YEVTUSHENKO

**Born:** Stantsiya Zima, Siberia, Soviet Union (now in Russia)  
July 18, 1933

*Appearing at the height of anti-Stalinist activism, Yevtushenko was one of several young poets whose influence led to a decisive change in Russian poetry, as well as in Soviet politics.*

### BIOGRAPHY

Yevgeny Alexandrovich Yevtushenko (yehv-tew-SHEHNG-koh) was born on July 18, 1933, at Stantsiya Zima, a small Siberian junction near Lake Baikal, in the Soviet Union (now in Russia). Some of his ancestors had been deported to Siberia from Ukraine at the end of the nineteenth century for political activities. Other relatives came from Latvia. “Revolution was the religion in our family,” Yevtushenko says in his autobiography. He spent his childhood amid the serene beauty of Siberian nature but also troubled by political uncertainty: Both of his grandfathers were swept away during the purges ordered by Joseph Stalin in the late 1930’s. His parents studied geology in Moscow, married, and were divorced before World War II. His mother took Yevtushenko to Moscow, but he was evacuated to Zima during the war, where he spent three years.

Back in Moscow, growing up in postwar hardship, he was belligerent and was even thrown out of one school. He surmounted the difficulties, however, and even began to write poetry. For a while, he joined his father in a geological expedition in Kazakhstan and later almost became a professional soccer player. After publishing his first poem in 1949, appropriately in *Soviet Sport*, he concentrated on literature and entered the famous Gorky Literary Institute in Moscow. From the beginning of the 1950’s, he published his poems with increasing suc-

cess. The publication of his first book, *Razvedchiki gryadushchego* (1952; prospectors of the future), decided his fate: He devoted his life to poetry and published numerous books with regularity.

The emotional appeal of his poetry and his innate boldness made him a leader among the new Russian poets eager to assert themselves. Together with other rising poets, most notably Andrei Voznesensky, they were known as “the angry young men” of Russian letters. The age-old generational conflict became acute, and even the very notion of revolution, or the purification of it, was brought into question. During the increasing campaign against Stalin, Yevtushenko contributed several fiery poems of protest and rebellion, “Babiy Yar” (“Babii Yar”), “Nasledniki Stalina” (“Stalin’s Heirs”), and “Miotvaia ruka” (“The Dead Hand of the Past”) being the most explosive, making him even more popular with young readers. He was able to publish almost without restriction, including an autobiography in the Russian language, *Primechaniya k avtobiografii*, published in New York in 1963; that same year, a French translation, *Autobiographie précoce*, was published in Paris, and the book also appeared in English as *A Precocious Autobiography*. Yevtushenko was also free to travel abroad and visited the United States many times. His star was rising steadily.

In the changing political climate in the Soviet Union, however, he would soon get into trouble with authorities for his outspoken, inflammatory views. He was chastised, kept in check, even exiled for a short while in the beautiful Caucasus, which he did not find overly punitive. He retreated to Zima for a while, as if to replenish his strength and resolve in his native place, where he wrote a large

number of poems. Somehow, Yevtushenko was able to weather this and many other storms and to regain the good graces of the authorities. After several months of official silence, he was allowed to publish again, toning down his virulent attacks somewhat but remaining unbending in his opposition to the suppression of free speech. The situation continued: Periods of freedom were replaced by periods of restriction, until the Mikhail Gorbachev era.

In the 1980's, in addition to publishing poetry, Yevtushenko branched out into filmmaking. He wrote film scenarios and directed and even acted in films. He also became active in politics. In 1989, he was elected to the Soviet parliament as a member of a prodemocracy group that supported the policies of Mikhail Gorbachev, the general secretary of the Communist Party who later became president of the Soviet Union. In August, 1991, he defended Gorbachev when a group of hardline Communists staged a coup to oust Gorbachev and put an end to his policies of *perestroika*.

After the collapse of the Soviet Union, Yevtushenko became involved in environmental issues and campaigned on behalf of the victims of Joseph Stalin's gulags. Yevtushenko eventually settled in the United States, where he taught courses in Russian and European poetry and the history of world cinema at the University of Tulsa in Oklahoma and Queens University of the City University of New York.

## ANALYSIS

The beginnings of Yevtushenko's literary activities passed in the spirit of youthful rebelliousness and of the Russian poetic tradition. That tradition, however, was not so much the classical one of Alexander Pushkin, Aleksandr Blok, or even Boris Pasternak, with their heavily rhymed and regulated poetry; it was, rather, the tradition of modern, free-verse poetry, which was, by and large, absent from Russian poetry until the middle of the twentieth century. The notable exception was Vladimir Mayakovsky, with whom Yevtushenko has much in common, including the powerful, dramatic way of publicly reading one's poetry.

From the very beginning, Yevtushenko believed that he was bringing something new to Russian poetry. It was not so much the dissatisfaction with the existing state and the ensuing rebelliousness as it

was his belief that the torch had been passed and that the new generation should be taking its rightful place. Imbued with the age-old conviction that poets hold a special position in Russian society, he asserted himself forcefully even in his very first poems. In one of his earliest, "Prolog" ("Prologue"), for example, he declares in the very first verse, "I am different," speaking not only for himself but for the entire generation. His early poems also express his love and respect for nature, faith in his people and love for his land, a strong belief in himself, and a confirmation of his faith in the original aims of the revolution, which have been corrupted and are in need of reconstitution. A strong lyrical bent and a desire to experiment with poetic devices, including rhyme, complete the picture of the young Yevtushenko.

As he matured in the course of only a few years during the changes in the Soviet Union after Stalin's death, Yevtushenko turned to wider themes and concerns. His political activism became more prominent, as evidenced in poems such as "Stan-tsiya Zima" ("Zima Junction"), "Babii Yar," "Stalin's Heirs," and "Conversations with an American Writer." He displayed a willingness to state his position openly and courageously and to fight for his beliefs. By becoming a fighter for his ideals, he identified with one of the oldest traditions of Russian poets—to speak out as the conscience of the people in the absence of other democratic institutions. This attitude, however, had its price: Yevtushenko has often been labeled a topical poet lending his talent to social causes that came to his attention, as illustrated by a poem that he wrote on the spot upon visiting the bombed office of political activists in New York. It is difficult, therefore, to ignore the fact that his political activism and opposition to Soviet authorities contributed heavily to his popularity at home and abroad. His critics, however, accused him of flirting with the authorities and defending the revolution.

Yevtushenko has expressed his resentment over being labeled primarily a political or topical poet. He has frequently pointed out his faith in poetry as a noble endeavor and in the integrity of poets, who should be interested in social issues but should also express high emotions and pursue lofty aesthetic goals. Indeed, in a great number of his poems, he pursues exactly such goals. He conducts a running dialogue with Russian and foreign poets about the

mission of poetry. He registers his poetic reactions to sights and sounds on his numerous world travels. He writes poems about everyday life, such as about women burdened with life's miseries, as in "Ne ponimaiu" ("I Don't Understand") and "A Tie Salesgirl"; his mother's contribution in shaping his character, as in "Ia pozdravliaiu vas, mamma" ("I Congratulate You, Momma"); the vagaries of love, as in "Zrelost liubvi!" ("Love's Maturity?"); the simple joys of life, in "Berry-Picking"; or an absent-minded old professor whose wife has left him, in "Okno vykhodit v belye derevia" ("Schoolmaster"). His variety of themes is one of Yevtushenko's most appealing characteristics. As he states in "Prologue," "I want art to be/ as diverse as myself."

In another poem ("Poetry"), he says of poets, "They slander him from left/ and right,/ but he looks down on the liars with contempt." His courage has stood him in good stead throughout his career.

### "PROLOGUE"

**First published:** "Prolog," 1957 (collected in *The Poetry of Yevgeny Yevtushenko 1953-1965*, 1965)

**Type of work:** Poem

*"Prologue" can be seen as an explanation of Yevtushenko's approach to life and literature and is an introduction to his entire poetic career.*

Writing "Prologue" at the very beginning of his poetic career, Yevtushenko felt the need to identify himself. This self-identification, present in many of his poems, voices some of his basic concerns: the need to be different; a realization that somehow he does not fit in; the restrictive nature of his surroundings; and the lack of total freedom to express himself as an artist. As he explains at the end of the poem, he likes to defy the enemy standing in the way of the joy of living. That he sees as the highest purpose of his life.

The difference of which Yevtushenko speaks refers not so much to himself as to each successive generation of poets. The old has ruled Russian poetry for almost four decades; the new, represented best by Yevtushenko and Andrei Voznesensky, has come on the heels of the changes after Joseph Sta-

lin's death. The fact that he feels constrained in his efforts to express himself freely justifies his eagerness to see these changes made as quickly as possible. The best way to effect the change is by boldness and courage. Only then will he and others experience the full joy of life that he believes is their inalienable right.

The autobiographical nature of the poem is somewhat misleading, because, as stated, Yevtushenko does not plead the case for himself alone. In this sense, the poem has a universal meaning transcending the poet's own predicament, and even that of his generation. It can apply to all generations replacing one another. Supporting this argument is the fact that Yevtushenko is somewhat coy in his allusions to the powers that be (perhaps in order to see his poem in print), despite his well-known boldness. Moreover, some of the attitudes described—a defiant statement of being different, the ebullience of youth, a thirst for life and the joy of living, contradictory forces within oneself—can indeed be applied universally.

Yevtushenko also refers to two poets, Sergei Yesenin, a leading Russian poet in the first quarter of the twentieth century, and Walt Whitman. All three poets are known for their closeness to nature, through which they express their yearning for freedom and determination to be free.

"Prologue" is a manifesto poem, setting a course for future sailings, to which Yevtushenko has remained remarkably faithful.

### "BABII YAR"

**First published:** "Babiy Yar," 1961 (collected in *The Poetry of Yevgeny Yevtushenko 1953-1965*, 1965)

**Type of work:** Poem

*This poem is a powerful castigation of the latent anti-Semitism in the Soviet Union, which allowed Nazi crimes against the Jews in the Ukraine to be ignored.*

"Babii Yar" is Yevtushenko's best-known poem. The poem is about a ravine in the Ukraine where thousands of Jews were slaughtered by the Nazis, yet there is no monument to honor the dead. It is a poem with a thesis, the thesis being that anti-

Semitism still exists in the Soviet Union as it has for centuries. What intensifies this accusation is the professed internationalism of the Soviets that was supposed to eliminate all injustices, including racial persecution. "Babii Yar" is also one of the most political of Yevtushenko's poems and one of the most enduring, requiring and receiving no retraction.

In a series of metaphors, the poet establishes his references. After stating in the first line that there is no monument at Babii Yar, the poet immediately identifies with Jewish people, going back to ancient Egypt and to the agony of crucifixion on the cross, subtly reminding the reader of the common origin of Christ and the Jews. He refers to Alfred Dreyfus, a celebrated victim of persecution in France; to a boy in the Byelorussian town of Belostok as an illustration of pogroms; and finally to Anne Frank, the ultimate symbol of the suffering of the young and innocent as a result of racial injustice. When he returns to the victims of Babii Yar,

Yevtushenko declares his solidarity with them exactly because he is a Russian, who as he says, are "international to the core." His final statement is that of a defiance and lack of fear that he will be hated by anti-Semites.

"Babii Yar" is more than a political statement. It is an outcry against all the injustices of the world and a warning that it may not be limited to the Soviet Union, thus lending the poem a universal appeal. The skillful use of metaphors and symbols adds to the overall beauty of the poem, making it one of the most eloquent combinations of message and poetic execution.

## "YES' AND 'NO'"

**First published:** "Da' i 'Net,'" 1965  
(collected in *The New Russian Poets, 1953-1968*, 1968)

**Type of work:** Poem

*In this work, the poet is shuttling between the cities of "Yes" and "No," symbolizing the basic dichotomy in which he is forced to live.*

Like many of Yevtushenko's poems, "Yes' and 'No'" is in the form of a dramatic monologue. It represents his dilemma in having to shuttle like a train between two cities, "Yes" and "No," causing his nerves to be strained like telegraph wires. The city of No is loveless and without help, inhabited by ghosts and scowling objects. In contrast, the city of Yes is like a bird's song; there are no walls, and even the stars are begging to be friends, the lips offer themselves to be kissed, and the cows provide free milk. At the end, however, the poet tires of this land of plenty, unable to appreciate things given to him gratis. He would rather continue to shuttle between the two cities.

"Yes' and 'No'" is a simple poem on the surface, but it harbors some allegories. The poem is subtitled "From the Verses About Love," and this subtitle offers a possible explanation of the allegory of unrequited love in the city of No and the allure of fulfilled love in the city of Yes. The poet uses apt images to characterize the difference between the two emotional states. The decision not to opt for the logical choice of happiness and bliss and to travel between the two instead corresponds to a choice that is made by the heart and not by reason. Another possible allegory is of a political nature, the city of No representing the bleak state of affairs in the poet's country and the city of Yes the promise of a better life elsewhere. In this connection, the inability to travel abroad is of particular relevance.

The fact that Yevtushenko remained a man of politics, as well as a man of letters, supports this basic dichotomy, allowing for various interpretations of his works. What should not be ignored, however, is that his first love and avocation was always literature and that his poems are, first, works of art.

## SUMMARY

Yevgeny Yevtushenko started his poetic career in a modern idiom, aware that he was helping to bring something new to Russian poetry and that the torch had been passed to a new generation. As he matured, he became increasingly involved in political matters or matters that he believed deserved personal commitment. In this, he played the traditional role of a Russian poet as the conscience of the nation. At the same time, he never compromised his artistic standards to the point of becoming a spokesman for nonliterary causes, of which he has often been accused. It is indeed his artistic qualities that have made him a leading poet in twentieth century Russian literature.

Vasa D. Mihailovich

## DISCUSSION TOPICS

- How did Yevgeny Yevtushenko make “Babii Yar” a poem of universal significance?
- What influences of Walt Whitman are reflected in Yevtushenko’s poetry?
- Is writing for nonliterary causes a blemish on the record of a poet like Yevtushenko?
- One essay about Yektushenko concerns women in his poetry. What view of women emerges in his work?
- Is Yevtushenko likely to be best remembered as a social-political poet or as a lyrical one?

## MARGUERITE YOURCENAR

**Born:** Brussels, Belgium

June 8, 1903

**Died:** Northeast Harbor, Maine

December 17, 1987

*Yourcenar was not only an important historical novelist and short story writer but also a playwright, translator, essayist, and literary critic.*

### BIOGRAPHY

Marguerite Yourcenar (yewr-suh-NAHR) was one of the most original writers of post-World War II France and the first woman ever elected to the French Academy, whose purpose is to maintain the purity of the French language and whose members are drawn from among the best minds in French letters and science. Born Marguerite de Crayencour in Brussels, Belgium, on June 8, 1903, she was the only child of aristocratic and wealthy parents, Michel and Fernande de Crayencour. Her mother died of fever and other complications shortly after giving birth. Marguerite was reared by a series of nurses and maids as she and her father moved from Belgium to northern France to Paris.

Her father was an adventurous and unconventional man, as she lovingly and admiringly portrayed him in her 1977 autobiographical *Archives du Nord* (*How Many Years*, 1995). He loved the cosmopolitan excitement of European casino and spa towns. Also a student of literature and well read in the classics, he revealed to his daughter the beauty of French, English, Latin, and Greek masterpieces while private tutors taught her the other school subjects. Yourcenar as a result passed the *baccalauréat* examinations in 1919 at the early age of sixteen. Only two years later, she published *Le Jardin des chimères* (1921; the garden of chimeras) at

her father's expense under the pen name Marguerite Yourcenar (an incomplete anagram of her last name, which later became her legal name). This work of poetry was followed the next year by another more ambitious collection of poems, *Les Dieux ne sont pas morts* (1922; the gods are not dead).

The publication in 1929 of the novel *Alexis: Ou, Le Traité du vain combat* (*Alexis*, 1984) not only brought the first favorable reviews but was also followed in quick succession by other works of fiction. These novels and short stories were mostly written in the form of a confessional letter-monologue. *La Nouvelle Eurydice* (1931; the new Eurydice), *Denier du rêve* (1934; *A Coin in Nine Hands*, 1982), *Nouvelles orientales* (1938; *Oriental Tales*, 1985), and especially *Le Coup de grâce* (1939; *Coup de Grâce*, 1957) involve psychological studies of men in conflict with their sexuality, with life and art, and with love.

Yourcenar came to the United States on a lecture tour in 1939, but due to the onset of the war could not return to Nazi-occupied Europe. Thanks to the recommendation of the English poet Stephen Spender, she secured a part-time instructorship in French and art history at Sarah Lawrence College in New York, a position she held until 1950. She also, during this period of strife in her homeland, contributed articles and poems to émigré periodicals. At war's end, she decided to remain in the United States, becoming an American citizen and officially changing her name to Marguerite Yourcenar in 1947. With Grace Frick, her longtime friend and cotranslator, she moved to Mount Desert Island off the coast of Maine in 1950, where

she spent the rest of her life, with frequent travels throughout the United States, Canada, Europe, and Asia.

The prizewinning *Mémoires d'Hadrien* (1951; *Memoirs of Hadrian*, 1954; also translated as *Hadrian's Memoirs*, 1957), a fictional first-person narrative of the great Roman emperor, was Yourcenar's first work to become a critical and popular success. It was the dark and brooding *L'Œuvre au noir* (1968; *The Abyss*, 1976; also translated as *Zeno of Bruges*, 1994), however, written in an altogether different style, that finally brought Yourcenar fame and recognition. Eventually translated into eighteen languages, it won the coveted Prix Femina and was made into a film by André Delvaux in 1988. Between *Memoirs of Hadrian* and *The Abyss*, Yourcenar penned countless essays, plays, and translations, including an anthology of Negro spirituals entitled *Fleuve profond, sombre rivière: Les Negro Spirituals* (1964; wide, deep, troubled water), and followed in 1984 by *Blues et gospels* (blues and gospels).

Recognized for her literary contributions, Yourcenar received honorary degrees from such prestigious institutions as Harvard University and was elected as well to the Royal Academy of Belgium (1970). The recipient of numerous prizes and awards, she was also decorated with the rank of officer and later promoted to commander in the French Légion d'Honneur. Most notably, on March 6, 1980, by a vote of twenty to twelve, she became an "immortal" member of the French Academy, thereby breaking an all-male tradition dating back to 1635. Yet, above all these honors, she preferred to tend her garden, bake her bread, speak with her Yankee neighbors, fight for environmental and civil rights issues and, of course, write.

Yourcenar continued writing, mostly essays, short stories, translations, and critical studies, despite increasingly severe pulmonary illnesses, until her death in Maine on December 17, 1987.

## ANALYSIS

Despite publications dating back over more than sixty years—two works of poetry appeared as early as 1921 and 1922 when she was in her late teens—public recognition came slowly for Marguerite Yourcenar. This late recognition was mainly the result of her uncompromising stylistic rigor, her complex philosophical and ethical dilemmas, and her reliance on Greek myths and figures. She

deeply believed the past to be the foundation for the present, so she created themes that are both human and universal, using history to convey eternal ideas.

Although she began by writing poetry, she ultimately showed a greater affinity for fiction, since fiction allowed her flexibility in developing character, theme, and plot. Fiction also served as a means of testing established literary canons within what appeared to be a very traditional mode. Many of the ideas found in the novel *Memoirs of Hadrian* exist in preceding works. For instance, the novel examines weakness and failure in a world that admires strength and power, characters rejecting conventional bonds and emotions as they try to assert their individuality, and political intrusions into human affairs.

To illustrate this view of the world, Yourcenar chose a first-person narrative style especially popular in the nineteenth and early twentieth centuries. Part memoir, part confession, part confidence, this technique, which she called "the portrait of a voice," offers protagonists the greatest opportunity to express their thoughts, feelings, and reactions unimpaired by authorial screens and interventions. Her desire was to present the truth as the narrator sees it, without commenting in any way, since a lie can be as self-revealing as a truth. It was also her wish to grant free rein to her characters, without judging their opinions or actions. Either they are free, in which case the readers can draw their own conclusions, or the characters are being manipulated for whatever purpose, in which case they become mere puppets.

The German writer Rainer Maria Rilke influenced her early writings, among them *Alexis*, as revealed both in its tone and in the hesitations of the title character, Alexis, to bare his soul. French novelist André Gide's fiction also had some impact on her book's structure. Gide's successful renewal of the French narrative form and his open treatment of homosexuality guided Yourcenar in selecting her particular style and subject. She decided to write her second novel, *La Nouvelle Eurydice*, using the same literary form and theme, although here the male-male-female triangle takes on a greater importance than it had for *Alexis*, who was concerned solely with the freedom to love whomever he wanted. Unlike *Alexis*, who willingly and neatly assumed control of his existence, Stanislas, the cen-

tral character in the second novel, prefers the blurred monotony of a life endured.

Very different is *A Coin in Nine Hands*. The story, set in 1933 Rome, centers around the activities of a group of Italians plotting to assassinate the Fascist leader Benito Mussolini. Yourcenar describes the lives and dreams of the protagonists, whether they are involved in the conspiracy or not, in the sober manner of a seventeenth century tragedy. Indeed, the novel rigorously observes the classical rule of the three unities in action, place, and time. Through the device of a ten-lire coin passing from hand to hand the reader sees the action occurring in Rome within less than twenty-four hours.

Yourcenar portrays characters who live with the knowledge that they have lost their liberty, their vitality, their reassuring illusions. Too preoccupied to hide their own distress, too proud to act differently, they lock themselves behind solitary walls. The novel is a fascinating psychological puzzle whose pieces—the protagonists—can be considered from so many different angles the whole can never be fully assembled or understood. The characters become obscured by the complexity of their natures. Whether or not each recognizes it, the only true reality, the only permanence in an ephemeral world, is found in the unchanging nature of dreams.

*Coup de Grâce* shows the same purity of narration and the same density of style as *Alexis*. Eric, the first-person narrator, demands from life the ideal, even harsh, purity of love as well as courage and self-sacrifice. Whereas Alexis becomes gay out of veneration for women, Eric's preference is caused much less by a love for men than by his desire to remain alone and uncommitted. Like many of Yourcenar's heroes, he is unwilling to compromise with his emotions, often preferring the darker side of love to the blandness of mediocrity, and he sees in death a fitting end that is both a glorification and a promotion.

Yourcenar's drama has received less acclaim from critics and public than her fictional creations. Her drama uses traditional form, and she revives ancient times without the necessary modernization of characters and response to contemporary sensibility. Her plays, however, offer another dimension to her art and a more immediate, visual presentation of her philosophical concerns and her interpretation of the human condition.

Especially known for her fictional works, Yourcenar has written numerous essays as well, which deal with a range of topics reflecting her broad intellectual curiosity. These essays too show the same incisive mind and ease of style already evident in her creative endeavors and have helped to shape her worldview. Yourcenar's observations on different religious philosophies and her literary commentaries further illuminate understanding of her thought. Many of her essays have been republished in book form in France and are available in English translation.

## MEMOIRS OF HADRIAN

**First published:** *Mémoires d'Hadrien*, 1951  
(English translation, 1954; also as  
*Hadrian's Memoirs*, 1957)

**Type of work:** Novel

*Approaching death, the Roman emperor reminisces about the important events of his public and private life.*

Yourcenar's *Memoirs of Hadrian* has often been called a historical novel, but strictly speaking it is not, since it rejects the use of local color, period dress, and period customs found, for example, in the works of Sir Walter Scott or Alexandre Dumas, père.

The novel is divided into six parts, with Latin titles taken from Hadrian's poetry, philosophical ideas, or coins minted during his reign, and describes different phases of the emperor's life. The narrative traces a slowly rising curve with its apex reached at the time of Hadrian's greatest happiness, the result of his passionate love and extraordinary successes. This euphoria is followed immediately by a downward slope, at the bottom of which the emperor is overcome with doubt and despair; however, despite this depression, he courageously embarks on a new beginning. The work is addressed to Marcus Aurelius in the form of a letter, which allows for the use of the autobiographical first person favored by Yourcenar as being closest to the human voice. Knowing that his death is near, Hadrian sets down, in his most truthful manner, at risk of shocking or not being understood, the important personal and public events of his sixty-odd

years, along with his meditations on politics, the arts, and the world.

Yourcenar portrays a great historical figure who, thanks to his broad humanist education and inquiring intelligence, dominated his life and times with objectivity and lucidity. Hadrian, an art lover, poet, tireless traveler, general, economist, master builder, and political scientist, is a man who mis-

trusts conventional formulas and is more interested in observing than in judging. His generous nature leads him to improve the status of slaves, although he suspects that slavery will never be abolished, since other, more insidious forms of enslavement, just as inhuman, will simply take its place.

Acknowledging that his role is to impose Greek thought in all human en-

deavors, the emperor seeks to create a universe of perfect harmony and beauty under Rome's might and majesty. Violence and war represent for him the greatest evils, and peace and liberty the requirements necessary for civilization. Furthermore, the collaboration of intelligence and work in such a beneficial environment will bring happiness to all.

Although Yourcenar does not describe the past in the light of the present, she does show that the period of Hadrian's rule was very similar to her own time by portraying a highly sophisticated, complex, and skeptical emperor who reveals all the aspects of his political and emotional life. Hadrian characterizes himself partly through accounts of his actions, more often through analyses of his thoughts and feelings. Yourcenar's character fits so well with the known facts of the actual Hadrian, and is so subtly portrayed, the fictional persona takes on a reality that seems to explain the actual Hadrian. With a talent that gives the novelist precedence over the historian and the moralist, and the philosopher precedence over the novelist, Yourcenar brilliantly revived a conception of a man and a life at the end of a great civilization.

## THE ABYSS

**First published:** *L'Œuvre au noir*, 1968  
(English translation, 1976; also as *Zeno of Bruges*, 1994)

**Type of work:** Novel

*Obsessed with accumulating knowledge and endowed with free will, Zeno fears being entrapped by complacent ways of seeing and thinking.*

Like Yourcenar's previous works, *The Abyss* recreates an era, with its particular modes of thinking and being. The action occurs between 1510 and 1569 in Europe, mainly in the Belgian city of Bruges, and is divided into three parts, the first two echoing each other ("Wandering Life" and "Immobile Life") and the third ("The Prison") describing the site of the hero's last months and serving as a metaphor for his body and the world.

Zeno, whose name is the same as the Greek philosopher's and whose name is associated with "zero" and "no," learned ancient languages, natural sciences, and alchemy at a young age. He quickly real-

izes, however, that men and books lie. A universal man of the Renaissance, he invents a weaving machine, discusses the atoms of Epicurus and the proofs demonstrating God's existence, and refuses a priori the authority of scholars. He is interested in geology and botany, medicine and surgery, and astronomy and metallurgy.

After some thirty years of wandering under assumed names, one step

ahead of the Inquisition, he returns to Bruges, where he becomes a physician at a hospital run by Franciscans. The good and learned prior of the Franciscans and Zeno have daily conversations about religion and questions of faith as well as about the deteriorating situation in Flanders, repression of the patriots, and the torture and killing of Protestants and Catholics alike. Thus, the

prior's Christian wisdom complements Zeno's secular wisdom.

Arrested for his sympathy to the rebels' cause and for his blasphemous writings, Zeno defends himself before the tribunal, arguing about physiology and physics, rejecting unscientific hypotheses and conclusions. Ultimately, he is condemned because he instinctively knows that there can be no accommodation between those who seek truth and those who want to impose their viewpoints by force of will. Afraid to burn at the stake, Zeno chooses suicide. This suicide is more than a revolt against the Christian prohibition of the deed or the uniquely free act of an existential negator. By sacrificing his life, Zeno attains the supreme freedom offered by eternity.

Despite its French title, the novel is not concerned with the transformation of base metals but with the quest for knowledge devoid of falsehood, superstition, fear, and ignorance. This search for the absolute distinguishes Zeno from other scientists and makes him a universal man, lucid in his thinking and unwilling to accept fanaticism, whether philosophical, scientific, moral, or religious. More interested in negating so as better to reaffirm, he discovers that in addition to ridding himself of all prejudices and preconceptions, he must achieve a broadening of the self and of the understanding by which one becomes integrated into the universe.

In illustrating and analyzing her hero's difficult progress, Yourcenar shows that any seeker of truth defies established values and must be destroyed by defenders of the status quo. It is not surprising, then, that Zeno, when forced to choose, would much prefer death to life in the horror of the human condition.

## "AN OBSCURE MAN"

**First published:** "Un Homme obscur," 1982  
(collected in *Two Lives and a Dream*, 1987)

**Type of work:** Short story

*The protagonist, too sensitive for his time, slowly discovers that humanity is alone in a purposeless universe.*

Based on Yourcenar's earlier story, "D'après Rembrandt" (1934; after Rembrandt), "An Obscure Man," published in the collection *Comme l'eau qui coule* (1982; *Two Lives and a Dream*, 1987), describes the life and travels of Nathanaël. In the process he steepes himself in the classics, medieval tales, and plays by William Shakespeare while living the life dictated by his surroundings, whether in the relative refinement of Europe or the wilderness of the New World. In spite, or perhaps because, of his varied experiences in these settings, he only incompletely understands life, viewing existence in impressionistic fashion, as if his thought barely touches reality. Thus the author's recurrent theme of an absurd world in which human destiny is directed as much by chance as by free will emerges.

In Amsterdam, Nathanaël works in his uncle's print shop, where he continues his self-teaching by reading Greek and Roman texts. He compares the societies of Greece and Rome to his and sees with despair the religious, political, social, and economic injustice of his time. Although he fully embraces the grandeur of Christian principles, he rejects dogma and conventional religion as nonsense. Such conflicts between society's expectations and individual passions resurface repeatedly throughout Yourcenar's work, and they are resolved in large measure as a result of the strength of the protagonist's personality.

Nathanaël falls in love with, marries, and is soon rejected by Sarai, a honky-tonk singer and prostitute. Then, through a series of events, he finds himself as game warden for a wealthy philanthropist, sailing to his employer's island property. When he overhears that his wife has been hanged for stealing, he cries out her name, and then God's, repeatedly, with no answer. All alone, he becomes a thing

among things, merging with the night. Nathanaël now knows, regardless of the old philosopher's wish "to give at least the appearance of order to chaos," that God or the Self or Nothingness is not at the center of the universe, that ultimately all, including humankind, is guided not by design, but by accident, and that he will die soon like the other creatures around him.

Far from being the failure suggested by the title, Nathanaël succeeds, like the majority of Yourcenar's heroes, in imposing his own view of the world, in this case through conscious open-eyed acceptance of the Self. Thanks to his sensitivity, to his love for plants, trees, birds, and animals, to his gentleness, and to his refusal to act according to preconceptions or judgmental ideas, his life can be considered successful because he has evolved the peace of mind and acceptance of cosmic darkness

that others, powerful and weak alike, have been unable or unwilling to acquire.

## SUMMARY

During a 1968 interview with the noted French author Françoise Mallet-Joris, Marguerite Yourcenar declared, "I believe in the nobility of refusal." Indeed, all her protagonists rebel against moral or cultural limits and engage in deviant behavior or radical ideas, but they often find themselves unable to resolve the conflicts between society's demands and their passions as they seek either wisdom or truth. Marguerite Yourcenar is recognized for the loftiness of her thought, the breadth of her culture, and the humanity of her creations. Her works, while traditional in their style, are both elegant and contemporary.

*Les Dieux ne sont pas morts*, 1922

*Feux*, 1936 (*Fires*, 1981)

*Les Charités d'Alcippe, et autres poèmes*, 1956 (*The Alms of Alcippe*, 1982)

## DISCUSSION TOPICS

- Marguerite Yourcenar was educated both at home and in school. What evidence suggests that the homeschooling was more important?
- Does Yourcenar's *Memoirs of Hadrian* intimate the decline of Western influence in the modern world?
- What were the main impediments for truth-seekers in Yourcenar's *The Abyss*?
- In "An Obscure Man" the protagonist learns that life is guided by accident. Can such a discovery be fulfilling or reconciliatory?
- Yourcenar lived more than half her life in the United States. What traces of American influence can be found in her writings?

## ÉMILE ZOLA

**Born:** Paris, France

April 2, 1840

**Died:** Paris, France

September 28, 1902

*Zola was the most important author of the naturalist school and an influence upon writers in Europe and the Americas.*

### BIOGRAPHY

Émile Zola (ZOH-luh) was born in Paris, France, on April 2, 1840, the son of a French mother, Émilie, and an Italian-born father, Francesco Zola, a civil engineer. When the senior Zola's canal project was approved by the government, he and his family moved in 1843 to Aix-en-Provence in southern France. Four years later, he died of pneumonia, leaving his widow and child in difficult circumstances. After grammar school, Zola entered secondary school in 1852, where, thanks to hard work, he became an excellent student, especially in French literature. It was then that he formed a lifelong friendship with Paul Cézanne, who was to become a great Impressionist painter. Taking long walks in the Provençal hills, the two companions talked of art and Romantic poetry, especially that of Victor Hugo and Alfred de Musset.

As the family situation worsened, Mme Zola and her son were forced to return to Paris in the hope of obtaining assistance from her late husband's friends. In 1858, Zola enrolled at the Lycée Saint-Louis. The following year, perhaps because of a long illness, constant worries over the family's livelihood, and homesickness, he failed the qualifying *baccalauréat* examinations. Now living on his own in abject poverty, he began to write poems and stories while looking for a job and rereading the French classics. Hired in 1862 as shipping clerk at

Hachette, a publishing house, Zola ultimately rose to head its advertising department. There, the owner advised him to abandon poetry and devote himself to prose instead.

Outside his working hours, Zola continued to read, from the novelists of his generation (Stendhal, Gustave Flaubert, Honoré de Balzac, the Goncourt brothers) to the theoretical writings of Hippolyte Taine and Claude Bernard. In 1864, he published his first book, *Contes à Ninon* (*Stories for Ninon*, 1895), a collection that already sketches certain favorite themes and images. At the same time, newspapers published his literary and artistic reviews, many of which were gathered in a volume entitled *Mes haines* (1866; *My Hates*, 1893).

Financially more secure, Zola left Hachette in early 1866 and became a freelance book and art critic for a number of important newspapers. It was in their pages that he eloquently defended the paintings of Édouard Manet and the Impressionists against tradition-bound academicians. He continued to explore human relations in novels such as *Thérèse Raquin* (1867; English translation, 1881) and *Madeleine Féral* (1868; English translation, 1880).

Shortly after the publication of *Madeleine Féral*, Zola signed a contract for *Les Rougon-Macquart* (1871-1893; *The Rougon-Macquarts*, 1896-1900), a twenty-volume sequence novel depicting the "natural and social history of a family under the Second Empire." The first novel, *La Fortune des Rougon* (1871; *The Rougon-Macquart Family*, 1879), appeared in 1871 and received a warm accolade from Flaubert. Thereafter, a new volume would appear almost every year until 1893, when *Le Docteur Pascal*

(1893; *Doctor Pascal*, 1893) brought the saga to its conclusion. Zola also wrote political and literary articles, plays, and short stories. In 1870 he married Gabrielle Meley, whom he had known since 1863, and established close friendships with writers such as Ivan Turgenev, Guy de Maupassant, and Joris-Karl Huysmans.

The year 1877 was important in Zola's career, for it brought him the triumph of *L'Assommoir* (English translation, 1879), the money to purchase a country home in Médan, near Paris, and a reputation as one of the great novelists of the nineteenth century. The publication of *L'Assommoir*, however, met with much scandal. The sordid story of one family's steady descent into poverty and alcoholism prompted many critics to call for Zola to be tried as a criminal. The government did pull the novel from book stalls in railroad stations, but such actions only spurred the sales of the novel, which sold 16,000 copies in one month, and secured Zola's reputation. Fellow writers like Gustave Flaubert and Anatole France praised the book as powerful and significant, hailing Zola's work as groundbreaking and truly original. In response to the controversy surrounding the book, Zola added a preface to the novel that defended its subject and announced some of the principles of his naturalistic style.

Three years later, *Nana* (1880; English translation, 1880) was even more successful, in part because of its scandalous subject; it was followed by *Germinal* (1885; English translation, 1885), the thirteenth novel in the series, considered by most critics as his masterpiece. In addition, he exposed his naturalist ideas in nonfictional essays: *Le Roman expérimental* (1880; *The Experimental Novel*, 1893), *Les Romanciers naturalistes* (1881; *The Naturalist Novel*, 1964), and *Le Naturalisme au théâtre* (1881; *Naturalism on the Stage*, 1893). These ideas were being strongly challenged by the summer of 1887, although that same year André Antoine still applied them in his Théâtre Libre productions.

As soon as Zola had completed his magnum opus, he composed *Les Trois Villes* (1894-1898; *The Three Cities*, 1894-1898), a trilogy of lesser merit, while increasingly concerning himself with social and political questions. He became involved in the case of Captain Alfred Dreyfus, who had been unjustly condemned for treason in 1894 and on whose behalf Zola waged a newspaper campaign,

culminating in the eloquent—even provocative—open letter published in the January 13, 1898, issue of *L'Aurore* under the title “J'accuse . . . !” (“I Accuse . . . !,” 1898).

Sentenced to a heavy fine and a year in prison for this article, Zola fled to England to continue his fight. Returning to Paris in June, 1899, where he saw Dreyfus pardoned by President Émile-François Loubet (full exoneration did not come until 1906), he supervised the publication of the first volume of *Les Quatre Évangiles* (1899-1903; *The Four Evangelists*, 1900-1903). He had planned to write a fourth volume on justice.

On September 28, 1902, Zola died at his Paris apartment of carbon monoxide poisoning caused by a defective chimney, leaving behind his wife, a daughter (Denise), and a son (Jacques), both born of his affair with Jeanne Rozerot. Six years after a public funeral attended by some fifty thousand people, his remains were transferred to the Pantheon and placed near those of Victor Hugo, another great defender of the innocent and the downtrodden.

## ANALYSIS

Zola viewed his century as predominantly scientific and saw literature as the best means of observing and studying human forces at work, although he never completely rejected his early Romantic writings. He had been influenced not only by Claude Bernard's *Introduction à l'étude de la médecine expérimentale* (1865; *Introduction to the Study of Experimental Medicine*, 1927), which dealt with biological determinism and the pathological functioning of the organism, but also by the questionable principles propounded by Prosper Lucas and Jules Michelet regarding hereditary laws. By placing his theory of human conduct in a scientific context, he showed himself to be much more interested in physiology than in character analysis. Indeed, at a congress held in 1866, Zola declared, “The novel is a treatise of moral anatomy, a compilation of human facts, an experimental philosophy of the passions. Its object is . . . to portray mankind and nature as they really are.”

In the plan submitted to his publisher in 1869 concerning the writing of *The Rougon-Macquarts*, Zola expressed his desire to demonstrate the reciprocal effect of the environment on various family members, with their special temperaments and ge-

netic baggage, during a particular and well-delineated historical period. The lives of the descendants of these two families united by marriage are crammed into the almost twenty years that constitute Emperor Napoleon III's reign. All suffer to a greater or lesser extent from the original "lesion" passed to future generations by Adélaïde Rougon, the matriarch. (A complete genealogy was later included.)

Fortunately, by manipulating outside influences, Zola makes it possible to escape one's environment as well as, through innateness, one's heredity. Despair would prevail otherwise, since no redemption could be envisioned. Despite the conclusion reached by the 105-year-old Adélaïde that she has raised a pack of wolves, the last volume (*Doctor Pascal*) reveals a glimpse of hope in an infant's arm lifted "very straight, like a flag summoning life."

In addition, Zola wished to present protagonists in different personal or professional situations, such as the unchecked greed of *La Curée* (1872; *The Rush for the Spoil*, 1886); the ravages of alcoholism in *L'Assommoir*; the world of politics in *Son Excellence Eugène Rougon* (1876; *Clorinda: Or, The Rise and Reign of His Excellency Eugène Rougon*, 1880); the world of art in *L'Œuvre* (1886; *His Masterpiece*, 1886); or the field of high finance in *L'Argent* (1891; *Money*, 1891). To achieve his goal, Zola read books and archives on the subjects at hand, consulted experts and practitioners, and even made on-site inspections, as in the case of his tour of the coal district in northern France and his descent into an actual mine pit in preparation for *Germinal*. In his notes, along with general and chapter outlines, he mentioned the cast of characters with their outstanding features and, if belonging to the central family, their hereditary traits.

Such detailed research does not lead, however, to an uninspired, quasi-mechanical presentation of facts and actions that reads like the objective, scientific texts he admired and used; on the contrary, many of the series' novels were defined by Zola himself as "poems," such as "the poem of modern activity" (*Au bonheur des dames*, 1883; *The Ladies' Paradise*, 1883) or "the living poem of the land" (*La*

*Terre*, 1887; *The Soil*, 1888). This means that the accumulated documentation often served to fulfill and corroborate an idea already conceived in his mind or to elaborate it. Besides, he remained fundamentally a poet and an artist. That he proved again and again when he described lush or barren landscapes, gigantic crowds in motion, and singular objects endowed with awesome anthropomorphic, even mythic, qualities, be it a locomotive, a greenhouse, or a still.

Sex, too, is an important, omnipresent theme in Zola. Indeed, his contemporaries constantly criticized him not only for his apparent pandering to humanity's prurient instincts but also for removing all sentimental connotations from the sex act. His response was always that nothing natural or human can be excluded from a naturalistic work, that the dichotomy between nature and morality is an unscientific—hence, unacceptable—premise, and that desire is as much a part of a human being as other physiological drives.

As was already evident in Zola's early fiction, his vision of the world was basically dark, and the more he observed and dissected human behavior the more pessimistic he became. Yet at the same time he was fascinated by his characters' pleasure-seeking selfishness and corruption, perhaps because he considered vice more interesting than virtue (to paraphrase Honoré de Balzac). This fascination explains why so many of his heroes and heroines are, first, embodiments of depravity who may ultimately be punished with death or madness but who remain unrepentant nonetheless. Second, they symbolize the complete rottenness at the core of France in the 1850's and 1860's in general and the very evil of the emperor's regime in particular, on which they are sometimes able to take a sweet revenge (such as in *Nana*). Smartly avoiding the pitfalls of moralistic preaching, Zola conveyed to his readers the warning that capitalism was being undermined by greed and poverty and that the people would, in the end, rise up in just revolt; he was thereby echoing the socialistic doctrines of Charles Fourier, Pierre-Joseph Proudhon, and Karl Marx.

## THÉRÈSE RAQUIN

**First published:** 1867 (English translation, 1881)

**Type of work:** Novel

*After murdering her husband, Thérèse and her lover are tormented by their consciences and driven to suicide.*

*Thérèse Raquin* is a gruesome fictional implementation of the scientific theories that influenced Zola. Allying himself with “the group of naturalist writers” (his first mention of the term), he declared in the preface to the second edition (1868) that, much as a surgeon would dissect a corpse, he would attempt the objective study of two different temperaments brought together by circumstances. This novel is also a very good horror story in the vein of Edgar Allan Poe and Nathaniel Hawthorne.

Mme Raquin is aunt to the orphaned Thérèse and has reared her along with her own son, Camille. Even though they are not particularly suited for each other, for the young girl is sensual and vibrant and her cousin frail and weak, they nevertheless marry. The three characters then move to a seedy Parisian neighborhood, where mother and daughter-in-law open a dry goods shop and Camille becomes a railroad clerk. Life is so monotonous and marriage so boring that, when one night Camille brings home a colleague from the office, Thérèse finds herself “thrilled” by the newcomer’s robust physical animality.

The lusty Laurent and the unsatisfied Thérèse are soon involved in a highly charged affair. Wanting to be free of Camille (divorce is impossible) and unable to control their sexual needs, they drown him in an apparent boating accident, but not before he bites Laurent’s neck and leaves an indelible scar not unlike the mark of Cain. That at times Thérèse fantasizes about tearing it off with her teeth, so as to diminish her disgust and reach a new level of erotic pleasure, is indicative of a certain sadistic cruelty. In their increasingly unstable and guilty minds, the family cat seems to glare at the two murderers with a suspicious eye, while the victim’s ghost now lies between them in bed and prohibits their usually passionate sex and their sleep.

Close to a nervous breakdown, horrified by their remorse, and feverish from abstinence, Thérèse and Laurent can consider but one recourse: They take poison and at last find some consolation in their double death, although in Thérèse’s fall her mouth hits Laurent’s stigmatic scar. Paradoxically, this conclusion shows that far from being mere physiological temperaments, the two lovers made concrete moral—if wrong—choices by deciding how they would live in reaction to their nature; moreover, it shows that there is a moral law after all, in spite of Zola’s professed adherence to the axiom of Hippolyte Taine (“Vice and virtue are products like vitriol and sugar”), which he uses as an epigraph to the novel.

## GERMINAL

**First published:** 1885 (English translation, 1885)

**Type of work:** Novel

*Coal miners strike unsuccessfully for better pay and better working conditions but will someday overcome their harsh situations.*

*Germinal* takes its title, first, from the Revolutionary calendar’s spring event of 12 Germinal 1795, when the starving populace invaded the National Assembly and demanded bread. Similarly, the miners and their womenfolk act accordingly in one of the novel’s most famous and most stirring passages (part 5, chapter 5). Second, by continuing nature’s cycle, spring is also symbolic of rebirth and fecundity after months of sterility and death.

Dismissed from his position as a mechanic because of his socialistic ideas, Étienne Lantier (of the Macquart line) arrives in the bleak March landscape of the coal-mining district to start work in the pits, despite his lack of underground experience. Zola masterfully uses Étienne’s naïveté regarding his new milieu to educate him and the reader about this forsaken world and people. Since their wages are so low, the miners, regardless of age or gender, have traditionally eked out a miserable existence. Now, however, because of overproduction and the subsequent drop in coal prices, the company wants to impose an even lower tonnage fee. Lantier convinces his coworkers to strike rather

than capitulate as they have often done in the past. For its part, the company expects to crush the strike through hunger.

When violence and sabotage occur, the army arrives to restore order, resulting in numerous deaths and acts of revenge. The food provider Maigrat is savagely mutilated, a soldier is murdered by a young boy, and the mine installation is flooded by a Russian anarchist, thus causing additional fatalities. In the end, vanquished by the repressive government forces and by starvation, the miners return to work, while Lantier leaves to militate on behalf of social justice.

Though obviously on the miners' side, Zola does not portray either the miners or their bosses in black-and-white terms. The workers, limited by their environment and devoid of free will, are reduced to the level of animals in their constant search for food. The Grégoires are a local stockholding family who show charitable impulses toward the miners but are ultimately too insensitive to wish to improve their plight; their young daughter, who becomes a symbol of capitalism, will later be cruelly stripped and strangled. Hennebeau, the resident manager, is as much a tool

and prisoner of the company as the workers. Zola mythicizes the mine pit into a voracious monster, aptly named "le Voreux," feeding on human flesh; even when flooded, the mine soon returns to its normal state in expectant ambush for the next cargo of miners.

Failure and death aside, the novel closes optimistically, under the glorious

April sun. Étienne now hears the hammering sounds of his comrades underground and imagines, in a suffusing prophecy of resurrection, that an "avenging army was slowly germinating in the furrows, sprouting for the harvests of the coming century. And soon this germination would sunder the earth." The promise of the title has been fully realized.

## L'ASSOMMOIR

**First published:** 1877 (English translation, 1879; also as *The Dram-Shop*, 1897)

**Type of work:** Novel

*Gervaise Macquart struggles to find happiness in working-class Paris, and for a fleeting moment she finds it, only to have it torn away from her by the greed of her husband and by the unforgiving circumstances of her environment.*

In *L'Assommoir*, Auguste Lantier brings his wife, Gervaise, and two young sons, Claude and Étienne, from the country to a working-class neighborhood in Paris. Almost as soon as they arrive in the city, the couple quarrels, and the indolent Lantier leaves Gervaise for another woman, abandoning them in a squalid hotel with wretched and greasy furniture. With few friends, Gervaise must make her way on the streets of Paris, where she finally takes a low-paying job as a laundress in a neighborhood laundry.

Gervaise's future looks hopeless until she meets and marries Coupeau, a zinc worker with whom she has a daughter, Nana. The lazy and greedy Coupeau turns out to be little better than Lantier, for he gambles constantly, often stealing money from Gervaise to pay his debts.

In spite of these obstacles, Gervaise is able to save enough money to open her own laundry and achieve some measure of prosperity. Neighborhood women begin to look up to her, and suddenly it appears that she and her family will be able to survive with some measure of dignity and wealth in Paris.

Gervaise's momentary happiness comes crashing down around her when Coupeau falls off a roof, injuring himself so badly that he cannot work again. Thus begins his life of idleness and alcoholism. He begins to frequent the bar—*L'Assommoir*—that lends this novel its title. At the center of the bar stands a gigantic still, a powerful and inhuman machine that sucks life from those around it. Coupeau cannot control the attraction the machine has over him, and he succumbs to a life of alcoholism, spending Gervaise's every penny she earns at her laundry.

The family's fall into abject poverty begins when Lantier returns to lodge with them. His and Coupeau's indolence and their inability to control their desire for alcohol destroy the family. Nana becomes a prostitute (and the leading character of her own novel, *Nana*, published in 1880), getting caught up in a web of debauchery on the streets of Paris. Alcohol kills Coupeau, and Gervaise dies of hunger in more desperate and squalid circumstances than when she first arrived in Paris.

Trapped in a bourgeois city that demands that commercial transactions become the center of life, Gervaise and her family are soon caught up in the feverish desire to make money and lead a life of wealth. Their inability to meet such demands leads to their downfall.

In *L'Assommoir*, the packed working-class slums, the pulsing still, and even the greasy, steamy laundries determine the fates of their inhabitants. As hard as Gervaise works to pull herself out of poverty, the labyrinthine streets of her neighborhood trap her in their web, squeezing the life out of her and her family. This environment eventually defeats her will, even though for a short time her physical will seems strong enough to defeat the forces that drain the life from her. The increasing industrialization that creates the alcohol still, the urban slum, and the proletariat poison simple relationships, leading to death, debauchery, and degradation.

*L'Assommoir* was sensational when it was first published because Zola wanted to present a simple moral lesson about the nature of life. No matter how strong and good Gervaise was, she could never overcome the forces of the slums or the evils imposed on workers forced to live in the working-class neighborhoods by the middle classes that kept them in poverty, paying them low wages for simple tasks like doing laundry.

Zola's novel, with its focus on the evils of money, the mechanistic power of the urban landscape, and the determinism of environment, provides the model for many other naturalist novels, most nota-

bly Frank Norris's *McTeague* (1899) and Theodore Dreiser's *Sister Carrie* (1900).

## LA BÊTE HUMAINE

**First published:** 1890 (English translation, 1890; also as *The Human Brutes*, 1890, and *The Human Beast*, 1891)

**Type of work:** Novel

*Greed, selfishness, lust, and jealousy motivate all of the characters in this novel that attacks both the rapid industrialization of France and the country's corrupt legal system.*

In contrast to many of Zola's other novels, *La Bête humaine* focuses on the darkness of the human soul and the evil deeds which proceed from it rather than the determinism of environment. Much like his other novels, though, *La Bête humaine* does center on the energy of an inhuman machine—in this case, a locomotive—that exacerbates the dark desires of the human soul.

When Zola was planning to write this novel, he had two ideas. First, he wanted to write a carefully observed portrait of railroad life. Second, he wanted to write a novel depicting the corruption of the legal and judicial system in late nineteenth century France. These two ideas merged when he began to contemplate the heart of darkness in Jacques Lantier, a railroad employee whose sexual passion borders on lust for killing.

Lantier, whom Zola contrived to make the orphan son of Gervaise Macquart and Auguste Lantier, is an engineer on the Paris-Le Havre line. He is so consumed by his locomotive that he treats it like a lover, tenderly driving her on the difficult portions of his route and being sure she is well taken care of before he leaves his shift. Lantier fears women, however, because the wild beast that lurks within him manifests itself in a desire for murder in the place of a desire for sex. He attributes this murderous desire to hereditary madness, and he literally runs away from possible sexual liaisons before he commits a deadly act.

His fortunes change when he witnesses the murder one evening of Grandmorin, the president of the railroad. Although he does not see clearly the people involved, another railroad employee, Rou-

baud, and his wife, Séverine, become the prime suspects in the case. Roubaud is indeed the killer, having murdered Grandmorin in a fit of jealousy over the president's love affair with Séverine. When Roubaud, Jacques, and Séverine are called into the courts, Jacques and Séverine fall in love, and he does what he can to protect her. They begin an illicit affair, and for the first time Jacques is consumed only with sexual passion and not murderous desire. He believes he is cured until she begins to describe lustfully Grandmorin's murder in great detail. His murderous desire returns, so they plan to kill Roubaud. At the last moment, in a fit of murderous rage, Jacques kills Séverine instead. Although Jacques is called up by lawyers for questioning in the death, he avoids suspicion. However, he cannot escape punishment for long, for he dies a gruesome death as he falls from a speeding locomotive during a fight.

However, Lantier is not the only character with a corrupt soul in the novel. Almost every character in *La Bête humaine* is driven by lust, greed, or jealousy to acts of robbery, murder, or betrayal. Another railway worker, Misard (whose name symbolizes "miserly")—a switchman on Jacques's route—is slowly poisoning Aunt Phasie, Jacques's own foster mother, because Misard believes she has a fortune hidden somewhere in the house. Roubaud kills Grandmorin out of jealousy. All of the lawyers in the novel attempt to pin the murder of Grandmorin on a vagrant, even though all of their

evidence convinces them of Roubaud's guilt. Even Séverine lusts for the death of her husband, Roubaud.

In *La Bête humaine*, Zola demonstrates that the human soul is overwhelmingly consumed with the desire for love and death.

## SUMMARY

Émile Zola is the father of naturalism, a literary style that holds up a mirror to the gritty elements of life, presenting them in great detail. Zola carries the realism of Gustave Flaubert—who challenged Romanticism in his realistic depictions of the detailed depictions of characters' lives—one step further by focusing on the sordid details of the sex lives, the political lives, and the working lives of men and women in late nineteenth century Paris. Zola's novels follow the fortunes of the wretched of the earth, those who have been trodden down by economic and social forces of urban life. The lives of Zola's characters are determined by forces beyond their control, such as heredity and environment, and his novels are tracts condemning the squalor in which these characters live. *The Rougon-Macquart Novels* represent Zola's greatest statement about the nature of humankind and society, as well as his most urgent call for reform of a society consumed with the desire for wealth at the expense of its poorest citizens.

Pierre L. Horn; updated by Henry L. Carrigan, Jr.

## BIBLIOGRAPHY

### By the Author

#### LONG FICTION:

*La Confession de Claude*, 1865 (*Claude's Confession*, 1882)

*Le Vœu d'une morte*, 1866 (*A Dead Woman's Wish*, 1902)

POETRY:

*L'Amoureuse comédie*, wr. 1860 (in *Œuvres complètes*)

## DISCUSSION TOPICS

- Émile Zola is often called the “father of naturalism.” What is naturalism, and what principles can you discern from reading novels such as *Germinal*, *L'Assommoir*, and *Nana*?
- Zola was a good friend of the Impressionist painter Paul Cézanne and was himself an artist. In what ways can Zola's novels be described as “painterly”? That is, are there scenes in the novels that he creates so that you can almost see it on a canvas?
- Discuss the ways in which Karl Marx's theories of economics—such as the conflict between the working classes (proletariat) and the middle classes (bourgeois)—can be seen in Zola's novels. Can any of the principles of Charles Darwin's evolutionary theory or Herbert Spencer's “social Darwinism” be found in Zola's novels? Provide some examples of these ideas from *Germinal*, *Nana*, or *The Bonheur des Dames*.
- Some critics have said that Zola's novels prepared the way for French cinema. In what ways are Zola's novels cinematic in nature? How are they like films? What characteristics of his novels lend themselves to the cinematic?
- What can we learn about French history from Zola's novels?
- Can we ever feel sorry for any of Zola's characters? Do we have empathy for them or do we not sympathize with them at all? Is there anything they can do to change their situations?
- Do the societies that Zola depicts make us long for a utopia (a perfect world)?

# APPENDIXES

## GLOSSARY OF LITERARY TERMS

**Aesthetics:** The branch of philosophy that studies the beautiful in nature and art, including how beauty is recognized in a work of art and how people respond to it. In literature, the aesthetic approach can be distinguished from the moral or utilitarian approach; it was most fully embodied in the movement known as aestheticism in the late nineteenth century.

**Alienation:** The German dramatist Bertolt Brecht developed the theory of alienation in his epic theater. Brecht sought to create an audience that was intellectually alert rather than emotionally involved in a play by using alienating techniques such as minimizing the illusion of reality onstage and interrupting the action with songs and visual aids.

**Allegory:** A literary mode in which characters in a narrative personify abstract ideas or qualities and so give a second level of meaning to the work, in addition to the surface narrative. Two famous examples of allegory are Edmund Spenser's *The Faerie Queene* (1590, 1596) and John Bunyan's *The Pilgrim's Progress* (1678). For modern examples, see the stories and novels of Franz Kafka.

**Alliteration:** A poetic technique in which consonant repetition is focused at the beginning of syllables, as in "Large mannered motions of his mythy mind." Alliteration is used when the poet wishes to focus on the details of a sequence of words and to show the relationships between words in a line.

**Angry young men:** The term used to describe a group of English novelists and playwrights in the 1950's and 1960's, whose work stridently attacked what it saw as the outmoded political and social structures (particularly the class structure) of post-World War II Britain. John Osborne's play *Look Back in Anger* (pr. 1956, pb. 1957) and Kingsley Amis's *Lucky Jim* (1954) are typical examples.

**Angst:** A pervasive feeling of anxiety and depression often associated with the moral and spiritual uncertainties of the twentieth century, as

expressed in the existentialism of writers such as Jean-Paul Sartre and Albert Camus.

**Antagonist:** A character in fiction who stands in opposition or rivalry to the protagonist. In William Shakespeare's *Hamlet* (pr. c. 1600-1601, pb. 1603), for example, King Claudius is the antagonist of Hamlet.

**Anthropomorphism:** The ascription of human characteristics and feelings to animals, inanimate objects, or gods. The gods of Homer's epics are anthropomorphic, for example. Anthropomorphism occurs in beast fables, such as George Orwell's *Animal Farm* (1945). The term "pathetic fallacy" carries the same meaning: Natural objects are invested with human feelings. *See also* Pathetic fallacy.

**Antihero:** A modern fictional figure who tries to define himself and establish his or her own codes, or a protagonist who simply lacks traditional heroic qualities, such as Jim Dixon in Kingsley Amis's *Lucky Jim* (1954).

**Aphorism:** A short, concise statement that states an opinion, precept, or general truth, such as Alexander Pope's "Hope springs eternal in the human breast."

**Apostrophe:** A direct address to a person (usually absent), inanimate entity, or abstract quality.

**Archetype:** The term was used by psychologist Carl Jung to describe what he called "primordial images" that exist in the "collective unconscious" of humankind and are manifested in myths, religion, literature, and dreams. Now used broadly in literary criticism to refer to character types, motifs, images, symbols, and plot patterns recurring in many different literary forms and works. The embodiment of archetypes in a work of literature can make a powerful impression on the reader.

**Aristotelian unities:** A set of rules for proper dramatic construction formulated by Italian and French critics during the Renaissance, purported to be derived from the *De poetica* (c. 334-323 B.C.E.; *Poetics*, 1705) of Aristotle. According to the "three unities," a play should have no

scenes irrelevant to the main action, should not cover a period of more than twenty-four hours, and should not occur in more than one place or locale. In fact, Aristotle insists only on unity of action in a tragedy.

**Assonance:** A term for the association of words with identical vowel sounds but different consonants: “stars,” “arms,” and “park,” for example, all contain identical *a* (and *ar*) sounds.

**Auto sacramental:** A Renaissance development of the medieval open-air Corpus Christi pageant in Spain. A dramatic, allegorical depiction of a sinful soul wavering and transgressing until the intervention of Divine Grace restores order. During a period of prohibition of all secular drama in Spain, from 1598 to 1600, even Lope de Vega Carpio adopted this form.

**Autobiography:** A form of nonfiction writing in which the author narrates events of his or her own life. Autobiography differs from memoir in that the latter focuses on prominent people the author has known and great events that he or she has witnessed, rather than on his or her own life.

**Ballad:** Popular ballads are songs or verse that tell dramatic, usually impersonal, tales. Supernatural events, courage, and love are frequent themes, but any experience that appeals to ordinary people is acceptable material. Literary ballads—narrative poems based on the popular ballads—have frequently been in vogue in English literature, particularly during the Romantic period. One of the most famous is Samuel Taylor Coleridge’s *The Rime of the Ancient Mariner* (1798).

**Baroque:** The term was first used in the eighteenth century to describe an elaborate and grandiose type of architecture. It is now also used to refer to certain stylistic features of Metaphysical poetry, particularly the poetry of Richard Crashaw. The term can also refer to post-Renaissance literature, 1580-1680.

**Bildungsroman:** Sometimes called the “novel of education” or “apprenticeship novel,” the bildungsroman focuses on the growth of a young protagonist who is learning about the world and finding his or her place in life; a typical example is James Joyce’s *A Portrait of the Artist as a Young Man* (serial, 1914-1915; book, 1916).

**Blank verse:** A term for unrhymed iambic pentameter, blank verse first appeared in drama in Thomas Norton and Thomas Sackville’s *Gorboduc*, performed in 1561, and later became the standard form of Elizabethan drama. It has also commonly been used in long narrative or philosophical poems, such as John Milton’s *Paradise Lost* (1667, 1674).

**Bourgeois novel:** A novel in which the values, the preoccupations, and the accoutrements of middle-class or bourgeois life are given particular prominence. The heyday of the genre was the nineteenth century, when novelists as varied as Jane Austen, Honoré de Balzac, and Anthony Trollope both criticized and unreflectingly transmitted the assumptions of the rising middle class.

**Burlesque:** A work that, by imitating attitudes, styles, institutions, and people, aims to amuse. Burlesque differs from satire in that it aims to ridicule simply for the sake of amusement rather than for political or social change.

**Capa y espada:** Spanish for “cloak and sword,” a term referring to the Spanish theater of the sixteenth and seventeenth centuries dealing with love and intrigue among the aristocracy. The greatest practitioners were Lope de Vega Carpio and Pedro Calderón de la Barca. The term *comedia de ingenio* is also used.

**Catharsis:** A term from Aristotle’s *De poetica* (c. 334-323 B.C.E.; *Poetics*, 1705) referring to the purgation of the emotions of pity and fear in the spectator aroused by the actions of the tragic hero. The meaning and the operation of the concept have been a source of great, and unresolved, critical debate.

**Celtic romance:** Gaelic Celts invaded Ireland in about 350 B.C.E.; their epic stories and romances date from this period until about A.D. 450. The romances are marked by a strong sense of the Otherworld and of supernatural happenings. The Celtic romance tradition influenced the poetry of William Butler Yeats.

**Celtic Twilight:** Sometimes used synonymously with the term Irish Renaissance, which was a movement beginning in the late nineteenth century that attempted to build a national literature by drawing on Ireland’s literary and cultural history. The term, however, which is taken

from a book by William Butler Yeats titled *The Celtic Twilight* (1893), sometimes has a negative connotation. It is used to refer to some early volumes by Yeats, which have been called self-indulgent. The poet Algernon Charles Swinburne said that the Celtic Twilight manner “puts fever and fancy in the place of reason and imagination.”

**Chamber plays:** Refers to four plays written in 1907 by the Swedish dramatist August Strindberg. The plays are modeled on the form of chamber music, consisting of motif and variations, to evoke a mood or atmosphere (in these cases, a very somber one). There is no protagonist but a small group of equally important characters.

**Character:** A personage appearing in any literary or dramatic work. Characters can be presented with the depth and complexity of real people (sometimes called “round” characters) or as stylized functions of the plot (“flat” characters).

**Chorus:** Originally a group of singers and dancers in religious festivals, the chorus evolved into the dramatic element that reflected the opinions of the masses or commented on the action in Greek drama. In its most developed form, the chorus consisted of fifteen members: seven reciting the strophe, seven reciting the antistrophe, and the leader interacting with the actors. The chorus has been used in all periods of drama, including the modern period.

**Classicism:** A literary stance or value system consciously based on the example of classical Greek and Roman literature. While the term is applied to an enormous diversity of artists in many different periods and in many different national literatures, it generally denotes a cluster of values including formal discipline, restrained expression, reverence of tradition, and an objective, rather than subjective, orientation. Often contrasted with Romanticism. *See also* Romanticism.

**Comédie-Française:** The first state theater of France, composed of the company of actors established by Molière in 1658. The company took the name Comédie-Française in 1680. Today, it is officially known as the Théâtre Français (Salle Richelieu).

**Comedy:** Generally, a lighter form of drama (as contrasted with tragedy) that aims chiefly to amuse and ends happily. The comic effect typi-

cally arises from the recognition of some incongruity of speech, action, or character development. The comic range extends from coarse, physical humor (called low comedy) to a more subtle, intellectual humor (called high comedy).

**Comedy of manners:** A form of comedy that arose during the seventeenth century, dealing with the intrigues (particularly the amorous intrigues) of sophisticated, witty members of the upper classes. The appeal of these plays is primarily intellectual, depending on quick-witted dialogue and clever language. For examples, see the plays of Restoration dramatists William Congreve, Sir George Etherege, and William Wycherley. *See also* Restoration comedy/drama.

**Commedia dell'arte:** Dramatic comedy performed by troupes of professional actors that became popular in the mid-sixteenth century in Italy. The troupes were rather small, consisting of perhaps a dozen actors who performed stock roles in mask and improvised on skeletal scenarios. The tradition of the *commedia*, or masked comedy, was influential into the seventeenth century and still exerts some influence.

**Conceit:** A type of metaphor, the conceit is used for comparisons that are highly intellectualized. When T. S. Eliot, for example, says that winding streets are like a tedious argument of insidious intent, there is no clear connection between the two, so the reader must apply abstract logic to fill in the missing links.

**Conversation poem:** Conversation poems are chiefly associated with the poetry of Samuel Taylor Coleridge. These poems all display a relaxed, informal style, quiet settings, and a circular structure—the poem returns to where it began, after an intervening meditation has yielded some insight into the speaker’s situation.

**Cubism:** A term borrowed from Cubist painters. In literature, cubism is a style of poetry, such as that of E. E. Cummings, Kenneth Rexroth, and Archibald MacLeish, which first fragments an experience, then rearranges its elements into some new artistic entity.

**Dactyl:** The dactylic foot, or dactyl, is formed of a stress followed by two unstressed syllables, as in the words “Washington” and “manikin.” “After the pangs of a desperate lover” is an example of a dactylic line.

**Dadaism:** Dadaism arose in France during World War I as a radical protest in art and literature against traditional institutions and values. Part of its strategy was the use of infantile, nonsensical language. After World War I, when Dadaism was combined with the ideas of Sigmund Freud, it gave rise to the Surrealist movement.

**Decadence:** The period of decline that heralds the ending of a great age. The period in English dramatic history immediately following William Shakespeare is said to be decadent, and the term “Decadents” is applied to a group of late-nineteenth and early twentieth century writers who searched for new literary and artistic forms as the Victorian Age came to a close.

**Detective story:** The “classic” detective story (or “mystery”) is a highly formalized and logically structured mode of fiction in which the focus is on a crime solved by a detective through interpretation of evidence and clever reasoning. Many modern practitioners of the genre, however, such as Raymond Chandler, Patricia Highsmith, and Ross Macdonald, have placed less emphasis on the puzzlelike qualities of the detective story and have focused instead on characterization, theme, and other elements of mainstream fiction. The form was first developed in short fiction by Edgar Allan Poe; Jorge Luis Borges has also used the convention in short stories.

**Dialectic:** A philosophical term meaning the art of examining opinions or ideas logically. The dialectic method of Georg Wilhelm Friedrich Hegel and Karl Marx was based on a contradiction of opposites (thesis and antithesis) and their resolution (synthesis). In literary criticism, the term has sometimes been used by Marxist critics to refer to the structure and dynamics of a literary work in its sociological context.

**Dialogue:** Speech exchanged between characters, or even, in a looser sense, the thoughts of a single character. Dialogue serves to characterize, to further the plot, to establish conflict, and to express thematic ideas.

**Doppelgänger:** A double or counterpart of a person, sometimes endowed with ghostly qualities. A fictional doppelgänger often reflects a suppressed side of his or her personality, as in Fyodor Dostoevski’s novella *Dvoynik* (1846; *The Double*, 1917) and the short stories of E. T. A.

Hoffmann. Isaac Bashevis Singer and Jorge Luis Borges, among other modern writers, have also employed the doppelgänger with striking effect.

**Drama:** Generally speaking, any work designed to be represented on a stage by actors (Aristotle defined drama as “the imitation of an action”). More specifically, the term has come to signify a play of a serious nature and intent that may end either happily (comedy) or unhappily (tragedy).

**Dramatic irony:** A situation in a play or a narrative in which the audience knows something that the character does not. The irony lies in the different meaning that the character’s words or actions have for himself or herself and for the audience. A common device in classical Greek drama. Sophocles’ *Oidipous Tyrannos* (429 B.C.E.; *Oedipus Tyrannus*, 1715) is an example of extended dramatic irony.

**Dramatic monologue:** In dramatic monologue, the narrator addresses a persona who never speaks but whose presence greatly influences what the narrator tells the reader. The principal reason for writing in dramatic monologue is to control the speech of the major persona by the implied reaction of the silent one. The effect is one of continuing change and often surprise. The technique is especially useful for revealing characters slowly and for involving the reader as another silent participant.

**Dramatic verse:** Poetry that employs dramatic form or technique, such as dialogue or conflict, to achieve its effects. The term is used to refer to dramatic monologue, drama written in verse, and closet dramas.

**Dramatis personae:** The characters in a play. Often, a printed listing defining the characters and specifying their relationships.

**Dream vision:** An allegorical form common in the Middle Ages, in which the narrator or a character falls asleep and dreams a dream that becomes the actual framed story.

**Dystopian/utopian novel:** A dystopian novel takes some existing trend or theory in present-day society and extends it into a fictional world of the future, where the trend has become more fully manifested, with unpleasant results. Aldous Huxley’s *Brave New World* (1932) is an example. The utopian novel is the opposite: It presents an ideal society. The first utopian novel was Sir Thomas More’s *Utopia* (1516).

**Elegy:** A long, rhymed, formal poem whose subject is meditation upon death or a lamentable theme. The pastoral elegy uses a pastoral scene to express grief at the loss of a friend or important person. *See also* Pastoral.

**Elizabethan Age:** Of or referring to the reign of Queen Elizabeth I of England, lasting from 1558 to 1603, a period of important developments and achievements in the arts in England, particularly in poetry and drama. The era included such literary figures as Edmund Spenser, Christopher Marlowe, William Shakespeare, and Ben Jonson. Sometimes referred to as the English Renaissance.

**English novel:** The first fully realized English novel was Samuel Richardson's *Pamela* (1740-1741). The genre took firm hold in the second half of the eighteenth century, with the work of Daniel Defoe, Henry Fielding, and Tobias Smollett, and reached its full flowering in the nineteenth century, in which great novelists such as Jane Austen, Charles Dickens, William Makepeace Thackeray, Anthony Trollope, Thomas Hardy, and George Eliot produced sweeping portraits of the whole range of English life in the period.

**Enlightenment:** A period in Western European cultural history that began in the seventeenth century and culminated in the eighteenth. The chief characteristic of Enlightenment thinkers was their belief in the virtue of human reason, which they believed was banishing former superstitious and ignorant ways and leading to an ideal condition of human life. The Enlightenment coincides with the rise of the scientific method.

**Epic:** Although this term usually refers to a long narrative poem that presents the exploits of a central figure of high position, the term is also used to designate a long novel that has the style or structure usually associated with an epic. In this sense, for example, Herman Melville's *Moby Dick* (1851) and James Joyce's *Ulysses* (1922) may be called epics.

**Epigram:** Originally meaning an inscription, an epigram is a short, pointed poem, often expressing humor and satire. In English literature, the form flourished from the Renaissance through the eighteenth century in the work of poets such as John Donne, Ben Jonson, and Alexander Pope. The term also refers to a concise and

witty expression in prose, as in the plays of Oscar Wilde.

**Epiphany:** Literally, an epiphany is an appearance of a god or supernatural being. The term is used in literary criticism to signify any moment of heightened awareness, or flash of transcendental insight, when an ordinary object or scene is suddenly transformed into something that possesses eternal significance. Especially noteworthy examples are found in the works of James Joyce.

**Epistle:** The word means "letter," but epistle is used to refer to a literary form rather than a private composition, usually written in dignified style and addressed to a group. The most famous examples are the epistles in the New Testament.

**Epistolary novel:** A work of fiction in which the narrative is carried forward by means of letters written by the characters. Epistolary novels were especially popular in the eighteenth century. Examples include Samuel Richardson's *Pamela* (1740-1741) and *Clarissa* (1747-1748).

**Epithet:** An adjective or adjectival phrase that expresses a special characteristic of a person or thing. "Hideous night," "devouring time," and "sweet silent thought" are epithets that appear in William Shakespeare's sonnets.

**Essay:** A brief prose work, usually on a single topic, that expresses the personal point of view of the author. The essay is usually addressed to a general audience and attempts to persuade the reader to accept the author's ideas.

**Everyman:** The central character in the work by the same name, the most famous of the English medieval morality plays. It tells of how Everyman is summoned by Death and of the parts played in his journey by characters named Fellowship, Cousin, Kindred, Goods, Knowledge, Confession, Beauty, Strength, Discretion, Five Wits, and Good Deeds. *Everyman* has proved lastingly popular; there have been many productions even in the twentieth century. More generally, the term means the typical, ordinary person.

**Existentialism:** A philosophy or attitude of mind that has gained wide currency in religious and artistic thought since the end of World War II. Typical concerns of existential writers are humankind's estrangement from society, its awareness that the world is meaningless, and its recog-

nition that one must turn from external props to the self. The works of Jean-Paul Sartre and Franz Kafka provide examples of existentialist beliefs.

**Experimental novel:** The term is associated with novelists such as Dorothy Richardson, Virginia Woolf, and James Joyce, who experimented with the form of the novel, using in particular the stream-of-consciousness technique.

**Expressionism:** Beginning in German theater at the start of the twentieth century, expressionism became the dominant movement in the decade following World War I. It abandoned realism and relied on a conscious distortion of external reality in order to portray the world as it is “viewed emotionally.” The movement spread to fiction and poetry. Expressionism influenced the novels of Franz Kafka and James Joyce.

**Fable:** One of the oldest narrative forms, usually taking the form of an analogy in which animals or inanimate objects speak to illustrate a moral lesson. The most famous examples are the fables of Aesop, who used the form orally in 600 B.C.E.

**Fabliau:** A short narrative poem, popular in medieval French literature and during the English Middle Ages. Fabliaux were usually realistic in subject matter and bawdy; they made a point of satirizing the weaknesses and foibles of human beings. Perhaps the most famous are Geoffrey Chaucer’s “The Miller’s Tale” and “The Reeve’s Tale.”

**Fairy tale:** A form of folktale in which supernatural events or characters are prominent. Fairy tales usually depict a realm of reality beyond that of the natural world in which the laws of the natural world are suspended.

**Fantasy:** A literary form that makes a deliberate break with reality. Fantasy literature may use supernatural or fairy-tale events in which the ordinary commonsense laws of the everyday world do not operate. The setting may be unreal. J. R. R. Tolkien’s fantasy trilogy, *The Lord of the Rings* (1955), is one of the best-known examples of the genre.

**Farce:** From the Latin *farcire*, meaning “to stuff.” Originally an insertion into established Church liturgy in the Middle Ages, farce later became the term for specifically comic scenes inserted

into early liturgical drama. The term has come to refer to any play that evokes laughter by such low-comedy devices as physical humor, rough wit, and ridiculous and improbable situations and characters.

**Femme fatale:** The “fatal woman” is an archetype that appears in myth, folklore, religion, and literature. Often she is presented as a temptress or a witch who ensnares, and attempts to destroy, her male victim. A very common figure in Romanticism, the fatal woman often appears in twentieth century American literature.

**Figurative language:** Any use of language that departs from the usual or ordinary meaning to gain a poetic or otherwise special effect. Figurative language embodies various figures of speech, such as irony, metaphor, and simile.

**First person:** A point of view in which the narrator of a story or poem addresses the reader directly, often using the pronoun “I,” thereby allowing the reader direct access to the narrator’s thoughts.

**Folklore:** The traditions, customs, and beliefs of a people expressed in nonliterary form. Folklore includes myths, legends, fairy tales, riddles, proverbs, charms, spells, and ballads and is usually transmitted through word of mouth. Many literary works contain motifs that can be traced to folklore.

**Foreshadowing:** A device used to create suspense or dramatic irony by indicating through suggestion what will take place in the future. The aim is to prepare the reader for the action that follows.

**Frame story:** A story that provides a framework for another story (or stories) told within it. The form is ancient and is used by Geoffrey Chaucer in *The Canterbury Tales* (1387-1400). In modern literature, the technique has been used by Henry James in *The Turn of the Screw* (1898), Joseph Conrad in *Heart of Darkness* (serial, 1899; book, 1902), and John Barth in *Lost in the Funhouse* (1968).

**Free verse:** Verse that does not conform to any traditional convention, such as meter, rhyme, or form. All poetry must have some pattern of some kind, however, and there is rhythm in free verse, but it does not follow the strict rules of meter. Often the pattern relies on repetition and parallel construction.

**Genre:** A type or category of literature, such as tragedy, novel, memoir, poem, or essay; a genre has a particular set of conventions and expectations.

**German Romanticism:** Germany was the first European country in which the Romantic movement took firm grip. Poets Novalis and Ludwig Tieck, philosopher Friedrich Wilhelm Joseph Schelling, and literary theorists Friedrich and August Wilhelm Schlegel were well established in Jena from about 1797, and they were followed, in the second decade of the nineteenth century, by the Heidelberg group, including novelist and short-story writer E. T. A. Hoffmann and poet Heinrich Heine.

**Gnomic:** Aphoristic poetry, such as the wisdom literature of the Bible, which deals with ethical questions. The term “gnomic poets” is applied to a group of Greek poets of the sixth and seventh centuries B.C.E.

**Gothic novel:** A form of fiction developed in the late eighteenth century that focuses on horror and the supernatural. An example is Mary Shelley’s *Frankenstein* (1818). In modern literature, the gothic genre can be found in the fiction of Truman Capote.

**Grand Tour:** Fashionable during the eighteenth century in England, the Grand Tour was a two- to three-year journey through Europe during which the young aristocracy and prosperous, educated middle classes of England deepened their knowledge of the origins and centers of Western civilization. The tour took a standard route; Rome and Naples were usually considered the highlights.

**Grotesque:** Characterized by a breakup of the everyday world by mysterious forces, the form differs from fantasy in that the reader is not sure whether to react with humor or with horror. Examples include the stories of E. T. A. Hoffmann and Franz Kafka.

**Hagiography:** Strictly defined, hagiography refers to the lives of the saints (the Greek word *hagios* means “sacred”), but the term is also used in a more popular sense to describe any biography that grossly overpraises its subject and ignores his or her faults.

**Heroic couplet:** A pair of rhyming iambic pentameter lines traditionally used in epic poetry; a he-

roic couplet often serves as a self-contained witicism or pithy observation.

**Historical fiction:** A novel that depicts past historical events, usually public in nature, and that features real, as well as fictional, people. Sir Walter Scott’s *Waverley* novels established the basic type, but the relationship between fiction and history in the form varies greatly depending on the practitioner.

**Hubris:** Greek term for “insolence” or “pride,” the characteristic or emotion in the tragic hero of ancient Greek drama that causes the reversal of his fortune, leading him to transgress moral codes or ignore warnings.

**Humanism:** A human-centered, rather than God-centered, view of the universe. In the Renaissance, Humanism devoted itself to the revival of classical culture. A reaction against medieval Scholasticism, Humanism oriented itself toward secular concerns and applied classical ideas to theology, government, literature, and education. In literature, the main virtues were seen to be restraint, form, and imitation of the classics. *See also* Renaissance.

**Iambic pentameter:** A metrical line consisting of five feet, each foot consisting of one unstressed syllable followed by one stressed syllable: “So long as men can breathe or eyes can see.” Iambic pentameter is one of the commonest forms of English poetry.

**Imagery:** Often defined as the verbal stimulation of sensory perception. Although the word betrays a visual bias, imagery, in fact, calls on all five senses. In its simplest form, imagery re-creates a physical sensation in a clear, literal manner; it becomes more complex when a poet employs metaphor and other figures of speech to re-create experience.

**Impressionism:** A late nineteenth century movement composed of a group of painters including Paul Cézanne, Edouard Manet, Claude Monet, and Pierre-Auguste Renoir, who aimed in their work to suggest the impression made on the artist by a scene rather than to reproduce it objectively. The term has also been applied to French Symbolist poets such as Paul Verlaine and Stéphane Mallarmé, and to writers who use the stream-of-consciousness technique, such as James Joyce and Virginia Woolf.

**Irony:** Recognition of the difference between real and apparent meaning. Verbal irony is a rhetorical trope wherein *x* is uttered and “not *x*” is meant. In the New Criticism, irony, the poet’s recognition of incongruities, was thought to be the master trope in that it was essential to the production of paradox, complexity, and ambiguity.

**Jacobean:** Of or pertaining to the reign of James I of England, who ruled from 1603 to 1623, the period immediately following the death of Elizabeth I, which saw tremendous literary activity in poetry and drama. Many writers who achieved fame during the Elizabethan Age, such as William Shakespeare, Ben Jonson, and John Donne, were still active. Other dramatists, such as John Webster and Cyril Tourneur, achieved success almost entirely during the Jacobean era.

**Jungian psychoanalysis:** Refers to the analytical psychology of the Swiss psychiatrist Carl Jung. Jung’s significance for literature is that, through his concept of the collective unconscious, he identified many archetypes and archetypal patterns that recur in myth, fairy tale, and literature and are also experienced in dreams.

**Kafkaesque:** Refers to any grotesque or nightmare world in which an isolated individual, surrounded by an unfeeling and alien world, feels caught up in an endless maze that is dragging him or her down to destruction. The term is a reference to the works of Czech novelist and short-story writer Franz Kafka.

**Leitmotif:** From the German, meaning “leading motif.” Any repetition—of a word, phrase, situation, or idea—that occurs within a single work or group of related works.

**Limerick:** A comic five-line poem employing an anapestic base and rhyming *aabba*, in which the third and fourth lines are shorter (usually five syllables each) than the first, second, and last lines, which are usually eight syllables each.

**Linear plot:** A plot that has unity of action and proceeds from beginning to middle to end without flashbacks or subplots, thus satisfying Aristotle’s criterion that a plot should be a continuous sequence.

**Literary criticism:** The study and evaluation of works of literature. Theoretical criticism sets

forth general principles for interpretation. Practical criticism offers interpretations of particular works or authors.

**Lyric poetry:** Lyric poetry developed when music was accompanied by words. Although the “lyrics” were later separated from the music, the characteristics of lyric poetry have been shaped by the constraints of music. Lyric poems are short, more adaptable to metrical variation, and usually personal compared with the cultural functions of narrative poetry. Lyric poetry sings of the self; it explores deeply personal feelings about life.

**Magical Realism:** Imaginary or fantastic scenes and occurrences presented in a meticulously realistic style. The term has been applied to the fiction of Gabriel García Márquez, Jorge Luis Borges, Günter Grass, John Fowles, and Salman Rushdie.

**Masque:** A courtly entertainment popular during the first half of the seventeenth century in England. It was a sumptuous spectacle including music, dance, and lavish costumes and scenery. Masques often dealt with mythological or pastoral subjects, and the dramatic action often took second place to pure spectacle.

**Melodrama:** Originally a drama with music (*melos* is Greek for “song”). By the early nineteenth century, it had come to mean a play in which characters are clearly either virtuous or evil and are pitted against one another in suspenseful, often sensational situations. The term took on a pejorative meaning, which it retains: any dramatic work characterized by stereotyped characters and sensational, improbable situations.

**Metafiction:** Refers to fiction that manifests a reflexive tendency, such as Vladimir Nabokov’s *Pale Fire* (1962) and John Fowles’s *The French Lieutenant’s Woman* (1969). The emphasis is on the loosening of the work’s illusion of reality to expose the reality of its illusion. Such terms as “irrealism,” “postmodernist fiction,” and “antifiction” are also used to refer to this type of fiction. *See also* Postmodernism.

**Metaphor:** A figure of speech in which two dissimilar objects are imaginatively identified (rather than merely compared) on the assumption that they share one or more qualities. The term is often used in modern criticism in a wider sense

to identify analogies of all kinds in literature, painting, and film.

**Metaphysical poetry:** A type of poetry that stresses the intellectual over the emotional; it is marked by irony, paradox, and striking comparisons of dissimilar things, the latter frequently being far-fetched to the point of eccentricity. Usually used to designate a group of seventeenth century English poets, including John Donne, George Herbert, Andrew Marvell, and Thomas Traherne.

**Meter:** Meter is the pattern of language when it is forced into a line of poetry. All language has rhythm, but when that rhythm is organized and regulated in the line in order to affect the meaning and emotional response to the words, then the rhythm has been refined into meter. The meter is determined by the number of syllables in a line and by the relationship between them.

**Mock epic:** A literary form that burlesques the epic by taking a trivial subject and treating it in a grand style, using all the conventions of epic, such as invocation to the deity, long and boastful speeches of the heroes, and supernatural machinery. Alexander Pope's *The Rape of the Lock* (1712, 1714) is probably the finest example in English literature. The term is synonymous with "mock heroic." *See also* Mock hero.

**Mock hero:** The hero of a mock epic. *See also* Mock epic.

**Modernism:** A term used to describe the characteristic aspects of literature and art between World War I and World War II. Influenced by Friedrich Nietzsche, Karl Marx, and Sigmund Freud, modernism embodied a lack of faith in Western civilization and culture. In poetry, fragmentation, discontinuity, and irony were common; in fiction, chronological disruption, linguistic innovation, and the stream-of-consciousness technique; in theater, expressionism and Surrealism.

**Morality play:** A dramatic form in the late Middle Ages and the Renaissance containing allegorical figures (most often virtues and vices) that are typically involved in the struggle over a person's soul. The anonymously written *Everyman* (1508) is one of the most famous medieval examples of this form.

**Motif:** An incident, situation, or device that occurs frequently in literature. Motif can also refer to particular words, images, and phrases that are

repeated frequently in a single work. In this sense, motif is the same as leitmotif. Motif is similar to theme, although the latter is usually more abstract.

**Myth:** An anonymous traditional story, often involving supernatural beings or the interaction between gods and humans, and dealing with the basic questions of how the world and human society came to be. Myth is an important term in contemporary literary criticism. The critic Northrop Frye, for example, has said that "the typical forms of myth become the conventions and genres of literature." He means that the genres of comedy, romance, tragedy, and irony (satire) correspond to seasonal myths of spring, summer, autumn, and winter.

**Narrative:** An account in prose or verse of an event or series of events, whether real or imagined.

**Narrator:** The character who recounts the narrative. There are many different types of narrator. The first-person narrator is a character in the story and can be recognized by the use of "I"; third-person narrators may be limited or omniscient. In the former, the narrator confines himself or herself to knowledge of the minds and emotions of one or at most a few characters. In the latter, the narrator knows everything, seeing into the minds of all the characters. Rarely, second-person narration may be used (an example can be found in Edna O'Brien's *A Pagan Place*, published in 1970).

**Naturalism:** The application of the principles of scientific determinism to fiction. Although it usually refers more to the choice of subject matter than to technical conventions, conventions associated with the movement center on the author's attempt to be precise and objective in description and detail, regardless of whether the events described are sordid or shocking. Naturalism flourished in England, France, and America in the late nineteenth and early twentieth centuries.

**Neoclassicism:** A term used to describe the classicism that dominated English literature from the Restoration to the late eighteenth century. Modeling itself on the literature of ancient Greece and Rome, neoclassicism exalted the virtues of proportion, unity, harmony, grace, decorum, taste, manners, and restraint. It valued

realism and reason over imagination and emotion. *See also* Rationalism, Realism.

**Neorealism:** A movement in modern Italian literature, extending from about 1930 to 1955. Neorealism was shaped by opposition to Fascism, and by World War II and the Resistance. Neo-realist literature therefore exhibited a strong concern with social issues and was marked by pessimism regarding the human condition. Its practitioners sought to overcome the gap between literature and the masses, and its subject matter was frequently drawn from lower-class life. Neo-realism is associated preeminently with the work of Italo Calvino.

**Nonsense literature/verse:** Nonsense verse, such as that written by Edward Lear and Lewis Carroll, makes use of invented words that have no meaning, portmanteau words, and so-called macaroni verse, in which words from different languages are mingled. The verse holds attention because of its strong rhythms, appealing sounds, and, occasionally, the mysterious atmosphere that it creates.

**Novel of education:** *See* Bildungsroman.

**Novel of ideas:** A novel in which the characters, plot, and dialogue serve to develop some controlling idea or to present the clash of ideas. Aldous Huxley's *Eyeless in Gaza* (1936) is a good example.

**Novel of manners:** The classic example of the form might be the novels of Jane Austen, wherein the customs and conventions of a social group of a particular time and place are realistically, and often satirically, portrayed.

**Novella:** An Italian term meaning "a little new thing" that now refers to that form of fiction longer than a short story and shorter than a novel.

**Objective correlative:** A key concept in modern formalist criticism, coined by T. S. Eliot in *The Sacred Wood* (1920). An objective correlative is a situation, an event, or an object that, when presented or described in a literary work, expresses a particular emotion and serves as a precise formula by which the same emotion can be evoked in the reader.

**Ode:** The ode is a lyric poem that treats a unified subject with elevated emotion, usually ending with a satisfactory resolution. There is no set form for the ode, but it must be long enough to build intense emotional response. Often the

ode will address itself to some omnipotent source and will assume a spiritual hue.

**Oxford Movement:** A reform movement in the Church of England that began in 1833, led by John Henry (later Cardinal) Newman. The Oxford Movement aimed to combat liberalism and the decline of the role of faith in the Church and to restore it to its former ideals. It was attacked for advocating what some saw as Catholic doctrines; as a result, Newman left the Church of England and became a Roman Catholic in 1845.

**Panegyric:** A formal speech or writing in praise of a particular person or achievement; a eulogy. The form dates back to classical times; the term is now often used in a derogatory sense.

**Parable:** A short, simple, and usually allegorical story that teaches a moral lesson. In the West, the most famous parables are those told in the Gospels by Christ.

**Parody:** A literary work that imitates or burlesques another work or author, for the purpose of ridicule. Twentieth century parodists include E. B. White and James Thurber.

**Pastoral:** The term derives from the Latin "pastor," meaning "shepherd." Pastoral is a literary mode that depicts the country life in an idealized way; it originated in classical literature and was a popular form in English literature from 1550 to 1750. Notable pastoral poems include John Milton's "Lycidas" (1638) and Percy Bysshe Shelley's *Adonais* (1821).

**Pathetic fallacy:** The ascribing of human characteristics or feelings to inanimate objects. The term was coined by John Ruskin in 1856, who disapproved of it, but it is now used without any pejorative sense.

**Persona:** *Persona* means literally "mask": It is the self created by the author and through whom the narrative is told. The persona is not to be identified with the author, even when the two may seem to resemble each other. The narrative persona in Lord Byron's *Don Juan* (1819-1824, 1826), for example, may express many sentiments of which Byron would have approved, but he is nonetheless a fictional creation who is distinct from the author.

**Personification:** A figure of speech that ascribes human qualities to abstractions or inanimate objects.

**Petrarchan sonnet:** Named after Petrarch, a fourteenth century Italian poet who perfected the form, which is also known as the Italian sonnet. It is divided into an octave, in which the subject matter, which may be a problem, a doubt, a reflection, or some other issue, is raised and elaborated, and a sestet, in which the problem is resolved. The rhyme scheme is usually *abba abba cde cde*, *cd cdc cdc*, or *cde dce*.

**Philosophical dualism:** A theory that the universe is explicable in terms of two basic, conflicting entities, such as good and evil, mind and matter, or the physical and the spiritual.

**Picaresque:** A form of fiction that revolves around a central rogue figure, or picaro, who usually tells his own story. The plot structure of a picaresque novel is usually episodic, and the episodes usually focus on how the picaro lives by his wits. The classic example is Henry Fielding's *The History of Tom Jones, a Foundling* (1749).

**Pindaric ode:** An ode that imitates the form of those composed by the ancient Greek poet Pindar. A Pindaric ode consists of a strophe, followed by an antistrophe of the same structure, followed by an epode. This pattern may be repeated several times in the ode. In English poetry, Thomas Gray's "The Bard" is an example of a Pindaric ode.

**Play:** A literary work that is written to be performed by actors who speak the dialogue, impersonate the characters, and perform the appropriate actions. Usually, a play is performed on a stage, and an audience witnesses it.

**Play-within-the-play:** A play or dramatic fragment performed as a scene or scenes within a larger drama, typically performed or viewed by the characters of the larger drama.

**Plot:** Plot refers to how the author arranges the material not only to create the sequence of events in a play or story but also to suggest how those events are connected in a cause-and-effect relationship. There are a great variety of plot patterns, each of which is designed to create a particular effect.

**Poem:** A unified composition that uses the rhythms and sounds of language, as well as devices such as metaphor, to communicate emotions and experiences to the reader.

**Poet laureate:** In England, the official poet, appointed for life by the English sovereign and ex-

pected to compose poems for various public occasions. The first official laureate was John Dryden in the seventeenth century. In the eighteenth century, the laureateship was given to a succession of mediocrities, but since the appointment of William Wordsworth in 1843, the office has generally been regarded as a substantial honor.

**Polemic:** A work that forcefully argues an opinion, usually on a controversial religious, political, or economic issue, in opposition to other opinions. John Milton's *Areopagitica* (1644) is one of the best-known examples in English literature.

**Postmodernism:** The term is loosely applied to various artistic movements that have succeeded modernism, particularly since 1965. Postmodernist literature is experimental in form and reflects a fragmented world in which order and meaning are absent.

**Pre-Raphaelitism:** Refers to a group of nineteenth century English painters and writers, including Dante Gabriel Rossetti, Christina Rossetti, and William Morris. The Pre-Raphaelites were so called because they rebelled against conventional methods of painting and wanted to revert to what they regarded as the simple spirit of painting that existed before Raphael, particularly in its adherence to nature; they rejected all artificial embellishments. Pre-Raphaelite poetry made much use of symbolism and sensuousness and showed an interest in the medieval and the supernatural.

**Prose poem:** A type of poem ranging in length from a few lines to three or four pages; most occupy a page or less. The distinguishing feature of the prose poem is its typography: It appears on the page like prose, with no line breaks. Many prose poems employ rhythmic repetition and other poetic devices not found in prose, but others do not; there is enormous variety in the genre.

**Protagonist:** Originally, in the Greek drama, the "first actor," who played the leading role. The term has come to signify the most important character in a drama or story. It is not unusual for there to be more than one protagonist in a work.

**Proverb:** A wise and pithy saying, authorship unknown, that reflects some observation about

life. Proverbs are usually passed on through word of mouth, although they may also be written, as for example, the Book of Proverbs in the Bible.

**Psychological novel:** Once described as an interpretation of “the invisible life,” the psychological novel is a form of fiction in which character, especially the inner life of characters, is the primary focus, rather than action. The form has characterized much of the work of Henry James, James Joyce, Virginia Woolf, and William Faulkner. *See also* Psychological realism.

**Psychological realism:** A type of realism that tries to reproduce the complex psychological motivations behind human behavior; writers in the late nineteenth century and early twentieth century were particularly influenced by Sigmund Freud’s theories. *See also* Psychological novel.

**Pun:** A pun occurs when words with similar pronunciations have entirely different meanings. The result may be a surprise recognition of an unusual or striking connection, or, more often, a humorously accidental connection.

**Quest:** An archetypal theme identified by mythologist Joseph Campbell and found in many literary works. Campbell describes the heroic quest in three fundamental stages: departure (leaving the familiar world), initiation (encountering adventures and obstacles), and return (bringing home a boon to transform society).

**Rabelaisian:** The term is a reference to the sixteenth century French satirist and humorist François Rabelais. “Rabelaisian” is now used to refer to any humorous or satirical writing that is bawdy, coarse, or very down-to-earth.

**Rationalism:** A system of thought that seeks truth through the exercise of reason rather than by means of emotional response or revelation, or traditional authority. In literature, rationalism is associated with eighteenth century neoclassicism. *See also* Neoclassicism.

**Realism:** A literary technique in which the primary convention is to render an illusion of fidelity to external reality. Realism is often identified as the primary method of the novel form; the realist movement in the late nineteenth century coincided with the full development of the novel form.

**Renaissance:** The term means “rebirth” and refers to a period in European cultural history from the fourteenth to the early seventeenth century, although dates differ widely from country to country. The Renaissance produced an unprecedented flowering of the arts of painting, sculpture, architecture, and literature. The period is often said to mark the transition from the Middle Ages to the modern world. The questing, individualistic spirit that characterized the age was stimulated by an increase in classical learning by scholars known as Humanists; by the Protestant Reformation; by the development of printing, which created a wide market for books; by new theories of astronomy; and by the development of other sciences that saw natural laws at work where the Middle Ages had seen occult forces. *See also* Humanism.

**Restoration comedy/drama:** The restoration of the Stuart dynasty brought Charles II to the English throne in 1660. In literature, the Restoration period extends from 1660 to 1700. Restoration comedy is a comedy of manners, which centers around complicated plots full of the amorous intrigues of the fashionable upper classes. The humor is witty, but the view of human nature is cynical. Restoration dramatists include William Congreve, Sir George Etherege, and William Wycherley. In serious, or heroic, drama, the leading playwright was John Dryden. *See also* Comedy of manners.

**Roman à clef:** A fiction wherein actual persons, often celebrities of some sort, are thinly disguised. Lady Caroline Lamb’s *Glenarvon* (1816), for example, contains a thinly veiled portrait of Lord Byron, and the character Mark Rampion in Aldous Huxley’s *Point Counter Point* (1928) strongly resembles D. H. Lawrence.

**Romance:** Originally, any work written in Old French. In the Middle Ages, romances were about knights and their adventures. In modern times, the term has also been used to describe a type of prose fiction in which, unlike the novel, realism plays little part. Prose romances often give expression to the quest for transcendent truths.

**Romanticism:** A movement of the late eighteenth century and the nineteenth century that exalted individualism over collectivism, revolution over conservatism, innovation over tradition,

imagination over reason, and spontaneity over restraint. Romanticism regarded art as self-expression; it strove to heal the cleavage between object and subject and expressed a longing for the infinite in all things. It stressed the innate goodness of human beings and the evils of the institutions that would stultify human creativity. The major English Romantic poets are William Blake, Lord Byron, Samuel Taylor Coleridge, John Keats, Percy Bysshe Shelley, and William Wordsworth.

**Satire:** A form of literature that employs the comedic devices of wit, irony, and exaggeration to expose, ridicule, and condemn human folly, vice, and stupidity. Justifying satire, Alexander Pope wrote that “nothing moves strongly but satire, and those who are ashamed of nothing else are so of being ridiculous.”

**Scene:** A division of action within an act; some plays are divided only into scenes instead of acts. Sometimes, scene division indicates a change of setting or locale; sometimes, it simply indicates the entrances and exits of characters.

**Science fiction:** Fiction in which real or imagined scientific developments or certain givens (such as physical laws, psychological principles, or social conditions) form the basis of an imaginative projection, frequently into the future. Classic examples are the works of H. G. Wells and Jules Verne.

**Sentimental novel:** A form of fiction popular in the eighteenth century in which emotionalism and optimism are the primary characteristics. The best-known examples are Samuel Richardson’s *Pamela* (1740-1741) and Oliver Goldsmith’s *The Vicar of Wakefield* (1766).

**Shakespearean sonnet:** So named because William Shakespeare was the greatest of English sonneteers, whose ranks also included the earl of Surrey and Thomas Wyatt. The Shakespearean sonnet consists of three quatrains and a concluding couplet, rhyming *abab cdcd efef gg*. The beginning of the third quatrain marks a turn in the argument.

**Short story:** A concise work of fiction, shorter than a novella, that is usually more concerned with mood, effect, or a single event than with plot or extensive characterization.

**Simile:** A type of metaphor in which two things are compared. It can usually be recognized by

the use of the words “like,” “as,” “appears,” or “seems.”

**Skaz:** A term used in Russian criticism to describe a narrative technique that presents an oral narrative of a lowbrow speaker.

**Soliloquy:** An extended speech delivered by a character alone on stage, unheard by other characters. Soliloquy is a form of monologue, and it typically reveals the intimate thoughts and emotions of the speaker.

**Song:** A lyric poem, usually short, simple, and with rhymed stanzas, set to music.

**Sonnet:** A traditional poetic form that is almost always composed of fourteen lines of rhymed iambic pentameter; a turning point usually divides the poem into two parts, with the first part (octave) presenting a situation and the second part (sestet) reflecting on it. The main sonnet forms are the Petrarchan sonnet and the English (sometimes called Shakespearean) sonnet.

**Stanza:** When lines of poetry are meant to be taken as a unit, and the unit recurs throughout the poem, that unit is called a stanza; a four-line unit, a quatrain, is one common stanza. Others include couplet, *ottava rima*, and the Spenserian stanza.

**Story line:** The story line of a work of fiction differs from the plot. Story is merely the events that happen; plot is how those events are arranged by the author to suggest a cause-and-effect relationship. *See also* Plot.

**Stream of consciousness:** A narrative technique used in modern fiction by which an author tries to embody the total range of consciousness of a character, without any authorial comment or explanation. Sensations, thoughts, memories, and associations pour forth in an uninterrupted, prerational, and prelogical flow. For examples, see James Joyce’s *Ulysses* (1922), Virginia Woolf’s *To the Lighthouse* (1927), and William Faulkner’s *The Sound and the Fury* (1929).

**Sturm und Drang:** A dramatic and literary movement in Germany during the late eighteenth century. Translated as “Storm and Stress,” the movement was a reaction against classicism and a forerunner of Romanticism, characterized by extravagantly emotional language and sensational subject matter.

**Surrealism:** A revolutionary approach to artistic and literary creation, Surrealism argued for complete artistic freedom: The artist should re-

linquish all conscious control, responding to the irrational urges of the unconscious mind; hence the bizarre, dreamlike, and nightmarish quality of Surrealistic writing. In the 1920's and 1930's, Surrealism flourished in France, Spain, and Latin America. After World War II, it influenced such American writers as Frank O'Hara, John Ashbery, and Nathanael West.

**Symbol:** A literary symbol is an image that stands for something else; it may evoke a cluster of meanings rather than a single specific meaning.

**Symbolism:** A literary movement encompassing the work of a group of French writers in the latter half of the nineteenth century, a group that included Charles Baudelaire, Stéphane Mallarmé, and Paul Verlaine. According to Symbolism, there is a mystical correspondence between the natural and spiritual worlds.

**Theater of Cruelty:** A term, coined by French playwright Antonin Artaud, which signifies a vision in which theater becomes an arena for shock therapy. The characters undergo such intense physical and psychic extremities that the audience cannot ignore the cathartic effect in which its preconceptions, fears, and hostilities are brought to the surface and, ideally, purged.

**Theater of the Absurd:** Refers to a group of plays that share a basic belief that life is illogical, irrational, formless, and contradictory, and that humanity is without meaning or purpose. Practitioners, who include Eugène Ionesco, Samuel Beckett, Jean Genet, Harold Pinter, Edward Albee, and Arthur Kopit, abandoned traditional theatrical forms and coherent dialogue.

**Théâtre d'avant-garde:** A movement in late nineteenth century drama in France that challenged the conventions of realistic drama by using Symbolist poetry and nonobjective scenery.

**Third person:** Third-person narration occurs when the narrator has not been part of the event or affected it and is not probing his or her own relationship to it but is only describing what happened. The narrator does not allow the intrusion of the word "I." Third-person narration establishes a distance between reader and subject, gives credibility to a large expanse of narration that would be impossible for one person to experience, and allows the narrative to include

a number of characters who can comment on one another as well as be the subjects of commentary by the participating narrator.

**Tragedy:** A form of drama that is serious in action and intent and that involves disastrous events and death; classical Greek drama observed specific guidelines for tragedy, but the term is now sometimes applied to a range of dramatic or fictional situations.

**Travel literature:** Writing that emphasizes the author's subjective response to places visited, especially faraway, exotic, and culturally different locales.

**Trilogy:** A novel or play written in three parts, each of which is a self-contained work, such as William Shakespeare's *Henry VI (Part I, pr. 1592; Part II, pr. c. 1590-1591, pb. 1594; Part III, pr. c. 1590-1591, pb. 1594)*. Modern examples include C. S. Lewis's *Space Trilogy* (1938-1945) and William Golding's *Sea Trilogy* (1980-1989).

**Trope:** Literally "turn" or "conversion," a figure of speech in which a word or phrase is used in a way that deviates from the normal or literal sense.

**Verismo:** Refers to a type of Italian literature that deals with the lower classes and presents them realistically using language that they would use. Called *verismo* because it is true to life and, from the writer's point of view, impersonal.

**Verse:** Verse is a generic name for poetry. Verse also refers in a narrower sense to poetry that is humorous or merely superficial, as in "greeting-card verse." Finally, English critics sometimes use "verse" to mean "stanza," or, more often, to mean "line."

**Verse drama:** Verse drama was the prevailing form for Western drama throughout most of its history, comprising all the drama of classical Greece and continuing to dominate the stage through the Renaissance, when it was best exemplified by the blank verse of Elizabethan drama. In the seventeenth century, however, prose comedies became popular, and in the nineteenth and twentieth centuries verse drama became the exception rather than the rule.

**Victorian novel:** Although the Victorian period extended from 1837 to 1901, the term "Victorian novel" does not include works from the later

decades of Queen Victoria's reign. The term loosely refers to the sprawling works of novelists such as Charles Dickens and William Makepeace Thackeray, which are characterized by a broad social canvas.

**Villanelle:** A French verse form assimilated by English prosody. It is usually composed of nineteen lines divided into five tercets and a quatrain, rhyming *aba, bba, aba, aba, abaa*. The third line is repeated in the ninth and fifteenth lines. Dylan Thomas's "Do Not Go Gentle into That Good Night" is a modern example of a successful villanelle.

**Well-made play:** From the French term *pièce bien faite*, a type of play constructed according to a "formula" that originated in nineteenth century France. The plot often revolves around a secret

known only to some of the characters, which is revealed at the climax and leads to catastrophe for the villain and vindication or triumph for the hero. The well-made play influenced later dramatists such as Henrik Ibsen and George Bernard Shaw.

**Weltanschauung:** A German term translated as "world-view," by which is meant a comprehensive set of beliefs or assumptions by means of which one interprets what goes on in the world.

**Zeitgeist:** A German term meaning the spirit of the times, the moral or intellectual atmosphere of any age or period. The zeitgeist of the Romantic Age, for example, might be described as revolutionary, restless, individualistic, and innovative.
